

Michael Snowden – Technical Manager Smart Metering – Secure Meters

Michael is currently a ‘Other SEC Party’ representative on SEC OPSG, CTG, Panel and an ‘Other User’ on SSC, where he continues to support industry to ensure that SMIP/SEC remains fit for purpose and contains proportionate obligations that deliver the cost benefits to industry/consumer by contributing an OSP perspective.

Michael has over 20 years’ experience in the Smart Metering business, employed at Secure Meters UK Ltd where he is currently focused on GB SMIP as part of its SMETS metering product developments, DCC S1SP, S1CSP, and SMETS1 MOC Enrolment & Adoption programmes.

This places Michael in a unique position having a wide range operational understanding of the DCC user requirements, end to end systems, asset life, device interoperability, firmware management, prepayment, etc to represent OSPs.

Geoff Huckerby - Consultant - Powerdata

Geoff is a consultant for the Association of Meter Operators (AMO). The AMO members cover a number of different roles including MEMs, MDRs & RSAs. AMO members include all the major MEMs covering metering installation throughout Great Britain for domestic and non-domestic consumers across gas and electricity. Geoff also represents the AMO on the SEC Communications Transition Group and the REC Metering Expert Panel. As an Other SEC Parties representative Geoff is well placed to represent parties that may not be DCC Users but are affected by the DCC Operations

James Murphy - Policy and Regulatory lead - Stark

James has been the Policy and Regulatory lead at Stark since 2018. In that time, he has been a member of the BSC Performance Assurance Board and the Design Working Group and Code Change & Development Group for MHHS. He has a strong network within the RSA/MDR/OU sub-categories for the Other SEC Parties constituency and is an active participant at the Association of Independent Meter & Data Agents (AIMDA). He championed the creation of the MDR User Role through the MHHS design and MP162. He has supported the market entry of Stark’s IDNO team, including CSS onboarding. Similarly, he has supported the development and qualification of Stark’s OU/MDR DCC User Roles, including UEPT, FUSA and FUPA. He is a regular and active participant in the SEC Change process. Through Stark Utility Funding Ltd. he also has relationships and contacts within the Meter Asset Provider community.
