SECMP0056 Refinement Consultation

1. Purpose

This is the Refinement Consultation for [SECMP0056 'IHD / PPMID Zigbee Attributes Available on the HAN'](#). We invite you to respond to this consultation in order to help the Proposer in the development of this modification.

The draft Modification Report is included in this consultation pack, along with a response form containing the questions we seek your views on.

This consultation will close at **5pm on Thursday 20 June 2019**. We may not be able to consider late responses.

2. Summary of the proposal

What is the issue?

Currently under the SEC, Smart Metering Equipment Technical Specification (SMETS) 2 Type 1 and Type 2 devices (specifically In-home Displays (IHDs) and Prepayment Meter Interface Devices (PPMIDs)) are not notified of a Change of Tenancy (CoT) event. This could potentially result in a new occupant accessing the previous occupant's personal information and place the Supplier in breach of the General Data Protection Regulation (GPDR).

What is the Proposed Solution?

The solution proposes to make Zigbee attributes for CoT parameters available to Home Area Network (HAN) Devices such as IHDs and PPMIDs and also mandate IHDs and PPMIDs to query the Electricity Smart Metering Equipment (ESME) and Gas Proxy Function (GFP) for CoT information.

Will I be impacted?

SECMP0056 is expected to impact the following SEC Parties:

- Large Supplier Parties;
- Small Supplier Parties; and
- Other SEC Parties.

Full details of how this modification may impact you can be found in the Modification Report.

3. Contact

If you have any questions on this modification, please contact **Ali Beard** on 020 3970 1105 or email sec.change@gemserv.com.
