MP074 Modification Report Consultation

1. Purpose

This is the Modification Report Consultation for MP074 'Clarity on Obtaining SMKI Device Certificates'. We invite you to respond to this consultation in order to help inform the Change Board in its vote on this modification.

The Modification Report is included in this consultation pack, along with a response form containing the questions we seek your views on.

This consultation will close at **17:00** on **Tuesday 9 July 2019**. The Change Board may not be able to consider late responses.

2. Summary of the proposal

What is the issue?

he SMKI PMA and SSC established a secure process for DCC Users who have completed the User Entry Process Tests (UEPT) to obtain SMKI Device Certificates from the DCC via a DCC Gateway connection and an Agreed Interpretation of this process has been published on the SEC website. Unfortunately, this is not clearly reflected in the SEC and could cause ambiguity for DCC Users when requesting SMKI Device Certificates.

What is the Proposed Solution?

After consideration of industry comments and discussions with the DCC, the Proposer believes that the most effective solution is to change the legal text in the SEC to reflect the Agreed Interpretation thereby ensuring there is clarity and consistency in the process of obtaining Device Certificates.

Are there any Alternative Solutions?

MP074 has no alternative solutions.

Will I be impacted?

MP074 is expected to impact the following SEC Parties:

- Large Suppliers
- Small Suppliers
- Electricity Network Operators
- Gas Network Operators
- Other SEC Parties
- DCC

Full details of how this modification may impact you can be found in the Modification Report.

3. Contact

If you have any questions on this modification, please contact **Bradley Baker** on 020 7770 6597 or email sec.change@gemserv.com.
