## DP081 Draft Proposal decision

### 1. Purpose

This paper provides a summary of our assessment of [DP081 'Alignment of DUIS and CHISM to reflect current DCC Processing'](#), taking into account industry views and views of the Panel Sub-Committees on the problem this Draft Proposal has identified. We are asking the Change Sub-Committee (CSC) to agree that the problem identified under this Draft Proposal is clearly understood and that it is ready to progress to a Modification Proposal.

### 2. What is the issue?

DP081 has been raised by Helen Metcalfe of the DCC.

Following assurance at the DCC Design Release Forum with Customers, and internal DCC review regarding incident resolution activity, a need to include clarification in the SEC around DCC processing was identified. This clarification should provide a detailed explanation of current DCC processing and align the SEC to reflect this. The DCC is concerned that points of detail that are not currently described could adversely affect User understanding of DCC Systems. If not amended, this is likely to lead to DCC Incidents which could otherwise be avoided.

The problem statement containing the information provided by the Proposer and updated by SECAS during our investigations can be found in Appendix A.

### 3. Comments on the issue

The Operations Group, the Security Sub-Committee (SSC), the Smart Meter Key Infrastructure Policy Management Authority (SMKI PMA), and the Technical Architecture and Business Architecture Sub-Committee (TABASC) were advised of this Draft Proposal. They agree this issue should be addressed. We have had one comment from SEC Parties, which also agrees that the SEC should address this issue.

The full collated comments and questions raised can be found in Appendix B.

#### 4. Next steps

During the investigation of this Draft Proposal, we and the Proposer have agreed that there is a solution which we both feel resolves the issue; please see the proposed legal text in Appendix C. We welcome any comments from the CSC before this is presented to the Panel. We recommend that the Modification Proposal should proceed straight to the Report Phase.

#### 5. Recommendations

The CSC is requested to:

- **AGREE** that the issue identified under DP081 is clearly defined and understood;
- **RECOMMEND** to the Panel that this Draft Proposal is ready to be converted to a Modification Proposal; and
- **RECOMMEND** to the Panel that the Modification Proposal should proceed to the Report Phase.

Jordan Crase
