30th April 2015

Dear Paul,

DIRECTION GIVEN FOR THE PURPOSES OF SECTION N3.2 OF THE SMART ENERGY CODE - THE INITIAL ENROLMENT PROJECT FEASIBILITY REPORT

This direction is made for the purposes of the Smart Energy Code (the Code) designated by the Secretary of State pursuant to the smart meter communication licences granted under the Electricity Act 1989 and the Gas Act 1986. Words and expressions used in this document shall be interpreted in accordance with Section A (Definitions and Interpretation) of the Code, subject to Section N (Definitions for this Section N).

Pursuant to Section N3.2 (Overview of Initial Enrolment), the Secretary of State hereby directs that, in respect of the Initial Enrolment Project Feasibility Report (IEPFR), the DCC shall:

- a. Provide, with reasonable notice to Supplier Parties, appropriate opportunities, as defined by the DCC, for each Supplier Party to notify the DCC if they wish to include any additional Energy Meters, or exclude some or all their Energy Meters, from the scope of the Initial Enrolment Project Feasibility Report prior to the DCC consulting on the draft Initial Enrolment Project Feasibility Report in accordance with Section N4.5 of the Code; and,
- b. include or exclude (as applicable) from the scope of the Initial Enrolment Project Feasibility Report those Energy Meters notified in accordance with the requirement in paragraph (a) above (and, where no such notification is received from a Supplier Party, the DCC shall assume that all of the Energy Meters previously notified as being within the scope of the report remain within scope).

For the avoidance of doubt, sections N4.7, N4.8 and N4.9 of the Code shall cease to apply but the remaining provisions of Section N4 of the Code shall otherwise remain unchanged.

As such, there is now no further opportunity to include or exclude additional Energy Meters, as previously provisioned for in N4.8, once the IEPFR consultation has commenced.

Yours sincerely,

T J GUY
