Consolidated Version Number	Effective Date	Reason for Change	Overview of Modifications incorporated
1.0	23 September 2013	Designation by The Secretary of State pursuant to section 88(1) of the Energy Act 2008	First Publication
2.0	31 March 2014	Modifications to SEC version 1.0 as directed by the Secretary of State pursuant to section 88(1) of the Energy Act 2008	Communications Hub Financing Provisions
2.1	6 April 2014	Modifications to SEC version 2.0 as directed by the Secretary of State pursuant to section 88(1) of the Energy Act 2008	SEC2 amendments to sections of SEC already in force
2.2	27 May 2014	Modification to SEC version 2.1 as directed by the SEC Panel pursuant to SECMP 0001	Updating the SEC to reflect abolition of the National Consumer Council
3.0	31 July 2014	Modifications to SEC version 2.2 as directed by the Secretary of State pursuant to section 88(1) of the Energy Act 2008	Smart Metering System Requirements, Testing Service, Smart Metering Key Infrastructure and Appendices, Testing During Transition and SEC3 amendments to sections already in force
4.0	14 January 2015	Modifications to SEC version 3.0 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008	Security Governance, Assurance and Privacy, Communications Hubs, Enrolment and Adoption of SMETS1 meters and SEC4.0 amendments to sections already in force
4.1	26 January 2015	Modifications to SEC version 4.0 as directed by the Secretary of State in accordance with SEC Section X3.1, SEC Section X5.4 and Condition 22 of the DCC Licence	Activation of Section H15, designation of the DCC Gateway Connection Code of Connection as a Subsidiary Document and consequential changes to sections already in force
4.2	18 March 2015	Modifications to SEC version 4.1 as directed by the Secretary of State pursuant to Section	Party and RDP Signifiers, Party, User and RDP Identifiers and SEC4.2 amendments to sections already in force

		88(1) of the Energy Act 2008	
4.3	1 July 2015	Modifications to SEC version 4.2 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008	SEC Schedule 7 providing a Specimen Enabling Agreement, DCC Services and SEC4.3 amendments to sections already in force
4.4	14 September 2015	Modifications to SEC version 4.3 as directed by the Secretary of State in accordance with SEC Section X5.4 and Condition 22 of the DCC Licence	Designation of the CH Handover Support Materials as a Subsidiary Document and consequential changes to sections already in force.
4.5	28 September 2015	Modifications to SEC version 4.4 as directed by the Secretary of State in accordance with SEC Section X5.4 and Condition 22 of the DCC Licence	Designation of the Enduring Testing Approach Document as a Subsidiary Document and consequential changes to sections already in force.
4.6	21 October 2015	Modifications to SEC version 4.5 as directed by the Secretary of State in accordance with SEC Section X5.4 and Condition 22 of the DCC Licence	Designation of the SMKI and Repository Test Scenarios Document and Subsidiary Document and consequential changes to sections already in force.
4.7	9 February 2016	Modifications to SEC version 4.6 as directed by the Secretary of State in accordance with SEC Section X5.4 and Condition 22 of the DCC Licence	Designation of the SMKI Registration Authority Policies and Procedure (SMKI RAPP) and SMKI Recovery Procedure and consequential changes to sections already in force.
4.8	10 February 2016	Modifications to SEC version 4.7 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008 Modifications to SEC version 4.6 as directed by the Secretary of State in accordance with SEC	Designation of further Communications Hub provisions. Designation of SMKI and DCC Key Infrastructure provisions. Designation of the CH Installation and Maintenance Support Materials (CHIMSM) and consequential changes to sections already in force.

		Section X5.4 and Condition 22 of the DCC Licence	
4.9	9 March 2016	Modifications to SEC version 4.8 as directed by the Secretary of State in accordance with SEC Section X5.4 and Condition 22 of the DCC Licence	Designation of SMKI Interface Design Specification, SMKI Code of Connection, SMKI Repository Interface Design Specification, SMKI Repository Code of Connection, IKI Certificate Policy and the Common Test Scenarios Document. Re-Designation of the DCC Gateway Connection Code of Connection and consequential changes to sections already in force.
4.10	18 April 2016	Modifications to SEC version 4.9 as directed by the Secretary of State in accordance with SEC Section X6	Designation of provisions for Interim Device and User Testing (Section X9).
4.11	6 June 2016	Modifications to SEC version 4.10 as directed by the Secretary of State pursuant to SEC Section X3.1, X5 and Condition 22.27 of the DCC Licence	Activation of Sections H1, H2 and H3.22 Designation of the DCCKI Certificate Policy and DCCKI Registration Authority Policies and Procedures
4.12	15 June 2016	Modifications to SEC version 4.11 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008	Amendments to sections of SEC already in force
4.13	6 July 2016	Modifications to SEC version 4.12 as directed by the Secretary of State pursuant to SEC Section X3.1, X5, X6 and Condition 22 of the DCC Licence	Designation of Registration Data Interface Specification and Registration Data Interface Code of Connection. Re-designation of the SMKI Registration Authority Policies and Procedures, and the IKI Certificate Policy.
4.14	13 July 2016	Modifications to SEC version 4.13 as directed by the Secretary of State pursuant to Section 88 (1) and 89 of the Energy	Designation of SEC Section Z - Alt HAN Arrangements. Designation of Appendix T -DCCKI Interface Design Specification,

		Act 2008, and pursuant to SEC Sections X3.1, X5, and X6	Appendix U- DCCKI Repository Interface Design Specification, and Appendix V - DCCKI CoCo and DCCKI Repository CoCo. SEC Appendices A, B and C deleted and re-designated.Amendments to SEC sections already in force.
4.15	18 August 2016	Modifications to SEC version 4.14 as directed by the Secretary of State pursuant to Section 88 (1) and 89 of the Energy Act 2008, and pursuant to SEC Appendix J. Modification to SEC version 4.14 as directed by the SEC Panel pursuant to SECMP0017 with effect 17 August 2016.	Re-designation of an updated version of SEC Appendix J – Enduring Testing Approach Document. Amendments to SEC Section D6.3 to D6.4.
4.16	20 October 2016	Modification to SEC version 4.15 as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Re-designation of SEC Appendix R: Common Test Scenarios Document.
4.17	27 October 2016	Modification to SEC version 4.16 as directed by the Secretary of State pursuant to Section 88 (1) and 89 of the Energy Act 2008, and pursuant to SEC Appendix Z.	Designation of SEC Appendix Z: CPL Requirement Document. Activation of SEC Section F2.
5.0	8 November 2016	Modification to SEC version 4.17 as directed by the Secretary of State pursuant to Section 88 (1) and 89 of the Energy Act 2008. Activation of multiple SEC Sections, re-designation, and incorporation of new	Activation of SEC Sections: • F3 (Panel Dispute Resolution Role) • F4.9 (Power Outage Alerts) • H3 (DCC User Interface), but excluding H3.27 • H4 (Processing Service Requests) • H5 (Smart Metering Inventory & Enrolment Services)

		Subsidiary Documents necessary for DCC Live.	• H6 (Decommissioning, Withdrawal & Suspension of Devices) • H8 (Service Management, SSI & Service Desk); • H9 (Incident Management Policy) • H10.9-H10.13 (Business Continuity) • H11 (Parse and Correlate) • H14.36 (DCC Internal System Change Testing Designation of new SEC Schedules: • Schedule 8 GB Companion Specification • Schedule 9 Smart Metering Equipment Technical Specifications • Schedule 10 Communications Hub Technical Specifications Designation of new SEC Appendices • Appendix AA - Threshold Anomaly Detection Procedures • Appendix AB - Service Request Processing Document • Appendix AC - Inventory, Enrolment and Withdrawal Procedures • Appendix AD - DCC User Interface Specification • Appendix AE - DCC User Interface Code of Connection • Appendix AF - Message Mapping Catalogue • Appendix AG - Incident Management Policy • Appendix AH - Self-Service Interface Design Specification • Appendix AI - Self-Service Interface Code of Connection

			Re-designation of SEC Appendices: • Appendix E - DCC User Interface Services Schedule • Appendix H - CH Handover Support Materials; • Appendix I - CH Installation and Maintenance Support Materials; • Appendix L - SMKI Recovery Procedure; • Appendix O - SMKI Repository Interface Design Specification; • Appendix G - DCC Gateway Connection Code of Connection; • Appendix K - SMKI and Repository Test Scenarios Document; • Appendix M - SMKI Interface Design Specification; • Appendix N - SMKI Code of Connection
5.1	14 December 2016	Implementation of two Modifications Proposals approved via Change Board vote on 23 November 2016.	Implementation of Modification Proposals: • Amendment to Section L due to SECMP0022 “Expanding SMKI PMA membership and removing Alternate restrictions” • Amendments to Schedule 5 due to SECMP0020 “Removal of the confidential classification of the unique identifiers listed in SEC Schedule 5”
5.2	21 December 2016	Modification to SEC version 5.1 as directed by the Secretary of State pursuant to Section 88 (1) and 89 of the Energy Act 2008.	Redesignation of Appendix AC – Inventory, Enrolment and Withdrawal Procedures

5.3	26 January 2017	Modification to SEC version 5.2 as directed by the Secretary of State pursuant to section 88(1) of the Energy Act 2008.	Amendments to Section N: SMETS1 Meters, including the designation of a new Section N4A
5.4	9 February 2017	Modifications to SEC version 5.3 as directed by the Secretary of State pursuant to section 89 of the Energy Act 2008. Modifications as directed by the Secretary of State pursuant to SEC Section X5.	Amendments in relation to testing including: testing required to implement changes to the SEC; Enduring Registration Data Provider Entry Process Testing; changes to the Enduring Testing Approach Document (ETAD); provision of variant Communications Hubs for testing. Other Changes include amendments to the Ofgem Significant Code Review process; Privacy requirements; making certain transitional variations enduring; the definition of RDP Systems; changes to accommodate multiple versions of Technical Specifications and multiple versions of DUIS and other minor miscellaneous changes. The Secretary of State direction designates Schedule 11 and Smart Metering Equipment Technical Specifications Version 1.2.
5.5	15 March 2017	Implementation of a Modification Proposal approved via Change Board vote on 22 February 2017.	Amendment to Section G due to implementation of SECMP0026 “Changes to the Security Sub-Committee Nomination Process”.
5.6	1 April 2017	Implementation of a Modification Proposal approved by the Authority on 17 January 2017.	Amendments to Sections A and J due to implementation of SECMP0016 “Consideration of “maximum credit value” in credit cover calculation”.
5.7	11 May 2017	Implementation of a Modification Proposal approved via Change Board vote on the 19 April 2017.	Amendments to Section A and Appendix H due to implementation of SECMP0033 “CH Handover Support Materials”.

5.8	13 July 2017	Implementation of a Modification Proposal approved via Change Board vote on the 21 June 2017.	Amendments to Appendix B and Appendix S due to implementation of SECMP0035 “Updates to SEC Appendix B – Organisation ARL expiration date to be aligned to DCCKI ARL”.
5.9	21 July 2017	Modifications to SEC version 5.8 as directed by the Secretary of State pursuant to section 89 of the Energy Act 2008.	Re-designation of Appendix AC – Inventory Enrolment and Withdrawal Procedures (version 1.2); and Appendix AD – DCC User Interface Specification (version 1.1).
5.10	14 September 2017	Implementation of a Modification Proposal approved via the Change Board on the 23 August 2017.	Amendments to Section H due to implementation of SECMP0036 “Single User ID for Users acting in one or more User Roles”.
5.11	6 November 2017	Modifications to SEC version 5.10 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008	Amendments to Appendix AH, Schedule 8 and Schedule 11 as directed by the Secretary of State.
5.12	22 November 2017	Implementation of a Modification Proposal approved via the Change Board on 25 October 2017.	Amendments to Section G due to implementation of SECMP0040 “Changes to how DCC Users schedule and carry out User Security Assessments after completion of the User Entry Process”.
5.13	1 February 2018	Modifications to SEC version 5.12 as directed by the Secretary of State pursuant to section 89 of the Energy Act 2008.	Amendments to Appendix H, Appendix I, Schedule 9 – SMETS1 v1.2, Schedule 9 – SMETS2 v2.0 and Schedule 11 – TS Applicability Tables. Designation of new SEC Schedules and Appendices to sit alongside existing versions: • Schedule 8 – GBCS v2.0 • Schedule 8 – GBCS v3.0 • Schedule 9 – SMETS2 v3.0 • Schedule 9 – SMETS2 v4.0 • Schedule 10 – CHTS v1.1 • Schedule 10 – CHTS v1.2

			• Appendix AD – DUIS v2.0 • Appendix AF – MMC v2.0
5.14	22 February 2018	Modifications to SEC version 5.13 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008 Modifications to SEC version 5.13 as directed by the Secretary of State pursuant to SEC Section X5	Amendments to SEC Section A Designation of Appendix AJ – SEC Variation Testing Approach Document
5.15	25 May 2018	Implementation of a Modification Proposal approved by the Authority on 1 May 2018.	Amendments to Section A, Section I, Section M and Appendix AG due to implementation of SECMP0045 "Incorporation of the requirements of the General Data Protection Regulations".
5.16	31 May 2018	Modifications to SEC version 5.15 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008	Designation of Section P – Production Proving; and amendments to Section A, Section C, Section E, Section F, Section H, Section J, Section K, Section L and Section X as directed by the Secretary of State.
5.17	5 June 2018	Modifications to SEC version 5.16 as directed by the Secretary of State pursuant to SEC Section X5	Amendments to Schedule 8 – GBCS v3.0, Schedule 11 – TS Applicability Tables and Appendix AD – DUIS v2.0 Designation of new SEC Schedule 8 – GBCS v2.1 and SEC Schedule 8 – GBCS v3.1 to sit alongside existing versions.
5.18	8 June 2018	Modifications to SEC version 5.17 as directed by the Secretary of State pursuant to SEC Section X5. Modifications to SEC version 5.17 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to Appendix J – Enduring Test Approach Document and Appendix R – Common Test Scenarios Document. Amendments to Appendix B – Organisation Certificate Policy and Appendix M – SMKI Interface Design Specification.

5.19	25 June 2018	Modifications to SEC version 5.18 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to Appendix AJ – SEC Variation Testing Approach Document.
5.20	18 July 2018	Modifications to SEC version 5.19 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008.	Amendments to Section A, Section B, Section C, Section F, Section G, Section H, Section I, Section L, Section N, Section T, Section X, Section Z and Schedule 7
5.21	22 July 2018	Implementation of a Modification Proposal approved via Change Board vote on 22 July 2018.	Amendments to Section A and Section G due to implementation of SECMP0044 "User Security Assessment of a Shared Resource".
5.22	18 September 2018	Modifications to SEC version 5.21 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to Section A and designation of Appendix AK – SEC Variation Testing Approach Document for SMETS1 Services.
5.23	4 October 2018	Modifications to SEC version 5.22 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to TS Applicability Tables.
6.0	28 October 2018	Modifications to SEC version 5.23 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to SEC Appendix AB – Service Request Processing Document and SEC Appendix E – DCC User Interface Services Schedule and consequential changes to SEC Section A – Definitions and Interpretation and SEC Schedule 11 – TS Applicability Tables.
6.1	1 November 2018	Implementation of Modification Proposals approved by the Authority or by Change Board vote.	Amendments to SEC Section A, Section D, Section F, Section G, Section H, Section J, Section M, Section X, Appendix E, Appendix S, Appendix W, Appendix AA, Appendix AD and Appendix AH, due to the implementation of Modification Proposals SECMP0008, SECMP0019, SECMP0027, SECMP0029, SECMP0034, SECMP0047,

			SECMP0050, SECMP0051 and SECMP0052
6.2	8 November 2018	Implementation of Modification Proposals approved by the Authority or by Change Board vote	Amendments to Section G, Schedule 9 and Schedule 11 due to the implementation of Modification Proposals SECMP0006, SECMP0048 and SECMP0065.
6.3	5 December 2018	Modifications to SEC version 6.2 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to SEC Schedule 11 – TS Applicability Tables.
6.4	21 January 2019	Re-designation of an amended version of the Inventory Enrolment and Decommissioning Procedures Document (IEDP) as directed by the Secretary of State pursuant to SEC Section X5.	Amendments and re-designation of Appendix AC
6.5	28 January 2019	Implementation of Modification Proposal approved by the Authority.	Amendments to SEC Section M and Section Z, due to the implementation of Modification Proposal SECMP0068
6.6	14 February 2019	Modifications to SEC version 6.5 as directed by the Secretary of State pursuant to SEC Section X5.	Designation of Appendix AL – SMETS1 Transition and Migration Approach Document
6.7	28 February 2019	Implementation of Modification Proposals approved by the Authority or by Change Board vote.	Amendments to SEC Section A, Section D, Section F, Section G and Section Z, due to the implementation of Modification Proposals SECMP0009, SECMP0057, SECMP0059, SECMP0061 and SECMP0064. Corrections to Section L.
6.8	4 March 2019	Implementation of Modification Proposal approved by the Authority.	Amendments to SEC Section A, Section C, Section D, Section F, Section G, Section L, Section M, Section Z and Appendix AG, due to the implementation of Modification Proposal SECMP0049.

6.9	13 March 2019	Modifications to SEC version 6.8 as directed by the Secretary of State pursuant to SEC Section X5.	Re-designation of SEC Section A, Section F, Section G, Section H, Section I, Section L, Section N, Section P, Appendix J, Appendix R and Appendix Z.
6.10	15 April 2019	Re-designation of an amended version of the Common Test Scenarios Document (CTSD) as directed by the Secretary of State pursuant to SEC Section X5.	Amendments and re-designation of Appendix R.
6.11	23 April 2019	Implementation of Modification Proposal approved by the Authority.	Amendments to SEC Section A, Section H and Section M, due to the implementation of Modification Proposal SECMP0043.
6.12	26 April 2019	Implementation of Modification Proposal approved by the Change Board.	Amendments to SEC Section Z, due to the implementation of Modification Proposal SECMP0070.
6.13	14 June 2019	Re-designation of an amended version of the SEC Variation Testing Approach Document for SMETS1 Services (SVTAD) as directed by the Secretary of State pursuant to SEC Section X5.	Amendments and re-designation of Appendix AK.
6.14	21 June 2019	Re-designation of an amended version of the SMETS1 Transition and Migration Approach Document as directed by the Secretary of State pursuant to SEC Section X5.	Amendments and re-designation of Appendix AL.
6.15	27 June 2019	Implementation of Modification Proposal approved by the Change Board.	Amendments to SEC Section A, Section H, Appendix I, Appendix T, Appendix W, Appendix AA, Appendix AH and Appendix AI due to the implementation of Modification Proposal SECMP0058.
6.16	4 July 2019	Modifications to SEC version 6.15 as directed	Designation of SEC Schedule 8 Version 3.2, Schedule 9 Version

		by the Secretary of State pursuant to SEC Section X5 and for Modification Proposals approved by the Authority or by Change Board vote. Modifications to SEC version 6.15 as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008	4.2 and Schedule 10 Version 1.3 and re-designation of SEC Schedule 8 Version 3.1, Schedule 9 Version 4.0, Schedule 9 Version 4.1, Schedule 10 Version 1.2 and Schedule 11 as directed by the Secretary of State and for Modification Proposals SECMP0018, SECMP0023, SECMP0025 and SECMP0055. Amendments to SEC Section A, Section F and Section G.
6.17	28 July 2019	Modifications to SEC version 6.16 as directed by the Secretary of State pursuant to SEC Section X5.	Designation of SEC Appendix AD – DUIS v3.0, Appendix AF – MMC v3.0 and Appendix AM 'SMETS1 Supporting Requirements'. Amendments to SEC Appendix E, Appendix I, Appendix AA, Appendix AB, Appendix AC, Appendix AH and Appendix AL. Corrections to SEC Section A.
6.18	18 October 2019	Re-designation of an amended version of the SEC Technical Specification Applicability Tables (TSAT) as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to SEC Schedule 11 – TS Applicability Tables.
6.19	25 October 2019	Modification to SEC Appendix AK as directed by the DCC pursuant to Clause 4.2 of the SEC Variation Testing Approach Document for SMETS1 Services (SMETS1 SVTAD).	Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'.
6.20	4 November 2019	Modifications to SEC version 6.19 as directed by the Secretary of State	Amendments to SEC Section G. Amendments to SEC Schedule 11

		pursuant to SEC Section X5 and for Modification Proposals approved by the Authority or by Change Board vote.	– TS Applicability Tables. Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'.
6.21	29 November 2019	November 2019 SEC Release. Implementation of Modification Proposals approved by the Change Board and the Authority.	Amendments to SEC Section J, Section K, and Section L. Amendments to SEC Appendix D, Appendix E, Appendix K, Appendix M, Appendix N, Appendix Q, Appendix AC, Appendix AD, and Appendix AF. These are due to the implementation of Modification Proposals SECMP0018, SECMP0023, SECMP0025, SECMP0039, SECMP0055, SECMP0060, MP071, MP073, MP074 and MP076.
6.22	13 December 2019	Modifications to SEC version 6.21 as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to SEC Appendix J 'Enduring Testing Approach Document' and Appendix AM 'SMETS1 Supporting Requirements'.
6.23	20 January 2020	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Appendix R 'Common Testing Scenarios Document' due to the implementation of MP089.
6.24	31 January 2020	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Section A 'Definitions and Interpretation', Section D 'Modification Process' and Section I 'Data Privacy' due to the implementation of SECMP0069.
6.25	6 February 2020	Modification to SEC Appendix AK as directed by the DCC pursuant to Clause 4.2 of the SEC Variation Testing Approach Document for SMETS1 Services.	Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'.
7.0	27 February 2020	February 2020 SEC Release.	Amendments to SEC Section G, Section Z and Appendix H.

		Implementation of Modification Proposals approved by the Change Board and the Authority.	These are due to the implementation of Modification Proposals MP086, MP091 and MP097.
8.0	13 March 2020	Modification to the SEC as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'.
9.0	16 March 2020	Modifications to the SEC as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008.	Amendments to SEC Section A, Section G, Section H, Section I, Section K, Section L and Section X.
10.0	3 April 2020	Modification to SEC Appendix AK as directed by the DCC pursuant to Clause 4.2 of the SEC Variation Testing Approach Document for SMETS1 Services.	Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'.
11.0	6 May 2020	June 2020 SEC Release. Implementation of Modification Proposals approved by the Change Board. Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	The June 2020 SEC Release makes amendments to SEC Section H, Appendix E and Appendix AB. These are due to the implementation of Modification Proposals SECMP0053 and SECMP0062 (Part 1). The Secretary of State modification to the SEC makes amendments to SEC Appendix AL and Appendix AM.
12.0	7 May 2020	June 2020 SEC Release Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Section Z. These are due to the implementation of Modification Proposal MP114.
13.0	27 May 2020	Implementation of a Modification Proposal approved by the Authority.	Amendments to SEC Section F due to the implementation of Modification Proposal MP130.
14.0	29 May 2020	Implementation of a Modification Proposal	Amendments to SEC Schedule 11 'TS Applicability Tables' due to the

		approved by the Change Board.	implementation of Modification Proposal MP123.
15.0	11 June 2020	Modifications to the SEC as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008.	Amendments to SEC Section A, Section E, Section G, Section K, and Section L.
16.0	15 June 2020	Modification to the SEC as directed by the Secretary of State pursuant to SEC Section X5.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'.
17.0	1 July 2020	Modification to the SEC as directed by the Secretary of State pursuant to SEC Section X5.	Designation of Appendix AN 'SEC Variation Testing Approach Document for BEIS Changes included in the November 2020 SEC Release'. Amendments to SEC Section A 'Definitions and Interpretation'.
18.0	23 July 2020	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Section G 'Security' due to the implementation of Modification Proposal MP135.
19.0	26 July 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL and Appendix AM.
20.0	31 July 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AG 'Incident Management Policy'.
21.0	18 September 2020	Modifications to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence, and Section 88(1) of the Energy Act 2008.	Amendments to SEC Section A, Section F, Section G, Section H, Section K, Section L, Section N, Section T, Section X, Section Z, Schedule 11, Appendix L and Appendix AL. Implementation of Device Level Versioning to SEC Schedule 9: • 'Smart Metering

			Equipment Technical Specifications 1' 1 Feb 2018 - 'Smart Metering Equipment Technical Specifications 2' 1 Feb 2018 - 'Smart Metering Equipment Technical Specifications 2' 8 Nov 2018 - 'Smart Metering Equipment Technical Specifications 2' 4 Jul 2019 Designation of SEC Appendix AO and Appendix AP.
22.0	25 September 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'
23.0	7 October 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix J, Appendix R and Appendix AK.
24.0	6 November 2020	Modification to SEC Appendix AK as directed by the DCC pursuant to Clause 4.2 of the SEC Variation Testing Approach Document for SMETS1 Services.	Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1Services'.
25.0	12 November 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'.
26.0	24 November 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5	Amendments to: - SEC Appendix AB 'Service Request Processing Document' - SEC Appendix AD 'DCC

		and Condition 22 of the DCC Licence.	User Interface Specification' v3.0 • SEC Appendix AD 'DCC User Interface Specification' v3.1 • SEC Appendix AM 'SMETS1 Supporting Requirements'
27.0	29 November 2020	November 2020 SEC Release Modification to the SEC as directed by the Secretary of State pursuant to SEC Section X3.1, X5 and Condition 22 of the DCC Licence. Implementation of Modification Proposals approved by the Change Board and the Authority.	Amendments to: • Section A • Section G • Section I • Section J • Section L • Schedule 11 • Appendix A • Appendix B • Appendix D • Appendix E • Appendix I • Appendix L • Appendix M • Appendix O • Appendix Q • Appendix AB • Appendix AC Implementation of: • Schedule 8 ‘GB Companion Specification’ v4.0 • Schedule 9 ‘Smart Metering Equipment Technical Specifications 2' - 29 November 2020 • Schedule 10 'Communications Hub Technical Specifications' v1.4 • Appendix AD ‘DCC User Interface Specification’ v4.0 • Appendix AF ‘Message Mapping Catalogue’ v4.0
28.0	4 December 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5	Amendments to SEC Appendix AM 'SMETS1 Supporting Requirements'.

		and Condition 22 of the DCC Licence.	
29.0	21 December 2020	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'.
30.0	13 January 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix E 'DCC User Interface Services Schedule'.
31.0	21 January 2021	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Schedule 11 'TS Applicability Tables' due to the implementation of Modification Proposal MP139.
32.0	22 January 2021	Modifications to the SEC as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008.	Amendments to SEC Section A 'Definitions and Interpretation'.
33.0	25 January 2021	Implementation of a Modification Proposal approved by the Authority.	Amendments to SEC Section A 'Definitions and Interpretation' and to Section F 'Smart Metering System Requirements' due to the implementation of MP111.
34.0	25 February 2021	February 2021 SEC Release. Implementation of Modification Proposals approved by the Change Board and the Authority.	Amendments to SEC Section A, Section H and Appendix AL. These are due to the implementation of Modification Proposals MP092 and MP122A.
35.0	28 February 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL and Appendix AM. Designation of SEC Appendix AP 'FOC S1SPKI Certificate Policy'.
36.0	30 March 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5	Amendments to SEC Appendix AL and Appendix AM.

		and Condition 22 of the DCC Licence.	
37.0	23 April 2021	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Schedule 11 'TS Applicability Tables' due to the implementation of Modification Proposal MP148.
38.0	14 June 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'.
39.0	16 June 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix M 'SMKI Interface Design Specification'.
40.0	24 June 2021	June 2021 SEC Release. Implementation of Modification Proposals approved by the Change Board and the Authority.	Amendments to SEC Section H, Section I, Section J, Appendix I, and Appendix O. These are due to the implementation of Modification Proposals MP106, MP144, MP146, MP147 and MP153. Amendments to SEC Appendix R due to the phased implementation of SECMP0007.
41.0	2 July 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'.
42.0	20 July 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • Section A 'Definitions and Interpretation' • Section H 'DCC Services' • Appendix Z 'CPL Requirements Document' • Appendix AD 'DCC User Interface Specification' v3.0, v3.1 and v4.0 • Appendix AL 'SMETS1 Transition and Migration

			Approach Document' • Appendix AM 'SMETS1 Supporting Requirements'
43.0	30 July 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Section A 'Definitions and Interpretation • SEC Appendix B 'Organisation Certificate Policy' Implementation of: • SEC Appendix AQ 'SEC Variation Testing Approach Document for the CH&N Arrangements' • SEC Appendix AR 'SEC Variation Testing Approach Document for the Enduring Change of Supplier Arrangements'
44.0	25 August 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services' • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
45.0	1 September 2021	Implementation of a Modification Proposal approved by the Authority.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section B ‘Accession’ • SEC Section D ‘Modification Process' • SEC Section E ‘Registration Data’ • SEC Section K ‘Charging Methodology’ • SEC Schedule 5 ‘Accession Information’ • SEC Appendix X ‘Registration Data Interface Specification’ • SEC Appendix Y ‘Registration Data Interface Code of Connection’

			These are due to the implementation of Modification Proposal MP161.
46.0	22 September 2021	Modification to SEC Appendix AK as directed by the DCC pursuant to Clause 4.2 of the SEC Variation Testing Approach Document for SMETS1 Services.	Amendments to SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'
47.0	4 October 2021	Implementation of a Modification Proposal approved by the Authority.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section L 'Smart Metering Key Infrastructure and DCC Key Infrastructure' • SEC Section M 'General' • SEC Appendix B 'Organisation Certificate Policy' • SEC Appendix Q 'IKI Certificate Policy' • SEC Appendix S 'DCCKI Certificate Policy' These are due to the implementation of Modification Proposal MP134A.
48.0	8 October 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Appendix Z 'CPL Requirements Document' • SEC Appendix AM 'SMETS1 Supporting Requirements'
49.0	25 October 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section 88(1) of the Energy Act 2008 and to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section G 'Security' • SEC Section L 'Smart Metering Key Infrastructure and DCC Key Infrastructure' Implementation of: • SEC Appendix AS

			'ECoS Transition and Migration Approach Document'
50.0	4 November 2021	November 2021 SEC Release Implementation of Modification Proposals approved by the Change Board and the Authority. Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • Section A • Section C • Section H • Section K • Schedule 7 • Schedule 11 • Appendix E • Appendix J • Appendix X • Appendix AB • Appendix AL • Appendix AM Implementation of: • Schedule 8 'GB Companion Specification' v4.1 • Schedule 9 'Smart Metering Equipment Technical Specifications 2' – 4 November 2021 • Schedule 10 'Communications Hub Technical Specifications' v1.5 • Appendix AD 'DCC User Interface Specification' v5.0 • Appendix AF 'Message Mapping Catalogue' v5.0
51.0	11 November 2021	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Section B 'Accession' • SEC Appendix AC 'Inventory, Enrolment and Decommissioning Procedures' These are due to the implementation of Modification Proposal MP128B.
52.0	17 November 2021	Implementation of a Modification Proposal approved by the Authority.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section B 'Accession' • SEC Section L 'Smart

			Metering Key Infrastructure and DCC Key Infrastructure' These are due to the implementation of Modification Proposal MP185.
53.0	9 December 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services' • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
54.0	17 December 2021	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Appendix AM 'SMETS1 Supporting Requirements' Implementation of: • SEC Appendix AT 'SMETS1 Cryptographic Key Management Policy'
55.0	23 December 2021	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Section F 'Smart Metering System Requirements' This is due to the implementation of Modification Proposal MP188'
56.0	27 January 2022	Implementation of a Modification Proposal approved by the Change Board.	Amendments to SEC Schedule 11 'TS Applicability Tables' due to the implementation of Modification Proposal MP191.
57.0	24 February 2022	February 2022 SEC Release Implementation of Modification Proposals approved by the Change Board.	Amendments to: • Section A • Section G • Section H • Section K • Schedule 7 • Schedule 11 • Appendix A • Appendix B • Appendix C • Appendix D

			• Appendix J • Appendix K • Appendix L • Appendix M • Appendix N • Appendix O • Appendix P • Appendix Q • Appendix S • Appendix T • Appendix U • Appendix V • Appendix W • Appendix X • Appendix AC due to the implementation of Modification Proposals MP116, MP121, MP173, MP179 and MP196.
58.0	15 March 2022	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
59.0	24 March 2022	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Schedule 11 'TS Applicability Tables
60.0	10 June 2022	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix J 'Enduring Testing Approach Document' • SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services' • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
61.0	30 June 2022	June 2022 SEC Release Implementation of Modification Proposals approved by the Change Board and the Authority.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section G 'Security' • SEC Section J 'Charges' • SEC Schedule 11 'TS

		Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Applicability Tables' • SEC Appendix AB 'Service Request Processing Document' Implementation of: • SEC Appendix AD 'DCC User Interface Specification' v5.1
62.0	18 July 2022	Implementation of a Modification Proposal approved by the Authority.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section E 'Registration Data' • SEC Section G 'Security' • SEC Section H 'DCC Services' • SEC Section K 'Charging Methodology' • SEC Section L 'Smart Metering Key Infrastructure and DCC Key Infrastructure' • SEC Section P 'Production Proving' • SEC Appendix X 'Registration Data Interface Specification' • SEC Appendix Y 'Registration Data Interface Code of Connection' • SEC Appendix AG 'Incident Management Policy' • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
63.0	1 August 2022	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Section F 'Smart Metering System Requirements' • SEC Appendix Z 'CPL Requirements Document' due to the implementation of Modification Proposal MP209. Corrections to SEC Section L

			'Smart Metering Key Infrastructure and DCC Key Infrastructure'.
64.0	12 October 2022	Implementation of a Modification Proposal approved by the Authority.	Amendments to: • SEC Section A 'Definitions and Interpretation' • SEC Section H 'DCC Services' due to the implementation of Modification Proposal MP096.
65.0	3 November 2022	November 2022 SEC Release Implementation of Modification Proposals approved by the Change Board and the Authority.	Amendments to: • SEC Section A • SEC Section C • SEC Section F • SEC Section G • SEC Section H • SEC Section J • SEC Section K • SEC Section L • SEC Section M • SEC Section P • SEC Section T • SEC Section X • SEC Section Z • SEC Schedule 5 • SEC Schedule 6 • SEC Schedule 7 • SEC Schedule 8 • SEC Schedule 9 • SEC Schedule 10 • SEC Schedule 11 • SEC Appendix B • SEC Appendix D • SEC Appendix E • SEC Appendix G • SEC Appendix H • SEC Appendix I • SEC Appendix J • SEC Appendix L • SEC Appendix O • SEC Appendix S • SEC Appendix X • SEC Appendix Z • SEC Appendix AA • SEC Appendix AB • SEC Appendix AG • SEC Appendix AI • SEC Appendix AJ • SEC Appendix AL • SEC Appendix AN

			• SEC Appendix AO • SEC Appendix AP 'FOC S1SPKI Certificate Policy' • SEC Appendix AP 'Secure S1SPKI Certificate Policy' • SEC Appendix AQ • SEC Appendix AS • SEC Appendix AT
66.0	20 December 2022	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
67.0	26 January 2023	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Schedule 11 'TS Applicability Tables' due to the implementation of Modification Proposal MP221.
68.0	21 February 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
69.0	23 February 2023	February 2023 SEC Release Implementation of Modification Proposals approved by the Change Board.	Amendments to: • SEC Section A • SEC Section D • SEC Section E • SEC Section F • SEC Section H • SEC Section L • SEC Section T • SEC Section X • SEC Section Z • SEC Appendix K • SEC Appendix Z • SEC Appendix AC • SEC Appendix AJ
70.0	21 March 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
71.0	22 March 2023	Implementation of a Modification Proposal	Amendments to: • SEC Appendix L 'SMKI

		approved by the Change Board.	Recovery Procedure' due to the implementation of Modification Proposal MP198. Corrections to SEC Section G 'Security'.
72.0	17 April 2023	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Schedule 11 'TS Applicability Tables' due to the implementation of Modification Proposal MP227.
73.0	17 May 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
74.0	23 May 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Appendix AM 'SMETS1 Supporting Requirements'
75.0	08 June 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Section A • SEC Section D • SEC Section F • SEC Section G • SEC Section K • SEC Section L • SEC Section M • SEC Section X
76.0	29 June 2023	June 2023 SEC Release Implementation of Modification Proposals approved by the Change Board and the Authority. Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: • SEC Section F • SEC Section G • SEC Section H • SEC Section L • SEC Schedule 11 • SEC Appendix B • SEC Appendix E • SEC Appendix Z • SEC Appendix AA • SEC Appendix AB • SEC Appendix AC • SEC Appendix AS Implementation of: • SEC Appendix AD 'DCC

			- User Interface Specification' v5.2 - SEC Appendix AF 'Message Mapping Catalogue' v5.2
77.0	11 September 2023	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: - SEC Section A - SEC Section L - SEC Appendix D - SEC Appendix Q due to the implementation of Modification Proposal MP168.
78.0	15 September 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendments to: - SEC Appendix AL 'SMETS1 Transition and Migration Approach Document'
79.0	02 November 2023	November 2023 SEC Release Implementation of Modification Proposals approved by the Change Board.	Amendments to: - SEC Section A - SEC Section G - SEC Section H - SEC Section I - SEC Schedule 8 - SEC Schedule 9 - SEC Schedule 11 - SEC Appendix A - SEC Appendix B - SEC Appendix C - SEC Appendix D - SEC Appendix Q - SEC Appendix W - SEC Appendix AG - SEC Appendix AP2 due to the implementation of Modification Proposals MP122B, MP216, MP226, MP245, MP249 and MP250.
80.0	06 December 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Implementation of: - SEC Appendix AU 'Network Evolution Transition and Migration Approach Document'
81.0	18 December 2023	Modification to the SEC as directed by the Secretary of State pursuant to Section X5	Amendment to: - Appendix AL 'SMETS1 Transition and Migration Approach Document'

		and Condition 22 of the DCC Licence.	
82.0	20 December 2023	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Appendix S 'DCCKI Certificate Policy' due to the implementation of Modification Proposal MP251
83.0	09 January 2024	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendment to: • SEC Appendix AQ 'SEC Variation Testing Approach Document for the CH&N Arrangements v3.0'
84.0	27 February 2024	Modification to the SEC as directed by the Secretary of State pursuant to Section X5 and Condition 22 of the DCC Licence.	Amendment to: • SEC Appendix AK 'SEC Variation Testing Approach Document for SMETS1 Services'
85.0	29 February 2024	February 2024 SEC Release Implementation of Modification Proposals approved by the Change Board.	Amendments to: • SEC Section A • SEC Section D • SEC Section G • SEC Section H • SEC Section L • SEC Schedule 11 • SEC Appendix B • SEC Appendix M • SEC Appendix O • SEC Appendix R • SEC Appendix S • SEC Appendix T • SEC Appendix X • SEC Appendix AI • SEC Appendix AL due to the implementation of Modification Proposals MP162, MP167B, MP176, MP243, MP259 and MP261.
86.0	08 April 2024	Implementation of a Modification Proposal approved by the Change Board.	Amendments to: • SEC Section A • SEC Section F • SEC Appendix Z due to the implementation of Modification Proposal MP231.
87.0	15 April 2024	Implementation of a Modification Proposal	Amendment to: • SEC Section F

		approved by the Change Board.	due to the implementation of Modification Proposal MP264.

Dated: 23 September 2013

Smart Energy Code

Contents

Introduction

(A) This Code has been designated by the Secretary of State pursuant to the DCC Licence, and is subject to modification in accordance with the Secretary of State's statutory powers and the DCC Licence.

(B) The Parties comprise the DCC, Users (or prospective Users) of DCC's Services, and persons holding certain Energy Licences that are obliged by those licences to accede to this Code (some of whom are Users of DCC's Services).

(C) The Original Parties have agreed to give effect to, and to be bound by, this Code in accordance with the Framework Agreement.

(D) The other Parties have agreed to give effect to, and to be bound by, this Code in accordance with an Accession Agreement.

(E) SECCo is a company established to facilitate the operation of this Code. SECCo is not a Party (as defined), and only has rights and obligations under this Code where specified.

Version Control

The version control table showing the full history of changes to the Smart Energy Code and the reasons for those changes has been removed from the consolidated Code document due to its length. It is available to download here.

Appendix AM: SMETS1 Supporting Requirements

Appendix AN: SEC Variation Testing Approach Document for BEIS Changes included in the November 2020 SEC Release

Appendix AO: S1SPKM Compliance Policy

Appendix AP1: Secure S1SPKI Certificate Policy

Appendix AP2: FOC S1SPKI Certificate Policy

Appendix AQ: SEC Variation Testing Approach Document for the CH&N Arrangements

Appendix AR: SEC Variation Testing Approach Document for the Enduring Change of Supplier Arrangements

Appendix AS: ECoS Transition and Migration Approach Document

Appendix AT: SMETS1 Cryptographic Key Management Policy

Appendix AU: Network Evolution Transition and Migration Approach Document

A DEFINITIONS AND INTERPRETATION

A1. DEFINITIONS

A1.1 In this Code, except where the context otherwise requires, the expressions in the left hand column below shall have the meanings given to them in the right hand column below:

4G Communications Hub means a Communications Hub which is capable of using 4G mobile cellular radio technology to connect to the SM WAN.

4G DBT Finance Acceleration Event means, in respect of each 4G DBT Finance Facility, that:

(a) an acceleration of repayment of the indebtedness thereunder occurs such that it is immediately due and payable by the borrower in circumstances where the DCC is liable for the same under the Direct Agreement; or

(b) the DCC becomes liable under the Direct Agreement to immediately pay the unamortised asset value (and any associated finance costs in respect) of any assets to which that facility relates.

4G DBT Finance Charges means, in respect of each 4G DBT Finance Facility, the DCC's charge to recover the applicable 4G DBT Finance Costs (being a subset of the Fixed Charges), in an amount each month determined by the DCC at the time it produces an Invoice for that month (having regard to the requirements of Condition 36.5 of the DCC Licence).

4G DBT Finance Costs means, in respect of each 4G DBT Finance Facility, the costs the DCC incurs in respect of that facility.

4G DBT Finance Facility means a facility, other than a Communications Hub Finance Facility, arranged by the DCC or a DCC Service Provider with an Approved Finance Party for the funding of the development costs (including design, build and testing costs) of any solutions or services which DCC procures in order to enable or facilitate its provision and/or operation of 4G Communications Hubs, such costs being incurred in respect of activities undertaken up to the point of volume manufacture of the 4G Communications Hubs (such point as further described in the plan produced pursuant to condition 13B of the DCC Licence), and being costs which DCC is entitled to recover via the Fixed Charges under this Code, including by way of a loan facility, an equity subscription, or an assignment or sale of receivables.

Acceptance Testing means testing of a software release undertaken by Users in order to determine whether the required specification for that software is met.

Access Control Broker means the DCC, acting in the capacity and exercising the functions of the Known Remote Party role identified as such in the GB Companion Specification.

Accession Agreement means an accession agreement entered into pursuant to Section B1 (Accession).

Acknowledgement means, in respect of a communication sent by a User to the DCC over the DCC User Interface, a communication by the DCC to the User via the DCC User Interface acknowledging receipt of the User's communication.

Additional Electricity Smart Meter means an Electricity Smart Meter which is installed at premises in such a manner and/or configuration that it:
(a) is joined to a Communications Hub Function at the premises; but
(b) is incapable of being used for the purposes of determining the quantity of electricity supplied to the premises.

Additional Registration Data means Electricity Additional Registration Data and Gas Additional Registration Data.

Additional Release Services has the meaning given to that expression in Section X1.17 (Testing in respect of Additional Release Services).

Additional SR Tests has the meaning given to that expression in Section X1.17 (Testing in respect of Additional Release Services).

Advanced Meter in relation to:
(a) an Electricity Meter, has the meaning given to that expression in standard condition 39 of the Electricity Supply Licence; and
(b) a Gas Meter, has the meaning given to that expression in standard condition 33 of the Gas Supply Licence.

Affected Party has the meaning given to that expression in the definition of Force Majeure.

Affiliate means, in relation to any person, any holding company of that person, any subsidiary of that person or any subsidiary of a holding company of that person, in each case within the meaning of section 1159 of the Companies Act 2006.

Alert
has the meaning given to ‘Alert’ in the GB Companion Specification.

Alert Management Mechanism
means the mechanism applied to Alerts received by the DCC, as described in clauses 17.8-17.10 of the Service Request Processing Document.

ALCS/HCALCS/APC/SAPC Labels List
has the meaning given to that expression in Section F11.1 (ALCS/HCALCS/APC/SAPC Labels List).

Alt HAN Arrangements
has the meaning given to that expression in condition 22.20(e) (Principal contents within the Smart Energy Code) of the DCC Licence.

Alt HAN Charges
means the Fixed Alt HAN Charges calculated in accordance with Section K5A or K6B (as applicable) taken together with the Explicit Charges in respect of the Explicit Charging Metrics at Section K7.5(t) and (u).

Alt HAN Forum
means the body of that name established in accordance with Section Z.1.1 (Establishment of the Alt HAN Forum).

Alt HAN Services
has the meaning given to that expression in Section Z6.1 (Definitions).

Alternate
has the meaning given to that expression in Section C5.19 (Alternates).

Alternative Installation End Date
has the meaning given to that expression in Section A4.2(c) (Derogations).

Alternative Solution
has the meaning given to that expression in Section D6.16 (Alternative Solutions).

Anomalous Event
means, in relation to any System, an activity or event that is not expected to occur in the course of the ordinary operation of that System.

Anomaly Detection Threshold means:

(a) in respect of a User ID used by a User in one or more of its User Roles, a number of communications within a period of time, where both that number and the period of time are set by the User in relation to that User ID;

(b) in respect of the DCC (including when acting as a SMETS1 Service Provider), either:
(i) a number of communications within a period of time, where both that number and the period of time are set by the DCC; or
(ii) a maximum or minimum data value within a communication, where that value is set by the DCC,in each case in accordance with the requirements of Section G6 applying (respectively) to the User or the DCC.

Applicability Period has the meaning given to that expression in Section A3.29(d) (GB Companion Specification and CPA Security Characteristics).

Applicant has the meaning given to that expression in Section B1.1 (Eligibility for Admission).

Application Association has the meaning given to that expression in the Green Book (DLMS UA 1000-2 Ed. 8), published by the DLMS User Association.

Application Fee has the meaning given to that expression in Section B1.5 (Application Fee).

Application Form means a form requesting the information set out in Schedule 5 (and which must not request any further information), in such format as the Code Administrator may determine from time to time.

Application Guidance has the meaning given to that expression in Section B1.4 (Application Form and Guidance).

Application Server means a software framework that enables software applications to be installed on an underlying operating system, where that software framework and operating system are both generally available either free of charge or on reasonable commercial terms.

Appropriate Permission means, in respect of a Communication Service or Local Command Service to be provided to a User in respect of a Smart Metering System at a premises that will result in the User obtaining Consumption Data, either:
(a) (where that User is the Import Supplier, Export Supplier, Gas Supplier,

Electricity Distributor or Gas Transporter for that Smart Metering System) that the User does not need consent to access that Consumption Data in accordance with its Energy Licence, or that the User has consent (whether explicit or implicit) in accordance with the requirements of its Energy Licence; or
(b) (where that User is not the Import Supplier, Export Supplier, Gas Supplier, Electricity Distributor or Gas Transporter for that Smart Metering System) that the Energy Consumer has given the User Unambiguous Consent to obtain that Consumption Data and such consent has not been withdrawn.

Appropriate Standard

has the meaning given to that expression in Section G3.28(b) (SMETS1 Smart Metering Systems).

Approved Budget

has the meaning given to that expression in Section C8.13 (Approval of Budgets).

Approved Finance Party

means, in respect of each DCC Finance Facility, the person with whom the DCC arranges the facility, or to whom the DCC accepts payment obligations under the Direct Agreement relating to that facility, as the case may be, and which has (from time to time) been notified by the DCC to the Authority and the Panel as meeting the requirements of this definition.

Associated

means:
(a) in respect of a Smart Meter, that the Smart Meter is identified in the Smart Metering Inventory as being associated with a Communications Hub Function; and
(b) in respect of any Device other than a Smart Meter or a Communications Hub Function, that the Device is identified in the Smart Metering Inventory as being associated with a Smart Meter or with a Gas Proxy Function,
and the expression "**Associate**" shall be interpreted accordingly.

Assurance Certificate

has the meaning given to that expression in Section F2.4 (Background to Assurance Certificates).

Assurance Certification Body

has the meaning given to that expression in Section F2.3 (Background to Assurance Certificates).

Authentication Key

has the meaning given to that expression in the Green Book (DLMS UA 1000-2 Ed. 8), published by the DLMS User Association.

Authorised Business in relation to the DCC, has the meaning given in the DCC Licence.

Authorised Subscriber means SECCo, a Party, a Manufacturer or an RDP which is an Authorised Subscriber for the purposes of (and in accordance with the meaning given to that expression in) any of the Certificate Policies.

Authority means the Gas and Electricity Markets Authority as established under section 1 of the Utilities Act 2000.

Authority Determined Modification has the meaning given to that expression in Section D2.6 (Authority Determined Modifications).

Authority-initiated Modification has the meaning given to that expression in Section D2.4 (Authority-initiated Modifications).

Authority-Led Modification Report has the meaning given to that expression in Section D9A.5 (Authority-Led Modification Report).

Authority-Led Variations means variations to this Code proposed by the Authority pursuant to a direction under Section D9A (Authority-Led Variations).

Back-Up means, in relation to Data which is held on any System, the storage of a copy of that Data for the purpose of ensuring that the copy may be used (if required) to restore or replace the original Data; and "Backed-Up" is to be interpreted accordingly.

Bank Guarantee means an on demand bank guarantee in a form reasonably acceptable to the DCC from a bank with the Required Bank Rating which guarantee has not been breached or disclaimed by the provider and has at least one month left until it expires.

Batched Certificate Signing Request has the meaning given to that expression in Section L8.2 (SMKI Services: Target Response Times).

BCDR Procedure means the Business Continuity and Disaster Recovery Procedure.

Bilateral Agreement means an agreement entered into pursuant to Section H7 (Elective Communication Services) between the DCC and a User.

BSC means the Balancing and Settlement Code maintained under the Electricity System Operator Licence.

Business Architecture means the business architecture which is designed to enable Parties to use the Services and/or to enable Parties, Energy Consumers and those acting on behalf of Energy Consumers to access the functionality described in the Technical Specifications.

Business Architecture Document means a document that describes the Business Architecture.

Business Continuity and Disaster Recovery Procedure means that part of the Incident Management Policy which describes the business continuity and disaster recovery procedures applicable to the Services.

Business Continuity and Disaster Recovery Test means a test of the operation of the DCC's disaster recovery and business continuity arrangements applicable to the Services.

Business Continuity and Disaster Recovery Test Schedule means a document created by the DCC setting out its schedule for undertaking a Business Continuity and Disaster Recovery Test and the likely duration of any such test.

Business Process means a combination of Service Requests as described in Section H13.1A or H13.1B (Code Performance Measures).

Cash Deposit means a deposit of funds by or on behalf of the User into a bank account in the name of the DCC, such that title in such funds transfers absolutely to the DCC.

Central Products List has the meaning given to that expression in Section F2.1 (Central Products List).

Centralised Registration Service has the meaning given to that term in the Smart Meter Communication Licence.

Certificate means a Device Certificate, DCA Certificate, Organisation Certificate, OCA Certificate, IKI Certificate or ICA Certificate (or, for the purposes of any Certificate Policy in which the term is defined, it shall have the meaning ascribed to it in that Certificate Policy).

Certificate Policy means the Device Certificate Policy, the Organisation Certificate Policy, or the IKI Certificate Policy.

Certificate Signing Request means a request for a Certificate submitted by an Eligible Subscriber in accordance with the SMKI RAPP.

Certified Cyber Professional (CPP) means the scheme of that name which is administered by NCSC, or any successor to that scheme.

Certified Cyber Security Consultancy (CCSC) means the scheme of that name which is administered by NCSC or any successor to that scheme.

Certified Products List means those entries on the Central Products List which identify SMETS2+ Device Models.

CESG means NCSC (and any reference to CESG in the Code shall be read as a reference to NCSC).

CH Batch Fault has the meaning given to that expression in Section F9.20 (Liquidated Damages for CH Batch Faults).

CH Batch Fault Payment has the meaning given to that expression in Section F9.21 (Liquidated Damages for CH Batch Faults).

CH Defect means, in respect of a Communications Hub, any fault or defect in relation to the Communications Hub (including any failure: to conform in all respects with, and be fit for the purposes described in, the CHTS; to be free from any defect in design, manufacture, materials or workmanship; and to comply with all applicable Laws and/or Directives including with respect to product safety), which is not caused by a breach of this Code by a Party other than the DCC.

CH Fault Diagnosis has the meaning given to that expression in Section F9.7 (CH Fault Diagnosis).

CH Handover Support Materials means, in respect of each Region, the SEC Subsidiary Document of that name set out in Appendix H and applying to that Region.

CH Installation and Maintenance Support Materials means, in respect of each Region, the SEC Subsidiary Document of that name set out in Appendix I and applying to that Region.

CH Order Management System means that part of the CH Ordering System described as the 'Order Management System' in the CH Handover Support Materials.

CH Ordering System has the meaning given to that expression in Section F5.20 (CH Ordering System).

CH Post-Installation DCC Responsibility has the meaning given to that expression in Section F9.6 (Categories of Responsibility).

CH Pre-Installation DCC Responsibility has the meaning given to that expression in Section F9.6 (Categories of Responsibility).

CH Support Materials means the CH Handover Support Materials and the CH Installation and Maintenance Support Materials.

CH Type Fault has the meaning given to that expression in Section F9.16 (Liquidated Damages for CH Type Faults).

CH Type Fault Payment has the meaning given to that expression in Section F9.19 (Liquidated Damages for CH Type Faults).

CH User Responsibility has the meaning given to that expression in Section F9.6 (Categories of Responsibility).

Change Board has the meaning given to that expression in Section D8.1 (Establishment of the Change Board).

Change Board Member has the meaning given to that expression in Section D8.4 (Membership of the Change Board).

Change Sub-Committee means the Sub-Committee established, or to whom the Panel has allocated the function of being such a Sub-Committee, pursuant to Section D2A (The Change Sub-Committee).

Charges means the charges payable to the DCC pursuant to this Code (including pursuant to Bilateral Agreements).

Charging Methodology means the methodology for determining the Charges, as set out in Section K (Charging Methodology).

Charging Objectives has the meaning given to that expression in Section C1 (SEC Objectives).

Charging Statement means, from time to time, the statement prepared by DCC pursuant to Condition 19 of the DCC Licence that is in force at that time.

CHECK means the scheme of that name which is administered by NCSC, or any successor to that scheme.

Check Cryptographic Protection means, in respect of any electronic Data, to check the Digital Signature(s) or Message Authentication Code within those Data (as applicable) using:

(a) the Public Key contained in the certificate issued by the relevant Certificate Authority associated with the Private Key of the person or device that those Data identify, or imply has generated the Digital Signature;

(b) where applicable, the recipient's relevant Private Key; and

(c) the relevant algorithm identified in the certificate policy under which the relevant certificates were issued (or, where such certificate or certificate policy does not exist, the appropriate algorithm).

CHTS means the Communications Hub Technical Specifications.

Citizens Advice means the National Association of Citizens Advice Bureaux.

Citizens Advice Scotland means the Scottish Association of Citizens Advice Bureaux.

Code means this Smart Energy Code (including its Schedules and the SEC Subsidiary Documents).

Code Administration Code of Practice means the document of that name as approved by the Authority from time to time.

Code Administration Code of Practice Principles means the principles set out as such in the Code Administration Code of Practice.

Code Administrator has the meaning given to that expression in Section C7.1 (Code Administrator).

Code Implementation SIT means the testing undertaken on implementation of this Code that tested the capability of the DCC and the component parts of the DCC Systems together with the Communications Hubs to interoperate with each other and with the RDP Systems.

Code Performance Measure means a performance measure set out in Section D11.3 (Code Performance Measures), Section H13.1 (Code Performance Measures) or Section L8.6 (Code Performance Measures).

Command means a communication to a Device in the format required by the GB Companion Specification and which incorporates all Digital Signatures and/or Message Authentication Codes required by the GB Companion Specification (or, in respect of a SMETS1Device, means an Instruction).

Commercial Activities includes, in particular, Energy Efficiency Services, Energy Management Services, Energy Metering Services, and Energy Price Comparison Services, in each case as defined in the DCC Licence and in relation to the Supply of Energy (or its use) under the Electricity Act and the Gas Act.

Commissioned means, in respect of a Device, that:

(a) the Device has been commissioned in accordance with the Smart

Metering Inventory Enrolment and Decommissioning Procedures or the Transition and Migration Approach Document; and
(b) the Device has not subsequently been Decommissioned or Suspended, and "**Commission**" is to be interpreted in accordance with (a) above. A Communications Hub shall be considered to be Commissioned where the Communications Hub Function that forms part of that Communications Hub is Commissioned.

Common Test Scenarios Document

means the SEC Subsidiary Document set out in Appendix R.

Communication Services

means the Core Communication Services or the Elective Communication Services.

Communications Hub

means a physical device that includes a Communications Hub Function together with a Gas Proxy Function.

Communications Hub Auxiliary Equipment

means any additional, replacement or spare equipment or packaging (not forming part of a Communications Hub) that may be required by a Supplier Party in relation to the installation, maintenance or return of a Communications Hub, as listed by the DCC on the CH Ordering System from time to time.

Communications Hub Charges

has the meaning given to the expression ‘Fixed CH Charges’ in Section K (Charging Methodology).

Communications Hub Finance Acceleration Event

means, in respect of each Communications Hub Finance Facility, that:
(a) an acceleration of repayment of the indebtedness thereunder occurs such that it is immediately due and payable by the borrower in circumstances where the DCC is liable for the same under the Direct Agreement; or
(b) the DCC becomes liable under the Direct Agreement to immediately pay the unamortised asset value (and any associated finance costs in respect) of the Communications Hubs to which that facility relates.

Communications Hub Finance Charges

means, in respect of each Communications Hub Finance Facility, the DCC’s charge to recover the applicable Communications Hub Finance Costs (being a subset of the Communications Hub Charges), in an amount each month determined by the DCC at the time it produces an Invoice for that month (having regard to the requirements of Condition 36.5 of the DCC Licence).

Communications Hub Finance Costs

means, in respect of each Communications Hub Finance Facility, the costs the DCC incurs in procuring the provision (but not the maintenance) of the tranche of Communications Hubs to which that facility relates.

Communications Hub Finance Facility

means a facility arranged by the DCC or a DCC Service Provider with an Approved Finance Party relating exclusively to the funding of the costs associated with acquiring and/or making available a tranche of Communications Hubs, including by way of a loan facility, an equity subscription, or an assignment or sale of receivables.

Communications Hub Forecast

has the meaning given to that expression in Section F5.2 (Communications Hub Forecasts).

Communications Hub Function

means either a SMETS1 CHF; or that part of a device installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the CHTS (but excluding those provisions that are described as applying only to 'Gas Proxy Functions') which was within its Installation Validity Period on the date on which the device was installed.

Communications Hub Hot Shoe

means equipment, other than a Smart Meter, to which a Communications Hub can be connected (provided the Communications Hub complies with the ICHIS).

Communications Hub Order

has the meaning given to that expression in Section F5.7 (Communications Hub Orders).

Communications Hub Products

means, in respect of a Valid Communications Hub Order, the Communications Hubs of the applicable Device Models that are the subject of that order and/or the Communications Hub Auxiliary Equipment that is the subject of that order.

Communications Hub Services

means those Services described in Sections F5 (Communications Hub Forecasts & Orders), F6 (Delivery and Acceptance of Communications Hub), F7 (Installation and Maintenance of Communications Hubs), F8 (Removal and Return of Communications Hubs), and F9 (Categories of Communications Hub Responsibility).

Communications Hub Technical Specifications (or **CHTS**)

means the document(s) set out in Schedule 10.

Communications Hub Transfer

has the meaning given in Section F6A.1 (Communications Hub Transfers).

Communications Hub Transfer Request

has the meaning given in Section F6A.2 (Communications Hub Transfer Requests).

Competent Authority

means the Secretary of State, the Authority, and any local or regional or national agency, authority, department, inspectorate, minister, ministry, official or public or statutory person (whether autonomous or not) of the government of the United Kingdom (but only insofar as each has jurisdiction over the relevant Party, this Code or its subject matter).

Completion of Implementation

has the meaning given to that expression in Section X1 (General Provisions Regarding Transition).

Compromised

means:

(a) in relation to any System, that the intended purpose or effective operation of that System is compromised by the occurrence of any event which has an adverse effect on the confidentiality, integrity or availability of the System or of any Data that are stored on or communicated by means of it;

(b) in relation to any Device, that the intended purpose or effective operation of that Device is compromised by the occurrence of any event which has an adverse effect on the confidentiality, integrity or availability of the Device or of any Data that are stored on or communicated by means of it;

(c) in relation to any Data, that the confidentiality, integrity or availability of that Data is adversely affected by the occurrence of any event;

(d) in relation to any Secret Key Material, that that Secret Key Material (or any part of it), or any Cryptographic Module within which it is stored, is accessed by, or has become accessible to, a person not authorised to access it;

(e) in relation to any Certificate, that any of the following Private Keys is Compromised:

(i) the Private Key associated with the Public Key that is contained within that Certificate;

(ii) the Private Key used by the relevant Certification Authority to Digitally Sign the Certificate; or

(iii) where relevant, the Private Key used by the relevant Certification Authority to Digitally Sign the Certification Authority Certificate associated with the Private Key referred to in (ii);
(f) in relation to any DCCKI Certificate, that any of the following Private Keys is Compromised:
(i) the Private Key associated with the Public Key that is contained within that DCCKI Certificate;
(ii) the Private Key used by the DCCKICA to Digitally Sign
the DCCKI Certificate; or
(iii) where relevant, the Private Key used by the DCCKICA to Digitally Sign the DCCKICA Certificate associated with the Private Key referred to in (ii);
(g) in relation to any certificate issued under an S1SPKI (the 'end certificate'), that any of the following Private Keys is Compromised:
(i) the Private Key associated with the Public Key that is contained within that end certificate;
(ii) any other Private Key that has been used to Digitally Sign any certificate that may be used to link the end certificate to the root certificate for that S1SPKI; and
(h) in relation to any process or to the functionality of any hardware, firmware or software, that the intended purpose or effective operation of that process or functionality is compromised by the occurrence of any event which has an adverse effect on its confidentiality, integrity or availability,
(and “**Compromise**” and “**Compromising**” are to be interpreted accordingly).

Confidential Information

means, in respect of a Party other than DCC, the Data belonging or relating to that Party or that otherwise becomes available to the DCC as a result (whether directly or indirectly) of that Party being a party to this Code.

Confirm Validity

means:
(a) where the person carrying out the check has not previously done so in relation to a particular certificate, to successfully confirm the certificate path validation by using:
(i) the path validation algorithm specified in IETF RFC 5280; or
(ii) where the algorithm identified in IETF RFC 5280 is not appropriate for the certificate for which validity is being confirmed, such other certificate path validation as is appropriate in relation to that type of certificate; or
(b) where the person carrying out the check has previously carried out the check in paragraph (a) in relation to a particular certificate, that the certificate has not subsequently been revoked, and its validity period has not expired.

Consequential Change

means either (as the context requires) a Modification to this Code or a variation to another Energy Code, which (in either case) the Cross Code Steering Group considers would be necessary to give full and timely effect to a variation under a different Energy Code (if that variation was approved).

Consignment has the meaning given to that expression in Section F5.9 (Communications Hub Orders).

Consultation Summary has the meaning given to that expression in Section D6.14 (Working Group Consultation).

Consumer Data has the meaning given to that expression in Section M5.6 (Consumer Data).

Consumer Member has the meaning given to that expression in Section C3.1 (Panel Composition).

Consumer Prices Index means, in respect of any month, the consumer prices index (CPI) published for that month by the Office of National Statistics.

Consumption Data means, in respect of a premises, the quantity of electricity or gas measured by the Energy Meter as having been supplied to the premises.

Contingency Key Pair means Key Pair established by the DCC for the purposes of the replacement of Root OCA Certificates on Devices after a Relevant Private Key has been Compromised, and comprising:

a. a "**Contingency Private Key**", being the Private Key, which is part of that Key Pair; and

b. a "**Contingency Public Key**", being the Public Key which is part of that Key Pair and which is stored in the WrappedApexContingencyKey field of the Root OCA Certificate (being the field identified as such in the Root OCA Certificate Profile at Annex B of the Organisation Certificate Policy).

Contingency Private Key has the meaning given to that expression in sub-paragraph (a) of the definition of Contingency Key Pair in this Section A1.1.

Contingency Public Key has the meaning given to that expression in sub paragraph (b) of the definition of Contingency Key Pair in this Section A1.1.

Contingency Symmetric Key means the symmetric key used to decrypt the Contingency Public Key as set out in the GB Companion Specification.

Core Communication Services means the provision of the Services set out in the DCC User Interface Services Schedule, but excluding the Enrolment Services and Local Command Services.

Correlate means, in respect of one or more Pre-Commands received by a User from the DCC in respect of a Service Request sent by that User, carrying out a process to check that the relevant contents of the Pre-Command is substantively identical to that of the Service Request using either (at the User's discretion):
(a) the Parse and Correlate Software; or
(b) equivalent software procured or developed by the User in accordance with Good Industry Practice,
and "**Correlated**" shall be interpreted accordingly.

CoS Party means the DCC when performing the tasks ascribed to the CoS Party in the Service Request Processing Document.

Countersigned means, in respect of any electronic Data, that such Data have had a Digital Signature applied to them by the DCC in circumstances in which the DCC is required to 'Countersign' the Data, as described in the DCC User Interface Specification (and "**Countersign**" and "**Countersigning**" are to be interpreted accordingly).

Countersigned SMETS1 Alert has the meaning given to that expression in the DCC User Interface Specification.

Countersigned SMETS1 Response has the meaning given to that expression in the DCC User Interface Specification.

Countersigned S1SP Alert has the meaning given to that expression in the DCC User Interface Specification.

Countersigned Service Request means a communication sent by the DCC to a SMETS1 Service Provider in the circumstances set out in the Service Request Processing Document.

CPA Assurance Maintenance Plan means the document agreed with the NCSC that describes the components of a device which, if changed, will require a new CPA Certificate to be issued.

CPA Certificates has the meaning given to that expression in Section F2.4 (Background to Assurance Certificates).

CPA Certificate Remedial Plan means a remedial plan for resolving the security issues that have resulted in or arisen from (or will result in or arise from) the cancellation, withdrawal, or expiry without renewal, of a Device Model's CPA Certificate, as further described in the CPL Requirements Document.

CPA Security Characteristics means the documents published from time to time on the NCSC website that set out the features, testing and deployment requirements necessary to obtain a CPA Certificate in respect of one or more of the following:
(a) 'Gas Smart Metering Equipment';
(b) 'Electricity Smart Metering Equipment';
(c) 'Communications Hubs';
(d) 'HAN Connected Auxiliary Load Control Switches'.

CPL Requirements Document means the SEC Subsidiary Document of that name set out as Appendix Z.

Credit Assessment Agency means the Credit Assessment Agency named in the table at Section J3.14 (Party's Unsecured Credit Factor Percentage).

Credit Assessment Score means, in respect of a Party, a credit assessment score in respect of that Party procured from the Credit Assessment Agency.

Credit Cover Requirement has the meaning given to that expression in Section J3.4 (Amount of Credit Support to be Provided).

Credit Cover Minimum Threshold means, in respect of each Regulatory Year, £2,000, multiplied by the Consumer Prices Index for the October preceding the start of that Regulatory Year, divided by the Consumer Prices Index for October 2014. The relevant amount will be rounded to the nearest pound.

Credit Support means one or more of a Bank Guarantee, Cash Deposit and/or Letter of Credit procured by a User pursuant to Section J3 (Credit Cover Requirement).

CREST

means the not-for-profit company registered in the United Kingdom with company number 06024007.

Critical Command

has the meaning given to that expression in the GB Companion Specification.

Critical Service Request

means a Service Request which is identified as critical in the DCC User Interface Specification (or, in the case of Elective Communication Services, the relevant Bilateral Agreement).

Critical Service Response

means a Service Response in respect of a Critical Service Request.

Cross Code Steering Group

means the group of that name established under the Change Management Schedule of the REC.

Cryptographic Credential Token

means a token compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time) and containing Secret Key Material, as issued in accordance with the SMKI RAPP.

Cryptographic Hash Function

means an algorithm:
(a) the inputs to which it would be computationally infeasible to determine from knowledge of its outputs; and
(b) in relation to which it would be computationally infeasible to find an input which generates the same output as any other input.

Cryptographic Module

means a set of hardware, software and/or firmware that is Separated from all other Systems and that is designed for:
(a) the secure storage of Secret Key Material; and
(b) the implementation of Cryptographic Processing without revealing Secret Key Material.

Cryptographic Processing

means the generation, storage (other than of Secret Key Material used in relation to communications with a SMETS1 Device, where that Secret Key Material is encrypted) or use of any Secret Key Material.

CSP System

means those parts of the DCC Total System which comprise Systems used by a DCC Service Provider in order to provide Communications Services.

CSS Provider

means the entity providing the Centralised Registration Service.

CSS Provider Systems

means any Systems which are operated by or on behalf of the CSS Provider, and which are used in whole or in part for:

(a) the collection, storage, Back-Up, processing or communication of Registration Data immediately prior to, or for the purposes of, its provision to the DCC Live System referred to paragraph (a) and paragraph (c) of the definition of DCC Live Systems; or

(b) generating Data for communication to the OCA, ICA or DCCKICA, or receiving Data from the OCA, ICA or DCCKICA (including any Systems which store or use Secret Key Material for such purposes),

and any other Systems from which the Systems described in paragraphs (a) and (b) are not Separated.

For the avoidance of doubt, CSS Provider Systems include only the Systems used by the CSS Provider to send Registration Data to the DCC and any other Systems from which those sending Systems are not Separate.

CSV file

has the meaning given to that expression in the Threshold Anomaly Detection Procedures.

Customer Analytics Reporting

means the reporting suite provided by the DCC to Users, the requirements of which are described in the Customer Analytics Reporting Methodology and Guidance Document.

Customer Analytics Reporting Methodology and Guidance Document

means the document of that name as established and from time to time updated by the DCC pursuant to Section H13.6A (Customer Analytics Reporting).

Customer Supply Continuity Plan

means the plan of that name maintained by each Supplier Party under Condition 19E of its Gas Supply Licence and/or Condition 19C of its Electricity Supply Licence.

Data

means any information, data, knowledge, figures, methodologies, minutes, reports, forecasts, images or sounds (together with any database made up of any of these) embodied in any medium (whether tangible or electronic).

Data Controller

has the meaning given to 'controller' in the Data Protection Legislation.

Data Processor has the meaning given to 'processor' in the Data Protection Legislation.

Data Protection Legislation means General Data Protection Regulation and any national legislation implementing the same and related statutory instruments.

Data Retention Policy means a document developed and maintained by a Party which sets out, in relation to Data held by that Party, the periods for which such Data will be held by it for the purpose of ensuring that it is able to satisfy its legal, contractual and commercial requirements in respect of the Data.

Data Subject has the meaning given to that expression in the Data Protection Legislation.

Data Subject Rights means the rights of Data Subjects under the Data Protection Legislation.

DCA Certificate has the meaning given to that expression in Annex A of the Device Certificate Policy.

DCC means, subject to Section M9 (Transfer of DCC Licence), the holder from time to time of the DCC Licence. In accordance with Section A2.1(l), references to the DCC shall (where applicable) include references to the DCC Service Providers with whom the DCC has contracted in order to secure performance of its obligations under this Code.

DCC Alert has the meaning given to that expression in the DCC User Interface Specification.

DCC Assessment means a DCC Preliminary Assessment or a DCC Impact Assessment.

DCC Boxed means a testing tool provided by the DCC that replicates parts of the DCC Total System which can be used by Testing Participants outside of the DCC's physical test laboratories.

DCC Finance Facility means a Communications Hub Finance Facility or a 4G DBT Finance Facility.

DCC Gateway Bandwidth Option means a DCC Gateway HV Connection or a DCC Gateway LV Connection.

DCC Gateway Connection means, for a premises, the physical infrastructure by which a connection is (or is to be) made between that premises and the DCC Systems (and each DCC Gateway Connection shall form part of the DCC Systems).

DCC Gateway Connection Code of Connection means the SEC Subsidiary Document set out in Appendix G.

DCC Gateway Equipment means, for each premises and any DCC Gateway Connection provided at that premises, that part of the DCC Gateway Connection that is (or is to be) located within that premises.

DCC Gateway HV Connection means the high-volume technology solution by which the DCC provides DCC Gateway Connections, as further described in the DCC Gateway Connection Code of Connection.

DCC Gateway LV Connection means the low-volume technology solution by which the DCC provides DCC Gateway Connections, as further described in the DCC Gateway Connection Code of Connection.

DCC Gateway Party means a Party that is seeking or has been provided with a DCC Gateway Connection at its premises, or to whom the right to use that connection has been transferred in accordance with Section H15.16 (Use of a DCC Gateway Connection)..

DCC ID means each identification number established by the DCC pursuant to Section H4.43 (DCC IDs).

DCC Impact Assessment means, in respect of analysis pursuant to Section D6.9 (Analysis by the DCC), a full and formal assessment by the DCC of the determined area for analysis.

DCC Independent Security Assessment Arrangements has the meaning given to that expression in Section G9.1 (The DCC Independent Security Assessment Arrangements).

DCC Independent Security Assessment Service Provider has the meaning given to that expression in Section G9.3 (Procurement of the DCC Independent Security Assessment Service Provider).

DCC Independent Security Assurance Service Provider

has the meaning given to that expression in Section G9.4 (The DCC Independent Security Assurance Service Provider).

DCC Individual Live System

means, with regard to the DCC's duty to Separate parts of the DCC Total System, a part of the DCC Total System which is used:
(a) for one of the purposes specified in paragraphs (a) to (g), or (j) of the definition of DCC Live Systems, where the part used for each such purpose shall be treated as an individual System distinct from:
(i) the part used for each other such purpose; and
(ii) any part used for a purpose specified in either paragraph (h) or (i) of the definition of DCC Live Systems; or
(b) by a SMETS1 Service Provider for the purpose specified in paragraph (h) of the definition of DCC Live Systems, where the part used by each SMETS1 Service Provider shall be treated as an individual System distinct from:
(i) the part used by each other SMETS1 Service Provider; and
(ii) any part used for a purpose specified in any of paragraphs (a) to (g), or paragraphs (i) and (j), of the definition of DCC Live Systems; or
(c) by a DCO for the purpose specified in paragraph (i) of the definition of DCC Live Systems, where the part used by each DCO shall be treated as an individual System distinct from:
(i) the part used by each other DCO; and
(ii) any part used for a purpose specified in any of paragraphs (a) to (h) or (j) of the definition of DCC Live Systems.

DCC Interfaces

means each and every one of the following interfaces:
(a) the DCC User Interface;
(b) the Registration Data Interface;
(c) the SMKI Repository Interface;
(d) the SMKI Services Interface;
(e) the Self-Service Interface; and
(f) the communications interfaces used for the purposes of accessing those Testing Services designed to be accessed via DCC Gateway Connections.

DCC Internal Security Controls

means security controls applied by the DCC in relation to SMETS1 Service Requests in a manner consistent with the End-To-End Security Architecture.

DCC Internal Systems

means those aspects of the DCC Total System for which the specification or design is not set out in this Code.

DCC IT Supporting Systems

means, with regard to the DCC’s duty to Separate parts of the DCC Total System, those parts of the DCC Total System which are used to support the DCC Live Systems and DCC IT Testing and Training Systems.

DCC IT Testing and Training Systems

means, with regard to the DCC's duty to Separate parts of the DCC Total System, those parts of the DCC Total System which are used to support the testing and training of DCC Personnel and third parties in relation to the provision of Services by the DCC.

DCC Key Infrastructure (or DCCKI)

means the public key infrastructure established by DCC to provide, amongst other things, transport layer security across DCC Gateway Connections.

DCC Licence

means the licences granted under section 6(1A) of the Electricity Act and section 7AB(2) of the Gas Act.

DCC Live Systems

means those parts of the DCC Total System which are used for the purposes of:

a. (other than to the extent to which the activities fall within paragraph (b), (c), (f), (g), (h), (i) or (j) below) processing (including Countersigning of SMETS1 Responses, SMETS1 Alerts and S1SP Alerts, but not Countersigning of SMETS1 Service Requests) Service Requests, Pre-Commands, Commands, Instructions, Service Responses and Alerts, holding or using Registration Data for the purposes of processing Service Requests and Signed Pre-Commands, and providing the Repository Service;
b. Threshold Anomaly Detection (other than that carried out by a DCO, a SMETS1 Service Provider or the CoS Party) and (other than to the extent to which the activity falls within paragraph (d), (f), (g), (h), (i) or (j) below) Cryptographic Processing relating to the generation and use of a Message Authentication Code and Countersigning SMETS1 Service Requests;
c. discharging the obligations placed on the DCC in its capacity as CoS Party;
d. providing SMKI Services;
e. the Self-Service Interface;
f. creating, using, storing or destroying the Contingency Private Key, the Contingency Symmetric Key or the Recovery Private Key (except where each such key is being stored in an unusable form because it is or is being split into multiple parts as described in Appendix L (SMKI Recovery Procedure) or in the Organisation CPS;
g. the Production Proving Systems;
h. discharging the obligations of any SMETS1 Service Provider in its capacity as such;
i. discharging the obligations of any DCO in its capacity as such; and
j. discharging the obligations of the CSS Provider in its capacity as such.

DCC Member

has the meaning given to that expression in Section C3.1 (Panel Composition).

DCC Personnel

means those persons who are engaged by the DCC, in so far as such persons carry out, or are authorised to carry out, any activity in relation to the Authorised Business.

DCC Preliminary Assessment

means, in respect of analysis pursuant to Section D6.9 (Analysis by the DCC):
(a) a preliminary assessment by the DCC of the determined area for analysis; and
(b) the costs and expenses that the DCC will incur in undertaking a DCC Impact Assessment in respect of the determined area for analysis.

DCC Release Management Policy

has the meaning given to that expression in Section H8.9 (Release Management).

DCC Security Assessment Report

has the meaning given to that expression in Section G9.7(a) (DCC Security Assessment Reports and Responses).

DCC Security Assessment Response

has the meaning given to that expression in Section G9.7(b) (DCC Security Assessment Reports and Responses).

DCC Service Provider

means an External Service Provider, as defined in the DCC Licence (but always excluding the DCC itself).

DCC Service Provider Contract

means, as between the DCC and each DCC Service Provider, any arrangement (however described) pursuant to which the DCC procures services for the purpose of providing the Services.

DCC Systems

means the DCC Total System, including the SMETS1 SM WAN and the SMETS2+ SM WAN, but excluding all Communications Hubs.

DCC Total System

means the Systems used by the DCC and/or the DCC Service Providers in relation to the Services and/or this Code, including the DCC User Interface, the SMETS1 SM WAN, the SMETS2+ SM WAN and Communications Hubs except for those Communications Hubs which are:
(a) SMETS1 CHs;

(b) neither installed nor in the possession of the DCC; and/or
(c) installed, but are not Commissioned.

DCC User Interface means the communications interface designed to allow the communications referred to in Section H3.3 (Communications to be sent via the DCC User Interface) to be sent between the DCC and Users.

DCC User Interface Code of Connection means the SEC Subsidiary Document of that name set out in Appendix AE.

DCC User Interface Services means the Services described in the DCC User Interface Services Schedule.

DCC User Interface Services Schedule means the SEC Subsidiary Document of that name set out in Appendix E.

DCC User Interface Specification means the SEC Subsidiary Document set out in Appendix AD.

DCC Website means the DCC's publicly available website (or, where the Panel and the DCC so agree, the Website).

DCCKI Authorised Subscriber means a Party or RDP which is a DCCKI Authorised Subscriber for the purposes of (and in accordance with the meaning given to that expression in) the DCCKI Certificate Policy.

DCCKI Authority Revocation List (or DCCKI ARL) has the meaning given to that expression in the DCCKI Certificate Policy.

DCCKI Certificate has the meaning given to that expression in the DCCKI Certificate Policy.

DCCKI Certificate Policy means the SEC Subsidiary Document of that name set out in Appendix S.

DCCKI Certificate Revocation List (or DCCKI CRL) has the meaning given to that expression in the DCCKI Certificate Policy.

DCCKI Certificate Signing Request

means a request for a DCCKI Certificate submitted by a DCCKI Eligible Subscriber in accordance with the DCCKI Certificate Policy and the DCCKI RAPP.

DCCKI Certification Authority (or DCCKICA)

has the meaning given to that expression in the DCCKI Certificate Policy.

DCCKI Certification Practice Statement (or DCCKI CPS)

has the meaning given to that expression in Section L13.37 (the DCCKI Certification Practice Statement).

DCCKI Code of Connection

means the SEC Subsidiary Document of that name set out in Appendix V, which:
(a) has the purpose described in Section L13.14 (DCCKI Code of Connection); and
(b) is originally to be developed pursuant to Sections L13.15 to L13.16 (DCCKI Interface Document Development).

DCCKI Document Set

has the meaning given to that expression in Section L13.33 (the DCCKI Document Set).

DCCKI Eligible Subscriber

has the meaning given to that expression in Section L13.8 (DCCKI Eligible Subscribers).

DCCKI Infrastructure Certificate

has the meaning given to that expression in the DCCKI Certificate Policy.

DCCKI Interface Design Specification

means the SEC Subsidiary Document of that name set out in Appendix T, which:
(a) has the purpose described in Section L13.13 (DCCKI Interface Design Specification); and
(b) is originally to be developed pursuant to Sections L13.15 to L13.16 (DCCKI Interface Document Development).

DCCKI Participants

means the DCC (acting in its capacity as the provider of the DCCKI Services), all DCCKI Subscribers and all DCCKI Relying Parties.

DCCKI PMA Functions

has the meaning given to that expression in Section L13.54 (the DCCKI PMA Functions).

DCCKI Registration Authority means the DCC, acting in its capacity as such for the purposes of (and in accordance with the meaning given to that expression in) the DCCKI Certificate Policy.

DCCKI Registration Authority Policies and Procedures (or DCCKI RAPP) means the SEC Subsidiary Document of that name set out in Appendix W, which is originally to be developed pursuant to Sections L13.35 to L13.36 (the DCCKI Registration Authority Policies and Procedures: Document Development).

DCCKI Relying Party means a person who, pursuant to the Code, receives and relies upon a DCCKI Certificate.

DCCKI Repository has the meaning given to that expression in Section L13.17 (the DCCKI Repository).

DCCKI Repository Code of Connection means the SEC Subsidiary Document of that name set out in Appendix V, which:

a. (a) has the purpose described in Section L13.28 (DCCKI Repository Code of Connection); and
b. (b) is originally to be developed pursuant to Sections L13.29 to L13.30 (DCCKI Repository Interface Document Development).

DCCKI Repository Interface has the meaning given to that expression in Section L13.26 (the DCCKI Repository Interface).

DCCKI Repository Interface Design Specification means the SEC Subsidiary Document of that name set out in Appendix U, which:
(a) has the purpose described in Section L13.27 (DCCKI Repository Interface Design Specification); and
(b) is originally to be developed pursuant to Sections L13.29 to L13.30 (DCCKI Repository Interface Document Development).

DCCKI Repository Service has the meaning given to that expression in Section L13.18 (the DCCKI Repository Service).

DCCKI SEC Documents has the meaning given to that expression in Section L13.34 (the DCCKI SEC Documents).

DCCKI Service Interface has the meaning given to that expression in Section L13.12 (the DCCKI Service Interface).

DCCKI Services has the meaning given to that expression in Section L13.1 (the DCCKI Services).

DCCKI Subscriber means, in relation to any DCCKI Certificate, a Party or RDP which has been Issued with and accepted that Certificate, acting in its capacity as the holder of the Certificate.

DCCKICA Certificate has the meaning given to that expression in the DCCKI Certificate Policy.

DCO means the DCC when carrying out the role and activities ascribed to a DCO in this Code; and where the DCC carries out that role and those activities by processing communications which relate to different SMETS1 Service Providers, it shall be treated as being a separate DCO in respect of the communications relating to each such SMETS1 Service Provider.

Decommissioned means, in respect of a Device that has previously been Commissioned, that the Device has been decommissioned in accordance with Section H6.1 (Decommissioning).

Default Interest Rate means, for any day, 8% above the base lending rate of the Bank of England at 13.00 hours on that day.

Defaulting Party has the meaning given to that expression in Section M8.1 (Events of Default).

Delivery Batch means all the Communications Hubs that were delivered pursuant to Section F6 (Delivery and 37 Acceptance of Communications Hubs) to a single location during a month (regardless of whether they were delivered pursuant to more than one Communications Hub Order by more than one Party).

Delivery Date has the meaning given to that expression in Section F5.8 (Communications Hub Orders).

Delivery Location has the meaning given to that expression in Section F5.8 (Communications Hub Orders).

Delivery Month has the meaning given to that expression in Section F5.8 (Communications Hub Orders).

Delivery Quantity has the meaning given to that expression in Section F5.8 (Communications Hub Orders).

Delivery Window means, for each delivery of Communications Hub Products to a Delivery Location, the time period on the applicable Delivery Date within which the DCC is to deliver the Communications Hub Products, as established in accordance with the CH Handover Support Materials.

Denial of Service Event means any unauthorised attempt to make any part of a System wholly or partially unavailable for use for a period of time.

Deployed Products List means the list published by the Panel pursuant to Section F2.10 (Deployed Products List).

Derogation has the meaning given to that expression at Section A4.2.

Designated Premises means Non-Domestic Premises defined as Designated Premises within the meaning given to that expression in the Electricity Supply Licences or the Gas Supply Licences.

Detailed Evaluation has the meaning given to that expression in Section H7.7 (Detailed Evaluation of Elective Communication Services).

Device means one of the following individual devices: (a) an Electricity Smart Meter; (b) a Gas Smart Meter; (c) a Communications Hub Function; (d) a Gas Proxy Function; (e) a Pre-Payment Meter Interface Device; (f) a HAN Connected Auxiliary Load Control Switch; (g) a Standalone Auxiliary Proportional Controller; and (h) any Type 2 Device.

Device Alert has the meaning given to that expression in the DCC User Interface Specification.

Device and User System Tests has the meaning given to that expression in Section H14.31 (Device and User System Tests).

Device Certificate has the meaning given to that expression in Annex A of the Device Certificate Policy.

Device Certificate Policy means the SEC Subsidiary Document of that name set out in Appendix A.

Device Certification Authority (or DCA) has the meaning given to that expression in Annex A of the Device Certificate Policy.

Device Certification Practice Statement (or Device CPS) has the meaning given to that expression in Section L9.8 (the Device Certification Practice Statement).

Device ID means:
(a) in relation to a SMETS2+ Device, the unique number by which an individual Device can be identified, as allocated to that Device in accordance with the applicable version of the GB Companion Specification; or
(b) in relation to a SMETS1 Device, the unique number complying with the SMETS1 Supporting Requirements and by which the Device can be identified.

Device Log means, in respect of a SMETS2+ Device (excluding Type 2 Devices), the electronic record within that Device which records the other Devices from which that Device can receive Data via the HAN. In respect of a SMETS1 Device, it shall have the meaning in the SMETS1 Supporting Requirements.

Device Model

a. subject to sub-paragraph (b), in respect of a Communications Hub or a Device (other than a Communications Hub Function or a Gas Proxy Function), the Manufacturer, the model, the hardware version and the firmware version of the Communications Hub or Device or,
b. in relation to a PPMID that is capable of forming part of either a SMETS1 Smart Metering System, or a SMETS2+ Smart Metering System, insofar as it relates to the PPMID forming part of a SMETS1 Smart Metering System; the Manufacturer of the PPMID, its model, its hardware version and its firmware version that is different to the

firmware version of the PPMID that forms part of a SMETS2+ Smart Metering System.

Device Security Credentials means:
(a) in respect of any SMETS2+ Device (other than a Type 2 Device), the Device's active Device Certificates and the electronic record within that Device of information from any other Certificates required to be held on the Device in order to execute the functionality of that Device specified in the GB Companion Specification;
(b) in respect of a SMETS1 Device, the Device Security Credentials required by the SMETS1 Supporting Requirements.

Device Type means, in respect of a Device, a generic description of the category of Devices into which the Device falls.

Device Zigbee Information Repository means a table established and maintained by the Panel that details Device Zigbee details and Device Zigbee information.

Digital Signature means, in respect of any electronic Data, a digital signature generated using:

(a) the entirety of those Data (excluding the digital signature itself and, to the extent specified in the code, any other parts of those Data);
(b) a Private Key; and
(c) the signature algorithm defined in the certificate profile in the certificate policy under which the certificate associated with that Private Key was issued or (where such certificate policy does not exist) the signature algorithm relevant to that certificate.

Digitally Signed means, in respect of any electronic Data, that such Data have had the necessary Digital Signatures applied to them (and "Digitally Sign" and "Digitally Signing" are to be interpreted accordingly).

Direct Agreement means, in respect of each Communications Hub Finance Facility or 4G DBT Finance Facility, any agreement entered into by the DCC in relation to that facility under which the DCC owes direct payment obligations.

Disaster means an event that causes one or more of the 'DCC Disaster Impacts' listed in the BCDR Procedure.

Dispute means any dispute or difference (of whatever nature) arising under, out of or in connection with this Code and/or any Bilateral Agreement.

DLMS Certificates has the meaning given to that expression in Section F2.4 (Background to Assurance Certificates).

DLMS User Association means the association of that name located in Switzerland (see - www.dlms.com).

Domestic Premises means premises at which a Supply of Energy is or will be taken wholly or mainly for domestic purposes, which is to be interpreted in accordance with Condition 6 of the relevant Energy Supply Licence.

Draft Budget has the meaning given to that expression in Section C8.11 (Preparation of Draft Budgets).

Draft Proposal has the meaning given to that expression in Section D1.2 (Modifications).

Dual Band Communications Hub has the meaning given to that expression in the CHTS.

Dual Band Communications Hub Configuration Tables means the technical document set out as an annex to Section F4 (Operational Functionality, Interoperability and Access for the DCC).

Due Date has the meaning given to that expression in Section J1.5 (Payment of Charges).

DUIS means the DCC User Interface Specification.

DUIS XML Schema means, in relation to any Version of the DCC User Interface Specification, the version of the DUIS XML Schema contained within it, as specified in the defined term 'DUIS XML Schema' in that Version of the DCC User Interface Specification.

EII DCCKICA Certificate has the meaning given to that expression in the DCCKI Certificate Policy.

EII DCCKICA Certificate Revocation List (or EII DCCKICA CRL)

has the meaning given to that expression in the DCCKI Certificate Policy.

ECoS Interface

means any one or more communications interface designed to allow communications to be sent between:

a. that part of the DCC Total System which is used for the purposes referred to in paragraph (c) of the definition of DCC Live Systems; and
b. any other System.

ECoS Interface Specification

means any one or more document which specifies the detailed format of communications which are to take place across an ECoS Interface.

ECoS Service Live Date

means the date on which the DCC achieves the milestone which is:

a. set out in the plan approved by the Secretary of State under and in accordance with Condition 13A of the DCC Licence; and
b. referred to (or identified as) 'ECoS Service Live' in that approved plan.

Elected Members

has the meaning given to that expression in Section C3.1 (Panel Composition).

Elective Communication Services

means the provision of communication services that are (or are to be) defined in a Bilateral Agreement (rather than the DCC User Interface Services Schedule) in a manner that involves communication via the SM WAN (provided that such services must relate solely to the Supply of Energy or its use).

Electricity Act

means the Electricity Act 1989.

Electricity Additional Registration Data

has the meaning given to that expression in Section E5.2 (Electricity Data).

Electricity Distribution Licence

means a licence granted, or treated as granted, under section 6(1)(c) of the Electricity Act.

Electricity Distributor means, for a Smart Metering System or a Device, the holder of the Electricity Distribution Licence for the network to which the relevant premises are connected.

Electricity Meter means any meter that conforms to the requirements of paragraph 2 of schedule 7 to the Electricity Act and is used for the purpose of measuring the quantity of electricity that is supplied to premises.

Electricity Network Party means a Party that holds an Electricity Distribution Licence.

Electricity Smart Meter means either a SMETS1 ESME; or a device (other than a SMETS1 ESME) installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
the ESMETS (and, where applicable, the part(s) of the ESMETS relevant to the Physical Device Type in question) in a Version of the ESMETS which was within its Installation Validity Period on the date on which the device was installed.

Electricity Smart Metering Equipment Technical Specification (or **ESMETS)** means the part(s) of the document(s) set out in Schedule 9 identified as applying either to 'Electricity Smart Metering Equipment' or to 'Electricity Smart Metering System'.

Electricity Supplier Party means a Party that holds an Electricity Supply Licence (regardless of whether that Party also holds a Gas Supply Licence).

Electricity Supply Licence means a licence granted, or treated as granted, pursuant to section 6(1)(d) of the Electricity Act.

Eligible Subscriber has the meaning given to that expression in Section L3.15 (Eligible Subscribers).

Eligible User means, in respect of a Service set out in the DCC User Interface Services Schedule or an Elective Communication Service and (in either case) a Smart Metering System (or a Device forming, or to form, part of a Smart Metering System), one of the Users eligible to receive that Service in respect of that Smart Metering System (or such a Device), as further described in Section H3.8 (Eligibility for Services).

Eligible User Role means, in respect of a Service set out in the DCC User Interface Services Schedule or an Elective Communication Service, one of the User Roles that is capable of being an Eligible User in respect of that Service (determined without reference to a particular Smart Metering System or Device).

Enabling Services means one or more of the Enrolment Service, the Communications Hub Service, and the Other Enabling Services.

Encrypt means, in respect of Section H4 (Processing Service Requests), the process of encoding Data using the methods set out for that purpose in the GB Companion Specification; and "**Encrypted**" shall be interpreted accordingly.

End-to-End Security Architecture means a document that describes how the security controls in respect of smart metering relate to the architecture of the End-to-End Smart Metering System.

End-to-End Smart Metering System means the DCC Total System, all Enrolled Smart Metering Systems, all User Systems and all RDP Systems.

End-to-End Technical Architecture means the DCC Systems and the Smart Metering Systems together, including as documented in the Technical Code Specifications.

Enduring Change of Supplier Transition and Migration Approach Document (ETMAD) means the SEC Subsidiary Document set out in Appendix AS.

Enduring Testing Approach Document means the SEC Subsidiary Document set out in Appendix J.

Energy Code means a multilateral code or agreement maintained pursuant to one or more of the Energy Licences.

Energy Consumer means a person who receives, or wishes to receive, a Supply of Energy at any premises in Great Britain.

Energy Licence means a licence that is granted, or treated as granted, under section 6 of the Electricity Act or under section 7, 7A or 7AB of the Gas Act.

Energy Market Data Item means the most granular level of data defining a specific attribute in respect of a data type, the permissible values for which are defined and controlled in the Energy Market Data Specification.

Energy Market Data Specification a common set of standards for all industry data represented within the Energy Market Architecture Repository as defined in the REC.

Energy Market Message has the meaning given to that expression in the REC.

Energy Market Meta Data Owner means the organisation responsible for the control of the meta data associated with the Energy Market Data Item or Energy Market Message as defined in the REC.

Energy Meter means an Electricity Meter or a Gas Meter.

Energy Supply Licence means an Electricity Supply Licence or a Gas Supply Licence.

Enrolment means, in respect of a Smart Metering System, the act of enrolling that Smart Metering System in accordance with the Enrolment Service (and the words “**Enrol**” and “**Enrolled**” will be interpreted accordingly).

Enrolment Service means the Service described in Section H5 (Enrolment Services and the Smart Metering Inventory).

Equivalent Steps means in relation to a SMETS1 Device and/or a SMETS1 Service Request, those steps that are required to be taken such that:
(a) the relevant Device is, or Data relating to it, are configured or reconfigured; or
(b) Data that are stored on, or in relation to or generated by, that Device are retrieved,
so as to have an effect that is equivalent to that which would occur were a Service Request of the same Service Reference Variant as the SMETS1 Service Request to be Successfully Executed on a SMETS2+ Device equivalent to the SMETS1 Device (taking into account the different design functionality of the SMETS1 Device and, where relevant, any specific requirements for alternative processing set out in the SMETS1 Supporting

Requirements), and such that the appropriate SMETS1 Response(s) and SMETS1 Alert(s) can be generated, and provided that, in relation to a SMETS1 Device that has a Non-EPCL Device Model, the steps required to be taken shall be those steps of the nature set out above that would be required to have been taken in relation to that Device prior to its firmware version changing to that of a Non-EPCL Device Model.

EU Regulations means any retained EU Law.

EUI-64 Compliant means a 64-bit globally unique identifier governed by the Institute of Electrical and Electronics Engineers.

Event of Default has the meaning given to that expression in Section M8.1 (Events of Default).

Export MPAN means an MPAN for a Metering Point relating to the export of electricity from a premises.

Export Supplier means, for a Smart Metering System or a Device and any period of or point in time, the Supplier Party Registered during that period of or at that point in time in respect of the Export MPAN relating to that Smart Metering System or Device (but excluding Smart Metering Systems or Devices for which there is no related Import MPAN, in which circumstance such Registered Supplier Party is deemed to be the Import Supplier in accordance with the definition thereof).

Failing Electricity Supplier Party means an Electricity Supply Party whose Electricity Supply Licence is to be revoked by the Authority, as notified by the Authority to the SMKI PMA.

Failing Energy Supplier means a Supplier Party which is a Failing Gas Supplier Party and/or a Failing Electricity Supplier Party.

Failing Gas Supplier Party means a Gas Supplier Party whose Gas Supply Licence is to be revoked by the Authority, as notified by the Authority to the SMKI PMA.

Fast-Track Modifications has the meaning given to that expression in Section D2.8 (Fast-Track Modifications).

File Signing Certificate has the meaning given to that expression in the IKI Certificate Policy.

File Signing Software means software provided by the DCC for the purposes of enabling a Party to apply a Digital Signature to a CSV File.

Firmware Hash means the result of the application of a hash function, such function being a repeatable process to create a fixed size and condensed representation of a message using the SHA-256 algorithm as specified in the US Government's Federal Information Processing Standards document 180-4.

Firmware Information Repository means a table established and maintained by the Panel that details firmware updates, releases, Manufacturer contact details and other firmware information.

Follow-up Security Assessment has the meaning given to that expression in Section G8.19 (Categories of Security Assurance Assessment) for a User Security Assessment and in Section G9.17 for a DCC Security Assessment.

Force Majeure means, in respect of any Party (the **Affected Party**), any event or circumstance which is beyond the reasonable control of the Affected Party, but only to the extent such event or circumstance (or its consequences) could not have been prevented or avoided had the Affected Party acted in accordance with Good Industry Practice. Neither lack of funds nor strikes or other industrial disturbances affecting only the employees of the Affected Party and/or its contractors shall be interpreted as an event or circumstance beyond the Affected Party's control.

Forum Sub-Group has the meaning given to that expression in Section Z6.1 (Definitions).

Framework Agreement means an agreement in the form set out in Schedule 1.

Full Privacy Assessment has the meaning given to that expression in Section I2.12 (Categories of Assessment).

Full User Security Assessment has the meaning given to that expression in Section G8.16 (Categories of Security Assurance Assessment).

Future-Dated Services has the meaning given to that expression in Section H3.11 (Categories of Services).

Gas Act means the Gas Act 1986.

Gas Additional Registration Data has the meaning given to that expression in Section E5.4 (Gas Data).

Gas Meter means a meter that conforms to the requirements of section 17(1) of the Gas Act for the purpose of registering the quantity of gas supplied through pipes to premises.

Gas Network Party means a Party that holds a Gas Transporter Licence.

Gas Proxy Function means either a SMETS1 GPF; or a Device installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the CHTS (but only those provisions that are described as applying to 'Gas Proxy Functions') which was within its Installation Validity Period on the date on which the device was installed.

Gas Smart Meter means either a SMETS1 GSME; or a device (other than a SMETS1 GSME) installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the GSMETS which was within its Installation Validity Period on the date on which the device was installed.

Gas Smart Metering Equipment Technical Specification (or **GSMETS**) means the part(s) of the document(s) set out in Schedule 9 identified as applying either to 'Gas Smart Metering Equipment' or to 'Gas Smart Metering System'.

Gas Supplier means, for a Smart Metering System or a Device and any period of or point in time, the Supplier Party Registered during that period of or at that point in time in respect of the MPRN relating to that Smart Metering System or Device.

Gas Supplier Party means a Party that holds a Gas Supply Licence (regardless of whether that Party also holds an Electricity Supply Licence).

Gas Supply Licence means a licence granted, or treated as granted, pursuant to section 7A(1) of the Gas Act.

Gas Transporter means, for a Smart Metering System or a Device, the holder of the Gas Transporter Licence for the network to which the relevant premises are connected.

Gas Transporter Licence means a licence granted, or treated as granted, under section 7 of the Gas Act (but not the licence in respect of the National Transmission System, as defined in the UNC).

GB Companion Specification (or GBCS) means the document of that name set out in Schedule 8.

GBCS Payload means the content of a Pre-Command, Signed Pre-Command, Service Response or Device Alert which is set out in the format required by the GB Companion Specification.

General Data Protection Regulation means EU Regulation 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data.

General Installation End Date has the meaning given to that expression in Section A3.13.

General SEC Objectives has the meaning given to that expression in Section C1 (SEC Objectives).

GFI Testing means a testing service provided by the DCC to enable eligible persons to test the interoperability of Devices (other than those comprising Communications Hubs) with the DCC Systems and with the Communications Hubs to be provided as part of the Testing Services, such that those Devices are able to respond to Commands received from or via the DCC in accordance with the requirements defined in the GB Companion Specification.

GFI Testing Tools means a product provided by the DCC to enable Testing Participants to test their products against an interpretation of DCC Total Systems, including an interpretation of the GBCS standard, such that those Devices are able to respond to Commands received in accordance with the requirements defined in the GB Companion Specification.

