

Triage Tool & Triage System Interface Assurance Status

This is to certify that

EDMI Europe Ltd UK Limited

has satisfied the CPA Build Standard for the Triage Tool and Triage System Interface set out below as required by the "Triage interface updates to GSME, ESME, SAPC & CH SCs and CPA Build Standard Extensions v3.0".

SEC Section G12.4 (b) applies for Triage Facility Providers

**Authorised by the SEC Security Sub-Committee (SSC)
at SSC Meeting**
Meeting number 231
on 28 January 2026

APPROVED FROM
28 January 2026

NEXT APPROVAL DUE
To align with the expiry of the current
CPA Build Standard.

The CPA Build Standard compliance is satisfied for:

Triage System: comprising the EDM I SMETS2 Triage system for EDM I ES-1X Series Electricity Meters; EDM I ES 30B Electricity Meters; EDM I GS-60B and GS-60C variant Gas Meters; and EDM I GS-68B Gas Meters.

Triage Tool: comprising the EDM I SMETS2 Triage Tool. The Triage Tool must be 'locked down' and not allow any changes to functionality or configuration settings in the Triage Facility.

Triage System Interface: the EDM I SMETS2 Triage System Interface is a secure TLS Virtual Private Network (VPN) site to site encrypted link provided by the EDM I to connect its Triage System to a Triage Tool at a Triage Facility and provides authentication, confidentiality and integrity of communications between the Triage System and the Triage Tool.
