Action:	For Decision

SMETS1 Services Release Business Architecture Document Changes

1. Purpose

This paper provides the Technical Architecture and Business Architecture Sub-Committee (TABASC) with a draft Project Initiation Document (PID) for undertaking the review and then actioning the necessary updates to the Business Architecture Document (BAD) to capture the changes being implemented as part of the SMETS1 Services Release.

2. Project Initiation Document

At the December 2018 TABASC meeting, a high-level approach for undertaking future reviews of the BAD was provided. In addition, details of the high-level approach and timescales for producing a new version of the BAD to reflect the content covered by SMETS1 Services Release was provided. It was noted that initial analysis needed to be undertaken to identify the extent of the impacts that the SMETS1 Services Release has on the BAD.

The initial analysis is complete, which has enabled a PID to be produced setting out more details in support of taking this piece of work forward. The SMETS1 Services Release BAD Updates PID is provided in Appendix A.

3. Next Steps

A project update is provided as TABASC_39_2102_12 – SMETS1 Business Architecture Document Project Update – January 2019 to outline progress made in the interim, including an update on resource use and expenditure to date. Subject to TABASC feedback and approval of the PID, a project update will be presented to the TABASC in March 2019 on the progress made towards Milestone 2 – Draft changes to create a version of the BAD containing the SMETS1 Services Release.

4. Recommendations

The TABASC is requested to:

- **NOTE** the contents of this paper; and
- **APPROVE** the PID BAD SMETS1 Services Release Changes, provided in Appendix A.
