Western Power Distribution	Networks Party	Approve	We believe that this SEC Modification should be approved as it better facilitates SEC Objective (a) by providing efficient operation of Smart Metering Systems.	N/A

Question 2: Please provide any further comments you may have

Question 2			
Respondent	Category	Comments	SECAS Response
OVO Energy	Large Supplier	Our original concerns around the funding have been addressed now that DCC has clarified its position.	N/A
British Gas	Large Supplier	No comment.	N/A
Western Power Distribution	Networks Party	We would like it noted that we think the wording in this modification and in response to industry comments during refinement are misleading. The modification is stating that there will be no further costs, however our understanding is that there will be, just that they will be explicit charges rather than being paid by all parties. This is also detailed in Appendix J, 14.4-14.5 and 16.3 – 16.4. We have the following comments to make regarding the legal text: - We cannot find definitions for the new capitalised terms, 'RF Noise Testing', 'Interoperability and Innovation Events', 'GFI Testing', 'Wired Instrumented Test Communications Hubs' and 'Testing Tools'. - K7.5 (w) – there appears to be a blank line missing between (v) and (w). - K7.5 (w) – 'Charing period' should be 'Charging Period'	SECAS will investigate the legal text comments with the Proposer which will result in v1.1 of the legal text being produced.
