Technical Architecture and Business Architecture Sub-Committee (TABASC) Meeting 88X Headlines on 20 April 2023

The following items were discussed:

- The DCC presented the TABASC with an update on the DCC Service Management System (DSMS) Programme, highlighting the mandatory business needs for the to-be DSMS. The **DCC** proposed that it would return to a future meeting to highlight any DCC User and System considerations as a result of the introduction of a new DSMS, as well as providing a view of any desirable requirements and alignment of requirements between the REC and SEC. The TABASC **NOTED** the update (TABASC_88X_2004_02).
- The DCC provided TABASC with its final update on Over-the-Air (OTA) investigations and presented its analysis on its three concluded work streams under the sub-categories Data Analysis, Technical Queries and Production Testing. The TABASC **NOTED** the update (TABASC_88X_2004_03).
- The DCC presented their proposal for Cloud Provider Options for their Application Programming Interface (API) Gateway, along with some reasoning for their preferred option. The TABASC **QUERIED** the DCC's decision methodology for reaching its preferred option and **REQUESTED** that the DCC provides an understanding of what factors have been considered when choosing a Cloud Provider to support the API gateway, noting DCC's intention to contract through a third party. The TABASC **NOTED** the update. (TABASC_88X_2004_04).
- The DCC presented their Annual Outage Plan to address the Operations Group (OPSG) action, (OPSG 90/09, "The DCC to present the slide "CSP C&S & No Prepayment Service Impact: High Level Architecture View" to TABASC at its next meeting), to provide a view of the High-Level Architecture for VM01 that was shared at OPSG90, showing there would be no impact to prepayment consumers. The TABASC **NOTED** the update (TABASC_88X_2004_05).
