

This is to certify that
Green Energy Options Ltd

qualify to be issued with a VWKI Device Certificate
for the Device Model listed below having satisfied
the criteria in SEC Section F2.41.

Virtual WAN Device Model: IHD based

Device : 10:90|00:0C|

Firmware Version: 11:09:00:00

Authorised ex-committee and formally approved at SSC Meeting (230) 14 January 2025.

Conditions that apply to this Certificate: Green Energy Options Limited must promptly notify the SEC Security Sub-Committee (SSC) if:

- there are any changes to the interface requirements of a Virtual WAN Device as set out in the Virtual WAN Provider Interface Specification (SEC section F2.41(a));
- the Device Model fails to meet the principles of ETSI 303 645 or becomes unable to be upgraded to meet such principles (SEC section F2.41(b));
- the virtual WAN functionality of the Device Model will (i) fail to operate following a change of Responsible Supplier; (ii) become dependent on any post-installation changes; and (iii) will be adversely affected by any actions of the VWD manufacturer (SEC section F2.41(c));
- the VWD Manufacturer becomes aware of any material security incidents or vulnerabilities identified in any VWD.
