MP125 ‘Correcting Device Information for the ESME Variant’

Conclusions Report – version 0.1

About this document

This document summarises the responses received to the Modification Report Consultation.

Summary of conclusions

Modification Report Consultation

SECAS received three responses to the Modification Report Consultation. All respondents believed that the modification should be approved. They agreed that [MP125 ‘Correcting Device Information for the ESME Variant’](#) better facilitated SEC Objective (a)¹.

¹ Facilitate the efficient provision, installation, operation and interoperability of smart metering systems at energy consumers’ premises within Great Britain.

Modification Report Consultation responses

Summary of responses

Three responses were received to the Modification Report Consultation.

All three respondents (two Large Supplier and one Network Party) agreed MP125 better facilitated SEC Objective (a) as it would provide Suppliers with the means to ensure Electricity Smart Metering Equipment (ESME) Variant data is accurate and up to date and reflective of any potential change. One respondent advised allowing the responsible Supplier to update the ESME Variant field enhances the overall measurement and operation of associated ESMEs in line with their intended use.

Overall, the response to the implementation of this modification was positive with no objections raised in the Modification Report Consultation.
