MP081 ‘Alignment of DUIS and CHISM to reflect current DCC Processing’ Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP081 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP081 should be approved?

Question 1			
Respondent	Category	Response	Rationale
British Gas	Large Supplier	Approve	We believe that implementation will better facilitate the first General SEC Objective to facilitate the efficient provision, installation, and operation, as well as interoperability, of Smart Metering Systems at Energy Consumers' premises within Great Britain by ensuring alignment of the processes DCC operate and the requirements set out SEC Appendix I "CH Installation and Maintenance Support Materials" document. This may also better facilitate the seventh General SEC Objective to facilitate the efficient and transparent administration and implementation of this Code [but to a lesser extent].
EDF Energy Customers Ltd	Large Supplier	Approve	We agree that MP081 should be approved on the basis it better facilitates SEC Objective (a). This is because updating the SEC to be reflective of the way systems and processes actually work in practice will support Users in accessing DCC services more effectively.

Question 2: Please provide any further comments you may have

Question X		
Respondent	Category	Comments
British Gas	Large Supplier	N/A
EDF Energy Customers Ltd	Large Supplier	N/A