Good Industry Practice means, in respect of a Party, the exercise of that degree of skill, diligence, prudence and foresight which would reasonably and ordinarily be expected from a skilled and experienced person engaged in a similar type of undertaking as that Party under the same or similar circumstances.

Greenhouse Gas Emissions means emissions of Greenhouse Gases, as defined in section 92 of the Climate Change Act 2008.

HAN means, for each Smart Metering System, the home area network created by the Communications Hub Function forming part of that Smart Metering System.

HAN Connected Auxiliary Load Control Switch means a device installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the HCALCS Technical Specification which was within its Installation Validity Period on the date on which the device was installed.

HAN Requirements means the requirements with respect to the HAN provided for in the Energy Licences and this Code.

HAN Variants means the variations of SMETS2+ Communications Hub that are necessary to enable communication via each HAN Interface (as defined in the CHTS).

Hash means the result of the application of a hash function, such function being a repeatable process to create a fixed size and condensed representation of a message using the SHA-256 algorithm as specified in the US Government's Federal Information Processing Standards document 180-4.

HCALCS means a HAN Connected Auxiliary Load Control Switch.

HCALCS Technical Specification (or **HCALCSTS)** means the part(s) of the document(s) set out in Schedule 9 identified as applying to 'HAN Connected Auxiliary Load Control Switches'.

ICA Certificate has the meaning given to that expression in the IKI Certificate Policy.

ICHIS means the Intimate Communications Hub Interface Specifications.

ID Allocation Procedure means the document of that name developed and maintained in accordance with Section B2.2 (ID Allocation Procedure).

IETF RFC 5280 has the meaning given to that expression in the GB Companion Specification.

IHD means a device provided (or to be provided) at a premises, which is either a SMETS1 IHD; or:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the IHD Technical Specification which was within its Installation Validity Period on the date on which the device was provided, and which a User acting in the role of Import Supplier or Gas Supplier has joined, or is seeking to join, to an Electricity Smart Meter or Gas Proxy Function (as applicable).

IHD Technical Specification (or **IHDTS)** means the part(s) of the document(s) set out in Schedule 9 identified as applying to 'IHDs'.

IKI Authority Revocation List (or IKI ARL) has the meaning given to that expression in the IKI Certificate Policy.

IKI Certificate has the meaning given to that expression in the IKI Certificate Policy.

IKI Certificate Policy means the SEC Subsidiary Document of that name set out in Appendix Q.

IKI Certificate Revocation List (or IKI CRL) has the meaning given to that expression in the IKI Certificate Policy.

IKI Certification Practice Statement (or IKI CPS) has the meaning given to that expression in Section L9.20 (the IKI Certification Practice Statement).

IKI File Signing Certificate means an IKI Certificate issued by the IKI File Signing Certification Authority.

IKI File Signing Certification Authority has the meaning given to that expression in the IKI Certificate Policy.

Import MPAN means an MPAN for a Metering Point relating to the import of electricity to a premises.

Import Supplier means, for a Smart Metering System or a Device and any period of or point in time:

(a) the Supplier Party Registered during that period of or at that point in time in respect of the Import MPAN relating to that Smart Metering System or Device; or

(b) where there is no related Import MPAN for that Smart Metering System or Device, the Supplier Party Registered during that period of or at that point in time in respect of the Export MPAN relating to that Smart Metering System or Device.

Incident means an actual or potential interruption to (or reduction in the quality or security of) the Services, as further described in the Incident Management Policy.

Incident Category has the meaning given to that expression in Section H9.1 (Incident Management Policy).

Incident Management means a framework of processes designed to identify, raise, allocate responsibility for, track and close Incidents.

Incident Management Log has the meaning given to that expression in Section H9.3 (Incident Management Log).

Incident Management Policy means the SEC Subsidiary Document of that name set out in Appendix AG.

Incident Parties has the meaning given to that expression in Section H9.1 (Incident Management Policy).

Independent Assurance Scheme has the meaning given to that expression in Part 2.1 of the SMKI Compliance Policy (DCC: Duty to Submit to an Independent Assurance Scheme).

Independent Privacy Auditor has the meaning given to that expression in Section I2.1 (Procurement of the Independent Privacy Auditor).

Independent SMKI Assurance Service Provider has the meaning given to that expression in Part 3.1 of the SMKI Compliance Policy (DCC: Duty to Procure Independent Assurance Services).

Independent S1SPKM Assurance Service Provider has the meaning given to that expression in the S1SPKM Compliance Policy (DCC: Duty to Procure Independent Assurance Services).

Independent Time Source has the meaning given to that expression in Section G2.46(b) (Network Time).

Information Classification Scheme means a methodology for:
(a) the appropriate classification of all Data that are processed or stored on a System by reference to the potential impact of those Data being Compromised; and
(b) determining the controls to be applied to the processing, storage, transfer and deletion of each such class of those Data.

Information Commissioner means the Commissioner as defined in the Data Protection Legislation.

Infrastructure Key Infrastructure (or IKI) means the public key infrastructure established by the DCC for the purpose, among other things, of authenticating communications between:
(a) Parties and the OCA and DCA; and
(b) Parties and the DCC, where those Parties are required in accordance with this Code to provide files to the DCC that have been Digitally Signed using the Private Key associated with the Public Key that is contained within a File Signing Certificate.

Insolvency Type Event

means, in respect of a Party, that that Party:
(a) is unable to pay its debts as they fall due, or is deemed to be unable to pay its debts within the meaning of section 123 of the Insolvency Act 1986 (but as if the reference in such section to "£750" was replaced with "£10,000");
(b) calls a meeting for the purpose of passing a resolution for its winding-up, or such a resolution is passed;
(c) presents, or has presented in respect of it, a petition for a winding-up order;
(d) has an application to appoint an administrator made in respect of it, or a notice of intention to appoint an administrator is filed in respect of it;
(e) has an administrator, administrative receiver, or receiver appointed over all or a substantial part of its business, undertaking, property or assets;
(f) takes any steps in connection with proposing a company voluntary arrangement or a company voluntary arrangement is passed in relation to it; or
(g) suffers or undergoes any procedure analogous to any of those specified above, including in respect of a Party who is a natural person or in any jurisdiction outside the UK in which a Party is incorporated.

Installation End Date

has the meaning given to that expression in Section A3.12(b) (The Installation Validity Period).

Installation Start Date

has the meaning given to that expression in Section A3.12(a) (The Installation Validity Period).

Installation Validity Period

has the meaning given to that expression in Section A3.11 (The Installation Validity Period).

Instruction

means, in respect of a SMETS1 Device, a communication generated by the SMETS1 Service Provider or a DCO following receipt of a SMETS1 Service Request by the DCC that is designed to instruct the Device to execute the functionality necessary to permit the DCC to take the necessary Equivalent Steps.

Intellectual Property Rights

means patents, trade marks, trade names, service marks, rights in designs, copyright (including rights in computer software), logos, rights in internet domain names, and moral rights, database rights, rights in know-how, and other intellectual property rights (in each case, whether registered or unregistered or subject to an application for registration), and includes any and all rights or forms of protection having equivalent or similar effect anywhere in the world.

Interim Election

has the meaning given to that expression in Section C4.2 (Election of Elected Members).

Interoperability and Innovation Events

means the Testing Service described in Section H14.49 (Interoperability and Innovation Events).

Interoperability Checker Service

has the meaning given to that expression in Section H16.6 (Obligations of the DCC).

Interoperability Data

has the meaning given to that expression in Section H16.2 (The Responsibility of Supplier Parties).

Intimate Communications Hub Interface Specifications

means the specifications described as such and originally developed by the DCC pursuant to schedule 3 of the DCC Licence, as amended from time to time in accordance with Section H12.9 (Amendments to the ICHIS).

Inventory Enrolment and Decommissioning Procedures

means the SEC Subsidiary Document of that name set out as Appendix AC.

Invoice

has the meaning given to that expression in Section J1.2 (Invoicing of Charges).

Issue

in relation to:
(a) a Device Certificate or DCA Certificate, has the meaning given to that expression in Annex A of the Device Certificate Policy;
(b) an Organisation Certificate or OCA Certificate, has the meaning given to that expression in Annex A of the Organisation Certificate Policy;
(c) an IKI Certificate or ICA Certificate has the meaning given to that expression in the IKI Certificate Policy;
(d) a DCCKI Certificate (including any DCCKICA Certificate) has the meaning given to that expression in the DCCKI Certificate Policy.

Issuing DCA

has the meaning given to that expression in Annex A of the Device Certificate Policy.

Issuing DCA Certificate

has the meaning given to that expression in Annex A of the Device Certificate Policy.

Issuing ICA has the meaning given to that expression in the IKI Certificate Policy.

Issuing ICA Certificate has the meaning given to that expression in the IKI Certificate Policy.

Issuing OCA has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Issuing OCA Certificate has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Key Pair means a Private Key and its mathematically related Public Key, where the Public Key may be used to Check Cryptographic Protection in relation to a communication that has been Digitally Signed using the Private Key.

Known Remote Party has the meaning given to that expression in the GB Companion Specification.

Large Supplier Party means a Supplier Party that is not a Small Supplier Party.

Laws and Directives means any law (including the common law), statute, statutory instrument, regulation, instruction, direction, rule, condition or requirement (in each case) of any Competent Authority (or of any authorisation, licence, consent, permit or approval of any Competent Authority).

Lead Code means the Energy Code which the Cross Code Steering Group has designated as being the Lead Code for the purpose of progressing a variation that is likely to have an impact on any other Energy Codes.

Lead Code Modification means the variation to the Lead Code that gives rise to an associated Consequential Change.

Lead Supplier means, in respect of a Communications Hub:
(a) where there is only one Responsible Supplier for the Communications Hub Function which forms part of that Communications Hub, that Responsible Supplier; or
(b) where there is more than one Responsible Supplier for the

Communications Hub Function which forms part of that Communications Hub, the Import Supplier for the Communications Hub Function.

Letter of Credit means an unconditional irrevocable standby letter of credit in substantially the form set out in Schedule 6 from a bank with the Required Bank Rating which letter of credit has not been breached or disclaimed by the provider.

Liability includes any loss, liability, damages, costs (including legal costs), expenses and claims.

Local Command Services means the sending of Commands to a User via the DCC User Interface where the User has opted in the Service Request for the Command to be sent in that way.

Maintenance includes repair, replacement, upgrade or modification.

Maintenance End Date has the meaning given to that expression in Section A3.20(b) (The Maintenance Validity Period).

Maintenance Start Date has the meaning given to that expression in Section A3.20(a) (The Maintenance Validity Period).

Maintenance Validity Period has the meaning given to that expression in Section A3.19 (The Maintenance Validity Period) or (in the case of the DUIS) Section A3.36 (DCC User Interface Specification and Message Mapping Catalogue).

Major Incident means an Incident that is categorised as a major incident in accordance with the Service Management Standards, as further described in the Incident Management Policy.

Major Security Incident means, in relation to any System, any event which results, or was capable of resulting, in that System being Compromised to a material extent.

Malicious Software means any software program or code intended to destroy, interfere with, corrupt, or cause undesired effects on Data, software, files, programs or codes (whether or not its operation is immediate or delayed, and whether it is introduced wilfully, negligently or without knowledge of its existence).

Manufacturer means, in respect of any Device Model, the person:
(a) that manufactures some or all of the Devices of that Device Model; or
(b) on whose behalf some or all of those Devices are manufactured for onward sale or other provision.

Manufacturer Image has the meaning given to that expression in the GB Companion Specification.

MAP means Meter Asset Provider.

MAP/Manufacturer Reports means the reports provided by the DCC under Section H17 (MAP/Manufacturer Reports).

Market Participant Identifier has the meaning given to that expression in the Retail Energy Code.

MA-S Registry Entry means a publicly registered 36-bit identifier of that name issued by the Institute of Electrical and Electronics Engineers Standards Association.

Material Risk means, in respect of any Maintenance of the DCC Systems, that such Maintenance poses either: (a) a material risk of disruption; or (b) a risk of material disruption.

Maximum Credit Value has the meaning given to that expression in Section J3.8 (Party's Maximum Credit Value).

Mesh Communications Hub has the meaning given to that expression in the CH Support Materials.

Meter Asset Provider means, in respect of a Smart Meter, the entity that makes the Smart Meter available for use by Supplier Parties (and which is usually the owner of the Smart Meter).

Message has the meaning given to that expression in the GB Companion Specification.

Message Authentication Code has the meaning given to that expression in the GB Companion Specification (or, where used in the context of a communication not specified by the GB Companion Specification, the meaning associated with the relevant cryptographic algorithm used to generate it).

Message Code has the meaning given to that expression in the SMETS1 Supporting Requirements.

Message Mapping Catalogue means the SEC Subsidiary Document of that name set out in Appendix AF.

Meter Asset Manager has the meaning given to that expression in the UNC.

Meter Operator has the meaning given to the expression "Meter Operator Agent" in the BSC.

Metering Point has the meaning given to that expression in the REC.

Minimum Monthly Charge means, in respect of each Regulatory Year, £25.00, multiplied by the Consumer Prices Index for the October preceding the start of that Regulatory Year, divided by the Consumer Prices Index for October 2014. The relevant amount will be rounded to the nearest pound.

Minimum Service Level means, in respect of each Performance Measure, the number or percentage intended to represent the minimum level of performance for the activity which is the subject of the Performance Measure, as set out in:
(a) Section D11.3 (Code Performance Measures);
(b) Section H13.1 (Code Performance Measures);
(c) the Reported List of Service Provider Performance Measures; or
(d) Section L8.6 (Code Performance Measures).

Modification Proposal is the term applied to a Draft Proposal once the Panel has agreed it should be progressed further in accordance with Section D3.11 (Initial Consideration by the Panel).

Modification Register has the meaning given to that expression in Section D1.8 (Modification Register).

Modification Report has the meaning given to that expression in Section D7.1 (Modification Report).

Modification Report Consultation has the meaning given to that expression in Section D7.8 (Modification Report Consultation).

Monthly Service Metric has the meaning set out in the DCC User Interface Services Schedule.

Monthly Service Threshold has the meaning set out in the DCC User Interface Services Schedule.

MPAN means, in respect of a Smart Metering System (or Electricity Meter), the unique identifier (or each of the unique identifiers) allocated by the relevant Electricity Network Party to the Metering Point(s) at which the import or export of electricity is recorded by that Smart Metering System (or Electricity Meter).

MPRN means, in respect of a Smart Metering System (or Gas Meter), the Supply Meter Point Reference Number allocated by the relevant Gas Network Party to the Supply Meter Point at which the supply of gas is recorded by that Smart Metering System (or Gas Meter).

NCSC means the UK Government’s National Cyber Security Centre (or any successor organisation).

Network Enhancement Plan means a plan by the DCC to undertake works to improve SMETS2+ SM WAN connectivity for a cohort of Communications Hubs installed within a particular geographic area (in either the south Region or the central Region), where the DCC has obtained reasonable evidence to justify that the works are required in order to improve SM WAN connectivity.

Network Evolution Transition and Migration Approach Document (NETMAD) means the SEC Subsidiary Document set out in Appendix [TBC].

Network Party means a Party that is either an Electricity Network Party or a Gas Network Party.

Network Time has the meaning given to that expression in Section G2.45(a) (Network Time).

Never means a date-time used to denote the timing of an action that must never happen. For Service Requests, in accordance with DUIS, this date-time shall be 00:00:00 on 31st December 3000.

New Party means a Party that is a Party pursuant to an Accession Agreement.

Non-Critical Service Request means a Service Request which is not identified as critical in the DCC User Interface Services Schedule (or, in the case of Elective Communication Services, the relevant Bilateral Agreement).

Non-Critical Service Response means a Service Response in respect of a Non-Critical Service Request.

Non-Default Interest Rate means, for any day, the base lending rate of the Bank of England at 13.00 hours on that day.

Non-Device Service Request means a Service Request in respect of a Service identified as a non-device service in the DCC User Interface Services Schedule (or, in the case of Elective Communication Services, the relevant Bilateral Agreement).

Non-Domestic Premises means premises other than Domestic Premises.

Non-EPCL Device Model means a Device Model that appears on the Central Products List, but that does not appear within at least one entry on the SMETS1 Eligible Product Combinations List.

OCA Certificate has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

On-Demand Services has the meaning given to that expression in Section H3.11 (Categories of Services).

OPR Exceptional Event means Force Majeure for which the DCC is the Affected Party and which occurs in relation to the matters which are subject to OPR Reporting.

OPR Reporting means reporting in respect of the operational performance regime under schedule 4 of the DCC Licence (the Operational Performance Regime).

Organisation Authority Revocation List (or Organisation ARL) has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Organisation Certificate has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Organisation Certificate Policy means the SEC Subsidiary Document of that name set out in Appendix B.

Organisation Certificate Revocation List (or Organisation CRL) has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Organisation Certification Authority (or OCA) has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Organisation Certification Practice Statement (or Organisation CPS) has the meaning given to that expression in Section L9.14 (the Organisation Certification Practice Statement).

Original Party means a Party that is a Party pursuant to the Framework Agreement.

OTA Header has the meaning given to that expression in the GB Companion Specification.

Other Enabling Services means the Services other than the Enrolment Services, the Communications Hub Services and the Communication Services.

Other SEC Party means a Party that is not the DCC, is not a Network Party, and is not a Supplier Party.

Other User means, for a Smart Metering System or a Device and any period of or point in time, a User that is not acting in the User Role of Import Supplier, Export Supplier, Gas Supplier, Electricity Distributor, Gas Transporter or Registered Supplier Agent (regardless of whether in fact that User is a Responsible Supplier or the Electricity Distributor or the Gas Transporter or the Registered Supplier Agent during that period of or at that point in time).

Panel means the body established as such in accordance with Section C2.1 (Establishment of the Panel).

Panel Chair has the meaning given to that expression in Section C3.1 (Composition of the Panel).

Panel Member has the meaning given to that expression in Section C3.1 (Composition of the Panel).

Panel Objectives has the meaning given to that expression in Section C2.2 (Panel Objectives).

Parent Company Guarantee means a guarantee in such form as the DCC may reasonably approve from an Affiliate of the User in question which guarantee has not been breached or disclaimed by the guarantor and has at least one month left until it expires. Where the guarantor is incorporated outside of the United Kingdom, the guarantee will only be validly given where supported by a legal opinion regarding capacity and enforceability in a form reasonably satisfactory to the DCC.

Parse and Correlate Software has the meaning given to that expression in Section H11.1 (Provision of Parse and Correlate Software).

Parse and Correlate Applicability Matrix has the meaning given to that expression in Section A3.39 (The Parse and Correlate Applicability Matrix).

Party means, from time to time, a person that has agreed to be bound by this Code (either pursuant to the Framework Agreement or an Accession Agreement), and (without prejudice to Section M8.14 (Consequences of Ceasing to be a Party)) that has not at that time ceased to be so bound in accordance with Section M8 (but excluding SECCo).

Party Category

means, as the context requires, one of the following categories:
(a) the Large Supplier Parties collectively;
(b) the Small Supplier Parties collectively;
(c) the Electricity Network Parties collectively;
(d) the Gas Network Parties collectively; and
(e) the Other SEC Parties collectively.

Party Data

has the meaning given to that expression in Section M5.10 (Party Data).

Party Details

means, in respect of each Party, the information relating to that Party and corresponding to the heads of information set out in the Application Form from time to time.

Party Signifier

means an identification number allocated to a Party (or SECCo) by the Code Administrator pursuant to Section B1.17 (Party Signifiers), which uniquely identifies that Party (or SECCo) under the Code.

Path 1 Modification

has the same meaning as “Authority-initiated Modification”.

Path 2 Modification

has the same meaning as “Authority Determined Modification.”

Path 3 Modification

has the same meaning as “Self-Governance Modification.”

Performance Indicators

means an indicator of service performance from time to time determined by the Panel under Section H13.5B (Performance Indicators), on which the DCC is to report but which does not constitute a Performance Measure.

Performance Measurement Methodology

means a documented methodology for establishing the performance against each Performance Measure, which may include sampling and/or test communications.

Performance Measurement Period

means, in respect of each Performance Measure, the applicable period over which the Service Level for that Performance Measure is to be measured, as set out in:
(a) Section D11.3 (Code Performance Measures);
(b) Section H13.1 (Code Performance Measures);
(c) the Reported List of Service Provider Performance Measures; or
(d) Section L8.6 (Code Performance Measures).

Performance Measures

means the Code Performance Measures and such Service Provider Performance Measures as are specified in the Reported List of Service Provider Performance Measures.

Permitted Communication Service

means, in respect of a User and a Smart Metering System (or a Device forming, or to form, part of that Smart Metering System):
(a) a service that results in the sending of a Command to a Device (other than the Communications Hub Function) for which the User is the Responsible Supplier (except where, were the Command to be sent as a Core Communication Service, it would be a Critical Command requiring another User's Digital Signature);
(b) a service that only results in the sending of a Command to a Device which is the same as a Command which results from a Service listed in the DCC User Interface Services Schedule for which that User is an Eligible User; or
(c) a service which the Panel has (on the application of the User) approved as a permitted communication service.

Personal Data

has the meaning given to that expression in the Data Protection Legislation.

Personnel Authentication Certificate

has the meaning given to that expression in Annex A of the DCCKI Certificate Policy.

Personnel Authentication Certificate Application

has the meaning given to that expression in Annex A of the DCCKI Certificate Policy.

Physical Device Type

means, in respect of a device, its type which may be only one of: a Communications Hub; a SMETS1 ESME; a Single Element Electricity Metering Equipment (as defined in the ESMETS); a Twin Element Electricity Metering Equipment (as defined in the ESMETS); a Polyphase Electricity Metering Equipment (as defined in the ESMETS), a Gas Smart Meter; a Pre-Payment Meter Interface Device; a HAN Connected Auxiliary Load Control Switch; an IHD; a Standalone Auxiliary Proportional Controller or a Type 2 Device (Other).

Planned Maintenance

means, in respect of a month, Maintenance of the DCC Systems planned prior to the start of that month which will disrupt or poses a Material Risk of disruption to the provision of the services described in a) and b) below (and, where it will disrupt, or poses a Material Risk of disruption to, the provision of these services in relation to Devices associated with Communications Hubs, at least 100,000 Communications Hubs are affected). Planned Maintenance shall be categorised as:
(a) High Impact Planned Maintenance where one or more of the following

is disrupted:

i. end-to-end communications between Users and Communications Hubs in either direction;
ii. install & commission activities; or
iii. previously scheduled SMETS1 migrations.

(b) Low Impact Planned Maintenance which will disrupt or poses a Material Risk of disruption to the provision of services, excluding those services set out in High Impact Planned Maintenance, and will not require changes to be made by Users except in cases where Service Improvements are being made to the SSI.

Point-to-Point Alt HAN Equipment has the meaning given to that expression in accordance with standard condition 55 of the Electricity Supply Licence (Smart Metering – The Alt HAN Arrangements) and standard condition 49 of the Gas Supply Licence (Smart Metering – The Alt HAN Arrangements).

Post Commissioning Information has the meaning given to that expression in the Inventory Enrolment and Decommissioning Procedures.

Power Outage & Restoration Alerts Delivery Management Document means the document established under Section H3.14B (Target Response Times) which contains the Target Response Times (and the methodology for reviewing and determining these times) for the Alerts which are subject to Section H3.14(i) or H3.14(j).

PPM Installation End Date has the meaning given to that expression in Section A3.14.

PPMID means a Prepayment Meter Interface Device.

PPMID Technical Specification (or **PPMIDTS)** means the part(s) of the document(s) set out in Schedule 9 identified as applying to 'Pre-Payment Meter Interface Devices'.

Pre-Command means a communication (other than a Service Response, DCC Alert or Device Alert) to be sent from the DCC to a User or to the CoS Party that includes a GBCS Payload and which has been Digitally Signed by the DCC in accordance with the DCC User Interface Specification.

Preliminary Assessment has the meaning given to that expression in Section H7.4 (Preliminary Assessment of Elective Communication Services).

Pre-Payment Consumer means an Energy Consumer at a premises for which the supply of energy is measured by a Smart Meter that is operating as a Pre-Payment Meter.

Pre-Payment Meter means an Energy Meter operating in a mode which requires a customer to pay charges in advance.

Pre-Payment Meter Interface Device means either a SMETS1 PPMID; or a device installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the PPMID Technical Specification which was within its Installation Validity Period on the date on which the device was installed.

Principal User Security Obligations has the meaning given to that expression in Section G1.7 (Obligations on Users).

Principal Version in relation to:
(a) a Technical Specification, has the meaning given to that expression in Section A3.5(a) (Versions of the Technical Specifications); and
(b) the GBCS or CPA Security Characteristics, has the equivalent meaning, in accordance with and subject to the provisions of Section A3.27 (GB Companion Specification and CPA Security Characteristics).

Privacy Assessment means a Full Privacy Assessment, Random Sample Privacy Assessment or User Privacy Self-Assessment.

Privacy Assessment Report has the meaning given to that expression in Section I2.19 (The Privacy Assessment Report).

Privacy Assessment Response has the meaning given to that expression in Section I2.21 (The Privacy Assessment Response).

Privacy Controls Framework means the document of that name developed and maintained by the Panel in accordance with Section I2.15 (The Privacy Controls Framework).

Privacy Self-Assessment has the meaning given to that expression in Section I2.14 (Categories of Assessment).

Privacy Self-Assessment Report has the meaning given to that expression in Section I2.26 (The User Privacy Self-Assessment Report).

Private Key means the private part of an asymmetric Key Pair used for the purposes of public key encryption techniques

Privileged Person means a member of DCC Personnel who is authorised to carry out activities which involve access to resources, or Data held, on the DCC Total System and which are capable of being a means by which the DCC Total System, any User Systems, any RDP Systems or any Device are Compromised to a material extent.

Problem means the underlying cause of one or more Incidents, as further described in the Incident Management Policy.

Processing has the meaning given to that expression in the Data Protection Legislation (and “**Process**” and "**Processes**" shall be interpreted accordingly).

Product Recall or Technology Refresh has the meaning given to that expression in Section F9.6 (Categories of Responsibility).

Production Proving means the activities which the DCC is permitted to undertake by Section P (Production Proving).

Production Proving Devices has the meaning given to that expression in Section P1.4 (Production Proving Devices).

Production Proving Function means the DCC when undertaking Production Proving, and specifically those activities expressly stated in this Code to be undertaken by the Production Proving Function.

Production Proving MPXNs has the meaning given to that expression in Section P1.8 (Production Proving MPXNs).

Production Proving Registration Data has the meaning given to that expression in Section P1.11 (Production Proving Registration Data).

Production Proving Systems means the Systems used by the DCC in its capacity as the Production Proving Function.

Programme Assurance Policy has the meaning given to that expression in Section C2.3 (Panel Duties).

Proposed Solution means the variation under a Modification Proposal that is proposed and can be subsequently changed by the Proposer in accordance with Section D6.15 (Alternative Solutions).

Proposer has the meaning given to that expression in Section D1.3 (Persons Entitled to Submit Draft Proposals).

Prototype Communications Hub means a device that as closely achieves compliance with the CHTS as is reasonably practicable from time to time, which is provided (or to be provided) for the purpose of testing as described in Section F10 (Test Communications Hubs).

Public Key means the public part of an asymmetric Key Pair used for the purposes of public key encryption techniques.

Random Sample Privacy Assessment has the meaning given to that expression in Section I2.13 (Categories of Assessment).

RDP means Registration Data Provider.

RDP Entry Process Tests has the meaning given to that expression in Section E4.2 (RDP Entry Process Tests).

RDP ID means, in respect of an RDP acting in its capacity as such (including a Network Party where it is deemed to have nominated itself for that role), one of the unique identification numbers accepted by the DCC in respect of that RDP under Section E2.16 (Security Obligations and RDP IDs).

RDP Signifier

means an identification number allocated to an RDP by the Code Administrator pursuant to Section B1.19 (RDP Signifiers), which uniquely identifies that RDP under the Code.

RDP Systems

means any Systems:

(a) which are operated by or on behalf of an Electricity Distributor or Gas Transporter responsible for providing (or procuring the provision of) Registration Data in respect of a particular MPAN or MPRN; and

(b) which are used in whole or in part for generating Data for communication to the OCA, ICA or DCCKICA, or receiving Data from the OCA, ICA or DCCKICA (including any Systems which store or use Secret Key Material for such purposes),

and any other Systems from which the Systems described in paragraphs (a) and (b) are not Separated.

REC

means the Retail Energy Code maintained pursuant to Condition 11B of the Electricity Supply Licences and Condition 11 of the Gas Supply Licences.

REC Code Manager

has the meaning given to the expression "Code Manager" in the REC.

Recoverable Costs

has the meaning given to that expression in Section C8.2 (SEC Costs and Expenses).

Recovery Certificate

has the meaning given to that expression in Section L10.30(d)(ii) (Definitions).

Recovery Costs

has the meaning given to that expression in Section L10.17 (Recovery Costs).

Recovery Event

has the meaning given to that expression in Section L10.14 (Recovery Events).

Recovery Key Pair

has the meaning given to that expression in Section L10.30(d) (Definitions).

Recovery Private Key

has the meaning given to that expression in Section L10.30(d)(i) (Definitions).

Refinement Process has the meaning given to that expression in Section D6 (Refinement Process).

Region means each of the regions of Great Britain that are subject to different DCC Service Provider Contracts, and the region into which a premises (or future potential premises) falls shall be:

(a) identified insofar as reasonably practicable in a document published by the DCC (or the Panel on behalf of the DCC) from time to time; or

(b) where a premises (or future potential premises) is not so identified, confirmed by the DCC on application of any Party or in response to the resolution of an Incident regarding the fact that a premises (or future potential premises) is not so identified,

and once a premises has been identified by the DCC as being in a particular region, the DCC shall not identify that premises as being in a different region (unless agreed by the Supplier Party or Supplier Parties Registered for the MPAN and/or MPRN at the premises and the Network Party or Network Parties for the network(s) to which the premises is, or is intended to be, connected).

Registered means the Registered Supplier, as defined in the REC (and "**Registration**" shall be interpreted accordingly).

Registered Supplier Agent means, for a Smart Metering System or a Device and any period of or point in time, the User that is:

(a) in the case of electricity, appointed as the Meter Operator in respect of the MPAN relating to that Smart Metering System or Device; or

(b) in the case of gas, appointed as the Meter Asset Manager in respect of the MPRN relating to that Smart Metering System or Device,

(in either case) during that period of or at that point in time.

Registration Authority means the DCC, acting in its capacity as such for the purposes of (and in accordance with the meaning given to that expression in any) the Certificate Policies.

Registration Data has the meaning given to that expression in Section E1 (Reliance on Registration Data).

Registration Data Interface means the communications interface designed to allow the communications referred to in Section E (Registration Data) to be sent between the DCC and the Registration Data Providers.

Registration Data Interface Code of Connection

means the SEC Subsidiary Document of that name set out in Appendix Y.

Registration Data Interface Documents

means the Registration Data Interface Code of Connection and Registration Data Interface Specification.

Registration Data Interface Specification

means the SEC Subsidiary Document of that name set out in Appendix X.

Registration Data Provider

means, in respect of each Network Party, the person nominated as such in writing to the DCC from time to time by that Network Party, on the basis that more than one Party may specify the same Registration Data Provider, and that the Network Party shall be deemed to have so nominated itself in the absence of any other nomination.

Regulatory Year

means a period of twelve months beginning at the start of 1 April in any calendar year and ending at the end of 31 March in the next following calendar year.

Related Person

means, in relation to an individual, that individual’s spouse, civil partner, parent, grandparent, sibling, child, grandchild or other immediate family member; any partner with whom that individual is in partnership; that individual’s employer; any Affiliate of such employer; any person by whom that individual was employed in the previous 12 months; and any company (or Affiliate of a company) in respect of which that individual (individually or collectively with any member of his immediate family) controls more than 20% of the voting rights.

Release Management

means the process adopted for planning, scheduling and controlling the build, test and deployment of releases of IT updates, procedures and processes.

Relevant Device

has the meaning given to that expression in Section L10.30(a) (Definitions).

Relevant Instruments

means:
(a) the Electricity Act and the Gas Act;
(b) the Data Protection Legislation;
(c) the Energy Licences; and
(d) the Energy Codes.

Relevant Private Key has the meaning given to that expression in Section L10.30(c) (Definitions).

Relevant Subscriber has the meaning given to that expression in Section L10.30(b).

Relevant Technical Specification Means:

a. in relation to an Electricity Smart Meter, Gas Smart Meter, HAN Connected Auxiliary Load Control Switch, IHD, Pre-Payment Meter Interface Device, or Standalone Auxiliary Proportional Controller, the ESMETS, GSMETS, HCALCSTS, IHDTS, PPMIDTS or SAPCTS respectively;
b. in relation to a Communications Hub Function, the CHTS (but excluding those provisions that are described as applying only to "Gas Proxy Functions"); or
c. in relation to a Gas Proxy Function, the CHTS (but only those provisions that are described as applying to "Gas Proxy Functions").

Relying Party means a person who, pursuant to the Code, receives and relies upon a Certificate.

Relying Party Obligations means the provisions in respect of Relying Parties set out at Section L12 of the Code (the Relying Party Obligations).

Remote Party has the meaning given to that expression in GBCS.

Remote Party Role has the meaning given to that expression, and comprises the values allowed for the ASN.1 type RemotePartyRole identified, in the GB Companion Specification, and additionally comprises the values set out in Table 1 in Annex A to Section L (Smart Metering Key Infrastructure and DCC Key Infrastructure).

Remote Party Role Code means the integer value for the Remote Party Role specified in the GB Companion Specification or Table 1 in Annex A to Section L (Smart Metering Key Infrastructure and DCC Key Infrastructure), as applicable.

Replacement Meter means an Energy Meter that replaces an Energy Meter previously installed at the same premises.

Replay

has the meaning given to that expression in the SMETS1 Supporting Requirements.

Report Phase

has the meaning given to that expression in Section D7.1 (Modification Report).

Reported List of Service Provider Performance Measures

means the document which:
(a) is initially provided to Parties, the Panel and the Authority by the Secretary of State, bears the title 'Reported List of Service Provider Performance Measures' and identifies itself as being produced for the purposes of Section H13 (Performance Standards and Reporting); and
(b) specifies a number of Service Provider Performance Measures together (in each case) with the applicable Service Level Requirement, Target Service Level, Minimum Service Level and Performance Measurement Period,
as it may be modified from time to time in accordance with Section H13.2 (Service Provider Performance Measures).

Required Bank Rating

means that a person has one or more long-term Recognised Credit Ratings of at least (based, where the person has more than one such rating, on the lower of the ratings):
(a) “A-” by Standard & Poor’s Financial Services LLC;
(b) “A3” by Moody’s Investors Services Inc; and/or
(c) “A-” by Fitch Ratings Limited; and/or
(d) “A(low)” by DBRS Ratings Limited.

Response

for SMETS2+ Devices, has the meaning given to that expression in the GB Companion Specification; and otherwise, it shall mean a Service Response or a Pre-Command as the context implies.

Responsible Supplier

means, in respect of a Smart Metering System (or any Device forming, or intended to form, part of a Smart Metering System) which relates to:
(a) an MPAN, the Import Supplier for that Smart Metering System; and/or
(b) an MPRN, the Gas Supplier for that Smart Metering System.

Restricted Communication Service

means, in respect of any User requesting an Elective Communication Service, a service which is not a Permitted Communication Service.

RF Noise Testing

means the Testing Service described in Section H14.46 (Radio Frequency Noise Testing).

Risk Treatment Plan has the meaning given to that expression in Section G7.19(e) (Duties and Powers of the Security Sub-Committee).

Root DCA has the meaning given to that expression in Annex A of the Device Certificate Policy.

Root DCA Certificate has the meaning given to that expression in Annex A of the Device Certificate Policy.

Root DCCKICA Certificate has the meaning given to that expression in the DCCKI Certificate Policy

Root ICA has the meaning given to that expression in the IKI Certificate Policy.

Root ICA Certificate has the meaning given to that expression in the IKI Certificate Policy.

Root OCA has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

Root OCA Certificate has the meaning given to that expression in Annex A of the Organisation Certificate Policy.

SAPC means a Standalone Auxiliary Proportional Controller.

SAPC Technical Specification (or SAPCTS) means the part(s) of the document(s) set out in Schedule 9 identified as applying to 'Standalone Auxiliary Proportional Controllers'.

Scheduled Election has the meaning given to that expression in Section C4.2 (Election of the Elected Members).

Scheduled Services has the meaning given to that expression in Section H3.11 (Categories of Services).

SEC Arrangements has the meaning given to that expression in the DCC Licence.

SEC Materials has the meaning given to that expression in Section M5.1 (SEC Materials).

SEC Objectives means, in respect of the Charging Methodology only, the Charging Objectives and, in all other cases, the General SEC Objectives.

SEC Release means a package of one or more approved Modification Proposals which is implemented in accordance with the SEC Release Management Policy.

SEC Release Implementation Document means a document established under Section D10.12 (SEC Release Implementation Document) and which contains the information listed in Section D10.13.

SEC Release Management Policy means the document established under Section D10.7 (SEC Release Management Policy) and which contains the information listed in Section D10.8.

SEC Release Testing Approach Document means a document established under Section D10.18 (SEC Release Testing Approach Document) and which contains the information listed in Section D10.19 in relation to the testing to be undertaken by the DCC with regards to a SEC Release.

SEC Variation Testing Approach Documents means the SEC Subsidiary Documents set out in Appendix AJ, Appendix AK, Appendix AN, Appendix AQ and Appendix AR.

SECCo has the meaning given to that expression in Schedule 4.

Secret Key Material means any Private Key, Shared Secret, Symmetric Key, SMETS1 Symmetric Key or other functionally equivalent cryptographic material (and any associated input parameter) that is generated and maintained by a Party or RDP for the purposes of complying with its obligations under, or in relation to, this Code, but excluding:
(a) any such material (and associated input parameters) to the extent that it is maintained on Devices;
(b) any Digital Signature; and
(c) any output of a Cryptographic Hash Function operating on an input communication.

Secretariat has the meaning given to that expression in Section C7.6 (Secretariat).

Secretary of State has the meaning given to that expression in the Interpretation Act 1978.

Secure has the meaning given to that expression in Section G3.28(a) (SMETS1 Smart Metering Systems).

Security Check means the vetting of personnel, carried out to a level that is identified by that name, under and in accordance with the HMG National Security Vetting Procedures.

Security Controls Framework has the meaning given to that expression in Section G7.19(a) (Duties and Powers of the Security Sub-Committee).

Security Obligations and Assurance Arrangements means:
(a) in the case of the DCC Total System, those requirements set out in Sections G2, G4 to G7 and G9;
(b) in the case of User Systems, those requirements set out in Sections G3 to G8;
(c) in the case of Smart Metering Systems comprising SMETS2+ Devices, those requirements set out in:
(i) the Commercial Product Assurance Security Characteristics (as defined in the GB Companion Specification); and
(ii) the provisions of Sections G3 (System Security: Obligations on Users) to G8 (User Security Assurance) which are applicable to such Smart Metering Systems;
(d) in the case of SMETS1 Smart Metering Systems:
(i) those security requirements set out in (as applicable) the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1; and
(ii) those requirements set out in the provisions of Sections G3 to G8 which are applicable to such Smart Metering Systems; and
(e) in the case of RDP Systems, those requirements set out in Section E2.14 (Security Obligations).

Security Requirements means a document that:
(a) identifies the security controls that are considered appropriate to mitigate the security risks relating to the End-to-End Smart Metering System; and
(b) indicates those provisions having effect (or being proposed to have effect) in or under the Security Obligations and Assurance Arrangements or any Energy Licences which require that such security controls are established and maintained.

Security Risk Assessment means a document that identifies, analyses and evaluates the security risks which relate to the End-to-End Smart Metering System.

Security Sub-Committee means the Sub-Committee established pursuant to Section G7 (Security Sub-Committee).

Security Sub-Committee Guidance means guidance in respect of the security of any System, updated from time to time by the Security Sub-Committee.

Security Sub-Committee (Network) Members has the meaning given to that expression in Section G7.8 (Membership of the Security Sub-Committee).

Security Sub-Committee (Other User) Member has the meaning given to that expression in Section G7.10 (Membership of the Security Sub-Committee)

Security Sub-Committee (Shared Resource Provider Member) has the meaning given to that expression in Section G7.12 (Membership of the Security Sub-Committee)

Security Sub-Committee (Supplier) Members has the meaning given to that expression in Section G7.6 (Membership of the Security Sub-Committee).

Security Sub-Committee Chair has the meaning given to that expression in Section G7.5 (Membership of the Security Sub-Committee).

Security Sub-Committee Member has the meaning given to that expression in Section G7.3 (Membership of the Security Sub-Committee).

Self-Governance Modification has the meaning given to that expression in Section D2.7 (Self-Governance Modifications).

Self-Service Interface has the meaning given to that expression in Section H8.15 (Self-Service Interface).

Self-Service Interface Code of Connection

means the SEC Subsidiary Document of that name set out in Appendix AI.

Self-Service Interface Access Control Specification

means the SEC Subsidiary Document of that name set out in Appendix AH.

Separate

means, in relation to any System, software or firmware, to establish controls which are appropriately designed to ensure that no communication may take place between it and any other System, software or firmware (as the case may be) except to the extent that such communication is for a necessary purpose having regard to the intended operation of the System, software or firmware (and "**Separated**" and "**Separation**" are to be interpreted accordingly).

Sequenced Services

has the meaning given to that expression in Section H3.13 (Sequenced Services).

Service Desk

has the meaning given to that expression in Section H8.19 (Service Desk).

Service Level

means, in respect of each Performance Measure and each Performance Measurement Period:

(a) where that Performance Measure relates to an activity that is performed on a number of separate occasions:

(i) the number of occasions during the Performance Measurement Period on which that activity was performed in accordance with the relevant Service Level Requirement,

expressed as a percentage of, or a number in relation to:

(ii) the total number of occasions during the Performance Measurement Period on which that activity was performed;

(b) where that Performance Measure relates to an activity that is performed over a period of time:

(i) the period of time during the Performance Measurement Period on which that activity was performed, expressed as a percentage of:

(ii) the period of time during the Performance Measurement Period on which that activity would have been performed if it had been performed in accordance with the relevant Service Level Requirement,

provided that in each case the DCC may establish the Service Level for a Performance Measure in accordance with the Performance Measurement Methodology.

Service Level Requirements

means:

(a) in respect of each Code Performance Measure, the Target Response Time, Target Resolution Time or Target Availability Time (applicable in accordance with the table at Section D11.3 (Code Performance Measures), at Section H13.1 (Code Performance Measures) or at Section L8.6 (Code Performance Measures)); or

(b) in respect of each Service Provider Performance Measure, the standard to which the relevant DCC Service Provider is obliged by its DCC Service Provider Contract to perform the activity that is the subject of the Service Provider Performance Measure.

Service Management Service Request

means a query raised by a Party via the Self-Service Interface and/or the Service Desk.

Service Management Standards

means the Information Technology Infrastructure Library (ITIL®) standards for IT services management, as issued and updated by the Cabinet Office from time to time.

Service Provider Performance Measures

means the performance measures (however described and from time to time) for each DCC Service Provider under each DCC Service Provider Contract.

Service Reference Variant

means a reference assigned to a Service Request in accordance with the DCC User Interface Specification.

Service Request

means a request for one of the Services listed in the DCC User Interface Services Schedule (or, in the case of Elective Communication Services, provided for in the relevant Bilateral Agreement).

Service Request Processing Document

means the SEC Subsidiary Document of that name set out in Appendix AB.

Service Response

means, in respect of a Service Request sent by a User, one or more communications in response to that Service Request from the DCC to the User (not being a Pre-Command).

Services

means the services provided, or to be provided, by the DCC pursuant to Sections F5 (Communications Hub Forecasts and Orders) to F10 (Test Communications Hubs), Section H (DCC Services), Section L (Smart Metering Key Infrastructure and DCC Key Infrastructure) or Section N6 (Transition and Migration Approach Document), including pursuant to Bilateral Agreements.

Services FM means, in respect of any Services, the occurrence of any of the following:
(a) war, civil war, riot, civil commotion or armed conflict;
(B) terrorism (being the use or threat of action designed to influence the government or intimidate the public or for the purpose of advancing a political, religious or ideological cause and which involves serious violence against a person or serious damage to property, endangers a person's life, creates a serious risk to the public or is designed to seriously interfere with or disrupt an electronic system);
(c) nuclear, chemical or biological contamination;
(d) earthquakes, fire, storm damage or severe flooding (if in each case it affects a significant geographical area); and/or
(e) any blockade or embargo (if in each case it affects a significant geographical area).

Services IPR has the meaning given to that expression in Section M5.14 (Services IPR).

Shared Resource Provider has the meaning given to that expression in Section G10.2 (Meaning of Shared Resources).

Shared Resource User has the meaning given to that expression in Section G10.7 (Additional Obligations following User Security Assessments).

Shared Resources has the meaning given to that expression in Section G10.1 (Meaning of Shared Resources).

Shared Secret means a parameter that is (or may be) derived from a Private Key and a Public Key which are not from the same Key Pair in accordance with the GB Companion Specification.

Shared Solution Alt HAN Equipment has the meaning given to that expression in accordance with standard condition 55 of the Electricity Supply Licence (Smart Metering – The Alt HAN Arrangements) and standard condition 49 of the Gas Supply Licence (Smart Metering – The Alt HAN Arrangements).

Signed Pre-Command means a communication containing the Digitally Signed GBCS Payload of a Pre-Command that has been Digitally Signed by a User or the CoS Party.

Significant Code Review

means a review of one or more matters by the Authority which the Authority considers is:
(a) related to this Code (whether on its own or together with other Energy Codes); and
(b) likely to be of significance in relation to the Authority's principal objective and/or general duties (as set out in section 3A of the Electricity Act and section 4AA of the Gas Act), and statutory functions,
and concerning which the Authority has issued a notice that the review will constitute a significant code review.

Significant Code Review Phase

means, in respect of each Significant Code Review, the period from the date on which the Authority issues the notice stating that the matter is to constitute a Significant Code Review (including where the Authority issues a direction under Section D5.7 (Significant Code Review: Backstop Direction) or proposes an Authority-Led Variation by issuing a direction under Section D9A.2 (Authority Power to Develop a Proposed Variation)), and ending on the earlier of:
(a) the date on which the Authority, or DCC at the direction of the Authority, submits a Draft Proposal in respect of any variations arising out of a Significant Code Review;
(b) where the Authority has proposed an Authority-Led Variation, the date on which the Authority makes a decision in accordance with Section D9A.11 (Authority Decision);
(c) the date on which the Authority issues a conclusion that no modification is required to this Code as a result of the Significant Code Review; or
(d) the date 28 days after the date on which the Authority issues its conclusion document in respect of the Significant Code Review.

SIMCH Aerial

means an aerial and any other equipment required to enable a Special Installation Mesh Communications Hub to connect to the SMETS2+ SM WAN.

SM WAN

means the SMETS1 SM WAN or the SMETS2+ SM WAN.

SM WAN Coverage Database

means the information made available via the Self-Service Interface pursuant to Section H8.16(f) (and which is also available via the CH Ordering System).

Small Supplier Party

means a Supplier Party which, at the time at which it is necessary to assess the status of the Party, supplies electricity and/or gas to fewer than 250,000 (two hundred and fifty thousand) Domestic Premises.

Smart Card Token has the meaning given to that expression in Annex A of the DCCKI Certificate Policy.

Smart Meter means either an Electricity Smart Meter or a Gas Smart Meter (as the context requires).

Smart Meter Device Assurance Sub-Committee means the Sub-Committee established under Section F12 (Smart Meter Device Assurance Sub-Committee).

Smart Metering Equipment Technical Specifications (SMETS) shall be interpreted in accordance with the provisions of Section A2.12.

Smart Metering Inventory means an electronic database of Devices which records (as a minimum) the following information in respect of each Device:
(a) its Device Type;
(b) its Device ID;
(c) its Device Model (provided that no firmware version is needed for Type 2 Devices);
(d) for Devices other than Type 2 Devices, its SMI Status, and the date from which that status has applied;
(e) for Devices other than Type 2 Devices, its SMI Status history;
(f) where it is a Smart Meter which has been installed, the related MPAN or MPRN and the Communications Hub Function with which that Smart Meter is associated; and
(g) where it is a Device (other than a Smart Meter or a Communications Hub Function), the Smart Meter or Gas Proxy Function with which that Device is associated.

Smart Metering Key Infrastructure (or SMKI) means the public key infrastructure established by DCC for the purpose, among other things, of providing secure communications between Devices and Users.

Smart Metering System means either:
(a) an Electricity Smart Meter, together with the Communications Hub Function with which it is Associated, together with any SAPC or Additional Electricity Smart Meter joined to that Communications Hub Function, together with the Type 1 Devices (if any) that may from time to time be Associated with that Electricity Smart Meter; or
(b) a Gas Smart Meter together with the Communications Hub Function with which it is Associated and an Associated Gas Proxy Function, together

with the Type 1 Devices (if any) that may from time to time be Associated with that Gas Proxy Function.

Smart Mode has the meaning given to that expression at Section H16.15 (Definition).

SMDA Sub-Committee means the Smart Meter Device Assurance Sub-Committee.

SMETS1 means each composite document set out in Schedule 9 which includes within it an ESMETS, a GSMETS and an IHDTS with a Principal Version number of 1.

SMETS1 Alert has the meaning given to that expression in the DCC User Interface Specification.

SMETS1 CH means a physical device comprising a SMETS1 CHF and a SMETS1 GPF.

SMETS1 CHF means that part of a SMETS1 ESMS or SMETS1 GSMS which incorporates the wide area network interface and controls which Devices can communicate via the associated home area network interface.

SMETS1 Critical Service Request means a Critical Service Request which is targeted at a SMETS1 Device and is a SMETS1 Service Request.

SMETS1 Cryptographic Key Management Policy means any SEC Subsidiary Document of that name set out in Appendix AT, which is originally to be developed pursuant to Section L14.7 (The SMETS1 Cryptographic Key Management Policy: Document Development) and Section L14.8 (Document Development: Process).

SMETS1 CSP System has the meaning given to that expression at Section G1.11 (The SMETS1 CSP System).

SMETS1 Device means one of the following: (a) a SMETS1 ESME; (b) a SMETS1 GSME; (c) a SMETS1 CHF; (d) a SMETS1 GPF; (e) a SMETS1 PPMID; (f) a SMETS1 IHD; and (g) any other device operating on a home area network created by a SMETS1 CHF.

SMETS1 Device Model means the Device Model of a Device which complies with the requirements of SMETS1 (or which, in combination with other Devices, complies with the requirements of SMETS1).

SMETS1 Eligible Product Combinations has the meaning given to that expression in Section F2.10A (SMETS1 Lists).

SMETS1 ESME means that part of a SMETS1 ESMS that is not a SMETS1 CH.

SMETS1 ESMS has the meaning given to the expression 'ESMS' in SMETS1.

SMETS1 Future Dated Critical Service Request means a SMETS1 Critical Service Request which contains an execution date-time which is in the future according to the DCC's time.

SMETS1 GPF means that part of a SMETS1 GSMS that is not a SMETS1 CHF and is powered by mains electricity. For the avoidance of doubt, a SMETS1 GPF excludes any SMETS1 GSME.

SMETS1 GSME means that part of a SMETS1 GSMS that is not a SMETS1 CH.

SMETS1 GSMS has the meaning given to the expression 'GSMS' in SMETS1.

SMETS1 IHD has the meaning given to the expression 'IHD' in SMETS1.

SMETS1 Installation means a SMETS1 CHF installed in respect of an Energy Consumer's premises, the SMETS1 GPF which is part of the same SMETS1 CH, the SMETS1 ESME with which the SMETS1 CHF can communicate, and the set of other Devices (if any) which are authorised to communicate over the HAN to which the CHF controls access. The set of other Devices within a SMETS1 Installation shall include at most one SMETS1 GSME, at most one SMETS1 PPMID, at most one SMETS1 IHD and at most one SMETS1 CAD.

SMETS1 Pending Product Combinations Tests has the meaning given to that expression in Section H14.36A (SMETS1 Pending Product Combinations Tests).

SMETS1 Pending Product Combinations has the meaning given to that expression in Section F2.10A (SMETS1 Lists).

SMETS1 PPMID means a SMETS1 IHD that is capable of upgrading its Firmware in response to an Instruction sent over the SMETS1 SM WAN.

SMETS1 Response has the meaning given to that expression in the DCC User Interface Specification.

SMETS1 Service Provider means the DCC when carrying out the role and activities ascribed to a SMETS1 Service Provider in this Code; and where the DCC relies on the services of more than one DCC Service Provider for the purposes of carrying out that role and those activities, it shall be treated as being a separate SMETS1 Service Provider to the extent of its reliance on the services of each such DCC Service Provider.

SMETS1 Service Provider PKI (or S1SPKI) means any public key infrastructure established (or to be established) for the purpose, among other things, of providing secure communications between the DCC and SMETS1 Devices.

SMETS1 Service Request has the meaning given to that expression in the DCC User Interface Specification.

SMETS1 Smart Metering System means a Smart Metering System comprising SMETS1 Devices.

SMETS1 SMS means a SMETS1 Smart Metering System.

SMETS1 SMSO means a smart meter system operator that provides (or used to provide) some or all of the data and/or communications services in respect of SMETS1 Devices.

SMETS1 SM WAN means the means by which the DCC sends, receives and conveys communications to and from some or all SMETS1 CHFs (which may differ between SMETS1 CHFs).

SMETS1 Supported Service Request has the meaning given to that expression in the DCC User Interface Specification.

SMETS1 Supporting Requirements means the SEC Subsidiary Document set out in Appendix AM.

SMETS1 Symmetric Key means an Authentication Key or a symmetric key which is in either case used to process communications with SMETS1 Devices.

SMETS1 Symmetric Key Arrangement means any arrangement that is established (or is to be established) for the purpose, among other things, of providing secure communications between the DCC and SMETS1 Devices by means of using SMETS1 Symmetric Keys.

SMETS2+ Communications Hub means a Communications Hub which is not a SMETS1 CH.

SMETS2+ Device means a Device that:

a. consists of the components or other apparatus identified in; and
b. as a minimum, has the functional capability specified by and complies with the other requirements of, a Relevant Technical Specification (and, where applicable, the part(s) of the Relevant Technical Specification relevant to the Physical Device Type in question) in a Version of the Relevant Technical Specification which was within its Installation Validity Period on the date on which the Device was installed and which has (or had) a Principal Version that is 2 or higher.

SMETS2+ Device Model means the Device Model of a Device which complies with the requirements of SMETS2+ (or which, in combination with other Devices, complies with the requirements of SMETS2+).

SMETS2+ SM WAN means the means by which the DCC sends, receives and conveys communications to and from SMETS2+ Communications Hub Functions (which may differ from Region to Region).

S1SP means the SMETS1 Service Provider.

S1SP Alert

has the meaning given to that expression in the DCC User Interface Specification.

S1SPKI Certificate Policy (or S1SPKI CP)

means any SEC Subsidiary Document of that name set out in Appendices AP1 or AP2, which is originally to be developed pursuant to Section L14.5 (The S1SPKI Certificate Policies: Document Development) and Section L14.8 (Document Development: Process).

S1SPKI Certification Practice Statement (or S1SPKI CPS)

has the meaning given to that expression in Section L14.9 (The S1SPKI Certification Practice Statement).

S1SPKI Registration Authority Policies and Procedures (or S1SPKI RAPP)

means any SEC Subsidiary Document of that name set out in Appendix [TBC] or the section of the associated S1SPKI Certificate Policy identified as being the S1SPKI RAPP for that S1SPKI Certificate Policy, which is originally to be developed pursuant to Section L14.6 (The S1SPKI Registration Authority Policies and Procedures: Document Development) and Section L14.8 (Document Development: Process).

S1SPKM Compliance Policy

means the SEC Subsidiary Document of that name set out in Appendix AO.

S1SPKM Document Set

has the meaning given to that expression in Section L14.3 (The S1SPKM Document Set).

S1SPKM SEC Documents

has the meaning given to that expression in Section L.14.4 (The S1SPKM SEC Documents).

SMI Status

means the status indicator of each Device recorded within the Smart Metering Inventory, which indicator may (as a minimum) be set to any one of the following:
(a) ‘pending’, indicating that the Device has not yet been Commissioned;
(b) ‘installed not commissioned’, indicating that the Device is ready to be Commissioned, but has not yet been Commissioned;
(c) ‘commissioned’, indicating that the Device has been Commissioned;
(d) ‘decommissioned’, indicating that the Device has been Decommissioned;
(e) ‘suspended’, indicating that the Device has been Suspended;
(f) ‘whitelisted’, indicating that a Device has been added to the Device Log of a Communications Hub Function but that communications between the Device and the Communications Hub Function may not yet have been established;
(g) ‘recovery’, indicating that the processing of communications destined

for the Device has been disabled (other than for communications originated by the DCC) in accordance with the SMKI Recovery Procedure; or
(h) ‘recovered’, indicating that the Data comprising the Device Security Credentials have successfully been updated using Data from one or more OCA Certificates and/or Organisation Certificates for which DCC is the Subscriber as further described in the SMKI Recovery Procedure.

SMKI and Repository Entry Process Tests

means the tests described in Section H14.22 (SMKI and Repository Entry Process Tests).

SMKI and Repository Test Scenario Document

means the SEC Subsidiary Document of that name set out in Appendix K.

SMKI Code of Connection

means the SEC Subsidiary Document of that name set out in Appendix N, which:
(a) has the purpose described in Section L4.5 (SMKI Code of Connection); and
(b) is originally to be developed pursuant to Sections L4.6 to L4.7 (SMKI Interface Document Development).

SMKI Compliance Policy

means the SEC Subsidiary Document of that name set out in Appendix C.

SMKI Document Set

has the meaning given to that expression in Section L9.3 (the SMKI Document Set).

SMKI Independent Assurance Scheme

has the meaning given to that expression in Part 2.1 of the SMKI Compliance Policy (DCC: Duty to Submit to an SMKI Independent Assurance Scheme).

SMKI Interface Design Specification

means the SEC Subsidiary Document of that name set out in Appendix M, which:
(a) has the purpose described in Section L4.4 (SMKI Interface Design Specification); and
(b) is originally to be developed pursuant to Sections L4.6 to L4.7 (SMKI Interface Document Development).

SMKI Participants

means the DCC (acting in its capacity as the provider of the SMKI Services), all Authorised Subscribers and all Relying Parties.

SMKI PMA means the Sub-Committee of that name established pursuant to Section L1 (SMKI Policy Management Authority).

SMKI PMA (Network) Member has the meaning given to that expression in Section L1.8 (Membership of the SMKI PMA).

SMKI PMA (Supplier) Members has the meaning given to that expression in Section L1.6 (Membership of the SMKI PMA).

SMKI PMA Chair has the meaning given to that expression in Section L1.5 (Membership of the SMKI PMA).

SMKI PMA Guidance means guidance in respect of the SMKI Document Set, updated from time to time by the SMKI PMA.

SMKI PMA Member has the meaning given to that expression in Section L1.3 (Membership of the SMKI PMA).

SMKI Recovery Key Guidance has the meaning given to that expression in Section L10.9 (The SMKI Recovery Key Guidance).

SMKI Recovery Procedure means the SEC Subsidiary Document of that name set out in Appendix L, which:

(a) has the purpose described in Section L10.1 (The SMKI Recovery Procedure); and

(b) is originally to be developed pursuant to Sections L10.7 to L10.8 (SMKI Recovery Procedure: Document Development).

SMKI Registration Authority Policies and Procedures (or SMKI RAPP) means the SEC Subsidiary Document of that name set out in Appendix D, which is originally to be developed pursuant to Sections L9.5 to L9.6 (the Registration Authority Policies and Procedures: Document Development).

SMKI Repository has the meaning given to that expression in Section L5.1 (the SMKI Repository).

SMKI Repository Code of Connection means the SEC Subsidiary Document of that name set out in Appendix P, which:

(a) has the purpose described in Section L6.5 (SMKI Repository Code of Connection); and
(b) is originally to be developed pursuant to Sections L6.6 to L6.7 (SMKI Repository Interface Document Development).

SMKI Repository Interface has the meaning given to that expression in Section L6.3 (the SMKI Repository Interface).

SMKI Repository Interface Design Specification means the SEC Subsidiary Document of that name set out in Appendix O, which
(a) has the purpose described in Section L6.4 (SMKI Repository Interface Design Specification); and
(b) is originally to be developed pursuant to Sections L6.6 to L6.7 (SMKI Repository Interface Document Development).

SMKI Repository Service has the meaning given to that expression in Section L5.2 (the SMKI Repository Service).

SMKI SEC Documents has the meaning given to that expression in Section L9.4 (the SMKI SEC Documents).

SMKI Service Interface has the meaning given to that expression in Section L4.3 (the SMKI Service Interface).

SMKI Services has the meaning given to that expression in Section L3.1 (the SMKI Services).

SMKI Specialist means an individual (rather than a body corporate, association or partnership) to be appointed and remunerated under a contract with SECCo, who:
(a) has experience and expertise in public key infrastructure arrangements;
(b) is sufficiently independent of any particular Party or RDP, or class of Parties or RDPs, and of the Independent SMKI Assurance Service Provider; and
(c) is chosen by the SMKI PMA Chair from time to time.

SOC2 means the Service Organisation Control 2 standard, as defined by the American Institute of Certified Public Accountants.

SoLR Change of Supplier Processes

means, in relation to the Devices forming part of a Smart Metering System for a premises of a Pre-Payment Consumer of a Failing Energy Supplier, the replacement of any Device Security Credentials on those Devices that pertain to the Failing Energy Supplier with those that pertain to the Supplier of Last Resort.

Solution Architecture Information

means a description of the overall technical architecture of the DCC Systems (or any part thereof) in more detail than the Technical Architecture Document so as to describe the individual components of the DCC Systems (including hardware and software) and how they interface with the User Systems.

Special Installation Mesh Communications Hub

means a WAN Variant (in the central Region and the south Region) which is distinguishable from a standard Mesh Communications Hub by the existence of an additional external aerial port.

Special Second-Fuel Installation

means, in the case of a premises for which there is both an Electricity Smart Meter and a Gas Smart Meter, where on the installation of the second of those two meters to be installed it was necessary to replace the Communications Hub relating to the first of those two meters to be installed because that Communications Hub was not able to serve the second of those two meters to be installed (with the consequence that the Communications Hub that is replaced is removed from the premises and returned to the DCC).

Special WAN-Variant Installation

means that the DCC requests (in accordance with the Incident Management Policy) that a Supplier Party replaces an installed Communications Hub with a Communications Hub of a different WAN Variant to the installed Communications Hub, with the consequence that the Communications Hub that is replaced is removed from the premises and returned to the DCC.

Specimen Accession Agreement

means the specimen form of agreement set out in Schedule 2.

Specimen Bilateral Agreement

means the specimen form of agreement set out in Schedule 3.

Specimen Enabling Services Agreement

means the form of specimen agreement set out in Schedule 7 (Specimen Enabling Services Agreement).

SSC Guidance for Device Security Assurance and Triage means the document of that name developed by the SSC in accordance with Section G7.19(g).

SSI Baseline Requirements Document means a document produced and maintained by the DCC in accordance with the Self-Service Interface Access Control Specification.

SSI Change Governance Process means a document established under Section H8.15A (Self-Service Interface) and contains the governance arrangements for making changes to the Self-Service Interface.

Stage 1 Assurance Report has the meaning given to that expression in Part 4.4 of the SMKI Compliance Policy (Nature of the Initial Assessment).

Stage 2 Assurance Report has the meaning given to that expression in Part 4.6 of the SMKI Compliance Policy (Nature of the Initial Assessment).

Standalone Auxiliary Proportional Controller means a device installed (or to be installed) at a premises, which:
(a) consists of the components or other apparatus identified in; and
(b) as a minimum, has the functional capability specified by and complies with the other requirements of,
a Version of the SAPC Technical Specification which was within its Installation Validity Period on the date on which the device was installed.

Statement of Service Exemptions means a statement of that name developed by the DCC in accordance with Condition 17 of the DCC Licence.

Sub-Committee has the meaning given to that expression in Section C6 (Sub-Committees).

Sub GHz Alert Has the meaning given to 'Sub GHz Alert' in the GB Companion Specification.

Sub GHz Available Channels Has the meaning given to 'Sub GHz Available Channels' in the GB Companion Specification.

Subject in relation to a Certificate, has the meaning given to that expression in the relevant Certificate Policy.

Sub-Processor means, in respect of a Party which Processes Personal Data obtained pursuant to this Code as a Data Processor, any person which Processes such Personal Data on behalf of such Party.

Subscriber means, in relation to any Certificate, SECCo, a Party or an RDP which has been Issued with and accepted that Certificate, acting in its capacity as the holder of the Certificate.

Subscriber Obligations means the provisions in respect of Subscribers set out at Section L11 of the Code (the Subscriber Agreement Obligations).

Sub-Version in relation to:
(a) a Technical Specification, has the meaning given to that expression in Section A3.5(b) (Versions of the Technical Specifications); and
(b) the GBCS or CPA Security Characteristics, has the equivalent meaning, in accordance with and subject to the provisions of Section A3.27 (GB Companion Specification and CPA Security Characteristics).

Successfully Executed means:
(a) in respect of a Command and a Device, that the action that a Command of the relevant type is designed to effect in respect of a Device of the relevant Device Type has been effected on the Device;
(b) in respect of a Service Request and a Device, that the associated Command has been Successfully Executed on the Device as described in (a) above (or, in the case of Service Requests that are not designed to result in a Command, that the action that a Service Request of the relevant type is designed to effect has been effected); or
(c) in respect of a SMETS1 Service Request and a Device, that the Equivalent Steps have been successfully carried out.

Successor Licensee has the meaning given to that expression in Section M9.2 (Application and Interpretation of Section M9).

Supplementary Remote Party has the meaning given to that expression in the GB Companion Specification.

Supplier Certificates means, in respect of a Supplier Party, any Certificate or DCCKI Certificate for which the Supplier Party is a Subscriber or a DCCKI Subscriber.

Supplier of Last Resort

means, in respect of each premises supplied by a Failing Energy Supplier, the Supplier Party directed to supply gas and/or electricity to that premises by the Authority under a Last Resort Supply Direction (as defined in the Energy Supply Licences).

Supplier Party

means a Party that is an Electricity Supplier Party and/or a Gas Supplier Party.

Supply Meter Point

has the meaning given to that expression in the UNC.

Supply Meter Point Reference Number

has the meaning given to that expression in the UNC.

Supply of Energy

means either or both of the supply of gas pursuant to the Gas Act and the supply of electricity pursuant to the Electricity Act (in each case within the meaning that is given to the expression “supply” in the respective Act).

Supply Sensitive Check

means a check carried out by a User in relation to a Supply Sensitive Service Request in order to confirm the intention of the User that the associated Command(s) should be executed on the relevant Device, having regard to the reasonably foreseeable effect that the Command(s) could have on the quantity of gas or electricity that is supplied to a consumer at premises.

Supply Sensitive Service Request

means any Service Request in respect of which it is reasonably foreseeable that the associated Command(s), if it were to be executed on the relevant Device, could affect (either directly or indirectly) the quantity of gas or electricity that is supplied to a consumer at premises.

Suspended

means, in respect of a Device, that the Device has been suspended (or deemed suspended) in accordance with Section H6.10 (Suspension); and the word “**Suspension**” shall be interpreted accordingly.

Symmetric Key

means the Contingency Symmetric Key and any key derived from a Shared Secret in accordance with the GB Companion Specification.

System

means a system for generating, sending, receiving, storing (including for the purposes of Back-Up), manipulating or otherwise processing electronic communications, including all hardware, software, firmware and Data associated therewith.

System Development Lifecycle

means, in relation to any System, the whole of the life of that System from its initial concept to ultimate disposal, including the stages of development, design, build, testing, configuration, implementation, operation, maintenance, modification and decommissioning.

Tailored Assurance Service (CTAS)

means the scheme of that name which is administered by NCSC, or any successor to that scheme.

Target Availability Period

means, in relation to each DCC Interface (excluding the one listed in paragraph (f) of the definition of DCC Interface), a period of time in respect of each month, expressed in minutes and calculated as:
(a) the total number of minutes in that month, minus
(b) the number of minutes during which the DCC has, acting in compliance with Sections H8.2 and H8.3 (Maintenance of the DCC Systems), arranged for the given DCC Interface to be unavailable during that month for the purposes of Planned Maintenance.

Target Initial Response Time

means the time period within which an Incident within each Incident Category is to be recorded on the Incident Management Log and assigned to a resolver, as set out in the Incident Management Policy.

Target Resolution Time

has the meaning given to that expression in Section H9.1 (Incident Management Policy).

Target Response Time

has the meaning given to that expression in Section H3.14 (Target Response Times) or L8 (SMKI Performance Standards and Demand Management).

Target Service Level

means, in respect of each Performance Measure, the number or percentage intended to represent a reasonable level of performance for the activity which is the subject of the Performance Measure, as set out in:
(a) Section D11.1 (Code Performance Measures);
(b) Section H13.1 (Code Performance Measures);
(c) the Reported List of Service Provider Performance Measures; or
(d) Section L8.6 (Code Performance Measures).

TCH Participant

has the meaning given to that expression in Section F10.5 (Provision of Test Communications Hubs).

Technical Architecture and Business Architecture Sub-Committee means the Sub-Committee established pursuant to Section F1 (Technical Architecture and Business Architecture Sub-Committee).

Technical Architecture Document means a document setting out a representation of the End-to-End Technical Architecture.

Technical Code Specifications means the Technical Specifications, the GB Companion Specification, the DCC Gateway Connection Code of Connection, the DCC User Interface Code of Connection, the DCC User Interface Specification, the Self-Service Interface Access Control Specification, the Self-Service Interface Code of Connection, the Registration Data Interface Documents, the Message Mapping Catalogue, the Incident Management Policy, the DCC Release Management Policy, the SEC Release Management Policy, the SMKI Interface Design Specification, the SMKI Code of Connection, the SMKI Repository Interface Design Specification, the SMKI Repository Code of Connection, and the SMETS1 Supporting Requirements.

Technical Specification means each of the CHTS, the ESMETS, the GSMETS, the HCALCSTS, the IHDTS, the PPMIDTS and the SAPCTS.

Test Certificate means a certificate that simulates the function of a Certificate for the purpose of testing pursuant to this Code.

Test Communications Hub means:

(a) until such date as the DCC may determine (or such earlier date as the Secretary of State may designate for the purposes of this definition), a Prototype Communications Hub; and

(b) after such date, a device that is equivalent to a SMETS2+ Communications Hub but which contains such variations in functionality as the DCC reasonably considers appropriate to enable the device to be used for the purposes of testing, which device is provided (or to be provided) for the purpose of testing as described in Section F10 (Test Communications Hubs).

Test Repository means a repository that simulates the function of the SMKI Repository for the purpose of testing pursuant to this Code.

Test Stubs

means Systems and actions which simulate the behaviour of Devices and User Systems.

Testing Issue

means, in respect of any tests:
(a) anything that is preventing the execution of the tests; or
(b) once commenced or executed, the test has an unexpected or unexplained outcome or response.

Testing Participant

means, in respect of each Testing Service, the persons (whether or not they are Parties) who are entitled to undertake such tests, as described in Section H14 (Testing Services).

Testing Service

has the meaning given to that expression in Section H14.1 (General Testing Requirements).

Threshold Anomaly Detection

means the DCC processes which:

a. in respect of any User ID used by a User in one or more of its User Roles, detect whether the total number of communications (in general or of a particular type) sent, received or processed by the DCC in relation to that User ID exceeds the relevant Anomaly Detection Threshold;
b. in respect of the DCC (including when acting as a DCO, the CoS Party or a SMETS1 Service Provider), detect whether:
    i. the total number of communications of a particular type generated, sent, received or processed by the DCC in relation to all Users and the CoS Party exceeds the relevant Anomaly Detection Threshold; and
    ii. a data value within a communication of a particular type sent, received or processed by the DCC in relation to a User exceeds or is less than the relevant Anomaly Detection Threshold; and
c. (other than in the case of Threshold Anomaly Detection applied by a DCO) quarantine those communications that, in the case of paragraph (a) or (b)(i) above, are in excess of the relevant Anomaly Detection Threshold or, in the case of paragraph (b)(ii) above, contain a data value that exceeds or is less than the relevant Anomaly Detection Threshold.

Threshold Anomaly Detection Procedures

means the SEC Subsidiary Document of that name set out in Appendix AA, which has the purpose described in Section G6.1 (Threshold Anomaly Detection Procedures).

Transfer Date has the meaning given in Section F6A.4 (Communications Hub Transfer Requests), subject to change in accordance with the CH Handover Support Materials.

Transfer Location has the meaning given in Section F6A.4 (Communications Hub Transfer Requests).

Transform means, in respect of a Service Request in relation to a Device, the conversion of that Service Request into one or more corresponding Commands (less any required Message Authentication Code or Digital Signatures), where such correspondence is identified in the DCC User Interface Specification in respect of particular types of Service Request and particular Device Types; and "**Transformed**" shall be interpreted accordingly.

Transition and Migration Approach Document means the SEC Subsidiary Document set out in Appendix [TBC].

Transition Objective has the meaning given to that expression in Section X1 (General Provisions Regarding Transition).

Transport Layer Security means TLS in accordance with the relevant SMKI PMA and SSC Guidance (Standards, Procedures and Guidelines) published on the SEC website.

Trial Device Approval has the meaning given to that expression in Section F2.18 (Device Trials).

Trial Device Certificate has the meaning given to that expression in Section F2.25 (Device Trials).

Trial Device Model has the meaning given to that expression in Section F2.18 (Device Trials).

Trial Device Remedial Plan has the meaning given to that expression in Clause 6.3(b) of Appendix Z (CPL Requirements Document).

TS Applicability Tables means the document set out in Schedule 11 which has the content described at Section A3.32 (The TS Applicability Tables).

Type 1 Device means a HAN Connected Auxiliary Load Control Switch or a Pre-Payment Meter Interface Device.

Type 2 Device has the meaning given to that expression in the Technical Specification in which the expression is used (or given to the expression 'Consumer Device' in SMETS1).

Type 2 Device (Other) means a Type 2 Device that is not an IHD.

UKAS means the United Kingdom Accreditation Service

Unambiguous Consent means the explicit and informed consent of an Energy Consumer given to a User to undertake a specified action, and that consent shall not be treated as having been given explicitly unless the Energy Consumer has:

(a) of his or her own volition, communicated to the User a request for it to undertake that action; or

(b) in response to a specific request by the User for him or her to indicate consent to it undertaking that action, taken a positive step amounting to a clear communication of that consent.

UNC means the Uniform Network Code established pursuant to the Gas Transporter Licences.

Unique Transaction Reference Number (UTRN) has, where used in relation to a SMETS2+ Device, the meaning given to that expression in the GB Companion Specification; or, where used in relation to SMETS1 Device, has the meaning set out in SMETS1.

Unknown Remote Party for SMETS2+ Devices, has the meaning given to that expression in the GB Companion Specification; and, for SMETS1 Devices, has the meaning set out in the SMETS1 Supporting Requirements.

Unplanned Maintenance means, in respect of a month, Maintenance of the DCC Systems that was not planned prior to the start of that month and which disrupts, will disrupt, or poses a Material Risk of disruption to, provision of the Services (and, where it disrupts, will disrupt, or poses a Material Risk of disruption to, the provision of the Services in relation to Devices associated with Communications Hubs, at least 100,000 Communications Hubs are affected).

Unsecured Credit Factor Percentage has the meaning given to that expression in Section J3.10 (Party's Unsecured Credit Factor Percentage).

Unsecured Credit Limit has the meaning given to that expression in Section J3.7 (Party's Unsecured Credit Limit).

Upgrade Image shall have the meaning given to that expression in the SMETS1 Supporting Requirements.

UPRN means the unique property reference number (if any) recorded in respect of a premises so as to link the MPAN(s) and MPRN for that premises.

Urgent DCC Assessment means a DCC Assessment in respect of an Urgent Modification Proposal.

Urgent Proposal has the meaning given to that expression in Section D4.6 (Urgent Proposals).

User means a Party that has completed the User Entry Process (and, in respect of Services available in accordance with this Code to Users acting only in one or more User Roles, a Party that has completed the User Entry Process for that User Role).

User Entry Process means the process described in Section H1 (User Entry Process).

User Entry Process Tests means the tests described in Section H14.13 (User Entry Process Tests).

User ID means, in respect of a User and a User Role, one of the unique identification numbers accepted by the DCC in respect of that User and that User Role under Section H1.6 (User Roles and User IDs).

User Independent Security Assurance Service Provider has the meaning given to that expression in Section G8.1 (Procurement of the Independent Security Assurance Service Provider).

User Personnel means those persons who are engaged by a User, in so far as such persons carry out, or are authorised to carry out, any activity in relation to the business of the User in the exercise of rights and compliance with obligations under this Code.

User Privacy Self-Assessment

has the meaning given to that expression in Section I2.12 (Categories of Assessment).

User Privacy Self-Assessment Report

has the meaning given to that expression in Section I2.24 (The User Privacy Self-Assessment Report).

User Role

means, in respect of the Service set out in the DCC User Interface Services Schedule and Elective Communication Services, one of the categories of User that is capable of being an Eligible User in respect of those Services (determined without reference to a particular Smart Metering System), and which comprise the following categories (construed without reference to a particular Smart Metering System): Import Supplier, Export Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Registered Supplier Agent and Other User.

User Security Assessment

means either a Full User Security Assessment or a Verification User Security Assessment.

User Security Assessment Methodology

means a methodology to be applied (as the case may be):
(a) by the User Independent Security Assurance Service Provider in carrying out any User Security Assessment; or
(b) by a User, in carrying out any User Security Self-Assessment,
in each case in accordance with the provisions of the Security Controls Framework applicable to the relevant category of security assurance assessment.

User Security Assessment Report

has the meaning given to that expression in Section G8.22 (User Security Assessments: General Procedure).

User Security Assessment Response

has the meaning given to that expression in Section G8.24 (User Security Assessments: General Procedure).

User Security Self-Assessment

has the meaning given to that expression in Section G8.18 (Categories of Security Assurance Assessment).

User Systems

means any Systems (excluding any Devices) which are operated by or on behalf of a User and used in whole or in part for:
(a) constructing Service Requests;
(b) sending Service Requests over the DCC User Interface;
(c) receiving, sending, storing, using or otherwise carrying out any processing in respect of any Pre-Command or Signed Pre-Command;
(d) receiving Service Responses or Alerts over the DCC User Interface;
(e) generating Data for communication to the OCA, DCA, ICA or DCCKICA, or receiving Data from the OCA, DCA, ICA or DCCKICA (including any Systems which store or use Secret Key Material for such purposes) but excluding communications in relation to Devices that do not have an SMI Status of "commissioned" or "installed not commissioned"; and/or
(f) generating any Unique Transaction Reference Number,
and any other Systems from which the Systems used in whole or in part for the purposes set out in paragraphs (a) to (f) are not Separated.

UTC (Coordinated Universal Time)

means the prime standard by which clocks and time are regulated.

Valid Communications Hub Order

means the Consignment or Consignments which arise from a Communications Hub Order that has been accepted by the DCC under Section F5.16 or F5.17 (DCC: Duties in relation to Communications Hub Orders), and which have not been cancelled by the ordering Party in accordance with Section F5.19 (Non-Standard Cancellation of Consignments).

Validity Period

has the meaning given to that expression in any of the Certificate Policies or the DCCKI Certificate Policy.

Value at Risk

has the meaning given to that expression in Section J3.6 (Party’s Value at Risk).

VAT

means VAT, as defined in the Value Added Tax Act 1994, and any tax of a similar nature which may be substituted for or levied in addition to it.

Verification User Security Assessment

has the meaning given to that expression in Section G8.17 (Categories of Security Assurance Assessment).

Verify

means, in respect of a Service Request or Signed Pre-Command, to confirm that it meets all the applicable requirements of the DCC User Interface Specification.

Version

in relation to:

a. a Technical Specification, has the meaning given to that expression in Section A3.2 (Versions of the Technical Specifications);

b. the GBCS or CPA Security Characteristics, has the meaning given to that expression in Section A3.26 (GB Companion Specification and CPA Security Characteristics); and

c. the DCC User Interface Specification, has the meaning given to that expression in Section A3.36 (DCC User Interface Specification and Message Mapping Catalogue),

and in the case of Technical Specifications, the GBCS or CPA Security Characteristics includes both the Principal Version and Sub-Version of that document. The concepts of Principal Version and Sub-Version do not apply to the DCC User Interface Specification.

Volume Scenarios

means the capacity levels to which the DCC Systems will be tested.

Voting Group

means, in respect of each Party Category, each Party that falls into that Party Category collectively with that Party's Affiliates (if any) who also fall into that Party Category.

WAN Variants

means the variations of SMETS2+ Communications Hub that are necessary to enable communications via the SMETS2+ SM WAN in each Region (and each part thereof that is not subject to the Statement of Service Exemptions).

Website

means a dedicated website established at the direction of the Panel for the purposes of this Code.

Wide Area Network (WAN) Provider

means the DCC, acting in the capacity and exercising the functions of the Known Remote Party role identified as such in the GB Companion Specification.

Wired Instrumented Test Communications Hubs (Wired ITCH)

means the Testing Service described in Section H14.54 (Wired Instrumented Test Communications Hubs).

Working Day

means any day other than a Saturday, a Sunday, Christmas Day, Good Friday, or a day that is a bank holiday within the meaning of the Banking and Financial Dealings Act 1971.

Working Group has the meaning given to that expression in Section D6.2 (Establishment of a Working Group).

Working Group Terms of Reference has the meaning given to that term in Section D6.2 (Establishment of a Working Group).

XML User Role Signing Private Key means a Private Key associated with a Public Key that is contained within an Organisation Certificate with a Remote Party Role of "xmlSign".

Zigbee Alliance means the association of that name administered by ZigBee Alliance Inc (2400 Camino Ramon, Suite 375, San Ramon, CA 94583, USA) (see - www.zigbee.org).

A2. INTERPRETATION

A2.1 In this Code, unless the context otherwise requires, any reference to:

(a) a “person” includes a reference to an individual, a body corporate, an association, a partnership or a Competent Authority;

(b) the singular includes the plural, and vice versa;

(c) a gender includes every gender;

(d) a Section or Schedule is a reference (respectively) to the section of, or schedule to, this Code which bears the relevant letter, number or letter and number;

(e) a numbered Paragraph or a numbered Clause is a reference to the paragraph or clause of the Schedule or Appendix in which such reference occurs;

(f) a numbered Condition (with or without a letter) is a reference to the licence condition bearing that number (and, where relevant, letter) in the Energy Licence indicated (and, save in the case of the DCC Licence, is a reference to the standard licence conditions of that Energy Licence);

(g) writing (or similar) includes all methods of reproducing words in a legible and non-transitory form (including email);

(h) a day, week or month is a reference (respectively) to a calendar day, a week starting on a Monday, or a calendar month;

(i) a time is a reference to that time in the UK;

(j) any statute or statutory provision includes any subordinate legislation made under it, any provision which it has modified or re-enacted, and any provision which subsequently supersedes or re-enacts it (with or without modification);

(k) an agreement, code, licence or other document is to such agreement, code, licence or other document as amended, supplemented, novated or replaced from time to time;

(l) a Party shall include reference to that Party's respective successors, (in the case of the DCC) to the person to whom the DCC may novate its rights and obligations pursuant to Section M9 (Transfer of DCC Licence), and (as the context permits) reference to the respective persons to whom that Party may sub-contract or otherwise delegate its rights and/or obligations under this Code in accordance with Section M11.8 and M11.9 (which shall include, in the case of the DCC, reference to the DCC Service Providers);

(m) any premises of a Party shall include references to any premises owned or occupied by that Party and (as the context permits) by the respective persons to whom that Party may sub-contract or otherwise delegate its rights and/or obligations under this Code in accordance with Section M11.8 and M11.9 (which shall include, in the case of the DCC, reference to the DCC Service Providers);

(n) a Competent Authority or other public organisation includes a reference to its successors, or to any organisation to which some or all of its functions and responsibilities have been transferred; and

(o) an expression that is stated to have the meaning given to it in an Energy Licence (other than the DCC Licence) is a reference to that expression as defined in the standard licence conditions for the Energy Licence indicated.

A2.2 The headings in this Code are for ease of reference only and shall not affect its interpretation.

A2.3 In this Code, the words preceding "include", "including" or "in particular" are to be construed without limitation to the generality of the words following those expressions.

A2.4 The language of this Code is English. All notices and other communications sent between any of the Parties, the Panel, SECCo, the Code Administrator and the Secretariat shall be in English.

A2.5 Except where expressly stated to the contrary, in the event of any conflict between the provisions of this Code, the following order of precedence shall apply:

(a) the Sections, as among which Section X (Transition) shall take precedence; then

(b) the Schedules; then

(c) the SEC Subsidiary Documents.

A2.6 Section A2.7 shall apply, during the period prior to Completion of Implementation, where initial capital letters are used for any expression in this Code that either is not defined in this Code or the definition of which cannot be given effect by reference to the provisions of this Code.

A2.7 Any expression of the type referred to in Section A2.6 shall be interpreted as having the meaning given to that expression in the decision or consultation document concerning the intended future definition of such expression most recently published by the Secretary of State prior to the date on which this Section A2.7 comes into force.

A2.8 Where no time period is specified for performance of any obligation under this Code, the obligation shall be performed as soon as reasonably practicable.

A2.9 Where any expression is defined both in Section A1 (Definitions) and in any Schedule or Appendix:

(a) the definition in the Schedule or Appendix shall take precedence for the purposes of that Schedule or Appendix (including for the purposes of any Technical Specification included within any such Schedule); and

(b) the definition in Section A1 shall take precedence for all other purposes

A2.10 For the purposes of Section A2.9, where the meaning of an expression is explained in any glossary (or equivalent section) of a Schedule which includes a Technical Specification, it shall be treated as an expression that is defined in each Technical Specification that is included within that Schedule.

A2.11 Where any Data is:

(a) embedded as a file within the electronic copy of any Technical Specification, the GBCS, the DCC User Interface Services Schedule or the Message Mapping Catalogue; and/or

(b) represented within the tangible copy of that document as being so embedded,

A2.12 In this Code, each reference to the term or expression:

(a) 'Smart Metering Equipment Technical Specifications';

(b) 'SMETS',

shall be read, as the context requires, as a reference to the ESMETS, the GSMETS, the IHDTS, the HCALCSTS, the PPMIDTS, or the SAPCTS (or to any two or more (or all) of them).

A3. TECHNICAL SPECIFICATIONS, THE GB COMPANION SPECIFICATION, THE CPA SECURITY CHARACTERISTICS, AND THE DCC USER INTERFACE SPECIFICATION

Introduction

A3.1 This Section A3 makes provision in relation to:

(a) the maintenance in this Code of different versions of each of the Technical Specifications;

(b) the relationship between each version of a Technical Specification and:

(i) the GB Companion Specification; and

(ii) the CPA Security Characteristics; and

(c) the interpretation of the Code in respect of the Technical Specifications, GB Companion Specification, CPA Security Characteristics, the DCC User Interface Specification, and the Message Mapping Catalogue.

Versions of the Technical Specifications

A3.2 Each Technical Specification may exist in more than one version (a "**Version**").

A3.3 Each Version of a Technical Specification shall consist of two elements:

(a) a Principal Version; and

(b) a Sub-Version of that Principal Version.

A3.4 Each Version of a Technical Specification shall be identified by a numerical reference in a form equivalent to 'ESMETS v 1.2', where:

(a) the number before the decimal point identifies the Principal Version; and

(b) the number after the decimal point identifies the Sub-Version.

A3.5 In respect of any Technical Specification:

(a) the expression "**Principal Version**" shall be interpreted in accordance with Sections A3.6 to A3.7; and

(b) the expression "**Sub-Version**" shall be interpreted in accordance with Sections A3.8 to A3.9.

The Principal Version

A3.6 Where a Technical Specification is amended in a manner that is entirely prospective, that amendment shall be made by creating a new Principal Version, and:

(a) for this purpose a prospective amendment means one that does not require any change to be made to any Device or apparatus which is already installed;

(b) in consequence a new Principal Version shall be taken to indicate amendments which have no retrospective effect.

A3.7 The first Principal Version of:

(a) each of the ESMETS, the GSMETS, the IHDTS and the CHTS shall be allocated the number 1, and subsequent Principal Versions of each such that Technical Specification shall be allocated sequential numbers;

(b) (b) each of the PPMIDTS, the HCALCSTS and the SAPCTS shall be allocated the number 2, and subsequent Principal Versions of each such Technical Specification shall be allocated sequential numbers.

The Sub-Version

A3.8 Where any Principal Version of a Technical Specification is amended in a manner that is intended to have retrospective effect, that amendment shall be made by creating a new Sub-Version, and for these purposes:

(a) a Sub-Version means a new form of the Principal Version to which it relates;

(b) an amendment with retrospective effect means one that requires a change to be made to Devices or apparatus which are already installed.

A3.9 The initial form of a Principal Version of a Technical Specification shall be allocated the Sub-Version number of zero, and subsequent Sub-Versions shall be allocated sequential numbers, beginning with 1, in the chronological order in which they are created.

The Installation Validity Period

A3.10 Any Version of a Technical Specification may be assigned an Installation Validity Period.

A3.11 An "**Installation Validity Period**" means the period of time during which any Device or apparatus satisfying the requirements of that Version of the Technical Specification may be installed or provided.

A3.12 An Installation Validity Period shall:

(a) commence on the "**Installation Start Date**" that is identified in relation to that Version of the Technical Specification in the TS Applicability Tables; and

(b) end on any "**Installation End Date**" determined in accordance with Sections A3.13 to A3.16.

The Installation End Date

A3.13 In the case of each Version of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1, the Installation End Date shall, except where Section A3.14 or Section A3.15 applies, be the date which is identified in relation to that Version in the TS Applicability Tables as the "**General Installation End Date**".

A3.14 This section applies on the installation or provision by or on behalf of a Supplier Party of any Replacement Meter and ancillary Device or apparatus where:

(a) the Energy Meter that is being replaced is not part of a Smart Metering System; and

(b) the Replacement Meter is, in accordance with the terms of a contract between the Supplier Party and the Energy Consumer at the premises at which it is installed, to be operated as a Pre-Payment Meter for at least an initial period from the date of its installation,

in which case the Installation End Date in respect of any Version of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1 shall be the date which is identified in relation to that Version in the TS Applicability Tables as the "**PPM Installation End Date**".

A3.15 This Section applies where a Derogation is granted to a Supplier Party in accordance with Section A4 (Derogation from General Installation End Date) and has not been revoked, in which case:

(a) for the purposes of the installation or provision by or on behalf of that Supplier Party of any Device or apparatus; and

(b) in so far as any conditions of that Derogation are satisfied,

the Installation End Date shall be the Alternative Installation End Date specified in the Derogation.

A3.16 In the case of each Version of a Technical Specification, other than the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1, the Installation End Date shall be the date that may be identified in relation to that Version of the Technical Specification in the TS Applicability Tables.

A3.17 The Installation End Date of any Version of a Technical Specification may be later than the Installation Start Date of a Version that succeeds it, so that:

(a) two or more Versions may be within their Installation Validity Periods at the same time; and

(b) any Device or apparatus to which each such Version relates may be installed or provided in accordance with any such Version that is within its Installation Validity Period at that time.

The Maintenance Validity Period

A3.18 Each Version of a Technical Specification shall be assigned a Maintenance Validity Period.

A3.19 A "**Maintenance Validity Period**" means:

(a) the period of time during which a Device or other apparatus may be maintained in accordance with the requirements of that Version of the Technical Specification; and

(b) the period of time during which User can interface to the DCC in accordance with that Version of the DCC User Interface Specification.

A3.20 A Maintenance Validity Period shall:

(a) commence on the "**Maintenance Start Date**" that is identified in relation to that Version of the Technical Specification or the DCC User Interface Specification in the TS Applicability Tables; and

(b) end on any "**Maintenance End Date**" that may be identified in relation to that Version of the Technical Specification or the DCC User Interface Specification in the TS Applicability Tables.

A3.21 The Maintenance End Date of any Version of a Technical Specification may be later than the Maintenance Start Date of a Version that succeeds it, so that:

(a) two or more Versions may be within their Maintenance Validity Periods at the same time; and

(b) any Device or apparatus to which each such Version relates may be maintained in accordance with any such Version that is within its Maintenance Validity Period at that time.

Versions in the Code

A3.22 Each Version of a Technical Specification or DCC User Interface Specification shall be retained in the relevant Schedule to the Code at all times during which it remains within its Installation Validity Period (if any) and/or its Maintenance Validity Period.

A3.23 Where, in respect of any Version of a Technical Specification or DCC User Interface Specification:

(a) no Installation Validity Period has been assigned, or any Installation Validity Period that was assigned has expired; and

(b) the Maintenance Validity Period has expired, that Version shall be deemed automatically to be deleted from the Code on the day immediately following whichever is the later of its Installation End Date (if any) or Maintenance End Date, and the part of the Schedule or the part of the composite document in the Schedule (as the case may be) in which it is set out shall then automatically be marked 'Not Used'.

A3.24 The Code Administrator shall at all times maintain on the Website copies of those Versions of each Technical Specification, DCC User Interface Specification and Message Mapping Catalogue which have been deleted from the Code in accordance with Section A3.23, together with a record of the Installation Start and End Dates (if any) and the Maintenance Start and End Dates relating to each such Version.

GB Companion Specification and CPA Security Characteristics

A3.25 The GB Companion Specification and the CPA Security Characteristics may each exist in more than one version (a "**Version**").

A3.26 The provisions of Sections A3.3 to A3.9 shall apply to the GBCS and CPA Security Characteristics:

(a) as if references in those Sections to a Technical Specification were references to each of those documents; and

(b) in respect of the CPA Security Characteristics, so that:

(i) any reference in those Sections to the creation of a new Version by an amendment that requires a change to be made to a Device or apparatus which is already installed shall be read as if it were a reference to an amendment requiring the Device Model of a Device or apparatus which is already installed to be certified, on the expiry of its CPA Certificate, against the new Version of the CPA Security Characteristics; and

(ii) Section A3.38 shall be interpreted accordingly.

A3.27 The provisions of Sections A3.22 to A3.24 shall apply to the GBCS as if references in those Sections:

(a) to a Technical Specification were references to the GBCS;

(b) to an Installation Validity Period or Maintenance Validity Period were to an Applicability Period; and

(c) to an Installation Start or End Date, or a Maintenance Start or End Date, were to the first and last dates of the Applicability Period.

A3.28 Each Technical Specification requires that the Device or other apparatus to which it relates must be compatible with a relevant Version of the GBCS.

A3.29 For these purposes:

(a) the relevant Version of the GBCS in relation to any Version of a Technical Specification shall be deemed to be that which is specified in relation to it in the TS Applicability Tables;

(b) more than one Version of the GBCS may be relevant to a Version of a Technical Specification at the same time;

(c) a Version of the GBCS may be relevant to more than one Version of a Technical Specification at the same time;

(d) a Version of the GBCS shall be relevant to a Version of a Technical Specification only during such period of time (in each case, an "**Applicability Period**") as may be specified in the TS Applicability Tables.

A3.30 Each Version of the GBCS requires that the Device or other apparatus must be certified as compliant with a relevant Version of the CPA Security Characteristics.

A3.31 For these purposes:

(a) the relevant Version of the CPA Security Characteristics in relation to any Version of the GBCS shall be deemed to be that which is specified in relation to it in the TS Applicability Tables;

(b) more than one Version of the CPA Security Characteristics may be relevant to a Version of the GBCS at the same time;

(c) a Version of the CPA Security Characteristics may be relevant to more than one Version of the GBCS at the same time.

The TS Applicability Tables

A3.32 There shall be a document to be known as the "**TS Applicability Tables**", which shall be set out at Schedule 11 to the Code following its initial designation in accordance with Section X5 (Incorporation of Certain Documents into this Code) by the Secretary of State in reliance on Section X5.4 (Other Technical Specifications), and shall:

(a) in relation to each Technical Specification, list each of the Versions of that Technical Specification that have been produced;

(b) in relation to each such Version of that Technical Specification, identify:

(i) any Installation Start Date that has been assigned to it;

(ii) in the case of each Version of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1, the General Installation End Date that has been assigned to it;

(iii) in the case of each Version of a Technical Specification other than one identified in paragraph (ii), any Installation End Date that has been assigned to it (or a statement that no such date has yet been determined);

(iv) the Maintenance Start Date;

(v) the Maintenance End Date (or a statement that no such date has yet been determined);

(vi) the relevant Version(s) of the GBCS;

(vii) any Applicability Period relating to any such relevant Version of the GBCS;

(c) in relation to each Version of the GBCS, identify the relevant Version(s) of the CPA Security Characteristics;

(d) set out which version of each Technical Specification is contained within each of the documents contained within Schedule 9 of the Code; and

(e) In relation to each Version of the DUIS, identify:

(i) the date from which that Version becomes applicable; and

(ii) the date after which that Version ceases to be applicable (or a statement that no such date has yet been determined).

A3.33 The TS Applicability Tables shall be amended to ensure that it remains accurate and up-to-date:

(a) on the designation or re-designation of a Technical Specification or the GBCS in accordance with Section X5 (Incorporation of Certain Documents into this Code), by the Secretary of State in reliance on Section X5.6 (Supplementary Provisions); and

(b) as part of any modification of the Code which creates a new Version of any Technical Specification or of the GBCS in accordance with Section D (Modification Process).

A3.34 Where the TS Applicability Tables is amended (including by the means described in Section A3.33) the amendment may have retrospective effect, which is to say that any date specified in the TS Applicability Tables by virtue of that amendment may be a date which falls before the date on which the amendment was made.

A3.35 The information set out in the TS Applicability Tables shall be regarded as conclusive for all purposes of any question as to the:

(a) Installation Validity Period of any Version of a Technical Specification other than in any case where both:

(i) it is a Version of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1; and

(ii) a Derogation has been granted to any Supplier Party in accordance with Section A4 (Derogation from General Installation End Date), and has not been revoked, specifying an Alternative Installation End Date in respect of that Version of the ESMETS, the GSMETS and the IHDTS;

(b) Maintenance Validity Period of any Version of a Technical Specification;

(c) relevant Version(s) of the GBCS in relation to any Version of a Technical Specification;

(d) Applicability Period of any Version of the GBCS;

(e) relevant Version(s) of the CPA Security Characteristics in relation to any version of the GBCS; and

(f) relevant Version or Versions of the DUIS which can be used at a given time by the DCC and Users.

DCC User Interface Specification and Message Mapping Catalogue

A3.36 The DCC User Interface Specification may exist in more than one version (a "**Version**"). Each such Version shall be subject to a "**Maintenance Validity Period**" which:

(a) commences on the start date that is identified in relation to that Version of the DCC User Interface Specification in the TS Applicability Tables; and

(b) ends on the Maintenance End date (if any) that may be identified in relation to that Version of the DCC User Interface Specification in the TS Applicability Tables.

A3.37 Where there is more than one Version of the DCC User Interface Specification:

(a) each such Version shall contain a different Version of the DUIS XML Schema (but a Version of the DCC User Interface Specification may be modified, and its version number updated, without any corresponding change to the DUIS XML Schema);

(b) there shall be, in respect of each such Version, one or more corresponding versions of the Message Mapping Catalogue;

(c) a User may submit any Service Request, in respect of which it is an Eligible User, in accordance with any Version of the DCC User Interface Specification which is (at the relevant time) within its Maintenance Validity Period;

(d) in accordance with the requirements of each version of the DCC User Interface Specification, each such Service Request must identify the Version of the DUIS XML Schema in accordance with which it has been submitted;

(e) any obligation on the DCC or any User in relation to any Service Request or associated communication shall be interpreted by reference to the provisions of the Version of the DCC User Interface Specification that contains the DUIS XML Schema that is identified in that Service Request;

(f) the obligation on the DCC at Section H11.1 (Parse and Correlate Software) to provide Parse and Correlate Software shall be interpreted as an obligation to provide a separate version of the Parse and Correlate Software in respect of each version of the DCC User Interface Specification (and each corresponding version of the Message Mapping Catalogue); and

(g) any other obligation on the DCC under this Code in relation to the Parse and Correlate Software shall be read as an obligation applying separately in respect of each such version of that software.

A3.37A Each Version of the DCC User Interface Specification shall be retained in the relevant Schedule to the Code at all times during which it remains within its Maintenance Validity Period. Where the Maintenance Validity Period of a Version of the DCC User Interface Specification has expired, then that Version (and any version of the Message Mapping Catalogue that corresponds only to that Version of DUIS as indicated by the Parse and Correlate Applicability Matrix) shall be deemed automatically to be deleted from the Code on the day immediately following the end of that DCC User Interface Specification's Maintenance Validity Period, and the part of the Schedules in which they are set out shall then automatically be marked 'Not Used'. The Code Administrator shall at all times maintain on the Website copies of those Versions of the DCC User Interface Specification and Message Mapping Catalogue which have been deleted from the Code in accordance with this Section A3.37A, together with a record of the Maintenance Validity Period relating to each such DCC User Interface Specification Version.

The Parse and Correlate Applicability Matrix

A3.38 There shall be a document to be known as the "**Parse and Correlate Applicability Matrix**", which shall include:

(a) a list of each of the versions of the Parse and Correlate Software that have been released; and

(b) in relation to each such version of the Parse and Correlate Software:

(i) its version number;

(ii) the version(s) of the DCC User Interface Specification to which that version of the Parse and Correlate Software relates, and the version of the DUIS XML Schema which that version of the DCC User Interface Specification contains;

(iii) the version(s) of the Message Mapping Catalogue to which that version of the Parse and Correlate Software relates;

(iv) the version(s) of the GBCS to which that version of the Parse and Correlate Software relates.

