MP195 ‘Security Sub-Committee guidance on Device Assurance’ Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP195 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP195 should be approved?

Question 1			
Respondent	Category	Response	Rationale
Scottish Power Energy Retail	Large Supplier	Approve	Smart meter removal and disposal currently represents a significant cost to the industry. This MOD seeks to streamline the development of processes that will permit energy suppliers to reuse meters and therefore will facilitate better SEC Objective (a).
OVO Energy	Large Supplier	Approve	We believe that this will strengthen triage support commitments.
Smart Meter Assets	Other SEC Party	Approve	-
Western Power Distribution	Network Party	Approve	We believe this modification will better facilitate the General SEC Objectives (a) to facilitate the efficient provision, installation, and operation, as well as interoperability, of Smart Metering Systems at Energy Consumers' premises within Great Britain. And General SEC Objective (f) to ensure the protection of Data and the security of Data and Systems in the operation of this Code.
British Gas	Large Supplier	Approve	General SEC Objectives (a) and (f).
Landis+Gyr	Other SEC Party	Approve	The re-use of fault free assets is in line with good environmental policy and the drive towards net zero. Providing an updated set of guidelines provides manufacturers with the clarity to develop approved functionality to support this drive and MAPs and suppliers with the processes required to make use of it.

Question 2: Please provide any further comments you may have

Question 2		
Respondent	Category	Comments
Scottish Power Energy Retail	Large Supplier	N/A
OVO Energy	Large Supplier	-
Smart Meter Assets	Other SEC Party	SSC maintenance of these guidelines is essential for practical operation and maintenance of meters and triage related use cases.
Western Power Distribution	Network Party	-
British Gas	Large Supplier	This seems sensible.
Landis+Gyr	Other SEC Party	The guidance needs to be updated in a timely manner when new changes come into effect and be clear about the timescales of any change including but not limited to existing deployed devices and processes.
