## MP081 Modification Report Consultation

### 1. Purpose

This is the Modification Report Consultation for [MP081 'Alignment of DUIS and CHISM to reflect current DCC Processing'](#). We invite you to respond to this consultation in order to help inform the Change Board in its vote on this modification.

The Modification Report is included in this consultation pack, along with a response form containing the questions we seek your views on.

This consultation will close at **17:00 on Friday 8 November 2019**. The Change Board may not be able to consider late responses.

### 2. Summary of the proposal

#### What is the issue?

The DCC Design Release Forum and an internal DCC review identified a need to include clarification in the SEC around DCC processing. This clarification should provide a detailed explanation of current DCC processing and align the SEC to reflect this. The DCC is concerned that points of detail that are not currently explained could adversely affect User understanding of DCC Systems. If not amended, this is likely to lead to DCC Incidents which could otherwise be avoided.

#### What is the Proposed Solution?

The proposed solution is to align the SEC to accurately reflect the DCC processing. The need for clarification of the DCC processing description has been identified in two SEC Appendices: Appendix I 'CH Installation and Maintenance Support Materials' (CHISM) and Appendix AD 'DCC User Interface Specification' (DUIS). Further details can be found in the Modification Report, including a full breakdown in the legal text in Annex A.

#### Will I be impacted?

No SEC Parties will be affected by the implementation of MP081, but will benefit from the clarity it provides.

### 3. Contact

If you have any questions on this modification, please contact **Jordan Crase** on 020 3574 8863 or email [sec.change@gemserv.com](mailto:sec.change@gemserv.com).
