DP099 Problem Statement

1. Purpose

Draft Proposal [DP099 'Incorporation of multiple Issue Resolution Proposals into the SEC - Batch 4'](#) was raised by the DCC and has undergone the Development Stage. The Change Sub-Committee believes this Draft Proposal is ready to be converted to a Modification Proposal. This paper sets out our proposed approach for progressing this modification for the Panel's approval. We are recommending that this modification be progressed to the Refinement Process, and that the Panel agrees the first package of work to be undertaken.

This paper provides a high-level summary of the key points. A copy of the problem statement submitted by the Proposer can be found in Appendix A.

2. Summary of the issue

Issue Resolution Proposals (IRPs) identify issues within the SEC Technical Specification documents and put forward a solution to the identified problems through the BEIS-lead Technical Specification Issue Resolution Sub-Group (TSIRS). The incorporation of these IRPs into the SEC has been handed over to SECAS for changes to be implemented through the Modifications Process. This Proposal will progress the DCC System impacting IRPs additional to [MP078 'Incorporation of multiple Issue Resolution Proposals into the SEC - Part 2'](#) into the SEC.

3. Proposed progression

The Change Sub-Committee has agreed that this Draft Proposal is ready to be converted to a Modification Proposal. This modification will need to be progressed to the Refinement Process to allow for DCC Assessments of the solutions agreed by the TSIRS to be completed.

Work package and timetable

We propose the following first package of work to be undertaken during the Refinement Process:

Activity	Date
Request Preliminary Assessment	W/C 20 Jan 20
Discuss at the March Working Group meeting	4 Mar 20

Activity	Date
Update Panel on progress	13 Mar 20

Areas of assessment

We do not believe there are any further questions that need to be considered in addition to the standard assessment areas.

4. Recommendations

The Panel is requested to:

- **AGREE** that DP099 is ready to be converted to a Modification Proposal;
- **AGREE** that MP099 should be progressed to the Refinement Process; and
- **AGREE** the first package of work and the timetable for MP099.
