

SEC Change Election 2025: Other SEC Parties Biographies

Ian Lovatt: Senior Product Owner – Chameleon Technology

An embedded Systems Engineer with 16 years' experience designing and testing products related to energy management, Ian has been a key contributor over the years to the development and testing of the ZigBee smart energy and GBCS standards underpinning the device behaviour used within the GB smart metering programme both in SMETS1 and SMETS2. Ian has been an active member of TSIRS since 2016, contributing to solutions for items such as prepayment, sub-GHz and various ZigBee protocol topics. He has recently been engaged in work related to the Smart and Secure Electricity System as well as the Virtual WAN Device programme (VWD/CADg). Ian holds an MEng Electronic Engineering with European Studies from the University of Southampton. I believe my background gives me the experience to contribute to the enduring rollout of smart meters plus help ensure opportunities to leverage the smart metering system in new scenarios are done so responsibly and put the consumer first.

Leon Ross: Director of Service Delivery – Procode

Leon Ross is a distinguished professional with over two decades of experience in the energy sector. Beginning his journey at British Gas, Leon quickly progressed through his career, demonstrating expertise in project, programme delivery and smart metering technologies (Smet1 & Smets2). With a seamless transition to roles of increasing responsibility, including Project Director at SSE plc and Director of Service Delivery at Utilita Energy and now Director of Service Delivery at Procode Technology, Leon has earned a reputation for excellence and leadership. His strategic vision, coupled with a passion for innovation, drives him to continuously exceed expectations and inspire teams to achieve greatness in service delivery and technology advancement.

Nick Winfield- Product Manager - Llandis & Gyr

I am an experienced Electronic Engineer. I joined Elster Meters in 2007 and was responsible for the development of their SMETS1 and SMETS2 electricity meter hardware. I joined Llandis+Gyr in 2019 and have been Product Manager for the Llandis+Gyr E470 electricity meter since then. I am currently on the SMDA sub-committee and a member of the ICHIS Working Group and have been involved in the ongoing development of that specification.

James Murphy: Head of Policy & Regulation - Stark

James has been the Policy and Regulatory lead at Stark since 2018. In that time, he has been a member of the BSC Performance Assurance Board and the Design Working Group and Code Change & Development Group for MHHS. He has a strong network within the RSA/MDR/OU sub-categories for the Other SEC Parties constituency and is an active participant at the Association of Independent Meter & Data Agents (AIMDA). He championed the creation of the MDR User Role through the MHHS design and MP162. He has supported the market entry of Stark's IDNO team, including CSS onboarding. Similarly, he has supported the development and qualification of Stark's OU/MDR DCC User Roles, including UEPT, FUSA and FUPA. He is a regular and active participant in the SEC Change process. Through Stark Utility Funding Ltd. James also has relationships and contacts within the Meter Asset Provider community.