A3.39 The Code Administrator shall:

(a) maintain the Parse and Correlate Applicability Matrix to ensure that it remains accurate and up-to-date;

(b) ensure that the latest version of the Parse and Correlate Applicability Matrix is published and available on the Website.

A3.40 The DCC shall ensure that the Code Administrator is provided with such information as it requires for the purpose of complying with Section A3.39.

Interpretation

A3.41 References in this Section A3 to amendments of a Technical Specification which do (or do not) require changes to be made to any Device or apparatus which is already installed shall be interpreted as references to the effect of those amendments on the duties of:

(a) Electricity and Gas Supplier Parties in accordance with the standard conditions of the Energy Supply Licences; and

(b) the DCC in accordance with the conditions of the DCC Licence.

A3.42 Where:

(a) any provision of this Code relates to a Device or any communication to or from a Device; and

(b) the application of that provision requires that reference is made to a Version of a Technical Specification,

the Version of that Technical Specification which shall be treated as applicable for that purpose shall be the one identified as pertaining to the Device Model of that Device in the Central Products List.

A3.43 The references in this Code to 'Technical Specifications' shall be deemed not to include reference to Versions of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1, except in the following provisions:

(a) the definitions of 'Principal Version', 'Sub-Version' and 'Version' in Section A1 (Definitions);

(b) Sections A2 (Interpretation), A3 (Technical Specifications, the GB Companion Specification and the CPA Security Characteristics); and A4 (Derogation from SMETS1 Generation Installation End Date); and

(c) Section N (SMETS1 Meters).

A4. DEROGATION FROM GENERAL INSTALLATION END DATE

Introduction

A4.1 This Section A4 makes provision for the Secretary of State to grant to any Supplier Party, on the application of that Party, a derogation from the General Installation End Date applicable to any Version of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1.

Part A. Derogations

A4.2 For the purposes of this Section A4, a "Derogation" means a direction issued by the Secretary of State:

(a) to the Supplier Party which applied for it;

(b) in respect of a Version of the ESMETS, the GSMETS and the IHDTS with a Principal Version number of 1;

(c) specifying a date subsequent to the General Installation End Date in respect of that Version of the ESMETS, the GSMETS and the IHDTS (the "**Alternative Installation End Date**"), which will constitute the Installation End Date, in those cases which the PPM Installation End Date does not apply, for the purposes of the installation or provision of Devices or apparatus by or on behalf of the Supplier Party in accordance with any conditions of the Derogation;

(d) specifying any such conditions to which the Derogation is subject.

Part B. Power to Grant a Derogation

A4.3 The Secretary of State may grant a Derogation to any Supplier Party where:

(a) that Supplier Party has applied for a Derogation in accordance with Part D;

(b) that application complies with any requirements as to form or content set out in a statement issued in accordance with Part E;

(c) in the opinion of the Secretary of State, that application satisfies any criteria set out in a statement issued in accordance with Part E; and

(d) the Supplier Party has complied with all such other requirements as may apply to it in accordance with Part E.

Part C. Conditions of a Derogation

A4.4 A Derogation may be subject to such conditions (if any) as the Secretary of State thinks reasonable in all the circumstances of the case.

A4.5 The conditions to which a Derogation is subject may in particular include conditions which, in respect of the period that begins immediately after the General Installation End Date and ends on the Alternative

Installation End Date of the Version of the ESMETS, the GSMETS and the IHDTS to which the Derogation relates:

(a) place a limit on the quantity of Devices or apparatus which may be installed or provided by or on behalf of the Supplier Party to which the Derogation is granted;

(b) restrict the type of Devices or apparatus that may be installed or provided by or on behalf of that Supplier Party;

(c) make provision as to the circumstances in, or premises at, which such Devices or apparatus may be installed or provided by or on behalf of that Supplier Party;

(d) place requirements on that Supplier Party to take, or refrain from taking, any specified action in relation to the installation or provision of any Devices or apparatus.

Part D. Applications for a Derogation

A4.6 Any Supplier Party may apply to the Secretary of State for a Derogation.

A4.7 The Secretary of State may determine, and in that case shall give all Supplier Parties a notice of, a date by which any application for a Derogation must be received by him.

A4.8 A Supplier Party may not apply for a Derogation after any date that is determined and included in a notice given in accordance with Section A4.7.

Part E. Statement of Requirements

A4.9 The Secretary of State may determine, and publish a statement of:

(a) the criteria against which any application for a Derogation is to be assessed by him;

(b) any requirements as to the form and content of any such application;

(c) any information or evidence which must be provided by a Supplier Party on making such an application;

(d) any timetable which applies to steps to be taken by the Supplier Party or by the Secretary of State in respect of such an application;

(e) such other matters which relate to the making of any such application or to the process for assessing it as the Secretary of State may consider appropriate;

(f) such matters which relate to the decision whether to grant a Derogation on the receipt of an application, or to the conditions to be applied to that Derogation, as the Secretary of State may consider appropriate.

A4.10 A Supplier Party which applies for a Derogation shall:

(a) comply with any requirements applicable to it which are set out in a statement published in accordance with Section A4.9; and

(b) provide to the Secretary of State, by such time and in such form as he may reasonably specify in a notice given to that Supplier Party, such additional information or evidence as he may at any time reasonably require for the purpose of assessing the application.

Part F. Actions before this Section Comes into Force

A4.11 Where, prior to the coming into effect of this Section A4:

(a) a Supplier Party makes any application:

(i) that it would be entitled to make under this Section A4 after it has come into force; and

(ii) in respect of that application, has complied with the requirements of this Section A4 as if they had already come into force;

(b) the secretary of state takes any action that he would be entitled to take under this section A4 after it has come into force,

each of those sections shall be treated as actions taken and having effect under this Section A4 after it comes into force.

Part G. Amendments after this Section Comes into Force

A4.12 Where the Secretary of State has determined, and given all Supplier Parties notice of, a date in accordance with Section A4.7, he may subsequently (whether before or after that date has passed) determine and give all Supplier Parties notice of a later date.

A4.13 Any date determined and included in a notice given in accordance with Section A4.12 shall have effect for the purposes of Section A4.7 in replacement for the date that was previously determined by the Secretary of State.

A4.14 The Secretary of State may at any time:

(a) amend any statement published in accordance with Section A4.9, in which case the amended statement shall have effect for the purposes of Section A4.10 in replacement for the one that was previously published;

(b) in respect of the Derogation granted to any Supplier Party, vary:

(i) the Alternative Installation End Date, by specifying a date later than that previously specified;

(ii) any conditions to which the Derogation is subject, by imposing new or amended conditions.

A4.15 The Secretary of State may exercise the powers set out at Sections A4.12 and A4.14 on more than one occasion.

Part H. Revocation of Derogations

A4.16 The Secretary of State may at any time, by notice to the Supplier Party to which it was granted, revoke any Derogation granted by him in accordance with this Section A4.

Part I. Effect of a Derogation

A4.17 Where a Derogation is granted to a Supplier Party in accordance with this Section A4 and has not been revoked, then:

(a) for the purposes of the installation or provision by or on behalf of that Supplier Party of any Device or apparatus; and

(b) in so far as any conditions of that Derogation are satisfied, the Alternative Installation End Date specified in the Derogation shall have effect in accordance with Section A3.15 (The Installation End Date).

Part J. Publication of Derogations

A4.18 Where the Code Administrator is provided by the Secretary of State with a copy of a Derogation that has been granted by him to a Supplier Party, it shall:

(a) maintain a copy of that Derogation on the Website;

(b) if it is notified by the Secretary of State that the Derogation has been amended and provided by him with a copy of the amended Derogation, publish and maintain a copy of that amended Derogation on the Website;

(c) if it is notified by the Secretary of State that the Derogation has been revoked, publish on the Website, together with that Derogation, a statement of the fact that it has been revoked and the date of its revocation.

A4.19 For the purposes of Section A4.18, any reference to a copy of a Derogation provided to the Code Administrator by the Secretary of State shall, where that copy has been redacted by the Secretary of State to exclude any commercially sensitive information, be treated as a reference to the copy of that Derogation in its redacted form.

B ACCESSION

B1. ACCESSION

Eligibility for Admission

B1.1 Any person who applies to be admitted as a Party (an **Applicant**) shall be entitled to be admitted as a Party, subject to and in accordance with the provisions of this Section B1.

B1.2 An Applicant may not be admitted as a Party if:

(a) it is already a Party; or

(b) it was expelled from this Code in accordance with Section M8 (Suspension, Expulsion and Withdrawal) within the 12 months preceding the date of its application (or such shorter period as the Panel may determine from time to time).

Application Form and Guidance

B1.3 The Code Administrator shall create an Application Form, and publish such form on the Website.

B1.4 The Code Administrator shall establish and publish on the Website a guide for Applicants describing, and providing guidance in respect of, the process set out in this Section B1 (the **Application Guidance**).

Application Fee

B1.5 The Panel shall determine (and publish on the Website) a fee from time to time (the **Application Fee**) to be payable by Applicants to SECCo. The Panel shall set the Application Fee at a level intended to recover the reasonable costs incurred by or on behalf of the Panel (including amounts payable to the Code Administrator) in administering the process set out in this Section B1.

B1.6 The Code Administrator shall include within the Application Guidance details of the methods by which the Application Fee may be paid.

Accession Process

B1.7 An Applicant shall submit to the Code Administrator a duly completed Application Form (together with any supporting documents required by that form), and the Application Fee (by a method of payment provided for in the Application Guidance).

B1.8 As soon as reasonably practicable following receipt of an Application Form and the Application Fee from an Applicant, the Code Administrator shall:

(a) notify the Applicant if it is ineligible to be admitted as a Party in accordance with Section B1.2;

(b) where the Applicant is not ineligible, check that the Application Form has been duly completed and that any supporting documentation requested has been provided, and notify the Applicant of any omissions; and

(c) where there are no such omissions, notify the Applicant and the Panel that the Applicant is to be admitted as a Party subject to execution of an Accession Agreement.

Accession Agreement

B1.9 Where an Applicant is to be admitted as a Party in accordance with Section B1.8(c), the Code Administrator shall prepare two counterparts of the Accession Agreement for the Applicant (in substantially the form of the Specimen Accession Agreement), and send them to the Applicant.

B1.10 An Applicant that wishes to proceed with its accession to this Code should sign (but not date) both counterparts of the Accession Agreement, and return them to the Code Administrator.

B1.11 Upon return to the Code Administrator of the two counterparts of the Accession Agreement as envisaged by Section B1.10, the Panel shall procure that (as soon as reasonably practicable thereafter) SECCo:

(a) signs each counterpart on behalf of itself and all the Parties (as it is authorised to do under Section B1.14); and

(b) dates each counterpart with the date of such execution.

B1.12 The Code Administrator shall return one signed and dated counterpart of the Accession Agreement to the Applicant, and retain the other counterpart for the Panel's records.

Accession

B1.13 An Applicant will accede to this Code and become a Party with effect from the date of its executed Accession Agreement. The Code Administrator shall give notice of each Applicant's accession to the Applicant, to each other Party and to the Authority. Such notice will confirm the Applicant's Party Details.

SECCo Authority to enter into Accession Agreements

B1.14 Subject to and in accordance with this Section B1, each Party hereby irrevocably and unconditionally authorises SECCo to execute and deliver, on behalf of such Party, any and all Accession Agreements that are substantially in the form of the Specimen Accession Agreement and that have been signed by an Applicant.

Disputes Regarding Admission

B1.15 Where an Applicant disagrees with any decision of the Code Administrator pursuant to Section B1.8, the Applicant may refer the matter to the Panel for determination.

B1.16 Where an Applicant disagrees with any decision of the Panel made pursuant to Section B1.15, the Applicant may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

Party Signifiers

B1.17 On an Applicant acceding to this Code and becoming a Party, the Panel shall as soon as reasonably practicable thereafter issue to it a Party Signifier.

B1.18 The Code Administrator shall notify the DCC of each Party Signifier issued to a Party in accordance with Section B1.17.

RDP Signifiers

B1.19 The Panel shall issue to a Registration Data Provider (other than a Gas Network Party or Electricity Network Party which is deemed to be an RDP, acting in its capacity as such) an RDP Signifier:

(a) as soon as reasonably practicable after receipt of a request from that RDP for it to do so; or

(b) in any event prior to issuing an RDP ID, following receipt of an application from that RDP for it to do so.

B1.20 The Code Administrator shall notify the DCC of each RDP Signifier issued to an RDP in accordance with Section B1.19.

Market Participant Identifiers

B1.21 The following shall apply in respect of the Market Participant Identifiers:

(a) the Panel shall, as soon as reasonably practicable after a person becomes a Party, notify the DCC of the Market Participant Identifiers (if any) by which such person is identified under the UNC and/or BSC, as set out in the Party Details contained in the relevant Accession Agreement;

(b) the Panel shall, as soon as reasonably practicable after a Party notifies any change or addition to such unique identifiers under Section M6 (Party Details), or the Panel otherwise becoming aware of any such change or addition, notify the DCC of such change or addition; and

(c) the DCC shall use the information provided to it under this Section B1.21 to interpret the Registration Data and identify eligibility for Services; subject to Section L16.9 (Supplier of Last Resort).

SECCo

B1.22 The provisions of Sections B1.17 and B1.18 (Party Signifiers) shall apply to SECCo as if it was a Party and as if it had been an Applicant.

B2. DCC, USER AND RDP IDENTIFIERS

Panel: Duty to Obtain MA-S Registry Entries

B2.1 The Panel shall obtain one or more MA-S Registry Entries to the extent necessary for the purpose of establishing and issuing EUI-64 Compliant identifiers for use as User IDs, RDP IDs and/or DCC IDs in accordance with the provisions of this Section B2.

ID Allocation Procedure

B2.2 The Panel shall develop and maintain a document to be known as the "**ID Allocation Procedure**", which shall:

(a) make provision for the Panel to establish and issue Party and RDP Signifiers, each of which must be unique under this Code but which need not be EUI-64 Compliant;

(b) make provision for the Panel to establish EUI-64 Compliant identifiers by the concatenation of:

(i) the assigned value of an MA-S Registry Entry obtained by it; and

(ii) a unique extension identifier created by it;

(c) describe the numbering convention to be used by the Panel for the purpose of creating those unique extension identifiers;

(d) set out the application procedure to be followed by any Party which wishes to be issued with an EUI-64 Compliant identifier for use as a User ID or DCC ID, or by any RDP which wishes to be issued with an EUI-64 Compliant identifier for use as an RDP ID; and

(e) set out the procedure to be followed by the Panel in issuing an EUI-64 Compliant identifier to any Party or RDP for such purposes.

B2.3 In developing the ID Allocation Procedure, the Panel shall act in conjunction with the DCC and such other Parties and RDPs as have indicated a wish to be involved, and shall consult with and have regard to the views of all Parties and RDPs.

B2.4 The Panel shall keep the ID Allocation Procedure under review from time to time, and in particular when requested to do so by any Party or RDP, in order to ensure that it remains fit for purpose. Before making any change to the ID Allocation Procedure the Panel shall consult with and have regard to the views of all Parties and RDPs.

Issue of DCC, User and RDP IDs

B2.5 Where:

(a) the DCC wishes to be issued with an EUI-64 Compliant identifier for use as a DCC ID;

(b) another Party wishes to be issued with an EUI-64 Compliant identifier for use as a User ID; or

(c) an RDP wishes to be issued with an EUI-64 Compliant identifier for use as an RDP ID,

it shall, in accordance with the provisions of the ID Allocation Procedure, apply to the Panel for the issue of that identifier.

B2.6 No Party or RDP may apply to the Panel for the issue of an EUI-64 Compliant identifier other than for one of the purposes specified in Section B2.5.

B2.7 On receiving an application from a Party or RDP in accordance with Section B2.5, the Panel shall issue an EUI-64 Compliant identifier in accordance with the provisions of the ID Allocation Procedure.

Issue of Party and RDP Signifiers

B2.8 The Panel shall issue Party and RDP Signifiers to the Code Administrator from time to time, in accordance with the provisions of the ID Allocation Procedure, for their allocation by the Code

Administrator to new Parties pursuant to Section B1.17 (Party Signifiers) and to RDPs pursuant to Section B1.19 (RDP Signifiers).

Record of Signifiers and IDs Issued

B2.9 The Panel shall:

(a) maintain an up to date record of the Party and RDP Signifiers and the EUI-64 Compliant identifiers issued by it pursuant to this Section B2 (and, where applicable, the mapping between them), and make that record available to all Parties and RDPs; and

(b) notify the DCC of any EUI-64 Compliant identifier that it has issued to:

(i) a Party for use as a User ID and the corresponding Party Signifier of that Party; or

(ii) an RDP for use as an RDP ID and the corresponding RDP Signifier of that RDP.

Network Party Subscriber Obligation

B2.10 Each Electricity Network Party shall, as soon as reasonably practicable after its accession to this Code, ensure that it becomes a Subscriber for those Organisation Certificates which pertain to it and that are required by Responsible Suppliers for the purposes of complying with their obligations under Clause 5 (Post-Commissioning Obligations in Relation to SMETS2+ Devices) and Clause 6 (Post Commissioning Obligations in Relation to SMETS1 Devices) of the Inventory Enrolment and Decommissioning Procedures.

B2.11 No Gas Network Party shall become a Subscriber for Organisation Certificates unless it also intends to become a User.

C GOVERNANCE

C1. SEC OBJECTIVES

General SEC Objectives

C1.1 The objectives of this Code otherwise than in respect of the Charging Methodology are set out in Condition 22 of the DCC Licence (such objectives being the **General SEC Objectives**). For ease of reference, the General SEC Objectives are set out below using the terminology of this Code (but in the case of any inconsistency with the DCC Licence, the DCC Licence shall prevail):

(a) the first General SEC Objective is to facilitate the efficient provision, installation, and operation, as well as interoperability, of Smart Metering Systems at Energy Consumers' premises within Great Britain;

(b) the second General SEC Objective is to enable the DCC to comply at all times with the General Objectives of the DCC (as defined in the DCC Licence), and to efficiently discharge the other obligations imposed upon it by the DCC Licence;

(c) the third General SEC Objective is to facilitate Energy Consumers' management of their use of electricity and gas through the provision to them of appropriate information by means of Smart Metering Systems;

(d) the fourth General SEC Objective is to facilitate effective competition between persons engaged in, or in Commercial Activities connected with, the Supply of Energy;

(e) the fifth General SEC Objective is to facilitate such innovation in the design and operation of Energy Networks (as defined in the DCC Licence) as will best contribute to the delivery of a secure and sustainable Supply of Energy;

(f) the sixth General SEC Objective is to ensure the protection of Data and the security of Data and Systems in the operation of this Code;

(g) the seventh General SEC Objective is to facilitate the efficient and transparent administration and implementation of this Code; and

(h) the eighth General SEC Objective is to facilitate the establishment and operation of the Alt HAN Arrangements.

Transition Objective

C1.2 As provided for in Condition 22 of the DCC Licence, during the period prior to the Completion of Implementation, the General SEC Objectives must be read and given effect (so far as it is possible to do so) in a way that is compatible with achieving the Transition Objective.

Charging Objectives

C1.3 The objectives of this Code in respect of the Charging Methodology only (such objectives being the Charging Objectives) comprise the "First Relevant Policy Objective", the "Second Relevant Policy Objective" and the "Third Relevant Policy Objective" as set out in Condition 18 of the DCC Licence. For ease of reference, the First Relevant Policy Objective, the Second Relevant Policy Objective and the Third

Relevant Policy Objective are set out in Sections C1.4, C1.5 and C1.6 using the terminology of this Code (but in the case of any inconsistency with the DCC Licence, the DCC Licence shall prevail).

C1.4 The First Relevant Policy Objective:

(a) applies in respect of Charges (other than Charges for Elective Communications Services); and

(b) requires the Charging Methodology to ensure that such Charges do not distinguish (whether directly or indirectly):

(i) between Energy Consumers at Domestic Premises in different parts of Great Britain; or

(ii) between Energy Consumers at Designated Premises in different parts of Great Britain.

C1.5 The Second Relevant Policy Objective applies in relation to SMETS1 Meters. The Second Relevant Policy Objective is that, subject to compliance with the First Relevant Policy Objective, the Charging Methodology must (other than in respect of Elective Communication Services) (in each of the following cases, as far as is reasonably practicable in all of the circumstances of the case, having regard to the costs of implementing the Charging Methodology):

(a) result in Charges that are the same for SMETS1 Meters as they are for Smart Metering Systems, save that no Charges for Communications Hub Services will apply to SMETS1 Meters;

(b) notwithstanding (a) above (where the Costs of Communications for a SMETS1 Meter exceeds the Costs of Communications for a Smart Metering System, and where an Original Supplier for the Energy Supplier Contract relating to that SMETS1 Meter is (and has at all times since the adoption of the Energy Supplier Contract been) a supplier of electricity and/or gas to the premises at which that SMETS1 Meter is installed), result in Charges that ensure that the excess Costs of Communications are recovered from the Original Supplier from time to time (in addition to the Charges referred to in (a) above),

and, for the purposes of this Section C1.5, the terms "**SMETS1 Meters**", "**Costs of Communications**", "**Original Supplier**" and "**Energy Supplier Contract**" shall have the meaning given to those terms in the DCC Licence.

C1.6 The Third Relevant Policy Objective is that, subject to compliance with the First and Second Relevant Policy Objectives, the Charging Methodology must result in Charges that:

(a) facilitate effective competition in the Supply of Energy (or its use) under the Electricity Act and the Gas Act;

(b) do not restrict, distort, or prevent competition in Commercial Activities that are connected with the Supply of Energy under the Electricity Act and the Gas Act;

(c) do not deter the full and timely installation by Energy Suppliers of Smart Metering Systems at Energy Consumers' premises in accordance with their obligations under the Energy Supply Licence; and

(d) do not unduly discriminate in their application and are reflective of the costs incurred by the DCC, as far as is reasonably practicable in all of the circumstances of the case, having regard to the costs of implementing the Charging Methodology.

C1.7 The Charging Methodology will achieve the Third Relevant Policy Objective if it is compliant with the provisions of Section C1.6 in the round, weighing them as appropriate in each particular case.

C2. PANEL

Establishment of the Panel

C2.1 The Panel is hereby established. The Panel shall:

(a) pursue the objectives, undertake the duties, and have the powers, set out in Sections C2.2 to C2.4;

(b) be composed of the Panel Members described in Section C3 (Panel Members), some of whom will be elected in accordance with Section C4 (Elected Members); and

(c) conduct its activities in accordance with the procedures set out in Section C5 (Proceedings of the Panel).

Panel Objectives

C2.2 The Panel shall, in all its activities, always act in a manner designed to achieve the following objectives (the **Panel Objectives**):

(a) that this Code is given full and prompt effect in accordance with its terms and conditions;

(b) that this Code is given effect in such a manner as will facilitate achievement of the SEC Objectives;

(c) that this Code is given effect in a fair manner without undue discrimination between the Parties or any classes of Party; and

(d) that the Panel conducts its affairs in an open and transparent manner.

Panel Duties

C2.3 Without prejudice to any other tasks, duties or obligations imposed on the Panel in this Code, the Panel shall, subject to and in accordance with the other provisions of this Code:

(a) oversee the process by which Applicants apply to become a Party, as set out in Section B (Accession);

(b) manage the Code Administrator and Secretariat, and oversee their performance;

(c) develop, consult upon, and report upon its performance against three-year budgets and work plans in accordance with Section C8 (Panel Costs and Budgets);

(d) oversee and co-ordinate the process for assessing Draft Proposals and Modification Proposals, and implement successful Modification Proposals, each as set out in Section D (Modification Process);

(e) manage and co-ordinate arrangements for the resolution of certain Disputes under or in relation to this Code, as set out in Section M7.3 (Reference to the Panel or its Sub-Committees);

(f) manage and co-ordinate the suspension of Parties' rights under this Code, as set out in Section M8 (Suspension, Expulsion and Withdrawal);

(g) manage and co-ordinate the withdrawal or expulsion of Parties from this Code, as set out in Section M8 (Suspension, Expulsion and Withdrawal);

(h) by no later than 30 Working Days following the end of each Regulatory Year prepare and publish a report on the implementation of this Code and the activities of the Panel during that Regulatory Year, including so as to evaluate whether this Code continues to meet the SEC Objectives (and in respect of the Alt HAN Arrangements the Panel shall be entitled to rely on and report any information provided to it by the Alt HAN Forum for that purpose);

(i) at the written request of the Authority at any time, undertake a review of such parts of this Code as the Authority may specify to evaluate whether this Code continues to meet the SEC Objectives;

(j) at the written request of the Authority, collect and provide to the Authority (or publish in such manner as the Authority may direct) such information regarding the SEC Arrangements as the Authority may reasonably request (and each Party shall provide to the Panel such information as the Panel reasonably requires in order to enable the Panel to comply with any such request of the Authority);

(k) hold a general meeting during the month of July each year, which each Panel Member will (subject to unforeseen circumstances) attend, at which a representative of each Party shall be entitled to attend and speak, and at which the Panel will endeavour to answer any reasonable questions submitted to the Secretariat in advance of the meeting;

(l) establish (and, where appropriate, revise from time to time) joint working arrangements with the panels, committees and administrators responsible for the governance and operation of other Energy Codes, in order to facilitate the timely:

    (i) identification, co-ordination, making and implementation of changes to other Energy Codes consequent on a Draft Proposal or Modification Proposal (and vice versa); and

    (ii) identification and coordinated resolution of Disputes and disputes under other Energy Codes (in circumstances where there is an interaction between the Dispute and one or more disputes under the other Energy Codes);

(m) establish joint working arrangements with the Information Commissioner pursuant to which the Panel shall notify the Information Commissioner of matters in which the Panel believes the Information Commissioner may have an interest; and

(n) periodically commission a review of the effectiveness of the End-to-End Technical Architecture and the Business Architecture by the Technical Architecture and Business Architecture Sub-Committee, as further described in Section F1 (Technical Architecture and Business Architecture Sub-Committee).

Panel Powers

C2.4 Without prejudice to any other rights or powers granted to the Panel in this Code, the Panel shall, subject to and in accordance with the other provisions of this Code, have the power to:

(a) appoint and remove the Code Administrator and the Secretariat in accordance with Section C7 (Code Administrator, Secretariat and SECCo);

(b) appoint and remove professional advisers;

(c) consider, approve and authorise the entering into by SECCo of contracts in accordance with Section C7 (Code Administrator, Secretariat and SECCo);

(d) constitute Sub-Committees in accordance with Section C6 (Sub-Committees);

(e) consider, approve and authorise the licensing, sub-licensing, or any other manner of dealing with the Intellectual Property Rights in the SEC Materials, for any use which does not hinder, delay or frustrate, in any way whatsoever, the SEC Objectives;

(f) direct SECCo to become a Subscriber for IKI Certificates, on behalf of the Panel and for the purpose of Digitally Signing the Central Products List; and

(g) do anything necessary for, or reasonably incidental to, the discharge of its duties under this Code.

C3. PANEL MEMBERS

Panel Composition

C3.1 The Panel shall be composed of the following categories of persons (each a **Panel Member**, and the Panel Members referred to in Sections C3.1(a) to (e) being the **Elected Members**):

(a) two persons elected by the Large Supplier Parties;

(b) two persons elected by the Small Supplier Parties;

(c) one person elected by the Electricity Network Parties;

(d) one person elected by the Gas Network Parties;

(e) two persons elected by the Other SEC Parties;

(f) one person nominated by the DCC in accordance with Section C3.3 (the **DCC Member**);

(g) two persons nominated in accordance with Section C3.4 (the **Consumer Members**);

(h) one person appointed in accordance with Section C3.5 (the **Panel Chair**); and

(i) any additional person appointed by the Panel Chair in accordance with Section C3.6.

C3.2 Each Panel Member must be an individual (and cannot be a body corporate, association or partnership). No one person can hold more than one office as a Panel Member.

DCC Member

C3.3 The DCC Member shall be one person nominated by the DCC by notice to the Secretariat. The DCC may replace such person from time to time by prior notice to the Secretariat.

Consumer Members

C3.4 The Consumer Members shall be two persons nominated by Citizens Advice or Citizens Advice Scotland by notice to the Secretariat from time to time. Citizens Advice or Citizens Advice Scotland may replace each such person from time to time by prior notice to the Secretariat.

Appointment of the Panel Chair

C3.5 The Panel Chair shall be appointed in accordance with such process as the Panel may determine, as modified from time to time by the Panel; provided that such process as modified must be designed to ensure that:

(a) the candidate selected is sufficiently independent of any particular Party or class of Parties;

(b) the appointment is conditional on the Authority approving the candidate;

(c) the Panel Chair is appointed for a three-year term (following which he or she can apply to be re-appointed);

(d) the Panel Chair is remunerated at a reasonable rate;

(e) the Panel Chair's appointment is subject to Section C3.8 and terms equivalent to those set out in Section C4.6 (Removal of Elected Members); and

(f) provision is made for the Panel Chair to continue in office for a reasonable period following the end of his or her term of office in the event of any delay in appointing his or her successor.

Panel Chair Appointee

C3.6 Where at any time:

(a) no person is currently appointed as a Panel Member pursuant to this Section C3.6; and

(b) the Panel Chair (having consulted with the other Panel Members) considers that there is a class or category of person having an interest in the SEC Arrangements whose interests are not adequately represented in the composition of the Panel at that time, and whose interests would be better represented if a particular person were appointed as an additional Panel Member,

the Panel Chair may (having consulted with the other Panel Members) appoint that particular person as a Panel Member by notice to the Secretariat. The Panel Chair may (having consulted with the other Panel Members), at any time thereafter by notice to the Secretariat, remove that person from the office of Panel Member.

Duties of Panel Members

C3.7 A person appointed as Panel Member, when acting in that capacity, shall:

(a) act independently, not as a delegate, and without undue regard to the interests, of any Related Person;

(b) exercise reasonable skill and care to the standard reasonably expected of a director of a company under the Companies Act 2006; and

(c) act in a manner designed to facilitate the performance by the Panel of its duties under this Code.

Panel Member Confirmation

C3.8 Each Panel Member must confirm in writing to SECCo (for the benefit of SECCo and each Party) that that person:

(a) agrees to act as a Panel Member in accordance with this Code, including the requirements of Section C3.7; and

(b) agrees to accept appointment as a director of SECCo, and to act in such capacity in accordance with this Code; and

(c) will be available as reasonably required throughout his or her term of office, both to attend Panel meetings and to undertake work outside those meetings as may reasonably be required,

and must further complete any and all forms required to be completed by law in order for that person to become a director of SECCo.

C3.9 The appointment of a person who would otherwise be a Panel Member shall lapse (and the relevant office shall become vacant) if that person does not comply with the requirements of Section C3.8 within 20 Working Days after a request from the Secretariat to do so.

Notification of Related Persons

C3.10 Each Panel Member shall, at the time of his appointment and upon any relevant change in circumstance, disclose, in writing to the Panel, the name of each Related Person who is a Party, a DCC Service Provider or is otherwise likely to be materially affected by the SEC Arrangements (other than in the capacity of Energy Consumer).

C3.11 Without prejudice to the generality of Section C3.10, where a Panel Member changes employer, the Panel Member shall (as soon as reasonably practicable after such change) notify the Secretariat of such change in writing. The Secretariat shall then notify the Parties of such change in employer.

Protections for Panel Members and Others

C3.12 SECCo shall indemnify, and keep indemnified:

(a) each Panel Member (whether as a Panel Member or as a director of SECCo);

(b) each Reserve (whether acting as an Alternate or otherwise);

(c) each person who serves on a Sub-Committee or Working Group; and

(d) each Party, or an Affiliate of a Party, as employer of any person referred to in Sections C3.12(a) to (c),

from and against any and all costs (including legal costs), charges, expenses, damages or other liabilities properly incurred or suffered by that person or employer in relation to the exercise of the person's powers duties or responsibilities under this Code, including where such powers duties or responsibilities are exercised negligently. The persons and employers shall be entitled to enforce their rights under this Section C3.12 pursuant to Section M11.5 (Third Party Rights).

C3.13 The indemnity set out in Section C3.12 shall not apply to any costs, charges, expenses, damages or other liabilities that are:

(a) costs and expenses expressly stated to be incapable of recovery by the Panel under Section C8 (Panel Costs and Budgets); or

(b) suffered or incurred or occasioned by the wilful default, fraud or bad faith of the relevant person.

C4. ELECTED MEMBERS

Elected Members

C4.1 The Elected Members shall be elected in accordance with the process set out in Section C4.2. Each Elected Member shall serve as a Panel Member until his or her retirement in accordance with Section C4.4, or until he or she is removed from office in accordance with Section C3.9, C4.5 or C4.6.

Election of Elected Members

C4.2 The process set out in this Section C4.2 shall apply in respect of the election of each Elected Member. This process shall apply in respect of Elected Member vacancies arising by virtue of a Panel Member's retirement in accordance with Section C4.4 (a **Scheduled Election**), or a Panel Member being removed from office in accordance with Section C3.9, C4.5 or C4.6 (an **Interim Election**). In each case, the following process shall apply:

(a) each Elected Member is to be elected by a Party Category as described in Section C3.1;

(b) each Voting Group within a Party Category is entitled to cast one vote in the election of the Panel Member(s) to be elected by that Party Category;

(c) the Secretariat shall publish on the Website and send to each Party within the relevant Party Category an invitation for nominations for candidates for the role of Elected Member for that Party Category;

(d) in the case of Scheduled Elections, the invitation for nomination of candidates shall be published and sent by the Secretariat at least 35 Working Days ahead of the date on which the relevant Panel Member's term of office expires;

(e) in the case of Interim Elections, the invitation for nomination of candidates shall be published and sent by the Secretariat by no later than 5 Working Days after the date on which the relevant Panel Member was removed from office;

(f) the invitation for nomination of candidates shall request nominations within 15 Working Days after the date of the invitation;

(g) the eligible candidates for election shall be those persons who are (at the time of their nomination) capable of becoming and remaining Panel Members in accordance with Sections C3.2 and C4.6, and whose nominations (whether nominated by themselves or a third party) are received by the Secretariat within the period of time set out in the request for nominations;

(h) where the Secretariat receives a nomination for a candidate that the Secretariat does not consider to be an eligible candidate in accordance with Section C4.2(g), the Secretariat shall notify that person that this is the case as soon as reasonably practicable after receipt of the nomination (and, in any event, by no later than 2 Working Days following the expiry of the period of time set out in the request for nominations);

(i) where a candidate disputes the Secretariat's notification under Section C4.2(h), the candidate shall have 2 Working Days following receipt of such notification to refer the matter to the Panel Chair for final determination (which determination shall be made by the Panel Chair by no later than 5 Working Days following the expiry of the period of time set out in the request for nominations);

(j) 6 Working Days following the expiry of the period of time set out in the request for nominations, the Secretariat shall give notice to each Party within the relevant Party Category of the names of each eligible candidate (together with any supporting information provided to the Secretariat with his or her nomination);

(k) at the same time as the Secretariat issues such notice, where there are more eligible candidates for a Party Category than there are positions to be filled as Elected Members for that Party Category, the Secretariat shall invite the Voting Groups comprising that Party Category to vote for their preferred eligible candidate;

(l) each such Voting Group shall be entitled to cast one vote, and shall cast such vote by means of a system established by the Panel which ensures that each Voting Group casts only one vote, and which allows 10 Working Days following the invitation pursuant to Section C4.2(k) for such vote to be cast;

(m) the successful candidate or candidates elected as a result of the votes cast in accordance with this Section C4.2 shall be determined in accordance with Section C4.3;

(n) the Secretariat shall not publish details of the votes cast by each Voting Group, but shall disclose such details to the Panel Chair for scrutiny;

(o) as soon as reasonably practicable following the election of an Elected Member in accordance with this Section C4.2, the Secretariat shall publish on the Website and notify each Party of the identity of the person who has been so elected; and

(p) each person elected as a Panel Member in accordance with this Section C4.2 shall commence his or her office as a Panel Member: (i) in the case of Scheduled Elections, simultaneously with the retirement of the relevant Panel Member; or (ii) in the case of Interim Elections, simultaneously with the notification by the Secretariat pursuant to Section C4.2(o).

C4.3 As a result of the process set out in Section C4.2:

(a) where there are the same number of eligible candidates for a Party Category as there are positions to be filled as Elected Members for that Party Category, all of the eligible candidates shall be elected as Elected Members;

(b) where there are more eligible candidates for a Party Category than there are positions to be filled as Elected Members for that Party Category, the eligible candidate(s) that received the most votes in accordance with Section C4.2(l) shall be elected as Elected Members (and, in the case of a tie, the

Secretariat shall determine the Elected Member by drawing lots, to be witnessed by the Panel Chair); or

(c) where there are fewer eligible candidates for a Party Category than there are positions to be filled as Elected Members for that Party Category (including where there are no eligible candidates), the Authority will (at its discretion) be entitled to nominate an Elected Member for that Party Category. Where this Section C4.3(c) applies, the Panel shall be entitled (at any time thereafter) to determine that a further Interim Election should be held in accordance with Section C4.2 in respect of that Party Category.

Retirement of Elected Members

C4.4 Subject to earlier removal from office of an Elected Member in accordance with Section C3.9, C4.5 or C4.6 and without prejudice to his or her ability to stand for re- election, each Elected Member shall retire (at which point his or her office shall become vacant) as follows:

(a) not used;

(b) the Elected Members elected in accordance with this Section C4.2, shall retire two years after the date on which they first took office; and

(c) any Elected Member nominated by the Authority pursuant to Section C4.3(c), shall retire on the Authority determining (at its discretion) that such person should be removed from office, or on the successful election of a replacement Elected Member in an election pursuant to Section C4.3(c).

Removal of Elected Members

C4.5 An Elected Member may:

(a) resign his or her office by 10 Working Days’ notice in writing to the Panel Chair;

(b) be removed from office by the Panel Chair on notice to the Panel if the Elected Member fails to attend (either in person or via his or her Alternate) at least 50% of the Panel meetings held in any period of 12 months; or

(c) be removed from office by the other Panel Members (acting unanimously) if such other Panel Members consider that the Elected Member is in breach of the confirmation given by that Elected Member pursuant to Section C3.8 (Panel Member Confirmation).

C4.6 An Elected Member shall automatically be removed from office if he or she:

(a) dies;

(b) is admitted to hospital in pursuance of an application under the Mental Health Act 1983 or the Mental Health (Care and Treatment) (Scotland) Act 2003, or an order is made by a court with competent jurisdiction in matters concerning mental disorder for his detention or for the appointment of a receiver, curator bonis or other person with respect to his property or affairs;

(c) becomes bankrupt or makes any arrangement or composition with his creditors;

(d) becomes prohibited by law from being a director of a company under the Companies Act 2006; and/or

(e) is convicted of an indictable criminal offence.

C5. PROCEEDINGS OF THE PANEL

Meetings of the Panel

C5.1 The Panel shall hold meetings with such frequency as it may determine or the Panel Chair may direct, but in any event shall meet when necessary to meet its responsibilities under Section D (Modification Process) and at least once every two months.

C5.2 The location and timing of each meeting shall be determined by the Panel. Panel Members shall endeavour to attend each meeting in person, but attendance by telephone conference or other technological means shall be permitted (provided that each of the Panel Members attending the meeting acknowledges that he or she can communicate with each other).

C5.3 Subject to the other provisions of this Code, the Panel may regulate the conduct of its meetings as it sees fit.

Quorum

C5.4 No business shall be transacted at any meeting of the Panel unless a quorum is present at that meeting. The quorum for each Panel meeting shall be one half of all Panel Members appointed at the relevant time, at least one of whom must be the Panel Chair.

Meeting Notice and Papers

C5.5 Each meeting that the Panel determines, or the Panel Chair directs, is to be held shall be convened by the Secretariat. Such meeting shall be convened on at least 5 Working Days' advance notice (or such shorter period as the Panel may approve). Such notice must be given to:

(a) the Panel Members (and any appointed Alternates);

(b) each of the persons referred to in Section C5.13;

(c) the Parties; and

(d) any other person that the Panel determines, or the Panel Chair directs, should be invited to the meeting.

C5.6 The notice of each Panel meeting shall contain or be accompanied by the following:

(a) the time, date and location of the meeting;

(b) the arrangements for those wishing to attend the meeting by telephone conference or other technological means; and

(c) an agenda and supporting papers.

C5.7 The accidental omission to give notice of a meeting to, or the non-receipt of notice of a Panel meeting by, a person entitled to receive notice shall not invalidate the proceedings of that meeting.

Panel Chair

C5.8 The Panel Chair shall preside at every meeting of the Panel. If the Panel Chair is unable to attend a Panel meeting, the Panel Chair shall ensure that his or her Alternate attends the meeting as Panel Chair.

C5.9 The Panel Chair shall not be entitled to vote unless there is a deadlock, in which case the Panel Chair shall have the casting vote.

Voting

C5.10 Subject to Section C5.9, each Panel Member shall be entitled to attend, and to speak and vote at, every meeting of the Panel.

C5.11 All decisions of the Panel shall be by resolution. In order for a resolution of the Panel to be passed at a meeting, a simple majority of those Panel Members voting at that meeting must vote in favour of that resolution.

C5.12 A resolution in writing signed by or on behalf of all the Panel Members shall be as valid and effective as if it had been passed at a meeting of the Panel duly convened and held. Such a resolution may be signed in any number of counterparts.

Attendance by other persons

C5.13 One representative from each of the following persons shall be entitled to attend and speak (but not vote) at any meeting of the Panel:

(a) the Secretary of State;

(b) the Authority; and

(c) any other person that the Panel determines, or the Panel Chair directs, should be invited to attend.

C5.14 Any Party shall be entitled to send a representative to attend a Panel meeting provided that Party gives the Secretariat at least 3 Working Days' notice in advance of such meeting (or such shorter period of notice as the Panel Chair may approve). Such a representative shall be entitled to attend and (at the Panel Chair's invitation) speak at (but in no circumstances vote at) the meeting.

C5.15 The Panel Chair may (at his or her discretion on grounds of confidentiality) exclude from any part of a Panel meeting persons admitted pursuant to Section C5.13(c) or C5.14.

Minutes of Panel Meetings

C5.16 The Secretariat shall, following each Panel meeting (and in any event at or before the next Panel meeting), circulate copies of the minutes of that meeting to each person who was entitled to receive a notice of that meeting. The Panel may determine that certain parts of a meeting are confidential, in which case those matters will not be included in the minutes circulated to persons other than the Panel, the Secretary of State and the Authority.

C5.17 If any Panel Member disagrees with any item of the minutes, he shall notify the Secretariat of those items with which he or she disagrees, and the Secretariat shall incorporate those items upon which there is disagreement into the agenda for the next following meeting of the Panel.

C5.18 The Secretariat shall maintain a record of all resolutions voted on by the Panel, indicating how each Panel Member voted on each resolution, and shall make such record available on request to any Party.

Alternates

C5.19 Each Panel Member may, from time to time by notice in writing to the Secretariat, appoint another natural person to act as his or her alternate (an **Alternate**). The Panel Chair must appoint a person to act as his or her Alternate.

C5.20 Each such Alternate must, before his or her appointment as such can become valid, have provided the confirmations referred to in Sections C3.8(a) and (c) (Panel Member Confirmation).

C5.21 Where a Panel Member does not attend at a Panel meeting, the Panel Member's Alternate shall be entitled to attend (and count, in his capacity as Alternate, towards the quorum at) that meeting, and to exercise and discharge all the functions, powers and duties of the Panel Member at that meeting.

C5.22 Each Panel Member may, by notice in writing to the Secretariat, remove or replace the person appointed from time to time by that Panel Member as his or her Alternate. An Alternate shall immediately cease to be an Alternate on the occurrence of any of the events set out in Section C4.5 (Removal of Elected Members) in respect of the Alternate. Where an Alternate's appointor ceases to be a Panel Member for any reason, the Alternate's role as such shall also cease.

C5.23 Unless the context otherwise requires, any reference in this Code to a Panel Member shall be construed as including a reference to that Panel Member's Alternate.

Conflicts of interest

C5.24 Given the duty of each Panel Member to act independently, as set out in C3.7 (Duties of the Panel), conflicts of interest should not regularly arise.

C5.25 Notwithstanding Section C5.24, where a decision of the Panel will have particular consequences for a particular Party or class of Parties, each Panel Member shall consider whether that decision presents a conflict of interest (whether because such Party or Parties comprise Related Persons of the Panel Member or otherwise).

C5.26 Where a Panel Member considers that a decision does present a conflict of interest, the Panel Member shall absent him or herself from the Panel meeting for that decision and abstain from the vote regarding that decision. Furthermore, where the Panel Chair considers that a decision does present a conflict of interest for a Panel Member, the Panel Chair may require the Panel Member to absent him or herself from the Panel meeting for that decision and to abstain from the vote regarding that decision.

C6. SUB-COMMITTEES

Sub-Committees

C6.1 The Panel may establish committees (**Sub-Committees**) for the purposes of doing or assisting the Panel in doing anything to be done by the Panel pursuant to this Code. The Panel shall establish those Sub-Committees expressly provided for in this Code.

C6.2 The Panel may establish a Sub-Committee on a standing basis or for a fixed period or a finite purpose.

C6.3 The Panel may decide that any Sub-Committee (other than one whose establishment is expressly provided for in this Code) is to be dissolved. Those Sub-Committees expressly provided for in this Code are to remain established for so long as they are provided for in this Code.

C6.4 Subject to Section C6.5, the Panel may delegate to any Sub-Committee such of the duties, powers and functions of the Panel as the Panel may specify. The Panel shall delegate to any Sub-Committee expressly provided for in this Code all of the duties, powers, and functions of the Panel relating to the functions of that Sub-Committee described in this Code.

Working Groups

C6.5 The Panel may not establish Sub-Committees to undertake the functions expressly reserved to Working Groups under Section D (Modification Process). Working Groups are to be subject to the requirements of Section D6 (Refinement Process), which may impose requirements by reference to this Section C6.

Membership

C6.6 Each Sub-Committee expressly provided for in this Code shall be composed of such persons as are determined in accordance with the provisions of this Code (if any) that prescribe such membership (and otherwise in accordance with Section C6.7).

C6.7 Subject to Section C6.6:

(a) each Sub-Committee shall be composed of such persons of suitable experience and qualifications as the Panel shall decide and as are willing to serve thereon, and which may include any Panel Member;

(b) before establishing each Sub-Committee, the Panel shall invite (by such means as it considers appropriate) applications from individuals who wish to serve on that Sub-Committee;

(c) once a Sub-Committee has been established, the Panel may admit such additional persons to, or remove any person from, that Sub-Committee as the Panel considers appropriate (including on the application of any Party or any member of the Sub-Committee).

C6.8 Each person serving on a Sub-Committee shall, when acting in that capacity:

(a) act independently, not as a delegate, and without undue regard to the interests, of any Related Person; and

(b) act in a manner designed to facilitate the performance by the Panel of its duties under this Code.

Member Confirmation

C6.9 Unless the Panel otherwise directs, a person who is to serve on a Sub-Committee shall not do so unless he or she has first provided a written confirmation to SECCo (for the benefit of SECCo and each Party) that that person:

(a) agrees to serve on the Sub-Committee in accordance with this Code, including the requirements of Section C6.8; and

(b) will be available as reasonably required throughout his or her term of office, both to attend Sub-Committee meetings and to undertake work outside those meetings as may reasonably be required.

Terms of Reference and Procedural Requirements

C6.10 The Panel shall set out in writing the duties, powers, and functions of the Panel that it has delegated to each Sub-Committee. The Panel shall also specify in the same document the terms of reference and procedural rules that are to be followed by the Sub-Committee (which may be revised from time to time by the Panel); provided that, in the case of Sub-Committees expressly provided for in this Code, the Panel must specify terms of reference and procedural rules consistent with the requirements (if any) expressly set out in this Code.

C6.11 Save to the extent otherwise specified by the Panel in accordance with Section C6.10, each Sub-Committee shall conduct its business in accordance with the requirements applying to the Panel in accordance with Section C5 (Proceedings of the Panel).

C6.12 No Sub-Committee may further delegate any of its duties, powers and functions unless expressly authorised to do so by the terms of reference and procedural rules specified in accordance with Section C6.10.

Decisions of Sub-Committees

C6.13 Resolutions of Sub-Committees shall only have binding effect as decisions of the Panel if the Panel has formally delegated the decision-making powers to the Sub- Committee.

C6.14 The Panel shall be deemed to have delegated its decision-making powers to each Sub- Committee expressly provided for in this Code, insofar as such decision-making powers relate to the functions of the Sub-Committee. The delegation of decision- making powers to any other Sub-Committee shall require the unanimous agreement of all Panel Members at the meeting at which the decision to delegate such powers is agreed.

C6.15 For the avoidance of doubt, the delegation to a Sub-Committee of any duties, powers and functions of the Panel shall not relieve the Panel of its general responsibility to ensure that such duties, powers and functions are exercised in accordance with this Code.

C7. CODE ADMINISTRATOR, SECRETARIAT AND SECCO

Code Administrator

C7.1 The Panel may, from time to time, appoint and remove, or make arrangements for the appointment and removal of, one or more persons to be known as the **Code Administrator**.

C7.2 The Code Administrator shall perform those tasks and functions expressly ascribed to it under this Code, and any other tasks and functions as the Panel may assign to the Code Administrator from time to time. In particular, the Code Administrator shall:

(a) comply with the Code Administration Code of Practice and perform its tasks and functions in a manner consistent with the Code Administration Code of Practice Principles (provided that the requirements of this Code shall apply in the event of any inconsistencies between this Code and the requirements of the Code Administration Code of Practice);

(b) in conjunction with the other persons named as code administrators in the Code Administration Code of Practice, review and where appropriate propose to the Authority that amendments be made to the Code Administration Code of Practice (subject always to the Authority's approval of those amendments);

(c) report to the Panel on any inconsistencies between this Code and the requirements of the Code Administration Code of Practice;

(d) support the process by which Applicants apply to become a Party, as set out in Section B (Accession);

(e) support the process for Modifications, as set out in Section D (Modification Process);

(f) facilitate a process whereby Parties can submit a Draft Proposal to the Code Administrator to have that potential variation developed, refined and discussed prior to the Party deciding whether to formally progress this as a Modification Proposal (whether through the Change Board or another forum);

(g) support the process by which Parties become Users, as set out in Section H1 (User Entry Process);

(h) act as a critical friend in providing assistance and support to Parties (and prospective Parties) in relation to the other tasks and functions to be performed by the Code Administrator, with a view to providing particular assistance and support to small Parties and the Consumer Members;

(i) without prejudice to the generality of Section C7.2(i), provide support and assistance to the Proposer of a Draft Proposal, including assistance in understanding this Code so as to properly frame any subsequent Modification Proposal;

(j) advise the Panel (and Sub-Committees and Working Groups) as to, and in respect of, the matters of which it is necessary or appropriate that the Panel (or the Sub-Committee or Working Group) should be aware in order to discharge their functions in accordance with this Code; and

(k) provide or procure such information in connection with the implementation of this Code as the Panel may require.

C7.3 The Panel shall be responsible for ensuring that the Code Administrator undertakes its tasks and functions in respect of this Code. In particular, the Panel shall ensure that the arrangements under which the Code Administrator is appointed oblige the Code Administrator to undertake such tasks and functions on terms no less onerous than those provided for by this Code.

C7.4 Subject to the other requirements of this Section C7, the Code Administrator shall be appointed by the Panel on such terms and conditions and in return for such remuneration as the Panel sees fit.

C7.5 In no event shall the Code Administrator be a Party, an Affiliate of a Party, an employee of a Party, an employee of an Affiliate of a Party, a DCC Service Provider, an Affiliate of a DCC Service Provider, an employee of a DCC Service Provider, or an employee of an Affiliate of a DCC Service Provider.

Secretariat

C7.6 The Panel may, from time to time, appoint and remove, or make arrangements for the appointment and removal of, one or more persons to be known as the **Secretariat**.

C7.7 The Secretariat shall perform those tasks and functions expressly ascribed to it under this Code, and any other tasks and functions as the Panel may assign to the Secretariat from time to time. In particular, the Secretariat shall:

(a) support the election of Elected Members, as set out in Section C4 (Elected Members);

(b) support the proceedings of the Panel (and Sub-Committees and Working Groups), as set out in Section C5 (Proceedings of the Panel);

(c) provide or procure such facilities and services in connection with the operation of the Panel (and Sub-Committees and Working Groups) as the Panel may require;

(d) maintain each Party's Party Details, as set out in Section M6 (Party Details);

(e) procure the creation, hosting and maintenance of the Website; and

(f) make an accurate and up-to-date copy of this Code available on the Website.

C7.8 The Panel shall be responsible for ensuring that the Secretariat undertakes its tasks and functions in respect of this Code. In particular, the Panel shall ensure that the arrangements under which the Secretariat is appointed oblige the Secretariat to undertake such tasks and functions on terms no less onerous than those provided for by this Code.

C7.9 Subject to the other requirements of this Section C7, the Secretariat shall be appointed by the Panel on such terms and conditions and in return for such remuneration as the Panel sees fit.

C7.10 In no event shall the Secretariat be a Party, an Affiliate of a Party, an employee of a Party, an employee of an Affiliate of a Party, a DCC Service Provider, an Affiliate of a DCC Service Provider, an employee of a DCC Service Provider, or an employee of an Affiliate of a DCC Service Provider.

SECCo

C7.11 SECCo shall be established in accordance with Schedule 4.

C7.12 SECCo shall act as a corporate vehicle in relation to the business of the Panel, including:

(a) entering into any contractual arrangements in order to give effect to any resolution of the Panel which it is necessary or desirable to implement by means of a binding contract; and

(b) becoming a Subscriber for IKI Certificates as directed by the Panel for the purpose of exercising any function of the Panel under this Code.

Market-wide Half-Hourly Settlement Implementation

C7.13 SECCo shall (and the Panel shall ensure that SECCo shall) comply with the obligations expressed to apply to SECCo (either specifically or generically as a category of participant) under section C12 (Market-wide Half-Hourly Settlement Implementation) of the Energy Code known as the Balancing and Settlement Code.

C8. PANEL COSTS AND BUDGETS

General

C8.1 The costs and expenses incurred by (or on behalf of) the Panel in exercising its powers and performing its duties in respect of this Code shall be incurred by SECCo, and the DCC shall provide SECCo with the funds necessary to meet such costs and expenses.

SEC Costs and Expenses

C8.2 The costs and expenses capable of recovery under this Section C8 (the **Recoverable Costs**) shall be all the reasonable costs and expenses incurred:

(a) subject to Section C8.3, by the Panel Members in their capacity as such (including in their capacity as directors of SECCo);

(b) subject to Section C8.3, by those serving on Sub-Committees (but not, for the avoidance of doubt, Working Groups) in their capacity as such;

(c) by SECCo under or in connection with this Code; or

(d) by SECCo under or in connection with contracts that SECCo has entered into in accordance with this Code, including the contracts for:

(i) the appointment of the Code Administrator and the Secretariat;

(ii) the appointment of the Panel Chair;

(iii) the appointment of any person serving on a Sub-Committee expressly provided for in this Code where that person is expressly stated to be remunerated; and

(iv) the appointment of advisers,

(in each case) provided that such costs or expenses are provided for in, or otherwise consistent with, an Approved Budget.

C8.3 Subject to the terms of those contracts referred to in Sections C8.2(d):

(a) each Panel Member and each person serving on a Sub-Committee shall be entitled to recover all reasonable travel expenses properly incurred by them in their roles as such (and the Panel shall establish a policy that sets out guidelines regarding what constitutes reasonable travel expenses); and

(b) no Panel Member or person serving on a Sub-Committee shall be entitled to a salary in respect of their role as such, or to any payment in respect of time they incur in their role as such.

Reimbursing Panel Members

C8.4 Where a Panel Member or person serving on a Sub-Committee wishes to recover any Recoverable Costs, he or she shall submit evidence of the Recoverable Costs in question to the Panel (or a named person approved by the Panel) for approval. The cost or expense in question shall only be approved to the extent that it is a Recoverable Cost, and only if the evidence is submitted in a timely manner (and in any event on or before the 20th Working Day following the end of the relevant Regulatory Year). Once approved, the evidence of the Recoverable Cost shall be submitted to SECCo for payment.

C8.5 Within 20 Working Days following receipt of evidence of a Recoverable Cost that has been approved in accordance with Section C8.4, SECCo shall pay the relevant amount to the relevant person.

SEC Costs to be Reimbursed by DCC

C8.6 The Recoverable Costs incurred by SECCo shall be reimbursed to SECCo by the DCC.

C8.7 SECCo may periodically invoice the DCC for the Recoverable Costs incurred, or reasonably expected to be incurred, by SECCo; provided that SECCo shall deduct from such Recoverable Costs amounts that SECCo has received by way of Application Fee payments and any amounts that represent previous overpayments by the DCC (due to the inaccuracy of SECCo estimates, or otherwise).

C8.8 The DCC shall pay each invoice submitted by SECCo in accordance with Section C8.7 within 10 Working Days of receipt of such invoice by the DCC.

C8.9 It is acknowledged that the DCC is entitled to recover amounts paid by it to SECCo in accordance with this Section C8 through the Charges (subject to the requirements of the DCC Licence).

C8.10 In the event that the DCC does not pay SECCo in accordance with Section C8.8, and subject to prior approval from the Authority, SECCo may invoice the Parties who hold Energy Licences for the unpaid amount (and those Parties shall pay the invoiced amounts to SECCo as if they were Charges). Where this Section C8.10 applies, the amount to be paid by each Party shall be determined in accordance with a methodology approved by the Authority, and all amounts paid shall be reimbursed by SECCo to the relevant Party (plus interest at the Non-Default Interest Rate) at such time as the Authority may determine.

Draft Budgets and Work Plans

C8.11 The Panel shall, during January of each year, prepare and circulate to all the Parties a draft budget for the next three Regulatory Years commencing thereafter (a **Draft Budget**).

C8.12 Each Draft Budget shall set out the Panel's good-faith estimate of the Recoverable Costs that it anticipates will be incurred (or committed to) during the relevant Regulatory Years, and shall be accompanied by a detailed work plan showing the activities and projects to which the relevant costs and expenses relate. Each Draft Budget must provide for limits (both individually and in the aggregate) on costs and expenses not expressly provided for in the budget which can be incurred without having to amend the budget.

Approval of Budgets

C8.13 In respect of the Draft Budget circulated in January for the next Regulatory Year commencing thereafter, the Panel shall:

(a) arrange for the circulation to all the Parties of the comments received from the Parties regarding the Draft Budget in the 20 Working Days following its circulation;

(b) consider and respond to those comments, and circulate its responses to all the Parties;

(c) to the extent that it considers it appropriate to do so, amend the Draft Budget and/or the accompanying work plan in the light of those comments;

(d) approve the Draft Budget (subject to any such amendments) and publish that budget and the accompanying work plan on the Website; and

(e) specify a date in such publication (being not less than 15 Working Days following the date of publication) from which such budget will (subject to Section C8.14) become the **Approved Budget** for the relevant Regulatory Year.

Appeal of Budget

C8.14 Each of the Parties or Citizens Advice or Citizens Advice Scotland may appeal to the Authority the Panel's approval of a budget as the Approved Budget for a Regulatory Year. Any such appeal will only be validly made if notified to the Authority within 10 Working Days following the publication of such Draft Budget pursuant to Section C8.13(e), and if copied to the Panel. In the event an appeal is validly made, the Panel shall arrange for a copy of the appeal to be circulated to all the Parties, and:

(a) the Authority may give notice that it dismisses the appeal where it considers that the appeal is trivial or vexatious or has no reasonable prospect of success, in which case the budget approved by the Panel shall remain the Approved Budget; or

(b) the Authority may give notice that it will further consider the appeal, in which case the budget approved by the Panel shall remain the Approved Budget pending and subject to any interim directions issued by the Authority, and:

(i) where the Authority determines that the budget approved by the Panel is consistent with the General SEC Objectives, then such budget shall remain the Approved Budget; or

(ii) where the Authority determines that the budget approved by the Panel is not consistent with the General SEC Objectives, then either (as directed by the Authority):

(A) such budget shall be amended in such manner as the Authority may direct, and such budget as so amended will be Approved Budget; or

(B) the Panel shall produce a further Draft Budget and re- commence the process set out in Section C8.13.

Amendments to Budgets

C8.15 The Approved Budget relating to each Regulatory Year may be amended by the Panel from time to time (whether before during or after that Regulatory Year, and including in respect of Recoverable Costs already incurred), provided that the Panel has first:

(a) circulated and invited comments on the proposed amendments in accordance with Section C8.13 as if it were a Draft Budget; and

(b) circulated and considered any comments received on the proposed amendments within 20 Working Days of such circulation on the same basis as is referred to in Section C8.13.

Reports

C8.16 The Panel shall, as soon as is reasonably practicable following the end of each Regulatory Year, produce and circulate to Parties a report on the costs and expenses incurred (or committed to) during that Regulatory Year and the activities and projects to which those costs and expenses relate.

Audit

C8.17 The Panel shall arrange for the monies paid by and to SECCo pursuant to this Section C8 during each Regulatory Year to be audited by a firm of chartered accountants on an annual basis in order to verify whether the requirements of this Section C8 have been met.

C8.18 The Panel shall send a copy of such auditor’s report to all the Parties within 10 Working Days of its receipt by the Panel.

Contents

D MODIFICATION PROCESS

D1. RAISING DRAFT PROPOSALS

Modifications

D1.1 This Code may only be varied in accordance with the provisions of this Section D.

D1.2 Each variation of this Code must commence with a proposal made in accordance with the provisions of this Section D1 (a **Draft Proposal**) or a direction under Section D9A (Authority-Led Variations).

Persons Entitled to Submit Draft Proposals

D1.3 A Draft Proposal may be submitted by any of the following persons (the **Proposer**):

(a) a Party;

(b) Citizens Advice or Citizens Advice Scotland;

(c) any person or body that may from time to time be designated in writing by the Authority for the purpose of this Section D1.3;

(d) the Authority or the DCC acting at the direction of the Authority, but in each case only in respect of variations to this Code which are in respect of a Significant Code Review;

(e) the Secretary of State or the DCC acting at the direction of the Secretary of State, but in each case only in respect of variations to this Code which are intended to protect the security of the End-to-End Smart Metering System (or any part of the End-to-End Smart Metering System);

(f) the Panel (where all Panel Members at the relevant meeting vote unanimously in favour of doing so), but only in respect of variations to this Code which are intended to give effect to:

(i) recommendations contained in a report published by the Panel pursuant to Section C2.3(i) (Panel Duties);

(ii) recommendations contained in a report published by the Code Administrator pursuant to Section C7.2(c) (Code Administrator); and/or

(iii) Fast-Track Modifications (as described in Section D2.8 (Fast-Track Modifications)); and/or

(g) the REC Code Manager and/or the Code Administrator where a Consequential Change to this Code has been identified.

Form of the Draft Proposal

D1.4 The Proposer must submit a Draft Proposal to the Code Administrator.

D1.5 The Code Administrator shall from time to time publish a prescribed form for submitting a Draft Proposal on the Website. The prescribed form must require the provision by the Proposer of all of the information set out in Section D1.7, and any other information that the Panel may reasonably approve.

D1.6 Each Proposer must use the prescribed form when submitting a Draft Proposal.

Content of the Proposal

D1.7 A Draft Proposal must contain the following information:

(a) the name of the Proposer;

(b) the name and contact details of an employee or representative of the Proposer who will act as a principal point of contact in relation to the proposal;

(c) the date on which the proposal is submitted;

(d) a description in sufficient detail of the nature of the proposed variation to this Code and of its intended purpose and effect;

(e) a statement of whether, in the opinion of the Proposer, the Modification Proposal should be a Self-Governance Modification;

(f) a statement of whether the Proposer considers, in the light of any guidance on the topic issued by the Authority from time to time, that the Modification Proposal should be treated as an Urgent Proposal (and, if so, its reasons for so considering);

(g) a statement of whether or not the Modification Proposal is intended to be a Fast- Track Modification;

(h) a statement of the reasons why the Proposer believes that this Code would, if the proposed variation were made, better facilitate the achievement of the SEC Objectives than if that variation were not made;

(i) a statement of whether the Proposer believes that there would be a material impact on Greenhouse Gas Emissions as a result of the proposed variation being made; and

(j) a statement of whether the Proposer believes the Draft Proposal should be submitted directly to the Panel.

Modification Register

D1.8 The Secretariat shall establish and from time to time maintain a register (the **Modification Register**) of all current and past Draft Proposals and Modification Proposals.

D1.9 The Modification Register shall contain, in respect of each Draft Proposal submitted pursuant to this Section D1 and Modification Proposal subsequently raised pursuant to Section D3:

(a) a unique reference number by which the Draft Proposal or Modification Proposal can be identified;

(b) a brief summary of the Modification Proposal and its purpose and effect;

(c) not used;

(d) the stage of the process set out in this Section D that the Draft Proposal or Modification Proposal has reached;

(e) following the Panel's determination pursuant to Section D3 that the Draft Proposal should be progressed as a Modification Proposal:

(i) whether the proposal is a Self-Governance Modification;

(ii) whether the proposal is a Fast-Track Proposal; and

(iii) the timetable applying in respect of the Modification Proposal;

(f) whether the Authority has determined the Modification Proposal to be an Urgent Proposal;

(g) not used;

(h) not used;

(i) once it has been made, the decision of the Panel (in the case of Fast-Track Modifications) or of the Change Board (in the case of all other Modification Proposals); and

(j) such other matters relating to the Draft Proposal or Modification Proposal as the Panel may reasonably determine from time to time.

D1.10 The Secretariat shall ensure that the Modification Register is updated at regular intervals so that the information it contains in relation to each Draft Proposal and Modification Proposal is, so far as is reasonably practicable, accurate and up-to-date.

D1.11 The Secretariat shall ensure that the Modification Register is published on the Website, and that a copy of the Modification Register is sent to each Party at least once every month.

Representations from Parties

D1.12 Each Party shall be free to make written representations from time to time regarding each Draft Proposal or Modification Proposal. Such representations should be made to the Code Administrator in the first instance. The Code Administrator shall:

(a) in the case of Fast-Track Modifications, bring such representations to the attention of the Panel;

(b) in the case of Modifications Proposals (other than Fast-Track Modifications) which are not following the Refinement Process, consider such representations when producing the Modification Report;

(c) in the case of Modifications Proposals (other than Fast-Track Modifications) which are following the Refinement Process, bring such representations to the attention of the relevant Working Group; and

(d) in the case of Draft Proposals, bring such representations to the attention of the Change Sub-Committee.

D2. MODIFICATION PATHS

General

D2.1 Each Modification Proposal will follow one of four modification paths (as described in this Section D2). The modification path to be followed in respect of a Modification Proposal will depend upon the nature of the variation proposed in the Modification Proposal.

D2.2 The Panel's determination (whether under Section D3.12 or subsequently) of whether a Modification Proposal is a Self-Governance Modification shall be conclusive unless and until any contrary determination is made by the Authority in accordance with Section D4 (Authority Determinations).

D2.3 Where the Panel raises a Fast-Track Modification, such Modification Proposal shall be treated as a Fast-Track Modification unless and until any contrary determination is made by the Authority in accordance with Section D4 (Authority Determinations).

Authority-initiated Modification

D2.4 A Draft Proposal submitted:

(a) pursuant to Section D1.3(d) by either the Authority or the DCC at the direction of the Authority;

(b) pursuant to Section D1.3(e) by either the Secretary of State or the DCC at the direction of the Secretary of State,

shall have the status of an **Authority-initiated Modification**.

D2.5 The DCC shall submit a Draft Proposal in respect of any variations:

(a) arising out of a Significant Code Review that the DCC is directed to submit by the Authority;

(b) relating to protecting the security of the End-to-End Smart Metering System (or any part of the End-to-End Smart Metering System) that the DCC is directed to submit by the Secretary of State.

Authority Determined Modifications

D2.6 Unless it is an Authority-initiated Modification, a Modification Proposal that proposes variations to this Code that satisfy one or more of the following criteria shall have the status of an **Authority-initiated Modification**:

(a) the variations are likely to have a material effect on existing or future Energy Consumers;

(b) the variations are likely to have a material effect on competition in the Supply of Energy or Commercial Activities connected with the Supply of Energy;

(c) the variations are likely to have a material effect on the environment, on access to or privacy of Data, on security of the Supply of Energy, and/or on the security of Systems and/or Smart Metering Systems;

(d) the variations are likely to have a material effect on the arrangements set out in Section C (Governance) or this Section D; and/or

(e) the variations are likely to unduly discriminate in their effects between one Party (or class of Parties) and another Party (or class of Parties).

Self-Governance Modification

D2.7 A Modification Proposal that is not an Authority-initiated Modification, an Authority Determined Modification or a Fast Track Modification shall have the status of a **Self- Governance Modification**.

Fast-Track Modifications

D2.8 A Modification Proposal submitted to correct typographical errors or other minor factual inaccuracies or inconsistencies in this Code that do not constitute material changes shall have a status of a **Fast-Track Modification**.

D2A THE CHANGE SUB-COMMITTEE

Establishment of the Change Sub-Committee

D2A.1 The Panel shall establish a Sub-Committee as described in this Section D2A, to be known as the **Change Sub-Committee**. Save as expressly set out in this Section D2A, the Change Sub-Committee shall be subject to the provisions concerning Sub- Committees set out in Section C6 (Sub-Committees).

D2A.2 The Panel may discharge the requirements of Section D2A.1 by allocating the function of the Change Sub-Committee to another Sub-Committee. If the Panel elects to do this, all references to the Change Sub-Committee in this Code shall be treated as references to this other Sub-Committee.

Function of the Change Sub-Committee

D2A.3 The function of the Change Sub-Committee shall be to facilitate the development, refinement and discussion of Draft Proposals prior to their progression as Modification Proposals.

D3. INITIAL ASSESSMENT OF DRAFT PROPOSALS

Invalid Draft Proposals

D3.1 The Code Administrator shall refuse (and may only refuse) to accept the submission of a Draft Proposal that is not submitted:

(a) by a person entitled to submit Draft Proposals in accordance with Section D1.3 (Persons Entitled to Submit Draft Proposals); and/or

(b) in the form, and containing the content, required by Sections D1.6 (Form of the Proposal) and D1.7 (Content of the Proposal).

D3.2 Where the Code Administrator refuses to accept the submission of a Draft Proposal, it shall notify the Panel and the Proposer of that refusal as soon as is reasonably practicable, setting out the grounds for such refusal.

D3.3 Where the Panel is notified that the Code Administrator has refused to accept the submission of a Draft Proposal, the Panel may instruct the Code Administrator to accept the submission of that proposal (and Section D3.4 shall apply as if the Code Administrator had not refused to accept the Modification Proposal).

Initial Comment by the Code Administrator

D3.4 Unless the Code Administrator has refused to accept the submission of the Draft Proposal, the Code Administrator shall, within the time period reasonably necessary to allow the Change Sub-Committee to comply with the time periods set out in Section D3.6 or the Panel to comply with the time periods set out in Section D3.10, submit to the Change Sub-Committee or the Panel as applicable:

(a) each Draft Proposal; and

(b) without altering the Draft Proposal in any way and without undertaking any detailed evaluation of the Draft Proposal, the Code Administrator’s written views on the matters that the Change Sub-

Committee is to consider under Sections D3.7 and D3.8 or Panel is to consider under Sections D3.11 and D3.12.

Initial Consideration by the Change Sub-Committee

D3.5 The Change Sub-Committee shall consider each Draft Proposal that:

(a) has not been requested by the Proposer to be treated as an Urgent Proposal; and

(b) has not been requested by the Proposer to be submitted directly to the Panel (or where it has been requested by the Proposer to be submitted directly to the Panel, the Panel has determined pursuant to Section D3.11 that the Draft Proposal should be referred to the Change Sub-Committee for further assessment).

D3.6 The Change Sub-Committee shall consider each Draft Proposal and the accompanying documents referred to in Section D3.4 at the next Change Sub-Committee meeting occurring more than 6 Working Days after the submission of the Draft Proposal.

D3.7 In considering each Draft Proposal, the Change Sub-Committee shall:

(a) provide views and comments to the Proposer on the scope of their Draft Proposal and any potential solution(s) put forward, and support the development of the Draft Proposal;

(b) if available, provide views and comments on any draft legal text submitted with the Draft Proposal;

(c) at its discretion, seek the views and input of the DCC and/or other Parties on the Draft Proposal; and

(d) make a recommendation to the Panel on whether the Draft Proposal should be progressed in parallel with any other Draft Proposals or Modification Proposals.

D3.8 At each meeting where it considers a Draft Proposal, the Change Sub-Committee shall determine whether the Draft Proposal:

(a) should remain with the Change Sub-Committee for further work and analysis, and if so what the timetable for this work shall be; or

(b) should be referred to the Panel for consideration on whether it should be progressed as a Modification Proposal, and if so recommend what the proposed progression timetable should be.

Initial Consideration by the Panel

D3.9 The Panel shall consider each Draft Proposal that:

(a) has been requested by the Proposer to be treated as an Urgent Proposal;

(b) has been requested by the Proposer to be submitted directly to the Panel; or

(c) has been referred to the Panel by the Change Sub-Committee following completion of its assessment.

D3.10 The Panel shall consider each Draft Proposal and the accompanying documents referred to in Section D3.4:

(a) in the case of Draft Proposals expressed by the Proposer to be urgent, within 5 Working Days after the proposal's submission; and

(b) in respect of all other Draft Proposals, at the next Panel meeting occurring more than 6 Working Days after the submission or referral (as applicable) of the Draft Proposal.

D3.11 In considering each Draft Proposal pursuant to Section D3.9, the Panel shall determine:

(a) whether to refuse the Draft Proposal in accordance with Section D3.14;

(b) whether the Draft Proposal should be referred to the Change Sub-Committee for further assessment; or

(c) whether the Draft Proposal should be progressed as a **Modification Proposal**.

D3.12 Where the Panel determines that a Draft Proposal should be progressed as a Modification Proposal, the Panel shall determine:

(a) not used;

(b) whether the Modification Proposal should be a Self-Governance Modification (taking into account the view expressed by the Proposer in the Draft Proposal and as described in Section D2), unless the Modification Proposal is an Authority-initiated Modification;

(c) whether the Authority should be asked to consider whether the Modification Proposal should be treated as an Urgent Proposal (and, where the Proposer has expressed the Modification Proposal to be urgent, the Panel shall so ask the Authority);

(d) in the case of Fast-Track Modifications, whether the Modification Proposal should be progressed and approved as a Fast-Track Modification (and such approval shall require the unanimous approval of all the Panel Members present at the relevant meeting, otherwise the Modification Proposal shall be progressed as though it is not a Fast-Track Modification);

(e) whether, in accordance with Section D3.15, it is necessary for the Modification Proposal to go through the Refinement Process, or whether it can progress straight to the Report Process;

(f) the timetable to apply in respect of the Modification Proposal, in accordance with the criteria set out in Section D3.16; and

(g) whether the Modification Proposal should be considered together with any other current Modification Proposal(s) (whether because they complement or contradict one another or for any other reason), in which case the Modification Proposals in question shall be considered by the same Working Group.

D3.13 The Secretariat shall, as soon as reasonably practicable following the Panel's determination under Sections D3.11 and D3.12 in respect of each Draft Proposal or Modification Proposal, confirm that determination to the Proposer and update the Modification Register.

Refusal by the Panel

D3.14 The Panel may not refuse an Authority-initiated Modification. Otherwise, the Panel may choose to refuse a Draft Proposal if that Draft Proposal has substantively the same effect as another Draft Proposal or Modification Proposal which was submitted by a Proposer on an earlier date and which:

(a) has not been refused, approved, rejected or withdrawn pursuant to this Section D at the time of the Panel's decision under this Section D3.14; or

(b) was refused or rejected pursuant to this Section D on a date falling within the period of two months immediately preceding the time of the Panel's decision under this Section D3.14.

Determining whether the Refinement Process should be followed

D3.15 The Panel shall determine whether each Modification Proposal must go through the Refinement Process, or whether it can progress straight to the Report Process. The Panel shall ensure that the following Modification Proposals are subject to the Refinement Process:

(a) those submitted by the Panel itself (other than Fast-Track Modifications);

(b) those that the Panel considers are likely to have an impact on the ability of the DCC to discharge its duties and comply with its obligations under the Relevant Instruments;

(c) those that the Panel considers are likely to require changes to DCC Systems, User Systems and/or Smart Metering Systems, and/or testing as part of implementation; or

(d) any other Modification Proposals, unless the Panel considers them to be clearly expressed and concerned solely with:

(i) insubstantial or trivial changes that are unlikely to be controversial (including typographical errors and incorrect cross-references); and/or

(ii) giving effect to variations that are mandated by the Relevant Instruments in circumstances where there is little or no discretion as to how they are to be given effect.

Timetable

D3.16 The Panel shall determine the timetable to be followed in respect of each Modification Proposal. In particular, the Panel shall:

(a) in the case of Authority-initiated Modifications, determine a timetable consistent with any relevant timetable issued by the Authority or the Secretary of State (as the case may be);

(b) in the case of Urgent Proposals, determine a timetable that is (or amend the existing timetable so that it becomes) consistent with any relevant timetable issued by the Authority; and

(c) (subject to Sections D3.16(a) and (b)) specify the date by which the Modification Report is to be finalised; being as soon as reasonably practicable after the Panel's decision in respect of such timetable (having regard to the complexity, importance and urgency of the Modification Proposal).

D3.17 The Panel may, whether at its own initiation or on the application of another person, determine amendments to the timetable applying from time to time to each Modification Proposal; provided that any such amendment is consistent with Section D3.16. The Secretariat shall, as soon as reasonably practicable following any Panel determination under this Section D3.17, confirm that determination to the Proposer and the Change Board and update the Modification Register.

D3.18 The Panel, the Code Administrator, the Secretariat, any relevant Working Group, the Change Board and the Parties shall each (insofar as within its reasonable control) complete any and all of the respective tasks assigned to them in respect of a Modification Proposal in accordance with the timetable applying to that Modification Proposal from time to time (including as provided for in Section D4.9).

D3.19 In determining or amending a timetable under Sections D3.10 and D3.11, the Panel may specify a time period for delivery of a DCC Assessment that differs from the standard time period set out in Section D6.10B (Analysis by the DCC). Without limitation, the Panel may specify a different time period in respect of Urgent DCC Assessments.

D4. AUTHORITY DETERMINATIONS

Authority Determination of Modification Path

D4.1 This Section D4.1 applies in respect of each Modification Proposal that the Panel has determined to be an Authority Determined Modification or a Self-Governance Modification. The Authority may:

(a) at its own initiation, or on the application of a Party or Citizens Advice or Citizens Advice Scotland; and

(b) having consulted with the Panel,

determine that the Modification Proposal should properly (in accordance with Section D2) be considered (in the case of an Authority Determined Modification) to be a Self- Governance Modification or be considered (in the case of a Self-Governance Modification) to be a Path 2 Modification. Any such determination shall be final and binding for the purposes of this Code.

Referral of Disputes to the Authority

D4.2 Where the Panel:

(a) refuses a Draft Proposal pursuant to Section D3 (Initial Assessment of Draft Proposals);

(b) determines that the Modification Proposal is an Authority-initiated Modification, an Authority Determined Modification or a Self-Governance Modification where such determination differs from the view of the Proposer expressed in the Draft Proposal; and/or

(c) determines a timetable (or an amendment to the timetable) in respect of the Modification Proposal which the Proposer considers inconsistent with the requirements of Section D3 (Initial Assessment of Draft Proposals),

then the Proposer may refer the matter to the Authority for determination in accordance with Section D4.3.

D4.3 The Proposer may only refer a matter to the Authority pursuant to Section D4.2 where such referral is made within 10 Working Days of the Proposer being notified by the Secretariat of the relevant matter. The Proposer shall send to the Panel a copy of any referral made pursuant to this Section D4.3.

D4.4 Where the Authority, after having consulted with the Panel, considers that the Panel's decision that is the subject of a matter referred to the Authority by a Proposer in accordance with Section D4.3 was made otherwise than in accordance with Section D3, then the Authority may determine the matter. Any such determination shall be final and binding for the purposes of this Code.

Authority Determination in respect of Urgent Proposals

D4.5 Where a Proposer has expressed a Draft Proposal to be urgent and/or where the Panel considers a Modification Proposal to be urgent, the Panel shall ask the Authority whether the Modification Proposal should be treated as an Urgent Proposal.

D4.6 A Modification Proposal shall only be an **Urgent Proposal** where the Authority directs the Panel to treat the Modification Proposal as an Urgent Proposal (whether following a referral by the Panel pursuant to Section D4.5, or at the Authority's own initiation).

D4.7 An Urgent Proposal shall be progressed:

(a) in accordance with any timetable specified by the Authority from time to time, and the Panel shall not be entitled to vary such timetable without the Authority's approval; and

(b) subject to any deviations from the procedure set out in this Section D as the Authority may direct (having consulted with the Panel).

Authority Determination in respect of Significant Code Reviews

D4.8 During a Significant Code Review Phase:

(a) the Panel shall report to the Authority on whether or not the Panel considers that any Draft Proposal or Modification Proposal on which the Change Board had not voted prior to the commencement of the Significant Code Review (whether submitted before or after the commencement of the Significant Code Review) falls within the scope of the Significant Code Review;

(b) the Panel may (subject to Section D4.8(d)) suspend the progress of any Draft Proposal or Modification Proposal that the Panel considers to fall within the scope of that Significant Code Review;

(c) the Authority may (subject to Section D4.8(d)) direct the Panel to suspend the progress of any Draft Proposal or Modification Proposal that the Authority considers to fall within the scope of that Significant Code Review (and the Panel shall comply with such directions); and

(d) the Authority may direct the Panel to cease the suspension of any Draft Proposal or Modification Proposal that has been suspended pursuant to this Section D4.8 (and the Panel shall comply with such directions). Any and all suspensions pursuant to this Section D4.8 shall automatically cease at the end of the Significant Code Review Phase.

D4.9 The commencement and cessation of suspensions in respect of a Modification Proposal pursuant to Section D4.8 shall have the effect of modifying the timetable applying to that Modification Proposal.

D5. WITHDRAWAL OF A PROPOSAL

Right to Withdraw

D5.1 Subject to Section D5.2, the Proposer for a Draft Proposal or a Modification Proposal may withdraw the Draft Proposal or Modification Proposal on notice to the Secretariat at any time prior to the decision of the Change Board under Section D8.14(b) in respect of that Draft Proposal or Modification Proposal.

D5.2 In the case of Authority-initiated Modifications, the Proposer may only withdraw the Draft Proposal or the Modification Proposal where the Proposer provides evidence that the Authority or the Secretary of State (as the case may be) has given its consent to such withdrawal. The Proposer may not withdraw a Modification Proposal following any direction by the Authority to the Panel pursuant to Section D9.3 (Send-Back Process).

D5.3 As soon as is reasonably practicable after receiving any notice in accordance with Section D5.1, the Secretariat shall notify the Parties that the Proposer has withdrawn its support and shall update the Modification Register accordingly.

Adoption of Withdrawn Proposals

D5.4 Where, within 10 Working Days of the Secretariat sending notice under Section D5.3, the Secretariat receives notice from a Party that it is prepared to adopt the Draft Proposal or the Modification Proposal, such Party shall (for all purposes in respect of this Code) be deemed thereafter to be the Proposer for the Draft Proposal or the Modification Proposal (and, where the Secretariat receives more than one such notice, the first such notice shall have priority over the others).

D5.5 Where Section D5.4 applies, the Draft Proposal or the Modification Proposal shall not be withdrawn, and the Secretariat shall notify the Parties and update the Modification Register.

Withdrawn Proposals

D5.6 Subject to Section D5.5, a Draft Proposal or a Modification Proposal that has been withdrawn in accordance with Section D5.1 shall cease to be subject to the process set out in this Section D.

Authority-initiated Modifications: Backstop Direction

D5.7 Where one or more Draft Proposals or Modification Proposals that are Authority initiated Modifications have been raised, the Authority or the Secretary of State (as the case may be) may issue a direction under this Section D5.7 that requires the withdrawal of those Draft Proposal or Modification Proposals, including any connected Alternative Solutions. Where the Authority or the Secretary of State (as the case may be) so directs:

(a) the Proposer for each such Modification Proposal shall be deemed to have withdrawn the Draft Proposal(s) or Modification Proposal(s), and Sections D5.3 and D5.4 shall not apply to the withdrawn Draft Proposal(s) or Modification Proposal(s); and

(b) where the direction is issued by the Authority, the Significant Code Review Phase shall re-commence.

D6. REFINEMENT PROCESS

Application of this Section

D6.1 This Section D6 sets out the **Refinement Process**. This Section D6 only applies in respect of a Modification Proposal where it is determined that the Modification Proposal is to be subject to the Refinement Process in accordance with Section D3 (Initial Consideration of Modification Proposals). The Refinement Process never applies to Fast-Track Modifications.

Establishment of a Working Group

D6.2 Where this Section D6 applies, the Panel shall establish a group of persons (a **Working Group**) for the purposes set out in Section D6.8. Such Working Groups shall be formed and operate in accordance with terms of reference as agreed by the Panel and published on the Website (the "Working Group Terms of Reference"). The Panel shall consult with Parties before it first establishes the Working Group Terms of Reference, and before it makes any changes to the Working Group Terms of Reference.

D6.3 Not used.

D6.4 Not used.

D6.5 Not used.

D6.6 Not used.

D6.7 Except to the extent inconsistent with this Section D6, the provisions of Section C6 (Sub-Committees) shall apply in respect of each Working Group as if that Working Group was a Sub-Committee.

Purpose of Refinement Process

D6.8 The purpose of the Refinement Process is to:

(a) consider and (to the extent necessary) clarify the likely effects of the Modification Proposal, including to identify the Parties, Party Categories, Energy Consumers and other persons likely to be affected by the Modification Proposal;

(b) evaluate and (to the extent necessary) develop and refine the content of the Modification Proposal;

(c) evaluate and (to the extent necessary) amend the proposed implementation timetable of the Modification Proposal including (where relevant) so as to ensure consistency with the SEC Release Management Policy (provided that the proposed implementation timetable of an Authority-initiated Modification cannot be so amended);

(d) consider (to the extent the Working Group considers necessary) the impact which the Modification Proposal would have, if approved, on the matters referred to in Section D6.9;

(e) consider whether the DCC should, as part of the proposal's implementation (if the Modification Proposal is approved), be required to undertake testing of the DCC Total System and/or provide testing services; and (if so) ensure that the Modification Proposal includes amendments to this Code which provide a robust testing solution (or, if it is not yet reasonably practicable to document the testing solution, which provide a process for developing the testing solution);

(f) seek (to the extent the Working Group considers necessary) the Technical Architecture and Business Architecture Sub-Committee’s views of the impact which the Modification Proposal would have, if approved, on the DCC Systems and Smart Metering Systems; provided that the Working Group shall always seek such views:

  (i) in respect of proposals to modify the Technical Code Specifications; and/or

  (ii) where the Technical Architecture and Business Architecture Sub- Committee has notified the Working Group that the Technical Architecture and Business Architecture Sub-Committee wishes to express a view;

(g) seek (to the extent the Working Group considers necessary) the Security Sub- Committee's views on the Modification Proposal; provided that the Working Group shall always seek such views:

  (i) in respect of proposals to modify the Security Obligations and Assurance Arrangements; and/or

  (ii) where the Security Sub-Committee has notified the Working Group that the Security Sub-Committee wishes to express a view;

(h) seek (to the extent the Working Group considers necessary) the SMKI PMA’s views on the Modification Proposal; provided that the Working Group shall always seek such views:

  (i) in respect of proposals to modify the SMKI SEC Documents; and/or

  (ii) where the SMKI PMA has notified the Working Group that the SMKI PMA wishes to express a view;

(i) seek (to the extent the Working Group considers necessary) the Alt HAN Forum's views on the Modification Proposal; provided that the Working Group shall always seek such views:

  (i) in respect of proposals to modify Section Z (The Alt HAN Arrangements);

  (ii) in respect of proposals to modify any SEC Subsidiary Document which relates to Section Z (The Alt HAN Arrangements);

  (iii) in respect of proposals to modify Section K (Charging Methodology) which are likely to affect the Alt HAN Charges; and/or

  (iv) where the Alt HAN Forum (or a Forum Sub-Group acting on its behalf) has notified the Working Group that it wishes to express a view;

(j) consider whether, if the Modification Proposal is approved, this Code would better facilitate the achievement of the SEC Objectives than if the Modification Proposal was rejected;

(k) consider whether it is likely that there would be a material impact on Greenhouse Gas Emissions as a result of the Modification Proposal being approved, and (if so) assessing such impact (which assessment shall be conducted in accordance with any guidance on the evaluation of Greenhouse Gas Emissions issued by the Authority from time to time); and

(l) consider whether, if the Modification Proposal is approved, changes are likely to be required to other Energy Codes as a result.

Analysis by the DCC

D6.9 In considering the matters referred to in Section D6.8(d) and (e), each Working Group for a Modification Proposal shall consider whether one or more DCC Assessments should be undertaken in respect of the Modification Proposal. At the request from time to time of a Working Group for a Modification Proposal, the DCC shall prepare a DCC Preliminary Assessment and/or a DCC Impact Assessment for one or more (in whole or in part) of the following areas for analysis, as determined by the Working Group:

(a) whether the DCC should, as part of the proposal's implementation (if that Modification Proposal were to be approved), be required to undertake testing of the DCC Total System and/or provide testing services; and (if so) the DCC's proposals for the scope, phases, timetable and participants for such testing (or, to the extent it is not yet reasonably practicable to determine such matters, its proposals for the process pursuant to which such matters should be developed);

(b) how the ability of the DCC to discharge its duties and comply with its obligations under the Relevant Instruments would be affected if that Modification Proposal were to be approved; and/or

(c) the extent to which changes would be required to DCC Systems if the Modification Proposal were to be approved; and/or

(d) the DCC's best estimate of the likely implementation and operating costs associated with the changes that would be required to DCC Systems if the Modification Proposal were to be approved, and any consequential impact on the Charges.

D6.10 Within 5 Working Days (unless otherwise agreed with the Working Group) after receiving notice from the Working Group of the requirement for a DCC Assessment, the DCC shall confirm if there is any additional information it reasonably needs (and shall provide a description of such required additional information) to complete the DCC Assessment or shall otherwise confirm that the request for a DCC Assessment has been accepted. The Code Administrator, within 5 Working Days (unless otherwise agreed with the Working Group), shall provide any information so requested (where it has such information), or shall otherwise co-ordinate efforts to obtain such information from the Working Group

D6.10A Where additional information is requested in accordance with Section D6.10 or this D6.10A, the DCC shall, within 5 Working Days after receiving such additional information, confirm if there is still more additional information it reasonably needs (and provide a description of such required additional information) to complete the DCC Assessment or shall otherwise confirm that the request for a DCC Assessment has been accepted.

D6.10B The DCC shall complete each DCC Assessment and present it to the Code Administrator within 15 Working Days (for DCC Preliminary Assessments) or 40 Working Days (for DCC Impact Assessments) measured in each case from acceptance by the DCC under Section D6.10 or D6.10A; subject to amendments to the timetable made by the Panel under Section D3.11 (Timetable) or agreed by the relevant Working Group in accordance with Section D6.10C.

D6.10C Where the DCC considers at any time that it will not be able to complete a DCC Assessment within the time period required by Section D6.10B, the DCC may apply to the relevant Working Group to request an amendment to the DCC Assessment timescales. The DCC shall provide the Working Group with reasons in respect of any such request, and shall propose a revised timescale for delivery with an explanation of how it is to be achieved. Any such amendment proposed by the DCC shall only be effective if agreed by the Working Group. The Working Group may not agree an amendment which would require a deviation from the then current timetable applying to the Modification Proposal under Sections D3.10 and D3.11 (Timetable).

D6.10D Where the DCC wishes to amend a DCC Assessment timescale which requires a deviation from the then current timetable applying to the Modification Proposal under Sections D3.10 and D3.11 (Timetable) or where the relevant Working Group does not agree to an amendment under Section D6.10C, then the DCC may apply to the Panel to request an amendment to the DCC Assessment timescale in accordance with Section D3.11 (Timetable). The DCC shall give reasons in respect of any such request, which must also be notified to the Working Group so that members of the Working Group can also make submissions to the Panel if they wish to do so.

D6.10E Prior to requesting a DCC Impact Assessment, the Working Group shall refer the Modification Proposal to the Change Board for it to determine whether a DCC Impact Assessment should be requested. The Working Group shall not request a DCC Impact Assessment unless the Change Board has determined, following a vote as referred to in Section D8.14A, that it shall be requested.

D6.11 In considering whether the approval of a Modification Proposal would better facilitate the achievement of the SEC Objectives than the rejection of the Modification Proposal, the Working Group shall have regard to any and all DCC Assessments provided by the DCC.

Working Group Consultation

D6.12 Each Working Group established pursuant to this Section D6 in respect of a Modification Proposal shall consider any representations made to it by Parties from time to time regarding the subject-matter of the Modification Proposal.

D6.13 Each Working Group established pursuant to this Section D6 in respect of a Modification Proposal shall undertake at least one formal consultation in respect of the Modification Proposal seeking views on the matters set out in Section D6.8. The Working Group shall consult with the Parties, Citizens Advice or Citizens Advice Scotland and (where appropriate) any interested third parties (including, where relevant, Energy Consumers and/or those who represent or advise Energy Consumers).

D6.14 Each Working Group established pursuant to this Section D6 in respect of a Modification Proposal shall publish on the Website, and bring to the Parties' attention, a document (the **Consultation Summary**) containing the following:

(a) the final consultation draft of the Modification Proposal, including in particular the legal text of the proposed variation and the proposed implementation timetable;

(b) all consultation responses received and not marked as confidential; and

(c) a statement of whether the Working Group considers that the approval of the Modification Proposal would better facilitate the achievement of the SEC Objectives than the rejection of the Modification Proposal (and if so why).

Alternative Solutions

D6.15 The Proposer shall have full ownership of the Proposed Solution to a Modification Proposal, and may direct changes to this variation at any time during the Refinement Process as long as any revised solution continues to achieve the purpose of the Modification Proposal.

D6.16 The Working Group may raise one or more Alternative Solution(s) where the majority of the Working Group considers that there is more than one variation to this Code that could achieve the purpose of the Modification Proposal (and that each such variation would, if made, better facilitate the achievement of the SEC Objectives than if that variation were not made),

D6.17 References in this Section D to a Modification Proposal shall (except where the context otherwise requires) be deemed to include reference to the Proposed Solution and any Alternative Solution(s) raised in accordance with Section D6.16.

D7. REPORT PHASE

Modification Report

D7.1 The Code Administrator shall, in respect of each Modification Proposal, prepare a written report on the proposal (the **Modification Report**); provided that no Modification Report shall be required for Fast-Track Modifications. This stage of the process is referred to as the **Report Phase**.

D7.2 The Code Administrator shall prepare the Modification Report for each Modification Proposal:

(a) where the Refinement Process has been followed, in accordance with the instructions of the relevant Working Group; or

(b) where the Refinement Process has not been followed, on the basis of the Modification Proposal and in consultation with the Proposer.

Content of the Modification Report

D7.3 The Modification Report for each Modification Proposal shall:

(a) be addressed and delivered to the Panel;

(b) set out the legal text of the proposed variation to this Code (and, where applicable, set out the alternative legal text of the Alternative Proposal);

(c) specify the proposed implementation timetable (including the proposed implementation date);

(d) specify the likely effects of the proposed variation if it is implemented;

(e) specify, in the opinion of the Working Group (or, where the Refinement Process was not followed, the Code Administrator), which Party Categories are likely to be affected by the Modification Proposal;

(f) specify whether, if the Modification Proposal is approved, this Code would better facilitate the achievement of the SEC Objectives than if the Modification Proposal was rejected;

(g) specify whether it is likely that there would be a material impact on Greenhouse Gas Emissions as a result of the Modification Proposal being approved, and (if so) assessing such impact (which assessment shall be conducted in accordance with any guidance on the evaluation of Greenhouse Gas Emissions issued by the Authority from time to time);

(h) specify whether, if the Modification Proposal is approved, changes are likely to be necessary to other Energy Codes, and whether changes have been proposed in respect of the affected Energy Codes; and

(i) where the Modification Proposal was subject to the Refinement Process prior to the Report Phase:

(i) include the Consultation Summary produced by the Working Group in respect of the Modification Proposal;

(ii) specify whether, if the Modification Proposal is approved, the implementation of the Modification Proposal is likely to require changes to DCC Systems, User Systems and/or Smart Metering Systems; and (if so) the likely development, capital and operating costs associated with such changes and any consequential impact on the Charges;

(iii) specify whether, if the Modification Proposal is approved, the DCC is to be required, as part of the Modification Proposal's implementation, to undertake testing of the DCC Total System and/or provide testing services; and (if so) how such testing is dealt with in the Modification Proposal;

(iv) include a summary of any views provided by the Technical Architecture and Business Architecture Sub-Committee, the Security Sub- Committee, the SMKI PMA or the Alt HAN Forum in respect of the Modification Proposal pursuant to Section D6.8 (Purpose of the Refinement Process); and

(v) include a summary and copies of any and all DCC Assessments provided by the DCC pursuant to Section D6.9 (Analysis by the DCC).

Consideration of the Modification Report

D7.4 Upon completion of the Modification Report, the Code Administrator will place such report on the agenda for the next meeting of the Panel. Where the Refinement Process was followed, a member of the relevant Working Group shall attend that Panel meeting, and may be invited to present the findings of the Working Group to the Panel and/or answer the questions of Panel Members in respect of the Modification Report.

D7.5 The Panel shall consider each Modification Report and shall determine whether to:

(a) return the Modification Report back to the Working Group (or, where there was no Refinement Process, the Code Administrator) for further clarification or analysis (in which case, the Panel shall determine the timetable and terms of reference of such further analysis); or

(b) allow the Modification Report to proceed to the Modification Report Consultation.

D7.6 The Panel shall not make any statement regarding whether it believes the Modification Proposal should be successful.

D7.7 Where the Panel determines that a Modification Report is to proceed to the Modification Report Consultation, the Panel shall determine:

(a) the timetable for such Modification Report Consultation, including the period for which the consultation is to remain open (which cannot be more than 15 Working Days); and

(b) the Party Categories that the Panel considers are likely to be affected by the Modification Proposal.

Modification Report Consultation

D7.8 Where the Panel determines that a Modification Report is to proceed to the Modification Report Consultation, the Code Administrator shall arrange for a consultation seeking the views of Parties (other than the DCC) on the Modification Report (the **Modification Report Consultation**). The Code Administrator shall:

(a) invite consultation responses in accordance with the timetable determined by the Panel and in the form referred to in Section D7.9;

(b) collate the responses received during the consultation, and add those responses to the Modification Register; and

(c) place the Modification Report on the agenda for the next meeting of the Change Board following the collation of such consultation responses.

D7.9 Each Modification Report Consultation shall allow for each Party (other than the DCC) that wishes to respond to the consultation to respond by way of a form that provides for a response in one of the following manners (where applicable, in respect of the Proposed Solution Proposal and the Alternative Solution(s) separately):

(a) 'no interest' where the Party considers that it and its Party Category are unlikely to be affected by the Modification Proposal;

(b) 'abstain' where the Party wishes to abstain for reasons other than as described in Section D7.9(a);

(c) 'approve' where the Party considers that making the variation would better facilitate the achievement of the SEC Objectives than if the variation was rejected; or

(d) 'reject' where the Party considers that not making the variation would better facilitate the achievement of the SEC Objectives than if the variation was approved,

(e) and which prompts the Party to give a reason for its response by reference to the SEC Objectives.

D7.10 Each Party's response to a Modification Report Consultation will only be validly given if made on the forms provided and received on or before the deadline for responses.

D8. CHANGE BOARD AND CHANGE BOARD DECISION

Establishment of the Change Board

D8.1 The Panel shall establish a Sub-Committee as described in this Section D8, to be known as the **Change Board.** Save as expressly set out in this Section D8, the Change Board shall be subject to the provisions concerning Sub-Committees set out in Section C6 (Sub-Committees).

Function of the Change Board

D8.2 The function of the Change Board shall be to:

(a) decide whether a Modification Proposal is ready for a DCC Impact Assessment to be requested;

(b) consider each Modification Report and the responses received in response to the Modification Report Consultation;

(c) decide whether to approve or reject the Modification Proposal in the form set out in the Modification Report (and, where there is at least one Alternative Solution, confirm whether the approval or rejection relates to the Proposed Solution or to an Alternative Solution); and

(d) decide whether to approve or reject a proposed Authority-Led Variation.

Effect of the Change Board Decision

D8.3 The effect of the Change Board decision shall:

(a) in the case of Authority-initiated Modifications, Authority-Determined Modifications and Authority-Led Variations, be to recommend to the Authority that the variation be approved or rejected; or

(b) in the case of Self-Governance Modifications, be to approve or reject the variation.

Membership of the Change Board

D8.4 The following persons shall serve on the Change Board (each being a **Change Board Member):**

(a) one person nominated jointly by Citizens Advice and Citizens Advice Scotland;

(b) one person appointed by each of the Voting Groups within the Party Category representing the Large Supplier Parties;

(c) three persons appointed by the Party Category representing the Small Supplier Parties;

(d) three persons appointed by the Party Categories representing Electricity Network Parties and the Gas Network Parties collectively; and

(e) three persons appointed by the Party Category representing the Other SEC Parties.

D8.5 Each Voting Group, Party Category or Party Categories (as applicable) referred to in each sub-section of Section D8.4 shall nominate its appointee(s) to serve as Change Board Member(s) to the Secretariat. Each Change Board Member shall serve for a term of one year, and shall be capable of being reappointed at the end of that term. The relevant Voting Group, Party Category or Party Categories may (on notice to the Secretariat) establish a rota whereby more than one person shares the office of Change Board Member.

