## MP093 Request for Impact Assessment

### 1. Purpose

The solution for [MP093 'Implementing IRP511 and CRP535 to support GBCS v3.2 devices'](#) is ready to be issued for a DCC Impact Assessment. The Change Board is invited to determine whether the DCC Impact Assessment should be requested.

### 2. Summary of the proposal

#### What is the issue?

In July 2019 BEIS designated an uplift of the GB Companion Specification (GBCS) to version 3.2 as part of the November 2019 SEC Release.

In order to fully deliver the functionality of two resolution proposals included in GBCS v3.2 (IRP511 'Set Clock Alerts Refs in Alert Tables Incorrect' and CRP535 'Restoring Removed Devices from the HAN'), consequential changes are required to the DCC User Interface Specification' (DUIS) and Message Mapping Catalogue (MMC) schemas.

The amendments to the schemas had been intentionally left out of the November 2019 SEC Release in order to reduce any potential impact on testing for the SMETS1 Initial Operating Capacity (IOC).

#### What is the solution?

In order to fully implement IRP511 and CRP535 changes are required to the Data Service Provider (DSP) and Parse & Correlate to provide capability for Users to configure this Alert and use their full functionality. To achieve this, the DUIS and MMC Schemas must be amended.

### 3. Views on the modification

This modification has not yet been to the Working Group. Since there is no scope to amend the solution for this modification there is little a Working Group could discuss prior to the requesting of a full Impact Assessment.

The Change Sub Committee understood the need for the amendments but believed consideration should be given as to when these changes will be scheduled and if there will be any impact on Users of implementing these changes. The impact of not making the amendments is clearly set out, but it should be ensured there are no unforeseen issues with implementing the changes.

Managed by

#### 4. Impact Assessment request

The business requirements that will be issued for Impact Assessment can be found in Annex A of the attached draft Modification Report. The Impact Assessment will cost **£22,681** and is expected to take 30 Working Days.

#### 5. Recommendations

The Change Board is requested to:

- **AGREE** that a DCC Impact Assessment should be requested for MP093.
