Action:	For Decision

Approval to implement the February 2023 SEC Release

1. Purpose

The February 2023 SEC Release is due to be implemented on 23 February 2023. Before the changes can go live, the Change Sub-Committee (CSC), under delegated authority from the Panel, is required to review progress against the acceptance criteria in the Release Implementation Document (RID) and give final approval to proceed.

This paper requests that the CSC approves the SEC Release to go live.

2. Release scope

The February 2023 SEC Release will include the following Modification Proposals:

Modification	Status	Impacts DCC Systems?
MP167A 'Review of SEC documents (Testing Approach Document criteria)'	Approved for inclusion.	
MP172 'Reduced CPA & CPL requirements for innovation and Device field trials'	Approved for inclusion.	
MP210 'RSA forecasts, orders and pay stock charges for Alt HAN Equipment'	Approved for inclusion.	

The Release Implementation Document (RID) for this release can be found in Appendix A.

3. Review of readiness against the operational acceptance criteria

The CSC agreed a set of operational acceptance criteria in the RID that will need to be met before the February 2023 SEC Release can go live.

OPSG view against DCC's readiness for the release

The Operations Group (OPSG) determined that there would be no operational impacts arising from the February 2023 SEC Release and therefore no associated operational risks.

4. Approval to proceed

Based on the views of the OPSG, we believe that the February 2023 SEC Release is ready to be set live on 23 February 2023. We therefore recommend that the CSC approves the release to be implemented.

5. Recommendations

The CSC is requested to:

- **AGREE** that the February 2023 SEC Release can be set live on 23 February 2023.