D8.6 It shall be for the Parties within the relevant Party Category or Party Categories (as applicable) referred to in each sub-section of Section D8.4 to determine how they agree between themselves on the identity of each person to be appointed as a Change Board Member on their behalf. In the event that the Parties within such Party Category or Party Categories cannot so agree, the Secretariat shall seek the preference of the Parties within the relevant Party Category or Party Categories (as applicable) and the person preferred by the majority of those Parties that express a preference (on a one-vote-per- Party basis) shall be appointed as a Change Board Member. In the absence of a majority preference the relevant Change Board Member position shall remain unfilled.

D8.7 The Panel shall only be entitled to remove a Change Board Member from office where such Change Board Member is repeatedly absent from meetings to an extent that frustrates the proceedings of the

Change Board. The Voting Group by which a Change Board Member was appointed pursuant to Section D8.4(b) shall be entitled to remove that Change Board Member by notice in writing to the Secretariat. The Party Category or Party Categories (as applicable) referred to in each other sub-section of Section D8.4 shall be entitled to remove the Change Board Member appointed by them from office by notice in writing to the Secretariat; provided that the majority of the Parties within the relevant Party Category or Party Categories (as applicable) must approve such removal.

Duties of Change Board Members

D8.8 The Consumer Member serving on the Change Board will, when acting as a Change Board Member, act in a manner consistent with the statutory functions of Citizens Advice or Citizens Advice Scotland. Each other Change Board Member will act in the interests of the Voting Group, Party Category or Party Categories (as applicable) by which the Change Board Member was appointed.

D8.9 In giving effect to his or her duties under Section D8.8, each Change Board Member (other than the Consumer Member) shall:

(a) be guided (but not bound) by the responses to the Modification Report Consultation given by Parties within the Voting Group, Party Category, or Party Categories (as applicable) by which such Change Board Member was appointed;

(b) seek to clarify with the relevant Party any responses to the Modification Report Consultation that are not clear to the Change Board Member, or which the Change Board Member considers to be based on a misunderstanding of the facts;

(c) seek to act in the best interests of the majority, whilst representing the minority view (and, where a majority is not significant, the Change Board Member should consider whether abstention from the vote best represents the interests of the Change Board Member's constituents); and

(d) be entitled to vote or abstain without regard to the Panel's indication of which Party Categories the Panel considered to be affected by the Modification Proposal.

D8.10 The confirmation to be given by each Change Board Member to SECCo in accordance with Section C6.9 (Member Confirmation) shall refer to Section D8.8 in place of Section C6.8.

Proceedings of the Change Board

D8.11 The Code Administrator shall chair the Change Board meetings. The chair shall have no vote (casting or otherwise).

D8.12 The quorum for Change Board meetings shall be:

(a) at least three persons appointed by the Large Supplier Parties;

(b) at least one person appointed by the Small Supplier Parties;

(c) at least two persons appointed by the Electricity Network Parties and Gas Network Parties collectively; and

(d) at least one person appointed by the Other SEC Parties,

(e) provided that fewer (or no) appointees from a Party Category shall be required where that Party Category has not appointed that many (or any) Change Board Members; and further provided that no appointees from a Party Category shall be required where the Panel indicated pursuant to Section D7.7(b) that that Party Category was not likely to be affected by the Modification Proposal in question.

D8.13 In addition to those persons referred to in Section C5.13, representatives of the DCC shall be entitled to attend and speak (but not vote) at each meeting of the Change Board.

The Change Board Vote

D8.14 In respect of each Modification Report referred to the Change Board, the Change Board shall vote:

(a) whether to determine that the Modification Report should be returned to the Working Group (or, where there was no Refinement Process, the Code Administrator) for further clarification or analysis; and if not

(b) whether to approve the Proposed Solution or any Alternative Solution set out in the Modification Report (on the basis that the Change Board may only approve one of them).

D8.14A In respect of each request for a DCC Impact Assessment submitted by a Working Group pursuant to Section D6.10E, the Change Board shall vote on whether to request the DCC Impact Assessment or whether to return the Modification Proposal to the Working Group for further work.

D8.15 A vote referred to in Sections D8.14 or D8.14A shall take the form of a vote by:

(a) the Consumer Member serving on the Change Board;

(b) the Change Board Members appointed by the Voting Groups within the Party Category representing the Large Supplier Parties (whose collective vote shall be determined in accordance Section D8.16);

(c) the Change Board Members appointed by the Party Category representing the Small Supplier Parties (whose collective vote shall be determined in accordance with Section D8.16);

(d) the Change Board Members appointed by the Party Categories representing Electricity Network Parties and the Gas Network Parties (collectively) (whose collective vote shall be determined in accordance with Section D8.16); and

(e) the Change Board Members appointed by the Party Category representing the Other SEC Parties (whose collective vote shall be determined in accordance with Section D8.16),

(f) and a vote pursuant to Sections D8.14 or D8.14A shall only be successfully passed if the majority of the votes cast in accordance with this Section D8.15 are cast in favour. For the avoidance of doubt: an abstention shall be treated as if no vote was cast; where there are no Change Board Members present from within the categories referred to in each of Sections D8.15(a) to (e) they shall be deemed to have abstained; and a tie amongst the votes cast shall not be a vote in favour.

D8.16 Each of the collective votes by Change Board Members referred to in Section D8.15(b) to (e) shall be determined by a vote among the relevant Change Board Members, such vote to be undertaken on the basis:

(a) of one vote per Change Board Member; and

(b) that the majority of those Change Board Members that are present must vote in favour in order for the collective vote to be considered a vote in favour (and, for the avoidance of doubt, a tie amongst the votes cast shall not be a vote in favour).

D8.17 In casting his or her vote, each Change Board Member must record the reason for his or her vote, and where voting on whether or not to approve a variation must explain whether the making of the variation would better facilitate the achievement of the SEC Objectives than if the variation was rejected.

Communicating the Change Board Vote

D8.18 Following the vote of the Change Board in respect of each Modification Report, the Code Administrator shall update the Modification Register to include the outcome of the vote and the reasons given by the Change Board Members pursuant to Section D8.17.

D8.19 Where the outcome of the Change Board vote is to determine that the Modification Report should be returned for further clarification or analysis (as referred to in Section D8.14(a)), the Working Group (or, where there was no Refinement Process, the Code Administrator) shall update the Modification Report to include such clarification or analysis, and this shall be returned to the Panel at the next suitable meeting.

D8.20 Where the Change Board votes on whether to approve a variation set out in a Modification Report (as referred to in Section D8.14(b)), the Code Administrator shall communicate the outcome of that vote to the Authority and the Panel, and shall send copies of the following to the Authority:

(a) the Modification Report;

(b) the Modification Report Consultation and the responses received in respect of the same; and

(c) the outcome of the Change Board vote, including the reasons given by the Change Board Members pursuant to Section D8.17.

D8.21 Where the outcome of the Change Board vote referred to in Section D8.14A is a decision that a DCC Impact Assessment should not be requested, the Change Board shall specify the further work it believes is required in order for it to reconsider whether a DCC Impact Assessment should be requested. The Proposer may appeal the decision to the Panel. Where, following an appeal made to it, the Panel determines that a DCC Impact Assessment is not to be requested, the Panel shall specify the further work it believes is required in order for the Change Board to reconsider whether a DCC Impact Assessment should be requested. Once this further work has been completed, the Working Group may re-refer the Modification Proposal to the Change Board to determine whether a DCC Impact Assessment should be requested.

D9. MODIFICATION PROPOSAL DECISION

General

D9.1 The final decision as to whether or not to approve a Modification Proposal shall depend upon whether the Modification Proposal is:

(a) an Authority-initiated Modification or an Authority Determined Modification;

(b) a Self-Governance Modification; or

(c) a Fast-Track Modification.

Authority-initiated Modifications and Authority Determined Modifications

D9.2 An Authority-initiated Modification or an Authority Determined Modification shall only be approved where the Authority determines that the Modification Proposal shall be approved (which determination shall, without prejudice to section 173 of the Energy Act 2004, be final and binding for the purposes of this Code). In making such determination, the Authority will have regard to:

(a) its objectives and statutory duties under the Electricity Act and the Gas Act;

(b) whether or not the approval of the variation would better facilitate the achievement of the SEC Objectives than if the variation was rejected;

(c) the decision of the Change Board in respect of the Modification Proposal, which shall be considered to constitute a recommendation by the Parties as to whether or not to approve the Modification Proposal; and

(d) such other matters as the Authority considers appropriate.

Send-Back Process

D9.3 Where the Authority considers that it is unable to form an opinion in relation to a Modification Proposal submitted to it, then it may issue a direction to the Panel specifying any additional steps that the Authority requires in order to form such an opinion (including drafting or amending the proposed legal text, revising the proposed implementation timetable, and/or revising or providing additional analysis and/or information). Where the Authority issues a direction to the Panel pursuant to this Section D9.3:

(a) the decision of the Change Board in respect of the Modification Proposal shall be null and void;

(b) the Panel shall send the Modification Proposal back to the relevant Working Group (or shall establish a Working Group) to consider the matters raised by the Authority, and to prepare a revised Modification Report;

(c) the Panel shall revise the timetable applying to the Modification Proposal; and

(d) the Secretariat shall update the Modification Register to record the status of the Modification Proposal.

Self-Governance Modifications

D9.4 A Self-Governance Modification shall only be approved where the Change Board votes to approve the Modification Proposal, subject to the following:

(a) any Party that disagrees with the decision of the Change Board, may (within 10 Working Days following the publication of that decision) refer the matter to the Panel, and the Panel shall determine whether it wishes to reverse the decision of the Change Board;

(b) any Party that disagrees with the decision of the Panel pursuant to Section D9.4(a), may (within 10 Working Days following the publication of that decision) refer the matter to the Authority, and the Authority shall determine whether the Modification Proposal should be rejected or approved in accordance with Section D9.2 (which determination shall, without prejudice to section 173 of the Energy Act 2004, be final and binding for the purposes of this Code); and

(c) accordingly, where the consequence of the Panel's or the Authority's determination is that the Modification Proposal is to be rejected (where it has previously been approved) the Modification Proposal shall be cancelled and not implemented (or, if already implemented, shall be reversed).

Fast-Track Modifications

D9.5 In the case of a Fast-Track Modification, any decision of the Panel under Section D3.6 to approve the Modification Proposal shall be final, subject to the following:

(a) any Party that disagrees with the Modification proposal being approved as a Fast-Track Modification, may (within 15 Working Days following the publication of that decision) object to the decision; and

(b) where an objection is received, the Panel's decision on the Modification proposal shall be cancelled and the Modification proposal shall be returned to the Panel at its next meeting. The Panel shall then revise its determination under Section D3.6 as though the Modification Proposal is not a Fast-Track Modification.

D9A AUTHORITY-LED VARIATIONS

Authority Power to Develop a Proposed Variation

D9A.1 The Authority may develop a proposed variation to this Code in respect of a Significant Code Review, in accordance with the procedures set out in this Section D9A.

D9A.2 The Authority may commence a Significant Code Review Phase by issuing a direction under this Section D9A.2, or may issue a direction under this Section D9A.2 at any time during a Significant Code Review Phase. The Authority's direction under this Section D9A.2 will set out the scope and/or subject matter of the Significant Code Review.

Authority-Led Consultation

D9A.3 The Authority will, in such manner as it considers appropriate, consult on the merits of the proposed Authority-Led Variation with the Parties, Citizens Advice, Citizens Advice Scotland, and any other persons whose interests are materially affected by this Code.

Authority-Led Modification Report

D9A.4 The Authority may submit its proposed Authority-Led Variation to the Code Administrator, together with such supplemental information as the Authority considers appropriate.

D9A.5 Upon receipt of the Authority's proposal under Section D9A.4, the Code Administrator shall prepare a written report on the proposal (the "Authority-Led Modification Report"). The Authority-Led Modification Report must be consistent with the information provided by the Authority under Section 9A.4, and shall:

(a) be addressed and delivered to the Panel;

(b) set out the legal text of the proposed variation to this Code;

(c) specify the proposed implementation timetable (including the proposed implementation date);

(d) specify the likely effects of the proposed variation if it is implemented;

(e) specify which Party Categories are likely to be affected by the proposed variation;

(f) specify whether the implementation of the proposed variation will require changes to DCC Systems, User Systems and/or Smart Metering Systems; and (if so) the likely development, capital and operating costs associated with such changes and any consequential impact on the Charges;

(g) specify whether, if the proposed variation is approved, this Code would better facilitate the achievement of the SEC Objectives than if the proposed variation was rejected;

(h) specify whether it is likely that there would be a material impact on Greenhouse Gas Emissions as a result of the proposed variation being approved, and (if so) assessing such impact (which assessment shall be conducted in accordance with any guidance on the evaluation of Greenhouse Gas Emissions issued by the Authority from time to time); and

(i) specify whether, if the proposed variation is approved, changes are likely to be necessary to other Energy Codes, and whether changes have been proposed in respect of the affected Energy Codes.

D9A.6 Upon completion of the Authority-Led Modification Report, the Code Administrator will place such report on the agenda for the next meeting of the Panel, which shall refer the report to the Change Board.

Change Board and Change Board Decision

D9A.7 In respect of each Authority-Led Modification Report referred to the Change Board, the Change Board shall vote whether to approve the Authority-Led Variation.

D9A.8 Each vote as referred to in Section D9A.7 shall take the form of a vote in accordance with Sections D8.15 to D8.17 (The Change Board Vote). The Authority's Significant Code Review conclusions document and/or the Authority's proposal submitted in accordance with Section D9A.4 shall not fetter the procedures or voting rights referred to in Section D8 (Change Board and Change Board Decision).

D9A.9 Following the vote of the Change Board in respect of the Authority-Led Variation, the Code Administrator shall populate the Modification Register to include the outcome of the vote and the reasons given by the Change Board Members pursuant to Section D8.17 (The Change Board Vote).

D9A.10 The Code Administrator shall communicate the outcome of the Change Board vote to the Authority and the Panel, and shall send copies of the following to the Authority:

(j) the Authority-Led Modification Report; and

(k) the outcome of the Change Board vote, including the reasons given by the Change Board Members pursuant to Section D8.17 (The Change Board Vote).

Authority Decision

D9A.11 An Authority-Led Variation shall be approved only where the Authority determines that the proposed variation shall be approved (which determination shall, without prejudice to section 173 of the Energy Act 2004, be final and binding for the purposes of this Code). In making such determination, the Authority will have regard to:

(l) its objectives and statutory duties under the Electricity Act and the Gas Act;

(m) whether or not the approval of the variation would better facilitate the achievement of the SEC Objectives than if the variation was rejected;

(n) the decision of the Change Board in respect of the variation, which shall be considered to constitute a recommendation by the Parties as to whether or not to approve the variation; and

(o) such other matters as the Authority considers appropriate.

Send-Back Process

D9A.12 Where the Authority considers that it is unable to form an opinion in relation to a proposed Authority-Led Variation, then it may issue a direction to the Panel specifying any additional steps that the Authority requires in order to form such an opinion. Where the Authority issues a direction to the Panel pursuant to this Section D9A.12:

(p) the decision of the Change Board in respect of the variation shall be null and void;

(q) the Panel shall seek to address the matters raised by the Authority, and shall (where necessary) have an updated Authority-Led Modification Report produced; and

(r) the Secretariat shall update the Modification Register to record the status of the proposed variation.

Implementation

D9A.13 Where an Authority-Led Variation has been approved in accordance with Section D9A.11, Section D10 (Implementation) shall apply.

D10. IMPLEMENTATION

General

D10.1 Once a Modification Proposal has been approved in accordance with Section D9 (Modification Proposal Decision) or an Authority-Led Variations has been approved in accordance with Section D9A.11 (Authority Decision), the Panel shall ensure that this Code is varied in accordance with the Modification Proposal or Authority-Led Variation, as set out in this Section D10. Authority-Led Variations are to be treated as Authority-initiated Modifications for the purposes of this Section D10 (and references to Modification Proposals shall be interpreted accordingly).

Implementation

D10.2 The Panel shall, at the next Panel meeting after a Modification Proposal has been approved:

(a) determine what actions are required in order to ensure that the approved variation to this Code is made in accordance with the approved implementation timetable; and

(b) set a timetable for the completion of each of those actions.

D10.3 It shall be the duty of the Panel to ensure that the actions which are required to secure that an approved variation to this Code is made in accordance with the approved implementation timetable are taken.

D10.4 Each Party shall co-operate with the Panel to the extent required to ensure that such variation is made with effect from such date.

Subsequent Amendment to Implementation Timetable

D10.5 Where, having regard to representations received from the Code Administrator or from any Party, the Panel considers that it is not reasonably practicable to make the approved variation to this Code in accordance with the approved implementation timetable:

(a) the Panel may request the Authority to direct that a new implementation timetable be substituted for the first such timetable; and

(b) where the Authority makes such a direction following a request by the Panel, the implementation timetable directed by the Authority shall have effect in substitution for the first such timetable, and the requirements of this Section D10 shall be defined by relation to that later date.

D10.6 Without prejudice to the generality of Section D10.5, the Panel shall make a request to the Authority under that Section where:

(a) the decision of the Authority to approve the relevant Modification Proposal is subject to an appeal pursuant to section 173 of the Energy Act 2004 or is challenged by judicial review; and

(b) the Panel considers that it is appropriate in the circumstances for the timetable to be delayed given such appeal or challenge.

SEC Release Management Policy

D10.7 The implementation of an approved Modification Proposal will take place as part of a SEC Release. The Panel shall ensure that the implementation of a SEC Release is undertaken in accordance with a policy for determined by the Panel (the "Panel SEC Release Management Policy").

D10.8 The Panel shall ensure that the SEC Release Management Policy:

(a) includes a mechanism for allocating Modification Proposals into SEC Releases;

(b) defines a mechanism by which the Panel shall co-ordinate and oversee the content; and

(c) defines a mechanism by which notice is to be given to Users prior to the implementation of a SEC Release;

(d) defines a mechanism by which the Panel shall review the main components of the forecast and actual costs of a SEC release and, if requested by the Authority, how the Panel, shall provide a report on this to the Authority; and

(e) defines a mechanism by which the Panel shall determine that the SEC Release shall be put into live operation.

D10.9 The Panel shall make the Panel Release Management Policy available to the DCC and Users on the SEC Website. The Panel shall consult with the DCC and Users before it first establishes the Panel Release Management Policy, and before it makes any changes to the Panel Release Management Policy.

D10.10 The DCC shall co-operate with the Panel in planning and implementing SEC Releases in accordance with the SEC Release Management Policy and shall provide any information reasonably requested by the Panel for this purpose.

D10.11 The Panel may appoint, or require DCC to appoint, an external auditor to monitor the DCC's implementation process, plans and progress in support of a SEC Release, and shall approve any such external auditor's terms of reference. The DCC must co-operate with any external auditor that is appointed, including (but not limited to) allowing access to such records, test results, test laboratories and test witnessing as the external auditor may reasonably require.

SEC Release Implementation Document

D10.12 The Panel shall develop and publish a "SEC Release Implementation Document" for each SEC Release in accordance with the SEC Release Management Policy.

D10.13 The Panel shall ensure that each SEC Release Implementation Document:

(a) defines the content of the SEC Release;

(b) defines the timescales associated with implementing the content of the SEC Release, including timescales for the commencement and completion of DCC and User testing phases;

(c) defines how the DCC shall report progress towards readiness;

(d) defines the testing that will be undertaken by the DCC for the SEC Release;

(e) defines the required User testing and how the DCC shall support Users to test the changes that make up the SEC Release; and

(f) defines the SEC Release go-live criteria that shall be agreed by the Panel in accordance with the SEC Release Management Policy.

D10.14 The DCC shall provide any information reasonably requested by the Panel that is required for inclusion in the SEC Release Implementation Document for a SEC Release.

D10.15 The Panel shall approve the SEC Release Implementation Document and any subsequent amendments.

D10.16 The DCC shall be required to undertake the implementation and testing activities for a SEC Release as set out in the relevant SEC Release Implementation Document once approved by the Panel.

D10.17 Any Party that wishes to appeal the Panel approval of the SEC Release Implementation Document may do so within 10 Working Days following the publication of the decision to approve. Any appeal referred to the Authority, must specify the reasons for the appeal. The Authority shall determine what action to take with the appeal (which determination shall, without prejudice to section 173 of the Energy Act 2004, be final and binding for the purposes of this Code).

SEC Release Testing Approach Document

D10.18 The DCC, on request of the Panel, shall produce a document setting out how the requirements of Sections D10.13(d) and (e) will be satisfied (the "SEC Release Testing Approach Document"). A SEC

Release Testing Approach Document shall be considered as part of the SEC Release Implementation Document for the relevant SEC Release.

D10.19 The DCC shall ensure that each SEC Release Testing Approach Document sets out the following, as a minimum, in respect of the SEC Release in question:

(a) the proposed amendments to this Code that are the subject of the testing, an explanation of the associated changes to the DCC Total System, and the testing objective;

(b) the testing environments and test phases to be used and how these will be sequenced;

(c) the Devices to be used in testing (including the use of emulators);

(d) the requirements (if any) for security testing;

(e) the requirements (if any) for system capacity testing;

(f) details of the testing that shall be undertaken, including the scope of testing and the extent of testing (including negative tests) and the approach to regression testing and End Of Cycle testing;

(g) the applicable Testing Issue thresholds and the process by which DCC may propose to exclude Testing Issues from being counted against the Testing Issue thresholds;

(h) the process and expected timescales for managing the resolution of extant Testing Issues following completion of a test phase;

(i) the entry criteria that must be met in order for a test phase to commence and who approves entry;

(j) the exit criteria that must be met in order for a test phase to complete and who approves exit;

(k) any key risks (and risk mitigation) identified in respect of the proposed approach to testing;

(l) the approach to providing assurance of the testing undertaken;

(m) matters to be included in DCC's test completion reports presented to the Panel; and

(n) the requirements (if any) for User testing and for determining any associated test completion.

D10.20 The DCC shall prepare and consult upon each SEC Release Testing Approach Document and any subsequent amendments. The DCC shall report to the Panel on the outcome of each such consultation. The Panel shall review and determine whether to approve each SEC Release Testing Approach Document and any subsequent amendments.

D10.21 The DCC and each person other than the DCC that participates in (or is required to participate in) testing under a SEC Release Testing Approach Document shall comply with the document approved by the Panel (including such amendments as are approved by the Panel from time to time).

Programme Assurance Policy

D10.22 The Panel shall establish and maintain a policy (the "**Programme Assurance Policy**") to govern DCC-initiated projects and programmes that have the potential to impact Users but which do not require a Modification.

D10.23 In the case where the DCC implements a project or programme that has the potential to impact Users (but which does not require a Modification), the DCC shall adhere to the Programme Assurance Policy. For clarity, this may include DCC Internal System Changes.

D10.24 The DCC shall plan and implement DCC projects and programmes in accordance with the Programme Assurance Policy, and shall co-operate with the Panel and provide any and all information reasonably requested by the Panel for this purpose.

D10.25 In developing the Programme Assurance Policy, and prior to making any subsequent change to it, the Panel shall consult with the DCC and have regard to the views of all Parties.

D10.26 The Panel shall ensure that an up-to-date copy of the Programme Assurance Policy is made available to all Parties and is published on the Website.

D10.27 In developing or making changes to the Programme Assurance Policy, the Panel shall ensure that it gives due consideration to the need for the DCC to: (a) comply at all times with the 'General Objectives of the Licensee' (as defined in the DCC Licence); and (b) efficiently discharge the other obligations imposed upon the DCC by the DCC Licence.

D10.28 Should the DCC disagree with the Panel on any changes made to the Programme Assurance Policy (in accordance with the provisions of this Section D10), the DCC may refer the matter to the Authority for determination, whose decision shall be final and binding for the purposes of this Code.

D11. DCC ASSESSMENT REPORTING

Reporting on DCC Assessments

D11.1 The DCC shall report to the Panel each month on the status of all DCC Assessments which are ongoing or that have been completed since the last such report. The DCC shall include in each such report any additional details reasonably requested by the Panel since the last such report.

D11.2 Such reports shall include details of whether the required timescales for completion of the DCC Assessments are likely to be (or have been) met. Where there is any delay, the DCC shall set out a clear explanation of the reasons for such delay, the likely delivery timescales, and the actions being taken by the DCC to minimise the delay.

Code Performance Measures

D11.3 Each of the following performance measures constitute a Code Performance Measure (to which the following Target Service Level and Minimum Service Level will apply, measured over the following Performance Measurement Period):

No.	Code Performance Measure	Performance Measurement Period	Target Service Level	Minimum Service Level
9	Out of the DCC Assessments required to be completed during the Performance Measurement Period, how	Monthly	100%	100%

	many were completed within the required timescales.			

D12. LEAD CODE AND CONSEQUENTIAL CHANGES

Cross Code Steering Group

D12.1 The Panel shall from time to time nominate to the REC Code Manager one or more individuals to represent the Panel on the Cross Code Steering Group. The Panel shall ensure that each of the nominated individuals has the appropriate skills, knowledge and experience to participate in accordance with the Cross Code Steering Group's terms of reference.

D12.2 The Panel may discharge the requirements of Section D12.1 by ensuring the Code Administrator provides appropriate representatives.

Lead Code

D12.3 Where the Cross Code Steering Group determines that this Code is to be used as the Lead Code, the Code Administrator shall:

(a) progress the Lead Code Modification in accordance with this Code;

(b) coordinate with the other affected Energy Codes so that they can progress a Consequential Change under their Energy Code in parallel with the process under this Code;

(c) publish a timetable setting out the proposed progression of the Lead Code Modification and any associated Consequential Changes; and

(d) notwithstanding Section D9 (Modification Proposal Decision), the Modification Proposal under this Code shall only be approved if both:

(i) the Modification Proposal is approved in accordance with this Code; and

(ii) the associated Consequential Changes under the other Energy Codes are all approved in accordance with those other Energy Codes.

Consequential Change

D12.4 Where the Cross Code Steering Group determines that another Energy Code is the Lead Code for a Modification Proposal, then the Code Administrator shall progress the relevant Consequential Change to this Code in accordance with this Section D, but subject to the following:

(a) the Code Administrator shall progress the Modification to the timetable determined under the Lead Code;

(b) if the Lead Code Modification under the Lead Code is withdrawn or rejected prior to a Change Board determination the Code Administrator shall Withdraw the Consequential Change in accordance with Section D5 except that Sections D5.4 and D5.5 shall not apply.

(c) notwithstanding Section D9 (Modification Proposal Decision), the Modification Proposal under this Code shall only be approved if both:

(i) the Modification Proposal is approved in accordance with this Code; and

(ii) the variation to the Lead Code is approved in accordance with the Lead Code.

Appeal to the Authority

D12.5 The Panel may appeal the determination of any associated Consequential Change to the Authority where:

(a) this Code is the Lead Code;

(b) the Lead Code Modification is approved;

(c) one or more associated Consequential Changes are not approved; and

(d) such an appeal is raised within 30 Working Days of a determination on the Lead Code Modification or relevant Consequential Change.

D12.6 Where another Energy Code is the Lead Code any determination under this Code on an associated Consequential Change may be sent to the Authority for appeal within 30 Working Days of such a determination on request of the Lead Code (in which case the approval or rejection of the Consequential Change shall be determined by the Authority as if Section D9.2 applied).

Energy Market Data

D12.7 Where a Modification Proposal is progressed in relation to an Energy Market Message and/or an Energy Market Data Item defined within the Energy Market Data Specification, the relevant Energy Market Meta Data Owner shall be defined as the Lead Code.

D12.8 The Code Administrator shall ensure that the meta data for all relevant Energy Market Messages and Energy Market Data Items utilised under this Code are defined within the Energy Market Data Specification administered in accordance with the REC Change Management Schedule.

E REGISTRATION DATA

E1. RELIANCE ON REGISTRATION DATA

DCC

E1.1 The DCC shall, from time to time, use and rely upon the Data previously provided to it by RDPs or provided by the CSS Provider pursuant to Section E2 as most recently updated pursuant to Section E2 (**Registration Data**) or pursuant to Section E5 (the **Additional Registration Data**); provided that the DCC shall be allowed up to three hours from receipt to upload such Data to the DCC Systems.

E1.2 Without prejudice to the generality of Section E1.1, the DCC shall use and rely upon the Registration Data and, where applicable, the Additional Registration Data when:

(a) assessing a User's eligibility to receive certain Services (as described in Section H4 (Processing Service Requests); and

(b) calculating the Charges payable by a Party.

E1.3 The DCC shall have no liability to any Party where it provides (or does not provide) a Service in circumstances where it should not (or should) have done so, to the extent that the same arises due to inaccuracies in the Registration Data or the Additional Registration Data that are not caused by the DCC.

Panel

E1.4 The Panel shall periodically request from the DCC any Registration Data and Additional Registration Data reasonably required by the Panel in relation to the proper exercise of its duties, powers and functions, including the Registration Data required by the Panel to establish into which Party Category a Party falls. Where aggregated or anonymised data (or similar) is sufficient for the Panel's needs, the Panel shall request, and the DCC shall provide, the data in such format.

E1.5 The DCC shall provide to the Panel any Registration Data and Additional Registration Data requested by the Panel in accordance with Section E1.4.

E1.6 The Panel (and the Secretariat) shall, from time to time, use and rely upon the Registration Data and the Additional Registration Data most recently provided to the Panel pursuant to Section E1.5.

E2. PROVISION OF DATA

Responsibility for Providing Electricity and Gas Registration Data

E2.1 The CSS Provider shall provide to the DCC electricity Registration Data as required under the REC.

E2.2 The CSS Provider shall provide to the DCC gas Registration Data as required under the REC.

Obligation on DCC to Provide Data to RDPs

E2.3 The DCC shall provide the information set out in Section E2.4 to the Registration Data Provider nominated by each Electricity Network Party and each Gas Network Party (as such information is further described in the Registration Data Interface Documents).

E2.4 The information to be provided by the DCC:

(a) to each Electricity Network Party's Registration Data Provider is:

(i) whether there is an Enrolled Smart Metering System associated with each of the MPANs relating to the Electricity Network Party's network (and the date of its Enrolment); and

(ii) the identity of the person which the DCC believes to be Registered in respect of each of the MPANs relating to the Electricity Network Party's network; and

(b) to each Gas Network Party's Registration Data Provider is whether there is an Enrolled Smart Metering System associated with each of the Supply Meter Points on the Gas Network Party's network (and the date of its Enrolment).

Frequency of Data Exchanges

E2.5 The Data to be provided by the DCC to the RDPs under this Section E2 shall be provided by way of incremental updates to Data previously provided (so that only Data that has changed is updated).

E2.6 The incremental updates to Data to be provided in accordance with this Section E2 shall be made at the frequency and/or time required in accordance with the Registration Data Interface Documents.

E2.7 The Data to be provided by the CSS Provider under this Section E2 shall be sent as per the requirements for provisions of such data as specified in the REC.

Registration Data Interface

E2.8 The DCC shall maintain the Registration Data Interface in accordance with the Registration Data Interface Specification, and make the interface available to the Registration Data Providers to receive Data via the DCC Gateway Connections in accordance with the Registration Data Interface Code of Connection.

E2.9 The DCC shall ensure that the Registration Data Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3).

E2.10 Each Electricity Network Party and each Gas Network Party shall ensure that its Registration Data Provider shall (when acting in such capacity) comply with the applicable obligations set out in the Registration Data Interface Documents and the Incident Management Policy.

E2.11 For the avoidance of doubt, the DCC shall comply with the applicable obligations set out in the Registration Data Interface Documents and the Incident Management Policy (as it is obliged to do in respect of all applicable provisions of this Code).

E2.12 Not used

E2.13 Where the DCC identifies any omissions or manifest errors in the Registration Data, the DCC shall seek to resolve any such omissions or manifest errors in accordance with the Incident Management Policy. In such circumstances, the DCC may continue (notwithstanding Section E1.1) to rely upon and use any or all of the Registration Data that existed prior to its receipt of the incremental update that included any such omission or manifest error, unless the Incident Management Policy provides for an alternative course of action.

RDP Security Obligations

E2.14 Each Electricity Network Party and each Gas Network Party shall ensure that its Registration Data Provider (being the Network Party itself where that is deemed to be the case in accordance with the definition of Registration Data Provider) shall (when acting in its capacity as the Network Party's Registration Data Provider) comply with the obligations expressed to be placed on Users and identified in Section E2.15 as if, in the case of each such obligation:

(a) references to User were references to such Registration Data Provider; and

(b) references to User Systems were references to the RDP Systems of that Registration Data Provider.

E2.15 The obligations identified in this Section E2.15 are those obligations set out at:

(a) Sections G3.2 to G3.3 (Unauthorised Activities: Duties to Detect and Respond);

(b) Sections G3.8 to G3.9 (Management of Vulnerabilities);

(c) Sections G5.14 to G5.18 (Information Security: Obligations on Users), save that for this purpose the reference:

(i) in Section G5.18(b)(i) to "Sections G3 and G4" shall be read as if it were to "Sections G3.2 to G3.3 and G3.8 to G3.9"; and

(ii) in Section G5.18(b)(iii) to "Sections G5.19 to G5.24" shall be read as if it were to "Section G5.19(d)".

E2.16 Each Electricity Network Party and each Gas Network Party shall ensure that its Registration Data Provider (being the Network Party itself where that is deemed to be the case in accordance with the definition of Registration Data Provider) shall (when acting in its capacity as the Network Party's Registration Data Provider) propose to the DCC one or more EUI-64 Compliant identification numbers, issued to the RDP by the Panel, to be used by that RDP when acting in its capacity as such (save that it may use the same identification number when acting as an RDP for more than one Network Party).

E2.17 The DCC shall accept each identification number proposed by each Registration Data Provider for the purposes set out in Section E2.16 (and record such numbers as identifying, and use such numbers to identify, such RDP when acting as such); provided that the DCC shall only accept the proposed number if it has been issued by the Panel.

Security Obligations on CSS Provider

E2.18 The CSS Provider shall comply with the obligations expressed to be placed on Users and identified in Section E2.15 as if, in the case of each such obligation:

(a) references to User were references to the CSS Provider; and

(b) references to User Systems were references to the CSS Provider Systems.

E2.19 The CSS Provider shall ensure that any Registration Data that it sends is Digitally Signed using a Private Key that is associated with a Public Key contained within an Organisation Certificate.

E2.20 The DCC shall only use Registration Data received from the CSS Provider if:

(a) it has successfully carried out a Check Cryptographic Protection in respect of that Registration Data and successfully carried out a Confirm Validity of the Organisation Certificate used to Check Cryptographic Protection; and

(b) the DCC has not previously successfully carried out the checks set out in paragraph E2.20(a) on that Registration Data.

Disputes

E2.21 Any Dispute regarding compliance with this Section E2 may be referred to the Panel for its determination, which shall be final and binding for the purposes of this Code; save that Disputes regarding compliance with Section E2.14 shall be subject to the means of Dispute resolution applying to the provisions of Section G (Security) referred to in Section E2.15 (as set out in Section G).

Provision of Further Data

E2.22 The Parties agree that the DCC may send the notification in Section E2.23 and the associated information set out in Section E2.24 to the CSS Provider.

E2.23 The notification referred to in Section E2.22 is a notification that a Smart Meter has been added to the Device Log of a Communications Hub.

E2.24 The information referred to in Section E2.22 is any information held in the Smart Metering Inventory that pertains to either the Communications Hub referred to in Section E2.23 or to any Smart Meter that is listed in the Device Log of that Communications Hub.

E3. DCC GATEWAY CONNECTIONS FOR REGISTRATION DATA PROVIDERS

Provision of a DCC Gateway Connection for RDPs

E3.1 Registration Data Providers may request DCC Gateway Connections, and the DCC shall offer to provide such connections, in accordance with Sections H15.4 and H15.6 to H15.12 (as if Registration Data Providers were Parties), save that a Registration Data Provider shall not specify which DCC Gateway Bandwidth Option it requires, and shall instead specify which (if any) other Registration Data Providers it intends to share the connection with pursuant to Section E3.4.

E3.2 The DCC shall provide DCC Gateway Connections to the premises of Registration Data Providers in accordance with Sections H15.13 to H15.15 (as if Registration Data Providers were Parties), save that no Charges shall apply.

E3.3 The DCC shall ensure that the DCC Gateway Connection it provides to the premises of Registration Data Providers pursuant to this Section E3 is of a sufficient bandwidth to meet the purposes for which such connection will be used by the Registration Data Provider, and any other Registration Data Providers notified to the DCC in accordance with Section E3.1 or E3.4 (provided, in the case of those notified in accordance with Section E3.4, that the DCC may object to the transfer or sharing where it reasonably believes that the connection will not be of sufficient bandwidth to meet the needs of all of the Registration Data Providers in question).

E3.4 Each Registration Data Provider may transfer or share its rights in respect of the DCC Gateway Connection provided to its premises pursuant to this Section E3 in accordance with Sections H15.16 and H15.17 (as if Registration Data Providers were Parties), save that such rights may only be transferred to or shared with other Registration Data Providers for the purposes of accessing the Registration Data Interface.

E3.5 Once a DCC Gateway Connection has been established:

(a) the Registration Data Provider that requested it (or to whom it has been transferred in accordance with Section E3.4) and the DCC shall each comply with the provisions of the DCC Gateway Connection Code of Connection applicable to the DCC Gateway Bandwidth Option utilised at the connection; and

(b) the DCC shall make the connection available to such Registration Data Provider until: (i) the DCC is notified by such Registration Data Provider that it wishes to cancel the connection; or (ii) such Registration Data Provider ceases to be a Registration Data Provider for one or more Network Parties.

DCC Gateway Equipment at RDP Premises

E3.6 The DCC and each Registration Data Provider shall comply with the provisions of Sections H15.20 to H15.28 in respect of the DCC Gateway Equipment installed (or to be installed) at a Registration Data Provider's premises (as if Registration Data Providers were Parties), save that Section H15.28 shall be construed by reference to Section E3.5(b).

Interpretation

E3.7 Given the application of certain provisions of Section H15 to Registration Data Providers in accordance with this Section E3, defined terms used in Section H15 and/or the DCC Gateway Connection Code of Connection shall be construed accordingly (including DCC Gateway Party by reference to the Registration Data Provider which requested the connection, or to whom the right to use the connection has been transferred pursuant to Sections E3.4 and H15.16). Given that Registration Data Providers do not specify the DCC Gateway Bandwidth Option that they require (and that the DCC instead determines the most appropriate bandwidth), references in Section H15 to the bandwidth requested by a Party shall be construed accordingly.

Liability of and to the Network Parties

E3.8 Each Network Party shall ensure that its Registration Data Provider (being the Network Party itself where that is deemed to be the case in accordance with the definition of Registration Data Provider) shall comply with the obligations expressed to be placed on Registration Data Providers under or pursuant to this Section E3.

E3.9 Where more than one Network Party nominates the same Registration Data Provider, each of those Network Parties shall be jointly and severally liable for any failure by that Registration Data Provider to comply with the obligations expressed to be placed on Registration Data Providers under or pursuant to this Section E3.

E3.10 The DCC acknowledges that it is foreseeable that Network Parties will have made arrangements with their Registration Data Providers such that breach by the DCC of this Section E3 will cause the Network Parties to suffer loss for which the DCC may be liable (subject to Section M2 (Limitations of Liability)).

Disputes

E3.11 Where a Registration Data Provider wishes to raise a dispute in relation to its request for a DCC Gateway Connection, then the dispute may be referred to the Panel for determination. Where that Registration Data Provider or the DCC disagrees with any such determination, then it may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

E4. RDP ENTRY PROCESS

Overview

E4.1 Before Data is exchanged between the DCC and a Registration Data Provider under Section E2 (Provision of Data) for the first time, the Registration Data Provider must successfully complete the RDP Entry Process Tests.

RDP Entry Process Tests

E4.2 The "**RDP Entry Process Tests**" are, in respect of an RDP, tests to demonstrate that the DCC and the RDP are capable of exchanging Data under Section E2 (Provision of Data), as such tests are further described in the Enduring Testing Approach Document. An RDP which successfully completed Code Implementation SIT shall be deemed to have successfully completed the RDP Entry Process Tests.

E4.3 Each RDP that has not (and is not deemed to have) successfully completed the RDP Entry Process Tests shall be entitled to undertake RDP Entry Process Tests. Each RDP that has been nominated by one or more Network Parties for which the RDP was not nominated at the time that it successfully completed the RDP Entry Process Tests (or was deemed to do so) shall be entitled to undertake RDP Entry Process Tests in relation to such Network Parties. Each RDP is only obliged to successfully complete the RDP Entry Process Tests once.

E4.4 Each RDP that undertakes RDP Entry Process Tests shall:

(a) do so in accordance with Section H14 (Testing Services) and the Enduring Testing Approach Document; and

(b) be a Testing Participant for the purposes of RDP Entry Process Tests (and the provisions of Section H14 shall apply accordingly, including in respect of Testing Issues).

E4.5 The RDP will have successfully completed the RDP Entry Process Tests once the DCC considers that both it and the RDP have demonstrated that they have satisfied the applicable requirements set out in the Enduring Testing Approach Document.

E4.6 Where requested by the RDP, the DCC shall provide written confirmation to the RDP confirming whether or not the DCC considers that the RDP Entry Process Tests have been successfully completed.

E4.7 Where the DCC is not satisfied that the RDP Entry Process Tests have been successfully completed, the RDP may refer the matter to the Panel for its determination. Where the RDP disagrees with any such determination of the Panel, then the RDP may refer the matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

Liability of and to the Network Parties

E4.8 Each Network Party shall ensure that its Registration Data Provider (being the Network Party itself where that is deemed to be the case in accordance with the definition of Registration Data Provider) shall comply with the obligations expressed to be placed on Registration Data Providers under or pursuant to this Section E4. An RDP need not enter into an Enabling Services Agreement (and Section H14.7 shall not apply to RDPs).

E4.9 Where more than one Network Party nominates the same Registration Data Provider, each of those Network Parties shall be jointly and severally liable for any failure by that Registration Data Provider to comply with the obligations expressed to be placed on Registration Data Providers under or pursuant to this Section E4.

E4.10 The DCC acknowledges that it is foreseeable that Network Parties will have made arrangements with their Registration Data Providers such that breach by the DCC of this Section E4 will cause the Network Parties to suffer loss for which the DCC may be liable (subject to Section M2 (Limitations of Liability)).

E5. ADDITIONAL REGISTRATION DATA

Electricity Data

E5.1 Each Electricity Network Party shall with effect from calendar month October 2020 provide (or procure that its Registration Data Provider provides) to the DCC by no later than the last day of each calendar month (the '**relevant calendar month**') the data referred to in Section E5.2 in respect of each Electricity Supplier Party.

E5.2 The data to be provided to the DCC by the Electricity Network Party in accordance with Section E5.1 is the number of Metering Points on its network that relate to Designated Premises at which:

(a) the Electricity Supplier Party is Registered on the 15th day of the relevant calendar month; and

(b) the quantity of electricity supplied to the premises is measured by an Electricity Meter that is an Advanced Meter,

(**Electricity Additional Registration Data**).

Gas Data

E5.3 Each Gas Network Party shall with effect from calendar month October 2020 provide (or procure that its Registration Data Provider provides) to the DCC by no later than the last day of each calendar month (the '**relevant calendar month**') the data referred to in Section E5.4 in respect of each Gas Supplier Party.

E5.4 The data to be provided to the DCC by the Gas Network Party in accordance with Section E5.3 is the number of Supply Meter Points on its network that relate to Designated Premises at which:

(a) the Gas Supplier Party is Registered on the 15th day of the relevant calendar month; and

(b) the quantity of gas supplied to the premises is measured by a Gas Meter that is an Advanced Meter, (Gas Additional Registration Data).

Contents

F SMART METERING SYSTEM REQUIREMENTS

F1. TECHNICAL SUB-COMMITTEE

Establishment of the Technical Sub-Committee

F1.1 The Panel shall establish a Sub-Committee in accordance with the requirements of this Section F1, to be known as the "**Technical Architecture and Business Architecture Sub-Committee**".

F1.2 Save as expressly set out in this Section F1, the Technical Architecture and Business Architecture Sub-Committee shall be subject to the provisions concerning Sub- Committees set out in Section C6 (Sub-Committees).

F1.3 Membership of the Technical Architecture and Business Architecture Sub-Committee shall be determined by the Panel:

(a) having regard to the need to provide an appropriate level of technical and business architecture expertise in the matters that are the subject of the Technical Architecture and Business Architecture Sub-Committee's duties; and

(b) otherwise in accordance with Section C6.7 (Membership).

Duties of the Technical Architecture and Business Architecture Sub-Committee

F1.4 The Technical Architecture and Business Architecture Sub-Committee shall undertake the following duties on behalf of the Panel:

(a) to provide the Panel, the Change Sub-Committee, the Change Board and Working Groups with technical and business architecture support and advice in respect of Draft Proposals and Modification Proposals that provide for variations to the Technical Code Specifications (or variations to other parts of this Code that affect the End-to-End Technical Architecture and/or the Business Architecture);

(b) to provide the Panel, the Change Sub-Committee, the Change Board and Working Groups with technical and business architecture support and advice in respect of Draft Proposals and Modification Proposals that are identified as likely (if approved) to require changes to the End-to-End Technical Architecture and/or to the Business Architecture;

(c) to provide the Authority (on request) with such information as the Authority may request regarding the technical aspects of any Notification (or potential Notification);

(d) to provide the Panel with technical and business architecture support and advice in respect of Disputes for which the Panel is required to make a determination, insofar as such Disputes relate to the Technical Code Specifications (or other parts of this Code that affect the End-to-End Technical Architecture and/or the Business Architecture);

(e) to review (where directed to do so by the Panel) the effectiveness of the End-to- End Technical Architecture (including so as to evaluate whether the Technical Code Specifications continue to meet the SEC Objectives), and report to the Panel on the outcome of such review (such report to include any recommendations for action that the Technical Architecture and Business Architecture Sub-Committee considers appropriate);

(f) to review (where directed to do so by the Panel) the effectiveness of the Business Architecture (including their assessment against the SEC Objectives), in consultation with Parties and Competent Authorities (but without engaging directly with Energy Consumers), and report to the Panel on the outcome of such review (such report to include any recommendations for action that the Technical Architecture and Business Architecture Sub-Committee considers appropriate);

(g) to review (where directed to do so by the Panel) the effectiveness of the HAN Requirements (including their assessment against the SEC Objectives), in consultation with Parties and Competent Authorities (but without engaging directly with Energy Consumers), and report to the Authority and the Panel on the outcome of such review;

(h) to support the Panel in the technical and business architecture aspects of the annual report which the Panel is required to prepare and publish under Section C2.3(h) (Panel Duties);

(i) to develop and thereafter maintain the Technical Architecture Document and the Business Architecture Document, and arrange for their publication on the Website;

(j) to provide the Panel with support and advice in respect of any other matter (not expressly referred to in this Section F1.4) which is concerned with the End-to- End Technical Architecture and/or the Business Architecture;

(k) (to the extent to which it reasonably considers that it is necessary to do so) to liaise and exchange information with, provide advice to, and seek the advice of the Alt HAN Forum on matters that relate to the End-to-End Technical Architecture and/or the Business Architecture; and

(l) to perform any other duties expressly ascribed to the Technical Architecture and Business Architecture Sub-Committee elsewhere in this Code.

F1.5 In undertaking its duties under Section F1.4(e) to (g), the Technical Architecture and Business Architecture Sub-Committee shall not review the Alt HAN Arrangements but may have regard to any impact of the provision of Alt HAN Services on the End-to- End Technical Architecture and/or the Business Architecture.

F1.6 The Technical Architecture and Business Architecture Sub-Committee shall establish a process whereby the Code Administrator monitors Draft Proposals and Modification Proposals with a view to identifying (and bringing to the Technical Architecture and Business Architecture Sub-Committee's attention) those proposals that are likely to affect the End-to-End Technical Architecture and/or the Business Architecture. The Code Administrator shall comply with such process.

F1.7 The Panel shall make each report produced pursuant to Section F1.4 available to the Parties, subject to any redactions it considers necessary to avoid a risk of Compromise to the DCC Total System, User Systems, RDP Systems and/or Devices.

DCC Obligations

F1.8 The DCC shall provide all reasonable assistance and information to the Technical Architecture and Business Architecture Sub-Committee in relation to the performance of its duties as it may reasonably request, including by providing the Technical Architecture and Business Architecture Sub-Committee with any requested Solution Architecture Information.

Provision of Information in respect of HAN Requirement Reviews

F1.9 Each Party shall provide to the Technical Architecture and Business Architecture Sub- Committee all such information as it may reasonably request in relation to its reviews of the HAN Requirements.

F2. CENTRAL PRODUCTS LIST

Central Products List

F2.1 The Panel shall establish and maintain a list (the "**Central Products List**") of:

(a) the SMETS2+ Device Models for which the Panel has received all the Assurance Certificates required for the Physical Device Type relevant to that Device Model (known as the Certified Products List); and

(b) in the case of SMETS1 Device Models, those Device Models for which the Panel has received all the information required in accordance with the CPL Requirements Document (which does not require any certification of SMETS1 Devices under the CPA or any other assurance scheme).

F2.2 The Panel shall ensure that the Central Products List identifies the Data required in accordance with the CPL Requirements Document, and that the Central Products List is updated to add and remove Device Models in accordance with the CPL Requirements Document (including as described in Section F2.7A).

F2.2A Where a Party disagrees with any decision of the Panel to add, remove, not remove, reinstate, or not reinstate a SMETS1 Device Model to or from the Central Products List, that Party may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

Background to Assurance Certificates

F2.2B For SMETS1 Device Models, there are no required Assurance Certificates for any of the Physical Device Types.

F2.3 The Technical Specification relevant to the Physical Device Type sets out which Physical Device Types require Assurance Certificates from one or more of the following persons (each being an "**Assurance Certification Body**"):

(a) the ZigBee Alliance;

(b) the DLMS User Association; and

(c) NCSC.

F2.4 The following Assurance Certification Bodies issue the following certificates in respect of Device Models of the relevant Physical Device Types (each being, as further described in the applicable Technical Specification, an "**Assurance Certificate**"):

(a) the ZigBee Alliance issues certificates which contain the ZigBee certified logo and interoperability icons;

(b) the DLMS User Association issues certificates which include the conformance tested service mark (" **DLMS Certificates**"); and

(c) NCSC issues commercial product assurance scheme certificates ("**CPA Certificates**").

F2.5 An Assurance Certificate will not be valid unless it expressly identifies the Device Model(s) and the relevant Physical Device Type to which it applies. With the exception of a CPA Certificate, an Assurance Certificate will not be valid if it specifies an expiry date that falls more than 6 years after its issue.

Expiry and renewal of CPA Certificates

F2.6 As CPA Certificates that have not been withdrawn or cancelled will require periodic renewal at their expiry or renewal date, the following Parties shall ensure that action is taken to ensure that a CPA Certificate can be considered for renewal in respect of Device Models for the following Physical Device Types before the expiry or renewal date of such CPA Certificate (to the extent Device Models of the relevant Physical Device Type require CPA Certificates in accordance with the applicable Technical Specification):

(a) the DCC for Communications Hubs; and

(b) the Import Supplier and/or Gas Supplier (as applicable) for Device Models of all other Physical Device Types.

F2.7 The Panel shall notify the Parties on or around the dates occurring 12 and 6 months prior to the date on which the CPA Certificate for any Device Model is due to expire. The Panel shall also provide to the Parties any notice concerning CPA Certificates which the NCSC asks the Panel to provide to the Parties.

Consequence of Expiry, Withdrawal or Cancellation of Assurance Certificates

F2.7A Where:

(a) a CPA Certificate for a Device Model expires or is not renewed or is withdrawn or cancelled by the NCSC, then the Security Sub-Committee shall determine whether to remove that Device Model from the Central Products List in accordance with the CPL Requirements Document, which may provide for a CPA Certificate Remedial Plan to be imposed;

(b) any other type of Assurance Certificate for a Device Model is withdrawn or cancelled by the Assurance Certification Body that issued the certificate, then the Panel shall remove that Device Model from the Central Products List.

F2.7B Where a Party disagrees with any decision of the Security Sub-Committee made in accordance with the CPL Requirements Document:

(a) to remove or not remove a Device Model from the Central Products List;

(b) to not approve the Party's CPA Certificate Remedial Plan (where the Security Sub-Committee has determined that a CPA Certificate Remedial Plan is to be imposed on the Party),

that Party may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

Publication and Use by the DCC

F2.8 Subject to the requirements of the CPL Requirements Document, the Panel shall (within one Working Day after being required to add or remove Device Models to or from the Central Products List in accordance with the CPL Requirements Document):

(a) provide the updated Central Products List to the DCC (by way of an extract containing such subset of the information contained within the Central Products List as the DCC reasonably requires from time to time);

(b) publish a copy of the updated Central Products List on the Website; and

(c) notify the Parties that the Central Products List has been updated.

F2.9 Subject to the requirements of the CPL Requirements Document, the DCC shall, from time to time, use and rely upon the Central Products List most recently received by the DCC from the Panel at that time, provided that the DCC shall be allowed up to 24 hours from receipt to make any modifications to the Smart Metering Inventory that are necessary to reflect the updated Central Products List.

Deployed Products List

F2.10 The DCC shall create, keep reasonably up-to-date and provide to the Panel (and the Panel shall publish on the Website) a list (the "**Deployed Products List**") of all the combinations of different Device Models that comprise a Smart Metering System (together with Associated Type 2 Devices) that exist from time to time (to the extent recorded by the Smart Metering Inventory).

SMETS1 Lists

F2.10A The DCC shall create, keep up-to-date and provide to the Panel (and the Panel shall publish on the Website) lists of:

(a) each combination of SMETS1 Device Models and communication services provider in relation to which the DCC has demonstrated through testing (which may include testing of a different combination that the DCC considers to be substantively equivalent) that it is able to successfully process SMETS1 Service Requests and relevant SMETS1 Alerts (the "**SMETS1 Eligible Product Combinations**"), including the date on which each entry was first added to the list; and

(b) each combination of SMETS1 Device Models and communication services provider) in relation to which the DCC is at that time:

(i) considering whether testing or development is required to demonstrate the capability; or

(ii) developing and/or testing the capability,

to successfully process SMETS1 Service Requests and relevant SMETS1 Alerts (the "**SMETS1 Pending Product Combinations**"), provided that the DCC shall not add a Device Model combination to the SMETS1 Pending Product Combinations where the relevant Testing Participant has indicated pursuant to clause 9 (SMETS1 Pending Product Combinations Tests) of the Enduring Testing Approach Document that such information should be treated as confidential.

F2.10B The obligation of the DCC under Section F2.10A(a) shall only apply once the DCC is first permitted under the Transition and Migration Approach Document to add a combination of Device Models to the SMETS1 Eligible Product Combinations.

Technical Specification Incompatibility

F2.11 The Panel shall create, keep reasonably up-to-date and publish on the Website a matrix specifying:

(a) which Versions of each Technical Specification are incompatible with which Versions of each other Technical Specification; and

(b) where applicable, those areas in respect of which the Version of the Technical Specification is not incompatible with the Version of the other Technical Specification but may be subject to the application of particular constraints as identified

F2.12 For the purposes of Section F2.11:

(a) 'incompatible' means in respect of a Version of any Technical Specification, that Devices or apparatus which comply with that Version are known to have been designed in a manner that does not enable them to inter-operate fully with Devices or apparatus that comply with the specified Version of each other Technical Specification;

(b) each reference to a Version of a Technical Specification shall be read as being to that Version taken together with any relevant Version of the GB Companion Specification (as identified in the TS Applicability Tables), so that if there is more than one relevant Version of the GB Companion Specification for any Version of a Technical Specification, the matrix shall make separate provision for each of them; and

(c) the matrix need not specify:

(i) which Versions of the ESMETS are incompatible with Versions of the GSMETS;

(ii) which Versions of the GSMETS are incompatible with which Versions of:

(A) the ESMETS;

(B) the HCALCSTS; or

(C) the SAPCTS.

F2.13 The Panel shall, as soon as reasonably practicable after it makes a change to such matrix, notify all the Parties that a change has been made.

Firmware Information Repository

F2.14 The Panel shall establish and maintain a list of firmware releases, updates, and corresponding Manufacturer contact details (the **“Firmware Information Repository”**), for the following Devices:

(a) ESME

(b) GSME

(c) PPMID

(d) HCALCS

(e) SAPC

(f) SMETS1 CH or SMETS2+ Communications Hub

F2.15 The Panel shall ensure that the Firmware Information Repository contains a minimum of four fields:

(a) A number which uniquely identifies a record on the Central Products List, which is a mandatory field;

(b) Manufacturer contact details, which is a mandatory field, to include email address, telephone number and business address;

(c) A free text field for release notes that Manufacturers can record against, which is a mandatory field for completion but the content is at the discretion of the Manufacturer; and

(d) Where a firmware upgrade to the Device Model identified by (a) is possible, the number(s) of the records(s) on the Central Products List which identify the suitable baseline Device Model(s), which is a mandatory field.

F2.16 The Firmware Information Repository will be updated alongside the Central Products List, with the number which uniquely identifies a record on the Central Products List providing a cross reference.

F2.17 The Party or any other person submitting Device details for addition to the Central Products List shall also supply the details listed in F2.15 for the same Device.

F2.17B The information contained within the Firmware Information Repository shall be available to SEC Parties only and must not be shared.

Device Trials

F2.18 The Security Sub-Committee shall consider applications from Manufacturers for SMETS2+ Device Models to be added to the Central Products List, on a limited trial basis, without a CPA Certificate needing to be issued by the NCSC. If approved by the Security Sub-Committee, the relevant SMETS2+ Device Model will be known as a "**Trial Device Model**" for the duration set out in the approval (the " **Trial Device Approval**"). The Security Sub-Committee shall have sole discretion in deciding whether to grant a Trial Device Approval.

F2.19 In its application for Trial Device Approval, the applicant Manufacturer must evidence that the SMETS2+ Device Model for which it is seeking approval has all Assurance Certificates other than a CPA Certificate issued by the NCSC.

F2.20 The Security Sub-Committee shall require a business rationale to support the application, a security risk assessment, and assurance that Energy Consumers of Trial Device Models shall be required to opt into trial participation and informed of the implications of doing so, and may (at its sole discretion) set additional requirements that must be evidenced in an application.

F2.21 Where a Trial Device Approval is granted, the Security Sub-Committee shall set out in a written notice to the Manufacturer and the Panel:

(a) a detailed description of the Trial Device Model;

(b) a summary of why the Trial Device Approval is being granted and the assessment undertaken by the Security Sub-Committee in considering the application;

(c) the start date and expiry date of the Trial Device Approval;

(d) the maximum number of Devices of the Trial Device Model that may be deployed; and

(e) any other conditions applied to the Trial Device Approval.

F2.22 The Security Sub-Committee shall determine the appropriate level of detail to be provided in the Trial Device Approval notice and shall not be required to disclose any information it considers sensitive.

F2.23 If one or more of the conditions applicable to the Trial Device Model are breached, then the Trial Device Approval may be withdrawn or cancelled by the Security Sub-Committee.

F2.24 Where an application is not approved, the Security Sub-Committee shall set out in a written notice to the Manufacturer and the Panel a summary of why approval has not been granted and the assessment undertaken in considering the application. The Security Sub-Committee shall determine the appropriate level of detail to be provided in the summary and shall not be required to disclose any information it considers sensitive.

F2.25 A Trial Device Model will be deemed to have a valid CPA Certificate for the duration of the Trial Device Approval. The Security Sub-Committee shall issue a trial certificate (the "**Trial Device Certificate**") for the duration of the trial in lieu of the CPA Certificate that would ordinarily be issued by the NCSC. The Trial Device Certificate will include an identifier code which is unique to the Trial Device Model and the Trial Device Approval as well as an expiry date which matches the expiry date of the Trial Device Approval. The Trial Device Certificate will be provided to the Manufacturer and the Panel.

F2.26 In respect of a Trial Device Model, this Code will be construed such that any requirement for a SMETS2+ Device Model to have a CPA Certificate shall be deemed satisfied by a valid Trial Device Certificate. Where necessary, the requirements of this Code applicable to a CPA Certificate will be construed so as to not inhibit the use of a Trial Device Model in accordance with a Trial Device Approval and Sections F2.18 to F2.32.

F2.27 With effect from the start date set out in the Trial Device Approval, the Panel shall add the Trial Device Model to the Central Products List. The Central Products List must show that the relevant SMETS2+

Device Model is a Trial Device Model, identify the specific Trial Device Approval that applies to the Trial Device Model, and include the expiry date for such approval.

F2.28 On a monthly basis, the DCC shall provide the Security Sub-Committee with a copy of the Smart Metering Inventory so that the Security Sub-Committee can extract details of Trial Device Models.

F2.29 The Manufacturer of a Trial Device Model may apply to the Security Sub-Committee to request an amendment to its Trial Device Approval. The Security Sub-Committee may amend a Trial Device Approval at any time and at its sole discretion, irrespective of whether an amendment application has been made by the Manufacturer. If the Security Sub-Committee amends a Trial Device Approval, it shall notify the Manufacturer and the Panel. The notice will include a summary of why the Trial Device Approval has been amended. The Security Sub-Committee shall determine the appropriate level of detail to be provided and shall not be required to disclose any information it considers sensitive. Where necessary, the Panel shall update the Central Products List to reflect such amendment.

F2.30 The Security Sub-Committee may withdraw or cancel a Trial Device Approval at any time and at its sole discretion. Upon such withdrawal or cancellation, the Security Sub-Committee shall notify the Manufacturer and the Panel. The notice will include a summary of why the Trial Device Approval has been withdrawn or cancelled. The Security Sub-Committee shall determine the appropriate level of detail to be provided and shall not be required to disclose any information it considers sensitive.

F2.31 If a Trial Device Approval expires, or is withdrawn or cancelled, the Trial Device Certificate will expire, be withdrawn or be cancelled (as applicable) by the Security Sub-Committee and the provisions of Clause 6 (Removal of Device Models from the List) of Appendix Z shall apply in determining whether or not to remove the Trial Device Model from the Central Products List and whether a Trial Device Remedial Plan is to be imposed. If it is determined that the Trial Device Model shall be removed from the Central Products List, the Manufacturer may either apply for a new Trial Device Approval or apply for a CPA Certificate.

F2.32 Where a Trial Device Model is removed from the Central Products List, all Devices of the relevant SMETS2+ Device Model must be promptly Decommissioned by the Responsible Supplier, unless:

(a) the relevant SMETS2+ Device Model has since gained a CPA Certificate (or a new Trial Device Certificate) and has been updated accordingly on the Central Products List; or

(b) the relevant Device can be (and is) updated via firmware to become a SMETS2+ Device Model which is listed on the Central Products List.

Device Zigbee Information Repository

F2.33 The Panel shall establish and maintain a list of Device Zigbee releases, updates and corresponding Manufacturer contact details (the "Device Zigbee Information Repository").

F2.34 The Panel shall ensure that the Device Zigbee Information Repository contains a minimum of three fields:

(a) Zigbee chipset vendor, which is a mandatory field;

(b) Zigbee stack version, which is a mandatory field; and

(c) Central Product List entry ID.

F2.35 The Device Zigbee Information Repository will be updated alongside the Firmware Information Repository and the Central Products List, with the number which uniquely identifies a record on the Firmware Information Repository and the Central Products List providing a cross reference.

F2.36 The Device Zigbee Information Repository will include the Central Products List entry ID to allow the Data in the Device Zigbee Information Repository to be mapped to the Device on the Central Product List.

F2.37 The Party or any other person submitting Device details for addition to the Central Products List shall also supply the details listed in F2.15 for the same Device.

F2.38 The Security Sub-Committee shall manage the access to the Device Zigbee Information Repository.

F3. PANEL DISPUTE RESOLUTION ROLE

F3.1 Where a Party considers that a device which is required under the Energy Licences to meet the requirements of the Technical Specifications does not meet the applicable requirements of the Technical Specifications, then that Party may refer the matter to the Panel for its determination. For the purposes of this Section F3, the relevant licence requirements are Condition 39 of the Electricity Supply Licences, Condition 33 of the Gas Supply Licences, and Condition 17, Part E of the DCC Licence.

F3.2 The devices to which this Section F3 applies need not form part of Enrolled Smart Metering Systems.

F3.3 The DCC shall retain evidence to demonstrate that the Communications Hubs (as defined in the DCC Licence) meet the DCC's obligations under the DCC Licence to ensure compliance with the CHTS. The DCC shall make that evidence available to the Panel or the Authority on request.

F3.4 Save to the extent the DCC is responsible under Section F3.3, each Supplier Party shall retain evidence to demonstrate that the Devices for which it is responsible under the Energy Licences for ensuring Technical Specification compliance do so comply. Each Supplier Party shall make that evidence available to the Panel or the Authority on request.

F3.5 Where the Panel determines that any device or devices that were intended to meet the requirements of a Technical Specification do not meet the applicable requirements of the Technical Specification, the Panel may (to the extent and at such time as the Panel sees fit, having regard to all the circumstances and any representations made by any Competent Authority or any Party) require the relevant Supplier Party or the DCC (as applicable under Section F3.3 or F3.4) to give effect to a reasonable remedial plan designed to remedy and/or mitigate the effect of such non-compliance within a reasonable timescale.

F3.6 Where a Party disagrees with any decision of the Panel made pursuant to Section F3.5, that Party may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

F3.7 Subject to any determination by the Authority pursuant to Section F3.6, where the Panel requires a Supplier Party to give effect to a remedial plan in accordance with Section F3.5 and where that Supplier Party fails in a material respect to give effect to that remedial plan, then such failure shall constitute an Event of Default for the purposes of Section M8 (Suspension, Expulsion and Withdrawal).

F3.8 For the avoidance of doubt, no decision of the Panel pursuant to this Section F3 is intended to fetter the discretion of the Authority to enforce any breach of any Energy Licence.

F4. OPERATIONAL FUNCTIONALITY, INTEROPERABILITY AND ACCESS

Operational Functionality

F4.1 The Responsible Supplier for each Enrolled Smart Metering System shall ensure that the Smart Metering System (excluding the Communications Hub Function) is not configured in a way that restricts the minimum functions that the Smart Metering System is required to be capable of providing in order that the DCC can provide the Services in accordance with this Code.

F4.1A The Lead Supplier for a SMETS1 CH shall take all reasonable steps to ensure that the SMETS1 CHF forming part of that SMETS1 CH is not configured in a way that restricts the minimum functions that any Smart Metering System of which the SMETS1 CHF forms part is required to be capable of providing in order that the DCC can provide the Services in accordance with this Code.

F4.1B Subject to Section F4.1C, where the Lead Supplier for a SMETS1 CH upgrades the firmware for or replaces the SMETS1 CHF and/or SMETS1 GPF comprising that SMETS1 CH, then the Lead Supplier shall take reasonable steps to ensure that the upgraded/replacement SMETS1 CHF and/or SMETS1 GPF is compatible with any and all other Devices that formed part of a Smart Metering System of which the SMETS1 CHF and/or SMETS1 GPF that have been upgraded/replaced also formed part. For the purposes of this Section F4.1B, 'compatible' means that the Devices are of Device Models identified as a combination of Device Models in the then current SMETS1 Eligible Product Combinations.

F4.1C The obligation under Section F4.1B is subject to the Lead Supplier's obligations under its Energy Supply Licence with respect to the installation and maintenance of Smart Metering Systems (as defined in its Energy Supply Licence).

Interoperability of SMETS2+ Communications Hubs with DCC Systems

F4.2 Pursuant to the DCC Licence, the DCC has certain obligations to ensure that SMETS2+ Communications Hubs are interoperable with the DCC Systems.

F4.3 Save to the extent the DCC is responsible as described in Section F4.2, the Responsible Supplier for each Enrolled Smart Metering System (but not SMETS1 SMSs) shall ensure that all the Devices forming part of that Smart Metering System are interoperable with the DCC Total System to the extent necessary to enable those Devices to respond to Commands received from or via the DCC in accordance with the requirements defined in the GB Companion Specification.

F4.4 The DCC and each Supplier Party shall:

(a) ensure that testing has been undertaken to demonstrate its compliance with the obligations set out in or referred to in Section F4.2 or F4.3 (as applicable); and

(b) retain evidence of such testing, and make such evidence available to the Panel and the Authority on request.

Remote Access by DCC

F4.5 Subject to Section F4.5A, the Responsible Supplier for each Enrolled Smart Metering System shall ensure that the DCC is allowed such remote access to the Smart Metering System as is reasonably necessary to allow the DCC to provide the Services and any other services permitted by the DCC Licence in respect of that Smart Metering System (including the right to send communications to, to interrogate, and to receive communications and obtain Data from that Smart Metering System).

F4.5A In the case of SMETS1 CHs, the Supplier Party or Supplier Parties which own or are renting the SMETS1 CH (which may or may not be the Responsible Supplier) shall be obliged to comply with Section F4.5 in respect of the SMETS1 CH.

Physical Access to Devices by Parties

F4.6 Where a Party is expressly required or permitted by this Code to interfere with a SMETS2+ Communications Hub, then the DCC hereby consents to the Party interfering with that Communications Hub in that way (and shall ensure that all persons with a legal interest in the Communications Hub have also so consented).

F4.7 Where a User is expressly required by this Code to interfere with a Device forming part of a Smart Metering System (other than the Devices comprising a SMETS2+ Communications Hub), then the Party which owns that Device (or has made arrangements with its owner for its provision) hereby consents to the User interfering with that Device in that way (and shall ensure that all persons with a legal interest in that Device have also so consented).

Communications with Communications Hubs by DCC over the SM WAN

F4.8 Except where expressly permitted or obliged by this Code, the DCC shall ensure that the only Devices with which it communicates over the SM WAN are those listed in the Smart Metering Inventory. Where a Communications Hub Function or Gas Proxy Function has an SMI Status of ‘suspended’, the DCC shall only initiate a communication with that Device (where it is the target device) if following the successful execution of such communication the DCC can reasonably expect that the associated Communication Hub’s Device Model will become one that is listed on the Central Product List.

F4.9 Except in the circumstances described in Section F4.9B, where the DCC receives a Power Outage Event (AD1) Alert from a Communications Hub Function indicating that no power supply has been available to that Communications Hub Function for a period of at least three minutes, the DCC shall send a copy of the Alert to the Import Supplier (if any) and Electricity Distributor (if any) for that Communications Hub Function.

F4.9A The DCC shall maintain a list of Devices which are known to cause a Communications Hub Function to send a Power Outage Event (AD1) Alert for a short period (of greater than three minutes) following commencement of a firmware update.

F4.9B In relation to Devices on such list, in the case of a Power Outage Event (AD1) Alert being received by the DCC within the period of 30 minutes following commencement of a firmware update, the DCC shall not send a copy of the Alert to the Import Supplier or the Electricity Distributor (but the DCC shall record and store details of the Alert, including its suppression in accordance with this Section F4.9B).

SMETS2+ Communications Hub Procurement

F4.10 The DCC shall publish on the DCC Website the physical dimensions of the Communications Hub Device Models that are made available from time to time pursuant to the Communications Hub Services.

F4.11 Within the relevant period established in accordance with this Section F4.11, the DCC shall consult the other Parties regarding the physical dimensions of the Communications Hub Device Models first made available pursuant to the Communications Hub Services (and shall give due consideration to any consultation responses received when considering the Communications Hubs to be made available in the future). For the purposes of this Section F4.11, the relevant period is the period of 18 months (or such shorter period as the Panel may determine) after the date from which Smart Meters are capable of being Commissioned pursuant to Section H5 (Smart Metering Inventory and Enrolment Services).

F4.12 Prior to committing to the procurement of any Communications Hubs comprising:

(a) HAN Variants and/or WAN Variants that have not previously been made available pursuant to the Communications Hub Services; and/or

(b) Communications Hubs with physical dimensions that differ from the physical dimensions of any Communications Hubs that are (at the time of such proposed procurement) made available pursuant to the Communications Hub Services,

the DCC shall consult the other Parties regarding the physical dimensions of the Communications Hubs to be procured (and shall give due consideration to any consultation responses received).

F4.13 Prior to committing to any arrangements (or any changes to arrangements) for the financing of any Communications Hub procurement, the DCC shall, to the extent such arrangements (or changes) might reasonably be expected to have a material effect on one or more of the other Parties, consult with the other Parties regarding the same. Such consultation shall include the DCC's explanation of how the arrangements (or changes) are consistent with the requirements of the DCC Licence and this Code.

F4.14 In respect of each Dual Band Communications Hub that the DCC delivers pursuant to Section F6 (Delivery and Acceptance of Communications Hubs), the DCC shall ensure that the data items stored on the Communications Hub are (at the time of delivery) configured in accordance with the requirements of the DCC Dual Band Communications Hub Configuration Table.

F4.15 In respect of each Smart Metering System which includes a Dual Band Communications Hub, the Lead Supplier from time to time shall ensure that the data items stored on the Communications Hub are (at all times) configured in accordance with the requirements of the Lead Party Dual Band Communications Hub Configuration Table.

Preventing Unauthorised Access to Data

F4.16 The DCC and each other Party that is responsible from time to time for the risk of loss or destruction of or damage to a SMETS2+ Communications Hub shall take reasonable steps to ensure that Personal Data held on that Communications Hub is protected from unauthorised access during such period of responsibility.

F4.17 The Lead Supplier from time to time for each SMETS1 CH shall take reasonable steps to ensure that Personal Data held on that SMETS1 CH is protected from unauthorised access.

Annex to Section F4 - Dual Band Communications Hub Configuration Tables

Each data item in the first column is to be configured in accordance with third column.

DCC Dual Band Communications Hub Configuration Table

Data item	Reference	Default Value

F5. SMETS2+ COMMUNICATIONS HUB FORECASTS & ORDERS

All references to "Communications Hubs" in this Section F5 are references to "SMETS2+ Communications Hubs".

Availability of CH Variants

F5.1 The DCC shall ensure that Communications Hub Device Models are made available to be ordered by Parties under this Section F5 such that the Parties can order Communications Hubs that provide for each and every combination of HAN Variant and WAN Variant; save that:

(a) this Section F5 does not apply to Special Installation Mesh Communications Hubs (and all references in this Section F5 to Communications Hubs shall be deemed to exclude Special Installation Mesh Communications Hubs); and

(b) the DCC need not provide a 'Variant 450 Communications Hub' (as defined in the CH Installation and Maintenance Support Materials) that operates only with a HAN frequency within the 2400 – 2483.5 MHz harmonised frequency band (as further described in the CHTS).

Temporary CH Ordering and Delivery Rules

F5.1A The provisions of the Section F5 (and the definitions defined by reference to this Section F5) shall apply in accordance with (and subject to) any and all variations applied from time to time under a document to be known as the "**Temporary CH Ordering and Delivery Rules**". The DCC shall produce and obtain the Panel's approval of the Temporary CH Ordering and Delivery Rules, setting out the variations to this Section F5 that are reasonably required as a consequence of global supply chain issues or other reasonable adjustments that might be needed. The DCC may from time to time amend the Temporary CH Ordering and Delivery Rules, the DCC shall consult with Parties and any amendments shall be subject to the Panel's approval, and in accordance with any procedure for amendments set out in the rules. The Temporary CH Ordering and Delivery Rules will include an end date for any requirement, or set of requirements, and any extension must be made in accordance with Section F5.1A.

Communications Hub Forecasts

F5.2 For the purposes of this Section F5, a "**Communications Hub Forecast**" means an estimate of the future requirements of a Party for the delivery to it of Communications Hubs by the DCC, which:

(a) is submitted by that Party to the DCC;

(b) covers the period identified in Section F5.3; and

(c) complies with the requirements of Section F5.4.

F5.3 Each Communications Hub Forecast shall cover the period of 12 months commencing with the sixth month after the end of the month in which the forecast is submitted to the DCC.

F5.4 Each Communications Hub Forecast shall:

(a) comprise a forecast of the number of Communications Hubs that the Party requires to be delivered to it in each month of the period to which it relates;

(b) set out that forecast for each such month by reference to:

(i) the aggregate number of Communications Hubs to be delivered;

(ii) the number of Communications Hubs to be delivered in respect of each Region; and

(iii) the number of Communications Hubs of each HAN Variant to be delivered in respect of each Region ; and

(c) include such further information and be provided in such form as may be set out in the CH Handover Support Materials at the time of its submission.

Parties: Duty to Submit Communications Hub Forecasts

F5.5 Each Supplier Party, and each other Party that intends to order Communications Hubs in the future, shall:

(a) submit a Communications Hub Forecast to the DCC by no later than the 5th Working Day prior to the last Working Day of each month;

(b) submit each Communications Hub Forecast via the CH Ordering System;

(c) take reasonable steps to ensure that the information contained in each Communications Hub Forecast is accurate and up to date; and

(d) ensure that it submits a forecast that will enable it to submit a Communications Hub Order that meets the requirements of Section F5.12.

F5.6 A Party that has not submitted a Communications Hub Forecast for a Region during a month in accordance with this Section F5 shall be deemed to have submitted a forecast which specified the same number of Communications Hubs as the Party forecast or is deemed to have forecast for the previous month.

Communications Hub Orders

F5.7 For the purposes of this Section F5, a "**Communications Hub Order**" means an order by a Party for the delivery to it of Communications Hubs and/or Communications Hub Auxiliary Equipment by the DCC, which:

(a) is submitted by that Party to the DCC; and

(b) satisfies the requirements of Section F5.8.

F5.8 Each Communications Hub Order shall (subject to any further requirements set out in the CH Handover Support Materials):

(a) relate to a single Region, and identify the Region to which it relates;

(b) relate to the delivery of Communications Hubs and/or Communications Hub Auxiliary Equipment in the 5th month after the end of the month in which that Communications Hub Order is submitted to the DCC (the "**Delivery Month**");

(c) specify the addresses of the location or locations (each a "Delivery Location") at which the delivery of the Communications Hubs and/or Communications Hub Auxiliary Equipment is required, each of which locations must be in Great Britain but need not be in the Region to which the relevant Communications Hub Order relates;

(d) specify, in accordance with Section F5.12, the number (if any) of Communications Hubs of each Device Model to be delivered to each Delivery Location (in each case, a **"Delivery Quantity"**);

(e) specify the preferred date within the Delivery Month on which the delivery to each Delivery Location is required (provided that the actual delivery date within the Delivery Month for each Delivery Location (in each case, a "**Delivery Date**") shall be determined in accordance with the CH Handover Support Materials);

(f) specify the number and type of the Communications Hub Auxiliary Equipment (if any) to be delivered to each Delivery Location; and

(g) include such further information and be provided in such form as may be set out in the CH Handover Support Materials at the time of its submission.

F5.9 In respect of each Communications Hub Order submitted in respect of a Region, the Communications Hubs and/or Communications Hub Auxiliary Equipment to be delivered to each Delivery Location on each Delivery Date shall be a "**Consignment**".

F5.10 In order for a Communications Hub Order to be a compliant order, the order must comply with the requirements of this Section F5.10. A Party is not obliged to submit a compliant order, but a non-compliant order may be amended by the DCC in accordance with Section F5.17. The requirements of this Section F5.10 are, for each Communications Hub Order submitted by a Party in respect of a Region, that the aggregate (for all Consignments) of the Delivery Quantities of each HAN Variant for the Delivery Month must be:

(a) greater than or equal to the higher of 80% of the number of Communications Hubs of that HAN Variant forecast for that Delivery Month and Region in the Communications Hub Forecast submitted by that Party in the 12th month prior to the start of the Delivery Month; and

(b) less than or equal to the lower of 120% of the number of Communications Hubs of that HAN Variant forecast for that Delivery Month and Region in the Communications Hub Forecast submitted by that Party in the 12th month prior to the start of the Delivery Month.

F5.11 For the purposes of Section F5.10, in calculating, by reference to earlier forecast numbers:

(a) the minimum aggregate of the Delivery Quantities, any fractions of a number shall be rounded down; and

(b) the maximum aggregate of the Delivery Quantities, any fractions of a number shall be rounded up.

F5.12 For each Party's Communications Hub Order relating to a Region, the aggregate of the Delivery Quantities (for all Device Models taken together) that may be specified for each Consignment may not (unless such number is zero) be less than the minimum delivery quantity set out in the CH Handover Support Materials at the time at which the relevant Communications Hub Order is submitted.

Parties: Rights and Duties in relation to Communications Hub Orders

F5.13 Each Party other than the DCC:

(a) may submit one Communications Hub Order in relation to each Region in any month;

(b) shall submit a Communications Hub Order in relation to a Region in a month if the aggregate of the Delivery Quantities for one or more Device Models required for a compliant order in accordance with Section F5.10 is greater than zero; and

(c) where it fails to submit an order where it is required to do so in accordance with Section F5.13(b), shall be deemed to have submitted a Communications Hub Order for a Delivery Quantity of Communications Hubs of each Device Model equal to the minimum aggregate Delivery Quantity required in respect of that Device Model for a compliant order in accordance with Section F5.10 (and the remaining details of such deemed order shall be determined by the DCC in accordance with the CH Handover Support Materials).

F5.14 Each Party shall ensure that any Communications Hub Order which it elects or is required to submit in any month is submitted by no later than the 5th Working Day prior to the last Working Day of that month.

F5.15 Each Party shall submit its Communications Hub Orders via the CH Ordering System.

DCC: Duties in relation to Communications Hub Orders

F5.16 Where the DCC receives a Communications Hub Order from a Party via the CH Ordering System, the DCC shall:

(a) promptly acknowledge receipt of that order; and

(b) within five Working Days of its receipt of the order, notify the Party either that:

(i) the order satisfies the requirements of Section F5.8, is a compliant order in accordance with Section F5.10 and was submitted in accordance with Section F5.14 (and is therefore accepted); or

(ii) the order does not satisfy some or all of the conditions in (i) above (and is therefore subject to Section F5.17).

F5.17 Where this Section F5.17 applies in respect of a Party's Communications Hub Order, the DCC shall (having regard to the nature, extent and effect of the Party's breach of this Section F5 and/or of the order's non-compliance under Section F5.10, and having regard to the requirements of the DCC Licence) take all reasonable steps to accommodate the order (in whole or part, or subject to amendments). The DCC shall, by the end of the month in which such order is received by the DCC, notify the Party (in each case giving reasons for its decision) that:

(a) the order is accepted in its entirety;

(b) the order is accepted in part or subject to amendment; or

(c) the order is rejected.

DCC Policy

F5.18 The DCC shall develop and make available via the DCC Website a policy describing the circumstances in which it will accept (in whole or part, or subject to amendments) or reject Communications Hub Orders as described in Section F5.17.

Non-Standard Cancellation of Consignments

F5.19 Each Party that has had a Communications Hub Order accepted by the DCC may cancel one or more of the Consignments arising from that Communications Hub Order; provided that the Party must notify the DCC of such cancellation at least 48 hours in advance of the Delivery Date for the Consignment. A Party which cancels one or more Consignments in accordance with this Section F5.19 shall be liable to reimburse the DCC for all reasonable costs and expenses incurred by the DCC as a result of such cancellation. The DCC shall notify the Party of such costs and expenses as soon as reasonably practicable after notice of the cancellation is given. Such compensation shall be included in the next Invoice to be produced by the DCC following its calculation. The DCC shall, where requested not less than 10 Working Days in advance of the Delivery Date, provide a non-binding estimate of the costs and expenses it is likely to incur in the event that a Party opts to cancel a Consignment (such estimate to be provided not less than 5 Working Days in advance of the Delivery Date). The DCC shall take all reasonable steps to ensure the estimate is accurate.

CH Ordering System

F5.20 Subject to Section F5.23, the DCC shall make one or more systems (the **CH Ordering System**) available to other Parties, which Parties can access remotely (via such means, and subject to any security requirements, as are set out in the CH Support Materials).

F5.21 The DCC shall ensure that the CH Ordering System is available in advance of the time from which other Parties are obliged to submit Data via the CH Ordering System, and at all times thereafter (subject to Planned Maintenance undertaken in accordance with Section H8.3).

F5.22 The DCC shall ensure that the CH Ordering System allows each Party to:

(a) submit details of its forecasts, orders and returns of Communications Hubs and/or Communications Hub Auxiliary Equipment, as required in accordance with this Section F5, Sections F6 (Delivery and Acceptance of Communications Hubs) and F8 (Removal and Return of Communications Hub), and the CH Support Materials;

(b) view Data regarding the status of such submissions (but only its own submissions), and (where relevant) receive responses from the DCC regarding such submissions; and

(c) view the SM WAN Coverage Database.

CH Order Management System Accounts

F5.23 The DCC may, as further described in the CH Support Materials:

(a) limit the number of accounts via which each Party is able to access the CH Order Management System without paying any additional Charges; and

(b) allow each Party additional accounts via which it is able to access the CH Order Management System, subject to such Party agreeing to pay the applicable Charges.

F6. DELIVERY AND ACCEPTANCE OF SMETS2+ COMMUNICATIONS HUBS

All references to "Communications Hubs" in this Section F6 are references to "SMETS2+ Communications Hubs".

Delivery

F6.1 The DCC shall ensure that the applicable numbers of Communications Hub Products are delivered in accordance with Valid Communications Hubs Orders to the relevant Delivery Location on the relevant Delivery Date during the relevant Delivery Window.

F6.2 The DCC shall ensure that the Communications Hub Products are delivered in accordance with the delivery requirements set out in the CH Handover Support Materials.

F6.3 The Party assigned responsibility for doing so under the CH Handover Support Materials shall ensure that the Communications Hub Products are unloaded from the delivery vehicle at the Delivery Location in accordance with Good Industry Practice and the CH Handover Support Materials.

F6.4 Delivery of Communications Hub Products pursuant to this Code shall occur on removal of the Communications Hub Products from the delivery vehicle at the Delivery Location (subject to any additional requirements in the CH Handover Support Materials).

F6.5 Risk of loss or destruction of or damage to the Communications Hub Products shall transfer to the Party which submitted the Communications Hub Order on commencement of their unloading at the Delivery Location (where not unloaded by the DCC) or on completion of their unloading at the Delivery Location (where unloaded by the DCC).

F6.6 Notwithstanding delivery, legal and beneficial ownership of the Communications Hub Products shall at all times (for the purposes of this Code) remain vested in the DCC, subject only to Section F7.10 (Ownership of and Responsibility for Communications Hub Auxiliary Equipment).

Confirmation of Delivery

F6.7 The Party which submitted the Valid Communications Hub Order shall confirm whether or not a delivery of Communications Hub Products has been made in compliance with the order within five days after the applicable Delivery Date (such confirmation to be submitted in accordance with and contain the information specified in the CH Handover Support Materials and via the CH Ordering System).

F6.8 Where a Party fails to submit a confirmation in accordance with Section F6.7, the Party shall be deemed to have confirmed that a delivery of Communications Hub Products has been made in compliance with the relevant order.

F6.9 The only grounds for non-compliance under Section F6.7 are that:

(a) no delivery was made to the relevant Delivery Location on the relevant Delivery Date, or the delivery was made but contained fewer Communications Hub Products of the applicable Device Model or type than the DCC was obliged to deliver;

(b) the delivery contained more Communications Hub Products of the applicable Device Model or type than the DCC was obliged to deliver to the relevant Delivery Location on the relevant Delivery Date;

(c) the delivered Communications Hub Products are (or reasonably appear on a visual inspection to be) damaged or have been (or reasonably appear on a visual inspection to have been) tampered with (and such damage or tampering occurred prior to their delivery to the Party as described in Section F6.4); and/or

(d) the Party is otherwise entitled to reject the Communications Hub Products in accordance with the CH Handover Support Materials.

Rejected Communications Hub Products

F6.10 Where a Party notifies the DCC under Section F6.7 that a delivery is non-compliant in accordance with Sections F6.9(b), (c) and/or (d), the Party thereby rejects the Communications Hub Products in question.

F6.11 Where Section F6.10 applies, the Party to which the rejected Communications Hub Products were delivered shall make those Communications Hub Products available for collection by the DCC in accordance with the CH Handover Support Materials.

F6.12 The Party assigned responsibility for doing so under the CH Handover Support Materials shall ensure that the rejected Communications Hub Products are loaded on to the DCC's vehicle in accordance with Good Industry Practice and the CH Handover Support Materials. Risk of loss or destruction of or damage to such Communications Hub Products shall transfer to the DCC on commencement of such loading (where loaded by the DCC) or on completion of such loading (where not loaded by the DCC).

Replacement Communications Hub Products

F6.13 Where a Party notifies the DCC under Section F6.7 that a delivery is non-compliant in accordance with Sections F6.9(a), (c) and/or (d), the DCC shall ensure that replacement Communications Hub Products of the applicable Device Model or type and in the number necessary to make up the shortfall are delivered to the relevant Delivery Location as soon as reasonably practicable thereafter.

F6.14 Where Section F6.13 applies, the DCC shall (via the CH Ordering System) notify the Party of the dates on which the DCC is able to deliver such replacement Communications Hub Products, and this Section F6 shall apply as if:

(a) the replacement Communications Hub Products to be delivered pursuant to this Section F6.14 were the subject of a Valid Communications Hub Order; and

(b) the date selected by the Party, out of the dates so notified by the DCC, was the Delivery Date for that order.

Access to Delivery Location

F6.15 The Party which submitted the Communications Hub Order shall ensure that each of the DCC and its sub-contractors and its and their agents is allowed access to the Delivery Location for the purposes of exercising the DCC’s rights and performing the DCC’s obligations under this Section F6.

F6.16 The DCC shall ensure that each person that accesses a Delivery Location pursuant to Section F6.15 shall do so in compliance with Good Industry Practice and the site rules and reasonable instructions of the relevant Party (or its representatives).

Non-Standard Delivery Options

F6.17 Each Party which submits a Communications Hub Order may specify non-standard delivery instructions where and to the extent provided for in the CH Handover Support Materials. Subject to such Party agreeing to pay any applicable Charges, the DCC shall comply with such delivery instructions.

Failure to Accept Delivery

F6.18 Where the Party which submitted a Valid Communications Hub Order breaches its obligations under this Section F6 and/or the CH Handover Support Materials and as a result the DCC is not able to deliver the Communications Hub Products in accordance with this Code, that Party shall be liable to reimburse the DCC for all reasonable costs and expenses incurred by the DCC as a result. The DCC shall notify the Party of such costs and expenses as soon as reasonably practicable after the event. Such compensation shall be included in the next Invoice to be produced by the DCC following its calculation.

Special Installation Mesh Communications Hubs

F6.19 Special Installation Mesh Communications Hubs are not ordered under Section F5 (Communications Hub Forecasts & Orders). Consequently, Special Installation Mesh Communications Hubs are not delivered under this Section F6. All references in this Section F6 to Communications Hubs shall be deemed to exclude Special Installation Mesh Communications Hubs.

Timing of CHTS Compliance

F6.20 The DCC is obliged under the DCC Licence to deliver Communications Hubs that are within their Installation Validity Period and is thereafter subject to licence obligations relating to their maintenance. Nothing in this Section F6 (or elsewhere in this Code) is intended to require the DCC to ensure CHTS compliance at the time of a Communications Hub's installation.

F6A. TRANSFERRING COMMUNICATIONS HUBS BETWEEN PARTIES

All references to "Communications Hubs" in this Section F6A are references to "SMETS2+ Communications Hubs".

Communications Hub Transfers

F6A.1 Each Party shall be able to take a transfer of Communications Hubs from a Party that is not the DCC (a **"Communications Hub Transfer"**) in accordance with this Section F6A.

Communications Hub Transfer Request

F6A.2 A **"Communications Hub Transfer Request"** means a request by a Party (referred to as the requesting Party) for a Communications Hub Transfer, which request:

(a) is submitted by the requesting Party to the DCC via email to the applicable address published by the DCC on the DCC Website; and

(b) specifies the number of Communications Hubs of each Device Model to be transferred.

F6A.3 Where the DCC receives a Communications Hub Transfer Request from a Party, the DCC shall promptly:

(a) acknowledge receipt of that request; and

(b) notify all Parties which are at that time in receipt of Communications Hubs of the requested Device Model(s) which have not yet been installed or transferred.

F6A.4 Each Party (referred to as the transferring Party) that wishes to transfer Communications Hubs to the requesting Party shall, within 10 Working Days of the DCC's notification, notify the DCC via email of:

(a) the number of Communications Hubs available to transfer to the requesting Party;

(b) whether or not the proposed transfer is capable of acceptance in part (for some only of the Communications Hubs available for transfer);

(c) the addresses of the location or locations (each a "**Transfer Location**") at which collection of the Communications Hubs is required, each of which locations must be in Great Britain; and

(d) the preferred date on which the collection from each Transfer Location is required (a **"Transfer Date"**), which date is subject to change in accordance with the CH Handover Support Materials.

F6A.5 The DCC shall:

(a) where one or more notifications is received in accordance with Section F6A.4, provide such information by email to the requesting Party; and

(b) where the DCC does not receive notifications in accordance with Section F6A.4, reject the Communications Hub Transfer Request and notify the requesting Party of such rejection by email.

F6A.6 Where a notification has been received in accordance with Section F6A.5(a), the requesting Party shall notify DCC by email whether the requesting Party accepts, accepts in part (where permitted), or rejects the prospective Communications Hub Transfer. Where the DCC does not receive such notification within 10 Working Days of DCC's communication under Section F6A.5(a), then the requesting Party will be deemed to have rejected the prospective Communications Hub Transfer.

F6A.7 Where a Communications Hub Transfer has been accepted or (if permitted) accepted in part by the requesting Party in accordance with Section F6A.6, then a binding Communications Hub Transfer shall be created.

Communications Hub Transfer

F6A.8 Where a binding Communications Hub Transfer is created under Section F6A.7, the requesting Party and the transferring Party (assisted by the DCC) shall ensure that the Communications Hubs in question are transferred in accordance with the transfer requirements set out in the CH Handover Support Materials.

F6A.9 The requesting Party shall ensure that the Communications Hubs are loaded on to the collection vehicle at the Transfer Location in accordance with Good Industry Practice and the CH Handover Support Materials.

F6A.10 Transfer of Communications Hubs pursuant to this Code shall occur on loading of the Communications Hubs on to the collection vehicle at the Transfer Location (subject to any additional requirements in the CH Handover Support Materials).

F6A.11 Risk of loss or destruction of or damage to the Communications Hubs shall transfer to the requesting Party on commencement of their unloading at the Transfer Location.

F6A.12 Notwithstanding delivery, legal and beneficial ownership of the Communications Hubs shall at all times (for the purposes of this Code) remain vested in the DCC.

Confirmation of Transfer

F6A.13 The requesting Party shall confirm to the DCC whether or not a transfer of Communications Hubs has been made in compliance with the Communications Hub Transfer Request within one day after the applicable Transfer Date (such confirmation to be submitted in accordance with and to contain the information specified in the CH Handover Support Materials).

F6A.14 Where a requesting Party fails to submit a confirmation in accordance with Section F6A.13, the DCC shall contact the requesting Party, and the requesting Party shall confirm in accordance with Section F6A.13.

Rejection of Communications Hub Transfers

F6A.15 Once a binding Communications Hub Transfer is created under Section F6A.7, the only grounds on which the requesting Party can reject some or all of the Communications Hubs covered by that Communications Hub Transfer are that:

(a) those Communications Hubs (of the applicable Device Model) were not available for collection from the Transfer Location on the Transfer Date;

(b) the Communications Hubs are (or reasonably appear on a visual inspection to be) damaged or have been (or reasonably appear on a visual inspection to have been) tampered with (and such damage or tampering occurred prior to transfer of risk under Section F6A.11); and/or

(c) the Party is otherwise entitled to reject Communications Hubs in accordance with the CH Handover Support Materials.

F6A.16 Where the requesting Party rejects some or all of the Communications Hubs covered by a Communications Hub Transfer in accordance with Section F6A.15 risk and responsibility for those Communications Hubs shall not transfer to the requesting Party and they shall remain the risk and responsibility of the transferring Party.

F7. INSTALLATION AND MAINTENANCE OF SMETS2+ COMMUNICATIONS HUBS

All references to "Communications Hubs" in this Section F7 are references to "SMETS2+ Communications Hubs".

Installation

F7.1 Each Supplier Party that installs a Communications Hub shall ensure that such Communications Hub is installed in accordance with the CH Installation and Maintenance Support Materials.

F7.2 Where:

(a) a Supplier Party is installing a Communications Hub for a premises; and

(b) the Supplier Party knows (or should reasonably know) that the premises will also require a Communications Hub Function to form part of a Smart Metering System with a Smart Meter for which the Supplier Party is not a Responsible Supplier,

then that Supplier Party shall, to the extent that it is reasonably able to do so, install a Communications Hub such that the Communications Hub Function will be capable of forming part of a Smart Metering System with both the Smart Meter for which it is a Responsible Supplier and the Smart Meter for which it is not a Responsible Supplier.

F7.3 On completion of the installation of a Communications Hub in accordance with Section F7.1, risk of loss or destruction of or damage to the Communications Hub shall cease to vest in the Party in which risk previously vested, which will either have been the Party which ordered the Communications Hub or the Party which obtained the Communications Hub under a Communications Hub Transfer (or, in the case of Special Installation Mesh Communications Hubs, shall cease to vest in the Supplier Party which took delivery of the Communications Hub).

Risk in the Communications Hubs following Installation

F7.4 Following completion of installation of a Communications Hub, risk of loss or destruction of or damage to the Communications Hub shall vest in the same or a different Party as follows:

(a) where the Communications Hub is removed from a premises by a Supplier Party, then the risk of loss or destruction of or damage to that Communications Hub shall vest in that Supplier Party such that that Supplier Party is responsible for all such risk since installation of the Communication Hub until such risk transfers to the DCC under Section F8.11 (Acceptance of a Returned Communications Hub); or

(b) where a Communications Hub is lost or destroyed following completion of its installation at a premises and before commencement of its removal from a premises by a Supplier Party, then the Supplier Party that is obliged to notify the DCC of a Communications Hub's loss or destruction under Section F8.17(b) (Loss or Destruction of Communications Hubs) shall be deemed to bear the risk of such loss or destruction.

Special Installation Mesh Communications Hubs

F7.4A Where it is determined in accordance with the CH Installation and Maintenance Support Materials that a Supplier Party is required to install a Special Installation Mesh Communications Hub in respect of a premises, then the following provisions shall apply:

(a) the DCC shall (subject to Section F7.5) deliver a Special Installation Mesh Communications Hub to the Supplier Party at the premises;

(b) the DCC shall ensure that the Special Installation Mesh Communications Hub that is delivered is of the HAN Variant that the Supplier Party requests;

(c) delivery, risk and ownership of the Special Installation Mesh Communications Hub shall be subject to the same principles as are described in Sections F6.5 and F6.6 (Delivery) by reference to the Supplier Party to which the Communications Hub is handed by the DCC and completion of such hand over (as completion of handover is further described in the CH Handover Support Materials);

(d) following delivery of a Special Installation Mesh Communications Hub as referred to in this Section F7.4A, the Special Installation Mesh Communications Hub shall be subject to the provisions of this Section F7 and of Sections F8 (Removal and Return of Communications Hubs) and F9 (Categories of Communications Hub Responsibility), save as otherwise expressly provided;

(e) in addition to the application of Section F8 (Removal and Return of Communications Hubs), a Supplier Party may return a Special Installation Mesh Communications Hub to the DCC while the Supplier Party and the DCC are still at the premises to which the Communications Hub was delivered, by handing the Communications Hub to the DCC (and the DCC shall accept handover of the Communications Hub, at which point risk of loss or destruction of or damage to the Communications Hub shall transfer to the DCC);

(f) without prejudice to the other obligations of the DCC and the Responsible Suppliers under this Code in respect of Communications Hubs installed at premises, where a Responsible Supplier reasonably determines that an Incident is likely to require replacement or repair of the SIMCH Aerial, then the DCC shall (subject to Section F7.5) attend the premises and (where necessary) undertake such replacement or repair; and

(g) each SIMCH Aerial shall be subject to Section F7.9 as if it was Communications Hub Auxiliary Equipment, save that no Party other than the DCC may replace or repair a SIMCH Aerial.

Special Installations & Modifications

F7.5 Where the CH Installation and Maintenance Support Materials require the DCC to undertake works on behalf of a Supplier Party, and where such works require the consent or agreement of any person other than the Supplier Party or the DCC (including where the consent or agreement of the Energy Consumer and/or any landlord or other owner of premises is required), then that Supplier Party shall ensure that such consent or agreement is obtained in advance (and the DCC shall provide all information reasonably requested by the Supplier Party in relation to it obtaining such consent or agreement).

F7.6 A Supplier Party responsible under Section F7.5 for obtaining a consent or agreement in relation to works shall take reasonable steps to obtain such consent or agreement in a form that permits the installation, operation, repair, modification, replacement and removal of the equipment.

F7.7 Where the DCC attends any premises and/or undertakes any works in reliance on a consent or agreement obtained (or required to be obtained) by a Supplier Party under Section F7.5, the DCC shall do so:

(a) as the contractor of that Supplier Party;

(b) in accordance with Good Industry Practice, the applicable consent or agreement obtained pursuant to Section F7.5 (and notified to the DCC), and the site rules and reasonable instructions of the owner and/or occupier of the relevant premises;

(c) in compliance with all Laws and/or Directives applicable to the Supplier Party or its representatives (and notified to the DCC), including the requirements of the Supplier Party's Energy Licence concerning Supplier Party representatives who attend premises; and

(d) in compliance with all reasonable requests of the Supplier Party.

F7.8 Not used

Ownership of and Responsibility for Communications Hub Auxiliary Equipment

F7.9 In respect of those types of Communications Hub Auxiliary Equipment that are designed to be installed at premises, such Communications Hub Auxiliary Equipment shall be deemed to form part of the Communications Hub, and the provisions of this Section F7 and of Sections F8 (Removal and Return of Communications Hubs) and F9 (Categories of Communications Hub Responsibility) shall be construed accordingly.

