SECMP0055 ‘Incorporation of multiple Issue Resolution Proposals into the SEC’

Modification Report Consultation responses

About this document

This document contains the full non-confidential collated responses received to the SECMP0055 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that SECMP0055 should be approved?

Question 1			
Respondent	Category	Response	Rationale
EDF	Large Supplier	Approve	We agree that SECMP0055 will better facilitate SEC Objective (a) as it will ensure that the Technical Specifications are accurate, unambiguous and implemented consistently across SEC Parties. We also agree that SECMP0055 will better facilitate SEC Objective (b) as it will ensure that the Technical Specifications are aligned with the DCC's design, and enable DCC's services to be used effectively in line with their licence obligations. We believe that SECMP0055 is neutral to the other SEC Objectives.
SSE Retail	Large Supplier	Approve	We support that SECMP0055 will better facilitate SEC Objective (a) as incorporating the selected IRPs into the SEC will reduce the risk of future operational issues arising and enable consistent implementation. We support that SECMP0055 will better facilitate SEC Objective (b) as implementing the IRP reduces the risk that the implemented solution needs adjusting to align to the Technical Specification or that a part of the solution is deemed non-compliant. Our view is that SECMP0055 is neutral for SEC Objective (g).

Question 2: Please provide any further comments you may have
