DP078 Draft Proposal decision

1. Purpose

This paper provides a summary of our assessment of [DP078 'Incorporation of multiple Issue Resolution Proposals into the SEC – Part 2'](#), taking into account industry views and views of the Panel Sub-Committees on the problem this Draft Proposal has identified. We are asking the Change Sub-Committee (CSC) to agree that this Draft Proposal should progress to a Modification Proposal.

2. What is the issue?

DP078 was raised by Simon Trivella of British Gas.

Issue Resolution Proposals (IRPs) identify issues within the SEC Technical Specification documents and put forward a solution to the identified problems through a BEIS-lead group, the Technical Specification Issue Resolution Sub-Group (TSIRS). The incorporation of these IRPs into the SEC has been handed over to SECAS for changes to be implemented through the Modifications Process. This Draft Proposal will progress the DCC System impacting IRPs into the SEC.

The problem statement containing the information provided by the Proposer and updated by SECAS during our initial investigations can be found in Appendix A.

3. Comments on the issue

No comments have been received in relation to this Draft Proposal at this stage. DP078 will be presented to the Technical Architecture and Business Architecture Sub-Committee (TABASC) on 18 July 2019 for comment on the problem statement. The CSC will be given a verbal update on any comments received from the TABASC.

We have been working with the TABASC to agree an approach for implementing these IRPs into the SEC through the SEC Modification Process.

4. Next steps

Due to the nature of this Draft Proposal there is a solution already associated with each of the IRPs that resolves the identified issue. We welcome any comments from the CSC before it is presented to Panel. This Modification Proposal will need to undergo the Refinement Process in order for a DCC Assessment of the impacts on the DCC Systems to be completed.

If the SEC Panel agree to convert this Draft Proposal to a Modification Proposal on 9 August 2019, the Modification Proposal will be submitted for a Preliminary Assessment immediately after. Following the return of the Preliminary Assessment from the DCC, the Modification Proposal will likely go to the September Working Group meeting on 4 September 2019.

5. Recommendations

The Change Sub-Committee are requested to:

- **AGREE** that the issue identified under DP078 is clearly defined and understood;
- **RECOMMEND** to the Panel that this Draft Proposal should be converted to a Modification Proposal; and
- **RECOMMEND** to the Panel that the Modification Proposal should proceed to the Refinement Process.

Jordan Crase