F7.10 In respect of those types of Communications Hub Auxiliary Equipment to which Section F7.9 does not apply:

(a) legal and beneficial ownership of such Communications Hub Auxiliary Equipment shall vest in the Party that ordered it on risk in such equipment transferring to that Party under Section F6.5 (Delivery); and

(b) legal and beneficial ownership of such Communications Hub Auxiliary Equipment shall (where applicable) revert to the DCC on risk in such equipment transferring to the DCC under Section F6.12 (Rejected Communications Hub Products).

CH Support Materials Compliance and Access to Premises

F7.11 The DCC shall reply to any reasonable request from a Party for information pertaining to compliance by the DCC with the CH Support Materials.

F7.12 Each Party shall reply to any reasonable request from the DCC for information pertaining to compliance by that Party with the CH Support Materials.

F7.13 Where the DCC wishes to attend a premises at which a Communications Hub is installed in order to assess a Party's compliance with the CH Support Materials in respect of that Communications Hub, the DCC may request access from the Responsible Supplier for the Smart Metering System(s) of which the Communications Hub forms part (or, where there is more than one such Responsible Supplier, from either or both of them as further described in the CH Support Materials).

F7.14 Where a Responsible Supplier consents to a request under Section F7.13, the Responsible Supplier shall take all reasonable steps to obtain the consent of the Energy Consumer to the DCC attending the premises.

F7.15 Where a Responsible Supplier does not consent to a request under Section F7.13, the DCC may refer the matter to the Panel. The Panel shall determine whether it is reasonably necessary for the DCC to attend the premises in order to assess (in general) a Party's compliance with the CH Support Materials. Where the Panel determines that it is, the Responsible Supplier shall take all reasonable steps to obtain the consent of the Energy Consumer to the DCC attending the premises.

F7.16 Where the Energy Consumer's consent is obtained pursuant to Section F7.14 or F7.15, the Responsible Supplier and the DCC shall follow the relevant procedure for attending the premises set out in the CH Support Materials.

F7.17 Where the DCC attends any premises in reliance on a consent obtained by a Supplier Party pursuant to Section F7.14 or F7.15, the DCC shall do so:

(a) as the contractor of that Supplier Party;

(b) in accordance with Good Industry Practice, the applicable consent (as notified to the DCC), and the site rules and reasonable instructions of the owner and/or occupier of the relevant premises;

(c) in compliance with all Laws and/or Directives applicable to the Supplier Party or its representatives (and notified to the DCC), including the requirements of the Supplier Party’s Energy Licence concerning Supplier Party representatives who attend premises; and

(d) in compliance with all reasonable requests of the Supplier Party.

Resolution of SMETS2+ SM WAN Coverage Incidents

F7.18 Where a Communications Hub is installed at a premises in accordance with this Code but does not connect to the SM WAN, and the SM WAN Coverage Database indicated (at any time during the 30 days prior to the date of installation) that the SM WAN is (or would be) available in the area in which the premises is located on the installation date, then the DCC shall (within 90 days after having been notified in accordance with the CH Installation and Maintenance Support Materials):

(a) provide a response to the installing Supplier Party that either (i) confirms that the SM WAN is now available in the relevant area such that Communications Hubs installed at premises in that area can be expected to be able to connect to the SM WAN; or (ii) provides reasons why the SM WAN is not so available; and

(b) (subject to Section F7.20) ensure that, in the case of at least 99% of all Communications Hubs for which the DCC is required to give such a response in each calendar quarter, the SM WAN is made available in the relevant area such that Communications Hubs installed at premises in that area can be expected to be able to connect to the SM WAN (but excluding for this purpose those locations where SM WAN connectivity is affected by problems with access pursuant to Section F7.5 which arise otherwise than as a result of the DCC's breach of this Code).

F7.19 Where a Communications Hub is installed at a premises in accordance with this Code but does not connect to the SM WAN (in circumstances where Section F7.18 does not apply), and the SM WAN Coverage Database is updated after installation to indicate that the premises is within an area in which the SM WAN is available, then (provided the DCC has been notified of the installation in accordance30with the CH Installation and Maintenance Support Materials) the DCC shall (within 90 days after such update occurs):

(a) provide a response to the Supplier Party which installed the Communications Hub that either (i) confirms that the SM WAN is now available in the relevant area such that Communications Hubs installed at premises in that area can be expected to be able to connect to the SM WAN; or (ii) provides reasons why the SM WAN is not so available; and

(b) (subject to Section F7.20) ensure that, in the case of at least 99% of all Communications Hubs for which the DCC is required to give such a response in each calendar quarter, the SM WAN is available in the relevant area such that Communications Hubs installed at premises in that area can be expected to be able to connect to the SM WAN (but excluding for this purpose those locations where SM WAN connectivity is affected by problems with access pursuant to Section F7.5 which arise otherwise than as a result of the DCC's breach of this Code).

F7.20 Until 1 January 2021, Sections F7.18(b) and F7.19(b) do not apply to Communications Hubs installed at premises within a geographic area that is subject to a Network Enhancement Plan. Such Communications Hubs shall, until 1 January 2021, be excluded from the calculations under Sections F7.18(b) and F7.19(b).

F7.21 Within a reasonable period of time following each calendar quarter that ends prior to 1 January 2021, the DCC shall produce a report which identifies:

(a) any new Network Enhancement Plans that have been created during that quarter, any Network Enhancement Plans that were completed during that quarter, and any ongoing Network Enhancement Plans; and

(b) for each such Network Enhancement Plan:

(i) an overview of the geographic area that is subject to the plan;

(ii) the premises (by postcode) that fall within that area; and

(iii) the scheduled date for completion of the planned works (or, where applicable, the actual date of completion).

F7.22 A copy of the report produced under Section F7.21 shall be provided by the DCC to the Parties, the Panel, the Authority and (on request) the Secretary of State.

F8. REMOVAL AND RETURN OF SMETS2+ COMMUNICATIONS HUBS

All references to "Communications Hubs" in this Section F8 are references to "SMETS2+ Communications Hubs".

Product Recall / Technology Refresh

F8.1 The DCC's rights under this Section F8.1 are in addition to (and separate from) the rights of the DCC (and the obligations of the other Parties) to remove and/or return Communications Hubs under other provisions of this Code (including pursuant to the Incident Management Policy and the CH Support Materials). The DCC has the right to request (in reliance on this Section F8.1) that Parties return to the DCC one or more Communications Hubs. Following receipt of such a request:

(a) in respect of Communications Hubs that have been delivered but have not yet been installed at premises, the Party which ordered those Communications Hubs shall return them to the DCC (or, if there has been a Communications Hub Transfer, the Party which obtained the Communications Hub under the Communications Hub Transfer);

(b) in respect of Communications Hubs that have been installed at premises and not yet removed from that premises, the Lead Supplier for those Communications Hubs shall remove them from the premises and return them to the DCC (and this obligation shall apply whether or not such Lead Supplier is a User); and

(c) in respect of Communications Hubs that have been removed from a premises and not yet returned to the DCC, the Supplier Party that removed the Communications Hub from the premises shall return them to the DCC.

F8.2 Where Section F8.1 applies, the DCC shall provide to Supplier Parties all such information as they or their Energy Consumers reasonably require in respect of the situation. Those Supplier Parties to whom Section F8.1(b) applies shall issue to affected Energy Consumers such information as is provided by the DCC concerning the situation.

Removal of Communications Hubs

F8.3 Each Supplier Party that:

(a) is a Responsible Supplier for the Communications Hub Function forming part of a Communications Hub, is entitled to remove that Communications Hub from the premises at which it is installed (but must install a replacement Communications Hub);

(b) Decommissions a Communications Hub Function, shall remove the Communications Hub of which the Communications Hub Function forms part from the premises at which it is installed; and

(c) is a Responsible Supplier for the Communications Hub Function forming part of a Communications Hub, may also be obliged under another provision of this Code to remove a Communications Hub, including where it is obliged to do so in accordance with the Incident Management Policy or the CH Support Materials.

F8.4 Where a Supplier Party removes a Communications Hub from a premises, it shall do so in accordance with the CH Installation and Maintenance Support Materials.

F8.5 Where a Communications Hub is removed by a Supplier Party from a premises at which it was previously installed, then the risk of loss or destruction of or damage to that Communications Hub shall vest in that Supplier Party as set out in Section F7.4(a) (Risk in the Communications Hubs following Installation).

Return of Communications Hubs

F8.6 Where a Communications Hub is removed by a Supplier Party from a premises at which it was previously installed, the Supplier Party shall return the Communications Hub to the DCC within 90 days after the date of its removal. This obligation to return a Communications Hub only applies where the Communications Hub Function which forms part of that Communications Hub has at any time had an SMI Status of 'installed not commissioned' or 'commissioned'.

F8.7 A Party that wishes to return a Communications Hub to the DCC shall be entitled to do so at any time. A Party that ceases to be a Party shall return to the DCC all the Communications Hubs that have been delivered to that Party and not yet: (a) transferred under a Communications Hub Transfer; (b) installed at premises; or (c) reported as lost or destroyed.

F8.8 The DCC shall publish on the CH Ordering System the following information:

(a) the addresses of no more than two locations in respect of each Region to which Communications Hubs can be returned (which locations must be in Great Britain), making clear which Device Models may be returned to which locations;

(b) the operating hours of each such location during which returns can be made (which operating hours must be reasonable); and

(c) any changes to the information required to be published under (a) and (b) above, for which at least four months' advance notice must be given (unless the Panel approves a shorter period).

F8.9 A Party required or opting to return one or more Communications Hubs to the DCC shall:

(a) notify the DCC of the number of Communications Hubs to be returned, of the location to which they are to be returned (being one of the locations published for the relevant Region in accordance with Section F8.8), of the date on which they are to be returned, and of any further information required in accordance with the CH Installation and Maintenance Support Materials;

(b) return those Communications Hubs to the location and on the date notified in accordance with (a) above during the applicable operating hours for that location published in accordance with Section F8.8;

(c) otherwise comply with the return requirements set out in the CH Installation and Maintenance Support Materials; and

(d) be liable to pay the applicable Charges in the event that it returns one or more Communications Hubs to the wrong returns location.

Acceptance of Returned Communications Hubs

F8.10 The Party assigned responsibility for doing so under the CH Handover Support Materials shall ensure that the returned Communications Hubs are unloaded from the vehicle in which they have been returned, and that they are unloaded in accordance with Good Industry Practice and the CH Installation and Maintenance Support Materials.

F8.11 Risk of loss or destruction of or damage to returned Communications Hubs shall transfer to the DCC on commencement of such unloading (where unloaded by the DCC) or on completion of such unloading (where not unloaded by the DCC).

Access to Returns Locations

F8.12 The DCC shall ensure that each Party (and its sub-contractors and its and their agents) is allowed access to the locations published pursuant to Section F8.8 for the purposes of exercising the Party's rights and performing the Party's obligations under this Section F8.

F8.13 The relevant Party shall ensure that any person that accesses a location pursuant to Section F8.14 shall do so in compliance with Good Industry Practice and the site rules and reasonable instructions of the DCC (or its representatives).

Reconditioning or Disposal of Communications Hubs by the DCC

F8.14 The DCC shall take all reasonable steps to recondition and redeploy each Communications Hub that is returned to the DCC (having regard to the requirements of the DCC Licence).

F8.15 Before a Communications Hub that has been returned to the DCC is delivered to a Party pursuant to Section F6 (Delivery and Acceptance of Communications Hubs), the DCC shall ensure that all Data relating to one or more Energy Consumers is permanently erased from that Communications Hub in accordance with the standard referred to in Section G2.18 (Management of Data).

F8.16 Unless the Communications Hub is reconditioned and redeployed in accordance with Sections F8.14 and F8.15, the DCC shall ensure that each Communications Hubs that has been returned to the DCC is disposed of in accordance with Good Industry Practice and the standard referred to in Section G2.18 (Management of Data).

Loss or Destruction of Communications Hubs

F8.17 Where a Communications Hub has been lost or destroyed (save where such loss or destruction occurs while the risk of loss or destruction was the responsibility of the DCC), the following Party shall notify the DCC of such loss or destruction (via the CH Ordering System):

(a) where such loss or destruction occurs prior to completion of the Communications Hub’s installation at a premises by a Supplier Party, the Party that ordered that Communications Hub (or, in the case of Special Installation Mesh Communications Hubs, the Supplier Party which took delivery of the Communications Hub);

(b) where such loss or destruction occurs after completion of such installation and before commencement of the Communications Hub's removal from a premises by a Supplier Party, the Supplier Party responsible under the Incident Management Policy for resolving the relevant Incident; or

(c) where such loss or destruction occurs after commencement of the Communications Hub's removal from a premises by a Supplier Party, the Supplier Party which undertook such removal.

F8.18 Where a Communications Hub is lost or destroyed following completion of its installation at a premises by a Supplier Party and before commencement of its removal from a premises by a Supplier Party, then the Supplier Party that is obliged to notify the DCC of such loss or destruction under Section F8.17(b) shall be deemed to bear the risk of such loss or destruction as described in Section F7.4(b) (Risk in the Communications Hubs following Installation Installation).

F9. CATEGORIES OF SMETS2+ COMMUNICATIONS HUB RESPONSIBILITY

All references to "Communications Hubs" in this Section F9 are references to "SMETS2+ Communications Hubs".

Overview

F9.1 The reason for the return of each returned Communications Hub, or for its loss or destruction, shall be determined in accordance with this Section F9.

F9.2 The Party which returns a Communications Hub to the DCC shall specify the reason for the Communications Hub's return. The Party which notifies the DCC of a Communications Hub's loss or destruction shall specify the reason it was lost or destroyed. In any such case, such Party shall specify the reason in accordance with the CH Support Materials.

F9.3 The reason specified by the relevant Party pursuant to Section F9.2 shall be subject to any contrary determination in accordance with this Section F9.

F9.4 The reason for the return of a Communications Hub, as finally determined in accordance with this Section F9, shall be used to determine the applicable category of responsibility (as described in Section F9.4), which is then used for the purposes of calculating the Charges (or adjustments to the Charges in accordance with this Section F9).

Reasons

F9.5 The reasons that apply for the purposes of this Section F9 are as follows:

(a) [not used];

(b) return of a Communications Hub to the DCC due to a Special Second-Fuel Installation;

(c) return of a Communications Hub to the DCC due to a Special WAN-Variant Installation;

(d) loss or destruction of or damage to a Communications Hub, which occurred while the relevant Party was responsible for such risk and which was caused otherwise than by a breach of this Code by the DCC or a CH Defect;

(e) return of a Communications Hub to the DCC, other than where another reason under this Section F9.5 applies;

(f) that the Communications Hub has a CH Defect;

(g) loss or destruction of or damage to a Communications Hub caused by a breach of this Code by the DCC;

(h) rejection of a Communications Hub in accordance with Section F6.10 (Rejected Communications Hub Products); and

(i) return of a Communications Hub to the DCC where requested by the DCC under Section F8.1 (Product Recall / Technology Refresh).

Categories of Responsibility

F9.6 For the purposes of this Section F9 and the Charging Methodology:

(a) each of the reasons described in Sections F9.5(d) and (e) constitute a "**CH User Responsibility**", and where the Party required to do so under Section F9.2 fails to specify a reason in accordance with that Section the reason shall be deemed to be a CH User Responsibility;

(b) each of the reasons described in Sections F9.5(f) and (g) (where they apply prior to completion of the installation of the Communications Hub at a premises in accordance with the CH Installation and Maintenance Support Materials) and Section F9.5(h) constitute a "**CH Pre-Installation DCC Responsibility**";

(c) each of the reasons described in Sections F9.5(f) and (g) (where they apply following completion of the installation of the Communications Hub at a premises in accordance with the CH Installation and Maintenance Support Materials) constitute a "**CH Post-Installation DCC Responsibility**";

(d) the reason described in Sections F9.5(i) constitute a "**Product Recall or Technology Refresh**"; and

(e) the reasons described in Sections F9.5(b) and (c) do not need to be categorised, as they do not directly give rise to a Charge or an adjustment to the Charges under this Section F9.

CH Fault Diagnosis

F9.7 The DCC has the right to examine and test returned Communications Hubs and to investigate the cause of any damage to or loss or destruction of Communications Hubs to verify whether the reason given by a Party pursuant to Section F9.2 is correct (being "**CH Fault Diagnosis**").

F9.8 The DCC shall undertake CH Fault Diagnosis in accordance with the process for the same described in the CH Installation and Maintenance Support Materials (which may include sampling and extrapolation of results based on sampling).

F9.9 The DCC shall, within 10 days after the return of Communications Hubs or notification of their loss or destruction by a Party, notify that Party (via the CH Ordering System) if the DCC intends to undertake any CH Fault Diagnosis in respect of those Communications Hub.

F9.10 In the absence of a notification in accordance with Section F9.9, the reason given by a Party in accordance with Section F9.2 in respect of the Communications Hubs in question shall be deemed to be correct.

F9.11 Provided the DCC has first given notice in accordance with Section F9.9, where the DCC disputes the reason given by a Party pursuant to Section F9.2 in respect of any Communications Hubs, the DCC shall provide to the Party a report setting out the DCC's analysis of why the reason given by the Party is not correct.

F9.12 Where the DCC does not provide a report to the Party in accordance with Section F9.11 within 35 days after the DCC's notice to a Party under Section F9.9, the reason given by the Party in accordance with Section F9.2 in respect of the Communications Hubs in question shall be deemed to be correct.

F9.13 Unless the Party notifies the DCC of the Party's objection to the DCC's analysis within 35 days after receipt of a report in accordance with Section F9.11, the analysis set out in the report shall be deemed to be correct.

F9.14 Where the Party notifies the DCC of an objection within the time period required by Section F9.13, then either of them may refer the matter to the Panel for determination (which determination shall be final and binding for the purposes of this Code). Where the Panel is unable to determine the reason for a

Communications Hub's return, then the reason given by the relevant Party under Section F9.2 shall be deemed to be correct.

Reporting on DCC Faults

F9.15 The DCC shall report to the Panel and the other Parties on the number of Communications Hubs for which the reason for return, loss or destruction is determined in accordance with this Section F9 to have been a CH Pre-Installation DCC Responsibility or a CH Post-Installation DCC Responsibility. The DCC shall report in respect of successive periods of three months (starting with the month in which Communications Hubs are first delivered pursuant to this Section F). Such report shall include a supporting explanation of the circumstances that gave rise to such instances of CH Pre-Installation DCC Responsibility or CH Post-Installation DCC Responsibility. Where the DCC is disputing (under CH Fault Diagnosis) whether an instance of CH Pre-Installation DCC Responsibility or CH Post-Installation DCC Responsibility has arisen, the DCC shall not include those instances until the matter is finally resolved (under CH Fault Diagnosis).

Compensation for CH Type Faults

F9.16 Where the reason for a Communications Hub’s return, loss or destruction is determined in accordance with this Section F9 to have been a CH Post-Installation DCC Responsibility, then a “CH Type Fault”shall be said to have occurred in respect of that Communications Hub (at the time of such return or notification, and in respect of the Party making such return or notification).

F9.17 Section F9.18 shall apply in respect of a Region and a calendar year, where the number of CH Type Faults relating to that Region and occurring during that calendar year exceeds 0.5% of the total number of Communications Hubs that are installed at premises within that Region as at the end of that calendar year.

F9.18 Where this Section F9.18 applies in respect of a Region and a calendar year, the DCC shall be liable to pay to Parties collectively an amount of liquidated damages equal to the positive amount (if any) calculated as follows:

(a) £50.00; multiplied by

(b) the Consumer Prices Index for April of that calendar year, divided by the Consumer Prices Index for September 2013; multiplied by

(c) (i) the number of CH Type Faults relating to that Region and occurring during that calendar year; less (ii) 0.5% of the total number of Communications Hubs that are installed at premises within that Region as at the end of that calendar year; less (iii) the number of CH Type Faults relating to that Region and occurring during that calendar year for which the DCC is liable to pay a CH Batch Fault Payment.

F9.19 The aggregate amount (if any) payable by the DCC under Section F9.18 in respect of a Region and a calendar year shall be payable by the DCC to each Party (the amount payable to each Party being a “**CH Type Fault Payment**”) pro-rated in proportion to:

(a) the number of CH Type Faults (across all Regions) which occurred in respect of that Party during that calendar year, less the number of CH Type Faults (across all Regions) which occurred in respect of that Party during that calendar year for which the DCC is liable to pay a CH Batch Fault Payment; as compared to

(b) the total number of CH Type Faults (across all Regions) which occurred in respect of all Parties during that calendar year, less the number of CH Type Faults (across all Regions) which occurred in respect of all Parties during that calendar year for which the DCC is liable to pay a CH Batch Fault Payment.

Compensation for Batch Faults

F9.20 A "**CH Batch Fault**" shall occur in respect of a Delivery Batch where:

(a) the number of CH Type Faults which occur in respect of a Communications Hub forming part of that Delivery Batch, and which occur within 12 months following completion of the installation of that Communications Hub; exceeds

(b) 10% of the number of Communications Hubs comprising that Delivery Batch.

F9.21 Where a CH Batch Fault occurs in respect of a Delivery Batch, the DCC shall be liable to pay to each Party an amount of liquidated damages (being a "**CH Batch Fault Payment")** equal to:

(a) £50.00; multiplied by

(b) the Consumer Prices Index for April of that calendar year, divided by the Consumer Prices Index for September 2013; multiplied by

(c) the number of CH Type Faults which occurred in respect of that Party and a Communications Hub which formed part of that Delivery Batch, and which occur within 12 months following completion of the installation of that Communications Hub.

Payment of Type Fault and Batch Fault Compensation

F9.22 The DCC shall include each CH Type Fault Payment and each CH Batch Fault Payment payable to a Party as a credit in favour of that Party under the DCC's Invoices (so as to reduce the Charges payable by that Party).

Compensation for Product Recall or Technology Refresh

F9.23 Where the reason for a Communications Hub's return is determined in accordance with this Section F9 to have been a Product Recall or Technology Refresh, then the DCC shall (notwithstanding Section M2.8 (Exclusion of Other Liabilities)) be liable to each other Party for the reasonable costs and expenses incurred by that Party in:

(a) any corrective action taken by that Party in accordance with this Code or other Laws and/or Directives (including any withdrawal or recall activities); and/or

(b) notifying or warning Energy Consumers of any corrective action taken by the DCC and/or any other Party (and providing Energy Consumers with relevant information regarding such corrective action).

Damage Caused by Defective Communications Hubs

F9.24 Where a CH Defect causes loss of or damage to physical property (including loss of or damage to Systems, and loss or corruption of Data), such loss or damage shall be deemed to have been caused by a breach of this Code by the DCC, including for the purposes of M2.5 (Damage to Physical Property).

Exclusive Remedies for Site Visits

F9.25 Notwithstanding Sections F9.24 and M2.6(a) (Recovery of Loss which is Expressly Permitted), no Party shall be entitled to recover from the DCC any costs or expenses incurred in attending a premises for the purposes of repairing or replacing any Devices damaged or destroyed as a result of a CH Defect. This Section F9.25 is without prejudice to the CH Type Fault Payments, CH Batch Fault Payments, and compensation under Section F9.23 in respect of Product Recall or Technology Refresh.

Exclusive Remedy for Damaged or Lost Communications Hubs

F9.26 No Party shall have any liability to the DCC for damage to, or loss or destruction of, Communications Hubs. This Section F9.26 is without prejudice to the Charges payable in respect of the Communications Hub Services.

F10. SMETS2+ TEST COMMUNICATIONS HUBS

Overview

F10.1 Unless expressly stated otherwise, the references in this Code to Communications Hubs do not include Test Communications Hubs.

F10.2 Without limiting the generality of Section F10.1, because Test Communications Hubs are not to be treated as Communications Hubs, Test Communications Hubs shall:

(a) not be included in Communications Hub Forecasts or Communications Hub Orders;

(b) not be subject to Sections F5 (Communications Hub Forecasts & Orders) to F9 (Categories of Communications Hub Responsibility);

(c) not be (or be capable of being) Commissioned; and

(d) only be populated with Test Certificates (and not actual Organisation Certificates or Device Certificates).

Prototype Communications Hubs

F10.3 Where the DCC provides a Prototype Communications Hub as a Test Communications Hub (in accordance with the definition of Test Communications Hub), the DCC shall provide details of the manner in which the Prototype Communications Hub does not comply with CHTS. For the purposes of this Section F10.3 and the definition of Prototype Communications Hub, until such time as the CHTS forms part of this Code, the references to the CHTS shall be construed by reference to the draft of the CHTS that the Secretary of State directs from time to time for the purposes of this Section F10.3.

Provision of Test Communications Hubs

F10.4 The DCC shall provide Test Communications Hubs to other Parties and to any other person that requests them (in each case in accordance with the other provisions of this Section F10).

F10.5 Where a person that is not a Party wishes to order Test Communications Hubs, the DCC shall offer terms upon which Test Communications Hubs may be ordered. Such offer shall be provided as soon as reasonably practicable after receipt of the request, and shall be based on the Specimen Enabling Services Agreement (subject only to such variations from such specimen form as are reasonable in the circumstances). A person that is bound by an agreement entered into with the DCC pursuant to this Section F10.5 shall be a "**TCH Participant**". The DCC shall not provide Test Communications Hubs to a person that is not a Party or a TCH Participant.

F10.6 The DCC shall allow Parties and TCH Participants to order and return Test Communications Hubs via a reasonable means.

F10.7 The DCC shall publish on the DCC Website a guide describing the process by which Parties and other persons may obtain and return Test Communications Hubs.

Ordering, Delivery, Rejection and Returns

F10.8 Where a Party or a TCH Participant has ordered one or more Test Communications Hubs via the means described in Section F10.6:

(a) the person that ordered the Test Communications Hubs shall be liable to pay the applicable Charge;

(b) the DCC shall deliver the Test Communications Hubs to the location in Great Britain requested by the person that ordered the Test Communications Hubs, on the date requested by that person (provided that the DCC shall have no obligation to deliver Test Communications Hubs earlier than the date 18 weeks after the date on which the Test Communications Hubs were ordered);

(c) delivery of the Test Communications Hubs shall occur on their removal from the delivery vehicle at the delivery location;

(d) legal and beneficial ownership of (and responsibility for loss or destruction of or damage to) the Test Communications Hubs shall vest in the person that ordered them on commencement of their unloading at the delivery location (where not unloaded by the DCC) or on completion of their unloading at the delivery location (where unloaded by the DCC);

(e) the person that ordered the Test Communications Hubs shall be entitled to reject a delivery and arrange for the return of the rejected Test Communications Hubs to the DCC on the following basis (and only where notified to the DCC within five days of the delivery date):

(i) to the extent the delivery contained more Test Communications Hubs than were ordered; and/or

(ii) to the extent the Test Communications Hub Products are (or reasonably appear on a visual inspection to be) damaged or have been (or reasonably appear on a visual inspection to have been) tampered with (and such damage or tampering occurred prior to their delivery);

(f) the person that ordered the Test Communications Hubs shall be entitled to return them to the DCC where a CH Defect arises within 6 months following their delivery, but not thereafter (for which purpose, the definition of CH Defect shall be construed by reference to the requirements for Test Communications Hubs rather than those for Communications Hubs);

(g) a person wishing to return a Test Communications Hub to the DCC pursuant to (e) or (f) above shall return it to the DCC in accordance with the relevant rules applicable to Communications Hubs under Section F8 (Removal and Return of Communications Hubs); and

(h) legal and beneficial ownership of (and responsibility for loss or destruction of or damage to) the Test Communications Hubs rejected or returned pursuant to this Section F10.8 shall revert to the DCC on completion of their unloading at the returns location (where not unloaded by the DCC) or on commencement of their unloading at the returns location (where unloaded by the DCC).

F10.9 The rejection and/or return of Test Communications Hubs by a Party or TCH Participant pursuant to Section F10.8 is relevant in determining the Charges payable by that Party or TCH Participant. Where the DCC wishes to do so, it may undertake physical and electronic analysis in respect of Test Communications Hubs rejected or returned, in which case the process for CH Fault Diagnosis shall apply, but:

(a) by reference to the reason for rejection and/or return given pursuant to Section F10.6 (rather than by reference to the reason given pursuant to Section F9 (Categories of Communications Hub Responsibility)); and

(b) without the DCC's ability to apply sampling and extrapolation to the extent that such an ability is set out in the CH Installation and Maintenance Support Materials.

Use of Test Communications Hubs

F10.10 The Party or TCH Participant that ordered a Test Communications Hub shall (unless or until it is returned pursuant to Section F10.8) ensure that the Test Communications Hub shall:

(a) only be used by Parties or TCH Participant for the purposes of tests undertaken under this Code, or for the purposes of testing Devices or Systems to be used in relation to this Code; and

(b) be used and maintained in accordance with Good Industry Practice, and the requirements of this Code applicable to Test Communications Hubs.

F10.11 Where a CH Defect in a Test Communications Hub (for which purpose, the definition of CH Defect shall be construed by reference to the requirements for Test Communications Hubs rather than those for Communications Hubs) causes loss of or damage to physical property (including loss of or damage to Systems, and loss or corruption of Data), such loss or damage shall be deemed to have been caused by a breach of this Code by the DCC, including for the purposes of M2.5 (Damage to Physical Property).

Availability of Test CH Variants

F10.12 The DCC shall ensure that the Test Communications Hubs made available pursuant to this Section F10 represent SMETS2+ Communications Hubs that provide for each and every combination of HAN Variant and WAN Variant; subject to Section F10.15.

F10.13 The DCC shall not be obliged to make one or more Test Communications Hub variants available pursuant to this Section F10 where it is not cost effective to do so (having regard to the obligations of Supplier Parties under this Code, including under Section F4.4 (Interoperability with DCC Systems)).

F10.14 Where the DCC seeks to rely on Section F10.13 in respect of one or more variants, the DCC shall publish notice of that fact on the DCC Website, including within such notice the DCC's justification for why it is not cost effective to make that variant available pursuant to this Section F10. Where a Party disagrees with the DCC's justification in respect of one or more variants, that Party may refer the matter to the Panel to determine whether the DCC's justification is valid. Where the DCC or any other Party disagrees with the Panel's determination, the DCC or such other Party may refer the matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

F10.15 Where the DCC seeks to rely on Section F10.13 in respect of one or more variants, the DCC shall not be obliged to make the Test Communications Hub variant available pursuant to this Section F10 until either:

(a) the Panel has determined that the DCC is obliged to make the variant available, and the DCC has not referred the matter to the Authority within 20 Working Days following the Panel's determination; or

(b) the Authority has determined that the DCC is obliged to make the variant available.

F11. ALCS/HCALCS/APC/SAPC LABELS LIST

ALCS/HCALCS/APC/SAPC Labels List

F11.1 The Panel will establish and maintain a list of ALCS/HCALCS/APC/SAPC labels which provide a standardised naming convention for all possible ALCS, HCALCS, APCs and SAPCs (the " **ALCS/HCALCS/APC/SAPC Labels List**").

F11.2 The Panel will agree updates to the ALCS/HCALCS/APC/SAPC Labels List as proposed by Parties.

F11.3 Within one working day after the ALCS/HCALCS/APC/SAPC Labels List is updated, the Panel will:

(a) publish a copy of the updated list on the website; and

(b) notify the Parties that the list has been updated.

F12. SMART METER DEVICE ASSURANCE SUB-COMMITTEE

Establishment of the Smart Meter Device Assurance Sub-Committee

F12.1 The Panel shall establish a Sub-Committee in accordance with the requirements of this Section F12, to be known as the "**Smart Meter Device Assurance Sub-Committee**" (or SMDA Sub-Committee for short).

F12.2 Save as expressly set out in this Section F12, the SMDA Sub-Committee shall be subject to the provisions concerning Sub-Committees set out in Section C6 (Sub-Committees).

F12.3 Membership of the SMDA Sub-Committee shall be determined by the Panel from time to time in accordance with the following principles:

(a) at the time of its establishment, the SMDA Sub-Committee shall comprise the individuals who are (at that time) performing the equivalent role on behalf of the Smart Meter Device Assurance Company Limited (company number 09327524), but without prejudice to the Panel's powers to subsequently alter the membership; and

(b) otherwise in accordance with Section C6.7 (Membership); save that Section C6.7(b) shall not apply in respect of the individuals appointed to the SMDA Sub-Committee at the time of its establishment.

Role of the SMDA Sub-Committee

F12.4 The two key objectives of the SMDA Sub-Committee shall be (in respect of SMETS2+ Devices only):

(a) to provide assurance that Smart Meters and other Devices which can together potentially form a Smart Metering System work together (that they are interoperable); and

(b) to provide assurance that Smart Meters and other Devices which can together potentially form a Smart Metering System work with each other (that they are interchangeable).

F12.5 In furtherance of these objectives, the SMDA Sub-Committee shall (subject to the terms of reference imposed by the Panel) procure and manage provision of services from one or more independent testing organisations to provide interoperability and interchangeability testing services for SMETS2+ Devices to Supplier Parties, Manufacturers, meter asset providers, and such other entities as the SMDA Sub-Committee may determine from time to time.

F12.6 The SMDA Sub-Committee's duties, powers, functions and procedural rules shall otherwise be determined in accordance with Section C6.10 (Terms of Reference and Procedural Requirements).

F12.7 Not Used

Approach to Service Provision

F12.8 Each testing organisation appointed pursuant to Section F12.5 shall be appointed under a framework agreement entered into by SECCo which enables Supplier Parties, Manufacturers, meter asset providers, and such other entities as the SMDA Sub-Committee may determine from time to time to contract for the testing services available under the framework.

Approach to Cost Recovery

F12.9 Each framework agreement entered into by SECCo pursuant to Section F12.8 shall provide for:

(a) a reasonable amount of fixed costs to be paid by SECCo, which amounts paid by SECCo shall be treated as Recoverable Costs in accordance with Section C8 (Panel Costs and Budgets); and

(b) the incremental costs of providing testing services to a particular Supplier Party, Manufacturer, meter asset provider, or other entity to be charged to that Supplier Party, Manufacturer, meter asset provider, or other entity (and on the basis that SECCo shall not be liable for those incremental costs).

F13. NETWORK EVOLUTION TRANSITION AND MIGRATION APPROACH DOCUMENT

Overview

F13.1 The Network Evolution Transition and Migration Approach Document is to be developed by the DCC pursuant to this Section F13, and incorporated into this Code pursuant to Part G of Condition 22 of the DCC Licence and Section X5 (Incorporation of Certain Documents into this Code).

Purpose of the Network Evolution Transition and Migration Approach Document

F13.2 The purposes of the Network Evolution Transition and Migration Approach Document are to:

(a) enable an orderly and coordinated transition and/or migration to, any or all of the Network Evolution Arrangements; and

(b) provide for additional and/or varied provisions to apply for a transitional period prior to, during and/or following the implementation of any or all of the Network Evolution Arrangements.

Content of the Network Evolution Transition and Migration Approach Document

F13.3 The Network Evolution Transition and Migration Approach Document may include, without limitation, some or all of the following:

(a) rights and/or obligations of the DCC and other Parties designed to facilitate or achieve the purposes of the Network Evolution Transition and Migration Approach Document which are either additional to or vary other rights and/or obligations set out in this Code;

(b) rules and requirements concerning the provision and sharing of Data in order to facilitate or achieve the purposes of the Network Evolution Transition and Migration Approach Document, which may include one or more Parties being obliged to provide (or procure the provision of) Data (as further described in the Network Evolution Transition and Migration Approach Document);

(c) limitations and/or variations to the Services and/or the rights and/or obligations of the Parties to apply for a transitional period prior to and/or following the establishment of any or all of the Network Evolution Arrangements, which may include limitations and/or variations to Services;

(d) the variation of limitations on liability provided for in this Code for a transitional period prior to and/or following the establishment of any or all of the Network Evolution Arrangements;

(e) provision for the referral and determination of disputes in respect of the Network Evolution Transition and Migration Approach Document, which may include interim or final determinations by the Secretary of State, the Authority, the Panel or any other person specified by the Secretary of State.

Process to Develop Document for Designation

F13.4 The DCC shall, to the extent it has not already done so when this Section F13 comes into effect, develop and consult on the first version of the Network Evolution Transition and Migration Approach Document which shall include provisions relating to the CH&N Arrangements and submit it to the Secretary of State in accordance with the following process:

(a) the DCC shall, in consultation with the Parties and such other persons as are likely to be interested, produce a draft of the document;

(b) where a disagreement arises with any Party or other person with regard to any proposal as to the content of the document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the Network Evolution Transition and Migration Approach Document;

(c) the DCC shall send a copy of the draft document to the Secretary of State as soon as is practicable after completion of the process described in (a) and (b) above, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose;

(ii) copies of the consultation responses received; and

(iii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any direction given to it by the Secretary of State following the Secretary of State's consideration of the draft document which direction may require the DCC to:

(i) make such amendments to the draft document as are set out or described in the direction;

(ii) produce and submit to the Secretary of State a further draft of the document; and

(iii) follow a specified process (and the time within which that process shall be completed) prior to submitting a further draft of the document to the Secretary of State.

F13.5 The DCC shall, where so directed by the Secretary of State from time to time, develop and consult upon the second (and any subsequent) version of the Network Evolution Transition and Migration Approach Document (which direction may require that version to include provisions relating to one or more of the other parts of the Network Evolution Arrangements) and submit it to the Secretary of State in accordance with the process set out in Section F13.4 and in accordance with any timescales that may be specified in the direction.

Application of the Network Evolution Transition and Migration Approach Document

F13.6 The DCC and the categories of Party referred to in the Network Evolution Transition and Migration Approach Document shall comply with the Network Evolution Transition and Migration Approach Document.

F13.7 The Network Evolution Transition and Migration Approach Document shall have priority over the other provisions of this Code in relation to the subject matter of the Network Evolution Transition and Migration Approach Document.

Expiry of the Network Evolution Transition and Migration Approach Document

F13.8 The Network Evolution Transition and Migration Approach Document shall provide for a date (or a mechanism for determining a date) from which the Network Evolution Transition and Migration Approach Document is to no longer apply. From such date, the Network Evolution Transition and

Migration Approach Document shall no longer have any effect (but without prejudice to the rights and obligations arising prior to that date).

Definitions

F13.9 For the purposes of this Section F13:

CH&N Arrangements	means the arrangements described in subparagraph(a) of the definition of Network Evolution Arrangements.
Network Evolution Arrangements	has the meaning given to that term in Condition13B of the DCC Licence.

G SECURITY

G1. SECURITY: GENERAL PROVISIONS

Interpretation

G1.1 Sections G2 to G9 shall be interpreted in accordance with the following provisions of this Section G1.

Transitional Period for Updated or Replacement Standards

G1.2 Section G1.3 applies where:

(a) the DCC or any User is required, in accordance with any provision of Sections G2 to G9, to ensure that it, or that any of its policies, procedures, systems or processes, complies with:

(i) any standard, procedure or guideline issued by a third party; and

(ii) any equivalent to that standard, procedure or guideline which updates or replaces it from time to time; and

(b) the relevant third party issues an equivalent to that standard, procedure or guideline which updates or replaces it.

G1.3 Where this Section G1.3 applies, the obligation on the DCC or User (as the case may be):

(a) shall be read as an obligation to comply with the updated or replaced standard, procedure or guideline from such date as is determined by the Panel (having considered the advice of the Security Sub-Committee) in respect of that document; and

(b) prior to that date shall be read as an obligation to comply (at its discretion) with either:

(i) the previous version of the standard, procedure or guideline; or

(ii) the updated or replaced standard, procedure or guideline.

G1.4 Any date determined by the Panel in accordance with Section G1.3 may be the subject of an appeal by the DCC or any User to the Authority (whose decision shall be final and binding for the purposes of this Code).

Obligations on Users

G1.5 Obligations which are expressed to be placed on a User shall, where that User performs more than one User Role, be read as applying to it separately in respect of each of its User Roles.

G1.6 For the purposes of Section G1.5, where any Network Party is deemed to have nominated itself as a Registration Data Provider (in accordance with the definition of Registration Data Provider), its role as a Registration Data Provider shall be treated as if it were an additional category of User Role.

Exclusion for Export Suppliers and Registered Supplier Agents

G1.7 Where a User acts in the User Role of 'Export Supplier' or 'Registered Supplier Agent', it is not to be subject to any of the obligations expressed to be placed on Users except for those obligations set out at:

(a) Sections G3.2 to G3.3 (Unauthorised Activities: Duties to Detect and Respond);

(b) Sections G3.8 to G3.9 (Management of Vulnerabilities);

(c) Sections G5.14 to G5.18 (Information Security: Obligations on Users), save that for this purpose the reference:

(i) in Section G5.18(b)(i) to "Sections G3 and G4" shall be read as if it were to "Sections G3.2 to G3.3 and G3.8 to G3.9"; and

(ii) in Section G5.18(b)(iii) to "Sections G5.19 to G5.24" shall be read as if it were to "Section G5.19(d)";

(d) Sections G5.25 and G5.26 (Shared Resources); and

(e) G6 (Anomaly Detection Thresholds: Obligations on the DCC and Users).

Disputes

G1.8 Where, in any dispute between a Party and a User, a question arises as to whether that User has complied with any of its obligations under Sections G3 to G6:

(a) that question may be referred by either of them to the Panel for its determination; and

(b) where either of them disagrees with any such determination of the Panel, then it may refer the matter to the Authority in accordance with Section M7 (Dispute Resolution).

G1.9 Section G1.8:

(a) shall be without prejudice to the provisions of Section M8.2 (Notification of an Event of Default); and

(b) shall not apply in respect of any other question in dispute between a Party and a User relating to or arising from the question of whether the User has complied with any of its obligations under Sections G3 to G6.

SMETS1 Smart Metering Systems

G1.10 Any reference in Sections G2 to G9 to:

(a) a SMETS1 SMS shall be treated as being a reference to an Enrolled SMETS1 SMS only;

(b) a Smart Metering System shall be treated as including a SMETS1 SMS only if it is an Enrolled SMETS1 SMS;

(c) a Device shall be treated as including a SMETS1 Device only if it forms part of or is ancillary to an Enrolled SMETS1 SMS.

The SMETS1 CSP System

G1.11 Section G1.12 applies to the DCC in respect of those parts of the DCC Total System which:

(a) comprise those Systems used by any DCC Service Provider in order to support the provision of Communications Services by the DCC in relation to SMETS1 Devices; and

(b) do not constitute those Systems used by the DCC in its role as a SMETS1 Service Provider or as a DCO that do not also support the provision of Communications Services by the DCC in relation to SMETS2+ Devices,

and, for the purposes of Section G1.12, those parts of the DCC Total System shall be known as the " **SMETS1 CSP System**".

G1.12 Where this Section G1.12 applies, the DCC may comply with its obligations under the provisions listed in Section G1.13 by, in each case, ensuring that the records, processes or procedures described in that provision are, in respect of the SMETS1 CSP System, compliant with:

(a) the standard specified in that provision; or

(b) an alternative standard or methodology that reflects Good Industry Practice in respect of the subject matter of the standard specified in that provision, and that is capable of verification as such by the DCC Independent Security Assurance Service Provider in accordance with Section G9.

G1.13 The provisions listed in this Section G1.13 are the provisions at Sections G2.13, G2.18, G2.26, G2.27, G4.6, G5.7, G5.8 and G5.10.

CSS Provider Systems

G1.14 The security obligations applying to the CSS Provider Systems are set out in Section E2.18 (Security Obligations of the CSS Provider); and

G1.15 In Sections G2 to G9:

(a) other than for the purposes of Section G2.20(a), each and every reference to the DCC Total System shall exclude the CSS Provider Systems; and

(b) each and every reference to the DCC Systems shall exclude the CSS Provider Systems.

G2. SYSTEM SECURITY: OBLIGATIONS ON THE DCC

Unauthorised Activities: Duties to Detect and Respond

G2.1 The DCC shall take reasonable steps:

(a) to ensure that the DCC Systems are capable of detecting any unauthorised connection that has been made to them, and any unauthorised attempt to connect to them, by any other System; and

(b) if the DCC Systems detect such a connection or attempted connection, to ensure that the connection is terminated or the attempted connection prevented (as the case may be).

G2.2 The DCC shall take reasonable steps:

(a) to ensure that the DCC Total System is capable of detecting any unauthorised software that has been installed or executed on it and any unauthorised attempt to install or execute software on it;

(b) if the DCC Total System detects any such software or such attempt to install or execute software, to ensure that the installation or execution of that software is prevented; and

(c) where any such software has been installed or executed, to take appropriate remedial action.

G2.3 The DCC shall:

(a) take reasonable steps to ensure that:

(i) the DCC Total System is capable of identifying any deviation from its expected configuration; and

(ii) any such identified deviation is rectified; and

(b) for these purposes maintain at all times an up-to-date list of all hardware, and of all software and firmware versions and patches, which form part of the configuration of the DCC Total System.

G2.4 The DCC shall take reasonable steps to ensure that the DCC Total System:

(a) is capable of identifying any unauthorised or unnecessary network port, protocol, communication, application or network service;

(b) causes or permits to be open at any time only those network ports, and allows only those protocols, which are required at that time for the effective operation of that System, and blocks all network ports and protocols which are not so required; and

(c) causes or permits at any time only the making of such communications and the provision of such applications and network services as are required at that time for the effective operation of that System.

G2.5 The DCC shall take reasonable steps to ensure that each component of the DCC Total System is, at each point in time, enabled only with the functionality that is necessary for it effectively to fulfil its intended role within the DCC Total System at that time.

G2.6 The DCC shall:

(a) ensure that the DCC Total System records all system activity (including all attempts to access resources, or Data held, on it) in audit logs;

(b) ensure that the DCC Total System detects any attempt by any person to access resources, or Data held, on it without possessing the authorisation required to do so; and

(c) take reasonable steps to ensure that the DCC Total System prevents any such attempt at unauthorised access.

G2.7 The DCC shall take reasonable steps to ensure that the DCC Total System is capable of detecting any instance of Data leaving it by any means (including in particular by network transfers and the use of removable media) without authorisation.

Adverse Events: Duties to Detect and Prevent

G2.8 The DCC shall take reasonable steps to ensure that:

(a) the DCC Total System detects any Denial of Service Event; and

(b) any unused or disabled component or functionality of the DCC Total System is incapable of being a means by which that System is Compromised.

G2.9 The DCC shall use its best endeavours to:

(a) ensure that the DCC Total System is not Compromised;

(b) where the DCC Total System is Compromised, minimise the extent to which it is Compromised and any adverse effect arising from it having been Compromised; and

(c) ensure that the DCC Total System detects any instance in which it has been Compromised.

Security Incident Management

G2.10 The DCC shall ensure that, where the DCC Total System detects any:

(a) unauthorised event or deviation of a type referred to in Sections G2.1 to G2.7; or

(b) event which results, or was capable of resulting, in the DCC Total System being Compromised,

the DCC takes all of the steps required by the DCC Information Security Management System.

G2.11 The DCC shall, on the occurrence of a Major Security Incident in relation to the DCC Total System:

(a) promptly notify the Panel and the Security Sub-Committee (unless paragraph (b) applies); or

(b) where the Major Security Incident relates to that part of the DCC Total System which consists of any parts of the SMETS1 CSP System in respect of which Telefonica UK Limited is the DCC Service Provider, notify the Panel and the Security Sub-Committee as soon as is reasonably practicable.

System Design and Operation

G2.12 G2.12 The DCC shall, at each stage of the System Development Lifecycle, have regard to the need to design and operate the DCC Total System so as to protect it from being Compromised.

Management of Vulnerabilities

G2.13 The DCC shall ensure that an organisation which is a CHECK approved service provider or a CREST certified tester carries out assessments that are designed to identify any vulnerability of the DCC Systems to Compromise:

(a) in respect of each DCC System, on at least an annual basis;

(b) in respect of each new or materially changed component or functionality of the DCC Systems, prior to that component or functionality becoming operational; and

(c) on the occurrence of any Major Security Incident in relation to the DCC Systems.

G2.14 The DCC shall ensure that it carries out assessments that are designed to identify any vulnerability of the DCC Systems to Compromise:

(a) in respect of each DCC System, on at least an annual basis;

(b) in respect of each new or materially changed component or functionality of the DCC Systems, prior to that component or functionality becoming operational; and

(c) on the occurrence of any Major Security Incident in relation to the DCC Systems.

G2.15 Where, following any assessment of the DCC Systems in accordance with Section G2.13 or G2.14, any such vulnerability has been detected, the DCC shall:

(a) take reasonable steps to ensure that the cause of the vulnerability is rectified, or the potential impact of the vulnerability is mitigated, as soon as is reasonably practicable; and

(b) in the case of a material vulnerability, promptly notify the Security Sub- Committee of the steps being taken to rectify its cause or mitigate its potential impact (as the case may be) and the time within which they are intended to be completed.

Management of Data

G2.16 Where the DCC carries out a Back-Up of any Data held on the DCC Total System, it shall ensure that the Data which are Backed-Up are:

(a) protected in accordance with the Information Classification Scheme, including when being transmitted for the purposes of Back-Up; and

(b) stored on media that are located in physically secure facilities, at least one of which facilities must be in a different location to that part of the DCC Total System on which the Data being Backed-Up is ordinarily held.

G2.17 The DCC shall develop and maintain, and hold all Data in accordance with, a DCC Data Retention Policy.

G2.18 The DCC shall ensure that where, in accordance with the DCC Data Retention Policy, any Data are no longer required for the purposes of the Authorised Business, they are securely deleted in compliance with:

(a) HMG Information Assurance Standard No. 5:2011 (Secure Sanitisation); or

(b) any equivalent to that HMG Information Assurance Standard which updates or replaces it from time to time.

DCC Total System: Duty to Separate

G2.19 The DCC shall take reasonable steps to ensure that any software or firmware installed on the DCC Total System for the purposes of security is Separated from any software or firmware that is installed on that System for any other purpose.

G2.20 The DCC shall ensure that:

(a) all DCC Systems which form part of the DCC Total System are Separated from any other Systems;

(b) the DCC IT Testing and Training Systems and DCC IT Supporting Systems are Separated from the DCC Live Systems; and

(c) subject to the provisions of Section G2.22, each DCC Individual Live System is Separated from each other such System.

G2.21 Not used.

G2.22 Any System of the type referred to at paragraph (b) of the definition of DCC Individual Live System in Section A1 (Definitions) need not be Separated from that part of the DCC Total System which is used to convey communications between it and SMETS1 CHs.

DCC Total System: Further provisions for those parts referred to in paragraphs (b) and (c) of the definition of DCC Live Systems

G2.22A The requirements set out in Section G2.22B apply in relation to:

(a) the part of the DCC Total System which is referred to in paragraph (b) of the definition of DCC Live Systems in Section A1 (Definitions); and

(b) the part of the DCC Total System which is referred to in paragraph (c) of the definition of DCC Live Systems in Section A1 (Definitions),

each of which is as a '**relevant system**' for the purposes of Section G2.22B.

G2.22B The DCC shall ensure that:

(a) where a relevant system receives information from, or purporting to be from, the other relevant system, the relevant system receiving the information shall, prior to that information being used by any person, verify that the information:

(i) originated from and was created by the other relevant system; and

(ii) has not been modified since it was created by that relevant system;

(b) it puts in place such additional controls, practices and procedures which (to the extent possible) mitigate the risk of a member of DCC Personnel or a member of personnel of any DCC Service Provider being able to introduce or cause a security vulnerability in a relevant system;

(c) any person engaged in the development or customisation of any bespoke firmware or software relating to a relevant system is not, including for a period of at least 24 months (or such shorter period as may be approved by the Security Sub-Committee) following the date on which they cease to be so engaged on that relevant system, engaged in the development or customisation of bespoke firmware or software relating to the other relevant system;

(d) any person that is authorised as a Privileged Person in relation to a relevant system is not, including for a period of a least six months following the date on which they cease to be authorised as such a Privileged Person for that relevant system, authorised as a Privileged Person in relation to the other relevant system;

(e) any person that is a DCC Service Provider in respect of a relevant system is not a DCC Service Provider in respect of the other relevant system nor an Affiliate or Related Undertaking of any such DCC Service Provider; and

(f) any independent security testing of a relevant system that is used to provide assurance must be carried out by an organisation which is a CHECK approved service provider or a CREST certified tester but is not an organisation that:

(i) designed or developed any relevant system; or

(ii) is an Affiliate or Related Undertaking of an organisation that has designed or developed any relevant system.

DCC Total System: Further provisions for that part referred to in paragraph (c) of the definition of DCC Live Systems

G2.22C The requirements in Sections G2.22D and G2.22E apply in relation to the part of the DCC Total System referred to in paragraph (c) of the definition of DCC Live Systems and referred to in Sections G2.22D and G2.22E the '**applicable system**').

G2.22D The DCC shall ensure that each DCC Service Provider in respect of the applicable system shall, as soon as reasonably practicable, procure, from each company or other person that it knows or should reasonably know is at any time an Ultimate Controller of the DCC Service Provider, a legally enforceable undertaking in favour of the DCC the terms of which provide that the Ultimate Controller will refrain from any action that would be likely to cause the DCC Service Provider to be unable to meet the requirements imposed on it by the DCC for the purposes of enabling the DCC to comply with Section G2.22B(e).

G2.22E The DCC shall ensure that each DCC Service Provider Contract in respect of Services relating to the applicable system shall include terms and conditions which:

(a) require the DCC Service Provider to ensure that it is at all times able to meet the requirements imposed on it by the DCC for the purposes of enabling the DCC to comply with Section G2.22B(e);

(b) provide that where the DCC Service Provider:

(i) fails to procure an undertaking required by the DCC under Section G2.22C; or

(ii) fails to meet the requirements imposed on it by the DCC for the purposes of enabling the DCC to comply with Section G2.22B(e),

the DCC shall be entitled under and in accordance with the DCC Service Provider Contract to:

(iii) require such divestment by the DCC Service Provider as will enable it to meet the requirements imposed on it by the DCC for the purposes of its compliance with Section G2.22B(e);

(iv) terminate the DCC Service Provider Contract in respect of the applicable system and recover from the DCC Service Provider the DCC's costs arising as a direct result of the DCC Service Provider's failure as referred to in Sections G2.22E(b)(i) and (ii), including any fines or re-procurement costs.

Transfer of Secret Key Material

G2.22F Section G2.22G applies where the services provided under any particular DCC Service Provider Contract are (or are to be) replaced (in whole or in part) by the DCC such that they are (or shall be) provided under a different DCC Service Provider Contract.

G2.22G Where this Section G2.22G applies and it is expedient or requisite for the purposes of enabling the DCC to ensure the secure, continued and ongoing provision of services provided by the DCC under the Smart Energy Code, the DCC may, subject to the requirements of Section G2.22I, securely transfer Secret Key Material and other associated information from one DCC Live System or DCC Individual Live System to another DCC Live System or DCC Individual Live System or to a system which is to become part of a DCC Live System or DCC Individual Live System.

G2.22H Where:

(a) a secure transfer of Secret Key Material takes place pursuant to the provisions of Section G2.22G; and

(b) the transferred Secret Key Material includes a Private Key,

any Certificate that contains a Public Key that is associated with that Private Key shall, for the purposes of the Code, be treated as having been issued in respect of the DCC Live System or DCC Individual Live System to which that Secret Key Material has been transferred.

G2.22I The requirements of this Section G2.22I are that where the Secret Key Material relates to, or is used in connection with any Public Key that is the subject of, this Code:

(a) the SMKI PMA has, prior to the transfer of the Secret Key Material or other associated information taking place and having taken account of the views of the Security Sub-Committee on the proposed transfer, approved both:

(i) the secure transfer of that Secret Key Material and any other associated information; and

(ii) the secure mechanism by which the transfer is to take place; and

(b) the DCC ensures that:

(i) the secure transfer of the Secret Key Material and any other associated information is undertaken in compliance with any conditions that maybe specified by the SMKI PMA in its approval (which approval may be given before this Section G2.22I takes effect); and

(ii) the system to which the Secret Key Material and any other associated information is transferred complies with the requirements of Section G,including where that system is to become part of a DCC Live System or a DCC Individual Live System that it complies (to the extent required) with the provisions of Section G that apply or will apply to that DCC Live System or DCC Individual Live System.

DCC Live Systems: Independence of User Systems

G2.23 The DCC shall ensure that no individual is engaged in:

(a) the development of bespoke software or firmware, or the customisation of any software or firmware, for the purpose of its installation on any part of the DCC Live Systems; or

(b) the development, design, build, testing, configuration, implementation, operation, maintenance, modification or decommissioning of any part of the DCC Live Systems,

unless that individual satisfies the requirements of Section G2.24.

G2.24 An individual satisfies the requirements of this Section only if, at any time at which that individual is engaged in any activity described in Section G2.23, he or she:

(a) is not at the same time also engaged in:

(i) the development of bespoke software or firmware, or the customisation of any software or firmware, for the purpose of its installation on any User Systems; or

(ii) the development, design, build, testing, configuration, implementation, operation, maintenance, modification or decommissioning of any User Systems; and

(b) has not been engaged in any activity described in paragraph (a) for a period of time which the DCC reasonably considers to be appropriate, having regard to the need to ensure the management of risk in accordance with the DCC Information Security Management System.

G2.25 The DCC shall ensure that no resources which form part of the DCC Live Systems also form part of any User Systems.

Monitoring and Audit

G2.26 The DCC shall ensure that all system activity audit logs are reviewed regularly in accordance with the DCC Information Security Management System.

G2.27 The DCC shall ensure that all such system activity recorded in audit logs is recorded in a standard format which is compliant with:

(a) British Standard BS 10008:2008 (Evidential Weight and Legal Admissibility of Electronic Information), or any equivalent to that British Standard which updates or replaces it from time to time; and

(b) in the case of activity on the DCC Systems only, the Security Sub-Committee Guidance on Forensic Readiness published on the Website.

G2.28 The DCC shall monitor the DCC Systems in compliance with the SMKI PMA Guidance on Protective Monitoring published on the Website.

G2.29 The DCC shall take reasonable steps to ensure that the DCC Systems are capable of detecting Anomalous Events, in particular by reference to the:

(a) sending or receipt (as the case may be) of Service Requests, Pre-Commands, Signed Pre-Commands, Commands, Instructions to SMETS1 Devices, Service Responses and Alerts;

(b) audit logs of each component of the DCC Total System;

(c) error messages generated by each device which forms part of the DCC Total System;

(d) Incident Management Log compiled in accordance with Section H9; and

(e) patterns of traffic over the SMETS1 SM WAN and the SMETS2+ SM WAN.

G2.30 The DCC shall:

(a) take reasonable steps to ensure that the DCC Systems detect all Anomalous Events; and

(b) ensure that, on the detection of any Anomalous Event, it takes all of the steps required by the DCC Information Security Management System.

Manufacturers: Duty to Notify and Be Notified

G2.31 Where the DCC becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, any hardware, software or firmware which forms part of the DCC Total System, it shall:

(a) wherever it is reasonably practicable to do so notify the manufacturer of the hardware or the developer of the software or firmware (as the case may be);

(b) take reasonable steps to ensure that the cause of the vulnerability or likely cause of the material adverse effect is rectified, or its potential impact is mitigated, as soon as is reasonably practicable; and

(c) promptly notify the Security Sub-Committee of the steps being taken to rectify the cause of the vulnerability or likely cause of the material adverse effect, or to mitigate its potential impact (as the case may be), and the time within which those steps are intended to be completed.

G2.32 The DCC shall not be required to notify a manufacturer or developer in accordance with Section G2.31(a) where it has reason to be satisfied that the manufacturer or developer is already aware of the matter that would otherwise be notified.

G2.33 The DCC shall, wherever it is reasonably practicable to do so, establish with the manufacturers of the hardware and developers of the software and firmware which form part of the DCC Total System arrangements designed to ensure that the DCC will be notified where any such manufacturer or developer (as the case may be) becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, such hardware, software or firmware.

G2.34 Any arrangements established in accordance with Section G2.33 may provide that the manufacturer or developer (as the case may be) need not be required to notify the DCC where that manufacturer or developer has reason to be satisfied that the DCC is already aware of the matter that would otherwise be notified under the arrangements.

Parse and Correlate Software: Duty to Notify

G2.35 Where the DCC becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, any version of the Parse and Correlate Software, it shall notify the Users and (wherever it is reasonably practicable to do so) the developer of the software.

G2.36 The DCC shall not be required to notify a developer or User in accordance with Section G2.35 where it has reason to be satisfied that the developer or User is already aware of the matter that would otherwise be notified.

Cryptographic Credential Tokens and Smart Card Tokens

G2.37 Before supplying any Cryptographic Credential Token or Smart Card Token to any person in accordance with the provisions of this Code, the DCC shall ensure that the version of the software which forms part of that Cryptographic Credential Token or Smart Card Token:

(a) operates so as to generate Public Keys each of which is part of a Key Pair that has been generated using random numbers which are such as to make it computationally infeasible to regenerate that Key Pair even with knowledge of when and by means of what equipment it was generated; and

(b) has been adequately tested for the purpose of ensuring that it fulfils its intended purpose.

G2.38 The DCC shall, wherever it is reasonably practicable to do so, establish with the manufacturers of the hardware and developers of the software and firmware which form part of any Cryptographic Credential Tokens or Smart Card Tokens to be supplied by it in accordance with the provisions of this Code, arrangements designed to ensure that the DCC will be notified where any such manufacturer or developer (as the case may be) becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, such hardware, software or firmware.

G2.39 Where the DCC becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, any hardware, software or firmware which form part of any Cryptographic Credential Token or Smart Card Token which has been supplied by it in accordance with the provisions of this Code, it shall notify the Subscribers for Certificates associated with the use of Cryptographic Credential Tokens or Smart Card Tokens and (wherever it is reasonably practicable to do so) the manufacturer of the hardware or (as the case may be) developer of the software or firmware.

File Signing Software

G2.40 Before supplying any File Signing Software to any person in accordance with the provisions of this Code, the DCC shall ensure that the version of that File Signing Software which is being supplied has been subject to a software code review, by an individual or organisation with the professional competence to carry out such a review, for the purpose of identifying any vulnerabilities in the code that were not intended as a feature of its design.

G2.41 The DCC shall, wherever it is reasonably practicable to do so, establish with the developer of the File Signing Software to be supplied by it in accordance with the provisions of this Code, arrangements designed to ensure that the DCC will be notified where that developer becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, such software.

G2.42 Where the DCC becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, any File Signing Software which has been supplied by it in accordance with the provisions of this Code, it shall notify each person to whom it has provided that software and (wherever it is reasonably practicable to do so) the developer of the software.

G2.43 The DCC shall ensure that where it provides File Signing Software to any person, that software is provided in a format such that it can be confirmed, on receipt by the person to whom it is provided, as:

(a) having been provided by the DCC; and

(b) being authentic, such that any tampering with the software would be apparent.

Cryptographic Processing

G2.44 The DCC shall ensure that all Cryptographic Processing which:

(a) is for the purposes of complying with its obligations as CoS Party;

(b) results in the application of a Message Authentication Code to any message in order to create a Command to be sent to a SMETS2+ Device;

(c) is carried out by a DCO and involves the use for a SMETS1 Symmetric Key;

(d) involves the use of a DCC Private Key to establish any Transport Layer Security for the purposes of communicating with a SMETS1 Device;

(e) (other than in any of the circumstances set out in Section G2.44A) is carried out by a SMETS1 Service Provider and involves the use of a SMETS1 Symmetric Key; or

(f) (other than in any of the circumstances set out in Section G2.44B) involves the use of a Private Key to create a Digital Signature which is intended to be part of a Command that can be processed by a SMETS2+ Device,

is carried out within Cryptographic Modules which are compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

G2.44A For the purposes of Section G2.44(e), the circumstances set out in this Section G2.44A shall be those in which one of the following occurs:

(a) Cryptographic Processing is carried out by a SMETS1 Service Provider to generate a Command to "add credit" (as specified in a Version of the ESMETS, the GSMETS or the IHDTS with a Principal Version number of 1) to a SMETS1 Device;

(b) a SMETS1 Symmetric Key is used by a SMETS1 Service Provider to generate an Instruction where the target Device is identified in the SMETS1 Supporting Requirements as a Category 1 Device for the purposes of this paragraph (b);

(c) a SMETS1 Symmetric Key is used by a SMETS1 Service Provider where:

(i) that Symmetric Key is valid only for the duration of a single Application Association; and

(ii) the target Device is identified as a Category 2 Device for the purposes of this sub-paragraph in the SMETS1 Supporting Requirements; and

(d) any use of a SMETS1 Symmetric Key by a SMETS1 Service Provider that is:

(i) required to establish a session for Transport Layer Security with a SMETS1 Device;

(ii) generated as part of the establishment of the session; and

(iii) destroyed at the termination of that same session.

G2.44B For the purposes of Section G2.44(f), the circumstances set out in this Section G2.44B shall be where:

(a) in relation to a Recovery Private Key, there is a period of time during which that Recovery Private Key is unusable for the purposes set out in G2.44 because of it being split into multiple parts as described in Appendix L (SMKI Recovery Procedure); and

(b) in relation to the Contingency Private Key, there is a period of time during which the Contingency Private Key is unusable for the purposes set out in G2.44 because of it being split into multiple parts as described in Appendix L (SMKI Recovery Procedure).

G2.45 The DCC shall ensure that any and all Cryptographic Processing undertaken under or pursuant to this Code which does not fall within the scope of Section G2.44 is carried out within Cryptographic Modules established in accordance with its Information Classification Scheme.

Network Time

G2.46 For the purposes of Section G2.47:

(a) the "**Network Time**" means one or more time sources maintained by the DCC from which all Commissioned Communications Hub Functions synchronise time; and

(b) the "**Independent Time Source**" means a time source that is:

(i) accurate;

(ii) not maintained by the DCC; and

(iii) determined in a manner that is independent of any part of the DCC Total System.

G2.47 The DCC shall ensure that:

(a) the DCC Total System is capable of detecting any instance in which the Network Time materially differs from the Independent Time Source; and

(b) if the DCC Total System detects such a material difference, the DCC takes all of the steps required by the DCC Information Security Management System to rectify the inaccuracy of its Network Time.

Integrity of Communication over the SM WAN

G2.48 The DCC shall take reasonable steps to ensure that all communications which are transmitted over the SM WAN are protected so that the Data contained in them remains confidential, and their integrity is preserved, at all times during transmission to and from Communications Hubs.

G2.49 The DCC shall not process any communication received over the SM WAN, or send to any Party any communication over the SM WAN, where it is aware that the Data contained in that communication has been Compromised.

ECoS Interface Specification

G2.50 The DCC shall, as soon as reasonably practicable after the coming into effect of this Section G2.50, prepare and submit to the Secretary of State for approval an ECoS Interface Specification in accordance with the following process:

(a) the DCC shall send a draft of the ECoS Interface Specification, together with an impact assessment that sets out the DCC's views on any impact that the subject matter of the draft ECoS Interface Specification might reasonably be considered to have on the End-to-End Security Architecture or the risks identified in the Security Risk Assessment (a **Security Impact Assessment**), to the Security Sub-Committee for its review and comments;

(b) having received the Security Sub-Committee's comments and observations on the Security Impact Assessment, the DCC shall as soon as is practicable provide a response to any such comments or observations to the Security Sub-Committee, update the draft ECoS Interface Specification as appropriate to take into account any such comments and observations, and send the updated draft to the Secretary of State, together with:

(i) a statement of the reasons why the DCC considers the submitted draft to be fit for purpose; and

(ii) an explanation of how the DCC has responded to the comments and observations (if any) made by the Security Sub-Committee in respect of the initial draft and/or the Security Impact Assessment sent to it in accordance with paragraph (a) above;

(c) the DCC shall comply with any direction given to it by the Secretary of State following the Secretary of State's consideration of the draft ECoS Interface Specification which direction may require the DCC to:

(i) make such amendments to the draft document as are set out or described in the direction;

(ii) produce and submit to the Secretary of State a further draft of the document; and

(iii) follow a specified process (and the time within which that process shall be completed) prior to submitting a further draft of the document to the Secretary of State.

G2.51 Where pursuant to Section G2.50(b) the Security Sub-Committee receives a response from the DCC in respect of any comments or observations made by the Security Sub-Committee on the Security Impact Assessment, the Security Sub-Committee shall notify the Secretary of State whether it considers there to be any remaining outstanding unacceptable risks to the End-to-End Security Architecture as a consequence of the proposed ECoS Interface Specification.

G2.52 [Not used]

G2.53 Where the DCC wishes to make a change to the ECoS Interface Specification, it shall prepare and submit to the Security Sub-Committee a draft of the proposed amended ECoS Interface Specification, together with an updated Security Impact Assessment that sets out the DCC's views on the impact that the proposed changes might reasonably be considered to have on the End-to-End Security Architecture or the risks identified in the Security Risk Assessment.

G2.54 The DCC shall take into account, and provide a response to, any comments and observations received from the Security Sub Committee when finalising any replacement version of the ECoS Interface Specification.

G2.55 The DCC shall ensure that:

(a) the ECoS Interface Specification accurately describes the ECoS Interface at all times; and

(b) on receiving a request from the DCC Independent Security Assessment Service Provider for the purposes of enabling it to carry out a DCC Security Assessment, the ECoS Interface Specification is made available to the DCC Independent Security Assessment Service Provider together with all previous versions of the specification and any supporting Security Impact Assessments as may be requested by the DCC Independent Security Assessment Service Provider.

DCC Use of Private Keys

G2.56 The DCC shall ensure that any Private Key that it uses or intends to use to create a Digital Signature that forms part of a Command that is to be sent to a SMETS2+ Device is used only for the purposes of:

(a) creating Digital Signatures that form part of Commands that are to be sent to SMETS2+ Devices; or

(b) Digitally Signing Certificate Signing Requests.

G2.57 Where:

(a) the DCC is the Subscriber for an Organisation Certificate that has a Remote Party Role that is specified in the GB Companion Specification; and

(b) the Private Key associated with the Public Key contained within that Organisation Certificate is used for purposes that are not specified or described in the GB Companion Specification,

the DCC shall, where reasonably possible at the earliest opportunity but in any event no later than the date of expiry of that Organisation Certificate, replace the Private Key with one that has an associated Public Key that is contained within an Organisation Certificate that has a Remote Party Role that is specified in Table 1 to Annex A of Section L.

G2.58 Subject to Section G2.59, the DCC shall not, on or from a date which is after the ECoS Service Live Date, become a Subscriber for an Organisation Certificate that:

(a) has a Remote Party Role that is specified in the GB Companion Specification; and

(b) contains a Public Key which has an associated Private Key that is used, or is to be used, for purposes that are not specified or described in the GB Companion Specification.

G2.59 The requirement in Section G2.58 shall not apply in circumstances where the DCC is required to replace an Organisation Certificate that has:

(a) a Remote Party Role that is specified in the GB Companion Specification; and

(b) been revoked following the operation of one of the procedures in the SMKI Recovery Procedure.

G2.60 The DCC shall ensure that any Root OCA Private Key is used only for the purposes of:

(a) Digitally Signing an OCA Certificate;

(b) Digitally Signing a Certificate Signing Request; or

(c) Digitally Signing the Organisation ARL.

G2.61 The DCC shall ensure that any Issuing OCA Private Key is used only for the purposes of:

(a) Digitally Signing an Organisation Certificate;

(b) Digitally Signing a Certificate Signing Request; or

(c) Digitally Signing the Organisation CRL.

G3. SYSTEM SECURITY: OBLIGATIONS ON USERS

Unauthorised Activities: Duties to Detect and Respond

G3.1 Each User shall:

(a) take reasonable steps to ensure that:

(i) its User Systems are capable of identifying any deviation from their expected configuration; and

(ii) any such identified deviation is rectified; and

(b) for these purposes maintain at all times an up-to-date list of all hardware, and of all software and firmware versions and patches, which form part of the configuration of those User Systems.

G3.2 Each User shall take reasonable steps:

(a) to ensure that its User Systems are capable of detecting any unauthorised software that has been installed or executed on them and any unauthorised attempt to install or execute software on them;

(b) if those User Systems detect any such software or such attempt to install or execute software, to ensure that the installation or execution of that software is prevented; and

(c) where any such software has been installed or executed, to take appropriate remedial action.

G3.3 Each User shall:

(a) ensure that its User Systems record all attempts to access resources, or Data held, on them;

(b) ensure that its User Systems detect any attempt by any person to access resources, or Data held, on them without possessing the authorisation required to do so; and

(c) take reasonable steps to ensure that its User Systems prevent any such attempt at unauthorised access.

Security Incident Management

G3.4 Each User shall ensure that, on the detection of any unauthorised event of the type referred to at Sections G3.1 to G3.3, it takes all of the steps required by its User Information Security Management System.

G3.5 Each User shall, on the occurrence of a Major Security Incident in relation to its User Systems, ensure that the Panel and the Security Sub-Committee are promptly notified.

System Design and Operation

G3.6 Each User shall, at each stage of the System Development Lifecycle, have regard to the need to design and operate its User Systems so as to protect them from being Compromised.

Management of Vulnerabilities

G3.7 Each Supplier Party shall ensure that either a tester who has achieved CREST certification or an organisation which is a CHECK service provider carries out assessments that are designed to identify any vulnerability of its User Systems to Compromise:

(a) in respect of each of its User Systems, on at least an annual basis;

(b) in respect of each new or materially changed component or functionality of its User Systems, prior to that component or functionality becoming operational; and

(c) on the occurrence of any Major Security Incident in relation to its User Systems.

G3.8 Each User shall ensure that it carries out assessments that are designed to identify any vulnerability of its User Systems to Compromise:

(a) in respect of each of its User Systems, on at least an annual basis;

(b) in respect of each new or materially changed component or functionality of its User Systems, prior to that component or functionality becoming operational; and

(c) on the occurrence of any Major Security Incident in relation to its User Systems.

G3.9 Each User shall ensure that:

(a) in respect of any new or materially changed component or functionality of its User Systems which comprises (or includes) a System that is being incorporated into its User Systems for the first time:

(i) it notifies the Security Sub-Committee prior to that System becoming an operational part of its User Systems;

(ii) together with that notification it provides to the Security Sub-Committee an adequate description of the System, of the purpose for which it will be used, and of the nature of its relationship to the other component parts of the User Systems; and

(iii) that System does not become an operational part of its User Systems unless and until the Security Sub-Committee has authorised the User to bring it into operation (for which purpose, following any such review or assessment as it may consider appropriate, the Security Sub-

Committee shall be entitled to give or withhold authorisation by means of notice to the User); and

(b) where, following any assessment of its User Systems in accordance with Section G3.7 or G3.8, any material vulnerability has been detected, a User shall ensure that it:

(i) takes reasonable steps to ensure that the cause of the vulnerability is rectified, or the potential impact of the vulnerability is mitigated, as soon as is reasonably practicable;

(ii) promptly notifies the Security Sub-Committee of the steps being taken to rectify its cause or mitigate its potential impact (as the case may be) and the time within which they are intended to be completed; and

(c) where a material component or material functionality of its User Systems is being discontinued or where a User System is being decommissioned;

(i) the User notifies the Security Sub-Committee prior to the component or functionality being discontinued or the User System being decommissioned (as relevant);

(ii) together with that notification, the User provides to the Security Sub-Committee an adequate description of the reason for the change and the proposed timing of the change;

(iii) the discontinuation or decommissioning is not undertaken before the Security Sub-Committee has been notified; and

(iv) the User takes any reasonable action advised by the Security Sub-Committee.

Management of Data

G3.10 Each User shall:

(a) develop and maintain, and hold all Data in accordance with, a User Data Retention Policy; and

(b) when any Data held by it cease to be retained in accordance with the User Data Retention Policy, ensure that they are securely deleted in accordance with its Information Classification Scheme.

User Systems: Duty to Separate

G3.11 Each User shall take reasonable steps to ensure that any software or firmware that is installed on its User Systems for the purposes of security is Separated from any software or firmware that is installed on those Systems for any other purpose.

User Systems: Independence of DCC Live Systems

G3.12 Each User shall ensure that no individual is engaged in:

(a) the development of bespoke software or firmware, or the customisation of any software or firmware, for the purpose of its installation on any part of its User Systems; or

(b) the development, design, build, testing, configuration, implementation, operation, maintenance, modification or decommissioning of any part of its User Systems, unless that individual satisfies the requirements of Section G3.13.

G3.13 An individual satisfies the requirements of this Section only if, at any time at which that individual is engaged in any activity described in Section G3.12, he or she:

(a) is not at the same time also engaged in:

(i) the development of bespoke software or firmware, or the customisation of any software or firmware, for the purpose of its installation on any part of the DCC Live Systems; or

(ii) the development, design, build, testing, configuration, implementation, operation, maintenance, modification or decommissioning of any part of the DCC Live Systems; and

(b) has not been engaged in any activity described in paragraph (a) for a period of time which the User reasonably considers to be appropriate, having regard to the need to ensure the management of risk in accordance with its User Information Security Management System.

G3.14 Each User shall ensure that no resources which form part of its User Systems also form part of the DCC Live Systems.

Monitoring

G3.15 Each Supplier Party shall take reasonable steps to ensure that its User Systems are capable of detecting Anomalous Events, in particular by reference to the:

(a) sending or receipt (as the case may be) of Service Requests, Pre-Commands, Signed Pre-Commands, Service Responses and Alerts;

(b) audit logs of each Device for which it is the Responsible Supplier; and

(c) error messages generated by each Device for which it is the Responsible Supplier.

G3.16 Each Supplier Party shall:

(a) take reasonable steps to ensure that its User Systems detect all Anomalous Events; and

(b) ensure that, on the detection by its User Systems of any Anomalous Event, it takes all of the steps required by its User Information Security Management System.

Manufacturers: Duty to Notify and Be Notified

G3.17 Where a User becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of:

(a) any hardware, software or firmware which forms part of its User Systems; or

(b) (where applicable) any Smart Metering System (excluding a Communications Hub Function or Gas Proxy Function which forms part of a SMETS2+ Device) for which it is the Responsible Supplier,

it shall comply with the requirements of Section G3.18.

G3.18 The requirements of this Section are that the User shall:

(a) wherever it is reasonably practicable to do so notify the manufacturer of the hardware or Device or the developer of the software or firmware (as the case may be);

(b) take reasonable steps to ensure that the cause of the vulnerability or likely cause of the material adverse effect is rectified, or its potential impact is mitigated, as soon as is reasonably practicable; and

(c) ensure that the Security Sub-Committee is promptly notified of the steps being taken to rectify the cause of the vulnerability or likely cause of the material adverse effect, or to mitigate its potential impact (as the case may be), and the time within which those steps are intended to be completed.

G3.19 A User shall not be required to notify a manufacturer or developer in accordance with Section G3.18(a) where it has reason to be satisfied that the manufacturer or developer is already aware of the matter that would otherwise be notified.

G3.20 Each User shall, wherever it is practicable to do so, establish with:

(a) the manufacturers of the hardware and developers of the software and firmware which form part of its User Systems; and

(b) (where applicable) any Smart Metering System (excluding a Communications Hub Function or Gas Proxy Function which forms part of a SMETS2+ Device) for which it is the Responsible Supplier,

arrangements designed to ensure that the User will be notified where any such manufacturer or developer (as the case may be) becomes aware of any material security vulnerability in, or likely cause of a material adverse effect on the security of, such hardware, software, firmware or Device.

G3.21 Any arrangements established in accordance with Section G3.20 may provide that the manufacturer or developer (as the case may be) need not be required to notify the User where that manufacturer or developer has reason to be satisfied that the User is already aware of the matter that would otherwise be notified under the arrangements.

Cryptographic Processing

G3.22 Each User shall ensure that it carries out Cryptographic Processing only within Cryptographic Modules established in accordance with its Information Classification Scheme.

User Systems: Physical Location

G3.23 Each User which is an Eligible User in relation to any Supply Sensitive Service Request shall ensure that:

(a) any Cryptographic Module which constitutes a component of its User Systems and in which:

(i) any Private Key that is used to Digitally Sign Pre-Commands is held;

(ii) Pre-Commands are Digitally Signed; and

(iii) any SMETS1 Service Request that constitutes a Critical Service Request is Digitally Signed; and

(b) any functionality of its User Systems which is used to apply Supply Sensitive Checks, is located, operated, configured, tested and maintained in the United Kingdom by User Personnel who are located in the United Kingdom.

G3.24 Each User to which Section G3.23 applies shall ensure that the components and the functionality of its User Systems to which that Section refers are operated from a sufficiently secure environment in accordance with the provisions of Section G5.17.

Supply Sensitive Check

G3.25 Each User which is an Eligible User in relation to any Supply Sensitive Service Request shall ensure that:

(a) it applies a Supply Sensitive Check prior to Digitally Signing a Pre-Command or SMETS1 Service Request in respect of any Supply Sensitive Service Request;

(b) it both applies that Supply Sensitive Check and Digitally Signs the relevant Pre-Command or SMETS1 Service Request in the United Kingdom; and

(c) the relevant Pre-Command or SMETS1 Service Request has been processed only in the United Kingdom between the application of the Supply Sensitive Check and the Digital Signature.

SMETS1 Smart Metering Systems

G3.26 Each Supplier Party shall use its best endeavours to ensure that each SMETS1 SMS for which it is the Responsible Supplier is at all times Secure.

G3.27 Each Supplier Party shall retain documentary evidence sufficient to demonstrate its compliance with the obligation at Section G3.26.

G3.28 For the purposes of Section G3.26:

(a) a SMETS1 SMS is "**Secure**" if it is designed, installed, operated and supported so as to ensure, to an Appropriate Standard, that it is not subject to any event which results, or is capable of resulting, in any Device of which it is comprised being Compromised to a material extent; and

(b) an "**Appropriate Standard**" means a high level of security that is in accordance with good industry practice within the energy industry in Great Britain, and is capable of verification as such by the User Independent Security Assurance Service Provider in accordance with Section G8.

User Use of Private Keys

G3.29 Each User shall ensure that any Private Key that it uses or intends to use to create a Digital Signature that forms part of a Command that is to be sent to a SMETS2+ Device is used only for the purposes of:

(a) creating Digital Signatures that form part of Commands that are to be sent to SMETS2+ Devices; or

(b) Digitally Signing Certificate Signing Requests.

G4. ORGANISATIONAL SECURITY: OBLIGATIONS ON USERS AND THE DCC

Obligations on Users

G4.1 Each User shall:

(a) ensure that each member of its User Personnel who is authorised to access Data held on its User Systems holds a security clearance which is appropriate to the role performed by that individual and to the Data which he or she is authorised to access; and

(b) annually review the security clearance held by each such individual and ensure that it continues to be appropriate to the role performed by that individual and to the Data which he or she is authorised to access.

G4.2 Each User shall comply with Section G4.3 in respect of any of its User Personnel who are authorised to carry out activities which:

(a) involve access to resources, or Data held, on its User Systems; and

(b) are capable of Compromising the DCC Total System, any User Systems, any RDP Systems or any Device in a manner that could affect (either directly or indirectly) the quantity of gas or electricity that is supplied to a consumer at premises.

G4.3 Each User shall ensure that any of its User Personnel who are authorised to carry out the activities identified in Section G4.2:

(a) where they are located in the United Kingdom are subject to security screening in a manner that is compliant with:

(i) British Standard BS 7858:2012 (Security Screening of Individuals Employed in a Security Environment – Code of Practice); or

(ii) any equivalent to that British Standard which updates or replaces it from time to time; and

(b) where they are not located in the United Kingdom are subject to security screening in a manner that is compliant with:

(i) the British Standard referred to in Section G4.3(a); or

(ii) any comparable national standard applying in the jurisdiction in which they are located.

Obligations on the DCC

G4.4 The DCC shall:

(a) ensure that each member of DCC Personnel who is authorised to access Data held on the DCC Total System holds a security clearance which is appropriate to the role performed by that individual and to the Data to which he or she is authorised to access; and

(b) annually review the security clearance held by each such individual and ensure that it continues to be appropriate to the role performed by that individual and to the Data to which he or she is authorised to access.

G4.5 The DCC shall comply with Section G4.6 in respect of any of the DCC Personnel who are authorised to carry out activities which:

(a) involve access to resources, or Data held, on the DCC Total System; and

(b) are capable of Compromising the DCC Total System, any User Systems, any RDP Systems or any Device.

G4.6 The DCC shall ensure that any of the DCC Personnel who are authorised to carry out the activities identified in Section G4.5:

(a) where they are located in the United Kingdom are subject to security screening in a manner that is compliant with:

(i) British Standard BS 7858:2012 (Security Screening of Individuals Employed in a Security Environment – Code of Practice); or

(ii) any equivalent to that British Standard which updates or replaces it from time to time; and

(b) where they are not located in the United Kingdom are subject to security screening in a manner that is compliant with:

(i) the British Standard referred to in Section G4.6(a); or

(ii) any comparable national standard applying in the jurisdiction in which they are located.

G4.7 The DCC shall ensure that each member of DCC Personnel who is a Privileged Person has passed a Security Check before being given any access to Data held on the DCC Total System.

G4.8 Where the DCC is required to ensure that any two Systems forming part of the DCC Total System are Separated, it shall either:

(a) ensure that no person is a Privileged Person in relation to both of those Systems; or

(b) to the extent that any person is a Privileged Person in relation to both Systems, it establishes additional controls sufficient to ensure that the activities of that person cannot become a means by which any part of the DCC Live Systems is Compromised to a material extent.

G5. INFORMATION SECURITY: OBLIGATIONS ON THE DCC AND USERS

Information Security: Obligations on the DCC

G5.1 The DCC shall establish, maintain and implement processes for the identification and management of the risk of Compromise to the DCC Total System, and such processes shall comply with:

(a) the standard of the International Organisation for Standards in respect of information security risk management known as ISO/IEC 27005:2011 (Information Technology – Security Techniques – Information Security Risk Management); or

(b) any equivalent to that standard of the International Organisation for Standards which updates or replaces it from time to time

G5.2 The DCC shall carry out an assessment of such processes for the identification and management of risk:

(a) on at least an annual basis;

(b) on any occasion on which it implements a material change to the DCC Total System; and

(c) on the occurrence of any Major Security Incident in relation to the DCC Total System.

G5.3 Where the DCC is required in accordance with the DCC Licence to obtain and hold ISO 27001 certification, it shall:

(a) establish, give effect to, maintain, and comply with a set of policies and procedures to be known as the DCC Information Security Management System;

(b) ensure that the DCC Information Security Management System:

(i) is so designed as to ensure that the DCC complies with its obligations under Sections G2 and G4;

(ii) meets the requirements of Sections G5.4 to G5.13; and

(iii) provides for security controls which are proportionate to the potential impact of each part of the DCC Total System being Compromised, as determined by means of processes for the management of information risk; and

(c) review the DCC Information Security Management System on at least an annual basis, and make any changes to it following such a review in order to ensure that it remains fit for purpose.

The DCC Information Security Management System

G5.4 The DCC Information Security Management System shall incorporate an information security policy which makes appropriate provision in respect of:

(a) measures to identify and mitigate risks to the security of Data stored on or communicated by means of the DCC Total System, including measures relating to Data handling, retention and protection; and

(b) the establishment and maintenance of an Information Classification Scheme in relation to the DCC Total System.

G5.5 The DCC Information Security Management System shall specify the approach of the DCC to:

(a) information security, including its arrangements to review that approach at planned intervals;

(b) human resources security;

(c) physical and environmental security; and

(d) ensuring that the DCC Service Providers establish and maintain information, human resources, and physical and environmental security measures which are equivalent to those of the DCC.

G5.6 The DCC Information Security Management System shall incorporate a set of asset management procedures which shall make provision for the DCC to establish and maintain a register of the physical and information assets on which it relies for the purposes of the Authorised Business (including a record of the member of DCC Personnel who has responsibility for each such asset).

G5.7 The DCC Information Security Management System shall incorporate procedures that comply with:

(a) 2021 Telecommunications (Security) Act (TSA) in respect of the security of telecommunications systems and services; or

(b) any equivalent to those Security Procedures which update or replace them from time to time.

G5.8 The DCC Information Security Management System shall incorporate procedures that comply with:

(a) the appropriate standards of the International Organisation for Standards with respect to network security, comprising ISO/IEC 27033-1:2009, ISO/IEC 27033-2:2012 and ISO/IEC 27033-3:2010 (Information Technology – Security Techniques – Network Security); or

(b) any equivalents to those standards of the International Organisation for Standards which update or replace them from time to time.

G5.9 The DCC Information Security Management System shall incorporate a policy on access control, which includes provision in respect of:

(a) measures to restrict access to Data that is stored on or communicated by means of the DCC Total System to those who require such Data and are authorised to obtain it;

(b) the designation of appropriate levels of identity assurance in respect of those who are authorised to access such Data;

(c) the specification of appropriate levels of security clearance in respect of those who are authorised to access such Data;

(d) procedures for granting, amending and removing authorisations in respect of access to such Data;

(e) procedures for granting and reviewing security clearances for DCC Personnel; and

(f) measures to ensure that the activities of one individual may not become a means by which the DCC Total System is Compromised to a material extent.

G5.10 The DCC Information Security Management System shall incorporate procedures on the management of information security incidents which comply with:

(a) the standard of the International Organisation for Standards in respect of security incident management known as ISO/IEC 27035:2011 (Information Technology – Security Techniques – Information Security Incident Management); or

(b) any equivalent to that standard of the International Organisation for Standards which updates or replaces it from time to time.

G5.11 The DCC Information Security Management System shall incorporate procedures on the management of information security incidents which in particular make provision for:

(a) the allocation of clearly defined roles and responsibilities to DCC Personnel;

(b) the manner in which such incidents will be monitored, classified, reported and managed;

(c) a communications plan in relation to all communications with respect to such incidents; and

(d) the use of recovery systems in the case of serious incidents.

G5.12 The DCC Information Security Management System shall incorporate procedures on the management of business continuity that comply with:

(a) the following standards of the International Organisation for Standards in respect of business continuity:

(i) ISO/IEC 22301:2012 (Societal Security – Business Continuity Management Systems – Requirements); and

(ii) ISO/IEC 27031:2011 (Information Technology – Security Techniques – Guidelines for Information and Communications Technology Readiness for Business Continuity); and

(b) the Business Continuity Institute Good Practice Guidelines 2013; or

(c) in each case, any equivalents to those standards or guidelines which update or replace them from time to time.

G5.13 The DCC Information Security Management System shall incorporate procedures in relation to the secure management of all Secret Key Material of the DCC, which shall in particular make provision for:

(a) the security of that Secret Key Material throughout the whole of its lifecycle from its generation to its destruction;

(b) the manner in which that Secret Key Material will be registered, ordered, generated, labelled, distributed, installed, superseded and renewed; and

(c) the verifiable destruction of that Secret Key Material.

Information Security: Obligations on Users

G5.14 Each User shall establish, maintain and implement processes for the identification and management of the risk of Compromise to:

(a) its User Systems;

(b) any security functionality used for the purposes of complying with the requirements of this Section G in relation to its User Systems;

(c) any other Data, Systems or processes on which it relies for the generation, initiation or processing of Service Requests, Service Responses, Alerts or Data communicated over the Self-Service Interface;

(d) any Smart Metering Systems for which it is the Responsible Supplier; and

(e) any communications links established between any of its Systems and the DCC Total System, and any security functionality used in respect of those communications links or the communications made over them.

G5.15 Each User shall ensure that such processes for the identification and management of risk comply with:

(a) the standard of the International Organisation for Standards in respect of information security risk management known as ISO/IEC 27005:2011 (Information Technology – Security Techniques – Information Security Risk Management); or

(b) any equivalent to that standard of the International Organisation for Standards which updates or replaces it from time to time.

G5.16 Each User shall carry out an assessment of such processes for the identification and management of risk:

(a) on at least an annual basis;

(b) on any occasion on which it implements a material change to:

(i) its User Systems;

(ii) any security functionality used for the purposes of complying with the requirements of this Section G in relation to its User Systems;

(iii) any other Systems or processes on which it relies for the generation, initiation or processing of Service Requests, Service Responses, Alerts or Data communicated over the Self-Service Interface; or

(iv) any Smart Metering Systems for which it is the Responsible Supplier; and

(c) on the occurrence of any Major Security Incident in relation to its User Systems.

G5.17 Each User shall comply with the following standard of the International Organisation for Standards in respect of the security, reliability and resilience of its information assets and processes and its User Systems:

(a) ISO/IEC 27001:2013 (Information Technology – Security Techniques – Information Security Management Systems); or

(b) any equivalent to that standard which updates or replaces it from time to time.

G5.18 Each User shall:

(a) establish, give effect to, maintain, and comply with a set of policies and procedures to be known as its User Information Security Management System;

(b) ensure that its User Information Security Management System:

(i) is so designed as to ensure that it complies with its obligations under Sections G3 and G4;

(ii) is compliant with the standard referred to at Section G5.17;

(iii) meets the requirements of Sections G5.19 to G5.24; and

(iv) provides for security controls which are proportionate to the potential impact of each part of its User Systems being Compromised, as determined by means of processes for the management of information risk; and

(c) review its User Information Security Management System on at least an annual basis, and make any changes to it following such a review in order to ensure that it remains fit for purpose.

The User Information Security Management System

G5.19 Each User Information Security Management System shall incorporate an information security policy which makes appropriate provision in respect of:

(a) measures to identify and mitigate risks to the security of Data stored on or communicated by means of the User Systems, including measures relating to Data handling, retention and protection;

(b) the establishment and maintenance of an Information Classification Scheme in relation to the User Systems;

(c) the management of business continuity; and

(d) the education, training and awareness of User Personnel in relation to information security.

G5.20 Each User Information Security Management System shall specify the approach of the User to:

(a) information security, including its arrangements to review that approach at planned intervals;

(b) human resources security;

(c) physical and environmental security; and

(d) ensuring that any person who provides services to the User for the purpose of ensuring that the User is able to comply with its obligations under this Code must establish and maintain information, human resources, and physical and environmental security measures which are equivalent to those of the User.

G5.21 Each User Information Security Management System shall incorporate a set of asset management procedures which shall make provision for the User to establish and maintain a register of the physical and information assets on which it relies for the purposes of complying with its obligations under this Code.

G5.22 Each User Information Security Management System shall incorporate a policy on access control, which includes provision in respect of:

(a) measures to restrict access to Data that is stored on or communicated by means of the User Systems to those who require such Data and are authorised to obtain it;

(b) procedures for granting, amending and removing authorisations in respect of access to such Data; and

(c) measures to ensure that the activities of one individual may not become a means by which the User Systems are Compromised to a material extent.

G5.23 Each User Information Security Management System shall incorporate procedures on the management of information security incidents which comply with:

(a) the standard of the International Organisation for Standards in respect of security incident management known as ISO/IEC 27035:2011 (Information Technology – Security Techniques – Information Security Incident Management); or

(b) any equivalent to that standard of the International Organisation for Standards which updates or replaces it from time to time.

G5.24 Each User Information Security Management System shall incorporate procedures in relation to the secure management of all Secret Key Material of the User, which shall in particular make provision for:

(a) the security of that Secret Key Material throughout the whole of its lifecycle from its generation to its destruction;

(b) the manner in which that Secret Key Material will be registered, ordered, generated, labelled, distributed, installed, superseded and renewed; and

(c) the verifiable destruction of that Secret Key Material.

Shared Resources

G5.25 Sections G5.26 to G5.28 apply in relation to a User where:

(a) any resources which form part of the User Systems of that User (are **Shared Resources**); and

(b) by virtue of those Shared Resources:

(i) the User Systems of that User are capable of being a means by which the User Systems of another User are Compromised (or vice versa); or

(ii) the potential extent to which the User Systems of either User may be Compromised, or the potential adverse effect of any Compromise to the User Systems of either User, is greater than it would have been had those User Systems not employed the Shared Resources.

G5.26 Where this Section applies, a User which begins to employ User Systems which consist in whole or in part of Shared Resources:

(a) shall notify the Security Sub-Committee as soon as reasonably practicable after first doing so; and

(b) where those Shared Resources are provided to the User by a Shared Resource Provider, shall include in that notification:

(i) the name and contact details of the Shared Resource Provider; and

(ii) a description of the services provided by the Shared Resource Provider to the User in relation to its User Systems.

G5.27 Where this Section applies, and where a User is entitled to send Critical Service Requests to the DCC, the User shall notify the Security Sub-Committee of the total number of Smart Metering Systems comprising Devices in respect of which such Critical Service Requests are capable of being sent from its User Systems:

(a) as soon as reasonably practicable after it first begins to employ User Systems which consist in whole or in part of Shared Resources; and

(b) at intervals of six months thereafter.

G5.28 Where this Section applies:

(a) the requirement at Section G5.18(b)(iv) shall be read as a requirement on a User to ensure that its User Information Security Management System provides for security controls that are proportionate to the potential impact of a Compromise to each part of all of the User Systems of each User which employs the Shared Resources; and

(b) where the Shared Resources are provided to a User by a Shared Resource Provider:

(i) the provisions of paragraph (a) apply to the Shared Resource Provider in respect of its own User Information Security Management System in the same manner as they apply to each User to which the Shared Resources are provided; and

(ii) both the User and the Shared Resource Provider shall ensure that their User Information Security Management Systems are compatible with each other in respect of all the matters referred to in Sections G5.19 to G5.24.

G6. ANOMALY DETECTION THRESHOLDS: OBLIGATIONS ON THE DCC AND USERS

Threshold Anomaly Detection Procedures

G6.1 The "**Threshold Anomaly Detection Procedures**" shall be a SEC Subsidiary Document of that name which:

(a) shall describe the means by which:

(i) each User shall be able securely to notify the DCC of the Anomaly Detection Thresholds set by that User, and of any exceptions that are applicable to each such Anomaly Detection Threshold;

(ii) the DCC shall be able securely to notify each User when a communication relating to that User is quarantined, or deleted from the DCC Systems, by the DCC; and

(iii) each such User shall be able securely to notify the DCC whether it considers that a communication which has been quarantined should be deleted from the DCC Systems or processed by the DCC;

(b) shall determine the standard of security at which Users and the DCC must be able to notify each other in order for such notifications to be considered, for the purposes of paragraph (a), to have been given 'securely';

(c) may make provision relating to the setting by Users and the DCC of Anomaly Detection Thresholds, including the issue of guidance by the DCC in relation to the appropriate level at which Anomaly Detection Thresholds should be set by Users; and

(d) may make provision relating to the actions to be taken by Users and the DCC in cases in which an Anomaly Detection Threshold has been exceeded, which:

(i) in the case of any SMETS1 Service Request which contains a data value that is inconsistent with a maximum or minimum set in accordance with paragraph (b)(ii) of the definition of Anomaly Detection Threshold in Section A1 (Definitions), shall include the deletion by the DCC of that Service Request and notification of the User that the deletion has taken place; and

(ii) in any other case, may include provision for communications to be quarantined and remedial action to be taken.

Anomaly Detection Thresholds: Obligations on Users

G6.2 Each User shall comply with any requirements of the Threshold Anomaly Detection Procedures which are applicable to it.

G6.3 Each User which is an Eligible User in relation to any one or more individual Services listed in the DCC User Interface Services Schedule:

(a) shall, in respect of each User ID used by it in any User Role by virtue of which it is such an Eligible User, set Anomaly Detection Thresholds in respect of:

(i) the sum total of the number of Critical Commands and the number of SMETS1 Service Requests that are Critical Service Requests which relate to each such Service Reference Variant; and

(ii) the total number of Service Requests relating to each such Service Reference Variant in respect of which, if the relevant Device were a SMETS2+ Device, there are Service Responses that would contain Data of a type which is Encrypted in accordance with the GB Companion Specification; and

(b) may, at its discretion, set other Anomaly Detection Thresholds.

G6.4 Where a User sets any Anomaly Detection Threshold in accordance with Section G6.3, it shall:

(a) set that Anomaly Detection Threshold at a level designed to ensure that it will function, when used for the purposes of Threshold Anomaly Detection, as an effective means of detecting any Compromise to any relevant part of its User Systems;

(b) before doing so, take into account any guidance issued by the DCC as to the appropriate level of the Anomaly Detection Threshold; and

(c) after doing so, notify the DCC of that Anomaly Detection Threshold.

G6.4A Where, in accordance with the Common Test Scenarios Document, a User becomes an Eligible User for a User Role without successfully completing testing for a Critical Service Request which can potentially be sent by a User in that User Role, then the User must set an Anomaly Detection Threshold of zero in respect of that Critical Service Request.

Anomaly Detection Thresholds: Obligations on the DCC

G6.5 The DCC shall comply with any requirements of the Threshold Anomaly Detection Procedures which are applicable to it.

G6.6 The DCC:

(a) shall, for each individual Service Reference Variant listed in the DCC User Interface Services Schedule, set an Anomaly Detection Threshold in respect of:

(i) the sum total of the number of Critical Commands and the number of SMETS1 Service Requests that are Critical Service Requests which relate to that Service Reference Variant; and

(ii) the total number of Service Requests relating to that Service Reference Variant in respect of which, if the relevant Device were a SMETS2+ Device, there would be Service Responses containing Data of a type which is Encrypted in accordance with the GB Companion Specification;

(b) shall set an Anomaly Detection Threshold in respect of a data value that has been agreed with the Security Sub-Committee within each Signed Pre- Command relating to that Service Reference Variant and SMETS1 Service Request;

(c) shall set an Anomaly Detection Threshold in respect of the total number of each type of Critical Command that is not related to a Service Reference Variant listed in Appendix E (the DCC User Interface Services Schedule); and

(d) may, at its discretion, set other Anomaly Detection Thresholds.

G6.6A The DCC shall, from no later than the ECoS Service Live Date, ensure that where an amended Anomaly Detection Threshold is notified in respect of any part of the DCC Live Systems, that amended Anomaly Detection Threshold shall only be applied in respect of that part of the DCC Live Systems following:

(a) a successful Check Cryptographic Protection of the communication providing the notification of the amended Anomaly Detection Threshold in respect of that part of the DCC Live Systems; and

(b) confirmation that the communication providing the notification of the amended Anomaly Detection Threshold has not previously been the subject of a successful Check Cryptographic Protection in respect of that part of the DCC Live Systems.

