IRPs in red are included in the BEIS APC/SAPC changes

Changes to Technical Specifications

- IRPs fix defects therefore need to be applied to the current Tech Specs regardless of the BEIS Consultation.

- All non-DCC system impacting IRPs can be implemented in November 2020. These will be incorporated into the current Tech Specs (increasing GBCS v3.2 to v3.3, SMETS2 v4.2 to v4.3 etc) and the BEIS draft Tech Specs increasing GBCS v4.0 Draft 2 to Draft 3, SMETS2 v5.0 Draft 3 to Draft 4 etc).
