## SECMP0055 ‘Incorporation of multiple Issue Resolution Proposals into the SEC’ IRP List

### 1. Purpose

The purpose of this paper is to decide whether the SECMP0055 ‘Incorporation of multiple Issue Resolution Proposals into the SEC’ is suitable for delivering the modification’s solution.

### 2. Context and Proposed Solution

In the early stages of the Smart Metering Implementation Program, the Department for Business, Energy & Industrial Strategy (BEIS) took the lead in developing the technical specifications that sit under the SEC. As part of this, BEIS also took responsibility for receiving and responding to issues raised internally, by the DCC and other interested industry parties. Since its inception, several hundred issues have been raised in relation to technical specifications under the SEC through the TSIRS (Technical Specification Issue Resolution Sub-Group) group. In some cases, these queries have been resolved by providing an explanation of the specifications, whilst some have resulted in proposed amendments to the specifications in the form of IRPs.

This modification proposes to implement several IRPs that have been developed and agreed by TSIRS. As part of this modification’s refinement, SECAS, the Proposer and the Working Group considered each of the 32 candidate IRPs for inclusion in this Modification Proposal. The final list of IRPs for this Modification excludes any IRP where there has been a system impact identified. The excluded IRPs will be the subject of a subsequent modification.

### 3. IRP List

Please find as an attachment to this paper the post-consultation finalised list of IRPs that SECMP0055 will plan to include in its solution. We invite the TABASC to review this list and agree that the list will deliver document only changes. If there are any IRPs that will cause changes to functionality in any of the affected documents, we ask the TABASC members to highlight these and provide accompanying rationale so we can remove these impacting IRPs prior to submitting the modification report to Panel in May 2019 to confirm the changes in the scope of the proposed solution.

#### 4. Recommendations

The TABASC is requested to:

- **NOTE** the contents of this paper;
- **CONSIDER** the contents of the SECMP0055 IRP list put forward; and
- **AGREE** the SECMP0055 IRP list is suitable for delivering document-only changes in the proposed solution.

Harry Jones