G6.7 Where the DCC sets any Anomaly Detection Threshold in accordance with Section G6.6, it shall:

(a) set that Anomaly Detection Threshold at a level designed to ensure that it will function, when used for the purposes of Threshold Anomaly Detection, as an effective means of detecting any Compromise to any relevant part of the DCC Total System or of any User Systems; and

(b) before doing so consult, and take into account the opinion of, the Security Sub- Committee as to the appropriate level of the Anomaly Detection Threshold.

G6.8 The DCC shall notify the Security Sub-Committee of:

(a) each Anomaly Detection Threshold that it sets; and

(b) each Anomaly Detection Threshold that is set by a User and notified to the DCC in accordance with Section G6.4(c).

G6.9 Where the DCC is consulted by a User in relation to an Anomaly Detection Threshold which that User proposes to set, the DCC shall:

(a) provide to the User its opinion as to the appropriate level of that Anomaly Detection Threshold; and

(b) in doing so, have regard to the need to ensure that it will function, when used for the purposes of Threshold Anomaly Detection, as an effective means of detecting any Compromise to any relevant part of the User Systems of that User.

Anomaly Detection Thresholds: Obligations on the DCC and Users

G6.10 The DCC and each User shall, in relation to each Anomaly Detection Threshold that it sets:

(a) keep the Anomaly Detection Threshold under review, having regard to the need to ensure that it continues to function, when used for the purposes of Threshold Anomaly Detection, as an effective means of detecting any Compromise to any relevant part of the DCC Total System and/or User Systems (as the case may be);

(b) for this purpose have regard to any opinion provided to it by the Security Sub- Committee from time to time as to the appropriate level of the Anomaly Detection Threshold; and

(c) where the level of that Anomaly Detection Threshold is no longer appropriate, set a new Anomaly Detection Threshold in accordance with the relevant provisions of this Section G6.

G7. SECURITY SUB-COMMITTEE

Establishment of the Security Sub-Committee

G7.1 The Panel shall establish a Sub-Committee in accordance with the requirements of this Section G7, to be known as the "**Security Sub-Committee**".

G7.2 Save as expressly set out in this Section G7, the Security Sub-Committee shall be subject to the provisions concerning Sub-Committees set out in Section C6 (Sub- Committees).

Membership of the Security Sub-Committee

G7.3 The Security Sub-Committee shall be composed of the following persons (each a "**Security Sub-Committee Member**"):

(a) the Security Sub-Committee Chair (as further described in Section G7.5);

(b) eight Security Sub-Committee (Supplier) Members (as further described in Section G7.6);

(c) two Security Sub-Committee (Network) Members (as further described in Section G7.8);

(d) one Security Sub-Committee (Other User) Member (as further described in Section G7.10);

(e) one Security Sub-Committee (Shared Resource Provider) Member (as further described in Section G7.12);

(f) one representative of the DCC (as further described in Section G7.15).

G7.4 Each Security Sub-Committee Member must be an individual (and cannot be a body corporate, association or partnership). No one person can hold more than one office as a Security Sub-Committee Member at the same time.

G7.5 The "**Security Sub-Committee Chair**" shall be such person as is (from time to time) appointed to that role by the Panel in accordance with a process designed to ensure that:

(a) the candidate selected is sufficiently independent of any particular Party or class of Parties;

(b) the Security Sub-Committee Chair is appointed for a three-year term (following which he or she can apply to be re-appointed);

(c) the Security Sub-Committee Chair is remunerated at a reasonable rate;

(d) the Security Sub-Committee Chair's appointment is subject to Section C6.9 (Member Confirmation), and to terms equivalent to Section C4.6 (Removal of Elected Members);

(e) provision is made for the Security Sub-Committee Chair to continue in office for a reasonable period following the end of his or her term of office in the event of any delay in appointing his or her successor; and

(f) where the Security Sub-Committee Chair's appointment (and for the purposes of this Section and Section G7.5A all references to appointment shall encompass re-appointment) is to take effect on or after the date this Section G7.5(f) comes into force, the Panel shall:

(i) notify the Secretary of State of the appointment it proposes to make;

(ii) not make the appointment unless and until the Secretary of State has confirmed in writing that they do not object to the appointment being made;

(iii) ensure that the terms of the appointment include terms which provide for the Panel to terminate the appointment where directed to do so by the Secretary of State pursuant to Section G7.5A and from such date or within such period as may be specified in the Secretary of State's direction; and

(iv) where the appointed person has not, at the date of the appointment, passed (as a minimum) a Security Check (or equivalent), ensure that the terms of the appointment include terms which:

(A) require the appointed person to apply for a Security Check (or equivalent) within one month of the date of the appointment;

(B) provide for the Panel to terminate the appointment if a Security Check (or equivalent) is not passed by the appointed person within 12 months of the date of the appointment (or such longer period as the Secretary of State may approve following a request from the Panel).

G7.5A The Secretary of State may, in respect of any Security Sub-Committee Chair appointment which takes effect on or after the date Section G7.5(f) comes into force, direct the Panel to terminate the appointment of the Security Sub-Committee Chair where the Secretary of State considers it necessary to do for the purposes of preserving the integrity of, and in the interests of maintaining, the security of the End-to-End Smart Metering System (or any part of that system).

G7.5B The Panel shall comply with any direction given to it by the Secretary of State pursuant to Section G7.5A.

G7.6 Each of the eight "**Security Sub-Committee (Supplier) Members**" shall (subject to any directions to the contrary made by the Secretary of State for the purpose of transition on the incorporation of this Section G7 into this Code):

(a) be appointed in accordance with Section G7.7, subject to compliance by the appointed person with Section C6.9 (Member Confirmation);

(b) retire two years after his or her appointment (without prejudice to his or her ability to be nominated for a further term of office); and

(c) be capable of being removed from office in accordance with Sections C4.5 and C4.6 (Removal of Elected Members), for which purpose those Sections shall be read as if references to "Elected Member" were to "Security Sub-Committee (Supplier) Member", references to "Panel" were to "Security Sub-Committee", references to "Panel Chair" were to "Security Sub-Committee Chair", and references to "Panel Members" were to "Security Sub-Committee Members".

G7.7 Each of the eight Security Sub-Committee (Supplier) Members shall (subject to Section G7.14) be appointed in accordance with a process:

(a) by which six Security Sub-Committee (Supplier) Members will be elected by Large Supplier Parties, and two Security Sub-Committee (Supplier) Members will be elected by Small Supplier Parties; and

(b) that is otherwise the same as that by which Elected Members are elected under Sections C4.2 and C4.3 (as if references therein to "Panel" were to "Security Sub-Committee", references to "Panel Chair" were to "Security Sub-Committee Chair", references to "Panel Members" were to "Security Sub-Committee Members", and references to provisions of Section C or D were to the corresponding provisions set out in or applied pursuant to this Section G7).

G7.8 Each of the two "**Security Sub-Committee (Network) Members**" shall (subject to any directions to the contrary made by the Secretary of State for the purpose of transition on the incorporation of this Section G7 into this Code):

(a) be appointed in accordance with Section G7.9, subject to compliance by the appointed person with Section C6.9 (Member Confirmation);

(b) retire two years after his or her appointment (without prejudice to his or her ability to be nominated for a further term of office); and

(c) be capable of being removed from office in accordance with Sections C4.5 and C4.6 (Removal of Elected Members), for which purpose those Sections shall be read as if references to "Elected Member" were to "Security Sub-Committee (Network) Member", references to "Panel" were to "Security Sub-Committee", references to "Panel Chair" were to "Security Sub-Committee Chair", and references to "Panel Members" were to "Security Sub-Committee Members".

G7.9 Each of the two Security Sub-Committee (Network) Members shall (subject to Section G7.14) be appointed in accordance with a process:

(a) by which one Security Sub-Committee (Network) Member will be elected by the Electricity Network Parties and one Security Sub-Committee (Network) Member will be elected by the Gas Network Parties; and

(b) that is otherwise the same as that by which Elected Members are elected under Sections C4.2 and C4.3 (as if references therein to “Panel” were to “Security Sub-Committee”, references to “Panel Chair” were to “Security Sub-Committee Chair”, references to “Panel Members” were to “Security Sub-Committee Members”, and references to provisions of Section C or D were to the corresponding provisions set out in or applied pursuant to this Section G7).

G7.10 The “**Security Sub-Committee (Other User) Member**” shall (subject to any directions to the contrary made by the Secretary of State for the purpose of transition on the incorporation of this Section G7 into this Code):

(a) be appointed in accordance with Section G7.11, subject to compliance by the appointed person with Section C6.9 (Member Confirmation);

(b) retire two years after his or her appointment (without prejudice to his or her ability to be nominated for a further term of office); and

(c) be capable of being removed from office in accordance with Sections C4.5 and C4.6 (Removal of Elected Members), for which purpose those Sections shall be read as if references to “Elected Member” were to “Security Sub-Committee (Other User) Member”, references to “Panel” were to “Security Sub- Committee”, references to “Panel Chair” were to “Security Sub-Committee Chair”, and references to “Panel Members” were to “Security Sub-Committee Members”.

G7.11 The Security Sub-Committee (Other User) Member shall (subject to Section G7.14) be appointed in accordance with a process:

(a) by which he or she is elected by those Other SEC Parties which are Other Users; and

(b) that is otherwise the same as that by which Elected Members are elected under Sections C4.2 and C4.3 (as if references therein to “Panel” were to “Security Sub-Committee”, references to “Panel Chair” were to “Security Sub-Committee Chair”, references to “Panel Members” were to “Security Sub-Committee Members”, and references to provisions of Section C or D were to the corresponding provisions set out in or applied pursuant to this Section G7).

G7.12 The “**Security Sub-Committee (Shared Resource Provider) Member**” shall:

(a) be appointed in accordance with Section G7.13, subject to compliance by the appointed person with Section C6.9 (Member Confirmation);

(b) retire two years after his or her appointment (without prejudice to his or her ability to be nominated for a further term of office); and

(c) be capable of being removed from office in accordance with Sections C4.5 and C4.6 (Removal of Elected Members), for which purpose those Sections shall be read as if references to “Elected Member” were to “Security Sub-Committee (Shared Resource Provider) Member”, references to “Panel” were to “Security Sub-Committee”, references to “Panel Chair” were to “Security Sub-Committee Chair”, and references to “Panel Members” were to “Security Sub-Committee Members”.

G7.13 The Security Sub-Committee (Shared Resource Provider) Member shall (subject to Section G7.14) be appointed in accordance with a process:

(a) by which he or she is elected by those Other SEC Parties which are Shared Resource Providers; and

(b) that is otherwise the same as that by which Elected Members are elected under Sections C4.2 and C4.3 (as if references therein to “Panel” were to “Security Sub-Committee”, references to “Panel Chair” were to “Security Sub-Committee Chair”, references to “Panel Members” were to “Security Sub-Committee Members”, and references to provisions of Section C or D were to the corresponding provisions set out in or applied pursuant to this Section G7).

G7.14 The following shall apply in respect of all candidates nominated or re-nominated for election as a Security Sub-Committee (Supplier) Member, Security Sub-Committee (Network) Member, Security Sub-Committee (Other User) Member or Security Sub- Committee (Shared Resource Provider) Member:

(a) the Security Sub-Committee may, by no later than 5 Working Days following the expiry of the period of time set out in the request for nominations, reject a candidate (by notifying the candidate of such rejection) where the Security Sub-Committee determines that the candidate does not satisfy one or more of the following requirements:

(i) the candidate must have been nominated by a company or other organisation, and the individual who submitted the nomination on behalf of the organisation must hold a senior position within the organisation;

(ii) the organisation which nominated the candidate must have confirmed that it is satisfied that the candidate has the relevant security expertise in relation to the category of membership of the Security Sub- Committee for which the candidate has been nominated;

(iii) the organisation which nominated the candidate must have confirmed that the candidate has successfully completed a BS7858 security assessment (or a security assessment named by such organisation which the organisation confirms to be equivalent); and

(iv) the candidate must have sufficient security expertise in relation to the category of membership of the Security Sub-Committee for which the candidate has been nominated;

(b) a candidate who is rejected under paragraph (a) above shall not (subject to paragraph (c) below) be an eligible candidate for the relevant election;

(c) where a candidate disputes a rejection notification under paragraph (a) above, the candidate shall have 3 Working Days following receipt of such notification to refer the matter to the Panel for its final determination of whether the candidate satisfies the requirements set out in paragraph (a) above; and

(d) where necessary, the Secretariat shall delay giving notice of the names of eligible candidates pending expiry of the time periods set out in paragraph (a) and/or (c) or determination by the Panel under paragraph (c) (as applicable).

G7.15 The DCC may nominate one person to be a Security Sub-Committee Member by notice to the Secretariat from time to time. The DCC may replace its nominee from time to time by prior notice to the Secretariat. Such nomination or replacement shall be subject to compliance by the relevant person with Section C6.9 (Member Confirmation).

Proceedings of the Security-Sub Committee

G7.16 Without prejudice to the generality of Section C5.13(c) (Attendance by Other Persons) as it applies pursuant to Section G7.17:

(a) a representative of the Secretary of State and a representative of the Authority shall be:

(i) invited to attend each and every Security Sub-Committee meeting;

(ii) entitled to speak at such Security Sub-Committee meetings without the permission of the Security Sub-Committee Chair; and

(iii) provided with copies of all the agenda and supporting papers available to Security Sub-Committee Members in respect of such meetings;

(b) the Security Sub-Committee Chair shall invite to attend Security Sub- Committee meetings any persons that the Security Sub-Committee determines it appropriate to invite in order to be provided with expert advice on security matters.

G7.17 Subject to Section G7.16, the provisions of Section C5 (Proceedings of the Panel) shall apply to the proceedings of the Security Sub-Committee, for which purpose that Section shall be read as if references to “Panel” were to “Security Sub-Committee”, references to “Panel Chair” were to “Security Sub-Committee Chair”, and references to “Panel Members” were to “Security Sub-Committee Members”.

Duties and Powers of the Security Sub-Committee

G7.18 The Security Sub-Committee:

(a) shall perform the duties and may exercise the powers set out in Sections G7.19 to G7.23; and

(b) shall perform such other duties and may exercise such other powers as may be expressly ascribed to the Security Sub-Committee elsewhere in this Code.

Document Development and Maintenance

G7.19 The Security Sub-Committee shall:

(a) develop and maintain documents, to be known as the "**Security Controls Framework**", which shall set out the appropriate User and DCC Security Assessment Methodology to be applied to different categories of security assurance assessment carried out in accordance with Section G8 (User Security Assurance) and Section G9 (DCC Security Assurance) and be designed to ensure that such security assurance assessments are proportionate; and

(i) achieve appropriate levels of security assurance in respect of different Users and different User Roles, and the DCC; and

(ii) in the case of User related assessments are consistent in their treatment of equivalent Users and equivalent User Roles, and;

(b) carry out reviews of the Security Risk Assessment:

(i) at least once each year in order to identify any new or changed security risks to the End-to-End Smart Metering System; and

(ii) in any event promptly if the Security Sub-Committee considers there to be any material change in the level of security risk;

(c) maintain the Security Requirements to ensure that it is up to date and at all times identifies the security controls which the Security Sub-Committee considers appropriate to mitigate the security risks identified in the Security Risk Assessment;

(d) maintain the End-to-End Security Architecture to ensure that it is up to date;

(e) develop and maintain a document to be known as the "**Risk Treatment Plan**", which shall identify the residual security risks which in the opinion of the Security Sub-Committee remain unmitigated taking into account the security controls that are in place;

(f) liaise and work with the NCSC to develop and maintain CPA Security Characteristics that set out the levels of security required for Smart Meters, Communications Hubs, SAPCs and HCALCs that are proportionate and appropriate taking into consideration the security risks identified in the Security Risk Assessment; and

(g) develop and maintain documents to be known as "**SSC Guidance for Device Security Assurance and Triage**" which shall set out the SSC's guidance on the requirements and processes to be followed in respect of Devices (including their triage and refurbishment) in order to:

(i) achieve appropriate levels of security assurance in accordance with the requirement of this Code; and

(ii) obtain and maintain CPA Certification.

Security Assurance

G7.20 The Security Sub-Committee shall:

(a) periodically, and in any event at least once each year, review the Security Obligations and Assurance Arrangements in order to identify whether in the opinion of the Security Sub-Committee they continue to be fit for purpose;

(b) exercise such functions as are allocated to it under, and comply with the applicable requirements of Section G8 (User Security Assurance) and Section G9 (DCC Security Assurance);

(c) provide the Panel with support and advice in respect of issues relating to the actual or potential non-compliance of any Party with the requirements of the Security Obligations and Assurance Arrangements;

(d) keep under review the NCSC CPA Certificate scheme in order to assess whether it continues to be fit for purpose in so far as it is relevant to the Code, and suggest modifications to the scheme provider to the extent to which it considers them appropriate;

(e) to the extent to which it considers it appropriate, in relation to any User (or, during the first User Entry Process, Party) which has produced a User Security Assessment Response that sets out any steps that the User proposes to take in accordance with Section G8.24(b):

(i) liaise with that User (or Party) as to the nature and timetable of such steps;

(ii) either accept the proposal to take those steps within that timetable or seek to agree with that User (or Party) such alternative steps or timetable as the Security Sub-Committee may consider appropriate; and

(iii) take advice from the User Independent Security Assurance Service Provider; and

(iv) where the Security Sub-Committee considers it appropriate, request the User Independent Security Assurance Service Provider to carry out a Follow-up Security Assessment;

(f) provide advice to the Panel on the scope and output of the independent security assurance arrangements of the DCC in relation to the design, building and testing of the DCC Total System;

(g) to the extent to which it considers appropriate, in relation to the DCC which has produced a DCC Security Assessment Response that sets out any steps that the DCC proposes to take in accordance with Section G9.24(b):

(i) liaise with the DCC as to the nature and timetable of such steps;

(ii) either accept the proposal to take those steps within that timetable or seek to agree with the DCC such alternative steps or timetable as the Security Sub-Committee may consider appropriate;

(iii) take advice from the DCC Independent Security Assessment Service Provider; and

(iv) where the Security Sub-Committee considers it appropriate, request the DCC Independent Security Assessment Service Provider to carry out a Follow-up Security Assessment;

(h) provide advice to the:

(i) Panel in relation to the appointment of the User Independent Security Assurance Service Provider, monitor the performance of the person appointed to that role and provide advice to the Panel in respect of its views as to that performance; and

(ii) DCC in relation to the appointment of the DCC Independent Security Assessment Service Provider, monitor the performance of the person appointed to that role and provide advice to the DCC in respect of its views as to that performance;

(i) provide advice and information to the Authority in relation to any actual or potential non-compliance with the CPA Security Characteristics of any Device or apparatus in respect of which a CPA Certificate is issued or required.

Monitoring and Advice

G7.21 The Security Sub-Committee shall:

(a) provide such reasonable assistance to the DCC and Users as may be requested by them in relation to the causes of security incidents and the management of vulnerabilities on their Systems;

(b) monitor the (actual and proposed) Anomaly Detection Thresholds of which it is notified by the DCC, consider the extent to which they act as an effective means of detecting any Compromise to any relevant part of the DCC Total System or of any User Systems, and provide its opinion on such matters to the DCC;

(c) provide the Panel with support and advice in respect of Disputes for which the Panel is required to make a determination, insofar as such Disputes relate to the Security Obligations and Assurance Arrangements;

(d) provide the Panel, the Change Sub-Committee, the Change Board and any relevant Working Group with support and advice in relation to any Draft Proposal or Modification Proposal which may affect the security of the End-to- End Smart Metering System or the effective implementation of the security controls that are identified in the Security Requirements;

(e) advise the Authority of any modifications to the conditions of Energy Licences which it considers may be appropriate having regard to the residual security risks identified from time to time in the Risk Treatment Plan;

(f) respond to any consultations on matters which may affect the security of the End-to-End Smart Metering System or the effective implementation of the security controls that are identified in the Security Requirements;

(g) act in cooperation with, and send a representative to, the SMKI PMA, the Technical Architecture and Business Architecture Sub-Committee and any other Sub-Committee or Working Group which requests the support or attendance of the Security Sub-Committee;

(h) (to the extent to which it reasonably considers that it is necessary to do so) liaise and exchange information with, provide advice to, and seek the advice of the At HAN Forum on matters relating to the Alt HAN Arrangements which may affect the security of the End-to-End Smart Metering System or the effective implementation of the security controls that are identified in the Security Requirements;

(i) provide such further support and advice to the Panel as it may request; and

(j) provide the Authority with such information and documents as it may reasonably request in relation to any matter referred by a Party to the Authority for determination pursuant to Section F2.7B.

Modifications

G7.22 The Security Sub-Committee shall establish a process under which the Code Administrator monitors Draft Proposals and Modification Proposals with a view to identifying (and bringing to the attention of the Security Sub-Committee) those proposals that:

(a) are likely to affect the Security Obligations and Assurance Arrangements; or

(b) are likely to relate to other parts of the Code but may have a material effect on the security of the End-to-End Smart Metering System,

and the Code Administrator shall comply with such process.

G7.23 Notwithstanding Section D1.3 (Persons Entitled to Submit Draft Proposals):

(a) the Security Sub-Committee shall be entitled to submit Draft Proposals in respect of the Security Obligations and Assurance Arrangements where the Security Sub-Committee considers it appropriate to do so; and

(b) any Security Sub-Committee Member shall be entitled to submit Draft Proposals in respect of the Security Obligations and Assurance Arrangements where he or she considers it appropriate to do so (where the Security Sub-Committee has voted not to do so).

G7.24 Notwithstanding and subject to the provisions of the Working Group Terms of Reference, the Security Sub-Committee shall be entitled to nominate a representative to be a member of any Working Group.

G7.25 For the purposes of Section D7.1 (Modification Report):

(a) written representations in relation to the purpose and effect of a Modification Proposal may be made by:

(i) the Security Sub-Committee; and/or

(ii) any Security Sub-Committee Member (either alone or in addition to any representations made by other Security Sub-Committee Members and/or the Security Sub-Committee collectively); and

(b) notwithstanding Section D7.3 (Content of the Modification Report), the Code Administrator shall ensure that all such representations, and a summary of any evidence provided in support of them, are set out in the Modification Report prepared in respect of the relevant Modification Proposal.

G8. USER SECURITY ASSURANCE

Procurement of the User Independent Security Assurance Service Provider

G8.1 The Panel shall procure the provision of security assurance services:

(a) of the scope specified in Section G8.3;

(b) from a person who:

(i) is suitably qualified in accordance with Section G8.4;

(ii) is suitably independent in accordance with Section G8.7; and

(iii) satisfies the capacity requirement specified in Section G8.11,

(c) and that person is referred to in this Section G8 as the "**User Independent Security Assurance Service Provider**".

G8.2 The Panel may appoint more than one person to carry out the functions of the User Independent Security Assurance Service Provider.

Scope of Security Assurance Services

G8.3 The security assurance services specified in this Section G8.3 are services in accordance with which the User Independent Security Assurance Service Provider shall:

(a) carry out User Security Assessments at such times and in such manner as is provided for in this Section G8;

(b) produce User Security Assessment Reports in relation to Users that have been the subject of a User Security Assessment;

(c) receive and consider User Security Assessment Responses and carry out any Follow-up Security Assessments at the request of the Security Sub-Committee;

(d) otherwise, at the request of, and to an extent determined by, the Security Sub- Committee, carry out an assessment of the compliance of any User with its obligations under Sections G3 to G6 where:

(i) following either a User Security Self-Assessment or Verification User Security Assessment, any material increase in the security risk relating to that User has been identified; or

(ii) the Security Sub-Committee otherwise considers it appropriate for that assessment to be carried out;

(e) review the outcome of User Security Self-Assessments;

(f) at the request of the Security Sub-Committee, provide to it advice in relation to:

(i) the compliance of any User with its obligations under Sections G3 to G6 or any CPA Certificate Remedial Plan; and

(ii) changes in security risks relating to the Systems, Data, functionality and processes of any User which fall within Section G5.14 (Information Security: Obligations on Users);

(g) at the request of the Panel, provide to it advice in relation to the suitability of any remedial action plan for the purposes of Section M8.4 of the Code (Consequences of an Event of Default);

(h) at the request of the Security Sub-Committee Chair, provide a representative to attend and contribute to the discussion at any meeting of the Security Sub-Committee; and

(i) undertake such other activities, and do so at such times and in such manner, as may be further provided for in this Section G8.

Suitably Qualified Service Provider

G8.4 The User Independent Security Assurance Service Provider shall be treated as suitably qualified in accordance with this Section G8.4 only if it satisfies:

(a) the requirements specified in Section G8.5; and

(b) the requirements specified in Section G8.6.

G8.5 The requirements specified in this Section G8.5 are that the User Independent Security Assurance Service Provider:

(a) is accredited by UKAS as meeting the requirements for providing audit and certification of information security management systems in accordance with ISO/IEC 27001:2013 (Information

Technology – Security Techniques – Information Security Management Systems) or any equivalent to that standard which updates or replaces it from time to time; and/or

(b) holds another membership, accreditation, approval or form of professional validation that is in the opinion of the Security Sub-Committee substantially equivalent in status and effect to the arrangements described in paragraph (a).

G8.6 The requirement specified in this Section G8.6 is that the User Independent Security Assurance Service Provider:

(a) employs consultants who are assured under an official cyber security qualification scheme recognised by NCSC or the UK Cyber Security Council or UKAS and which is approved by the Security Sub-Committee at levels equivalent to 'Chartered', 'Principal', 'Lead' or 'Senior Practitioner' in either the 'Security and Information Risk Advisor' or 'Information Assurance Auditor' roles; and

(b) engages those individuals as its lead auditors for the purposes of carrying out all security assurance assessments in accordance with this Section G8.

Independence Requirement

G8.7 The User Independent Security Assurance Service Provider shall be treated as suitably independent in accordance with this Section G8.7 only if it satisfies:

(a) the requirements specified in Section G8.9; and

(b) the requirement specified in Section G8.10.

G8.8 For the purposes of Sections G8.9 and G8.10:

(a) a "**Relevant Party**" means any Party in respect of which the User Independent Security Assurance Service Provider carries out functions under this Section G8; and

(b) a "**Relevant Service Provider**" means any service provider to a Relevant Party from which that Party acquires capability for a purpose related to its compliance with its obligations as a User under Sections G3 to G6.

G8.9 The requirements specified in this Section G8.9 are that:

(a) no Relevant Party or any of its subsidiaries, and no Relevant Service Provider or any of its subsidiaries, holds or acquires any investment by way of shares, securities or other financial rights or interests in the User Independent Security Assurance Service Provider;

(b) no director of any Relevant Party, and no director of any Relevant Service Provider, is or becomes a director or employee of, or holds or acquires any investment by way of shares, securities or other financial rights or interests in, the User Independent Security Assurance Service Provider; and

(c) the User Independent Security Assurance Service Provider does not hold or acquire a participating interest (as defined in section 421A of the Financial Services and Markets Act 2000) in any Relevant Party or any Relevant Service Provider,

(but for these purposes references to a Relevant Service Provider shall not include the User Independent Security Assurance Service Provider where it acts in that capacity).

G8.10 The requirement specified in this Section G8.10 is that the User Independent Security Assurance Service Provider is able to demonstrate to the satisfaction of the Panel that it has in place arrangements to ensure that it will at all times act independently of any commercial relationship that it has, has had, or may in future have with a Relevant Party or Relevant Service Provider (and for these purposes a 'commercial relationship' shall include a relationship established by virtue of the User Independent Security Assurance Service Provider itself being a Relevant Service Provider to any Relevant Party).

Capacity Requirement

G8.11 The capacity requirement specified in this Section G8.11 is that the User Independent Security Assurance Service Provider must be capable of meeting the Panel's estimate of the demand for its security assurance services throughout the period in relation to which those services are being procured.

Compliance of the User Independent Security Assurance Service Provider

G8.12 The Panel shall be responsible for ensuring that the User Independent Security Assurance Service Provider carries out its functions in accordance with the provisions of this Section G8.

Users: Duty to Cooperate in Assessment

G8.13 Each User shall do all such things as may be reasonably requested by the Security Sub- Committee, or by any person acting on behalf of or at the request of the Security Sub- Committee (including in particular the User Independent Security Assurance Service Provider), for the purposes of facilitating an assessment of that User's compliance with its obligations under Sections G3 to G6 or any CPA Certificate Remedial Plan.

G8.14 For the purposes of Section G8.13, a User shall provide the Security Sub-Committee (or the relevant person acting on its behalf or at its request) with:

(a) all such Data as may reasonably be requested, within such times and in such format as may reasonably be specified;

(b) all such other forms of cooperation as may reasonably be requested, including in particular:

(i) access at all reasonable times to such parts of the premises of that User as are used for, and such persons engaged by that User as carry out or are authorised to carry out, any activities related to its compliance with its obligations under Sections G3 to G6; and

(ii) such cooperation as may reasonably be requested by the Independent Security Assessment Services Provider for the purposes of carrying out any security assurance assessment in accordance with this Section G8.

Categories of Security Assurance Assessment

G8.15 For the purposes of this Section G8, there shall be the following four categories of security assurance assessment:

(a) a Full User Security Assessment (as further described in Section G8.16);

(b) a Verification User Security Assessment (as further described in Section G8.17);

(c) a User Security Self-Assessment (as further described in Section G8.18); and

(d) a Follow-up Security Assessment (as further described in Section G8.19).

G8.16 A "**Full User Security Assessment**" shall be an assessment carried out by the User Independent Security Assurance Service Provider in respect of a User to identify the extent to which that User is compliant with each of its obligations under Sections G3 to G6 in each of its User Roles.

G8.17 A "**Verification User Security Assessment**" shall be an assessment carried out by the User Independent Security Assurance Service Provider in respect of a User to identify any material increase in the security risk relating to the Systems, Data, functionality and processes of that User falling within Section G5.14 (Information Security: Obligations on Users) since the last occasion on which a Full User Security Assessment was carried out in respect of that User.

G8.18 A "**User Security Self-Assessment**" shall be an assessment carried out by a User, the outcome of which is reviewed by the User Independent Security Assurance Service Provider, to identify any material increase in the security risk relating to the Systems, Data, functionality and processes of that User falling within Section G5.14 (Information Security: Obligations on Users) since the last occasion on which a User Security Assessment was carried out in respect of that User.

G8.19 A "**Follow-up Security Assessment**" shall be an assessment carried out by the User Independent Security Assurance Service Provider, following a User Security Assessment, in accordance with the provisions of Section G8.29.

G8.20 For the purposes of Sections G8.17 and G8.18, a Verification Security Assessment and User Security Self-Assessment shall each be assessments carried out in respect of a User having regard in particular to:

(a) any changes made to any System, Data, functionality or process falling within the scope of Section G5.14 (Information Security: Obligations on Users);

(b) where the User is a Supplier Party, any increase in the number of Enrolled Smart Metering Systems for which it is the Responsible Supplier; and

(c) where the User is a Network Party, any increase in the number of Enrolled Smart Metering Systems for which it is the Electricity Distributor or the Gas Transporter.

User Security Assessments: General Procedure

User Security Assessment Methodology

G8.21 Each User Security Assessment carried out by the User Independent Security Assurance Service Provider shall be carried out in accordance with the User Security Assessment Methodology applicable to the relevant category of assessment.

The User Security Assessment Report

G8.22 Following the completion of a User Security Assessment, the User Independent Security Assurance Service Provider shall, in discussion with the User to which the assessment relates, produce a written report (a "**User Security Assessment Report**") which shall:

(a) set out the findings of the User Independent Security Assurance Service Provider on all the matters within the scope of the User Security Assessment;

(b) in the case of a Full User Security Assessment:

(i) specify any instances of actual or potential non-compliance of the User with its obligations under Sections G3 to G6 which have been identified by the User Independent Security Assurance Service Provider; and

(ii) set out the evidence which, in the opinion of the User Independent Security Assurance Service Provider, establishes each of the instances of actual or potential non-compliance which it has identified; and

(c) in the case of a Verification User Security Assessment:

(i) specify any material increase in the security risk relating to that User which the User Independent Security Assurance Service Provider has identified since the last occasion on which a Full User Security Assessment was carried out in respect of that User; and

(ii) set out the evidence which, in the opinion of the User Independent Security Assurance Service Provider, establishes the increase in security risk which it has identified.

G8.23 The User Independent Security Assurance Service Provider shall submit a copy of each User Security Assessment Report to the Security Sub-Committee and to the User to which that report relates.

The User Security Assessment Response

G8.24 Following the receipt by any User of a User Security Assessment Report which relates to it, the User shall as soon as reasonably practicable, and in any event by no later than such date as the Security Sub-Committee may specify:

(a) produce a written response to that report (a "**User Security Assessment Response**") which addresses the findings set out in the report; and

(b) submit a copy of that response to the Security Sub-Committee and the User Independent Security Assurance Service Provider.

G8.25 Where a User Security Assessment Report:

(a) following a Full User Security Assessment, specifies any instance of actual or potential non-compliance of a User with its obligations under Sections G3 to G6; or

(b) following a Verification User Security Assessment, specifies any material increase in the security risk relating to a User since the last occasion on which a Full User Security Assessment was carried out in respect of that User,

the User shall ensure that its User Security Assessment Response includes the matters referred to in Section G8.26.

G8.26 The matters referred to in this Section are that the User Security Assessment Response:

(a) indicates whether the User accepts the relevant findings of the User Independent Security Assurance Service Provider and, where it does not, explains why this is the case;

(b) sets out any steps that the User has taken or proposes to take in order to remedy and/or mitigate the actual or potential non-compliance or the increase in security risk (as the case may be) specified in the User Security Assessment Report; and

(c) identifies a timetable within which the User proposes to take any such steps that have not already been taken.

G8.27 Where a User Security Assessment Response sets out any steps that the User proposes to take in accordance with Section G8.26(b), the Security Sub-Committee (having considered the advice of the User Independent Security Assurance Service Provider) shall review that response and either:

(a) notify the User that it accepts that the steps that the User proposes to take, and the timetable within which it proposes to take them, are appropriate to remedy and/or mitigate the actual or potential non-compliance or increase in security risk (as the case may be) specified in the User Security Assessment Report; or

(b) seek to agree with the User such alternative steps and/or timetable as would, in the opinion of the Security Sub-Committee, be more appropriate for that purpose.

G8.28 Where a User Security Assessment Response sets out any steps that the User proposes to take in accordance with Section G8.26(b), and where those steps and the timetable within which it proposes to take them are accepted by the Security Sub-Committee, or alternative steps and/or an alternative timetable are agreed between it and the User in accordance with Section G8.27, the User shall:

(a) take the steps that have been accepted or agreed (as the case may be) within the timetable that has been accepted or agreed (as the case may be); and

(b) report to the Security Sub-Committee on:

(i) its progress in taking those steps, at any such intervals or by any such dates as the Security Sub-Committee may specify;

(ii) the completion of those steps in accordance with the timetable; and

(iii) any failure to complete any of those steps in accordance with the timetable, specifying the reasons for that failure.

Follow-up Security Assessment

G8.29 Where a User Security Assessment Response sets out any steps that the User proposes to take in accordance with Section G8.26(b), and where those steps and the timetable within which it proposes to take them are accepted by the Security Sub-Committee, or alternative steps and/or an alternative timetable are agreed between it and the User in accordance with Section G8.27, the User Independent Security Assurance Service Provider shall, at the request of the Security Sub-Committee (and by such date as it may specify), carry out a Follow-up Security Assessment of the relevant User to:

(a) identify the extent to which the User has taken the steps that have been accepted or agreed (as the case may be) within the timetable that has been accepted or agreed (as the case may be); and

(b) assess any other matters related to the User Security Assessment Response that are specified by the Security Sub-Committee.

User Security Assessments: Further Provisions

G8.30 The User Independent Security Assurance Service Provider:

(a) may in its discretion, and shall where directed to do so by the Security Sub- Committee:

(i) in relation to a User which acts in more than one User Role, determine that a single User Security Assessment may be carried out in relation to that User in respect of any two or more such User Roles; and

(ii) in carrying out any User Security Assessment, take into account any relevant security accreditation or certification held by the relevant User; and

(b) shall, where any Shared Resources which have not been provided by a Shared Resource Provider form part of the User Systems of more than one User, have regard to information obtained in relation to such Shared Resources in the User Security Assessment of one such User when carrying out a User Security Assessment of any other such User.

Initial Full User Security Assessment: User Entry Process

G8.31 Sections G8.33 to G8.39 set out the applicable security requirements referred to in Section H1.10(c) (User Entry Process Requirements).

G8.32 For the purposes of Sections G8.33 to G8.39, any reference in Sections G3 to G6 or the preceding provisions of this Section G8 to a 'User' (or to any related expression which applies to Users), shall be read as including a reference (or otherwise applying) to any Party seeking to become a User by completing the User Entry Process for any User Role.

Initial Full User Security Assessment

G8.33 For the purpose of completing the User Entry Process for a User Role, a Party wishing to act as a User in that User Role shall be subject to a Full User Security Assessment in respect of the User Role.

Panel: Setting the Assurance Status

G8.34 Following the completion of that initial Full User Security Assessment, the Security Sub-Committee shall ensure that copies of both the User Security Assessment Report and User Security Assessment Response are provided to the Panel.

G8.35 Following the receipt by it of the User Security Assessment Report and User Security Assessment Response, the Panel shall promptly consider both documents and (having regard to any advice of the Security Sub-Committee) set the assurance status of the Party, in relation to its compliance with each of its obligations under Sections G3 to G6 in the relevant User Role, in accordance with Section G8.36.

G8.36 The Panel shall set the assurance status of the Party as one of the following:

(a) approved;

(b) approved, subject to the Party:

(i) taking such steps as it proposes to take in its User Security Assessment Response in accordance with Section G8.26(b); or

(ii) both taking such steps and being subject to a Follow-up Security Assessment by such date as the Panel may specify,

(c) deferred and:

(i) the Party having first taken such steps as it proposes to take in its User Security Assessment Response in accordance with Section G8.26(b) and been subject to a Follow-up Security Assessment; and

(ii) the Panel having determined that it is satisfied, on the evidence of the Follow-up Security Assessment, that such steps have been taken; or

(d) rejected and:

(i) the Party shall have a second Full User Security Assessment to address any issues identified by the Panel as being, in the opinion of the Panel, not adequately addressed in that response as submitted to the Security Sub-Committee; and

(ii) upon completion of the second Full User Security Assessment the Panel will reconsider the assurance status in accordance with Section G8.35.

Approval

G8.37 For the purposes of Sections H1.10(c) and H1.11 (User Entry Process Requirements):

(a) a Party shall be considered to have successfully demonstrated that it meets the applicable security requirements of this Section G8 when:

(i) the Panel has set its assurance status to 'approved' in accordance with either Section G8.36(a) or (b); or

(ii) the Panel has set its assurance status to 'deferred' in accordance with Section G8.36(c) and the requirements specified in that Section have been met; and

(b) the Panel shall notify the Code Administrator as soon as reasonably practicable after the completion of either event described in paragraph (a)(i) or (ii).

Obligations on an Approved Party

G8.38 Where the Panel has set the assurance status of a Party to 'approved subject to' specified in Section G8.36(b), the Party shall take the steps to which that approval is subject in accordance with that section.

Disagreement with Panel Decisions

G8.39 Where a Party disagrees with any decision made by the Panel in relation to it under Section G8.36, it may appeal that decision to the Authority and the determination of the Authority shall be final and binding for the purposes of the Code.

Security Assurance Assessments: Post-User Entry Process

G8.40 Within 12 months after completion of the User's initial Full User Security Assessment (or after the Follow-up Security Assessment where there was one), for the purposes of the User Entry Process, a User shall schedule a User Security Assessment with the User Independent Security Assurance Provider in accordance with the provisions of Sections G8.41 to G8.47. The initial Full User Security Assessment will be deemed complete when the Panel set an assurance status of:

(a) approved; or

(b) approved, subject to the User:

(i) taking such steps as the User proposes to take in its User Security Assessment Response in accordance with Section G8.26(b); or

(ii) both taking the steps referred to in (i) above and being subject to a Follow-up Security Assessment by such date as the Panel may specify.

Supplier Parties

G8.41 Where a User is a Supplier Party and either:

(a) the number of Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Responsible Supplier exceeds 250,000; or

(b) the number of Non-Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Responsible Supplier exceeds 50,000; or

(c) $(5N) + D > 250,000$

Where N is the number of Non-Domestic Premises and D is the number of Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Responsible Supplier,

the User Security Assessment required by Section G8.40 shall be a Full User Security Assessment and the User shall schedule a further Full User Security Assessment within 12 months after each Full User Security Assessment.

G8.42 Where a User is a Supplier Party of electricity and/or gas to Domestic Premises and/or Non-Domestic Premises through one or more Smart Metering Systems for which it is the Responsible Supplier but does not meet any of the criteria specified under Section G8.41, the User Security Assessment required by Section G8.40 shall be a Verification User Security Assessment and the User shall:

(a) within 12 months after each Verification User Security Assessment schedule a User Security Self-Assessment; and

(b) within 12 months after each User Security Self-Assessment, schedule a Full User Security Assessment with the User Independent Security Assurance Service Provider; and

(c) within 12 months after each Full User Security Assessment, schedule a Verification User Security Assessment with the User Independent Security Assurance Service Provider.

G8.43 In assessing for the purposes of Sections G8.41 and G8.42 the number of Domestic Premises and Non-Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which a User is the Responsible Supplier, that number shall, where any Shared Resources which are not provided by a Shared Resource Provider form part of both its User Systems and the User Systems of another User, be deemed to include any Domestic Premises or Non-Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which that other User is the Responsible Supplier.

Network Parties

G8.44 Where a User is a Network Party and the number of Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Electricity Distributor and/or the Gas Transporter exceeds 250,000, the User Security Assessment required by Section G8.40 shall be a Verification User Security Assessment and the User shall:

(a) within 12 months after previous Verification User Security Assessment, schedule a second Verification User Security Assessment with the User Independent Security Assurance Provider;

(b) within 12 months after each second successive Verification User Security Assessment, schedule a Full User Security Assessment with the User Independent Security Assurance Service Provider; and

(c) within 12 months after each Full User Security Assessment, schedule a Verification User Security Assessment with the User Independent Security Assurance Service Provider.

G8.45 Where a User is a Network Party and the number of Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Electricity Distributor and/or the Gas Transporter is equal to or less than 250,000, the User Security Assessment required by Section G8.40 shall be a Verification User Security Assessment and the User shall:

(a) within 12 months after each Verification User Security Assessment, schedule a User Security Self-Assessment;

(b) within 12 months after each User Security Self-Assessment, schedule a Full User Security Assessment with the User Independent Security Assurance Service Provider; and

(c) within 12 months after each Full User Security Assessment, schedule a Verification User Security Assessment with the User Independent Security Assurance Service Provider.

G8.46 In assessing for the purposes of Sections G8.44 and G8.45 the number of Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which a User is the Electricity Distributor and/or the Gas Transporter, that number shall, where any Shared Resources form part of both its User Systems and the User Systems of another User, be deemed to include any Domestic Premises supplied with electricity and/or gas through one or more Smart Metering Systems for which that other User is the Electricity Distributor and/or the Gas Transporter.

Other Users

G8.47 Where a User is neither a Supplier Party nor a Network Party, Section G8.40 requires the User to schedule a User Security Verification Assessment and the User shall:

(a) within 12 months after the previous User Security Verification Assessment, schedule a User Security Self-Assessment;

(b) within 12 months after the User Security Self-Assessment schedule a Full User Security Assessment with the User Independent Security Assurance Service Provider; and

(c) within 12 months after each Full User Security Assessment, schedule a User Security Verification Assessment.

Interpretation

G8.48 Section G8.49 applies where:

(a) pursuant to Sections G8.41 to G8.43, it is necessary to determine, in relation to any Supplier Party, the number of Domestic Premises and Non-Domestic Premises that are supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Responsible Supplier; or

(b) pursuant to Sections G8.44 to G8.46, it is necessary to determine, in relation to any Network Party, the number of Domestic Premises that are supplied with electricity and/or gas through one or more Smart Metering Systems for which it is the Electricity Distributor and/or the Gas Transporter.

G8.49 Where this Section applies:

(a) the determination referred to in Section G8.48 shall be made at the time at which the nature of each annual security assurance assessment for the relevant User falls to be ascertained; and

(b) the DCC shall provide all reasonable assistance that may be requested by that User or the Security Sub-Committee for the purposes of making that determination.

User Security Self-Assessment

G8.50 Where, in accordance with the requirements of this Section G8, a User is subject to a User Security Self-Assessment in any year, that User shall:

(a) carry out the User Security Self-Assessment during in accordance with the User Security Assessment Methodology that is applicable to User Security Self-Assessments; and

(b) ensure that the outcome of the User Security Self-Assessment is documented and is submitted to the User Independent Security Assurance Service Provider for review by no later than the date which is 12 months after the date of the completion of the previous User Security Assessment or (if more recent) User Security Self-Assessment.

Users: Obligation to Pay Explicit Charges

G8.51 Each User shall pay to the DCC all applicable Charges in respect of:

(a) all User Security Assessments and Follow-up Security Assessments carried out in relation to it by the User Independent Security Assurance Service Provider;

(b) the production by the User Independent Security Assurance Service Provider of any User Security Assessment Reports following such assessments; and

(c) all related activities of the User Independent Security Assurance Service Provider in respect of that User in accordance with this Section G8.

G8.52 Expenditure incurred in relation to Users in respect of the matters described in Section G8.51 shall be treated as Recoverable Costs in accordance with Section C8 (Panel Costs and Budgets).

G8.53 For the purposes of Section G8.51 the Panel shall, at such times and in respect of such periods as it may (following consultation with the DCC) consider appropriate, notify the DCC of:

(a) the expenditure incurred in respect of the matters described in Section G8.51 that is attributable to individual Users, in order to facilitate Explicit Charges designed to pass-through the expenditure to such Users pursuant to Section K7 (Determining Explicit Charges); and

(b) any expenditure incurred in respect of the matters described in Section G8.51 which cannot reasonably be attributed to an individual User.

Events of Default

G8.54 In relation to an Event of Default which consists of a material breach by a User of any of its obligations under Sections G3 to G6, the provisions of Sections M8.2 to M8.4 shall apply subject to the provisions of Sections G8.55 to G8.60.

G8.55 Where in accordance with Section M8.2 the Panel receives notification that a User is in material breach of any requirements of Sections G3 to G6, it shall refer the matter to the Security Sub-Committee.

G8.56 On any such referral the Security Sub-Committee may investigate the matter in accordance with Section M8.3 as if the references in that Section to the “Panel” were to the “Security Sub-Committee”.

G8.57 Where the Security Sub-Committee has:

(a) carried out an investigation in accordance with Section M8.3; or

(b) received a report from the User Independent Security Assurance Service Provider, following a User Security Assessment, concluding that a User is in actual or potential non-compliance with any of its obligations under Sections G3 to G6,

the Security Sub-Committee shall consider the information available to it and, where it considers that actual non-compliance with any obligations under Sections G3 to G6 has occurred, shall refer the matter to the Panel for it to determine whether that non- compliance constitutes an Event of Default.

G8.58 Where the Panel determines that an Event of Default has occurred, it shall:

(a) notify the relevant User and any other Party it considers may have been affected by the Event of Default; and

(b) determine the appropriate steps to take in accordance with Section M8.4.

G8.59 Where the Panel is considering what steps to take in accordance with Section M8.4, it may request and consider the advice of the Security Sub-Committee.

G8.60 Where the Panel determines that a User is required to give effect to a remedial action plan in accordance with Section M8.4(d) that plan must be approved by the Panel (having regard to any advice of the Security Sub-Committee).

Shared Resource Providers

G8.61 Section G8.62 applies where:

(a) Shared Resources are provided to a User by a Shared Resource Provider; and

(b) any User Security Assessment is carried out in respect of that Shared Resource Provider.

G8.62 Where this Section applies:

(a) the outcome of the User Security Assessment (including for these purposes any actions or decisions described at Sections G8.22 to G8.29) shall be treated as applying to the User, in respect of the Shared Resources, in the same manner as it is applicable to the Shared Resource Provider; and

(b) in any User Security Assessment which takes place in respect of the User, the User Independent Security Assessment Service Provider shall, with regard to matters relating to the Shared Resources, rely on the outcome of the most recent User Security Assessment in respect of the Shared Resource Provider and shall not be required to repeat that assessment.

G8.63 For the purposes of Section G8.40, where a Shared Resource Provider provides Shared Resources to Users which are:

(a) Supplier Parties, the provisions of Sections G8.41 and G8.42 shall apply to the Shared Resource Provider as if it was a Supplier Party and the Smart Metering Systems for which those Supplier Parties are the Responsible Suppliers were Smart Metering Systems for which it is the Responsible Supplier;

(b) Network Parties, the provisions of Sections G8.44 to G8.46 shall apply to the Shared Resource Provider as if it was a Network Party and the Smart Metering Systems for which those Network Parties are the Electricity Distributor and/or Gas Transporter were Smart Metering Systems for which it is the Electricity Distributor and/or Gas Transporter;

(c) Other Users, the provisions of Section G8.47 shall apply to the Shared Resource Provider as if it was an Other User.

CPA Certificate Remedial Plan Preparation

G8.64 Where a User is a Supplier Party, the User shall ensure that it has in place (and periodically reviews) a policy for creating and managing compliance with CPA Certificate Remedial Plans.

G9. DCC SECURITY ASSURANCE

The DCC Independent Security Assessment Arrangements

G9.1 The DCC shall establish, give effect to, maintain and comply with arrangements, to be known as the " **DCC Independent Security Assessment Arrangements**", which shall procure the services of a DCC Independent Security Assessment Service Provider to undertake security assessment services.

Scope of Security Assessment Services

G9.2 The security assessment services specified in this Section G9.2 are services in accordance with which the DCC Independent Security Assessment Service Provider shall:

(a) carry out DCC Security Assessments at such times and in such manner as is provided for in this Section G9;

(b) produce DCC Security Assessment Reports in relation to the DCC that have been the subject of a DCC Security Assessment;

(c) receive, consider and validate DCC Security Assessment Responses and carry out any Follow-up Security Assessments at the request of the Security Sub-Committee;

(d) otherwise, at the request of, and to an extent determined by, the Security Sub Committee, carry out an assessment of the compliance of the DCC with its obligations under:

(i) Condition 8 (Security Controls for the Authorised Business) of the DCC Licence;

(ii) the requirements of Sections G2 and G4 to G6 or any CPA Certificate Remedial Plan; and where:

(iii) following either a DCC Security Assessment, any material increase in the security risk relating to the DCC has been identified; or

(iv) the Security Sub-Committee otherwise considers it appropriate for that assessment to be carried out;

(e) at the request of the Security Sub-Committee, provide to it advice in relation to:

(i) the compliance of the DCC with its obligations under SEC Section G or any CPA Certificate Remedial Plan; and

(ii) changes in security risks relating to the Systems, Data, functionality and processes of the DCC which fall within SEC Section G5 (Information Security: Obligations on the DCC);

(f) at the request of the Security Sub-Committee, provide to it advice in relation to the suitability of any remedial action plan for the purposes of Section M8.4 of the Code (Consequences of an Event of Default);

(g) at the request of the Security Sub-Committee Chair, provide a representative to attend and contribute to the discussion at any meeting of the Security Sub-Committee; and

(i) undertake such other activities and do so at such times and in such manner, as may be further provided for in this Section G9;

(ii) assess the DCC's compliance with the requirements of Condition 8 (Security Controls for the Authorised Business) of the DCC Licence;

(iii) such other requirements relating to the security of the DCC Total System as may be specified by the Security Sub-Committee or the Panel from time to time.

G9.3 The actions specified in this Section G9.3 shall be actions taken by the DCC to:

(a) procure the provision of security assessment services by the DCC Independent Security Assessment Service Provider (as further described in Section G9.4);

(b) ensure that the DCC Independent Security Assessment Service Provider carries out Security Assessments for the purpose specified in Section G9.2:

(i) annually;

(ii) on any material change to the DCC Total System; and

(iii) at any other time specified by the Security Sub-Committee or the Panel;

(c) comply with the arrangements set out by the Security Sub-Committee in a Security Controls Framework;

(d) in line with the methodology and processes set out in the Security Controls Framework:

(i) procure that the DCC Independent Security Assessment Service Provider produces a DCC Security Assessment Report following each such assessment that has been carried out;

(ii) ensure that the DCC Independent Security Assessment Service Provider provides the Security Sub-Committee with a copy of each such DCC Security Assessment Report;

(iii) produce a DCC Security Assessment Response in relation to each such report; and

(iv) provide to the Panel and the Security Sub-Committee a copy of each DCC Security Assessment Response and, as soon as reasonably practicable thereafter, a report on its implementation of any action plan that is required by the Security Sub-Committee.

The DCC Independent Security Assessment Service Provider

G9.4 For the purposes of Section G9.3, the "**DCC Independent Security Assessment Service Provider**" shall be a person who is appointed by the DCC to provide security assessment services:

(a) of the scope specified in Section G9.2;

(b) from a person who:

(i) is suitably qualified in accordance with Section G9.5;

(ii) is suitably independent in accordance with Section G9.8.

Suitably Qualified Service Provider

G9.5 The DCC Independent Security Assessment Service Provider shall be treated as suitably qualified in accordance with this Section G9.5 only if it satisfies:

(a) the requirements specified in Section G9.6; and

(b) the requirement specified in Section G9.7.

G9.6 The requirements specified in this Section G9.6 are that the DCC Independent Security Assessment Service Provider:

(a) is accredited by UKAS as meeting the requirements for providing audit and certification of information security management systems in accordance with ISO/IEC 27001:2017 Information Technology – Security Techniques – Information Security Management Systems) or any equivalent to that standard which updates or replaces it from time to time; and/or

(b) holds another membership, accreditation, approval or form of professional validation that is in the opinion of the Security Sub-Committee substantially equivalent in status and effect to the arrangements described in paragraph (a).

G9.7 The requirement specified in this Section G9.7 is that the DCC Independent Security Assessment Service Provider:

(a) employs consultants who are assured under an official cyber security qualification scheme recognised by NCSC or the UK Cyber Security Council or UKAS and which is approved by the Security Sub-Committee at levels equivalent to 'Chartered', 'Principal', 'Lead' or 'Senior Practitioner' in either 'Security and Information Risk Advisor' or 'Information Assurance Auditor' roles; and

(b) engages those individuals as its lead auditors for the purposes of carrying out all security assessments in accordance with this Section G7.

Independence Requirement

G9.8 The DCC Independent Security Assurance Service Provider shall be treated as suitably independent in accordance with this Section G9.8 only if it satisfies:

(a) the requirements specified in Section G9.9; and

(b) the requirement specified in Section G9.10.

G9.9 For the purposes of Sections G9.9 and G9.10:

(a) the DCC must be independent from the DCC Independent Security Assessment Service Provider in carrying out functions under this Section G9; and

(b) all of the DCC's Service Providers must be independent from the DCC Independent Security Assessment Service Provider in carrying out its functions to assess the DCC's compliance with its obligations as the DCC under Sections G2 and G4 to G6 and DCC Licence Condition 8 (Security Controls for the Authorised Business) and SEC Appendix Z Sections 6 and 7.

G9.10 The requirements specified in this Section G9.10 are that:

(a) neither the DCC or any of its subsidiaries, and no DCC Service Provider or any of its subsidiaries, holds or acquires any investment by way of shares, securities or other financial rights or interests in the DCC Independent Security Assessment Service Provider;

(b) no director of the DCC and no director of any DCC Service Provider, is or becomes a director or employee of, or holds or acquires any investment by way of shares, securities or other financial rights or interests in, the DCC Independent Security Assessment Service Provider; and

(c) the DCC Independent Security Assessment Service Provider does not hold or acquire a participating interest (as defined in section 421A of the Financial Services and Markets Act 2000) in the DCC or any of the DCC's Service Providers, (for these purposes references to the DCC's Service Providers shall not include the DCC Independent Security Assessment Service Provider where it acts in that capacity).

G9.11 The requirement specified in this Section G9.11 is that the DCC Independent Security Assessment Service Provider is able to demonstrate to the satisfaction of the Security Sub-Committee that it has in place arrangements to ensure that it will at all times act independently of any commercial relationship that it has, has had, or may in future have with the DCC or the DCC's Service Providers (and for these purpose a 'commercial relationship' shall include a relationship established by virtue of the DCC Independent Security Assessment Service Provider itself being a DCC Service Provider to the DCC).

Compliance of the DCC Independent Security Assessment Service Provider

G9.12 The Security Sub-Committee shall advise the DCC of any performance failures or non-compliance with the SEC obligations on the part of the DCC Independent Security Assessment Service Provider to enable the DCC to ensure that the DCC Independent Security Assessment Service Provider carries out its functions in accordance with the provisions of this Section G12.

DCC: Duty to Cooperate in Assessment

G9.13 The DCC shall do all such things as may be reasonably requested by the Security Sub- Committee, or by any person acting on behalf of or at the request of the Security Sub- Committee (including in particular the DCC Independent Security Assessment Service Provider), for the purposes of facilitating an assessment of the DCC's compliance with its obligations under Sections G2 and G4 to G6 or DCC Licence Condition 8 (Security Controls for the Authorised Business) or SEC Appendix Z Sections 6 and 7 and any CPA Certificate Remedial Plan.

G9.14 For the purposes of Section G9.13, the DCC shall provide the DCC Independent Security Assessment Service Provider with:

(a) all such Data as may reasonably be requested, within such times and in such format as may reasonably be specified;

(b) all such other forms of cooperation as may reasonably be requested, including in particular:

(i) access at all reasonable times to such parts of the premises of the DCC or its Service Providers as are used for, and such persons engaged by the DCC as carry out or are authorised to carry out, any activities related to its compliance with its obligations under Sections G2 and G4 to G6 and DCC Licence Condition 8 (Security Controls for the Authorised Business) and SEC Appendix Z Sections 6 and 7; and

(ii) such cooperation as may reasonably be requested by the DCC Independent Security Assessment Services Provider for the purposes of carrying out any security assurance assessment in accordance with this Section G9.

Categories of DCC Security Assessment

G9.15 For the purposes of this Section G9, there shall be the following two categories of security assessment:

(a) a Full DCC Security Assessment (as further described in Section G9.16);

(b) a Follow-up DCC Security Assessment (as further described in Section G9.17).

G9.16 A "**Full DCC Security Assessment**" shall be an assessment carried out by the DCC Independent Security Assessment Service Provider in respect of the DCC and its Service Providers to identify the extent to which the DCC is compliant with each of its obligations under Sections G2 and G4 to G6 and DCC Licence Condition 8 (Security Controls for the Authorised Business) and SEC Appendix Z Sections 6 and 7.

G9.17 A "**Follow-up DCC Security Assessment**" shall be an assessment carried out by the DCC Independent Security Assessment Service Provider, following a DCC Security Assessment, in accordance with the provisions of Section G9.25.

DCC Security Assessments: General Procedure

DCC Security Assessment Methodology

G9.18 Each DCC Security Assessment carried out by the DCC Independent Security Assessment Service Provider shall be carried out in accordance with the Security Controls Framework developed as defined in G7.19(a).

The DCC Security Assessment Report

G9.19 Following the completion of a DCC Security Assessment, the DCC Independent Security Assessment Service Provider shall, in discussion with the DCC, produce a written report (a "**DCC Security Assessment Report**") which shall:

(a) set out the findings of the DCC Independent Security Assessment Service Provider on all the matters within the scope of the DCC Security Assessment;

(b) specify any instances of actual or potential non-compliance of the DCC with its obligations under Sections G2 and G4 to G6 which have been identified by the DCC Independent Security Assessment Service Provider;

(c) specify any instances of actual or potential non-compliance of the DCC with its obligations under DCC Licence Condition 8 (Security Controls for the Authorised Business);

(d) specify any instances of actual or potential non-compliance of the DCC with its obligations under SEC Appendix Z, Sections 6 and 7; and

(e) set out the evidence which, in the opinion of the DCC Independent Security Assessment Service Provider, establishes each of the instances of actual or potential non-compliance which it has identified.

G9.20 The DCC Independent Security Assessment Service Provider shall submit a copy of each DCC Security Assessment Report to the Security Sub-Committee and to the DCC.

The DCC Security Assessment Response

G9.21 Following the receipt by the DCC of a DCC Security Assessment Report which relates to it, the DCC shall as soon as reasonably practicable, and in any event by no later than such date as the Security Sub-Committee may specify:

(a) produce a written response to that report (a "**DCC Security Assessment Response**") which addresses the findings set out in the report; and

(b) submit a copy of that response to the Security Sub-Committee and the DCC Independent Security Assessment Service Provider.

G9.22 Where a DCC Security Assessment Report following a Full DCC Security Assessment, specifies any instance of actual or potential non-compliance of the DCC with its obligations under Sections G2 and G4 to G6 and/or with DCC Licence Condition 8 (Security Controls for the Authorised Business) and/or with SEC Appendix Z, Sections 6 and 7, the DCC shall ensure that its DCC Security Assessment response includes the matters referred to in Section G9.23.

G9.23 The matters referred to in this Section are that the DCC Security Assessment Response:

(a) indicates whether the DCC accepts the relevant findings of the DCC Independent Security Assessment Service Provider and, where it does not, explains why this is the case;

(b) sets out any steps that the DCC has taken or proposes to take in order to remedy and/or mitigate the actual or potential non-compliance or the increase in security risk (as the case may be) specified in the DCC Security Assessment Report; and

(c) identifies a timetable within which the DCC proposes to take any such steps that have not already been taken.

G9.24 Where a DCC Security Assessment Response sets out any steps that the DCC proposes to take in accordance with Section G9.23(b), the Security Sub-Committee (having considered the advice of the DCC Independent Security Assessment Service Provider) shall review that response and either:

(a) notify the DCC that it accepts that the steps that the DCC proposes to take, and the timetable within which it proposes to take them, are appropriate to remedy and/or mitigate the actual or potential non-compliance or increase in security risk (as the case may be) specified in the DCC Security Assessment Report; or

(b) seek to agree with the DCC such alternative steps and/or timetable as would, in the opinion of the Security Sub-Committee, be more appropriate for that purpose.

G9.25 Where a DCC Security Assessment Response sets out any steps that the DCC proposes to take in accordance with Section G9.23(b), and where those steps and the timetable within which it proposes to take them are accepted by the Security Sub-Committee, or alternative steps and/or an alternative timetable are agreed between it and the DCC in accordance with Section G9.24(b), the DCC shall:

(a) take the steps that have been accepted or agreed (as the case may be) within the timetable that has been accepted or agreed (as the case may be); and

(b) report to the Security Sub-Committee on:

(i) its progress in taking those steps, at any such intervals or by any such dates as the Security Sub-Committee may specify;

(ii) the completion of those steps in accordance with the timetable; and

(iii) any failure to complete any of those steps in accordance with the timetable, specifying the reasons for that failure.

Follow-up Security Assessment

G9.26 Where a DCC Security Assessment Response sets out any steps that the User proposes to take in accordance with Section G9.23(b), and where those steps and the timetable within which it proposes to take them are accepted by the Security Sub-Committee, or alternative steps and/or an alternative timetable are agreed between it and the User in accordance with Section G9.24(b), the DCC Independent Security Assessment Service Provider shall, at the request of the Security Sub-Committee (and by such date as it may specify), carry out a Follow-up Security Assessment of the DCC to:

(a) identify the extent to which the DCC has taken the steps that have been accepted or agreed (as the case may be) within the timetable that has been accepted or agreed (as the case may be); and

(b) assess any other matters related to the DCC Security Assessment Response that are specified by the Security Sub-Committee.

DCC Security Assessments: Further Provisions

G9.27 The DCC Independent Security Assessment Service Provider may, in carrying out any DCC Security Assessment, take into account any relevant security accreditation or certification held by the DCC.

Setting the Compliance Status

G9.28 Following the completion of a Full DCC Security Assessment, the Security Sub-Committee shall consider the DCC Security Assessment Report and the DCC Security Assessment Response.

G9.29 The Security Sub-Committee shall identify whether any remaining non-compliances that exist with Section G2 or G4 to G6 and/or the DCC Licence Condition 8 (Security Controls for the Authorised Business) and/or SEC Appendix Z, Sections 6 and 7 and shall, where appropriate:

(a) note and record that there are no non-compliances; or

(b) note and record the specific non-compliances that need to be addressed.

G9.30 Where the Security Sub-Committee identifies remaining non-compliances that exist with Section G2 and G4 to G6 and/or the DCC Licence Condition 8 (Security Controls for the Authorised Business) and/or SEC Appendix Z Sections 6 and 7, it shall:

(a) require the DCC to take the steps set out in Section G9.24: or

(b) require a Follow-up Security Assessment as set out in Section G9.26.

G9.31 Where the Security Sub-Committee identifies any remaining non-compliances with Section G2 or G4 to G6 and/or the DCC Licence Condition 8 (Security Controls for the Authorised Business) and/or SEC Appendix Z, Sections 6 and 7, it shall notify the Panel as required by G9.37(b).

CPA Certificate Remedial Plan Preparation

G9.32 The DCC shall ensure that it has in place (and periodically reviews) a policy for creating and managing compliance with CPA Certificate Remedial Plans. The DCC Independent Security Assessment Service Provider will assess the DCC's compliance with Appendix Z Section 6 and Section 7.

Disagreement with Security Sub-Committee Decisions

G9.33 Where the DCC disagrees with any decision made by the Security Sub-Committee in relation to it under Section G9.28 to G9.31, it may appeal that decision to the Panel. If the DCC disagrees with any decision made by the Panel, it may appeal that decision to the Authority and the determination of the Authority shall be final and binding for the purposes of the Code.

Events of Default

G9.34 In relation to an Event of Default which consists of a material breach by the DCC of any of the obligations referred to at Section G9.2(c), the provisions of Sections M8.2 to M8.4 shall apply subject to the provisions of Sections G9.35 to G9.41.

G9.35 For the purposes of Sections M8.2 to M8.4 as they apply pursuant to Section G9.34, an Event of Default shall (notwithstanding the ordinary definition thereof) be deemed to have occurred in respect of the DCC where it is in material breach of any of the obligations referred to at Section G9.2(d) (provided that Sections M8.4(e), (f) and (g) shall never apply to the DCC).

G9.36 Where in accordance with Section M8.2 the Panel receives notification that the DCC is in material breach of any of the obligations referred to at Section G9.2(d), it shall refer the matter to the Security Sub-Committee.

G9.37 On any such referral the Security Sub-Committee may investigate the matter in accordance with Section M8.3 as if the references in that Section to the "Panel" were to the "Security Sub-Committee".

G9.38 Where the Security Sub-Committee has:

(a) carried out an investigation in accordance with Section M8.3; or

(b) received a DCC Security Assessment Report concluding that the DCC is in actual or potential non-compliance with any of the obligations referred to at Section G9.2(c),

the Security Sub-Committee shall consider the information available to it and, where it considers that actual non-compliance with any of the obligations referred to at Section G9.2(c) has occurred, shall refer the matter to the Panel for it to determine whether that non-compliance constitutes an Event of Default.

G9.39 Where the Panel determines that an Event of Default has occurred, it shall:

(a) notify the DCC and any other Party it considers may have been affected by the Event of Default; and

(b) determine the appropriate steps to take in accordance with Section M8.4.

G9.40 Where the Panel is considering what steps to take in accordance with Section M8.4, it may request and consider the advice of the Security Sub-Committee.

G9.41 Where the Panel determines that the DCC is required to give effect to a remedial action plan in accordance with Section M8.4(d) that plan must be approved by the Panel (having regard to any advice of the Security Sub-Committee).

CPA Certificate Remedial Plan Preparation

G9.42 The DCC shall ensure that it has in place (and periodically reviews) a policy for creating and managing compliance with CPA Certificate Remedial Plans.

G10. SHARED RESOURCES

G10.1 Where any resources which form part of the User Systems of a User also form part of the User Systems of any one or more other Users, those resources shall be known as "**Shared Resources**".

G10.2 For the purposes of this Part G, a "**Shared Resource Provider**" shall mean any Party which makes available Shared Resources to one or more Users, for use by them or on their behalf, in accordance with any agreement entered into or arrangement made with each such User.

Shared Resources which constitute the entirety of User Systems

G10.3 A User may not employ Shared Resources which:

(a) are made available to it by one other person; and

(b) constitute the entirety of its User Systems,

unless those Shared Resources are provided by a Shared Resource Provider.

Obligations on Shared Resource Providers

G10.4 Each Shared Resource Provider shall:

(a) maintain a list of every User to which it makes available Shared Resources in accordance with an agreement or arrangement of the type described in Section G10.2;

(b) revise that list from time to time to ensure that it remains accurate and up to date at all times;

(c) submit to the Security Sub-Committee a copy of that list and of any revision to it, so that the Security Sub-Committee is in possession of a copy of that list that is accurate and up to date at all times.

G10.5 For the purposes of Sections G1 to G5 and G7 to G9, unless the context otherwise requires, a Shared Resource Provider shall be treated as if it were a User, and:

(a) any reference to a User shall be deemed to include a reference to that Shared Resource Provider;

(b) subject to Section G10.6, obligations in those Sections which are expressed to apply to a User shall apply to that Shared Resource Provider;

(c) references in those obligations to User Systems shall be deemed, for the purpose of their application to the Shared Resource Provider, to be references to the Shared Resources which it provides; and

(d) the role of the Shared Resource Provider shall be treated as if it were an additional category of User Role.

Continuing Obligations of Users

G10.6 Section G10.5 shall have effect without prejudice to the duty of Users to comply with the obligations at Sections G1 to G5 and G7 to G9, so that, where a Shared Resource Provider provides a User with Shared Resources constituting its User Systems, both it and the User shall be jointly and severally liable for any failure to comply with an obligation which relates to those Shared Resources, subject to:

(a) Section G5.28 which has effect for determining the obligations of, and the relationship between, the User and the Shared Resource Provider in relation to their respective User Information Security Management Systems; and

(b) Sections G8.61 to G8.63 which have effect for determining:

(i) when the Shared Resource Provider is required to schedule either a User Security Assessment or User Security Self-Assessment; and

(ii) how the outcome of a User Security Assessment in respect of the Shared Resource Provider is applicable to a User to which that Shared Resource Provider is providing Shared Resources.

Additional Obligations following User Security Assessments

G10.7 Section G10.8 applies, following a User Security Assessment that has been carried out in respect of a Shared Resource Provider, in relation to the information to be provided to each User with which, at that time, the Shared Resource Provider has an agreement or arrangement of the type described in Section G10.2 (a "**Shared Resource User**").

G10.8 Where this paragraph applies:

(a) the User Independent Security Assurance Service Provider shall (in addition to its obligation at Section G8.23) submit a copy of the User Security Assessment Report to each Shared Resource User;

(b) the Shared Resource Provider shall (in addition to its obligation at Section G8.24) submit a copy of its User Security Assessment Response to each Shared Resource User;

(c) the Security Sub-Committee shall (in addition to its obligation at Section G8.27) notify each Shared Resource User of any steps accepted or agreed (as the case may be) with the Shared Resource Provider; and

(d) the Shared Resource Provider shall (in addition to its obligation at Section G8.28(b)) provide each Shared Resource User with a copy of any report that is submitted from time to time to the Security Sub-Committee in accordance with Section G8.28(b).

Interpretation

G10.9 For the purposes of Sections G1 to G5 and G7 to G9, unless the context otherwise requires, any expressions which are:

(a) defined in those Sections by reference to a User or User Systems; or

(b) defined in Section A by reference to a User or User Systems, and used in those Sections,

shall be interpreted so that any reference to a User is deemed to include a reference to a Shared Resource Provider, and any reference to User Systems is deemed, in the case of a Shared Resource Provider, to be a reference to the Shared Resources provided by it.

G11. THE ECOS TRANSITION AND MIGRATION APPROACH DOCUMENT

Overview

G11.1 The first version of the ECoS Transition and Migration Approach Document is to be developed by the Secretary of State and incorporated into this Code pursuant to Part G of Condition 22 of the DCC Licence and Section X5 (Incorporation of Certain Documents into this Code).

G11.2 The second (and each subsequent version as may be required) of the ECoS Transition and Migration Approach Document is to be developed by the DCC pursuant to this Section G11, and incorporated into this Code pursuant to Part G of Condition 22 of the DCC Licence and, where Section X continues to be in effect, Section X5 (Incorporation of Certain Documents into this Code).

Purpose of the ECoS Transition and Migration Approach Document

G11.3 The purpose of the first version of the ECoS Transition and Migration Approach Document is to provide that the modifications made to this Section G and to Section L of the Code for the purposes of setting out the arrangements which are to apply following the completion of ECoS Migration, shall not apply in respect of any period which is prior to:

(a) the commencement of ECoS Migration; and

(b) the point in time at which Devices with Device Security Credentials that comprise (in part) information from an ECoS Certificate may be Commissioned.

G11.4 In addition to the purpose set out in Section G11.3, the purposes of the second (and each subsequent) version of the ECoS Transition and Migration Approach Document are to:

(a) enable the ECoS Migration of SMETS2+ Devices such that the Device Security Credentials for such Devices comprise (in part) information from an ECoS Certificate instead of information from a TCoS Certificate;

(b) facilitate the processing of a 'CoS Update Security Credentials' Service Request made by the TCoS Service Provider in respect of any Device that has not ECoS Migrated;

(c) permit, for a transitional period, the installation of Devices in respect of which the Device Security Credentials are comprised (in part) by information from a TCoS Certificate;

(d) provide for additional and/or varied provisions to apply for a transitional period prior to, during and/or following the ECoS Migration of Devices; and

(e) provide for additional and/or varied provisions to apply for a transitional period to manage the interactions between the Enduring Change of Supplier Arrangements and the introduction of the

Centralised Registration Service, which may take place prior to, during, or following the commencement of ECoS Migration.

Content of the ECoS Transition and Migration Approach Document

G11.5 The ECoS Transition and Migration Approach Document may include, without limitation, some or all of the following:

(a) rights and/or obligations of the DCC and other Parties designed to facilitate or achieve the purposes of the ECoS Transition and Migration Approach Document which are either additional to or vary other rights and/or obligations set out in this Code;

(b) the processes by which SMETS2+ Devices that have been Commissioned will have their Device Security Credentials updated such that those security credentials which relate to the CoS Party will be derived from information contained in an ECoS Certificate instead of information contained in a TCoS Certificate;

(c) the processes by which changes to DCC Systems are to be made to enable the DCC to begin processing "CoS Update Security Credentials" Service Requests in relation to SMETS1 Devices;

(d) pre-conditions to apply in relation to the ECoS Migration of any SMETS1 or SMETS2+ Device, including by reference to the DCC, the Device Model, and/or the Responsible Supplier;

(e) provisions enabling the DCC to process a 'CoS Update Security Credentials' Service Request in a different way, method or manner depending upon whether or not the Device in respect of which the Service Request is made has been ECoS Migrated;

(f) provisions that, from any such date as may be specified, permit or require any newly installed or Commissioned Device to have security credentials which relate to the CoS Party to be derived from the information contained in an ECoS Certificate instead of information that is contained in a TCoS Certificate;

(g) provisions requiring the DCC to report on its progress on ECoS Migration, including identifying whether in relation to Devices any particular category of Device Model and/or Device Type has failed, or is more likely to fail, ECoS Migration;

(h) provisions requiring the DCC to apply a specific strategy in respect of attempting to complete ECoS Migration for a Device in respect of which ECoS Migration has previously failed;

(i) provisions requiring the DCC and Supplier Parties to take steps to resolve matters that are causing, or contributing to the cause of, failures of ECoS Migration;

(j) provisions requiring the secure decommissioning of Systems of the TCoS Service Provider, for the revocation of any associated Organisation Certificates, and for the verifiable destruction of associated Private Keys;

(k) limitations and/or variations to the Services and/or the rights and/or obligations of the Parties to apply for a transitional period prior to and/or following the ECoS Migration of some or all Devices, which may include limitations and/or variations to Services in light of other proposed changes to this Code; and

(l) provision for the referral and determination of disputes in respect of the ECoS Transition and Migration Approach Document, which may include interim or final determinations by the Secretary of State, the Authority, the Panel or any other person specified by the Secretary of State.

Process to Develop Second (and any subsequent) Document for Designation

G11.6 The DCC shall, where so directed by the Secretary of State from time to time, develop and consult upon the second (and any subsequent) version of the ECoS Transition and Migration Approach Document and submit it to the Secretary of State in accordance with the following process:

(a) the DCC shall, in consultation with the Parties, such other persons as are likely to be interested, and where Section G11.7 applies, the Security Sub-Committee, produce a draft of the document;

(b) where a disagreement arises with any Party or other person with regard to any proposal as to the content of the document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the ECoS Transition and Migration Approach Document;

(c) the DCC shall send a copy of the draft document to the Secretary of State as soon as is practicable after completion of the process described in paragraphs (a) and (b) above, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose;

(ii) copies of the consultation responses received; and

(iii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal;

G11.7 Where the DCC reasonably believes that any changes to a version of the ECoS Transition and Migration Approach Document it is developing in accordance with Section G11.6 might be considered to have an impact upon on the End-to-End Security Architecture or the risks identified in the Security Risk Assessment:

(a) the DCC shall submit to the Security Sub-Committee for its review and comment an impact assessment that sets out the DCC's views of any such impact (a **Security Impact Assessment**);

(b) the Security Sub-Committee shall provide any comments or observations that they have on the Security Impact Assessment to the DCC;

(c) the DCC shall provide a response to any such comments or observations to the Security Sub-Committee and update the relevant draft of the ECoS Transition and Migration Approach Document as appropriate to take into account the comments or observations; and

(d) following the DCC's response, the Security Sub-Committee shall notify the Secretary of State whether it considers there to be any remaining outstanding unacceptable risks to the End-to-End Security Architecture as a consequence of the proposed changes to the ECoS Transition and Migration Approach Document.

G11.8 The DCC shall comply with any direction given to it by the Secretary of State following the Secretary of State's consideration of the draft document which direction may require the DCC to:

(a) make such amendments to the draft document as are set out or described in the direction;

(b) produce and submit to the Secretary of State a further draft of the document; and

(c) follow a specified process (and the time within which that process shall be completed) prior to submitting a further draft of the document to the Secretary of State.

Application of the ECoS Transition and Migration Approach Document

G11.9 The DCC and the categories of Party referred to in the ECoS Transition and Migration Approach Document shall comply with the ECoS Transition and Migration Approach Document.

G11.10 The ECoS Transition and Migration Approach Document shall have priority over the other SEC Subsidiary Documents in relation to the subject matter of the ECoS Transition and Migration Approach Document.

Expiry of each version of the ECoS Transition and Migration Approach Document

G11.11 The second, and each subsequent, version of the ECoS Transition and Migration Approach Document shall provide for a date (or a mechanism for determining a date) from which that version is to no longer apply. From such date, that version of the ECoS Transition and Migration Approach Document shall no longer have any effect (but without prejudice to the rights and obligations arising prior to that date) and it shall automatically be deleted from this Code.

Definitions

G11.12 For the purposes of this Section G11:

Centralised Registration Service	has the meaning given to that term in Condition 1 of the DCC Licence.
ECoS Certificate	means an Organisation Certificate for which the ECoS Service Provider is the Subject.
ECoS Migration	means, in relation to any one or more Device(s), that the Device Security Credentials held on or in relation to any such Device previously populated with information from a TCoS Certificate have been populated with information from an ECoS Certificate, and the expression "**ECoS Migrated**" shall be interpreted accordingly.
ECoS Service Provider	means each DCC Service Provider that, following the completion of the implementation of the Enduring Change of Supplier Arrangements, supports or is to support the performance of tasks ascribed to the CoS Party.
Enduring Change of Supplier Arrangements	has the meaning given to that term in Condition 13A of the DCC Licence.
Subject	has the meaning given to that term in Annex A of Appendix B (Organisation Certificate Policy).
TCoS Certificate	means an Organisation Certificate for which the TCoS Service Provider is the Subject.

TCoS Service Provider	means the DCC Service Provider that, prior to the commencement of the implementation of the Enduring Change of Supplier Arrangements, is the service provider that supports the performance of tasks ascribed to the CoS Party.

G12. SECURITY ASSURANCE OF DEVICE TRIAGE FACILITIES

G12.1 Some of the expressions used in this Section G12 are defined in Section G12.9.

G12.2 Where the SSC Guidance for Device Security Assurance and Triage specifies that independent assurance of Triage Facility Providers is required to achieve appropriate levels of security assurance in accordance with the requirements of this Code, this Section G12 shall apply.

Triage Facility Provider Obligations

G12.3 In order to become a Triage Facility Provider, an entity must either be an existing Party or accede to this Code and become a Party. A Triage Service Provider is not required to be a User.

G12.4 Each Triage Facility Provider shall:

(a) not attempt to undertake Triage Activities on any Device where the tamper-protection boundary required by the CPA Security Characteristics has already been breached before reaching the Triage Facility (taking into account any allowable breaches necessary as part of essential Device maintenance and/or the de-commissioning process);

(b) only use the Triage Tool and Triage System Interface provided by a Device's Manufacturer to access the Manufacturer's Triage System and not use any other electronic devices, interfaces or IT systems for carrying out Triage Activities;

(c) ensure multi-factor authentication and role-based access controls are used within its Triage Facility to control access to the graphical user interface (GUI) of the Triage Tool, and to control access to the Triage System Interface;

(d) at all times prevent unauthorised use of the Triage Tool and Triage System Interface, and ensure the physical security of the Triage Tool and any Devices that are subject to Triage Activities;

(e) ensure that all the required tamper-protection seals are fitted to Devices on completing the Triage Activities;

(f) maintain an asset management system to record Triage Activities undertaken at the Triage Provider's Triage Facility, including details of:

(i) the Requestor of any change to the configuration of a Device;

(ii) the Device Model and serial number of each Device where the tamper-protection boundary is breached in order to undertake (or attempt to undertake) Triage Activities;

(iii) details of Triage Activities successfully undertaken;

(iv) details of any failed attempts to complete Triage Activities; and

(v) confirmation that any seals and tamper-protection required by the CPA Security Characteristics have been applied before returning a Device to a Requestor.

(g) when requested by the Security Sub-Committee, provide the Security Sub-Committee with an up-to-date copy of the records maintained pursuant to Section G12.3(f);

(h) provide all reasonable assistance that may be requested by the Security Sub-Committee or the User Independent Security Assurance Service Provider for the purposes of conducting a User Security Assessment;

(i) subject to Section G12.5, comply with the requirements of Sections G1, G3 to G5, G7 and G8;

(j) comply with the requirements of Sections G12.6 to G12.8; and

(k) act in accordance with Good Industry Practice.

G12.5 For the purposes of Sections G1, G3 to G5, G7 and G8, unless the SSC Guidance for Device Security Assurance and Triage states otherwise, a Triage Facility Provider shall be treated as if it is a User and:

(a) any reference to a 'User' shall be deemed to include a reference to a 'Triage Facility Provider';

(b) except for where the SSC Guidance for Device Security Assurance and Triage states otherwise, obligations in those Sections which are expressed to apply to a User shall apply to a Triage Facility Provider;

(c) references in those obligations to 'User Systems' shall be deemed, for the purpose of their application to the Triage Facility Provider, to be references to the Triage Activities undertaken at the Triage Facility; and

(d) the Security Sub-Committee shall provide Triage Facility Providers and other Parties with guidance on interpretation of Sections G1, G3 to G5, G7 and G8 in respect of their application to Triage Facility Providers and Triage Activities.

User Security Assessments of Triage Facilities

G12.6 Prior to undertaking any Triage Activities, each Triage Facility Provider shall be subject to an initial Full User Security Assessment by a User Independent Security Assurance Service Provider following the process in Sections G8.22 to G8.30.

Approval

G12.7 On receipt of the initial Full User Security Assessment Report and the User Security Assessment Response, the assurance status shall be set in accordance with Sections G8.35 to G8.36 and:

(a) where the assurance status is set to ‘approved' under Section G8.36(a) then the Triage Facility Provider may undertake Triage Activities as set out in the SSC Guidance for Device Security Assurance and Triage;

(b) where the assurance status is set to ‘approved' subject to conditions (as set under Section G8.36(b)) then the Triage Facility Provider will require explicit approval from the Security Sub-Committee before undertaking Triage Activities; and

(c) where the assurance status is ‘deferred’ or ‘rejected’ under Section G8.36(c) or (d), respectively, then the Triage Facility Provider is not approved to undertake Triage Activities.

Second and subsequent User Security Assessments

G12.8 Within 12 months following completion of the initial and each subsequent User Security Assessment, the Triage Facility Provider shall schedule a subsequent User Security Assessment with the User Independent Security Assurance Provider. The Security Sub-Committee shall determine the category of each such User Security Assessment to be carried out and, in doing so shall:

(a) consider any security risks identified during or since the previous User Security Assessment;

(b) take account of the volume of Devices for which Triage Activities are carried out; and

(c) reach a determination based on a proportionate assessment of the security risks as to whether the next User Security Assessment should be:

(i) a Full User Security Assessment;

(ii) a Verification User Security Assessment; or

(iii) a User Security Self-Assessment.

Definitions

G12.9 For the purpose of this Section G12:

Requestor	means an entity (such as a Party or a meter asset provider) that requests that Triage Activities are undertaken by a Triage Facility Provider.
SSC Guidance for Device Security Assurance and Triage	means the document published by the Security Sub-Committee under Section G7.19(g), which sets out guidance on the requirements and processes (including security controls and security assurance) to be followed by Triage Facility Providers undertaking Triage Activities.
Triage	means the diagnosis, upgrading or resetting of a Device.
Triage Activities	means any Triage-related activity carried out in circumstances where the SSC Guidance for Device Security Assurance and Triage requires independent assurance, including in such circumstances: a) the breach of the tamper-protection boundary; b) any unlocking of internal non-operational ports; c) any changes to the configuration of the Device Data; d) confirmation of the firmware version on the Device when Triage has been completed; and e) completion of Triage by replacing all internal non-operational port

	seals required pursuant to the CPA Security Characteristics and all tamper-protection boundary seals.
Triage Facility	means a premises where Triage Activities are undertaken.
Triage Facility Provider	means a Party which operates a Triage Facility for the purpose of carrying out Triage Activities.
Triage System Interface	means a secure virtual private network, encrypted link provided by a Manufacturer in order to connect its Triage System to a Triage Tool at a Triage Facility, which provides confidentiality and integrity of communications. The Triage System Interface: • Must use either TLS or IPsec, and • If using TLS then must include client authentication.
Triage System	means a secure IT system established for the purposes of Triage and operated by a Manufacturer, as part of its Device manufacturing capability, which the Triage Facility Provider connects to using the Triage Tool and Triage System Interface, and which is compliant with the requirements of the NCSC Commercial Product Assurance (CPA) Scheme and the associated CPA Security Characteristics.
Triage Tool	means an electronic device provided by a Manufacturer, which is used to Triage Devices in accordance with SSC Guidance for Device Security Assurance and Triage, and which is cryptographically authorised such that it can only be used for Triage Activities and cannot be given additional capabilities by an operator in a Triage Facility.

Contents

H DCC SERVICES

H1. USER ENTRY PROCESS

Eligibility Generally

H1.1 Many of the Services described in this Section H are described as being available only to Users. A Party is not entitled to receive those Services until that Party has become a User by completing the User Entry Process.

H1.2 Only persons that are Parties are eligible to complete the User Entry Process and to become Users.

User Role Eligibility

H1.3 The Services provided over the DCC User Interface are available only to Users within certain User Roles. A Party wishing to act as a User in one or more User Roles must first complete the User Entry Process for that User Role.

User IDs

H1.4 When accessing Services a User must operate in a particular User Role using the applicable User ID.

H1.5 A Party wishing to act as a User in one or more User Roles shall propose to the DCC one or more identification numbers, issued to it by the Panel, to be used by that Party when acting in each such User Role. Each such identification number must be EUI-64 Compliant, and the same identification number cannot be used for more than one User Role, save that a Party may use the same identification number when acting in any combination of some or all of the following User Roles 'Import Supplier', 'Export Supplier' and 'Gas Supplier'.

H1.6 The DCC shall accept each identification number proposed by each Party in respect of each of its User Roles (and record such numbers as identifying, and use such numbers to identify, such Party in such User Role); provided that the DCC shall only accept the proposed number if it has been issued by the Panel, and if (at the time of the Party's proposal) the Party:

(a) holds for the User Role of ‘Import Supplier’ or ‘Export Supplier’, an Electricity Supply Licence;

(b) holds for the User Role of ‘Gas Supplier’, a Gas Supply Licence;

(c) holds for the User Role of ‘Electricity Distributor’, an Electricity Distribution Licence;

(d) holds for the User Role of ‘Gas Transporter’, a Gas Transportation Licence; and

(e) is for the User Role of 'Registered Supplier Agent', identified in the Registration Data as a Meter Operator or a Meter Asset Manager for at least one MPAN or MPRN.

H1.7 A Party may from time to time replace or withdraw its User ID for each of its User Roles on notice to the DCC; provided that any such replacement shall be subject to acceptance by the DCC in accordance with Section H1.6.

User Entry Guide

H1.8 The Code Administrator shall establish and publish on the Website a guide to the User Entry Process. Such guide shall:

(a) identify the persons that a Party is required to contact to commence the steps required pursuant to the User Entry Process for each User Role; and

(b) include a recommendation that each Party undertakes a privacy impact assessment:

(i) in accordance with the Information Commissioner’s guidance concerning the same; and

(ii) where the Party is completing the User Entry Process for the User Role of Other User, having regard to any guidance issued by the Secretary of State and/or the Authority in respect of matters relating to the Processing of Personal Data that are comprised in any Data of a type referred to in Sections I1.2 to I1.4,

but there shall be no obligation under this Code to do so.

User Entry

H1.9 Where a Party wishing to become a User in a particular User Role commences the User Entry Process, it must notify the Code Administrator that it has done so (and in respect of which User Role).

User Entry Process Requirements

H1.10 The User Entry Process for each User Role requires that the Party has:

(a) received confirmation from the DCC of its acceptance of at least one User ID for the Party and that User Role in accordance with Section H1.6;

(b) successfully completed the User Entry Process Tests for that User Role in accordance with Section H14 (Testing Services);

(c) successfully demonstrated in accordance with the procedure set out in Section G8 (User Security Assurance) that the Party meets the applicable security requirements required by that Section;

(d) (in the case only of the User Role of Other User) successfully demonstrated in accordance with the procedure set out in Section I2 (Other User Privacy Audits) that the Party meets the applicable privacy requirements required by that Section; and

(e) provided the Credit Support or additional Credit Support (if any) that the DCC requires that Party to provide, to be calculated by the DCC in accordance with Section J3 (Credit Cover) as if that Party were a User for that User Role (which calculation will include the DCC's reasonable estimates of the Charges that are likely to be incurred by that Party in that User Role in the period until the first Invoice for that Party is due to be paid by that Party in that User Role).

H1.11 A Party will have successfully completed the User Entry Process for a particular User Role once the Code Administrator has received confirmation from the body responsible for each of the requirements set out in Section H1.10 that the Party has met each and every requirement set out in Section H1.10, and once the Code Administrator has confirmed the same to the Party.

H1.12 Once a Party has successfully completed the User Entry Process for a particular User Role, the Code Administrator shall confirm the same to the DCC and the Panel. A Party who has successfully completed the User Entry Processes in one User Role shall not be considered to be a User in relation to any other User Role until it has completed the User Entry Processes in relation to such other User Role.

Disputes Regarding User Entry Process

H1.13 Where a Party wishes to raise a dispute in relation to its application to become a User, and to the extent that the dispute relates to:

(a) the matters described in Section H1.10(b), then the dispute shall be determined in accordance with the applicable dispute resolution procedure set out in Section H14 (Testing Services);

(b) the matters described in Section H1.10(c), then the dispute shall be determined in accordance with the dispute resolution procedure set out in Section G8 (User Security Assurance);

(c) the matters described in Section H1.10(d), then the dispute shall be determined in accordance with the dispute resolution procedure set out in Section I2 (Other User Privacy Audits);

(d) the matters described in Section H1.10(e), then the dispute shall be determined in accordance with Section J3.15 (Disputes); or

(e) any matters other than those referred to above, then the dispute may be referred to the Panel for determination.

H1.14 Where a Party disagrees with any decision of the Panel made pursuant to Section H1.13(e), then that Party may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

Ceasing to be a User in a User Role

H1.15 Where a User wishes to cease acting as a User in a User Role, the User shall notify the Code Administrator in writing of the date from which the User wishes to cease acting as a User in that User Role.

H1.16 Where a User notifies the Code Administrator in accordance with Section H1.15, the User shall cease to be a User in the specified User Role with effect from the date specified in such notification.

H1.17 The Code Administrator shall, as soon as reasonably practicable after receipt of a notification from a User in accordance with Section H1.15, notify the Panel and the DCC of the date from which that User will cease to be a User in the specified User Role.

H1.18 Following any notification received from the Code Administrator under Section H1.17 in respect of a User and a User Role, the DCC shall cease to treat that User as a User in that User Role; provided that the DCC shall be allowed up to 24 hours from receipt of such notification to update the DCC Systems.

H2. REGISTERED SUPPLIER AGENTS

Rights and Obligations of Registered Supplier Agents

H2.1 Registered Supplier Agents are Parties to this Code in their own right, and as such have rights and obligations as Other SEC Parties or as Users acting in the User Role of Registered Supplier Agent.

Responsibility for Registered Supplier Agents

H2.2 It is acknowledged that the following Services (as described in the DCC User Interface Services Schedule) are only available to Users acting in the User Role of Registered Supplier Agent by virtue of their appointment by the Responsible Supplier as a Meter Operator or Meter Asset Manager in respect of the relevant MPAN or MPRN:

(a) Read Device Configuration;

(b) Read Event or Security Log;

(c) Read Supply Status; and

(d) Read Firmware Version.

H2.3 Without prejudice to the rights and obligations of each Registered Supplier Agent (as described in Section H2.1), the Supplier Party described in Section H2.4 shall ensure that each Registered Supplier Agent that sends Service Requests for the Services described in Section H2.2 shall only do so for the purposes of providing services to that Supplier Party in a manner consistent with that Supplier Party's Energy Supply Licence.

H2.4 The Supplier Party referred to in Section H2.3 is, in respect of a Service relating to a Smart Metering System or Device, the Responsible Supplier for that Smart Metering System or Device.

H2.5 Nothing in this Code obliges Supplier Parties to contract with Meter Operators and/or Meter Asset Managers in order to procure from the Meter Operator and/or Meter Asset Manager services that result in the need for the Meter Operator and/or Meter Asset Manager to send Service Requests.

H2.6 Each Supplier Party shall be responsible for controlling the ability of the Registered Supplier Agent to send the Service Requests referred to in Section H2.2 in circumstances where that Supplier Party would be liable under Section H2.3.

H3. DCC USER INTERFACE

Obligation to Maintain DCC User Interfaces

H3.1 The DCC shall maintain the DCC User Interface in accordance with the DCC User Interface Specification, and make it available via DCC Gateway Connections to Users to send and receive communications in accordance with the DCC User Interface Specification and the DCC User Interface Code of Connection.

H3.2 The DCC shall ensure that the DCC User Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3).

Communications to be sent via DCC User Interface

H3.3 The DCC and each User shall use the DCC User Interface for the following communications:

(a) Service Requests from a User to the DCC;

(b) Signed Pre-Commands from a User to the DCC;

(c) Acknowledgements from the DCC to a User;

(d) Pre-Commands from the DCC to a User;

(e) Service Responses from the DCC to a User;

(f) Device Alerts and DCC Alerts from the DCC to a User;

(g) Commands from the DCC to the User pursuant to the Local Command Services; or

(h) any other communications expressly required in this Code to be sent via the DCC User Interface.

H3.4 The communications required to be sent via the DCC User Interface under Section H3.3 shall only be validly sent for the purposes of this Code if sent in accordance with this Section H3, Section H4 (Processing Service Requests) and the DCC User Interface Specification.

H3.5 No Party may use the DCC User Interface for any purpose other than to meet the requirements of Section H3.3. Only the DCC and Users may use the DCC User Interface.

Eligibility for Services Over the DCC User Interface

H3.6 A User shall not send a Service Request in respect of a Smart Metering System (or a Device forming, or to form, part of a Smart Metering System) unless it is an Eligible User for that Service and Smart Metering System (save that a User may send a Service Request in circumstances where it is not an Eligible User in order to rectify errors, as further described in the Service Request Processing Document).

H3.7 Whether or not a User is an Eligible User for the following Services is determined as follows:

(a) for Enrolment Services, Core Communication Services and Local Command Services, the entitlement is described in Section H3.8; or

(b) for Elective Communication Services, the entitlement is described in the relevant Bilateral Agreement.

H3.8 Subject to Sections H3.9 to H3.10B (inclusive), the following Users are entitled to receive the following Services in respect of a Smart Metering System (or a Device forming, or to form, part of that Smart Metering System):

(a) the Import Supplier for that Smart Metering System is entitled to those Services described in the DCC User Interface Services Schedule as being available to the ‘Import Supplier’;

(b) the Export Supplier for that Smart Metering System is entitled to those Services described in the DCC User Interface Services Schedule as being available to the ‘Export Supplier’;

(c) the Gas Supplier for that Smart Metering System is entitled to those Services described in the DCC User Interface Services Schedule as being available to the ‘Gas Supplier’;

(d) the Electricity Distributor for that Smart Metering System is entitled to those Services described in the DCC User Interface Services Schedule as being available to the ‘Electricity Distributor’;

(e) the Gas Transporter for that Smart Metering System is entitled to those Services described in the DCC User Interface Services Schedule as being available to the ‘Gas Transporter’;

(f) the Registered Supplier Agent for that Smart Metering System is entitled to those Services described in the DCC User Interface Services Schedule as being available to the ‘Registered Supplier Agent’;

(g) any User acting in the User Role of Other User is entitled to those Services described in the DCC User Interface Services Schedule as being available to an ‘Other User’; and

(h) in respect of certain Services (where specified in the DCC User Interface Services Schedule) and where an electricity Smart Metering System and a gas Smart Metering System share a Communications Hub Function, the Import Supplier is entitled to those Services in respect of the gas Smart Metering System.

H3.9 Subject to Sections H3.10 and H3.10A, a User's eligibility for a Service in respect of a Smart Metering System (or a Device forming, or to form, part of that Smart Metering System) is also dependent upon the status of that Smart Metering System (or such a Device), such that:

(a) the Responsible Supplier may send Service Requests in respect of Devices that have an SMI Status of 'pending', 'whitelisted', 'installed not commissioned', 'commissioned', or 'suspended';

(b) Users that are not the Responsible Supplier may only send Service Requests in respect of Devices that have an SMI Status of 'installed not commissioned' or 'commissioned'; and

(c) Communication Services are not available in respect of a Smart Metering System until it has been Enrolled.

H3.10 Certain Services are available on the basis of Eligible User Role (rather than a User's status as an Eligible User in respect of a particular Smart Metering System or Device). In respect of these Services, references in the DCC User Interface Services Schedule to 'Electricity Import Supplier', 'Electricity Export Supplier', 'Gas Import Supplier', 'Electricity Network Operator', 'Gas Network Operator', 'Registered Supplier Agent' and 'Other Users' are to the corresponding User Roles. The Services in question are those described in the DCC User Interface Services Schedule as:

(a) 'Request WAN Matrix';

(b) 'Device Pre-notifications';

(c) 'Read Inventory';

(d) 'Communications Hub Status Update - Install Success';

(e) 'Communications Hub Status Update - Install No SM WAN';

(f) 'Communications Hub Status Update - Fault Return'; and

(g) 'Communications Hub Status Update - No Fault Return'.

H3.10A Certain Services (or certain functionality in respect of certain Services) may be identified in the DCC User Interface Services Schedule as not being available in respect of SMETS1 Devices in general or in relation to particular SMETS1 Device Models. Where this is the case, Users are not Eligible Users for the Services (or affected functionality) that are identified as being unavailable in such circumstances.

H3.10B A Party can, to the extent permitted under the Common Test Scenarios Document, complete User Entry Process Testing for a User Role (and consequently become an Eligible User for that User Role) without successfully completing testing for all the Service Requests potentially available to a User in that User Role. However, such a User will only be an Eligible User for those Service Requests in respect of which it has successfully completed testing (and not those which it has not).

Categories of Service

H3.11 Enrolment Services, Local Command Services and Core Communication Services fall into the following categories (and corresponding categories may be established in respect of Elective Communication Services under Bilateral Agreements):

(a) Services identified in the DCC User Interface Services Schedule to be available as 'on-demand' services, and which a User requests on such basis ("On-Demand Services");

(b) Services identified in the DCC User Interface Services Schedule to be available as 'future-dated' services, and which a User requests on such basis specifying the relevant time and date for execution ("Future-Dated Services"); and

(c) Services identified in the DCC User Interface Services Schedule to be available as 'scheduled' services, and which a User requests on such basis specifying the initial time and date for execution as well as the frequency at which execution is to recur ("Scheduled Services").

H3.12 The DCC shall only accept a Service Request for a Future-Dated Service or a Scheduled Service that has an execution date that is later than the time on the date at which the Service Request is received by the DCC. No User may request a Future- Dated Service that has an execution date of more than 30 days after the date on which the Service Request is sent to the DCC.

Sequenced Services

H3.13 An On-Demand Service or a Future-Dated Service may also be requested on the basis that it is only to be provided following the successful execution of a specified Service Request ("**Sequenced Services**").

