MP097 ‘Improving SMETS2 Meter Installs for New Connections’

Legal text – version 0.1

About this document

This document contains the redlined changes to the SEC that would be required to deliver this Modification Proposal.

These changes have been drafted against SEC Version 6.20.

This document contains the changes required to deliver the Proposed Solution.

Appendix H 'CH Handover Support Materials'

Amend Section 3 as follows:

SM WAN coverage information

3.2 The DCC shall provide Parties with information regarding SM WAN coverage at potential Installation Locations and the WAN Variant (and, where applicable, the Communications Hub Auxiliary Equipment) required for each Installation Location via the SM WAN Coverage Database. The DCC shall make the SM WAN Coverage Database information available via:

- (a) the Self Service Interface;
- (b) responses to Service Request 12.1 (Request WAN matrix); or
- (c) a reasonable alternative method, as specified by the DCC, where the methods specified in clauses 3.2(a), 3.2(b) are not available.

3.3 Where a Party requires SM WAN coverage information for an Installation Location where there is no associated postcode in DCC Systems, the Party may raise a Service Management Service Request with the DCC, and in so doing shall provide the geographic latitude and longitude, for the Installation Location. The DCC shall resolve the Service Management Service Request by providing SM WAN coverage information for the Installation Location to the Party which raised the matter, and by additionally allocating the Installation Location to a Region.
