DP099 Draft Proposal decision

1. Purpose

This paper provides a summary of our assessment of [DP099 'Incorporation of multiple Issue Resolution Proposals into the SEC – Batch 4'](#), taking into account industry views and views of the Panel Sub-Committees on the problem this Draft Proposal has identified. We are asking the Change Sub-Committee (CSC) to agree that the problem identified under this Draft Proposal is clearly understood and that it is ready to progress to a Modification Proposal.

2. What is the issue?

DP098 has been raised by Chun Chen of the Data Communications Company (DCC).

Issue Resolution Proposals (IRPs) identify issues within the SEC Technical Specification documents and put forward a solution to the identified problem. Since inception, several hundred issues have been raised in relation to technical specifications under the SEC through the Technical Specification Issue Resolution Sub-Group (TSIRS). This process was handed over from BEIS to SECAS for changes to be implemented through the Modifications Process.

This Proposal has been raised to introduce two system impacting IRPs which require changes to the GB Companion Specification (GBCS).

The problem statement containing the information provided by the Proposer and updated by SECAS during our investigations can be found in Appendix A.

3. Comments on the issue

No comments have been received in relation to this Draft Proposal.

4. Next steps

Due to the nature of this Draft Proposal there is a solution already associated with each of the IRPs that resolves the identified issue. As the IRPs included in this proposal are DCC System-impacting, a DCC Assessment will be required, and so this proposal will be required to undergo the Refinement Process.

5. Recommendations

The CSC is requested to:

- **AGREE** that the issue identified under DP099 is clearly defined and understood;
- **RECOMMEND** to the Panel that this Draft Proposal should be converted to a Modification Proposal; and
- **RECOMMEND** to the Panel that the Modification Proposal should proceed to the Refinement Process.

Jordan Crase