Target Response Times

H3.14 The DCC shall (subject to Section H3.15) undertake the following activities within the following time periods (each such time period being, in respect of each such activity, the "**Target Response Time**" for that activity, subject to Section H3.15):

(a) Transforming Critical Service Requests into Pre-Commands and sending to the relevant User, within 3 seconds from receipt of the Service Request;

(b) sending a User a Service Response in respect of a Non-Critical Service Request for an On-Demand Service that is not a Sequenced Service, within the applicable time period set out in the DCC User Interface Services Schedule measured from receipt of the Service Request from the User;

(c) sending a User a Service Response in respect of a Critical Service Request for an On-Demand Service that is not a Sequenced Service, within the applicable time period set out in the DCC User Interface Services Schedule measured from receipt of the Signed Pre-Command from the User;

(d) sending a User a Service Response in respect of a Service Request for an On- Demand Service that is a Sequenced Service, within the applicable time period set out in the DCC User Interface Services Schedule measured from the receipt by the DCC of the Service Response for the Service Request upon which the Sequenced Service is dependent;

(e) sending a User a Service Response in respect of a Service Request for a Future- Dated Service that is not a Sequenced Service or for a Scheduled Service, within the applicable time period set out in the DCC User Interface Services Schedule measured from the time and date for execution specified in the Service Request;

(f) sending a User a Service Response in respect of a Service Request for a Future- Dated Service that is a Sequenced Service, within the applicable time period set out in the DCC User Interface Services

Schedule measured from the receipt by the DCC of the Service Response for the Service Request upon which the Sequenced Service is dependent;

(g) (except for the Alerts referred to in (h), (i) and (j) below, and except for any Alerts consolidated in accordance with the Alert Management Mechanism) sending a User an Alert, within 60 seconds measured from the Alert being communicated to (Device Alerts) or generated by (Non-Device Alerts) the Communications Hub Function;

(h) for the Services Request 'Update Device Configuration (Billing Calendar)', in addition to the above response times applicable to the Service Response confirming the configuration, periodic Alerts will be generated as a result of such configuration, for which the response time for sending the Alert to the User shall be within 24 hours from the relevant data having been communicated to the Communications Hub Function;

(i) for the Alert 'Power Outage Event (AD1)', in relation to a CSP System either predominantly based on second or third generation cellular technology or predominantly based on long-range radio technology as the SM WAN for the purposes of communicating with a particular Communications Hub, sending a User an Alert within the time as stated within the Power Outage & Restoration Alerts Delivery Management Document, measured from the time that the Alert is generated by the Communications Hub Function; and

(j) for the Alerts 'Supply Outage Restored (0x8F35)' and 'Supply Outage Restored – Outage >= 3 minutes (0x8F36)' in relation to a CSP System either predominantly based on second or third generation cellular technology or predominantly based on long-range radio technology as the SM WAN for the purposes of communicating with a particular Communications Hub, sending a User an Alert within the time as stated within the Power Outage & Restoration Alerts Delivery Management Document, measured from the time that an Alert is generated by the Electricity Smart Meter.

H3.14A For clarity, where the DCC uses a CSP System other than a CSP System predominantly based on second or third generation cellular technology or predominantly based on long-range radio technology as the SM WAN for the purposes of communicating with a Communications Hub, then Section H3.14(i) and Section H3.14(j) shall not apply and all Alerts will be subject to Section H3.14(g).

H3.14B For the Alerts which are subject to Section H3.14(i) or H3.14(j), the Target Response Times, the methodology for reviewing and determining these times, and any exclusions that shall be applied in determining whether these times have been met shall be set out in the Power Outage & Restoration Alerts Delivery Management Document. The Power Outage & Restoration Alerts Delivery Management Document shall be reviewed at least annually by the DCC in consultation with the Parties. Any changes to the Power Outage & Restoration Alerts Delivery Management Document shall be prepared and consulted upon by the DCC and approved by the Panel. Following each review of the document and its approval by the Panel, the new Target Response Times for the forthcoming year will be established and applied using the updated methodology. In preparing and consulting on any changes to the document, the DCC shall seek and pay particular attention to views given by Electricity Network Parties.

H3.15 The Target Response Times set out in Section H3.14 shall not apply to activities in respect of SMETS1 Devices, and the Target Response Times for activities in respect of SMETS1 Devices shall instead be determined in accordance with the DCC User Interface Services Schedule. For the purposes of Section H3.14 and activities in respect of SMETS2+ Devices:

(a) the concepts of 'sending' and 'receipt' are to be interpreted in accordance with the explanation of those concepts in the DCC User Interface Specification;

(b) any time during which an anomalous communication is quarantined by the DCC in accordance with Section H4 (Processing Service Requests) shall be disregarded for the purpose of measuring Response Times; and

(c) the time taken by the Communications Hub Function in communicating with the other Devices forming part of a Smart Metering System shall be disregarded.

Inherent Restrictions Linked to Technical Specifications

H3.16 The Services set out in the DCC User Interface Services Schedule are available only insofar as the minimum functionality of Devices as described in the Technical Specifications (or, to the extent required to support that minimum functionality, the GB Companion Specification or SMETS1 Supporting Requirements) allows for such Services. Any Services required in respect of additional functionality of Devices should be requested as Elective Communication Services. This Section H3.16 does not apply in respect of Services to which Non-Device Service Requests apply.

Change of Tenancy

H3.17 As soon as reasonably practicable after a Responsible Supplier for an Enrolled Smart Metering System relating to a premises becomes aware of a change of occupancy at that premises, that Responsible Supplier shall send a 'Restrict Access for Change of Tenancy' Service Request to the DCC in relation to the Smart Meter and any Gas Proxy Function forming part of that Smart Metering System (except where the out- going Energy Consumer has indicated that they wish historic information on the Smart Metering System to remain available to be viewed).

Cancellation of Future-Dated and Scheduled Services

H3.18 As soon as reasonably practicable after receipt by the DCC of a Service Response from a Smart Metering System in respect of a 'Restrict Access for Change of Tenancy' Service Request, the DCC shall cancel any and all Service Requests for Future-Dated Services or Scheduled Services in respect of any Device forming part of that Smart Metering System for which the Command has not yet been sent and which are being processed on behalf of an Other User (and shall notify the relevant User of such cancellation via the DCC User Interface).

H3.19 [Not used]

H3.20 The DCC shall cancel any and all Service Requests for Future-Dated Services or Scheduled Services for which the Command has not yet been sent and which are due to be undertaken in respect of a Device after the Decommissioning or Suspension of that Device (and shall notify the relevant User of such cancellation via the DCC User Interface).

Managing Demand for DCC User Interface Services

H3.21 During the months of January, April, July and October, by the 15th Working Day of the month, the DCC shall provide to the Panel and all Users the DCC's forecast of the number of Service Requests that all Users will (collectively) send in each of the 6 months following the end of the month in which such forecast is provided. Such forecast shall contain a breakdown of the total number of Service Requests by reference to each Service Reference Variant listed in the DCC User Interface Services Schedule; provided that for Service Reference Variant 11.1 (Update Firmware), the forecast must predict the aggregate number of Device upgrade requests that will be specified in the Service Requests (rather than the number of Service Requests). Each such forecast must specify the DCC's estimate of the number of Smart Meter installations and Enrolments which all Users will (collectively) undertake during each relevant month (recognising that such installations and Enrolments drive Service Request volumes).

H3.22 The DCC shall produce, periodically review and update, and apply a methodology (including applicable assumptions) for creating the DCC's forecasts under Section H3.21. The DCC shall share such methodology (and updates) with the Panel and Users, and the DCC shall take into account any comments on such methodology received from the Panel and Users. In producing its forecasts under Section H3.21, the DCC shall take into account any and all information provided by Users under Section H3.25.

H3.23 The DCC shall monitor and record the aggregate number of Service Requests sent by each User in total, and also the aggregate number of Service Requests sent by each User in respect of each Service Reference Variant listed in the DCC User Interface Services Schedule. In addition, for Service Reference Variant 11.1 (Update Firmware), the DCC shall monitor and record the aggregate number of Device upgrade requests specified in Service Requests.

H3.24 During the months of February, May, August and November, by no later than the 10th Working Day of the month, the DCC shall provide to the Panel and all Users a report which sets out:

(a) the aggregate number of Service Requests sent by all Users (collectively) during each of the previous 3 months (in total and broken down by reference to each Service Reference Variant listed in the DCC User Interface Services Schedule, and by number of Device upgrade requests for Service Reference Variant 11.1 (Update Firmware)), and comparing the actual numbers sent against the numbers most recently forecast for the applicable month;

(b) the DCC's assessment as to the cause of any significant deviation (taking into account any directions of the Panel concerning significance) between the DCC's forecasts and the actual numbers under paragraph (a) above, and the DCC's proposed corrective action; and

(c) the current value (calculated at the end of each of the previous three months) for every Monthly Service Metric (measured across all Users collectively) and a comparison of the current value against the relevant Monthly Service Threshold.

H3.25 Each User has the option (but no obligation) to review the (collective) forecasts and reports on actuals produced by the DCC under Sections H3.21 and H3.24. Each User has the option (but no obligation) to notify the DCC where the User disagrees with the DCC's forecast (recognising that the forecasts relate to Users collectively, and each User will only be aware of matters relating to itself), including where the User is aware of expected changes to one or more of the following (each of which will apply by reference to any threshold or other guidelines approved by the Panel from time to time):

(a) the User's daily/monthly distribution or volume of Service Requests;

(b) the User's monthly Smart Meter installation capacity;

(c) firmware releases for the User's Devices; and/or

(d) tariff updates for the User's customers.

H3.26 The Panel shall maintain and publish a list of priority Service Requests (if any) in respect of which the DCC must focus its efforts in achieving forecasting accuracy under Section H3.21. A Service Request shall only be added or removed from the list on the application of one or more Users or the DCC, and where the Panel considers the addition or removal to be reasonable in circumstances. The Panel shall publish the list from time to time on the Website, and shall give the DCC and each User advance notice of any changes to the list.

H3.27 The DCC shall, on or around each anniversary of the date on which it first started providing Services over the DCC User Interface, review (and report to the Panel on) each Monthly Service Metric and associated Monthly Service Threshold to establish whether they are still an appropriate mechanism to illustrate User behaviour that may utilise a significant element of the capacity requirements of the Services.

H3.28 The DCC shall not be considered to be in breach of this Code with regard to the obligation to achieve Target Response Times if, for the month in question:

(a) the aggregate Service Requests sent by all Users exceeds 110% of the aggregate demand most recently forecast by the DCC for that month for all Users pursuant to Section H3.21;

(b) the DCC can demonstrate to the Panel's reasonable satisfaction that the DCC did not receive comments or other information (including revisions to Anomaly Detection Thresholds) from Users which should reasonably have led the DCC to change its forecasts; and

(c) provided that the DCC shall nevertheless in such circumstances take reasonable steps to achieve the Target Response Times.

H4. PROCESSING SERVICE REQUESTS

Introduction

H4.1 The request by Users, and the provision by the DCC, of certain Services is achieved by means of the sending of communications in accordance with Section H3.3 (Communications to be Sent via the DCC User Interface) and this Section H4. The Services in question are:

(a) Enrolment Services;

(b) Local Command Services;

(c) Core Communication Services; and

(d) Elective Communication Services.

Processing Obligations

H4.2 Each User and the DCC shall each comply with the applicable obligations set out in the Service Request Processing Document concerning the secure processing of the communications required to be sent via the DCC User Interface.

DCC IDs

H4.3 The DCC shall obtain and use EUI-64 Compliant identification numbers for the purposes of its communications under this Code. Where it is expedient to do so, the DCC may use different identification numbers to identify different DCC roles.

H4.4 The DCC shall:

(a) where Section G (Security) requires it to Separate one part of the DCC Systems from another part of the DCC Systems, use different identification numbers for the purposes of its communications from each such part of the DCC Systems; and

(b) use different identification numbers for the purposes of becoming a Subscriber for different Organisation Certificates or OCA Certificates with different Remote Party Role Codes.

H5. SMART METERING INVENTORY AND ENROLMENT SERVICES

Overview of Enrolment

H5.1 Enrolment of a Smart Metering System occurs:

(a) in the case of electricity, on the Commissioning of the Electricity Smart Meter forming part of that Smart Metering System; or

(b) in the case of gas, on the Commissioning of both the Gas Smart Meter and the Gas Proxy Function forming part of that Smart Metering System.

H5.2 No Device that is to form part of a Smart Metering System (other than the Communications Hub Function) can be Commissioned before the Communications Hub Function that is to form part of that Smart Metering System has been Commissioned.

H5.3 No Device can be Commissioned:

(a) unless it is listed on the Smart Metering Inventory; and

(b) other than for Type 2 Devices, if it is listed with an SMI Status of 'decommissioned'.

Statement of Service Exemptions

H5.4 In accordance with Condition 17 of the DCC Licence (and notwithstanding any other provision of this Section H5), the DCC is not obliged to Commission Communications Hub Functions (or therefore to Enrol Smart Metering Systems) where it is exempted from the requirement to do so in accordance with a Statement of Service Exemptions.

Smart Metering Inventory

H5.5 The DCC shall establish and maintain the Smart Metering Inventory in accordance with the Inventory, Enrolment and Decommissioning Procedures.

H5.6 Each User and the DCC shall each comply with the applicable obligations set out in the Inventory, Enrolment and Decommissioning Procedures, which must include obligations concerning:

(a) the addition and removal of Devices to and from the Smart Metering Inventory; and

(b) changes to the SMI Status of the Devices recorded on the Smart Metering Inventory from time to time.

Enrolment of Smart Metering Systems

H5.7 Each User and the DCC shall each comply with the applicable obligations set out in the Inventory, Enrolment and Decommissioning Procedures Document, which must include obligations concerning:

(a) steps to be taken before a Device that is listed on the Smart Metering Inventory is installed and/or Commissioned at a premises;

(b) steps to be taken in order to Commission such a Device;

(c) steps to be taken following the Commissioning of such a Device; and

(d) steps to be taken on the removal and/or replacement of any Device forming part of a Smart Metering System.

SMETS1

H5.8 A SMETS1 Smart Metering System is eligible to be Enrolled when the combination of SMETS1 Devices of which it is comprised form all or part of a SMETS1 Installation for which all the Devices are of Device Models which either:

(a) comprise a combination of Device Models listed on the SMETS1 Eligible Product Combinations; or

(b) could as a result of the application of an existing firmware upgrade or upgrades become a combination of Device Models listed on the SMETS1 Eligible Product Combinations.

H5.9 The DCC shall only be required to Enrol SMETS1 Smart Metering Systems, or process Service Requests in respect of SMETS1 Smart Metering Systems, that comprise a combination of Device Models that is listed on the SMETS1 Eligible Product Combinations or that contain a Non-EPCL Device Model.

H5.10 The Inventory, Enrolment and Decommissioning Procedures Document may also set out circumstances in which the Panel may direct the DCC not to Commission a SMETS1 Device (or purported SMETS1 Device).

H6. DECOMMISSIONING AND SUSPENSION OF DEVICES

Decommissioning

H6.1 Where a Device other than a Type 2 Device is no longer to form part of a Smart Metering System, then that Device should be Decommissioned. A Device may be Decommissioned because it has been uninstalled and/or is no longer operating (whether or not it has been replaced, and including where the Device has been lost, stolen or destroyed).

H6.2 Only the Responsible Supplier(s) for a Communications Hub Function, Smart Meter, Gas Proxy Function, Standalone Auxiliary Proportional Controller or Type 1 Device may Decommission such a Device; provided that only the Lead Supplier may Decommission a SMETS1 CHF.

H6.3 Where a Responsible Supplier (or, in the case of a SMETS1 CHF, the Lead Supplier) becomes aware that a Device has been uninstalled and/or is no longer operating, that User shall send a Service Request requesting that it is Decommissioned.

H6.4 On successful processing of a Service Request from a User in accordance with Section H6.3, the DCC shall:

(a) set the SMI Status of the Device to ‘decommissioned’;

(b) where relevant, amend the Smart Metering Inventory so that the Device is no longer Associated with any other Devices; and

(c) where the Device in question is a Communications Hub Function, notify any and all Responsible Suppliers (other than the Responsible Supplier that procured such Decommissioning) for that Communications Hub Function of such Decommissioning.

H6.5 Where the DCC receives a Service Request from a User that does not satisfy the requirements of Section H6.2, the DCC shall reject the Service Request.

H6.6 On the Decommissioning of a Communications Hub Function, the other Devices forming part of a Smart Metering System should also be Decommissioned; provided that the Devices forming part of a Smart Metering System (other than the Gas Proxy Function) may remain Commissioned notwithstanding the Decommissioning of the Communications Hub Function if a replacement Communications Hub Function is Commissioned within a reasonable period.

H6.7 [Not used]

H6.8 [Not used]

H6.9 [Not used]

Suspension

H6.10 Where a Device’s Device Model is removed from the Central Products List, that Device shall be Suspended and the DCC shall set the SMI Status of the Device to ‘suspended’.

H6.11 Where a Communications Hub Device Model is removed from the Central Products List, both the Communications Hub Function and the Gas Proxy Function shall be deemed to be Suspended (and Section H6.10 shall apply accordingly).

Ancillary Obligations

H6.12 Each User and the DCC shall each comply with the obligations set out in the Inventory, Enrolment and Decommissioning Procedures concerning Decommissioning and Suspension of Devices (and the Smart Metering Systems of which such Devices form part), including (where applicable) notifying other Users of such Decommissioning and Suspension.

H7. ELECTIVE COMMUNICATION SERVICES

Eligible Smart Metering Systems

H7.1 Elective Communication Services can only be provided in respect of Smart Metering Systems that have been Enrolled.

Entitlement to Elective Communication Services

H7.2 Only a User is entitled to receive Elective Communication Services. A Party that is not a User is not entitled to receive Elective Communication Services.

H7.3 A User shall not be entitled to request or receive (and the DCC shall not provide to such User) any Elective Communication Services that would constitute a Restricted Communication Service.

Preliminary Assessment of Elective Communication Services

H7.4 Notwithstanding Section H7.1 and H7.2, any Party may request an initial evaluation of the technical feasibility and likely Charges for a proposed Elective Communication Service (a "**Preliminary Assessment**").

H7.5 Requests for a Preliminary Assessment shall be made in such format as the DCC may specify from time to time, and shall be submitted to the DCC.

H7.6 The DCC shall respond to requests for a Preliminary Assessment in accordance with the time period prescribed by Condition 17 of the DCC Licence, and shall either (in accordance with Condition 17 of the DCC Licence):

(a) provide an initial evaluation of the technical feasibility and the likely Charges for a proposed Elective Communication Service; or

(b) give notice that a further and more detailed evaluation of the request is required.

Detailed Evaluation of Elective Communication Services

H7.7 Any Party that has requested a Preliminary Assessment and obtained a response as described in Section H7.6(b) may request a more detailed evaluation of the technical feasibility and likely Charges for a proposed Elective Communication Service (a "**Detailed Evaluation**").

H7.8 Requests for a Detailed Evaluation shall be made in such format as the DCC may specify from time to time, and shall be submitted to the DCC. Following receipt of any such request (or purported request), the DCC shall:

(a) where the request is incomplete or the DCC reasonably requires further information in order to assess the request, notify the Party that this is the case and provide reasonable assistance to the Party in re-submitting its request;

(b) once the DCC has received all the information it reasonably requires in order to assess the request, confirm the applicable Charges payable in respect of the Detailed Evaluation; and

(c) once the Party has agreed to pay the applicable Charges, provide the Detailed Evaluation to the requesting Party (in accordance with the time period prescribed by Condition 17 of the DCC Licence).

Request for an Offer for an Elective Communication Service

H7.9 Any Party that has requested a Preliminary Assessment in respect of a proposed Elective Communication Service, and obtained a response as described in Section H7.6(a), may request a formal offer for that proposed Elective Communication Service.

H7.10 Any Party that has requested and obtained a Detailed Evaluation in respect of a proposed Elective Communication Service may request a formal offer for that proposed Elective Communication Service.

H7.11 Following a request pursuant to Section H7.9 or H7.10, the DCC shall (in accordance with the time period prescribed by Condition 17 of the DCC Licence):

(a) make an offer to provide the Elective Communication Service in question; or

(b) notify the Party that the DCC is not willing to make such an offer (provided that the DCC may only do so where the DCC is not obliged to make such an offer in accordance with Condition 17 of the DCC Licence).

Formal Offer

H7.12 An offer to provide the Elective Communication Service made by the DCC pursuant to this Section H7 shall:

(a) include details of the Charges that would apply to the Elective Communication Service, as determined in accordance with the Charging Methodology;

(b) where the proposed Charges have been calculated (in accordance with the Charging Methodology) on the assumption that one or more other Parties accept offers made pursuant to this Section H7, provide for two alternative sets of Charges, one of which is contingent on acceptance of all the other such offers and one of which is not; and

(c) include an offer by the DCC to enter into a Bilateral Agreement with the Party requesting the Elective Communication Service.

H7.13 Each Bilateral Agreement must:

(a) be based on the Specimen Bilateral Agreement, subject only to such variations from such specimen form as are reasonable in the circumstances;

(b) not contradict or seek to override any or all of this Section H or Sections G (Security), I (Data Privacy), J (Charges), L (Smart Metering Key Infrastructure) or M (General);

(c) where reasonably necessary in accordance with the Charging Methodology, provide for Charges that include or comprise a standing charge that is payable by the recipient of the Elective Communication Service regardless of whether or not the Elective Communication Service is requested or provided;

(d) where reasonably necessary in accordance with the Charging Methodology, require the recipient of the Elective Communication Service to pay compensation to DCC in the event of the early termination of the Bilateral Agreement (except in the case of termination as envisaged by Section H7.13(e));

(e) allow the recipient of the Elective Communication Services to terminate the Bilateral Agreement without paying compensation to the extent that such compensation is intended to recover investments made for the purposes of providing the Elective Communication Service where (and to the extent that) the DCC subsequently offers a Service listed in the DCC User Interface Services Schedule that relies upon such investments (and each Bilateral Agreement must provide for disputes regarding this provision to be subject to an initial Panel determination, but to ultimately be determined by arbitration); and

(f) where reasonably necessary, require the recipient of the Elective Communication Services to provide credit support in respect of its obligation to pay the compensation referred to in Section H7.13(d).

H7.14 The parties to each Bilateral Agreement shall ensure that the Bilateral Agreement describes the Elective Communication Services in a manner consistent with the description of the Core Communication Services in this Code, including so as to identify (to the extent appropriate) equivalents of the following concepts: Service Requests; Non-Device Service Requests; Pre-Commands; Signed Pre-Commands; Commands; Services Responses; Alerts; and Target Response Times. To the extent that an Elective Communication Service comprises equivalents of such concepts, references to such concepts in this Code shall be construed as including the equivalent concepts under each Bilateral Agreement (and the DCC and the relevant User under the Bilateral Agreement shall comply with Sections H3 (DCC User Interface) and H4 (Processing Service Requests) in respect of the same). For the purposes of each Elective Communication Service (unless the Panel otherwise determined on a User's application):

(a) the applicable Service Request shall be deemed to be a Critical Service Request, unless it results only in the sending of a Command to a Device that would arise were a Non-Critical Service Request listed in the DCC User Interface Service Schedule to be requested; and

(b) other than in the case of SMETS1 Service Requests, the applicable Service Request (and any associated Pre-Command) shall be deemed to contain Data that requires Encryption, unless it contains only Data described in the GB Companion Specification as capable of being sent without Encryption.

H7.15 Elective Communication Services shall be provided in accordance with this Code and the applicable Bilateral Agreement. In the event of any inconsistency between this Code and a Bilateral Agreement, the provisions of this Code shall prevail.

H7.16 The DCC shall not agree to any variations to a Bilateral Agreement that would cause that agreement to become inconsistent with the requirements of this Section H7.

Disputes Regarding Offers for Elective Communication Services

H7.17 Where the requirements of Condition 20 of the DCC Licence are met, a Party that has requested an offer for a proposed Elective Communication Service may refer a dispute regarding such request to the Authority for determination under and in accordance with that Condition.

Publication of Details of Elective Communication Services

H7.18 Once the DCC has commenced provision of an Elective Communication Service pursuant to a Bilateral Agreement, the DCC shall notify the Code Administrator of the date on which the provision of such service commenced (but shall not provide any details regarding such agreement to the Code Administrator).

H7.19 The DCC shall, on or around the date falling six months after it commenced provision of an Elective Communication Service pursuant to a Bilateral Agreement, provide to the Code Administrator the following details:

(a) a brief description of the Elective Communication Service;

(b) the frequency with which, and (where stated) the period during which, the Elective Communication Service is to be provided; and

(c) the Target Response Time within which the Elective Communication Service is to be provided.

H7.20 The Code Administrator shall arrange for the publication on the Website of the details provided to it pursuant to Section H7.19. The Code Administrator shall monitor and report to the Panel on whether the DCC has provided details pursuant to Section H7.18 in respect of Elective Communication Services of which the Code Administrator is notified under Section H7.18.

H7.21 Without prejudice to the DCC's obligations under Section H7.19, the existence and contents of each Bilateral Agreement shall constitute Confidential Information which the DCC is obliged to keep confidential in accordance with Section M4 (Confidentiality).

H8. SERVICE MANAGEMENT, SELF-SERVICE INTERFACE AND SERVICE DESK

General

H8.1 The DCC shall provide the Services in a manner that is consistent with:

(a) the Service Management Standards; or

(b) any other methodology for service management identified by the DCC as being more cost efficient than the Service Management Standards, and which has been approved by the Panel for such purpose.

Maintenance of the DCC Systems

H8.2 The DCC shall (insofar as is reasonably practicable) undertake Maintenance of the DCC Systems in such a way as to avoid any disruption to the provision of the Services (or any part of them).

H8.3 Without prejudice to the generality of Section H8.2, the DCC shall (unless the Panel agrees otherwise and subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers):

(a) categorise Planned Maintenance changes into Low Impact Planned Maintenance or High Impact Planned Maintenance;

(b) undertake Planned Maintenance of the DCC Systems only between 20.00 hours and 08.00 hours;

(c) limit High Impact Planned Maintenance of the DCC Systems generally to two windows which have a maximum total duration of six hours per month; and

(d) limit Low Impact Planned Maintenance of the DCC Systems generally (including of the Self-Service Interface) to six windows per month of no more than six hours each.

H8.4 At least 20 Working Days prior to the start of each month, the DCC shall make available to Parties, to Registration Data Providers and to the Panel a schedule of the Planned Maintenance for that month (subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers). Such schedule shall set out (as a minimum) the following:

(a) the proposed Maintenance activity (in reasonable detail);

(b) the parts of the Services that will be disrupted (or in respect of which there is a Material Risk of disruption) during each such Maintenance activity;

(c) the time and duration of each such Maintenance activity; and

(d) any associated risk that may subsequently affect the return of normal Services.

H8.4A Where an additional Planned Maintenance is required beyond that set out pursuant to Section H8.4, the DCC shall revise and reissue the schedule of Planned Maintenance:

(a) at least 10 Working Days in advance of any additional Low Impact Planned Maintenance; and

(b) at least 20 Working Days in advance of any additional High Impact Planned Maintenance.

H8.5 The Panel may (whether or not at the request of a Party and subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers) request that the DCC reschedules any Planned Maintenance set out in a monthly schedule provided pursuant to Section H8.4. In making any such request, the Panel shall provide the reasons for such request to the DCC in support of the request. The DCC will take all reasonable steps to accommodate any such request.

H8.6 As soon as reasonably practicable after the DCC becomes aware of any Unplanned Maintenance, the DCC shall notify the Panel, Parties and (insofar as they are likely to be affected by such Unplanned Maintenance) Registration Data Providers of such Unplanned Maintenance (and shall provide information equivalent to that provided in respect of Planned Maintenance pursuant to Section H8.4).

H8.7 During the period of any Planned Maintenance or Unplanned Maintenance, the DCC shall provide Parties and (insofar as they are likely to be affected by such maintenance) Registration Data Providers with details of its duration and the expected disruption to Services to the extent they differ from the information previously provided.

DCC Internal System Changes

H8.8 Where the DCC is proposing to make a change to DCC Internal Systems, the DCC shall:

(a) undertake an assessment of the likely impact on:

(i) Parties in respect of any potential disruption to Services; and/or

(ii) RDPs in relation to the receipt of data pursuant to Section E (Registration Data),

that may arise as a consequence of the Maintenance required to implement the contemplated change;

(b) where such assessment identifies that there is a Material Risk of disruption to Parties and/or RDPs, consult with Parties and/or RDPs (as applicable) and with the Panel regarding such risk;

(c) provide the Parties and RDPs the opportunity to be involved in any testing of the change to the DCC Internal Systems prior to its implementation; and

(d) undertake an assessment of the likely impact of the contemplated change upon the security of the DCC Total System, Smart Metering Systems, and the Systems of Parties and/or RDPs.

Release Management

H8.9 The DCC shall ensure that it plans, schedules and controls the building, testing and deployment of releases of IT updates, procedures and processes in respect of the DCC Internal Systems and/or the Parse and Correlate Software in accordance with a policy for Release Management (the "**DCC Release Management Policy**").

H8.10 The DCC shall ensure that the DCC Release Management Policy:

(a) defines the scope of the matters that are to be subject to the policy in a manner consistent with the Service Management Standards;

(b) includes a mechanism for setting priorities for different types of such matters;

(c) defines periods of change-freeze where no such matters may be implemented; and

(d) defines periods of notice to be given to Parties and RDPs prior to the implementation of such matters.

H8.11 The DCC shall make the DCC Release Management Policy available to Parties, RDPs and the Panel. The DCC shall consult with Parties, RDPs and the Panel before making any changes to the DCC Release Management Policy.

H8.12 The DCC's obligation under Section H8.11 is in addition to its obligations in respect of Planned Maintenance and changes to DCC Internal Systems to the extent that the activity in question involves Planned Maintenance or changes to DCC Internal Systems.

Self-Service Interface and Service Desk: General

H8.13 Each User shall take reasonable steps to access the information it needs, and to seek to resolve any queries it may have, via the Self-Service Interface in the first instance. A User shall only contact the Service Desk where it cannot reasonably obtain the information it needs, or resolve its query, via the Self-Service Interface.

H8.14 A Party that is not a User will be unable to access the Self-Service Interface, but may contact the Service Desk.

Self-Service Interface

H8.15 The DCC shall maintain and keep up-to-date an interface (the **Self-Service Interface**) which:

(a) complies with the specification required by the Self-Service Interface Access Control Specification and the SSI Baseline Requirements Document;

(b) is made available to Users in accordance with the Self-Service Interface Code of Connection via DCC Gateway Connections; and

(c) allows each User to access the information described in Section H8.16 as being accessible to that User (and also allows other Users to access that information to the extent permitted by the first User in accordance with the Self-Service Interface Access Control Specification).

H8.15A Any changes to the Self-Service Interface shall be processed by the DCC in accordance with the **"SSI Change Governance Process"**. Any changes to the SSI Change Governance Process shall be prepared and consulted upon by the DCC and approved by the Panel.

H8.16 The Self-Service Interface must (as a minimum) allow the following categories of User to access the following:

(a) the Smart Metering Inventory, which shall be available to all Users and capable of being searched by reference to the following (provided that there is no requirement for the DCC to provide information held on the inventory in respect of Type 2 Devices other than IHDs):

(i) the Device ID, in which case the User should be able to extract all information held in the inventory in relation to (I) that Device, (II) any other Device Associated with the first Device, (III) any Device Associated with any other such Device; and (IV) any Device with which any of the Devices in (I), (II) or (III) is Associated;

(ii) the MPAN or MPRN, in which case the User should be able to extract all information held in the inventory in relation to the Smart Meter to which that MPAN or MPRN relates, or in relation to any Device Associated with that Smart Meter or with which it is Associated;

(iii) post code and premises number or name, in which case the User should be able to extract all information held in the inventory in relation to the Smart Meters for the MPAN(s) and/or MPRN linked to that postcode and premises number or name, or in relation to any Device Associated with those Smart Meters or with which they are Associated; and

(iv) the UPRN (where this has been provided as part of the Registration Data), in which case the User should be able to extract all information held in the inventory in relation to the Smart Meters for the MPAN(s) and/or MPRN linked by that UPRN, or in relation to any Device Associated with those Smart Meters or with which they are Associated;

(b) a record of the Service Requests, Signed Pre-Commands, Acknowledgements, Pre-Commands, Service Responses and Alerts sent in respect of each Smart Metering System (during a period of no less than three months prior to any date on which that record is accessed), which shall be available only to the Responsible Supplier for that Smart Metering System and to the Gas Transporter or Electricity Distributor (as applicable) for that Smart Metering System;

(c) a record, which (subject to the restriction in Section I1.4 (User Obligations)) shall be available to all Users:

(i) of all 'Read Profile Data' and 'Retrieve Daily Consumption Log' Service Requests in relation to each Smart Meter (or Device Associated with it) that were sent by any User during a period of no less than three months prior to any date on which that record is accessed; and

(ii) including, in relation to each such Service Request, a record of the type of the Service Request, whether it was successfully processed, the time and date that it was sent to the DCC, and the identity of the User which sent it;

(d) the Incident Management Log, for which the ability of Users to view and/or amend data shall be as described in Section H9.4 (Incident Management Log);

(e) the CH Order Management System, which shall be available to all Users;

(f) any and all information in respect of the SMETS1 SM WAN as the DCC is required to make available under the Self-Service Interface Access Control Specification and the SSI Baseline Requirements Document, which shall be made available to all Users; and the following information in respect of the SMETS2+ SM WAN, which shall be available to all Users (and which shall be capable of interrogation by post code and postal outcode):

(i) whether a Communications Hub Function installed in a premises at any given location:
(A) is expected to be able to connect to the SM WAN;
(B) is expected to be able to connect to the SM WAN from a particular date, in which case the date shall be specified; or
(C) cannot be confirmed as being able to connect to the SM WAN;

(ii) any known issues giving rise to poor connectivity at any given location (and any information regarding their likely resolution); and

(iii) any requirement to use a particular WAN Variant (and, where applicable, in combination with any particular Communications Hub Auxiliary Equipment) for any given location in order that the Communications Hub will be able to establish a connection to the SM WAN;

(g) additional information made available by the DCC to assist with the use of the Services and diagnosis of problems, such as service status (including information in respect of Planned Maintenance and Unplanned Maintenance) and frequently asked questions (and the responses to such questions), which shall be available to all Users; and

(h) anything else expressly required by a provision of this Code.

H8.17 Without prejudice to the requirements of Sections H8.16(b) and (c), to the extent that the Self-Service Interface does not allow a User to access a record of the information referred to in those Sections in respect of the preceding 7 years, then:

(a) subject (in the case of the information referred to in Section H8.16 (c)) to the restriction in Section I1.4 (User Obligations), that User shall be entitled to request such information from the DCC; and

(b) the DCC shall provide such information to that User as soon as reasonably practicable following such request.

H8.18 The DCC shall ensure that the Self-Service Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3).

Service Desk

H8.19 The DCC shall ensure that a team of its representatives (the **Service Desk**) is available to be contacted as follows:

(a) the Service Desk shall be contactable via the following means (to be used by Parties and Registration Data Providers, to the extent available to them, in the following order of preference, save as otherwise provided for in the Incident Management Policy):

(i) the Self-Service Interface;

(ii) a dedicated email address published on the DCC Website; and

(iii) a dedicated telephone number published on the DCC Website;

(b) the Service Desk can be used by Parties to seek resolution of queries relating to the Services (provided that Users shall seek resolution via the Self-Service Interface in the first instance); and

(c) the Service Desk can be used by Incident Parties that are not Users to raise Incidents (or by Users, where the Incident Management Log is not available via the Self-Service Interface, to raise or provide information in respect of Incidents), which the DCC shall then reflect in the Incident Management Log.

H8.20 The DCC shall ensure that the Service Desk is available at all times, and shall provide alternative arrangements (a different telephone number and email address) where the usual Service Desk in not available. Where a different telephone number and email address is to be used, the DCC shall publish details of the alternative number and address at least 20 Working Days in advance.

H9. INCIDENT MANAGEMENT

Incident Management Policy

H9.1 The Incident Management Policy must (as a minimum) make provision for the following matters:

(a) raising an Incident by recording it in the Incident Management Log;

(b) categorisation of Incidents into 5 categories of severity ("**Incident Category 1, 2, 3, 4 and 5**" respectively, such that Incident Category 1 is the most severe and Incident Category 5 the least);

(c) prioritisation of Incidents, and (in those cases where the DCC is responsible for resolving an Incident) the time period within which an Incident in each Incident Category should be resolved (the "**Target Resolution Time**");

(d) prioritising and timescale for closure of Problems;

(e) allocation of responsibility for Incidents and Problems in accordance with Section H9.2;

(f) identification of other interested persons who are to be kept informed regarding Incidents;

(g) courses of action to be undertaken in seeking to resolve Incidents and close Problems, including the need to update the Incident Management Log to record activity carried out (or planned to be carried out);

(h) rules for the escalation of Incidents;

(i) rules for the declaration of a Major Incident, and for the appointment of managers to coordinate resolution of Major Incidents;

(j) rules for the closure of a resolved Incident;

(k) rules for opening and closing Problem records by the DCC;

(l) rules for reopening closed Incidents; and

(m) describe the roles and responsibilities of the following persons in respect of different types of Incident: Users, Eligible Subscribers, DCC Gateway Parties and Registration Data Providers (such persons being the "Incident Parties").

Incident and Problem Management Responsibility

H9.2 The Incident Management Policy must allocate responsibility for resolution of Incidents and closure of Problems in accordance with the following principles:

(a) where an Incident Party becomes aware of an Incident that is not yet logged on the Incident Management Log (or, if logged, is incorrectly logged as closed), and:

(i) where such Incident is reasonably capable of being resolved via the Self- Service Interface or via a Service Request which that Incident Party has the right to send, that Incident Party shall exercise such rights with a view to resolving the Incident;

(ii) where the CH Support Materials are relevant to the Incident and require the Incident Party to take any steps prior to raising an Incident, that Incident Party shall take such steps with a view to resolving the Incident; or

(iii) where the Incident Party is a Supplier Party and it is already at the premises when it first becomes aware of the Incident, and to the extent the Incident is either: (A) caused by a SMETS1 CH for which the Incident Party is the Lead Supplier; or (B) caused by a SMETS2+ Communications Hub and not capable of being resolved via communications over the SM WAN, then (in either case) that Incident Party shall be responsible for resolving that Incident;

(b) subject to Section H9.2(a), the DCC shall be responsible for resolving Incidents and closing Problems to the extent they are caused by:

(i) the DCC Systems;

(ii) the Parse and Correlate Software; or

(iii) a SMETS2+ Communications Hub, and are capable of being resolved via communications over the SM WAN;

(c) subject to Section H9.2(a), the Lead Supplier for a Communications Hub shall be responsible for resolving Incidents and closing Problems to the extent they are caused by that Communications Hub where either: (A) it is a SMETS1 CH; or (B) the Incident or Problem is not capable of being resolved or closed via communications over the SM WAN;

(d) subject to Section H9.2(a), the Responsible Supplier for a Smart Metering System shall be responsible for resolving Incidents and closing Problems to the extent caused by Devices (other than the Communications Hub) forming part of that Smart Metering System;

(e) in the case of Incidents arising in respect of the exchange of Data under Section E (Registration Data):

(i) the relevant Registration Data Provider shall be responsible for resolving those Incidents arising on its side of the Registration Data Interface; and

(ii) the DCC shall be responsible for resolving all other such Incidents; and

(f) in the case of Incidents other than those referred to elsewhere in this Section H9.2, the Incident Party assigned responsibility in accordance with the Incident Management Policy shall be responsible for resolving the Incident.

Incident Management Log

H9.3 The DCC shall maintain and keep up-to-date an electronic log (the **Incident Management Log**) that records the following in respect of each Incident:

(a) a unique reference number (to be allocated to each Incident that is identified by, or reported to, the DCC);

(b) the date and time that the Incident was identified by, or reported to, the DCC;

(c) the nature of the Incident and the location at which it occurred;

(d) whether the Incident was identified by the DCC, or otherwise the person that reported the Incident to the DCC;

(e) the categorisation of the Incident in accordance with the Incident Management Policy;

(f) the person to whom the Incident has been allocated for resolution;

(g) the course of action to be taken, or taken, to resolve the Incident;

(h) the DCC's Good Industry Practice assessment of which Incident Parties and/or Services are affected by the Incident;

(i) details of any communications with Incident Parties in respect of the Incident;

(j) comments regarding any mitigating circumstances regarding the Incident;

(k) the potential impact of the Incident on the DCC's ability to meet the Target Service Levels;

(l) the current status of the Incident, and (once applicable) the date and time that the Incident was closed; and

(m) a reference to any related Problem logged.

H9.4 The following shall apply in respect of the Incident Management Log:

(a) (subject to paragraphs (c) and (d) below) the DCC shall provide Users with the ability to view and amend the Incident Management Log via the Self Service Interface;

(b) (subject to paragraphs (c) and (d) below) the DCC shall provide Incident Parties that are not Users with the ability to obtain information from, and report information which the DCC shall then add to, the Incident Management Log via the Service Desk;

(c) only the following Incident Parties shall be entitled to view or obtain information from the Incident Management Log in respect of an Incident:

(i) the Incident Party that raised the Incident;

(ii) the Incident Party that is assigned responsibility for resolving the Incident; and

(iii) (subject to any further rules in the Incident Management Policy) the following persons:

(A) the Lead Supplier for each Communications Hub that is affected by the Incident;

(B) the Responsible Supplier for each Smart Metering System that is affected by the Incident;

(C) the Electricity Distributor or Gas Transporter (as applicable) for each Smart Metering System that is affected by the Incident;

(D) the DCC Gateway Party for, and any Party notified to the DCC in accordance with Section H15.17 (Use of a DCC Gateway Connection) as entitled to use, a DCC Gateway Connection shall be able to view matters relating to any Incident affecting that DCC Gateway Connection;

(E) the Registration Data Providers entitled to use a DCC Gateway Connection as provided for in Section E3 (DCC Gateway Connections for Registration Data Providers) shall be able to view matters relating to any Incident affecting that DCC Gateway Connection; and

(F) any other Incident Party that is reasonably likely to be affected by the Incident;

(d) only the following Incident Parties shall be entitled to amend and report information to be added to the Incident Management Log:

(i) the Incident Party that raised the Incident;

(ii) the Incident Party that is assigned responsibility for resolving the Incident; and

(iii) (subject to any further rules in the Incident Management Policy) the following persons:

(G) the Lead Supplier for each Communications Hub that is affected by the Incident (but such amending and reporting shall be limited to matters relating to the Communications Hub Function); and

(H) the Responsible Supplier(s) for each Smart Metering System that is affected by the Incident (but such amending and reporting shall exclude matters relating to the Communications Hub Function); and

(e) to the extent that an Incident Party does not have the necessary rights in accordance with paragraph (d) above to amend the Incident Management Log, an Incident Party shall report the matter to the DCC, which shall then amend the Incident Management Log to reflect such matters.

Access to data regarding Problems

H9.5 Where an Incident refers to a Problem, the DCC or any Incident Party may request that the person assigned responsibility for the Problem supplies to the DCC or Incident Party making the request reasonable information regarding the Problem, provided that information in respect of any other Incident shall only be supplied to an Incident Party where that Incident Party would be allowed access to that information in accordance with Section H9.4.

Addition of Incidents to the Incident Management Log

H9.6 Where an Incident Party becomes aware of an Incident that is not yet logged on the Incident Management Log (or, if logged, is incorrectly logged as closed):

(a) (where the Incident Party is a User) to the extent such Incident is reasonably capable of being resolved via the Self-Service Interface or via a Service Request which that User has the right to send, then the User shall exercise such rights with a view to resolving the Incident;

(b) where paragraph (a) above does not apply (or to the extent the Incident is not resolved despite compliance with paragraph (a) above), then the Incident Party shall add the Incident to the Incident Management Log (or, if incorrectly logged as closed, reopen the Incident) via the Self-Service Interface (or, in the case of non-Users, the Service Desk).

H9.7 Where the DCC becomes aware of an Incident that is not yet logged on the Incident Management Log (or, if logged, is incorrectly logged as closed), then the DCC shall add the Incident to the Incident Management Log (or, if incorrectly logged as closed, reopen the Incident).

Resolving Incidents and Closing Problems

H9.8 Where an Incident has been added to the Incident Management Log (or reopened) pursuant to Section H9.6 or H9.7, then (until such time as that Incident is closed) the DCC and each relevant Incident Party shall each take all the steps allocated to them under and in accordance with the Incident Management Policy in respect of an Incident of the relevant type, so as to:

(a) in the case of Incidents for which an Incident Party is responsible, resolve the Incident as soon as reasonably practicable; or

(b) in the case of Incidents for which the DCC is responsible, resolve the Incident in accordance with the applicable Target Resolution Time.

H9.9 Where a Problem has been assigned to the DCC or an Incident Party, then (until such time as that Problem is closed) the DCC and each relevant Incident Party shall each take all the steps allocated to it under and in accordance with the Incident Management Policy so as to close the Problem in accordance with priority for resolution and closure set out in the Incident Management Policy.

Major Incident Notification and Reports

H9.10 Where an Incident Party is identified as responsible for resolution of an Incident, and where that Incident Party considers (or should reasonably have considered) that the Incident constitutes a Major Incident, then such Incident Party shall notify the DCC of such fact (in accordance with the Incident Management Policy).

H9.11 Where the DCC becomes aware of a Major Incident, the DCC shall notify all Incident Parties that are likely to be affected by such Major Incident (in accordance with the Incident Management Policy).

H9.12 In the event of a Major Incident:

(a) where the DCC is responsible for resolving that Incident, each Incident Party shall provide the DCC with all reasonable assistance as the DCC may request; and

(b) where an Incident Party is responsible for resolving that Incident, the DCC and all other Incident Parties shall provide all reasonable assistance to the Incident Party responsible for resolving that Incident as such Incident Party may request,

(in each case) in relation to the resolution of that Incident, including as set out in the Incident Management Policy.

H9.13 Within two Working Days following resolution of a Major Incident, the DCC or the Incident Party responsible for resolving that Major Incident shall (subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers) provide a summary report to the Panel in respect of that Major Incident. Such summary report must include (as a minimum):

(a) the nature, cause and impact (and likely future impact) of the Major Incident (including, where the DCC is responsible for resolving the Major Incident, details of the impact the Major Incident had on provision of the Services and over what period, and details of any Data that may have been lost); and

(b) the action taken in the resolution of the Major Incident.

H9.14 Within 20 Working Days following resolution of a Major Incident, the DCC or Incident Party responsible for resolving that Major Incident shall (subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers) conduct a review regarding that Major Incident and its resolution, and shall report to the Panel and the Authority (and, on request, the Secretary of State) on the outcome of such review. Such report must include (as a minimum):

(a) a copy of the summary report produced in respect of the Major Incident pursuant to Section H9.13;

(b) (where the DCC is responsible for resolving the Major Incident) any Services which were not restored within the Target Resolution Time for the Major Incident;

(c) (where the DCC is responsible for resolving the Major Incident) where any Services were not restored within the Target Resolution Time, the reason why this was the case and the steps the DCC is taking to prevent the re-occurrence of such an event;

(d) a review of the response to the Major Incident and its effectiveness;

(e) any failures by Incident Parties to comply with their obligations under Energy Licences and/or this Code that caused or contributed to the Major Incident or its consequences;

(f) (where the DCC is responsible for resolving the Major Incident) whether there is likely to be a reduction (and, to the extent reasonably capable of being determined at that time, the amount of the anticipated reduction) in the DCC's External Costs (as defined in the DCC Licence) arising as a consequence of the DCC Service Providers failing to achieve a restoration of any Services within the Target Resolution Time; and

(g) any Modifications that could be made to this Code to mitigate against future Incidents and/or their consequences.

H9.15 The Panel shall make each report produced by the DCC pursuant to Section H9.14 available to the other Parties, subject to any redactions it considers necessary to avoid a risk of Compromise to the DCC Total System, User Systems, RDP Systems and/or Devices.

Disputes

H9.16 Where Disputes arise between the Incident Parties regarding whether or not the DCC and/or an Incident Party has complied with its obligations under this Section H9, then such Dispute shall be subject to determination by the Panel (which determination shall be final and binding).

H10. BUSINESS CONTINUITY

Emergency Suspension of Services

H10.1 Section H10.2 applies in respect of any Party or RDP which has an established DCC Gateway Connection where, by virtue of the action or failure to act of that Party or RDP, or of any event occurring on or in relation to the Systems of that Party or RDP:

(a) the DCC Systems are being Compromised to a significant extent; or

(b) the DCC has reason to believe that there is an immediate threat of the DCC Systems being Compromised to a significant extent.

H10.2 Where this Section H10.2 applies, the DCC may, to the extent that it is necessary to do so in order to avoid or mitigate the potential impact of any Compromise to the DCC Systems, temporarily suspend:

(a) in respect of a Party whose actions or Systems are giving rise to the actual or threatened Compromise:

(i) the provision (in whole or in part) of the Services to that Party;

(ii) the rights of that Party to receive (in whole or in part) the Services; and/or

(iii) the ability of that Party to use any DCC Gateway Connection; or

(b) in respect of an RDP whose actions or Systems are giving rise to the actual or threatened Compromise, the ability of that RDP to use any DCC Gateway Connection.

H10.3 Where the DCC commences any temporary suspension of the provision of Services or rights, or of the ability to use a DCC Gateway Connection in accordance with Section H10.2, it shall promptly (and in any event within 24 hours) notify the Panel of the suspension and the reasons for it, and shall provide the Panel with such information relating to the suspension as may be requested.

H10.4 Where the Panel receives a notification in accordance with Section H10.3, it shall promptly consider the circumstances of the suspension, and:

(a) shall either confirm the suspension, or determine that the suspension is to cease to have effect (in which case the suspended Services, rights or ability to use any DCC Gateway Connection shall be reinstated); and

(b) may in either case give such directions as it considers appropriate:

(i) to the DCC in relation to the continuing suspension or the reinstatement of the Services, rights or ability to use any DCC Gateway Connection (as the case may be); and/or

(ii) to the Party or RDP whose Services, rights or ability to use any DCC Gateway Connection were suspended by the DCC, for the purpose of remedying any actual or potential cause of Compromise to the DCC Systems or for preventing its recurrence.

H10.5 The DCC shall comply with any direction given to it by the Panel in accordance with Section H10.4, and shall provide such reasonable support and assistance to the Party or RDP whose Services, rights or ability to use any DCC Gateway Connection were suspended by the DCC as that Party or RDP may request for the purpose of remedying any actual or potential cause of Compromise to the DCC Systems or for preventing its recurrence.

H10.6 A Party shall comply with any direction given to it by the Panel in accordance with Section H10.4.

H10.7 Each Electricity Network Party and each Gas Network Party shall ensure that its RDP shall (when acting in its capacity as the Network Party's RDP) comply with any direction given to it by the Panel in accordance with Section H10.4.

H10.8 Where the DCC or any Party or RDP which is directly affected by a decision of the Panel made pursuant to Section H10.4 disagrees with that decision, it may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

The Business Continuity and Disaster Recovery Procedure

H10.9 Subject to Section H10.10, the DCC shall comply with the requirements of the Business Continuity and Disaster Recovery Procedure for the purposes of ensuring so far as reasonably practicable that:

(a) there is no significant disruption to the provision of any of the Services by the DCC; and

(b) where there is any such significant disruption, the provision of those Services is restored as soon as is reasonably practicable.

H10.10 Where, in the case of Disasters, taking a different course of action to following the BCDR Procedure would (in accordance with Good Industry Practice) be a more effective course of action in order to achieve the objectives set out in Section H10.9, then the DCC may take such steps to achieve such objectives (rather than complying with the BCDR Procedure). Where the DCC takes a course of action that does not comply with the BCDR Procedure, the DCC must inform the Panel as soon as possible thereafter of the steps taken and the reasons why the DCC considered that they were more effective.

Business Continuity and Disaster Recovery Tests

H10.11 The DCC shall (subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers):

(a) from time to time, and at least once each year, carry out a Business Continuity and Disaster Recovery Test in order to assess whether the Business Continuity and Disaster Recovery Procedure remains suitable for achieving the objectives described at Section H10.9; and

(b) following any such test, report to the Panel and the Authority on the outcome of the test, and on any proposals made by the DCC in relation to the Business Continuity and Disaster Recovery Procedure having regard to that outcome.

H10.12 Each Party shall provide the DCC with any such assistance and co-operation as it may reasonably request for the purpose of carrying out a Business Continuity and Disaster Recovery Test and confirming the operation of the Business Continuity and Disaster Recovery Procedure.

H10.12A Before notifying the Parties of each Business Continuity and Disaster Recovery Test, the DCC shall consult with the Parties and the Panel regarding the Business Continuity and Disaster Recovery Test Schedule to ensure that (insofar as is reasonably practicable) the Business Continuity and Disaster Recovery Test is undertaken in such a way as to minimise any disruption to the provision of the Services (or any part of them). The DCC shall complete all necessary consultation prior to notifying Parties.

H10.12B The DCC shall notify each Party of its intention to carry out a Business Continuity and Disaster Recovery Test and provide each Party with a Business Continuity and Disaster Recovery Test Schedule at least 60 Working Days before the date on which such test is due to start. Where the DCC needs to amend the Business Continuity and Disaster Recovery Test Schedule following such notification and it is not reasonably practicable to give 60 Working Days' notice, it will provide such notice as far in advance as is reasonably practicable.

Business Continuity and Disaster Recovery Targets

H10.13 The DCC shall, on the occurrence of a Disaster (subject to any contrary provisions in the SEC Subsidiary Documents applying in relation to the SMETS1 SM WAN and/or the Systems of the SMETS1 Service Providers):

(a) take all reasonable steps to ensure that any and all affected Services are restored in accordance with the Target Resolution Time for a Major Incident;

(b) ensure that all affected Services are restored within eight hours of the occurrence of that Disaster (except in the case of a Disaster that directly affects a DCC Gateway Connection and where: (i) the DCC Gateway Party for that DCC Gateway Connection has not procured a backup DCC Gateway Connection; and (ii) the DCC can reasonably demonstrate that the Services could have been restored within eight hours if the DCC Gateway Party had procured a backup DCC Gateway Connection); and

(c) ensure in any event that Services are restored such that the loss of Data arising as a consequence of the Disaster is not in excess of that prescribed by the relevant Service Provider Performance Measures.

H11. PARSE AND CORRELATE SOFTWARE

Provision of Parse and Correlate Software

H11.1 On receipt of a request to do so from any person, the DCC shall supply to that person a copy of the most recently released version of computer software (the "**Parse and Correlate Software**") which:

(a) has the functionality specified in Section H11.2;

(b) has the characteristics specified in Section H11.3; and

(c) is provided in the format specified in Section H11.4.

H11.2 The functionality specified in this Section H11.2 is that the software must enable any User to:

(a) convert the relevant content of all Service Responses and Device Alerts (in each case only where generated from a Response or Alert originating from a SMETS2+ Device) into the format that is consistent with that set out in respect of them in the Message Mapping Catalogue; and

(b) confirm that the content of any Pre-Command is substantively identical to the content of its associated Critical Service Request.

H11.3 The characteristics specified in this Section H11.3 are that:

(a) the software is written using the Java programming language; and

(b) the software is capable of operating on the version of the Java Virtual Machine/Run-time Environment prevailing at the time at which the design of that version of the software was finalised.

H11.4 The format specified in this Section H11.4 is that the software:

(a) is provided as both:

(i) an executable file which includes everything required to enable the software to be installed on the systems of the person to whom it is provided in such a manner as not to have a material adverse effect on the operation of other software deployed within the same system environment; and

(ii) source software code.

(b) can be confirmed, on receipt by the person to whom it is provided:

(i) as having been provided by the DCC; and

(ii) as being authentic, such that any tampering with the software would be apparent.

Maintenance of the Parse and Correlate Software

H11.5 The DCC shall:

(a) maintain the Parse and Correlate Software supplied by it to any person so as to ensure that it at all times continues to have the functionality specified in Section H11.2; and

(b) for that purpose develop and release to such persons, where it is reasonably necessary from time to time, new versions of the Parse and Correlate Software which shall have the characteristics specified in Section H11.3 and be provided in the format specified in Section H11.4.

Development of the Parse and Correlate Software

H11.6 When proposing to develop any version of the Parse and Correlate Software, the DCC shall consult with Users, having regard in particular to their views in relation to:

(a) the need for a new version of the software;

(b) the potential impact of the proposed new version of the software on the security of the DCC Total System, User Systems and Smart Metering Systems;

(c) the design of the software generally; and

(d) the required operational performance of the proposed version of the software on a standard system configuration specified by the DCC for the purposes of the consultation.

H11.7 Following any consultation with Users, the DCC shall inform all Users of the design of the version of the Parse and Correlate Software that it intends to develop.

H11.8 Before supplying any version of the Parse and Correlate Software to any person, the DCC shall:

(a) ensure that that version of the software has been adequately tested for the purpose of ensuring that it satisfies the requirements of Sections H11.2 to H11.4;

(b) provide suitable opportunities for Acceptance Testing of that version of the software;

(c) take reasonable steps to ensure that any User who wishes to participate in that Acceptance Testing is able to do so; and

(d) ensure that the version of the software has been subject to a software code review, by an individual or organisation with the professional competence to carry out such a review, for the purpose of identifying any vulnerabilities in the code that were not intended as a feature of its design.

Provision of Support and Assistance to Users

H11.9 The DCC shall, having consulted with Users, determine two Application Servers in respect of which it will provide support for the executable file referred to in Section H11.4(a)(i).

H11.10 Any User may appeal to the Panel a decision of the DCC made under Section H11.9, in which case:

(a) the Panel shall determine the Application Servers in respect of which the DCC must provide support; and

(b) the determination of the Panel shall be final and binding for the purposes of this Code.

H11.11 The DCC shall make available to each person to whom any version of the Parse and Correlate Software is provided a copy of an installation guide and release notes relevant to that version.

H11.12 Requests by any User for the DCC to provide that User with further assistance in relation to its use or implementation of the Parse and Correlate Software shall be made in such format as the DCC may specify from time to time, and shall be submitted to the DCC. Following receipt of any such request (or purported request), the DCC shall:

(a) where the request is incomplete or the DCC reasonably requires further information in order to assess the request, notify the User that this is the case and provide reasonable assistance to the User in re-submitting its request;

(b) once the DCC has received all the information it reasonably requires in order to assess the request, confirm the reasonable terms upon which the DCC will provide the requested assistance (which terms may not be inconsistent with the provisions of this Code) and the Charges payable in respect of the same; and

(c) once the Party has agreed to such terms and to pay such Charges, provide the requested assistance to the User in accordance with such terms.

H11.13 Section H11.12 does not apply to the provision of assistance that is the responsibility of the DCC in accordance with the Incident Management Policy. The assistance referred to in Section H11.12 may include in particular assistance in respect of:

(a) the development and testing of, and the provision of support for, a version of the Parse and Correlate Software which is capable of operating on a version of the Java Virtual Machine/Run-time Environment other than that prevailing at the time at which the design of the most recently released version of the Parse and Correlate Software was finalised;

(b) the development and testing of, and the provision of support for, a version of the Parse and Correlate Software which meets any other User-specific requirements; and

(c) the provision, in respect of more than two Application Servers, of support for the executable file referred to in Section H11.4(a)(i).

Separation of Resources

H11.14 The DCC shall ensure that no staff or other resources of its own or of any third party which are directly used in the development of the Parse and Correlate Software are resources which are also used in the development or provision of the Transform functionality.

Right to Use the Parse and Correlate Software

H11.15 The DCC shall ensure that any person shall have the right to use the Parse and Correlate Software source software code on a non-proprietary and royalty-free basis, except insofar as royalties are due in respect of any Intellectual Property Rights the use of which is mandated by the Code.

H12. INTIMATE COMMUNICATIONS HUB INTERFACE SPECIFICATION

Maintenance of the ICHIS

H12.1 The DCC shall maintain the ICHIS and ensure that the ICHIS meets the requirements of Section H12.2 and H12.3. The ICHIS is not relevant to SMETS1 CHs.

H12.2 The requirements of this Section H12.2 are that the ICHIS describes a specification for the physical interface (including the electrical and data connection) between:

(a) the Communications Hub (which shall incorporate the male components of the physical interface); and

(b) either a Smart Meter or a Communications Hub Hot Shoe (which shall, in either case, incorporate the female components of the physical interface).

H12.3 The requirement of this Section H12.3 is that the specification described by the ICHIS only requires the use of tangible and intangible property (including physical components and Intellectual Property Rights) that is readily available on a reasonable and non-discriminatory basis.

Publication of the ICHIS

H12.4 The DCC shall publish the ICHIS on the DCC Website, and ensure that all persons are free to use the ICHIS without charge (whether for the purposes of this Code or otherwise); provided that the DCC shall limit its liability to persons other than the Parties on the same terms as apply in respect of the ICHIS under Section M2 (Limitations of Liability).

Consultation Regarding ICHIS

H12.5 The DCC shall keep the ICHIS under review to ascertain whether the ICHIS remains fit for the purposes envisaged by this Code. The DCC may from time to time at its discretion (and shall where directed to do so by the Panel) consult with Parties as to whether they consider that the ICHIS remains fit for the purposes envisaged by this Code.

H12.6 Following each consultation pursuant to Section H12.5, the DCC shall publish on the DCC Website (and notify all Parties of) a report on the outcome of such consultation, setting out:

(a) the process undertaken in respect of such consultation;

(b) whether (and, if so, how and from what implementation date) the DCC proposes to amend the ICHIS as a result of such consultation;

(c) a detailed summary of the consultation responses received from Parties, identifying in particular those responses that raised objections to the position adopted by the DCC;

(d) the DCC's rationale for the position it has adopted;

(e) the costs and expenses that are likely to arise as a result of the position adopted by the DCC (including the costs and expenses likely to arise as a result of any modifications that will be required to be made to Smart Meters, Communications Hubs and Communications Hub Hot Shoes); and

(f) the steps it has taken (including any testing or prototype development) to ensure that the ICHIS (if amended as proposed) remains fit for the purposes envisaged by this Code.

Referral to the Authority

H12.7 Within 10 Working Days following notification by the DCC to a Party of a report published in accordance with Section H12.6, that Party may refer the report to the Authority to consider whether the consultation to which that report relates was undertaken in accordance with the DCC's obligations under this Code or whether the notice period provided for implementation of the amendment was reasonable given the circumstances.

H12.8 Where the Authority determines that the relevant consultation was not undertaken in accordance with the DCC's obligations under this Code or that the notice period provided for implementation of the amendment was not reasonable given the circumstances, the DCC shall repeat the consultation and comply with any directions made by the Authority in respect of the same. Where the Authority determines both (where both of the following were referred to the Authority) or either (where only one of the following was so referred) that:

(a) the relevant consultation was undertaken in accordance with the DCC's obligations under this Code; and/or

(b) the notice period provided for implementation of the amendment was reasonable given the circumstances,

the consultation and proposed course of action shall stand.

Amendments to the ICHIS

H12.9 No amendment may be made to the ICHIS unless:

(a) the DCC has first undertaken such prototype development and testing in respect of the proposed amendment as the DCC reasonably considers necessary to ensure that the ICHIS is fit for the purposes envisaged by this Code;

(b) the DCC has first consulted with Parties regarding the proposed amendment and proposed date of implementation, published a report on the outcome of such consultation, and notified the Parties of such publication (all in accordance with Section H12.6); and

(c) such report has not been referred to the Authority in accordance with Section H12.7, or the Authority has determined both (where both of the following were so referred) or either (where only one of the following was so referred) that:

(i) the relevant consultation was undertaken in accordance with the DCC's obligations under this Code; and/or

(ii) the notice period provided for implementation of the amendment was reasonable given the circumstances.

H13. PERFORMANCE STANDARDS AND REPORTING

Code Performance Measures

H13.1 Each of the following performance measures constitute a Code Performance Measure (to which the following Target Service Level and Minimum Service Level will apply, measured over the following Performance Measurement Period):

No.	Code Performance Measure	Performance Measurement Period	Target Service Level	Minimum Service Level

1	Percentage of On-Demand Service Responses delivered within the applicable Target Response Time.	monthly	99%	96%
2	Percentage of Future-Dated Service Responses delivered within the applicable Target Response Time.	monthly	99%	96%
3	Percentage of Alerts delivered within the applicable Target Response Time (including the Alerts which are subject to Sections H3.14(i) and (j). Alerts consolidated in accordance with the Alert Management Mechanism will not be counted.	monthly	99%	96%
3A	For those Alerts which are subject to Section H3.14(i), percentage of Alerts delivered within the applicable Target Response Time.	monthly	As set out in the Power Outage & Restoration Alerts Delivery Management Document	As set out in the Power Outage & Restoration Alerts Delivery Managemen t Document
4	Percentage of Incidents which the DCC is responsible for resolving and which fall within Incident Category 1 or 2 that are resolved in accordance with the Incident Management Policy within the Target Resolution Time.	monthly	100%	85%
5	Percentage of Incidents, measured and reported as a separate Code Performance Measure for each of Incident Categories 3, 4 and 5, which the DCC is responsible for resolving that are resolved in accordance with the Incident Management Policy within the Target Resolution Time.	monthly	90%	80%
5A	Percentage of Incidents which fall within Incident Category 3, 4 or 5 that are recorded on the Incident Management Log and assigned to a resolver within the Target Initial Response Time.	monthly	90%	80%
6	Percentage of time (in minutes) during which each DCC Interface (excluding the one listed in paragraph (f) of the definition of DCC Interface) is available during the Target Availability Period. There shall be a separate Code Performance Measure for each combination of DCC Interface, Region and the two relevant times of day (the first such relevant time of day being Monday-Friday 08.00-20.00 and Saturday 08.00-12.00; the second being every other time). For this purpose, a DCC Interface is only considered to be available where it and the DCC Systems on which it relies are fully available, such that those persons which are intended to be able to use the DCC	monthly	99.5%	98%

	Interface can use the full functionality which is intended to be available to them.			
6A	Percentage of each of the Business Processes described in Section H13.1A which is delivered within the applicable Target Response Time. There shall be a separate Code Performance Measure for each combination of Business Processes and either Region (for SMETS2+) or SMETS1.	monthly	99%	96%

H13.1A The Business Processes referred to in Code Performance Measure 6A above are a combination of Service Reference Variants as set out in the table below. The percentage of each Business Process which is delivered within the Target Response Time shall be measured and calculated by reference to whether the messages that together comprise that Business Process were sent and received within the required Target Response Time. For this purpose, a Service Response will not be considered to have been received if the Service Response contains an error Response Code relating to a communications failure or timeout (E20 or E21).

Business Process	**Service Reference Variant**	**Description**	**SMETS1 applicable**
Install and Commission	8.11	Update HAN Device Log	Yes
	6.21	Request Handover of DCC Controlled Device (Update Supplier Certificates)	No
	8.1.1	Commission Device	Yes
	8.7.2	Join Service (Join GPF with GSME)	Yes
	6.20.1	Set Device Configuration (Import MPxN)	No
	1.1.1	Update Import Tariff (Primary Element)	Yes
	6.8	Update Device Configuration (Billing Calendar)	Yes
	8.14.1	Communications Hub Status Update Install Success	No
Change of Supplier (Gain)	6.23	Update Security Credentials (CoS)	Yes
	1.1.1	Update Import Tariff (Primary Element)	Yes
	6.8	Update Device Configuration (Billing Calendar)	Yes
Change of Tenancy	3.2	Restrict Access for Change of Tenancy	Yes
Tariff Updates	1.1.1	Update Import Tariff (Primary Element)	Yes
Pre-Payment	1.6	Update Payment Mode (Payment Mode = Prepayment)	Yes
	2.1	Update Prepay Configuration	Yes
	2.2	Top Up Device (Update Balance with positive value)	Yes
Security and Key Management	6.15.2	Update Security Credential (Device) – Credential Type = Digital Signature	No

	6.15.2	Update Security Credential (Device) – Credential Type = Key Agreement	No
	6.17	Issue Security Credentials – Credential Type = Digital Signature	No
	6.17	Issue Security Credentials – Credential Type = Key Agreement	No
Update Device Firmware	11.1	Update Firmware Note: In respect of SMETS2+ Devices the DCC must ensure that the associated firmware update has been delivered to all relevant Communications Hub Functions within five days of receipt of the Service Request.	No
	11.3	Activate Firmware (Individual SR for each GUID for firmware activation)	No
Logistics CH Ordering and Returns	8.14.3	Communications Hub Status Update – Fault Return	No
	8.14.4	Communications Hub Status Update – No Fault Return	No
Distribution Networks Post I&C Activity	6.15.1	Update Security Credentials (Update Network Operator Certificates)	Yes
	6.5	Update Device Configuration (Voltage)	Yes
	6.22	Configure Alert Behaviour (Update ENO Alter Configuration)	No
Meter Reads	4.6.1	Retrieve Import Daily Read Log	Yes
	4.6.2	Retrieve Export Daily Read Log	No
	4.8.1	Read Active Import Profile Data	Yes
	4.8.2	Read Reactive Import Profile Data	Yes
	4.8.3	Read Export Profile Data	Yes
	4.10	Read Network Data	Yes
	4.17	Retrieve Daily Consumption Log	No

Note, where the response for the 'Update Security Credentials (CoS)' Service Request erroneously reports a failure, the presence of subsequent Critical and Non-Critical Service Requests sent by the gaining supplier will be used as an indicator of success.

Service Provider Performance Measures

H13.2 The DCC may modify the Reported List of Service Provider Performance Measures where it has:

(a) undertaken reasonable consultation with the Parties regarding the proposed modification;

(b) given due consideration to, and taken into account, any consultation responses received; and

(c) provided to the Panel, the Parties, the Authority and (on request) the Secretary of State a statement of its reasons for the modification together with copies of any consultation responses received, and as soon as reasonably practicable following any such modification, the DCC shall provide an up-to-date copy of the Reported List of Service Provider Performance Measures to the Panel, the Parties, the Authority and (on request) the Secretary of State.

H13.3 Prior to agreeing any changes to the DCC Service Provider Contracts that will alter the Service Provider Performance Measures, the DCC shall:

(a) undertake reasonable consultation with the Panel and Parties regarding such changes;

(b) give due consideration to, and take into account, any consultation responses received; and

(c) provide to the Panel, the Parties, the Authority and (on request) the Secretary of State a statement of its reasons for proposing to agree such changes.

Reporting

H13.4 The DCC shall, within 25 Working Days following the end of each Performance Measurement Period, produce a report setting out the Service Levels achieved in respect of each Performance Measure. Such report must identify:

(a) those Performance Measures (if any) for which the Service Level was less than the Target Service Level and/or the Minimum Service Level;

(b) where a Service Level is less than the Target Service Level, the reason for the Service Level achieved;

(c) where a Service Level is less than the Minimum Service Level, the steps the DCC is taking to prevent the re-occurrence or continuation of the reason for the Service Level achieved; and

(d) any anticipated reductions in the DCC's Internal Costs and/or External Costs (as both such expressions are defined in the DCC Licence) arising as a consequence of the DCC Service Providers failing to achieve the Target Service Levels in respect of the Service Provider Performance Measures.

H13.5 A copy of the report produced pursuant to Section H13.4:

(a) shall be provided by DCC, immediately following its production, to the Panel, the Parties, the Authority and (on request) the Secretary of State; and

(b) may be provided by the Panel, at its discretion, to any other person.

Report on Performance Indicators

H13.5A At the same time as the report required under Section H13.4, the DCC shall also report on its performance against the Performance Indicators for the same period.

H13.5B The Panel shall establish and periodically review, in consultation with the Parties and the Authority, a document (to be known as the DCC Performance Indicators Document) which lists the reasonable service metrics which are to constitute the Performance Indicators, and which are therefore to be measured and reported on by the DCC. The DCC Performance Indicators Document shall include the Performance Indicators described in Section H13.5C and shall require these to be included in the report required under Section H13.5A and may request other individual Performance Indicator(s) to be included in the report, including:

(a) graphs of daily performance in respect of delivery of each of the Business Processes;

(b) monthly median figures for performance in respect of delivery of each of the Business Processes;

(c) the total number of each of the Business Processes delivered each month;

(d) for each DCC Interface separately, the average amount of downtime per Incident; and

(e) for each DCC Interface separately, the mean amount of time between Incidents.

H13.5C When looked at on an Alert type basis (as opposed to when aggregated with other Alert types pursuant to row 3 of the table in Section H13.1), the performance of the Alerts which are subject to Section H3.14(j) against the relevant Target Response Time set out in the DCC's Power Outage & Restoration Alerts Delivery Management Document shall be Performance Indicators.

Performance Measurement Methodology

H13.6 The DCC shall:

(a) establish and periodically review the Performance Measurement Methodology in accordance with Good Industry Practice and in consultation with the Panel, the Parties and the Authority;

(b) seek approval from the Panel for any proposed changes that the DCC wishes to make to the Performance Measurement Methodology; and

(c) as soon as reasonably practicable following any modification which the Panel approves, provide an up to date copy of the Performance Measurement Methodology to the Panel, the Parties, the Authority and (on request) the Secretary of State.

Customer Analytics Reporting

H13.6A The DCC Shall:

(a) establish and periodically review the Customer Analytics Reporting Methodology and Guidance Document (including such reviews as the Panel may request), in consultation with the Panel and Users;

(b) seek approval from the Panel for any proposed changes that the DCC wishes to make to the Customer Analytics Reporting Methodology and Guidance Document; and

(c) make the Customer Analytics Reporting Methodology and Guidance Document available to the Panel and the Users.

H13.6B The Customer Analytics Reporting Methodology and Guidance Document must:

(a) set out the requirements that the DCC will undertake:

(b) provide performance metrics for Services, and must provide each User with details of the performance achieved in respect of that User against those metrics, together with details of the performance achieved in respect of other Users in the same User Role on an anonymised, industry-wide basis; and

(c) provide guidance to Users regarding the provision of Customer Analytics Reporting by the DCC.

H13.6C The DCC shall, within 10 working days following the end of each month, provide the Users with the Customer Analytics Reporting for the prior month.

H13.6D Clauses 13.6A to 13.6C shall only apply from 31 December 2024.

OPR Exceptional Events

H13.7 Sections H13.7 to H13.14 shall apply only to the extent that the OPR Reporting established under the DCC Licence applies by reference to reporting under this Code. OPR Exceptional Events shall not apply in respect of Performance Measure reporting under Section H13.4.

H13.8 For the purposes of OPR Reporting, in measuring performance for each Performance Measure, the DCC shall exclude from the Service Level calculation any and all instances of delayed or non-performance for which the DCC has relief for an OPR Exceptional Event by virtue of Section H13.12.

H13.9 The DCC may claim relief for the purposes of OPR Reporting in respect of the Performance Measures to the extent this is due to OPR Exceptional Events. Where the DCC also wishes to claim relief in respect of its obligations under this Code, the DCC must also separately claim relief for Services FM under Section M3 (Services FM and Force Majeure).

H13.10 The DCC cannot claim an OPR Exceptional Event has occurred:

(a) in relation to any wilful act, neglect or failure to take reasonable precautions against the relevant OPR Exceptional Event by the DCC or its servants, agents, employees or contractors (including the DCC Service Providers);

(b) in relation to any circumstances resulting from a failure or delay by any other person in the performance of that other person's obligations under a contract with the DCC other than this Code (unless that other person is itself prevented from or delayed in complying with its obligations as a result of OPR Exceptional Events); and/or

(c) as a result of any shortage of labour, material or other resources unless caused by circumstances which are themselves OPR Exceptional Events,

and in any event, the DCC shall not be entitled to relief for the purposes of OPR Reporting if and to the extent that it is required to comply with the BCDR Procedure in accordance with Sections H10.9 and H10.10 (the Business Continuity and Disaster Recovery Procedure) but has failed to do so (unless this failure is also due to OPR Exceptional Events affecting the operation of the BCDR Procedure).

H13.11 The DCC shall, as soon as reasonably practicable (and in any event within five (5) days of the occurrence of the OPR Exceptional Event), give to the Users that were due to receive the affected Services and to the Panel full details of the OPR Exceptional Event and any relief for the purposes of OPR Reporting which the DCC wishes to claim in connection with the OPR Exceptional Event.

H13.12 The DCC shall be entitled to relief for the purposes of OPR Reporting in respect of OPR Exceptional Events to the extent that the Panel agrees following consultation with any relevant Sub-Committee that the requirements of Sections H13.9 and H13.10 are met, and that:

(a) the DCC could not have avoided the occurrence of the OPR Exceptional Event (or its consequences or likely consequences) by taking steps which the DCC was required to take (or procure) under this Code and any Bilateral Agreement or might reasonably be expected to have taken;

(b) the OPR Exceptional Event directly caused the non-performance of the Services for which relief is claimed;

(c) the time lost and/or relief from the obligations under this Code and any Bilateral Agreement claimed by the DCC could not reasonably be expected to be mitigated or recovered by the DCC acting in accordance with Good Industry Practice; and

(d) the DCC is taking all steps in accordance with Good Industry Practice to overcome or minimise the consequences of the OPR Exceptional Event on the performance of the Services.

H13.13 The Panel shall reach a determination as to whether the DCC is entitled to relief for the purposes of OPR Reporting in respect of an OPR Exceptional Event in accordance with Section H13.12 within 10 Working Days after the DCC notifies the Panel of the OPR Exceptional Event under Section H13.11.

H13.14 The DCC shall notify the affected Users and the Panel as soon as reasonably practicable after the OPR Exceptional Event ceases or no longer causes the DCC to be unable to comply with its obligations under this Code and/or any Bilateral Agreement in respect of the Services.

H14. TESTING SERVICES

General Testing Requirements

H14.1 The DCC shall provide the following testing services (the "**Testing Services**"):

(a) User Entry Process Tests;

(b) SMKI and Repository Entry Process Tests;

(c) Device and User System Tests;

(d) Modification Proposal implementation testing (as described in Section H14.34);

(e) DCC Internal Systems change testing (as described in Section H14.36);

(f) RDP Entry Process Tests;

(g) SMETS1 Pending Product Combinations Tests;

(h) RF Noise Testing;

(i) Interoperability and Innovation Events;

(j) GFI Testing;

(k) Wired Instrumented Test Communications Hubs; and

(l) DCC Boxed.

H14.2 The DCC shall make the Testing Services available, and shall provide the Testing Services:

(a) in accordance with the Enduring Testing Approach Document and Good Industry Practice; and

(b) between 08:00 hours and 18.00 hours Monday to Friday, and at any other time that it is reasonably practicable to do so (including where any DCC Service Provider has agreed to provide services at such time).

H14.3 The DCC shall act reasonably in relation to its provision of the Testing Services and shall facilitate the completion (in a timely manner) of tests pursuant to the Testing Services by each such person which is entitled to do so in accordance with this Section H14. Each Testing Participant shall comply with the Enduring Testing Approach Document with respect to the relevant Testing Services. The DCC shall publish on the DCC Website a guide for Testing Participants describing which persons are eligible for which Testing Services, and on what basis (including any applicable Charges).

H14.4 To the extent it is reasonably practicable to do so, the DCC shall allow persons who are eligible to undertake tests pursuant to the Testing Services to undertake those tests concurrently, or shall (otherwise) determine, in a non-discriminatory manner, the order in which such persons will be allowed to undertake such tests. Where any Testing Participant disputes the order in which persons are allowed to undertake tests pursuant to this Section H14.4, then the Testing Participant may refer the matter to the Panel. Where the DCC or any Testing Participant wishes to do so, it may refer the Panel's decision on such matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

H14.5 Each Party which undertakes tests pursuant to the Testing Services shall do so in accordance with Good Industry Practice. To the extent that such tests involve a Party accessing the DCC's premises, the Party shall do so in compliance with the site rules and reasonable instructions of the DCC.

H14.6 The DCC shall be liable for any loss of or damage to the equipment of Testing Participants (fair wear and tear excepted) that occurs while such equipment is within the DCC's possession or control pursuant to the Testing Services; save to the extent that such loss or damage is caused by a breach of this Code (or the equivalent agreement under Section H14.7) by the Testing Participant.

H14.7 Where (in accordance with this Section H14) a person that is not a Party is eligible to undertake a category of Testing Services as a Testing Participant, the DCC shall not provide those Testing Services to that person unless it is bound by an agreement entered into with the DCC pursuant to this Section H14.7. Where a person who is a Testing Participant (but not a Party) requests a Testing Service, the DCC shall offer terms upon which such Testing Service will be provided. Such offer shall be provided as soon as reasonably practicable after receipt of the request, and shall be based on the Specimen Enabling Services Agreement (subject only to such variations from such specimen form as are reasonable in the circumstances).

General: Forecasting

H14.8 Each Testing Participant shall provide the DCC with as much prior notice as is reasonably practicable of that Testing Participant's intention to use any of the following Testing Services: User Entry Process Tests, SMKI and Repository Entry Process Tests, Device and User System Tests, SMETS1 Pending Product Combinations Tests and RF Noise Testing.

General: Systems and Devices

H14.9 The DCC shall provide such facilities as are reasonably required in relation to the Testing Services, including providing:

(a) for access to the Testing Services either at physical test laboratories and/or remotely;

(b) a reasonable number of Test Communications Hubs for use by Testing Participants at the DCC's physical test laboratories which represent each and every combination of HAN Variant and WAN Variant; and

(c) a reasonable number of Devices (other than SMETS2+ Communications Hubs) for use by Testing Participants at the DCC's physical test laboratories, which Devices are to be:

(i) in the case of SMETS1 Devices as further described or set out in the Enduring Testing Approach Document; or

(ii) except for SMETS1 Devices, such Device Models as the Panel approves from time to time (provided that, where Test Stubs (or other alternative arrangements) were used then such Tests Stubs (or other alternative arrangements) will be used in place of Devices until the DCC agrees with the Panel which Device Models to use).

H14.10 Without prejudice to Sections H14.9(b) and (c), the DCC shall allow Testing Participants to use Devices they have procured themselves when using the Testing Services. The DCC shall make storage facilities available at the DCC's physical test laboratories for the temporary storage by Testing Participants of such Devices (for no more than 30 days before and no more than 30 days after completion of the Testing Service for which such Devices may be expected to be used). The DCC shall ensure that such storage facilities are secure and only capable of access by persons authorised by the relevant Testing Participant.

H14.10A The DCC may require a Testing Participant to remove its Devices from a DCC physical test laboratory in accordance with the requirements set out in the Enduring Testing Approach Document. Any dispute between the DCC and a Testing Participant regarding the removal of such Devices (or the right to re-commence testing) may be referred to the Panel for its determination (which determination shall be final and binding for the purposes of this Code).

General: SMKI Test Certificates

H14.11 The following shall apply in relation to Test Certificates:

(a) the DCC shall, in accordance with the Enduring Testing Approach Document, issue and make available to Testing Participants copies of such Test Certificates as are reasonably necessary for the purposes of the Testing Participants undertaking Testing Services;

(b) the DCC shall only use Test Certificates for the purposes envisaged by this Section H14.11 (and shall not use actual Certificates when providing the Testing Services, except to such extent as is approved, and subject to any conditions imposed, by the SMKI PMA);

(c) each Testing Participant to which Test Certificates are made available pursuant to this Section H14.11 shall only use those Test Certificates for the purposes for which such Test Certificates are made available (and shall not use actual Certificates when undertaking the tests referred to in this Section H14.11);

(d) each Testing Participant to which Test Certificates are made available pursuant to this Section H14.11 shall be entitled to make those certificates available to others provided that such others only use them for the purposes for which such certificates were made available to the Testing Participant;

(e) DCC shall ensure that the Test Certificates are clearly distinguishable from actual Certificates;

(f) the DCC shall act in accordance with Good Industry Practice in providing the Test Certificates;

(g) each Testing Participant shall act in accordance with Good Industry Practice in using the Test Certificates; and

(h) each Testing Participant hereby, subject to Section M2.1 (Unlimited Liabilities):

(i) waives all rights, remedies and claims it would otherwise have (whether for breach of contract, in tort or delict or otherwise) against the DCC in respect of the Test Certificates;

(ii) undertakes not to bring any claim against the DCC in respect of the Test Certificates; and

(iii) where it makes the Test Certificates available to others, undertakes to ensure that no such others bring any claim against the DCC in respect of such Test Certificates.

User Entry Process Tests

H14.12 Parties seeking to become Users in accordance with Section H1 (User Entry Process) are entitled to undertake User Entry Process Tests.

H14.13 In respect of a Party seeking to become eligible as a User in a particular User Role, the purpose of the User Entry Process Tests is to test the capability of that Party and the Party's Systems to interoperate with the DCC and the DCC System, to the extent necessary in order that the Party:

(a) has established a connection to the DCC User Interface via the Party's chosen DCC Gateway Connection;

(b) can use the DCC User Interface for the purposes set out in Section H3.3 (Communications to be sent via DCC User Interface) in respect of the Services for which Users in that User Role are eligible; and

(c) can use the Self-Service Interface for the purposes set out in Section H8 (Service Management, Self-Service Interface and Service Desk).

H14.14 The User Entry Process Tests will:

(a) test the sending of communications from the proposed User System via the DCC System to be received by Devices and from Devices via the DCC System to be received by the proposed User System, recognising that such tests may involve a simulation of those Systems rather than the actual Systems;

(b) be undertaken in accordance with the Common Test Scenarios Document; and

(c) be undertaken using Devices selected and provided by the DCC as referred to in Sections H14.9(b) and (c).

H14.15 Only Parties who the DCC considers meet any entry requirements (for a particular User Role) set out in the Common Test Scenarios Document shall be entitled to undertake the User Entry Process Tests for that User Role.

H14.16 Where the DCC is not satisfied that a Party meets such entry requirements (for a particular User Role), that Party may refer the matter to the Panel for its determination. Where the Party disagrees with any such determination of the Panel, then the Party may refer the matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

H14.17 Each Party seeking to undertake the User Entry Process Tests shall develop its own test scripts and demonstrate how those test scripts meet the requirements of the relevant scenarios set out in the Common Test Scenarios Document. Each Party shall obtain the DCC’s approval that such test scripts meet those requirements before the User Entry Process Tests can commence. Any disputes regarding the approval of such test scripts may be referred to the Panel for determination (which determination shall be final and binding for the purposes of this Code).

H14.18 Each Party will have the right to determine the sequencing of the tests that comprise the User Entry Process Tests; save to the extent that a particular sequence is mandated in the Common Test Scenarios Document.

H14.18A The DCC or the Party undertaking the User Entry Process Tests may suspend testing in accordance with the requirements set out in the Common Test Scenarios Document. Any dispute between the DCC and a Party regarding the suspension (or consequent resumption) of such testing may be referred to the Panel for its determination. Where the DCC or the Party disagrees with any such determination of the Panel, then the DCC or the Party may refer the matter to the Authority for its determination (which determination shall be final and binding for the purposes of this Code).

H14.19 A Party will have successfully completed the User Entry Process Tests (for a particular User Role), once the DCC considers that the Party has demonstrated that it has satisfied the requirements set out in the Common Test Scenarios Document for that User Role. Where requested by a Party, the DCC shall provide written confirmation to the Party confirming whether or not the DCC considers that the Party has successfully completed the User Entry Process Tests (for a particular User Role).

H14.20 Where Systems have been proven to meet the requirements of this Code as part of one Party's successful completion of the User Entry Process Tests or tests under Section H14.32 that are equivalent to all or part of the User Entry Process Tests (and where the substance of the relevant part of the User Entry Process Tests have not changed in the interim), then:

(a) any Party that has use of those Systems shall be entitled to submit proof to the DCC that this is the case when seeking to meet any applicable entry and/or exit requirements set out in the Common Test Scenarios Document; and

(b) the DCC shall take into account such proof when considering whether such Party meets such entry and/or exit requirements.

H14.21 Where the DCC is not satisfied that a Party has successfully completed the User Entry Process Tests (for a particular User Role), that Party may refer the matter to the Panel for its determination. Where the Party disagrees with any such determination of the Panel, then the Party may refer the matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

SMKI and Repository Entry Process Tests

H14.22 Each Party or Registration Data Provider seeking to complete the entry process described in Section L7 (SMKI and Repository Entry Process Tests) is entitled to undertake the SMKI and Repository Entry Process Tests to become either or both of:

(a) an Authorised Subscriber under either or both of the Organisation Certificate Policy and/or the Device Certificate Policy; and/or

(b) eligible to access the SMKI Repository.

H14.23 The SMKI and Repository Entry Process Tests will be undertaken in accordance with the SMKI and Repository Test Scenarios Document.

H14.24 A Testing Participant seeking to undertake the SMKI and Repository Entry Process Tests for the purposes of either or both of Section H14.22(a) and/or (b) shall notify the DCC of the purposes for which it is undertaking those tests. Only Testing Participants that meet any applicable entry requirements set out in the SMKI and Repository Tests Scenarios Document shall be entitled to undertake those SMKI and Repository Entry Process Tests for the purposes described in Section H14.22(a) and/or (b).

H14.25 Where the DCC is not satisfied that a Testing Participant meets such entry requirements, that Testing Participant may refer the matter to the Panel for its determination. Where the Testing Participant disagrees with any such determination of the Panel, then the Testing Participant may refer the matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

H14.26 Each Testing Participant seeking to undertake the SMKI and Repository Entry Process Tests shall develop its own test scripts and demonstrate how those test scripts meet the requirements of the relevant scenarios set out in the SMKI and Repository Tests Scenarios Document (for the purposes described in Section H14.22(a) and/or (b), as applicable). Each Testing Participant shall obtain the DCC's approval that such test scripts meet those requirements before the SMKI and Repository Entry Process Tests can commence. Any disputes regarding the approval of such test scripts may be referred to the Panel for determination (which determination shall be final and binding for the purposes of this Code).

H14.27 Each Testing Participant seeking to undertake the tests will have the right to determine the sequencing of the tests that comprise the SMKI and Repository Entry Process Tests; save to the extent that a particular sequence is mandated in the SMKI and Repository Tests Scenarios Document.

H14.27A The DCC or the Testing Participant undertaking the SMKI and Repository Entry Process Tests may suspend testing in accordance with the requirements set out in the SMKI and Repository Test Scenarios Document. Any dispute between the DCC and a Testing Participant regarding the suspension (or consequent resumption) of such testing may be referred to the Panel for its determination. Where the DCC or the Testing Participant disagrees with any such determination of the Panel, then the DCC or the Testing Participant may refer the matter to the Authority for its determination (which determination shall be final and binding for the purposes of this Code).

H14.28 A Testing Participant will have successfully completed the SMKI and Repository Entry Process Tests (for the purposes described in Section H14.22(a) and/or (b), as applicable), once the DCC considers that the Testing Participant has demonstrated that it has satisfied the requirements set out in the SMKI and Repository Tests Scenarios Document for those purposes. Where requested by a Testing Participant, the DCC shall provide written confirmation to the Testing Participant confirming whether or not the DCC considers that the Testing Participant has successfully completed the SMKI and Repository Entry Process Tests (for the purposes described in Section H14.22(a) and/or (b), as applicable).

H14.29 Where Systems have been proven to meet the requirements of this Code as part of one Testing Participant's successful completion of the SMKI and Repository Entry Process Tests or tests under Section H14.32 that are equivalent to all or part of the SMKI and Repository Entry Process Tests (and where the substance of the relevant part of the SMKI and Repository Entry Process Tests have not changed in the interim), then:

(a) any Testing Participant that has use of those Systems shall be entitled to submit proof to the DCC that this is the case when seeking to meet any applicable entry and/or exit requirements set out in the SMKI and Repository Tests Scenarios Document; and

(b) the DCC shall take into account such proof when considering whether such Testing Participant meets such entry and/or exit requirements.

H14.30 Where the DCC is not satisfied that a Testing Participant has successfully completed the SMKI and Repository Entry Process Tests (for the purposes described in Section H14.22(a) and/or (b), as applicable), that Testing Participant may refer the matter to the Panel for its determination. Where the Testing Participant disagrees with any such determination of the Panel, then the Testing Participant may refer the matter to the Authority for its determination (which shall be final and binding for the purposes of this Code).

Device and User System Tests

H14.31 This Section H14.31 shall only apply in respect of SMETS1 Devices from 31 August 2018 or any such later date as the Secretary of State may direct further to a recommendation from the DCC to the Secretary of State following a consultation on a proposed date by the DCC with all SEC Parties and the SEC Panel. The DCC shall provide a service to enable Testing Participants:

(a) to test the interoperability of SMETS2+ Devices (other than those comprising Communications Hubs) with the DCC Systems and with the Test Communications Hubs provided as part of the Testing Services, such that those Devices are able to respond to Commands received from or via the DCC in accordance with the requirements defined in the GB Companion Specification;

(b) to test the interoperability of SMETS1 Devices with the DCC Systems, such that those Devices are able to respond to Instructions received from or via the DCC such that the necessary Equivalent Steps are taken (provided that such service need only be provided by the DCC in respect of combinations of SMETS1 Device Models that are listed on the SMETS1 Eligible Product Combinations);

(c) to test the interoperability of User Systems with the DCC Systems, including via the DCC User Interface and the Self-Service Interface;

(d) to test simultaneously the interoperability of User Systems and SMETS2+ Devices (other than those comprising Communications Hubs) with the DCC Systems and with the Test Communications Hubs provided as part of the Testing Services; and

(e) to test simultaneously the interoperability of User Systems and SMETS1 Devices (excluding combinations of SMETS1 Devices that are not listed on the SMETS1 Eligible Product Combinations) with the DCC Systems,

which Testing Services, except in respect of (c) above, shall (subject to the Testing Participant agreeing to pay any applicable Charges, as further described in the Enduring Testing Approach Document) include the provision of a connection to a simulation of the SMETS2+ SM WAN for the purpose of such tests as further described in the Enduring Testing Approach Document (save to the extent the connection is required where the DCC is relieved from its obligation to provide Communication Services pursuant to the Statement of Service Exemptions). For the avoidance of doubt, the DCC shall not be obliged by this Section H14.31 to provide a connection to a simulation of the SMETS1 SM WAN. References to particular Systems in this Section H14.31may include a simulation of those Systems (rather than the actual Systems).

H14.32 Each Party is eligible to undertake Device and User System Tests. Any Manufacturer (whether or not a Party) is eligible to undertake those Device and User System Tests described in Section H14.31(a) and (b); provided that, in the case of any such tests that require the use of a DCC Gateway Connection, the Manufacturer must be a Party. Any person providing (or seeking to provide) goods or services to Parties or Manufacturers in respect of Devices is eligible to undertake those Device and User System Tests described in Section H14.31(a) and (b); provided that, in the case of any such tests that require the use of a DCC Gateway Connection, the person must be a Party. A Party undertaking the Device and User System Tests described in Section H14.31(c) is entitled to undertake tests equivalent to any or all of the User Entry Process Tests and SMKI and Repository Entry Process Tests, in respect of which:

(a) the DCC shall, at the Party's request, assess whether the test results would meet the requirements of all or part of the applicable User Entry Process Tests and/or SMKI and Repository Entry Process Tests;

(b) the DCC shall, at the Party's request, provide a written statement confirming the DCC's assessment of whether the test results would meet the requirements of all or part of the applicable tests; and

(c) the Party may, where it disputes the DCC's assessment, refer the matter to the Panel for its determination (which shall be final and binding for the purposes of this Code).

H14.33 The DCC shall, on request by a Testing Participant, take all reasonable steps to offer additional support to that Testing Participant (subject to such Testing Participant agreeing to pay any applicable Charges) in understanding and resolving issues associated with:

(a) the DCC Total System and the results of such Testing Participant's Device and User System Tests;

(b) where the Testing Participant is a Party, the Systems of the Testing Participant that are (or are intended to be) User Systems; and/or

(c) communications between the DCC and any Device or between Devices which comprise (or which the Testing Participant intends will comprise) a Smart Metering System.

H14.33A The additional Testing Services provided for in Section H14.33 are without prejudice to the DCC's obligations in respect of Testing Issues, Incidents and Problems.

Modification Implementation Testing

H14.34 Where an approved Modification Proposal provides for the DCC to provide testing services as part of the Modification Proposal's implementation, then such testing shall be undertaken as a Testing Service pursuant to this Section H14.34.

H14.35 The Parties which are eligible, or obliged, to participate in such testing shall be determined in accordance with Section D (Modification Process), and either set out in this Code or established via a process set out in this Code.

DCC Internal System Change Testing

H14.36 Where, pursuant to Section H8.8 (DCC Internal Systems Changes), a Party or an RDP is involved in testing of changes to the DCC Internal Systems, then such testing shall not be subject to the requirements of Section H14.3, Section H14.4 and Sections H14.6 to H14.11 (inclusive), but such Party or RDP may nevertheless raise a Testing Issue in respect of the tests (and the references to Testing Participant in Sections H14.37 to H14.44 shall be interpreted accordingly).

SMETS1 Pending Product Combinations Tests

H14.36A This Section H14.36A shall only apply in respect of SMETS1 Devices from 31 August 2018 or any such later date as the Secretary of State may direct further to a recommendation from the DCC to the Secretary of State following a consultation on a proposed date by the DCC with all SEC Parties and the SEC Panel. The DCC shall provide services (the "**SMETS1 Pending Product Combinations Tests**") whereby a Party or a Manufacturer (being the relevant Testing Participant) can from time to time request that the DCC determines whether or not testing is required and, where it determines that testing is required, tests one or more combinations of SMETS1 Device Models and communication services provider that are not at that time listed on the SMETS1 Eligible Product Combinations in order to demonstrate whether the DCC is able to successfully process SMETS1 Service Requests and relevant SMETS1 Alerts in respect of them (subject to Section H14.36C(c)).

H14.36B Where requested in accordance with Section H14.36A, the DCC shall undertake, and facilitate the Testing Participant's participation in, the SMETS1 Pending Product Combinations Tests in respect of the requested combination(s) of SMETS1 Device Models as soon as reasonably practicable. The DCC shall then notify the relevant Testing Participant whether the DCC is able to successfully process SMETS1 Service Requests and relevant SMETS1 Alerts in respect of them, without needing to make material changes to the DCC Systems and/or modifications to this Code.

H14.36C Where the DCC notifies a Testing Participant that the DCC is not able to successfully process SMETS1 Service Requests and relevant SMETS1 Alerts in respect of a combination of SMETS1 Device Models without needing to make material changes to the DCC Systems and/or modifications to this Code, then the DCC shall:

(a) provide the relevant Testing Participant with reasonable details of the reasons why the DCC is not able to do so, and of the changes to the DCC Systems and/or modifications to this Code which would be required in order to enable the DCC to do so (in each case, to the extent that the DCC has been able to identify such reasons and changes and/or modifications, having taken reasonable steps to identify them);

(b) provide the relevant Testing Participant with such reasonable support as they may request in understanding the issues identified by the DCC;

(c) not be obliged to provide SMETS1 Pending Product Combinations Tests to the same Testing Participant in respect of the same combination of SMETS1 Device Models unless and until the relevant changes have been made to the DCC System and/or the relevant modifications have been made to this Code; and

(d) make available in accordance with the Enduring Testing Approach Document such details regarding the relevant combination of SMETS1 Device Models as is required in accordance with the Enduring Testing Approach Document.

H14.36D Where the DCC is able to successfully process SMETS1 Service Requests and relevant SMETS1 Alerts in respect of a combination of SMETS1 Device Models without needing to make material changes to the DCC Systems and/or modifications to this Code, then the DCC shall add that combination of Device Models to the SMETS1 Eligible Product Combinations.

H14.36E The DCC and the relevant Testing Participant in respect of the SMETS1 Pending Product Combinations Tests shall comply with any and all additional obligations concerning SMETS1 Pending Product Combinations Tests set out in the Enduring Testing Approach Document.

General: Testing Issue Resolution Process

H14.37 Each Testing Participant undertaking tests pursuant to this Section H14 is entitled to raise a Testing Issue in respect of those tests. Each Testing Participant shall take reasonable steps to diagnose and resolve a Testing Issue before raising it in accordance with this Section H14.

H14.38 A Testing Participant that wishes to raise a Testing Issue shall raise it with the relevant DCC Service Provider (as identified by the DCC from time to time) in accordance with a reasonable and not unduly discriminatory procedure, which is to be established by the DCC and provided to the Panel from time to time (which the Panel shall publish on the Website).

H14.39 Where a Testing Participant raises a Testing Issue, the DCC shall ensure that the relevant DCC Service Provider shall (as soon as reasonably practicable thereafter):

(a) determine the severity level and priority status of the Testing Issue;

(b) inform the Testing Participant of a reasonable timetable for resolution of the Testing Issue consistent with its severity level and priority status; and

(c) provide its determination (in accordance with such timetable) to the Testing Participant on the actions (if any) to be taken to resolve the Testing Issue.

H14.40 Pursuant to H14.39, the DCC shall share with categories of Testing Participant any information (provided that the identities of the Testing Participant and, where relevant, the Device's Manufacturer are anonymised) relating to the Testing Issue which is likely to be of use to those categories of Testing Participants (provided that no such information should be shared to the extent it poses a risk of Compromise to the DCC Total System, User Systems, RDP Systems and/or Devices).

H14.41 Where a Testing Participant is dissatisfied with any of the determinations under Section H14.39 (or the speed with which any such determination is made), the Testing Participant may refer the matter to the DCC. On such a referral to the DCC, the DCC shall (as soon as reasonably practicable thereafter):

(a) consult with the Testing Participant and any other person as the DCC considers appropriate;

(b) either, depending on the subject matter of the disagreement:

(i) direct the DCC Service Provider to more quickly provide its determination of the matters set out in Section H14.39(a), (b) and/or (c); or

(ii) make the DCC's own determination of the matters set out in Section H14.39(a), (b) and/or (c);

(c) notify the Panel of the DCC's direction or determination under (b) above; and

(d) share with categories of Testing Participant any information (provided that the identities of the Testing Participant and, where relevant, the Device's Manufacturer are anonymised) relating to the Testing Issue which is likely to be of use to those categories of Testing Participants (provided that no such information should be shared to the extent it poses a risk of Compromise to the DCC Total System, User Systems, RDP Systems and/or Devices).

H14.42 Where the Testing Participant (or any Party) disagrees with the DCC's determination pursuant to Section H14.41 of the matters set out at Section H14.39(c) (but not otherwise), then the Testing Participant (or Party) may request that the DCC refers the matter to the Panel for its consideration (provided that the identities of the Testing Participant and, where relevant, the Device's Manufacturer are anonymised).

