MP114 'Alt HAN P2P Charging Data'

Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP114 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP114 should be approved?

Question 1			
Respondent	Category	Response	Rationale
DCC	Other respondent	Approve	The Mod should be approved as it supports the eighth General SEC Objective, to facilitate the establishment and operation of the Alt HAN Arrangements. The changes will enable DCC to more accurately determine the appropriate Alt HAN Explicit Charges, when setting charges before the Regulatory Year begins. This will reduce the risk of significant over/under-recovery when charging Supplier Parties for the Alt HAN costs incurred.
EDF	Large Supplier	Approve	We agree that MP114 will better facilitate Sec Objective (h) as it will improve the charging arrangements for Alt HAN services and therefore the operation of the Alt HAN Arrangements in the code.
Npower	Large Supplier	Approve	This Modification will ensure that the DCC's charges for Alt HAN cost recovery are based on more accurate data, and therefore should be approved.

Question 2: Please provide any further comments you may have

Question 2		
Respondent	Category	Comments
DCC	Other respondent	
EDF	Large Supplier	
Npower	Large Supplier	No further comments.
