MP282 ‘Removal of Registration Check for Suppliers using SR8.9 targeting SMETS2+ CHF’

Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP282 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP282 should be approved or rejected?

Question 1				
Respondent	Category	Response	General SEC Objective(s)	Rationale
Octopus Energy	Large Supplier	Approve	(a)	We believe that this modification would help facilitate SEC Objective (a) as the removal of the validation for Import and Gas Supplier roles on SR8.9 would help with the approach and triage of Trust Centre Swap Outs (TCSO) and improve Suppliers capability to take steps to avoid/resolve any issues. The issue highlighted in the Modification Report is niche and has been discussed in several forums, however the changes should be minor and therefore not require a significant amount of cost/effort in comparison to the customer impact and costs associated with having to do a full I&C. Although, it would have been helpful if the DCC internal Change Request costs could have been shared to feel confident in this position.

Question 2: Please provide any further comments you may have.

Question 2		
Respondent	Category	Comments
Octopus Energy	Large Supplier	No further comments.
