## ALCS/HCALCS Label List v1.1

Label	Description
Water Heating	Any hot water storage system.
Heating (Pool/Jacuzzi)	Any hot water storage system that explicitly states it is in use for a swimming pool/jacuzzi.
Space Heating	Any electric heating system used to provide space heating (e.g. storage radiators, underfloor heating).
Electric Vehicle	This switch is utilised to control the charging point for an electric vehicle.
Not Installed	It is assumed that all meters have up to five internal switches. If the meter has less than five switches then, on initial installation, the inventory should be informed of the number of available switches. For example, if a meter has 2 switches, switches 3 to 5 should be labelled as 'Not Installed'.
