MP071 ‘Second-Comer Charging’ Modification Report Consultation responses

About this document

This document contains the full non-confidential collated responses received to the MP071 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP071 should be approved or rejected?

Question 1			
Respondent	Category	Response	Rationale
EDF Energy	Large Supplier	Approve	<p>We agree that MP071 better facilitates SEC Objective (g) as it aligns the content of the SEC with the actual operation of the DCC.</p> <p>We believe that this change is neutral against the other SEC Objectives, including Objective (a) – there is no evidence that this improves the actual operation of smart metering.</p>
Scottish Power	Large Supplier	Approve	<p>We agree that Objective (a) would be better facilitated by the implementation of MP071 in that, by improving the efficiency with which a Gateway connection is provided, it will better affect the operation of Smart Metering Systems.</p> <p>We also agree that its implementation would better facilitate Objective (g) in that we would expect SEC Section K to be more efficiently discharged as a result.</p>
DCC	DCC	No interest	<p>We believe the legal text is a pragmatic solution which provides the best outcomes for all industry. We consider the proposed solution is economic and efficient and represents a simplification of the User onboarding process which will provide benefits for all Users and Users types, most especially small Suppliers, IDNOs and iGTs.</p>

Question 2: Please provide any further comments you may have

Further comments		
Respondent	Category	Comments
EDF Energy	Large Supplier	N/A
Scottish Power	Large Supplier	N/A
DCC	DCC	N/A
