

MP214 ‘Clarification of Acceptable DCC User IDs for Import and Export Suppliers’

Business requirements – version 0.1

About this document

This document contains the business requirements that support the solution for this Modification Proposal. It sets out the requirements along with any assumptions and considerations. The Data Communications Company (DCC) will use this information to provide an assessment of the requirements that help shape the complete solution.

1. Business requirements

This section contains the functional business requirements. Based on these requirements a full solution will be developed.

Business Requirements	
Ref.	Requirement
1	Smart Energy Code (SEC) Parties acting in the DCC User Roles 'Import Supplier' and 'Export Supplier' will be able to use the same DCC User ID for each User Role.

2. Considerations and assumptions

This section contains the considerations and assumptions for each business requirement.

2.1 General

This solution will have no impact on Devices.

2.2 Requirement 1: SEC Parties acting in the DCC User Roles 'Import Supplier' and 'Export Supplier' will be able to use the same DCC User ID for each User Role.

As per the drafting of SEC Section H 'DCC Services' 1.5, SEC Parties are excluded from using the same DCC User ID for the User Roles 'Import Supplier' and 'Export Supplier' unless they are also a 'Gas Supplier'.

The Proposer believes that there is no reason Parties should be prevented from using the same DCC User ID when acting in the User Roles 'Import Supplier' and 'Export Supplier' only. They believe no change is required to DCC Systems or processes to accommodate this change, and that only the SEC wording needs to be amended to clarify that this is acceptable.

3. Glossary

This table lists all the acronyms used in this document and the full term they are an abbreviation for.

Glossary	
Acronym	Full term
DCC	Data Communications Company
SEC	Smart Energy Code
