New Draft Proposals

1. Purpose

This paper provides a summary of the new Draft Proposals raised in the last month.

We seek any initial comments the Operations Group (OPSG) may have on these proposals at this stage in the framework, and agreement on which proposals it will want to provide further input on as they progress.

2. New Draft Proposals

This table lists the new Draft Proposals raised in the last month. Our recommendations on which ones will be of interest to the OPSG are highlighted in Section 3 below.

Full details of each Draft Proposal can be found in the attached draft Modification Reports.

Draft Proposal	Status
DP118 'Communications Hub Finance Charges'	Undergoing development
DP119 'CH Alert Storm Consolidation'	Undergoing development
DP120 'Correcting DUIS Matrix for SRV7.7 Eligible Users'	Undergoing development
DP121 'Commissioning non-commissioned Devices after CoS'	Undergoing development
DP122 'Operational Metrics'	Undergoing development
DP123 'IVP and MVP realignment of SMETS2 v2.1'	Undergoing development

3. Proposals of interest to the OPSG

DP118 'Communications Hub Finance Charges' looks to amend the issue regarding the DCC's invoicing for general Charges and Communications Hub Finance Charges as the process is time consuming and tracking payments has proven difficult.

DP119 'CH Alert Storm Consolidation' has been raised to make potential changes to HAN Devices and Communications Hubs to help address the high priority issue relating to Alert Storms. The aim is to localise the Alerts to the HAN and Communications Hubs.

DP120 'Correcting DUIS Matrix for SRV7.7 Eligible Users' is intended to be a Fast-Track Modification Proposal. The modification will make amendments to the 'Service Request Matrix' found in SEC Appendix AD 'DCC User Interface Specification' following the implementation of SECMP0025 'Electricity Network Party Access to Load Switching Information'.

DP121 'Commissioning non-commissioned Devices after CoS' could potentially impact how Change of Supplier (CoS) No Wide Area Networks (WAN) sites are managed.

DP122 'Operational Metrics' identifies an issue which is related to the PMR Review Project.

DP123 'IVP and MVP realignment of SMETS2 v2.1' should be of keen interest to the OPSG as this could have a potential impact on an energy Supplier's stock.

4. Recommendations

The OPSG is requested to **DISCUSS** the new Draft Proposals and provide any initial views and comments.
