Set out below is the draft SEC legal text that will deliver the intent of the SECMP0033 proposed solution. The changes have been drafted against SEC Version 5.4.

Add the following definitions to Section A1.1:

Service Management	means a query raised by a Party via the Self-Service
Service Request	Interface and/or the Service Desk.

Amend 3.3 of Appendix H – CH Handover Support Materials as follows:

3 FORECASTING AND ORDERING COMMUNICATIONS HUBS

3.3 Where a Party requires SM WAN coverage information for an Installation Location where there is no associated postcode, the Party may raise an Service Management Service Request Incident with the DCC₁ and in doing shall provide the geographic latitude and longitude₁ for the Installation Location ~~as part of the initial diagnosis information required by the Incident Management Policy~~. The DCC shall resolve the Service Management Service Request Incident by providing SM WAN coverage information for the Installation Location to the Party which raised the matter, and by shall additionally allocatinge the Installation Location to a Region.
