MP220 ‘MMC Changes resulting from GBCS v4.1 Device Testing’ Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP220 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP220 should be approved?

Question 1				
Respondent	Category	Response	Rationale	SECAS Response
British Gas	Large Supplier	Yes	We agree that this will better support General SEC Objective (a), and specifically ensure that there won't be incorrect 'error messages'.	-
OVO Energy	Large Supplier	Yes	We believe that the solution will address the identified issue.	-
Nation Grid Electricity Distribution	Network Party	Yes	We believe that this modification will better facilitate General SEC Objective (a).	-

Question 2: Please provide any further comments you may have

Question 2			
Respondent	Category	Comments	SECAS Response
British Gas	Large Supplier	-	-
OVO Energy	Large Supplier	We are disappointed that this was not picked up during the modification process despite IA's being carried out by DCC. Although we are a part of the modification process, a lot of trust does have to go into these assessments and we trust that DCC will pick up on such an oversight prior to testing.	The documents are reviewed by several Parties, including different subgroups and organisations. SECAS will continue to work with the DCC to seek improvements in the review process.
Nation Grid Electricity Distribution	Network Party	We question if there is only a PDF version of the legal text available, as we are unable to open the embedded document to review.	Legal text sent to respondent in Word and PDF format.