H14.43 Where a matter is referred to the Panel for its consideration pursuant to Section H14.42, the Panel shall consider the matter further to decide upon the actions (if any) to be taken to resolve the Testing Issue. Where the Panel considers the matter further, it may conduct such further consultation as it considers appropriate before making such a decision. Such a decision may include a decision that:

(a) an aspect of the Code could be amended to better facilitate achievement of the SEC Objectives;

(b) an aspect of the DCC Systems is inconsistent with the requirements of this Code;

(c) an aspect of one or more Devices is inconsistent with the requirements of this Code; or

(d) an aspect of the User Systems or the RDP Systems is inconsistent with the requirements of this Code.

H14.44 The Panel shall publish each of its decisions under Section H14.43 on the Website; provided that the identities of the Testing Participant and (where relevant) the Device's Manufacturer are anonymised, and that the Panel shall remove or redact information where it considers that publishing such information would be prejudicial to the interests of one or more Parties, or pose a risk of Compromise to the DCC Total System, User Systems, RDP Systems and/or Devices.

H14.45 A decision of the Panel under Section H14.43 is merely intended to facilitate resolution of the relevant Testing Issue. A decision of the Panel under Section H14.43 is without prejudice to any future decision by the Change Board and/or the Authority concerning a Modification Proposal, by the Secretary of State in exercising its powers under section 88 of the Energy Act 2008, by the Authority concerning the DCC's compliance with the DCC Licence, or by the Panel under Section M8 (Suspension, Expulsion and Withdrawal).

Radio Frequency Noise Testing

H14.46 The DCC shall provide a Testing Service (referred to as RF Noise Testing) to enable Testing Participants to test Devices to ensure they meet the requirements of the current Intimate Communications Hub Interface Specification (ICHIS) published on the DCC Website in accordance with SEC Section H12, so they do not impact WAN or HAN performance.

H14.47 The following shall apply in respect of RF Noise Testing:

(a) the following persons shall be eligible to undertake RF Noise Testing: Parties and persons that have signed agreements based on the Specimen Enabling Services Agreement (subject only to such variations from such specimen form as are reasonable in the circumstances, including so as to require compliance with this Section H14);

(b) Testing Participants undertaking RF Noise Testing must each comply with such reasonable supplemental obligations as the DCC may notify to them from time to time (provided that such obligations are not inconsistent with the provisions of the Code that are in effect at that time); and

(c) the Testing Issue Resolution Process in Section H14.47 to H14.55 (General: Testing Issue Resolution Process) shall not apply to RF Noise Testing, but DCC must take reasonable steps to provide support and assistance to a person undertaking RF Noise Testing in order to assist that person in resolving Testing Issues encountered when undertaking RF Noise Testing.

H14.48 The DCC and the relevant Testing Participant in respect of the RF Noise Testing shall comply with any and all additional obligations concerning RF Noise Testing set out in the Enduring Testing Approach Document.

Interoperability and Innovation Events

H14.49 The DCC shall, from time to time and at its discretion, provide a Testing Service that provides a platform for Testing Participants to test connectivity, interoperability, interchangeability and functionality between SMETS2+ Devices.

H14.50 The DCC and the relevant Testing Participants in respect of Interoperability and Innovation Events shall comply with any and all additional obligations concerning Interoperability and Innovation Events set out in the Enduring Testing Approach Document.

GFI Testing

H14.51 The DCC shall provide GFI Testing Tools to Testing Participants upon request to support GFI Testing.

H14.52 The following shall apply in respect of GFI Testing:

(a) the following persons shall be eligible to undertake GFI Testing: Parties and persons that have signed agreements based on the Specimen Enabling Services Agreement (subject only to such variations from such specimen form as are reasonable in the circumstances, including so as to require compliance with this Section H14);

(b) the references in H14.42 to “Communications Hubs”, “DCC Systems” and “Devices” shall be interpreted as including references to prototypes of simulations of those things (and GFI Testing shall not include communication via the SM WAN, or a simulation of the SM WAN);

(c) Testing Participants undertaking GFI Testing must each comply with such reasonable supplemental obligations as the DCC may notify to them from time to time (provided that such obligations are not inconsistent with the provisions of the Code that are in effect at that time); and

(d) the Testing Issue Resolution Process in Section H14.47 to H14.55 (General: Testing Issue Resolution Process) shall not apply to GFI Testing, but DCC must take reasonable steps to provide support and assistance to a person undertaking GFI Testing in order to assist that person in resolving Testing Issues encountered when undertaking GFI Testing.

H14.53 The DCC and the relevant Testing Participant in respect of the GFI Testing shall comply with any and all additional obligations concerning GFI Testing set out in the Enduring Testing Approach Document.

Wired Instrumented Test Communications Hubs

H14.54 The DCC shall provide a Testing Service, which enables Testing Participants to undertake interoperability testing and message handling with a Test Communications Hub across a wired interface.

H14.55 The DCC and the relevant Testing Participant in respect of the Wired ITCH shall comply with any and all additional obligations concerning Wired ITCH set out in the Enduring Testing Approach Document.

DCC Boxed

H14.56 The DCC shall provide DCC Boxed to Testing Participants upon request, and subject to such Testing Participant agreeing to pay the applicable Charges.

H14.57 The following shall apply in respect of DCC Boxed:

(a) the following persons shall be eligible to use DCC Boxed: (i) Parties and (ii) persons that have signed agreements in accordance with Section H14.7;

(b) the Testing Issue Resolution Process in Section H14.37 to H14.45 (General: Testing Issue Resolution Process) shall not apply to DCC Boxed, but Section H14.33 shall apply in relation to DCC Boxed, so that the DCC must (subject to payment of the applicable Charges) take reasonable steps to provide support and assistance to a person using DCC Boxed in order to assist that person in resolving Testing Issues encountered when using DCC Boxed.

H14.58 The DCC and the relevant Testing Participant in respect of DCC Boxed shall comply with any and all additional obligations concerning DCC Boxed set out in the Enduring Testing Approach Document.

H15. DCC GATEWAY CONNECTIONS

Obligation to Maintain DCC Gateway Connections

H15.1 The DCC shall maintain each DCC Gateway Connection and make it available subject to and in accordance with the provisions of this Section H15.

H15.2 The DCC shall ensure that each DCC Gateway Connection is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3).

H15.3 No Party may use a DCC Gateway Connection for any purposes other than accessing, and sending and receiving Data via, the DCC Interfaces (and subject to the provisions of this Code applicable to each DCC Interface).

Requests for DCC Gateway Connections

H15.4 Each Party other than the DCC may request (in accordance with this Section H15 and as further described in the DCC Gateway Code of Connection) as many DCC Gateway Connections as the Party wishes, in each case using the DCC Gateway Bandwidth Option of the Party's choice.

H15.5 In order to assist a Party in determining which DCC Gateway Bandwidth Option to request (or, in the case of connections using a DCC Gateway HV Connection, the size of the bandwidth required), the DCC shall (on request) provide any Party with information regarding the size of the different message types that can be sent via the DCC User Interface.

H15.6 Within 5 Working Days following receipt of any request from a Party for a DCC Gateway Connection at a premises, the DCC shall:

(a) where the request does not include all the information required in accordance with the DCC Gateway Connection Code of Connection, notify the Party that this is the case and provide reasonable assistance to the Party in re-submitting its request; or

(b) undertake a desk-based assessment as described in the DCC Gateway Connection Code of Connection, and provide a response to the Party in respect of that premises under Section H15.7, H15.8 or H15.9 (as applicable).

H15.7 In the case of a request for a DCC Gateway LV Connection, and where the DCC's desk-based assessment indicates that a physical site assessment is not required, the DCC shall provide an offer to the Party setting out:

(a) the DCC's reasonable estimate of the likely bandwidth of the connection once made;

(b) the date from which the DCC will provide the connection;

(c) the connection Charges and annual Charges that will apply in respect of the connection; and

(d) the connection period for which the connection will be made available.

H15.8 In the case of a request for a DCC Gateway LV Connection, and where the DCC's desk-based assessment indicates that a physical site assessment is required, the DCC shall notify the requesting Party that this is the case, and (unless the DCC is not reasonably able to do so without undertaking a physical site assessment, and subject to further information which may become available as a result of the physical site assessment) notify the Party of:

(a) the DCC's reasonable estimate of the likely bandwidth of the connection once made;

(b) the date from which the DCC will provide the connection;

(c) the connection Charges and annual Charges that will apply in respect of the connection; and

(d) the connection period for which the connection will be made available.

H15.9 In the case of a request for a DCC Gateway HV Connection, the DCC shall notify the Party that a physical site assessment is required, and (unless the DCC is not reasonably able to do so without undertaking a physical site assessment, and subject to further information which may become available as a result of the physical site assessment) notify the Party of:

(a) the date from which the DCC will provide the connection;

(b) the connection Charges and annual Charges that will apply in respect of the connection; and

(c) the connection period for which the connection will be made available.

Physical Site Assessments

H15.10 In the case of a notice to a Party under Section H15.8 or H15.9, the Party has 30 days following receipt of such notice to confirm to the DCC that the Party wishes the DCC to proceed with the physical site assessment. In the absence of such confirmation, the Party shall be deemed to have opted not to proceed.

H15.11 Where the DCC has received a confirmation in accordance with Section H15.10, then the DCC shall, within 30 days thereafter, complete the physical site assessment. The Party requesting the connection shall ensure that the DCC has such access to the Party's premises as the DCC may reasonably require in order to undertake such site assessment. The DCC shall ensure that all persons exercising such rights of access do so in compliance with the applicable site rules and reasonable instructions of those in control of the premises.

H15.12 The DCC shall, within 10 Working Days after completing a physical site assessment pursuant to Section H15.11, provide an offer to the Party that requested a connection at that premises setting out:

(a) any supplementary conditions which will apply in respect of the connection (in addition to the provisions of this Code) required as a consequence of matters identified in the site assessment;

(b) (in the case of DCC Gateway LV Connections) the DCC's reasonable estimate of the likely bandwidth of the connection once made;

(c) the date from which the DCC will provide the connection;

(d) the connection Charges and annual Charges that will apply in respect of the connection; and

(e) the connection period for which the connection will be made available.

Initial Provision of a DCC Gateway Connection

H15.13 In the case of an offer to a Party under Section H15.7 or H15.12, the Party has 30 days following receipt of such offer to confirm to the DCC that the Party accepts that offer. In the absence of such confirmation, the Party shall be deemed to have opted not to accept the offer (which shall lapse).

H15.14 Where a Party accepts an offer as described in Section H15.13, the DCC shall take all reasonable steps to provide the requested DCC Gateway LV Connection or DCC Gateway HV Connection by the date set out in the accepted offer (subject to payment of any applicable Charges).

H15.15 In the event that the DCC will be delayed in providing the requested DCC Gateway Connection, the DCC shall notify the relevant Party of the delay (including reasons for the delay) and of the revised connection date (being as soon a reasonably practicable thereafter), and shall take all reasonable steps to provide the requested connection by that revised date.

Use of a DCC Gateway Connection

H15.16 Subject to Section H15.3, the Party that requested a DCC Gateway Connection at a premises shall be entitled to use that connection for as long as the DCC is obliged to make it available in accordance with Section H15.18 (provided that such Party may transfer its right in respect of that DCC Gateway Connection to another Party on both such Parties giving notice to the DCC referring to this Section H15.16).

H15.17 The DCC Gateway Party may notify the DCC of the other Parties (if any) that are (subject to Section H15.3) entitled to share (or no longer entitled to share) use of that DCC Gateway Connection, and in respect of which DCC Interfaces.

Ongoing Provision of a DCC Gateway Connection

H15.18 Once a DCC Gateway Connection has been established at a premises on behalf of a DCC Gateway Party:

(a) the DCC shall make the connection available to the DCC Gateway Party in accordance with this Code until the DCC Gateway Party notifies the DCC that the Party wishes to cancel the connection (on not less than three months' prior notice);

(b) the DCC shall give the DCC Gateway Party four months' advance notice of the date on which the period of connection referred to in the accepted connection offer is due to expire (or of the date on which any period of extension pursuant to paragraph (c) below is due to expire), and shall at the same time confirm the annual Charges that will apply if the connection is not cancelled;

(c) on the expiry of a period referred to in paragraph (b) above, unless the DCC Gateway Party cancels the connection in accordance with paragraph (a) above, the period of connection shall be extended for a year (which will give rise to an additional annual Charge);

(d) the DCC Gateway Party and the DCC shall comply with the provisions of the DCC Gateway Connection Code of Connection applicable to the DCC Gateway Bandwidth Option utilised at the connection (and the DCC may limit the use of the connection where the DCC Gateway Party fails to do so and where this is provided for in the DCC Gateway Connection Code of Connection);

(e) the DCC shall, on request, provide the DCC Gateway Party with a report on the performance of its connection as further set out in the DCC Gateway Connection Code of Connection; and

(f) in the case of DCC Gateway HV Connections, the DCC Gateway Party may increase or decrease the bandwidth of its connection in accordance with (and subject to the limitation provided in) the DCC Gateway Code of Connection (provided that, in the case of decreases, the applicable Charges may not alter as a result).

H15.19 The cancellation of any DCC Gateway Connection pursuant to Section H15.18(a), is without prejudice to:

(a) the right of the DCC Gateway Party to apply for another connection under Section H15.4; and

(b) the obligation of the DCC Gateway Party to pay the applicable Charges for the full duration of the period of connection referred to in the accepted connection offer or any period of extension under Section H15.18(c).

DCC Gateway Equipment

H15.20 In first providing a DCC Gateway Connection at a premises, the DCC shall procure that the DCC Gateway Equipment is installed at the relevant premises, and that the DCC Gateway Equipment is installed in accordance with Good Industry Practice and all applicable Laws and Directives.

H15.21 Following its installation at a premises, the DCC shall ensure that the DCC Gateway Equipment is operated and maintained in accordance with Good Industry Practice, and that it complies with all applicable Laws and Directives. The DCC shall maintain a record of the DCC Gateway Equipment installed at each DCC Gateway Party's premises from time to time, and of the point of its connection to that Party's Systems.

H15.22 The DCC Gateway Party at whose premises the DCC Gateway Equipment is (or is to be) installed shall provide the DCC with such access to that premises as the DCC may reasonably require in order to allow it to undertake the installation, maintenance, relocation or removal of the DCC Gateway Equipment. The DCC shall ensure that all persons exercising such rights of access do so in compliance with the site rules and reasonable instructions of the DCC Gateway Party.

H15.23 The DCC Gateway Party at whose premises the DCC Gateway Equipment is (or is to be) installed shall be entitled to witness and inspect the installation, maintenance, relocation or removal of the DCC Gateway Equipment. No such witnessing or assessment shall relieve the DCC of its obligations under this Code.

H15.24 Each DCC Gateway Party shall ensure that no damage is deliberately or negligently caused to the DCC Gateway Equipment installed at its premises (save that such a Party may take emergency action in accordance with Good Industry Practice to protect the health and safety of persons or to prevent imminent damage to property).

H15.25 The DCC Gateway Equipment shall (as between the DCC and each other Party) remain the property of the DCC. The DCC Gateway Equipment is installed at the DCC's risk, and no other Party shall have liability for any loss of or damage to the DCC Gateway Equipment unless and to the extent that such loss or damage arose as a result of that Party's breach of this Code (including that Party's obligations under Section H15.24).

H15.26 No Party other than the DCC shall hold itself out as the owner of the DCC Gateway Equipment, or purport to sell or otherwise dispose of the DCC Gateway Equipment.

H15.27 Where a DCC Gateway Party wishes to alter the location of the DCC Gateway Equipment at the Party's premises, then that Party shall make a request to the DCC, and the DCC shall either (in accordance with any provisions of the DCC Gateway Connection Code of Connection concerning the same):

(a) notify such Party that it is entitled to relocate the DCC Gateway Equipment within the Party's premises, in which case the Party may move such equipment (and, where it does so, it shall do so in accordance with Good Industry Practice and all applicable Laws and Directives); or

(b) notify such Party that the DCC Gateway Equipment must be relocated by the DCC, in which case the DCC shall (subject to payment of any applicable Charges) move the DCC Gateway Equipment in accordance with Good Industry Practice and all applicable Laws and Directives.

H15.28 Where the DCC's obligation to make a DCC Gateway Connection available ends in accordance with Section H15.18(a) or the DCC Gateway Party for a DCC Gateway Connection ceases to be a Party in accordance with Section M8 (Suspension, Expulsion and Withdrawal), then the DCC shall, within 30 days thereafter:

(a) cease to make that DCC Gateway Connection available; and

(b) remove the DCC Gateway Equipment from the relevant premises in accordance with Good Industry Practice and all applicable Laws and Directives.

DCC Gateway Connection Disputes

H15.29 Where a DCC Gateway Party wishes to raise a dispute in relation to its request for a DCC Gateway Connection (or the extension of its period of connection or increases or decreases in the bandwidth of its connection, in each case under Section H15.18), then the dispute may be referred to the Panel for determination. Where that Party or the DCC disagrees with any such determination, then it may refer the matter to the Authority for its determination, which shall be final and binding for the purposes of this Code.

H16. INTEROPERABILITY CHECKER SERVICE

The Responsibility of Supplier Parties

H16.1 Each Supplier Party shall ensure that Energy Consumers at premises supplied by it with electricity and/or gas shall:

(a) have access to the information described in Section H16.2;

(b) be able to access that information in the manner described in Section H16.4; and

(c) have such access in such manner during the period determined in accordance with Section H16.5.

H16.2 The information described in this Section (the "**Interoperability Data**") is, in respect of each premises, information as to:

(a) whether the supply of electricity or the supply of gas (as determined by the request made by the Energy Consumer) to the premises is made through an Enrolled Smart Metering System; and

(b) where either the supply of electricity or the supply of gas is made through an enrolled Smart Metering System:

(i) whether the supply of other fuel is also made through an Enrolled Smart Metering System;

(ii) the name of the Electricity Supplier or the name of the Gas Supplier (or both as the case may be);

(iii) whether any such Enrolled Smart Metering System is a SMETS1 Smart Metering System or a SMETS2+ Smart Metering System; and

(iv) where any such Enrolled Smart Metering System is a SMETS1 Smart Metering System, the name of each electricity and/or gas supplier (as the case may be) which has notified the DCC that it is its policy, if it commences to supply premises at which a Smart Metering System of that type is installed, to operate that Smart Metering System in Smart Mode.

H16.3 For the purposes of Section H16.2(b)(iv), the name of the electricity or gas supplier shall include, where applicable, any brand name that the electricity or gas supplier has notified to the DCC as a brand name that it uses in any communications with or to Energy Consumers.

H16.4 The Interoperability Data in respect of any premises shall be able to be accessed by each Energy Consumer at those premises on the request of that Energy Consumer, by means of remote communications, and free of charge.

H16.5 The Interoperability Data shall be capable of being accessed by an Energy Consumer:

(a) from any such date as may be specified in a direction issued by the Secretary of State to all Supplier Parties and the DCC; and

(b) until any such date as may be specified in a further direction issued by the Secretary of State to all Supplier Parties and the DCC,

and for these purposes the Secretary of State may exercise the power to give a direction under Sections H16.5(a) and (b) more than once.

Provision of Data by Suppliers to the DCC

H16.6 For the purpose of establishing a record of the Interoperability Data referred to in Section H.16.2(b)(iv), each Supplier Party may provide the DCC, in such manner and in such form as may be specified by the DCC, with a statement which:

(a) is in respect of each type of Smart Metering System which at that time constitutes an Enrolled SMETS1 Smart Metering System at any premises;

(b) indicates whether the policy of that Supplier Party, if it commenced (at the date of the statement) to supply premises at which that type of Smart Metering System was installed, would be, subject to any exceptions identified by the Licensee in the statement, to operate it in Smart Mode; and

(c) is accurate and up to date.

H16.7 Where a Supplier Party provides a statement to the DCC in accordance with Section H16.6, it may also notify the DCC of any brand name (including where it works in partnership with a White Label Tariff Provider any brand name of the White Label Tariff Provider) it uses when engaging in activities that are directed at, or incidental to identifying and communicating with, Energy Consumers in relation to the supply of electricity or gas.

Obligations of the DCC

H16.8 On behalf of all Supplier Parties, and for the purpose of ensuring that each Supplier Party can discharge its responsibility under Section H16.1, the DCC shall provide a service to be known as the " **Interoperability Checker Service**", being a service:

(a) by means of which the Interoperability Data in respect of each premises to which gas and/or electricity is supplied shall be made available to Energy Consumers at those premises so that it may be accessed by each Energy Consumer on request and free of charge by means of remote communications; and

(b) that is provided during the period determined in accordance with Section H16.5.

H16.9 For the purpose of providing the Interoperability Checker Service in accordance with Section H16.8, the DCC shall enter into an agreement in accordance with Sections H16.10 to H16.12 with either:

(a) Citizens Advice and Citizens Advice Scotland; or

(b) such other person as may, in substitution for those named in paragraph (a), be specified in a direction issued by the Secretary of State to the DCC.

H16.10 The agreement referred to in Section H16.9 shall be an agreement under which the person identified in that Section shall, by means of:

(a) one or more dedicated pages on a website; or

(b) a dedicated smartphone or tablet application,

maintained by it or on its behalf, agree to provide a facility through which Energy Consumers may request and obtain the Interoperability Data via remote communications.

H16.11 The agreement referred to in Section H16.9 shall, as a minimum, contain terms which require that the facility provided under that agreement is designed to ensure that:

(a) any person requesting Interoperability Data shall be able to obtain the such data only on providing information that reasonably establishes that he or she is an Energy Consumer at the premises to which the Interoperability Data relates;

(b) appropriate safeguards are in place to ensure that Interoperability Data may be accessed only by individual Energy Consumers, and may not be accessed by means of software capable of making automated requests in respect of multiple premises;

(c) no Interoperability Data, or any information provided by Energy Consumers for the purposes of requesting the Interoperability Data, may be accessed, retained or processed by the person providing the facility:

(i) in such a manner as may be used to provide, or used in conjunction with the provision of, any other service by that person to an Energy Consumer; or

(ii) for any purpose other than ensuring the effective provision of the facility.

H16.12 A copy of the agreement entered into by the DCC in accordance with Section H16.9 shall, as soon as practicable after it has been entered into, be submitted by the DCC to the Secretary of State.

H16.13 The DCC shall have no liability to any Party where it provides (or does not provide) the Interoperability Checker Service in circumstances where it should not (or should) have done so, to the extent that the same arises due to inaccuracies in the Interoperability Data that are not caused by the DCC.

Provision of Data by the DCC to Suppliers

H16.14 The DCC shall provide Supplier Parties, in such manner and in such form as may be determined from time to time by the DCC, with a statement that sets out each particular type of SMETS1 Smart Metering System which at that time is or can become an Enrolled SMETS1 Smart Metering System.

Definitions

H16.15 For the purposes of this Section H16:

Smart Mode	means, in respect of a Smart Metering System of a particular type, that a Supplier Party does or will, on a regular basis, send communications to and receive communications from that Smart Metering System by means of the DCC's Communications Services.

H17. MAP / MANUFACTURER REPORTS

H17.1 Subject to Section H17.2, the following entities shall be eligible to request and receive reports under this Section H17 in respect of Smart Meters: (a) the Manufacturer of the Smart Meter; and/or (b) the Meter Asset Provider of the Smart Meter.

H17.2 The DCC shall only provide reports under this Section H17 to Meter Asset Providers and Manufacturers which are either: (a) a Party; or (b) party to an agreement in the form of the Specimen Enabling Services Agreement.

H17.3 In order to receive reports in respect of a particular Smart Meter, the entity requesting the report will need to provide reasonable evidence to the DCC that such entity is the Manufacturer or Meter Asset Provider of the Smart Meter. The DCC shall not provide reports to an entity unless the DCC has obtained such reasonable evidence of such entity's status as Manufacturer or Meter Asset Provider.

H17.4 Reports under this Section H17 can be requested quarterly, monthly or on an ad hoc basis (but not more than once each month). The DCC shall provide the reports in accordance with such requests.

H17.5 Each report under this Section H17 will set out for each and every Smart Meter for which the recipient is the Manufacturer or Meter Asset Provider:

(a) Smart Meter ID;

(b) Smart Meter Type, Smart Meter Model and Manufacturer;

(c) firmware version;

(d) SMI Status;

(e) Region;

(f) the Registered Supplier(s) and its/their effective from date(s); and

(g) Communications Hub make, model and firmware version.

H17.6 The DCC shall provide reports under this Section H17 via its preferred file sharing platform, and shall mark them as confidential and not to be shared with any third party apart from the Registered Supplier Party.

H17.7 Each entity which obtains one or more reports pursuant to this Section H17 undertakes to:

(a) only use the data contained in those reports for its internal business purposes;

(b) not sell or commercially exploit the data contained in those reports; and

(c) keep the data contained in those reports confidential in accordance with Section M4 (Confidentiality).

Contents

I DATA PRIVACY

I1. DATA PROTECTION AND ACCESS TO DATA

Without Prejudice

I1.1 The obligations of the DCC and each User under this Section I1 are without prejudice to any other obligations they each may have under the Data Protection Legislation and other Relevant Instruments, including any such obligations they each may have concerning Processing of Personal Data.

User Obligations

Consumption Data

I1.2 Each User undertakes that it will not request, in respect of a Smart Metering System, a Communication Service or Local Command Service that will result in it obtaining Consumption Data, unless:

(a) the User has the Appropriate Permission in respect of that Smart Metering System; and

(b) (where that User is not the Import Supplier, Export Supplier, Gas Supplier, Electricity Distributor or Gas Transporter for that Smart Metering System) the User has, at the point of obtaining Appropriate Permission and at such intervals as are reasonably determined appropriate by the User for the purposes of ensuring that the Energy Consumer is regularly updated of such matters, notified the Energy Consumer in writing of:

(i) the time periods (by reference to length) in respect of which the User obtains or may obtain Consumption Data;

(ii) the purposes for which that Consumption Data is, or may be, used by the User; and

(iii) the Energy Consumer’s right to object or withdraw consent (as the case may be) to the User obtaining or using that Consumption Data, and the process by which the Energy Consumer may object or withdraw consent.

Service Requests

I1.3 Each User undertakes that it will not send either a 'Join Service' or 'Unjoin Service' Service Request (respectively to join a Type 2 Device to, or unjoin it from, any Smart Meter or Device Associated with a Smart Meter) unless:

(a) the User is the Responsible Supplier for the Smart Meter or Associated Device to which the Service Request is sent, and sends that Service Request for the purpose of complying with an obligation under its Energy Supply Licence; or

(b) the Energy Consumer at the premises at which the Smart Meter is located has given the User Unambiguous Consent, which has not been withdrawn, to (as the case may be):

(i) join that Type 2 Device to the Smart Meter or Associated Device, and the User has clearly informed the Energy Consumer before obtaining such Unambiguous Consent that a consequence of joining the Type 2 Device may be that Data relating to the Energy Consumer will be shared with third parties; or

(ii) unjoin it from the Smart Meter or Associated Device, save that the Responsible Supplier for a Smart Metering System at the premises need not obtain such Unambiguous Consent where it has reasonable grounds to believe that the Type 2 Device has Compromised or is likely to Compromise any Device forming part of that Smart Metering System (and the Responsible Supplier shall, where it unjoins a Type 2 Device in such circumstances, take all reasonable steps to inform the Energy Consumer that it has done so).

Access to Records

I1.4 Each User undertakes that it will not access (pursuant to Section H8.16) or request (pursuant to Section H8.17) the information described in Section H8.16(c), unless:

(a) the Energy Consumer at the premises at which the relevant Smart Meter is located has given the User Unambiguous Consent to do so and such consent has not been withdrawn; and

(b) the information is accessed solely for the purpose of its provision to that Energy Consumer.

Good Industry Practice

I1.5 Each User shall put in place and maintain arrangements designed in accordance with Good Industry Practice to ensure that each person from whom it has obtained consent pursuant to Section I1.2 to I1.4 is the Energy Consumer.

Processing of Personal Data by the DCC

I1.6 It is acknowledged that, in providing the Services to a User, the DCC may act in the capacity of 'Data Processor' on behalf of that User in respect of the Personal Data for which that User is the 'Data Controller'.

I1.6A The Personal Data which the DCC will Process as a Data Processor on behalf of Users will relate to Energy Consumers, and will include Personal Data which is included within messages sent and received by the DCC via the DCC User Interface or the Self- Service Interface, and/or which is included within messages sent or received by the DCC to or from Communications Hubs. The nature of such Personal Data will be that which is required or permitted to be included in such messages as described in this Code. The full description of the subject matter, the nature and purpose of the processing, and the type of personal data is as described by this Code as a whole.

I1.7 The DCC undertakes for the benefit of each User in respect of the Personal Data for which that User is the 'Data Controller' to:

(a) only Process that Personal Data for the purposes permitted by the DCC Licence and this Code (subject to paragraph (d) below);

(b) only Process that Personal Data for so long as it is required to do so by the DCC Licence and this Code;

(c) undertake the Processing of that Personal Data in accordance with the DCC Licence and this Code, (to the extent consistent with the DCC Licence and this Code) on the documented instructions of the User, and (subject to the foregoing requirements of this Section I1.7(c)) not in a manner that the DCC knows (or should reasonably know) is likely to cause the User to breach its obligations under the Data Protection Legislation (subject to paragraph (d) below);

(d) if the DCC is aware that, or is of the opinion that, any requirement of paragraph (a) (b) or (c) above infringes the Data Protection Legislation, the DCC shall immediately inform the User of this giving details of the infringement or potential infringement (unless the DCC is prohibited from doing so by any of its other obligations under Laws and Directives);

(e) ensure that the DCC's personnel who are authorised to Process Personal Data are under enforceable obligations of confidentiality and are required only to Process that Personal Data in accordance with the DCC's obligations under the DCC Licence and this Code;

(f) having regard to the state of the art, the costs of implementation and the nature, scope, context and purposes of Processing as well as the risk of varying likelihood and severity for the rights and freedoms of Data Subjects, implement appropriate technical and organisational measures to protect that Personal Data in particular from accidental or unlawful loss, destruction, alteration or unauthorised disclosure of, or access to personal data transmitted, stored or otherwise Processed (such measures to at least be in accordance with Good Industry Practice and the requirements of Section G (Security));

(g) taking into account the nature of the Processing assist the User with its obligations to comply with Data Subjects' requests and Data Subjects' rights under the Data Protection Legislation in respect of that Personal Data through, insofar as is possible, the use of appropriate technical and organisational measures;

(h) taking into account the nature of the Processing and the information available to the DCC, assist the User in ensuring compliance with the User's obligations in Articles 32-36 of the General Data Protection Regulation (or its national equivalent), including:

  (i) notifying the User without undue delay if the DCC becomes aware of a breach of the Data Protection Legislation in relation to the Personal Data (including in the event of unauthorised access to such Personal Data); and

  (ii) providing full details of the relevant breach where caused by the DCC or any Sub-Processor without undue delay or, where necessary, in phases but always without further undue delay;

(i) provide reasonable assistance to the User in complying with any enquiry made, or investigation or assessment initiated, by the Information Commissioner or any other Competent Authority in respect of the Processing of that Personal Data pursuant to this Code;

(j) promptly notify the User in the event that the DCC Processes any of that Personal Data otherwise than in accordance with this Code (including in the event of unauthorised access to such Personal Data);

(k) notify the User of any complaint relating to the DCC's obligations under the Data Protection Legislation in respect of the Processing of that Personal Data pursuant to this Code;

(l) after the end of the provision of the Services to which the Processing of that Personal Data relates, at the written election of the User, either securely destroy the Personal Data or return it to the User together with all copies (save to the extent that the DCC is required by Laws and Directives to retain a copy of the Personal Data) and permit the Independent Privacy Auditor (on the instruction of SECCo on behalf of Users collectively), on giving reasonable prior notice of its intention to audit,

(m) to audit the DCC's compliance with this Section I1.7 during normal business hours, and shall make available to the Independent Privacy Auditor all information, systems and staff reasonably necessary for the Independent Privacy Auditor to conduct such audit. The number of audits shall be limited to no more than once in every twelve (12) calendar month period unless more frequent audits are required under the Data Protection Legislation or the Panel has grounds to suspect there has or is likely to be a breach of the Data Protection Legislation. Where practicable, DCC shall be provided with an opportunity to comment upon the scope of an audit in advance and any audit shall be carried out in such a way that interruption to DCC's operations is minimised as far as is reasonably possible.

DCC's Sub-Processors

I1.8 The DCC shall ensure that its Sub-Processor(s) are subject to written contractual obligations in respect of the Processing of Personal Data which are at least equivalent to the obligations imposed on the DCC under the DCC Licence and this Code, including obligations which provide sufficient guarantees from the Sub-Processor that the Processing meets the requirements stated at any time in the Data Protection Legislation.

I1.9 Each User hereby gives its general authorisation to the DCC to engage Sub-Processor(s) who are appointed in accordance with the DCC Licence and does not object to the engagement by the DCC of any Sub-Processor provided that in engaging the Sub- Processor the DCC complies with the DCC Licence and this Code and publishes on its Website the identity of the Sub-Processor(s) from time to time. Each User hereby consents to Processing by each such Sub-Processor who is appointed in accordance with the DCC Licence and this Code.

Records

I1.10 The DCC and each User will each maintain in accordance with Good Industry Practice all such records and other information as is necessary to enable the DCC and each such User to demonstrate that it is complying with its respective obligations under Sections I1.2 to I1.9.

I1.11 The DCC shall make available to each User all information reasonably necessary to demonstrate compliance by the DCC with Sections I1.6 to I1.9, but only insofar as such information relates to the Personal Data for which that User is the Data Controller.

General Compliance with Data Protection Legislation

I1.12 Each of the DCC, SECCo, and each User undertakes to comply with its obligations under the Data Protection Legislation in respect of Personal Data they Process as a Data Controller or Data Processor pursuant to this Code.

Permission for Gas Supplier to Store Data on Shared SMETS1 Installation

I1.13 In the case of a SMETS1 GSME which forms part of the same SMETS1 Installation as a SMETS1 ESME, and where the Gas Supplier for the SMETS1 GSME is a different person to the Import Supplier for the SMETS1 ESME, the Import Supplier hereby agrees to permit the Gas Supplier to store Data on the SMETS1 GPF which forms part of that SMETS1 Installation in the manner envisioned by SMETS1.

I2. OTHER USER PRIVACY AUDITS

Procurement of the Independent Privacy Auditor

I2.1 The Panel shall procure the provision of privacy audit services:

(a) of the scope specified in Section I2.3;

(b) from a person who:

(i) is suitably qualified, and has the necessary experience and expertise, to provide those services; and

(ii) is suitably independent in accordance with Section I2.4,

and that person is referred to in this Section I2 as the "**Independent Privacy Auditor**".

I2.2 The Panel may appoint more than one person to carry out the functions of the Independent Privacy Auditor.

Scope of Privacy Audit Services

I2.3 The privacy audit services specified in this Section I2.3 are services in accordance with which, for the purpose of providing reasonable assurance that Other Users are complying with their obligations under Sections I1.2 to I1.5 (User Obligations), the Independent Privacy Auditor shall:

(a) carry out Privacy Assessments at such times and in such manner as is provided for in this Section I2;

(b) produce Privacy Assessment Reports in relation to Other Users that have been the subject of a Privacy Assessment;

(c) receive and consider Privacy Assessment Responses;

(d) otherwise, at the request of, and to an extent determined by, the Panel carry out an assessment of the compliance of any Other User with its obligations under Sections I1.2 to I1.5;

(e) provide to the Panel such advice and support as may be requested by it from time to time, including in particular advice in relation to the suitability of any remedial action plan for the purposes of Section M8.4 of the Code (Consequences of an Event of Default);

(f) provide to the Authority such advice and support as it may request in relation to any disagreements with a decision of the Panel in respect of which the Authority is required to make a determination in accordance with this Section I2; and

(g) undertake such other activities, and do so at such times and in such manner, as may be further provided for in this Section I2.

Independence Requirement

I2.4 The Independent Privacy Auditor shall be treated as suitably independent in accordance with this Section I2.4 only if it satisfies:

(a) the requirements specified in Section I2.6; and

(b) the requirement specified in Section I2.7.

I2.5 For the purposes of Sections I2.6 and I2.7:

(a) a "**Relevant Party**" means any Party in respect of which the Independent Privacy Auditor carries out functions under this Section I2; and

(b) a "**Relevant Service Provider**" means any service provider to a Relevant Party from which that Party acquires capability for a purpose related to its compliance with its obligations as an Other User under Section I1.2 to I1.5.

I2.6 The requirements specified in this Section I2.6 are that:

(a) no Relevant Party or any of its subsidiaries, and no Relevant Service Provider or any of its subsidiaries, holds or acquires any investment by way of shares, securities or other financial rights or interests in the Independent Privacy Auditor;

(b) no director of any Relevant Party, and no director of any Relevant Service Provider, is or becomes a director or employee of, or holds or acquires any investment by way of shares, securities or other financial rights or interests in, the Independent Privacy Auditor; and

(c) the Independent Privacy Auditor does not hold or acquire a participating interest (as defined in section 421A of the Financial Services and Markets Act 2000) in any Relevant Party or any Relevant Service Provider,

(but for these purposes references to a Relevant Service Provider shall not include the Independent Privacy Auditor where it acts in that capacity).

I2.7 The requirement specified in this Section I2.7 is that the Independent Privacy Auditor is able to demonstrate to the satisfaction of the Panel that it has in place arrangements to ensure that it will at all times act independently of any commercial relationship that it has, has had, or may in future have with a Relevant Party or Relevant Service Provider (and for these purposes a 'commercial relationship' shall include a relationship established by virtue of the Independent Privacy Auditor itself being a Relevant Service Provider to any Relevant Party).

Compliance of the Independent Privacy Auditor

I2.8 The Panel shall be responsible for ensuring that the Independent Privacy Auditor carries out its functions in accordance with the provisions of this Section I2.

Other Users: Duty to Cooperate in Assessment

I2.9 Each Other User shall do all such things as may be reasonably requested by the Panel, or by any person acting on behalf of or at the request of the Panel (including in particular the Independent Privacy Auditor), for the purposes of facilitating an assessment of that Other User's compliance with its obligations under Sections I1.2 to I1.5.

I2.10 For the purposes of Section I2.9, an Other User shall provide the Panel (or the relevant person acting on its behalf or at its request) with:

(a) all such Data as may reasonably be requested, within such times and in such format as may reasonably be specified;

(b) all such other forms of cooperation as may reasonably be requested, including in particular:

(i) access at all reasonable times to such parts of the premises of that Other User as are used for, and such persons engaged by that Other User as carry out or are authorised to carry out, any activities related to its compliance with its obligations under Sections I1.2 to I1.5; and

(ii) such cooperation as may reasonably by requested by the Independent Privacy Auditor for the purposes of carrying out any Privacy Assessment in accordance with this Section I2.

Categories of Assessment

I2.11 I2.11 For the purposes of this Section I2, there shall be the following three categories of privacy assessment:

(a) a Full Privacy Assessment (as further described in Section I2.12);

(b) a Random Sample Privacy Assessment (as further described in Section I2.13); and

(c) a Privacy Self-Assessment (as further described in Section I2.14).

I2.12 A "**Full Privacy Assessment**" shall be an assessment carried out by the Independent Privacy Auditor in respect of an Other User to identify the extent to which that Other User:

(a) is compliant with each of its obligations under Sections I1.2 to I1.5; and

(b) has in place the systems and processes necessary for ensuring that it complies with each such obligation.

I2.13 A "**Random Sample Privacy Assessment**" shall be an assessment carried out by the Independent Privacy Auditor in respect of an Other User to identify the extent to which the Other User is compliant with each of its obligations under Sections I1.2 to I1.5 in relation to a limited (sample) number of Energy Consumers.

I2.14 A " **Privacy Self-Assessment**" shall be an assessment carried out by an Other User to identify the extent to which, since the last occasion on which a Privacy Assessment was carried out in respect of that Other User by the Independent Privacy Auditor, there has been any material change:

(a) in the arrangements that the Other User has in place to comply with its obligations under Sections I1.2 to I1.5; or

(b) in the quantity of Consumption Data being obtained by the Other User.

The Privacy Controls Framework

I2.15 The Panel shall develop and maintain a document to be known as the "**Privacy Controls Framework**" which shall:

(a) set out arrangements designed to ensure that Privacy Assessments are carried out appropriately for the purpose of providing reasonable assurance that Other Users are complying with (or, for the purposes of Section H1.10(d) (User Entry Process Requirements), are capable of complying with) their obligations under Sections I1.2 to I1.5; and

(b) for that purpose, in particular, specify the principles and criteria to be applied in the carrying out of any Privacy Assessment, including principles designed to ensure that Privacy Assessments take place on a consistent basis across all Other Users; and

(c) make provision for determining the timing, frequency and selection of Other Users for the purposes of Random Sample Privacy Assessments.

I2.16 In developing the Privacy Controls Framework, and prior to making any subsequent change to it, the Panel shall consult with and have regard to the views of all Parties, Citizens Advice and Citizens Advice Scotland, and the Authority.

I2.17 The Panel shall ensure that an up to date copy of the Privacy Controls Framework is made available to all Parties and is published on the Website.

Privacy Assessments: General Procedure

Privacy Controls Framework

I2.18 Each Privacy Assessment carried out by the Independent Privacy Auditor or an Other User shall be carried out in accordance with the Privacy Controls Framework.

The Privacy Assessment Report

I2.19 Following the completion of a Full Privacy Assessment or Random Sample Privacy Assessment, the Independent Privacy Auditor shall, in discussion with the Other User to which the assessment relates, produce a written report (a "**Privacy Assessment Report**") which shall:

(a) set out the findings of the Independent Privacy Auditor on all the matters within the scope of the Privacy Assessment;

(b) specify any instances of actual or potential non-compliance of the Other User with its obligations under Sections I1.2 to I1.5 which have been identified by the Independent Privacy Auditor;

(c) set out the evidence which, in the opinion of the Independent Privacy Auditor, establishes each of the instances of actual or potential non-compliance which it has identified.

I2.20 The Independent Privacy Auditor shall submit a copy of each Privacy Assessment Report to the Panel and to the Other User to which that report relates.

The Privacy Assessment Response

I2.21 Following the receipt by any Other User of a Privacy Assessment Report which relates to it, the Other User shall as soon as reasonably practicable, and in any event by no later than such date as the Panel may specify:

(a) produce a written response to that report (a "**Privacy Assessment Response**") which addresses the findings set out in the report; and

(b) submit a copy of that response to the Panel and the Independent Privacy Auditor.

I2.22 Where a Privacy Assessment Report specifies any instance of actual or potential non- compliance of an Other User with its obligations under Sections I1.2 to I1.5, the Other User shall ensure that its Privacy Assessment Response includes the matters referred to in Section I2.23.

I2.23 The matters referred to in this Section are that the Privacy Assessment Response:

(a) indicates whether the Other User accepts the relevant findings of the Independent Privacy Auditor and provides an explanation of the actual or potential non-compliance that has been identified; and

(b) sets out any steps that the Other User proposes to take in order to remedy and/or mitigate the actual or potential non-compliance, and identifies a timetable within which the Other User proposes to take those steps.

I2.24 Where a Privacy Assessment Response sets out any steps that an Other User proposes to take in accordance with Section I2.23(b), the Panel (having considered the advice of the Independent Privacy Auditor) shall review that response and either:

(a) notify the Other User that it accepts that the steps that the Other User proposes to take, and the timetable within which it proposes to take them, are appropriate to remedy and/or mitigate the actual or potential non-compliance specified in the Privacy Assessment Report; or

(b) seek to agree with the Other User such alternative steps and/or timetable as would, in the opinion of the Panel, be more appropriate for that purpose.

I2.25 Where a Privacy Assessment Response sets out any steps that an Other User proposes to take in accordance with Section I2.23(b), and where those steps and the timetable within which it proposes to take them are accepted by the Panel, or alternative steps and/or an alternative timetable are agreed between it and the Other User in accordance with Section I2.24, the Other User shall:

(a) take the steps that have been accepted or agreed (as the case may be) within the timetable that has been accepted or agreed (as the case may be); and

(b) report to the Panel:

(i) on its progress in taking those steps, at any such intervals or by any such dates as the Panel may specify;

(ii) on the completion of those steps in accordance with the timetable; and

(iii) on any failure to complete any of those steps in accordance with the timetable, specifying the reasons for that failure.

The Privacy Self-Assessment Report

I2.26 Following the completion of a Privacy Self-Assessment, the Other User which carried out that self-assessment shall as soon as reasonably practicable produce a written report (a "**Privacy Self-Assessment Report**") which shall set out the findings of the Other User, and describe the nature of any material change, since the last occasion on which a Privacy Assessment was carried out in respect of the Other User by the Independent Privacy Auditor, in respect of:

(a) the arrangements that the Other User has in place to comply with its obligations under Sections I1.2 to I1.5; or

(b) the quantity of Consumption Data being obtained by the Other User.

I2.27 A Other User which produced a Privacy Self-Assessment Report shall:

(a) ensure that the report is accurate, complete and not misleading; and

(b) submit a copy of the report to the Panel and the Independent Privacy Auditor.

I2.28 Within the period of time specified in the Privacy Controls Framework following the receipt by it of a Privacy Self-Assessment Report, the Independent Privacy Auditor shall either:

(a) notify the Other User that it accepts that report; or

(b) inform the Other User that it will be subject to an additional Privacy Assessment of such nature by such date as the Panel may specify.

Initial Full Privacy Assessment: User Entry Process

I2.29 Sections I2.31 to I2.36 set out the applicable privacy requirements referred to in Section H1.10(d) (User Entry Process Requirements).

I2.30 For the purposes of Sections I2.31 to I2.36, any reference in Sections I1.2 to I1.5 or the preceding provisions of this Section I2 to a 'User' or 'Other User' (or to any related expression which applies to Users), shall be read as including a reference (or otherwise applying) to any Party seeking to become a User by completing the User Entry Process for the User Role of Other User.

Initial Full Privacy Assessment

I2.31 For the purpose of completing the User Entry Process for the User Role of Other User, a Party wishing to act in that User Role shall be subject to a Full Privacy Assessment.

Panel: Setting the Assurance Status

I2.32 Following the receipt by it of the Privacy Assessment Report and Privacy Assessment Response produced after the initial Full Privacy Assessment, the Panel shall promptly consider both documents and set the assurance status of the Party, in relation to its compliance with each of its obligations under Sections I1.2 to I1.5, in accordance with Section I2.33.

I2.33 The Panel shall set the assurance status of the Party as one of the following:

(a) approved;

(b) approved, subject to the Party:

(i) taking such steps as it proposes to take in its Privacy Assessment Response in accordance with Section I2.23(b); or

(ii) both taking such steps and being subject to a further Privacy Assessment of such nature and by such date as the Panel may specify;

(c) deferred and:

(i) the Party having first taken such steps as it proposes to take in its Privacy Assessment Response in accordance with Section I2.23(b) and been subject to a further Privacy Assessment; and

(ii) the Panel having determined that it is satisfied, on the evidence of the further Privacy Assessment, that such steps have been taken; or

(d) rejected and:

(i) the Party shall have a second Full Privacy Assessment to address any issues identified by the Panel as being, in the opinion of the Panel, not adequately addressed in that response as submitted to Panel; and

(ii) upon completion of the second Full Privacy Assessment the Panel will reconsider the assurance status in accordance with Section I2.32.

Approval

I2.34 For the purposes of Sections H1.10(d) and H1.11 (User Entry Process Requirements):

(a) a Party shall be considered to have successfully demonstrated that it meets the applicable privacy requirements of this Section I2 when:

(i) the Panel has set its assurance status to 'approved' in accordance with either Section I2.33(a) or (b); or

(ii) the Panel has set its assurance status to 'deferred' in accordance with Section I2.33(c) and the requirements specified in that Section have been met; and

(b) the Panel shall notify the Code Administrator as soon as reasonably practicable after the completion of either event described in paragraph (a)(i) or (ii).

Obligations on an Approved Party

I2.35 Where the Panel has set the assurance status of a Party to 'approved subject to' specified in Section I2.33(b), the Party shall take the steps to which that approval is subject in accordance with that section.

Disagreement with Panel Decisions

I2.36 Where a Party disagrees with any decision made by the Panel in relation to it under Section I2.33, it may appeal that decision to the Authority and the determination of the Authority shall be final and binding for the purposes of the Code.

Privacy Assessments: Post-User Entry Process

I2.37 Following its initial Full Privacy Assessment for the purposes of the User Entry Process, an Other User shall be subject to annual Privacy Assessments as follows:

(a) in the first year after the year of its initial Full Privacy Assessment, to a Privacy Self-Assessment;

(b) in the immediately following year, to a Privacy Self-Assessment;

(c) in the next following year, to a Full Privacy Assessment; and

(d) in each year thereafter, to a category of Privacy Assessment which repeats the same annual sequence as that of paragraphs (a) to (c),

but these requirements shall be subject to the provisions of Section I2.38.

I2.38 An Other User:

(a) may, on the instruction of the Panel, or otherwise in accordance with the provisions of the Privacy Controls Framework, be subject to a Full Privacy Assessment or Random Sample Privacy Assessment at any time; and

(b) where it is subject to such a Privacy Assessment in a year in which it would otherwise have been required to carry out a Privacy Self-Assessment in accordance with Section I2.37, shall not be required to carry out that self-assessment in that year.

Privacy Self-Assessment

I2.39 I2.39 Where, in accordance with the requirements of this Section I2, an Other User is subject to a Privacy Self-Assessment in any year, that Other User shall:

(a) carry out the Privacy Self-Assessment during that year;

(b) do so in accordance with the Privacy Controls Framework; and

(c) ensure that the outcome of the Privacy Self-Assessment is documented and is submitted to the Independent Privacy Auditor for review by no later than the date which is 13 months after the date of the commencement of the previous Full Privacy Assessment or (if more recent) Privacy Self-Assessment.

Other Users: Obligation to Pay Explicit Charges

I2.40 Each Other User shall pay to the DCC all applicable Charges in respect of:

(a) all Privacy Assessments carried out in relation to it by the Independent Privacy Auditor;

(b) the production by the Independent Privacy Auditor of any Privacy Assessment Reports following such assessments; and

(c) all related activities of the Independent Privacy Auditor in respect of that Other User in accordance with this Section I2.

I2.41 Expenditure incurred in relation to Other Users in respect of the matters described in Section I2.40 shall be treated as Recoverable Costs in accordance with Section C8 (Panel Costs and Budgets).

I2.42 For the purposes of Section I2.40 the Panel shall, at such times and in respect of such periods as it may (following consultation with the DCC) consider appropriate, notify the DCC of:

(a) the expenditure incurred in respect of the matters described in Section I2.40 that is attributable to individual Other Users, in order to facilitate Explicit Charges designed to pass-through the expenditure to such Other Users pursuant to Section K7 (Determining Explicit Charges); and

(b) any expenditure incurred in respect of the matters described in Section I2.40 which cannot reasonably be attributed to an individual Other User.

J CHARGES

J1. PAYMENT OF CHARGES

Charges

J1.1 Each Party shall pay the Charges to the DCC, which Charges shall be determined in accordance with the Charging Statement applicable from time to time.

Invoicing of Charges

J1.2 Following the end of each month in which one or more Parties incurs Charges in accordance with the Charging Statement, the DCC shall prepare and submit to each such Party one or more invoices or one or more invoices with a separate accompanying statement (in either case, an "**Invoice**") showing:

(a) in respect of all Charges other than those referred to in Section J1.2(b):

(i) the date by which payment is due pursuant to Section J1.5;

(ii) a breakdown (in reasonable detail) of the Charges incurred by that Party in that month;

(iii) subject to Section J1.4, the amount of VAT payable on the above amounts;

(iv) any adjustment required pursuant to Section J1.9; and

(v) the total amount payable by that Party in respect of the above; and

(b) in respect of any Communications Hub Finance Charges which are required to be invoiced separately under the terms of a Direct Agreement with an Approved Finance Party:

(i) the date by which payment is due pursuant to Section J1.5;

(ii) a breakdown (in reasonable detail) of the Charges incurred by that Party in that month;

(iii) subject to Section J1.4, the amount of VAT payable on the above amounts;

(iv) any adjustment required pursuant to Section J1.9; and;

(v) the total amount payable by that Party in respect of the above.

J1.3 The DCC is not obliged to issue an Invoice to a Party in respect of a month under Section J1.2 where the aggregate Charges incurred by that Party in respect of that month are less than the Minimum Monthly Charge (inclusive of VAT). Where the DCC opts not to issue an Invoice to Party in respect of a month in reliance on this Section J1.3, the DCC shall carry forward the Charges incurred in respect of that month and aggregate them with the Charges incurred by that Party in respect of the following month for the purposes of Section J1.2. Notwithstanding the other provisions of this Section J1.3, the DCC must, in respect of each Party that has incurred Charges in respect of a Regulatory Year, issue at least one Invoice to that Party in respect of that Regulatory Year.

J1.4 The Charges stated in each Invoice shall be stated exclusive of VAT, which shall be added if appropriate at the rate prevailing at the relevant tax point. A Party shall only be required to pay VAT where the DCC provides an appropriate VAT invoice.

Payment of Charges

J1.5 Each Party shall pay the amount set out in an Invoice issued to it by the DCC by the "**Due Date**" for payment; being the later of:

(a) 5 Working Days following receipt of such invoice; and

(b) 8 Working Days following the end of the month to which such invoice relates.

J1.6 Without prejudice to a Party's right to dispute the Charges in accordance with Section J2 (Payment Default and Disputes), each Party shall pay the amount set out in each Invoice addressed to it by the Due Date for such payment regardless of any such dispute. Nevertheless, where the DCC agrees that an Invoice contains a manifest error, the DCC shall cancel that Invoice (which will not therefore be payable) and promptly issue a replacement Invoice.

J1.7 Payments shall be made in pounds sterling by transfer of funds to the credit of the account specified in the Invoice, and shall not be deemed to be made until the amount is available as cleared funds. Each payment shall identify within its reference the Invoice number to which that payment relates. The paying Party shall be responsible for all banking fees associated with the transfer of funds. The DCC may at its discretion specify a different account for amounts payable by way of the Communications Hub Finance Charges relating to each Approved Finance Party (separately from amounts payable in relation to each other Approved Finance Party and/or all other Charges). The accounts specified by the DCC for the purposes of amounts payable by way of the Communications Hub Finance Charges may be accounts held in the name of the relevant Approved Finance Party.

Estimation of Charges

J1.8 If any information that the DCC requires in order to prepare an Invoice is not available at the time that Invoice is prepared, then the DCC may prepare that Invoice based on its reasonable estimate of that information.

Adjustment of Charges

J1.9 Where:

(a) the DCC prepared an Invoice based on its estimate of any information, and the actual information subsequently becomes available to the DCC;

(b) there is a change to the information used by the DCC to prepare an Invoice (including following a reconciliation or amendment of Registration Data); or

(c) it is agreed (or determined), in accordance with Section J2.4 (Resolution of Payment Default), that there was an error in an Invoice,

then the DCC shall include an adjustment in the next Invoice for the relevant Party to be produced thereafter (or, where no Invoice is due to be produced, the DCC shall produce a separate Invoice for such purpose).

J1.10 Each adjustment to be included pursuant to Section J1.9 shall be:

(a) the difference between the amount included in the previous Invoice, and the amount that should have been included (being, as applicable, either an additional amount payable to the DCC, or a credit in favour of the relevant Party); plus

(b) interest on the amount of such difference calculated from day-to-day from the Due Date of the previous Invoice to (but excluding) the Due Date of the Invoice in which such adjustment is to be included (compounded monthly).

Interest Rate

J1.11 The interest rate applying for the purposes of Section J1.10 shall be the Non-Default Interest Rate.

Further Supporting Information

J1.12 The DCC shall, where requested by a Party, provide such additional information as that Party may reasonably request regarding the calculation of the Charges payable by that Party.

J2. PAYMENT DEFAULT AND DISPUTES

Notification of Payment Failure

J2.1 Where a Party fails to pay an amount set out in an Invoice by the relevant Due Date, then the DCC shall, on the Working Day following the Due Date, issue a notice to that Party:

(a) setting out the unpaid amount; and

(b) referring to the matters set out in Sections J2.2, J2.4, J2.5, J3.16 (where applicable), and M8.1(c) (Events of Default).

Default Interest

J2.2 Where a Party fails to pay an amount set out in an Invoice by the relevant Due Date, then that Party shall pay interest on that amount at the Default Interest Rate calculated from day-to-day from the Due Date to (but excluding) the date on which payment is made (compounded monthly).

Notification of Payment Disputes

J2.3 Where a Party wishes to dispute any amount set out in an Invoice addressed to it, then that Party shall nevertheless pay the full amount set out in the Invoice by the Due Date, and shall give notice to the DCC of the disputed amount and the reason for the dispute. A Party may not give notice under this Section J2.3 (or otherwise dispute an amount set out in an Invoice) more than 12 months after the Due Date for that Invoice.

Resolution of Payment Disputes

J2.4 Where a Party disputes, in accordance with Section J2.3, any amount set out in an Invoice addressed to it, then:

(a) such Party and the DCC shall each in good faith negotiate to resolve the dispute amicably and as soon as reasonably practicable after it arises;

(b) the DCC shall provide all such evidence in support of its position as the disputing Party may reasonably request, and the DCC shall provide such evidence within 5 Working Days after such request;

(c) no earlier than 1 Working Day after receipt from the DCC of the information requested under Section J2.4(b) (or, where the DCC does not comply with such request, on the expiry of the period referred to in that Section), the disputing Party may refer the dispute to the Panel, in which case each of the DCC and the disputing Party shall be entitled to provide written submissions in support of its position;

(d) where a dispute is referred to the Panel in accordance with Section J2.4(c), the Panel shall convene a meeting and determine the dispute within 10 Working Days of the reference being made (to which meeting representatives of the disputing Party and the DCC may be invited in accordance with Section C (Governance)); and

(e) where the Panel determines that there has been an overpayment to the DCC, the DCC shall include an adjustment in accordance with Section J1.9(c) to address such overpayment (or comply with any direction of the Panel to repay the relevant amount together with interest at the rate that would have applied had the adjustment been made in accordance with Section J1.9(c)).

J2.5 Section J2.4, and any determination by the Panel pursuant thereto, are without prejudice to the following rights of the Parties:

(a) where the amount set out in an Invoice addressed to a Party is disputed on the grounds of whether or not the Charges were calculated and levied in accordance with the Charging Methodology and the Charging Statement, then either of that Party or the DCC may refer the matter to the Authority for determination pursuant to Condition 20 of the DCC Licence; or

(b) where the amount set out in an Invoice addressed to a Party is disputed on any other grounds, then either of that Party or the DCC may refer the matter to arbitration in accordance with Section M7 (Dispute Resolution).

Pursuing Non-Payment

J2.6 Where the DCC has served a notice in accordance with Section J2.1 in respect of Charges payable by a Party, and such Charges have not been paid within three (3) Working Days following that notice, the DCC shall:

(a) as required by Section M8.2 (Notification of Events of Default), notify the Panel that an Event of Default has occurred in respect of that Party under Section M8.1(c); and

(b) the DCC shall take all reasonable steps and proceedings (in consultation with the Panel) to pursue and recover the unpaid amount (together with interest), and the DCC shall take all reasonable steps to gain agreement from the Panel for the DCC's approach, and the DCC shall continue with such steps and proceedings unless and until the Panel (whether on the application of the DCC or otherwise) determines that it would not be worthwhile to do so in the circumstances (having regard to, amongst other things, the DCC’s duties under part D of Condition 11 of the DCC Licence).

J2.7 Any Party may appeal the decision of the Panel under Section J2.6 to the Authority, and the DCC shall comply with any decision of the Authority in respect of such matter (which shall be final and binding, but without prejudice to the Panel's ability to make a further decision under Section J2.6 following a material change in circumstances).

Records

J2.8 Without prejudice to any other requirements under Laws or Directives, the DCC shall maintain records of each Invoice (together with reasonable supporting evidence for the Charges levied in the Invoice) for a period of at least 18 months following the date of the Invoice.

J3. CREDIT COVER REQUIREMENT

Obligation to Provide Credit Support

J3.1 Each Party shall provide Credit Support to the DCC in one or more of the following forms:

(a) a Bank Guarantee;

(b) a Letter of Credit; and/or

(c) a Cash Deposit.

J3.2 For clarity, a Parent Company Guarantee does not constitute Credit Support. However, provision of a Parent Company Guarantee alters a Party's Credit Cover Requirement calculation (see Section J3.15).

Amount of Credit Support to be Provided

J3.3 Each Party shall provide and maintain Credit Support with an aggregate value equal to or greater than that Party's Credit Cover Requirement.

J3.4 The DCC shall calculate each Party's "**Credit Cover Requirement**" from time to time (and at least once a month) as follows:

(a) the Party's Value at Risk (see Section J3.6); minus

(b) the Party's Unsecured Credit Limit (see Section J3.7),

provided that, where a Party's Credit Cover Requirement would otherwise be equal to or less than the Credit Cover Minimum Threshold, the Party's Credit Cover Requirement shall be deemed to be zero.

J3.5 Except where the Party's Credit Cover Requirement is zero (or deemed to be zero as described in Section J3.4), the DCC shall notify each Party of the Credit Cover Requirement calculated in respect of that Party (and of the Value at Risk, Maximum Credit Value, Unsecured Credit Factor Percentage, and Unsecured Credit Limit used in that calculation).

Party's Value at Risk

J3.6 Each Party's "**Value at Risk**" shall be calculated as 115% of the Charges (inclusive of VAT, but excluding any and all annual Explicit Charges) set out in the most recently produced Invoice for that Party at the time of the calculation.

Party's Unsecured Credit Limit

J3.7 Each Party's "**Unsecured Credit Limit**" is equal to:

(a) the Party's Maximum Credit Value (see Section J3.8); multiplied by

(b) the Party's Unsecured Credit Factor Percentage (see Section J3.10).

Party's Maximum Credit Value

J3.8 Each Party's "**Maximum Credit Value**" is the amount recommended by the Credit Assessment Agency as the maximum amount a creditor should have outstanding to the Party at any one time (subject to Section J3.16).

J3.9 However, where a Party has provided a Parent Company Guarantee, the Party's Maximum Credit Value shall be based on the creditworthiness of the Party's guarantor (see Section J3.15).

Party's Unsecured Credit Factor Percentage

J3.10 Each Party's "**Unsecured Credit Factor Percentage**" shall be determined in accordance with Section J3.11, J3.12, J3.13 or J3.14 (as applicable).

J3.11 If a Party has failed to pay the Charges set out in an Invoice by the Due Date on three or more occasions during the 12 months preceding the date on which the Unsecured Credit Factor Percentage is being determined, then the Party's Unsecured Credit Factor Percentage shall always be zero (and none of Sections J3.12, J3.13, and J3.14 shall apply).

J3.12 If where a Party has provided a Parent Company Guarantee, the Party's Unsecured Credit Factor Percentage shall be based on the creditworthiness of the Party's guarantor (see Section J3.16).

J3.13 Unless Section J3.12 applies, if a Party has one or more Recognised Credit Ratings, the Party's Unsecured Credit Factor Percentage shall be determined as set out in the table below (based, where the Party has more than one rating, on the lowest of the ratings):

Moody's		Fitch		Standard and Poor's		Unsecured Credit Factor (%)
Long-Term	Short-Term	Long-Term	Short-Term	Long-Term	Short-Term	
Aaa	P-1	AAA	F1+	AAA	A-1+	**50**
Aa1	P-1	AA+	F1+	AA+	A-1+	**50**
Aa2	P-1	AA	F1+	AA	A-1+	**50**
Aa2	P-1	AA-	F1+	AA-	A-1+	**50**
A1	P-1	A+	F1	A+	A-1	**20**
A2	P-1	A	F1	A	A-1	**20**
A3	P-2	A-	F2	A-	A-2	**20**
Baa1	P-2	BBB+	F2	BBB+	A-2	**10**

Baa2	P-3	BBB	F3	BBB	A-3	**9.5**
Baa3	P-3	BBB–	F3	BBB–	A-3	**9**
Ba1	-	BB+	-	BB+	-	**8.5**
Ba2	-	BB	-	BB	-	**8**
Ba3	-	BB-	-	BB-	-	**7.5**

J3.14 Unless Section J3.12 applies, if a Party does not have one or more Recognised Credit Ratings, the Party's Unsecured Credit Factor Percentage shall be determined in accordance with the following table (being the Party’s Credit Assessment Score):

Dun & Bradstreet / N2 Check Comprehensive Report	Unsecured Credit Factor (%)
5A1/	**10**
5A2/4A1	**9.5**
5A3/4A2/3A1	**9**
4A3/3A2/2A1	**8.5**
3A3/2A2/1A1	**8**
2A3/1A2/A1	**7.5**
1A3/A2/B1	**6.5**
A3/B2/C1	**5**
B3/C2/D1	**3.5**
C3/D2/E1	**1.5**
D3/E1/lower	**0**

Parent Company Guarantees

J3.15 Where a Party's obligations are guaranteed by a Parent Company Guarantee, then the Party's Credit Cover Requirement shall be calculated based on the creditworthiness of the Party's guarantor as follows:

(a) (subject to Section J3.15(b)) the Party's Unsecured Credit Limit shall be determined using:

(i) the guarantor's Maximum Credit Value – being the amount recommended by the Credit Assessment Agency as the maximum amount a creditor should have outstanding to the guarantor; and

(ii) (subject to Section J3.11) the guarantor's Unsecured Credit Factor Percentage – determined under Section J3.13 (if the guarantor has one or more Recognised Credit Ratings) or under Section J3.14 based on the guarantor's Credit Assessment Score (if the guarantor does not have one or more Recognised Credit Ratings; or

(b) if the Parent Company Guarantee is capped at an amount lower than the Party’s Value at Risk, then the Party’s Credit Cover Requirement shall be the weighted average of the amount calculated under Section J3.15(a) (based on the creditworthiness of the guarantor) and the amount calculated without regard to the creditworthiness of the guarantor (using the Party’s own Maximum Credit Value and Unsecured Credit Factor Percentage); such average to be weighted by reference to the Parent Company Guarantee cap and the amount by which the Party’s Value at Risk exceeds such cap.

Credit Assessment Reports

J3.16 The following shall apply in respect of each Party's Maximum Credit Value and (where relevant in accordance with Section J3.14) Credit Assessment Score:

(a) a revised Maximum Credit Value and (where applicable) the Credit Assessment Score in respect of a Party (and/or its guarantor) shall be obtained at least monthly;

(b) where no valid Maximum Credit Value exists in respect of a Party (or its guarantor), the Party's Maximum Credit Value shall be deemed to be zero; and

(c) where Section J3.14 applies and no valid Credit Assessment Score exists in respect of a Party (or its guarantor), the Party's Unsecured Credit Factor Percentage shall be deemed to be zero.

Increase or Decrease in Credit Cover Requirement

J3.17 On notifying a Party of its Credit Cover Requirement pursuant to Section J3.4, the DCC shall also specify the value of the Credit Support provided to the DCC by the Party at that time.

J3.18 Where the value of the Credit Support is less than the Party’s Credit Cover Requirement (by more than the lower of either 10% of the Party's Credit Cover Requirement or £1,000), then the Party shall, within two Working Days after receipt of such notification, ensure that additional Credit Support is provided to the DCC so that the aggregate value of all such Credit Support is equal to or greater than the Party’s Credit Cover Requirement.

J3.19 Where the value of the Credit Support exceeds the Party's Credit Cover Requirement (by more than the lower of either 10% of the Party's Credit Cover Requirement or £1,000), then the DCC shall, within five Working Days after a request from a Party to do so, return that Party’s Credit Support (or any part of it) to that Party; provided that the DCC shall never be obliged to return Credit Support to the extent that such return would reduce the aggregate value of the Party’s Credit Support below the Party Credit Cover Requirement.

J3.20 Additions and reductions in Credit Support pursuant to Section J3.18 and J3.19 may (without limitation) be achieved by amending the terms of existing Credit Support or exchanging Credit Support.

J3.21 For clarity, if a Bank Guarantee, Letter of Credit or Parent Company Guarantee provided on behalf of a Party ceases to satisfy the requirements of the definitions of Bank Guarantee, Letter of Credit or Parent Company Guarantee (respectively), then the value of such Credit Support or of the Party’s Unsecured Credit Factor Percentage (as applicable) shall be calculated as if no such document had been provided (and the DCC shall return such document to the Party (or as directed by the Party) within 5 Working Days after a request to do so).

Breach of Credit Cover Obligations

J3.22 Where a Party fails to provide Credit Support (or additional Credit Support) to the DCC in accordance with this Section J3, then the DCC shall, on the Working Day immediately following such failure, issue a notice to that Party:

(a) setting out the value of the Credit Support shortfall; and

(b) referring to the matters set out in Section M8.1(d) (Events of Default).

Disputes

J3.23 Where a Party disputes the amount of Credit Support requested by the DCC under this Section J3, that Party shall nevertheless provide the requested amount of Credit Support to the DCC, pending resolution of the dispute. In the case of such a dispute:

(a) the Party and the DCC shall each in good faith negotiate to resolve the dispute amicably and as soon as reasonably practicable after it arises;

(b) the DCC shall provide all such evidence in support of its position as the disputing Party may reasonably request, and the DCC shall provide such evidence within 5 Working Days after such request;

(c) no earlier than 1 Working Day after receipt from the DCC of the information requested under Section J3.23(b) (or, if the DCC does not comply with such request, on the expiry of the period referred to in that Section), the disputing Party may refer the dispute to the Panel, in which case the DCC and the disputing Party shall each be entitled to provide written submissions in support of its position;

(d) where a dispute is referred to the Panel in accordance with Section J3.23(c), the Panel shall convene a meeting and determine the dispute within 10 Working Days of the reference being made (and representatives of the disputing Party and the DCC may be invited to the meeting in accordance with Section C (Governance)); and

(e) the disputing Party and the DCC shall each give effect to any determination of the Panel pursuant to this Section J3.15, which shall be final and binding for the purposes of this Code.

Use of Credit Support

J3.24 Where a Party fails to pay the Charges set out in an Invoice addressed to that Party by the Due Date, and where the DCC has issued a notice to that Party under Section J2.1 (Notification of Payment Failure), the DCC shall (in addition to any other remedies available to it) within five Working Days following the Due Date:

(a) claim an amount equal to the unpaid Charges plus interest (or, if lower, as much as is available to be claimed) under any Bank Guarantee or Letter of Credit provided on behalf of that Party;

(b) remove an amount equal to the unpaid Charges plus interest accruing under Section J2 (or, if lower, as much as is available to be removed) from any Cash Deposit account; or

(c) undertake a combination of the above in respect of a total amount equal to the unpaid Charges plus interest (or, if lower, as much as is available to be claimed or removed).

J3.25 The DCC shall notify the Party as soon as reasonably practicable after the DCC takes any action pursuant to Section J3.24.

J3.26 The DCC shall only exercise its rights in respect of a Party's Credit Support in accordance with Section J3.24.

J3.27 Any amount received by the DCC pursuant to the exercise of its rights in respect of a Party's Credit Support shall discharge the Party's payment obligations to the extent of the amount so received, and reduce the value of the Credit Support to the same extent.

Cash Deposit

J3.28 Interest that accrues on the funds deposited in a Cash Deposit account shall be added to and form part of such deposit.

J3.29 It is agreed that all right, title and interest in and to the Cash Deposit vests in the DCC absolutely free and clear of any liens, claims, charges, encumbrances or other security interests (but without prejudice to the DCC's obligation to return an equivalent amount of money to the Party subject to and in accordance with Section J3.19).

Letters of Credit and Bank Guarantees

J3.30 Where a Party has procured that Credit Support is delivered to the DCC in the form of a Letter of Credit or Bank Guarantee, and where that Letter of Credit or Bank Guarantee has 20 Working Days or less left until it expires, the DCC shall give notice of that fact to the Party (which notice must refer to the matters set out in Section J3.31).

J3.31 Where the DCC has given notice to a Party pursuant to Section J3.30, and where the Party has not (within 10 Working Days after such notice) provided replacement Credit Support of equivalent value to the DCC (to take effect on or before expiry of the current Letter of Credit or Bank Guarantee), then the DCC shall:

(a) prior to the expiry of the Letter of Credit or Bank Guarantee, claim the entire undrawn value of the Letter of Credit or Bank Guarantee; and

(b) hold any amount so claimed as if it had been paid to the DCC as a Cash Deposit.

J4. REVIEW AND FORECASTING OF CHARGES

Review of Charges

J4.1 The Charges payable from time to time are set out in the Charging Statement applicable at that time.

J4.2 The DCC shall only amend the Charges from time to time in accordance with the DCC Licence. The DCC shall only amend the Charges once in each calendar year, such amendments to have effect from the start of each Regulatory Year (save for amendments permitted or required in accordance with Condition 19.11 of the DCC Licence). This Section J4.2 is without prejudice to the requirements of Condition 19 of the DCC Licence, and (unless the Authority gives consent under Condition 19.10 of the

DCC Licence) the DCC shall give notice of any proposed changes to Parties pursuant to Condition 19.9 of the DCC Licence.

Indicative Charging Statements

J4.3 Within the first five Working Days of April, July, October and January in each year, the DCC shall create and publish on the DCC Website an indicative Charging Statement for the first Regulatory Year due to start thereafter, setting out indicative Charges for that Regulatory Year based on the information available to the DCC at the start of the month of publication.

Indicative Budgets

J4.4 Within the first five Working Days of April, July, October and January in each year, the DCC shall create and publish on the DCC Website a budget for the second and third Regulatory Years due to start thereafter, setting out indicative figures for each such Regulatory Year based on the information available to the DCC at the start of the month of publication.

J4.5 Each such budget will contain indicative values for the following (as each such expression is defined in the Charging Methodology):

Acronym	Name
EAR_t	Estimated Allowed Revenue
EFR_t	Estimated Fixed Revenue
$EESR_t$	Estimated Elective Services Revenue
$EECR_t$	Estimated Explicit Charges Revenue
NFR_t	National Fixed Revenue
$AHFR_t$	Alt HAN Fixed Revenue
RFR_{rt}	Regional Fixed Revenue
EC_{it}	Explicit Charge for each Explicit Charging Metric
$RCHFR_{rt}$	Regional Communications Hub Fixed Revenue
$RCHDR_{hrt}$	Regional Communications Hub Device Revenue

Working Model

J4.6 The DCC shall publish a working model which allows Parties to estimate their indicative Charges based on their view of input data relevant under the Charging Methodology, and which allows Parties to test potential modifications to the Charging Methodology. The DCC shall publish such model in an open-access or off-the-shelf software format, and hereby authorises the Parties to use and modify the model for the purposes set out in this Section J4.6 (subject to the relevant software licence). Such model shall not form part of the Charging Methodology.

Invoicing Timetable

J4.7 The DCC shall, from time to time, publish an indicative timetable of the dates on which the DCC intends to submit invoices pursuant to Section J1.2.

Minimum Monthly Charge and Credit Cover Threshold

J4.8 The DCC shall publish, with the indicative Charging Statement published in January and with the actual Charging Statement for each Regulatory Year, the values of the Minimum Monthly Charge and the Credit Cover Threshold for that Regulatory Year.

K CHARGING METHODOLOGY

K1. INTRODUCTION

K1.1 This Section K constitutes the Charging Methodology that the DCC is required to have in force in accordance with the DCC Licence.

K1.2 The Charges payable to the DCC by the other Parties from time to time are those Charges set out in the Charging Statement at that time, which are payable in accordance with Section J.

K1.3 The DCC is obliged under the DCC Licence to prepare the Charging Statement in accordance with this Charging Methodology.

K1.4 This Charging Methodology is subject to modification in accordance with Section D (Modification Process), by reference to the Charging Objectives. This Section K is included in this Code in order to allow for such modification. This Section K is not intended to, and does not, create any contractual obligations between the Parties.

K1.5 This Charging Methodology provides for Fixed Charges, Fixed CH Charges, Fixed Alt HAN Charges, Explicit Charges and Elective Charges. The methodology for calculating:

(a) Fixed Charges differ as between:

(i) the UITMR Period and the COMR Period (as set out in Section K5); and

(ii) the period which falls after the COMR Period (as set out in Section K6);

(b) Fixed Alt HAN Charges differ as between:

(i) the UITMR Period; and

(ii) the period which falls during and after the COMR Period (as set out in Sections K5A, K5B and K6B respectively).

K1.6 The DCC shall act reasonably and in a manner consistent with the Charging Objectives in undertaking all calculations and estimations required pursuant to this Charging Methodology.

K1.7 The expressions used in this Charging Methodology shall have the meanings given to them in Section K11.

K2. ESTIMATED REVENUES

Estimated Allowed Revenue

K2.1 In respect of each Regulatory Year, the DCC shall estimate the Allowed Revenue for that Regulatory Year. Such estimate for each Regulatory Year shall be the "**Estimated Allowed Revenue**" for that Regulatory Year.

Estimated Elective Service Revenue

K2.2 In respect of each Regulatory Year, the DCC shall estimate the amount that will be payable to it in respect of the provision of Elective Communication Services during that Regulatory Year. Such estimation shall be based on the Charges payable under the relevant Bilateral Agreements, the DCC's estimate of the frequency at which the DCC will provide such Services (to the extent such Charges are payable on that basis), and any other relevant factors.

K2.3 The DCC's estimate in accordance with Section K2.2 for each Regulatory Year shall be the "**Estimated Elective Service Revenue**" for that Regulatory Year.

Estimated Explicit Charges Revenue

K2.4 In respect of each Regulatory Year, the DCC shall estimate the amount that will be payable to it in respect of the Explicit Charging Metrics during that Regulatory Year, based on the Explicit Charges (calculated in accordance with Section K7) and the DCC's estimate of the frequency at which the Explicit Charging Metrics will occur during that year.

K2.5 The DCC's estimate in accordance with Section K2.4 for each Regulatory Year shall be the "**Estimated Explicit Charges Revenue**" for that Regulatory Year.

Estimated Fixed Revenue

K2.6 In respect of each Regulatory Year (t), the "**Estimated Fixed Revenue**" shall be calculated as follows:

$$EFR_t = EAR_t - EESR_t - EECR_t$$

Where:

EFR_t = the Estimated Fixed Revenue for the Regulatory Year t

EAR_t = the Estimated Allowed Revenue for the Regulatory Year t

$EESR_t$ = the Estimated Elective Services Revenue for the Regulatory Year t

$EECR_t$ = the Estimated Explicit Charges Revenue for the Regulatory Year t.

K3. FIXED CHARGE, FIXED CH CHARGE AND FIXED ALT HAN CHARGE CALCULATIONS

Introduction

K3.1 The DCC will determine the Fixed Charges, the Fixed CH Charges and the Fixed Alt HAN Charges for each Regulatory Year using the Estimated Fixed Revenue determined in accordance with Section K2, which is to be translated into:

(a) Fixed Charges in accordance with Section K5 (if the Regulatory Year occurs during either the UITMR Period or the COMR Period) or Section K6 (if the Regulatory Year occurs after the COMR Period);

(b) Fixed CH Charges in accordance with Section K6A (which are payable in respect of Smart Metering Systems); and

(c) Fixed Alt HAN Charges in accordance with Sections K5A, K5B and K6B (depending upon whether the Regulatory Year occurs during the UITMR Period or during or after the COMR Period).

K3.2 The Fixed Charges and Fixed Alt HAN Charges are payable in respect of:

(a) during the UITMR Period, Mandated Smart Metering Systems for Domestic Premises and Enrolled Smart Metering Systems for Non-Domestic Premises;

(b) during the COMR Period, Mandated Smart Metering Systems for Domestic Premises, and Mandated Non-Domestic Smart Metering Systems for Non-Domestic Premises; and

(c) after the COMR Period, Enrolled Smart Metering Systems (whether for Domestic Premises or Non-Domestic Premises),

and each reference in this Section K3 (or in the definitions of defined terms used directly or indirectly in this Section K3) to '**Smart Metering Systems**' shall accordingly be construed as a reference to Mandated Smart Metering Systems, Mandated Non-Domestic Smart Metering Systems or Enrolled Smart Metering Systems (as applicable).

K3.3 As further described in this Section K3, the Fixed Charges potentially differ so as to distinguish between Smart Metering Systems for Domestic Premises and for Non-Domestic Premises, and between persons within different Charging Groups.

Domestic or Non-Domestic Premises

K3.4 The Charging Objectives require the DCC to impose Fixed Charges and Fixed CH Charges in respect of Smart Metering Systems: (a) for Domestic Premises that do not distinguish (whether directly or indirectly) between Domestic Premises located in different parts of Great Britain; and (b) for Non-Domestic Premises that do not distinguish (whether directly or indirectly) between Non-Domestic Premises located in different parts of Great Britain. However, consistent with the Charging Objectives, the methodology provides for different means of calculating the Fixed Alt HAN Charges depending upon whether a Smart Metering System is for Domestic Premises or for Non-Domestic Premises. The DCC shall estimate the numbers of Domestic Premises and Non-Domestic Premises based on Registration Data (using profile class in the case of Smart Metering Systems associated with an MPAN and market sector code in the case of Smart Metering Systems associated with an MPRN, or some other sensible proxy to the extent that the Registration Data does not readily identify whether a premises is a Domestic Premises and Non-Domestic Premises).

Cost-reflectivity

K3.5 One of the Charging Objectives is that the Charges are cost reflective (insofar as reasonably practicable in the circumstances of the case, having regard to the cost of implementing the methodology and subject to the objective referred to in Section K3.4). Consistent with the Charging Objectives, the methodology provides (subject to Section K3.4) for:

(a) the Fixed Charges in respect of a Smart Metering System to be set proportionately to the costs and expenses of providing the Services (other than the Communications Hub Services, the Elective Communication Services and the Explicit Charging Metrics) in respect of that Smart Metering System by Charging Group;

(b) the Fixed CH Charges in respect of a Smart Metering System to be set proportionately to the costs and expenses of providing the Communications Hub Services (other than the Explicit Charging Metrics) in respect of that Smart Metering System by Charging Group; and

(c) the Fixed Alt HAN Charges in respect of a Smart Metering System to be set proportionately to the costs of reimbursing AltHANCo for the Alt HAN Costs (other than the Explicit Charging Metrics) in respect of that Smart Metering System by Charging Group,

in each case as set out in the remainder of this Section K3.

Regions

K3.6 The costs and expenses of providing the Services (ignoring the Elective Communication Services and ignoring the costs and expenses designed to be recovered pursuant to the Explicit Charges) in respect of a Smart Metering System for a premises may vary depending upon the Region in which such premises is located. For the reasons described in Section K3.4, the Fixed Charges and Fixed CH Charges in respect of Smart Metering Systems will not differ by Region.

K3.7 In order to provide a degree of transparency of costs, the DCC must split the Estimated Fixed Revenue for Regulatory Year (t) between:

(a) revenue relating to the cost and expenses of providing the Services that should be recovered on a uniform basis across all the Regions (the **National Fixed Revenue**);

(b) revenue relating to the reimbursement of Alt HAN Costs (the **Alt HAN Fixed Revenue**); and

(c) revenue relating to the cost and expenses of providing the Services that should be recovered on a basis that differentiates between Regions (for each Region, the **Regional Fixed Revenue**).

K3.8 In order to provide a degree of transparency of costs, the DCC shall apportion the Estimated Fixed Revenue between:

(a) the National Fixed Revenue, the Alt HAN Fixed Revenue and the Regional Fixed Revenue for each Region so as to reflect the relative proportion of the cost and expenses that the DCC incurs across all Regions or in particular Regions in providing the Services and in reimbursing the Alt HAN Costs (ignoring the Communications Hub Services, the Test CH Services and the Elective Communication Services and ignoring the costs and expenses designed to be recovered pursuant to the Explicit Charges);

(b) the Regional Communications Hub Fixed Revenue for each Region so as to reflect the cost and expenses that the DCC incurs in providing, in respect of that Region, the Communications Hub Services and the Test CH Services (ignoring the incremental costs and expenses incurred in providing individual Communications Hubs, and also ignoring the costs and expenses designed to be recovered pursuant to the Explicit Charges); and

(c) the Regional Communications Hub Device Revenue for each Region so as to reflect the incremental cost and expenses that the DCC incurs in providing, in respect of that Region, each individual Communications Hub of each HAN Variant which is available for that Region (ignoring the costs and expenses designed to be recovered pursuant to the Explicit Charges), in each case, so that any revenue restriction correction factor adjustment contained within the Estimated Fixed Revenue is apportioned between (a), (b) or (c) above on the basis of the extent to which it arose in relation either to the Services referred to in (a), (b) or (c) respectively.

K3.9 The apportionment described in Sections K3.7 and K3.8 shall be such that:

$$EFR_t = NFR_t + AHFR_t + \sum_{\forall r} RFR_{rt} + \sum_{\forall r} RCHFR_{rt} + \sum_{\forall r \, \forall h} RCHDR_{hrt}$$

Where:

$EFR_t =$ the Estimated Fixed Revenue (estimated in accordance with Section K2) for Regulatory Year (t).

$NFR_t =$ the National Fixed Revenue (estimated in accordance with Section K3.7 and K3.8) for Regulatory Year (t).

$AHFR_t =$ the Alt HAN Fixed Revenue (estimated in accordance with Section K3.7 and K3.8) for Regulatory Year (t).

$RFR_{rt} =$ the Regional Fixed Revenue (estimated in accordance with Section K3.7 and K3.8) within each Region (r) for Regulatory Year (t).

$RCHFR_{rt} =$ the Regional Communications Hub Fixed Revenue (estimated in accordance with Section K3.7 and K3.8) within each Region (r) for Regulatory Year (t).

$RCHDR_{hrt} =$ the Regional Communications Hub Device Revenue (estimated in accordance with Section K3.7 and K3.8) for each HAN Variant (h) within each Region (r) for Regulatory Year (t).

Charging Groups

K3.10 The methodology recognises the following five categories for Smart Metering Systems. The Fixed Charges are payable by Parties in all five categories (each a **Charging Group**). The Fixed CH Charges are payable by Parties in only the first three categories (each a **CH Charging Group**). The Fixed Alt HAN Charges are payable by Parties in only the first and third categories (each an **Alt HAN Charging Group**):

(a) the Import Suppliers (**Charging Group g1**);

(b) the Export Suppliers (**Charging Group g2**);

(c) the Gas Suppliers (**Charging Group g3**);

(d) the Electricity Distributors (**Charging Group g4**); and

(e) the Gas Transporters (**Charging Group g5**).

Application of Charging Group Weighting Factors

K3.11 For the reasons described in Section K3.5, the Fixed Charges, Fixed CH Charges and Fixed Alt HAN Charges payable by each Charging Group may need to differ. This is achieved through the Charging Group, CH Charging Group and Alt HAN Charging Group Weighting Factors.

K3.12 The Weighting Factors are designed:

(a) to reflect the relative proportion of the costs and expenses likely to be incurred by the DCC in providing the Services and in reimbursing the Alt HAN Costs (ignoring the Elective Communication Services and ignoring the costs and expenses designed to be recovered pursuant to the Explicit Charges) to the persons in each Charging Group;

(b) to specify the ratio of the costs and expenses to be incurred in respect of each Smart Metering System (without regard to the number of Smart Metering Systems); and

(c) so that the sum of the Charging Group, CH Charging Group and Alt HAN Charging Group Weighting Factors shall in each case be equal to one (1).

K3.13 For Fixed Charges, the "**Charging Group Weighting Factors**" to apply to each Charging Group in respect of each Regulatory Year are to be determined by the DCC in accordance with Section K3.12, and set out in the Charging Statement for that Regulatory Year. The DCC shall make such determination based on its estimate of the demand of persons within each Charging Group for each of the Services other than the Elective Communication Services. Prior to the start of the UITMR Period, such estimates of demand will be based on assumptions for the Regulatory Year starting on 1st April 2021. Once data on usage becomes available the estimates will be determined as the average of the previous two full Regulatory Years of actual data plus the DCC's forecasts for the two Regulatory Years ahead.

K3.14 For Fixed CH Charges, the "**CH Charging Group Weighting Factors**" to apply to each CH Charging Group in respect of each Regulatory Year are to be determined by the DCC on the basis of the relative proportion of their Charging Group Weighting Factors, such that:

$$\beta_{gt} = \frac{\alpha_{gt}}{\sum\limits_{g=1 \Box 3 \Box} \alpha_{gt}}$$

Where:

β_{gt} = = the CH Charging Group Weighting Factor for applicable to Regulatory Year (t) and each Charging Group (g)

α_{gt} = = the Charging Group Weighting Factor applicable to Regulatory Year (t) and each Charging Group (g).

K3.15 For Fixed Alt HAN Charges, the **"Alt HAN Charging Group Weighting Factors"** to apply to each Alt HAN Charging Group in respect of each Regulatory Year are to be determined by the DCC on the basis of an expectation of equal use of Alt HAN services per Enrolled Smart Metering System by Import Suppliers and Gas Suppliers, such that:

γ_{gt} 0.5 where g =1 or 3

γ_{gt} 0 where g =2, 4 or 5.

Where:

γ_{gt} = the Alt HAN Charging Group Weighting Factor for applicable to Regulatory Year (t) and each Charging Group (g).

Determining the Fixed Charges

K3.15A In determining the Fixed Charges, the DCC shall have regard to the need, for the purposes of making a prudent estimate in accordance with Condition 36.5 of the DCC Licence, to provide for the availability at all times of a contingency fund in respect of the 4G DBT Finance Charges relating to each Communications Hub Finance Facility that is equal to the DCC's estimate of three months of the 4G DBT Finance Costs relating to that facility.

Determining Fixed CH Charges

K3.16 In determining the Fixed CH Charges, the DCC shall have regard to the need, for the purposes of making a prudent estimate in accordance with Condition 36.5 of the DCC Licence, to provide for the availability at all times of a contingency fund in respect of the Communications Hub Finance Charges relating to each Communications Hub Finance Facility that is equal to the DCC's estimate of three months of the Communications Hub Finance Costs relating to that facility.

Description of Approach to Determining Fixed Alt HAN Charges for Smart Metering Systems for Domestic Premises and Non-Domestic Premises during the UITMR Period and during and after the COMR Period

K3.17 The "**Alt HAN Cost Domestic Allocation**" is a factor between zero and one that is determined by the DCC based on information provided by AltHANCo to reflect the proportion of usage of Alt HAN Equipment in Domestic Premises expressed as a fraction of the total usage across both Domestic Premises and Non-Domestic Premises and is represented by *t* for Regulatory Year (t) such that:

$$\mu_t = \frac{DAHU_t}{DAHU_t + NAHU_t}$$

Where:

$DAHU_t$ is the number of MPANs and MPRNs associated with the use of Alt HAN Equipment in Domestic Premises, derived by the DCC from the data provided to it by AltHANCo in accordance with Section Z4.35 (Provision of Information to the DCC) and available to it one month prior to the issue of the most recent Charging Statement and the Registration Data prevailing at that time.

$NAHU_t$ is the number of MPANs and MPRNs associated with the use of Alt HAN Equipment in Non-Domestic Premises, derived by the DCC from the data provided to it by AltHANCo in accordance with Section Z4.35 (Provision of Information to the DCC) and available to it one month prior to the issue of the most recent Charging Statement and the Registration Data prevailing at that time.

K4. NO LONGER USED

K5. DETERMINING FIXED CHARGES DURING THE UITMR PERIOD AND DURING THE COMR PERIOD

Introduction

K5.1 The DCC will determine the Fixed Charges for each Regulatory Year during the UITMR Period and during the COMR Period in accordance with this Section K5, using:

(a) the National Fixed Revenue, the Regional Fixed Revenue and the Regional Communications Hub Fixed Revenue for that Regulatory Year determined in accordance with Section K3;

(b) (in the case of the UITMR Period only) an estimate, in accordance with this Section K5, of the number of Smart Metering Systems for Non-Domestic Premises that will have been (and remain) Enrolled as at the beginning of that Regulatory Year;

(c) an estimate, in accordance with this Section K5, of the number of Mandated Smart Metering Systems for Domestic Premises that will exist as at the beginning of that Regulatory Year;

(d) the Charging Group Weighting Factors and other relevant matters described in Section K3; and

(e) (in the case of the COMR Period only) an estimate, in accordance with this Section K5, of the number of Mandated Non-Domestic Smart Metering Systems for Non-Domestic Premises that will exist as at the beginning of that Regulatory Year.

Estimates: Non-Domestic Premises (UITMR Period)

K5.2 In respect of Regulatory Years occurring during the UITMR Period:

(a) the DCC must estimate the total number of Smart Metering Systems for Non- Domestic Premises that will have been (and remain) Enrolled as at the beginning of that Regulatory Year;

(b) the DCC must estimate the number of persons in each Charging Group for such Smart Metering Systems;

(c) the DCC must break down its estimate pursuant to Section K5.2(b) by reference to the number of Smart Metering Systems in each Region; and

(d) the estimate pursuant to Section K5.2(c) in respect of a Regulatory Year (t), each Charging Group (g) and each Region (r), shall be represented as $RENSMS_{grt}$.

Estimates: Non-Domestic Premises (COMR Period)

K5.2A In respect of Regulatory Years occurring during the COMR Period:

(a) the DCC must estimate the aggregate number of Mandated Non-Domestic Smart Metering Systems that will exist as at the beginning of that Regulatory Year;

(b) the DCC must estimate the number of persons in each Charging Group for such Mandated Non-Domestic Smart Metering Systems;

(c) the DCC must break down its estimate pursuant to Section K5.2A(b) by reference to the number of Mandated Non-Domestic Smart Metering Systems in each Region; and

(d) the estimate pursuant to Section K5.2A(c) in respect of a Regulatory Year (t), each Charging Group (g) and each Region (r), shall be represented as $RENSMS_{grt}$.

Estimates: Domestic Premises

K5.3 In respect of Regulatory Years occurring during the UITMR Period and the COMR Period:

(a) the DCC must estimate the aggregate number of Mandated Smart Metering Systems that will exist as at the beginning of that Regulatory Year;

(b) the DCC must estimate the number of persons in each Charging Group for such Mandated Smart Metering Systems;

(c) the DCC must break down its estimate pursuant to Section K5.3(b) by reference to the number of Mandated Smart Metering Systems in each Region; and

(d) the estimate pursuant to Section K5.3(c) in respect of a Regulatory Year (t), each Charging Group (g) and each Region (r), shall be represented as .$REDSMS_{grt}$.

Determining the Fixed Charges

K5.4 For each Regulatory Year (t), the DCC will determine the Fixed Charge payable in respect of each month (or part month) of Regulatory Year (t) by each person within each Charging Group (g) in respect of:

(a) (during the UITMR Period) each Enrolled Smart Metering System for a Non-Domestic Premises; or

(b) (during the COMR period) each Mandated Non-Domestic Smart Metering System for a Non-Domestic Premises; and

(c) (in either case) each Mandated Smart Metering System for a Domestic Premises (RFC_{gt}), as follows:

$$RFC_{gt} = \frac{\left(NFR_t + \sum_{\forall r} RFR_{rt}\right)}{NM_t} \times \frac{\alpha_{gt}}{\sum_{\forall g}\left(\alpha_{gt} \times \sum_{\forall r} RESMS_{grt}\right)} + \frac{\sum_{\forall r} RCHFR_{rt}}{NM_t} \times \frac{\beta_{gt}}{\sum_{\forall g}\left(\beta_{gt} \times \sum_{\forall r} RESMS_{grt}\right)}$$

Where:

α_{gt} =the Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g)

β_{gt} =the CH Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g)

NM_t =the number of months (or part months) in Regulatory Year (t)

NFR_t =the National Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t)

RFR_{rt} =the Regional Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t) and Region (r)

$RCHFR_{rt}$ = the Regional Communications Hub Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t) and Region (r)

$$\forall g \forall r \quad RESMS_{grt} = REDSMS_{grt} + RENSMS_{grt}$$

$RENSMS_{grt}$ = either:

i. (during the UITMR Period) the estimate pursuant to Section K5.2(d) for Regulatory Year (t), each Charging Group (g) and each Region (r); or

ii. (during the COMR Period) the estimate pursuant to Section K5.2A(d) for Regulatory Year (t), each Charging Group (g) and each Region (r).

$REDSMS_{grt}$ = the estimate pursuant to Section K5.3(d) for Regulatory Year (t), each Charging Group (g) and each Region (r).

K5.5 [Not used]

(UITMR Period only) Calculating number of ESMSs for Fixed Charge Payment: Non-Domestic Premises

K5.6 Following the end of each month (or part month) occurring during each Regulatory Year during the UITMR Period, the DCC will:

(a) determine the actual number of Smart Metering Systems for Non-Domestic Premises that have been (and remain) Enrolled as at the end of the 15th day of that month (or, in the case of a part month that ends on or prior to the 15th day of that month, at the end of that part month), whether Enrolled during that month or previously;

(b) calculate the number of persons within each Charging Group for those Enrolled Smart Metering Systems; and

(c) break down these calculations by reference to each Party.

K5.7 The calculations in accordance with Section K5.6 of the number of Enrolled Smart Metering Systems for Non-Domestic Premises as at the end of each month (m) during Regulatory Year (t) within each Charging Group (g) broken down by reference to each Party (p), shall be represented as $\mathrm{ANSMS}_{\mathrm{pgmt.}}$

Calculating number of MSMSs for Fixed Charge Payment: Domestic Premises

K5.8 Following the end of each month (or part month) occurring during each Regulatory Year during the UITMR Period and during the COMR Period, the DCC will:

(a) determine (insofar as it is able) the actual number of Mandated Smart Metering Systems for Domestic Premises as at the end of the 15th day of that month (or, in the case of a part month that ends on or prior to the 15th day of that month, at the end of that part month);

(b) calculate the number of persons within each Charging Group for those Mandated Smart Metering Systems; and

(c) break down these calculations by reference to each Party.

K5.9 The calculations in accordance with Section K5.8 of the number of Mandated Smart Metering Systems as at the end of each month (or part month) (m) during Regulatory Year (t) within each Charging Group (g) broken down by reference to each Party (p) shall be represented as $ADSMS_{pgmt}$.

(COMR Period only) Calculating number of MNSMSs for Fixed Charge Payment: Non-Domestic Premises

K5.10 Following the end of each month (or part month) occurring during each Regulatory Year during the COMR Period, the DCC will:

(a) determine (insofar as it is able) the actual number of Mandated Non-Domestic Smart Metering Systems for Non-Domestic Premises as at the end of the 15th day of that month (or, in the case of a part month that ends on or prior to the 15th day of that month, at the end of that part month);

(b) calculate the number of persons within each Charging Group for those Mandated Non-Domestic Smart Metering Systems; and

(c) break down these calculations by reference to each Party.

K5.11 The calculations in accordance with Section K5.10 of the number of Mandated Non-Domestic Smart Metering Systems as at the end of each month (or part month) (m) during Regulatory Year (t) within each Charging Group (g) broken down by reference to each Party (p) shall be represented as $ANSMS_{pgmt}$.

K5A DETERMINING FIXED ALT HAN CHARGES DURING THE UITMR PERIOD

Introduction

K5A.1 The DCC will determine the Fixed Alt HAN Charges for each Regulatory Year during the UITMR Period in accordance with this Section K5A, using:

(a) the Alt HAN Fixed Revenue for that Regulatory Year estimated in accordance with Section K3;

(b) an estimate, in accordance with Section K5, of the number of Smart Metering Systems for Non-Domestic Premises that will have been (and remain) Enrolled as at the beginning of that Regulatory Year;

(c) an estimate, in accordance with Section K5, of the number of Mandated Smart Metering Systems for Domestic Premises that will exist as at the beginning of that Regulatory Year; and

(d) the Alt HAN Charging Group Weighting Factors and other relevant matters described in Section K3.

Determining the Fixed Alt HAN Charges (UITMR Period)

K5A.2 For each Regulatory Year (t), the DCC will determine the Fixed Alt HAN Charges payable in respect of each month (or part month) of Regulatory Year (t) by each person within each Alt HAN Charging Group (g) in respect of each Mandated Smart Metering System and each Enrolled Smart Metering System for a Non-Domestic Premises (*RAHFCgt*), as follows:

$$RAHFC_{gt} = \frac{AHFR_t}{NM_t} \times \frac{\gamma_{gt}}{\sum_{\forall g}\left(\gamma_{gt} \times \sum_{\forall r} RESMS_{grt}\right)}$$

Where:

γ_{gt} =the Alt HAN Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g);

NM_t =the number of months (or part months) in Regulatory Year (t);

$AHFR_t$ =the Alt HAN Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t);

$\forall g \forall r \quad RESMS_{grt} = REDSMS_{grt} + RENSMS_{grt}$

$RENSMS_{grt}$ = the estimate pursuant to Section K5.2(d) for Regulatory Year (t), each Charging Group (g) and each Region (r);

$REDSMS_{grt}$ = the estimate pursuant to Section K5.3(d) for Regulatory Year (t), each Charging Group (g) and each Region (r).

K5B DETERMINING FIXED ALT HAN CHARGES DURING THE COMR PERIOD

Introduction

K5B.1 The DCC will determine the Fixed Alt HAN Charges for each Regulatory Year during the COMR Period in accordance with this Section K5B, using:

(e) the Alt HAN Fixed Revenue for that Regulatory Year estimated in accordance with Section K3;

(f) an estimate, in accordance with Section K5, of the number of Mandated Non-Domestic Smart Metering Systems for Non-Domestic Premises that will exist as at the beginning of that Regulatory Year;

(g) an estimate, in accordance with Section K5, of the number of Mandated Smart Metering Systems for Domestic Premises that will exist as at the beginning of that Regulatory Year; and

(h) the Alt HAN Charging Group Weighting Factors and other relevant matters described in Section K3.

Determining the Fixed Alt HAN Charges (COMR Period)

K5B.2 For each Regulatory Year (t), the DCC will determine the Fixed Alt HAN Charges payable in respect of each month (or part month) of Regulatory Year (t) by each person within each Alt HAN Charging Group (g) in respect of each Mandated Smart Metering System and each Mandated Non-Domestic Smart Metering System $(RAHFC_{gt})$, as follows:

$$RAHFC_{gt} = \frac{AHFR_t}{NM_t} \times \frac{\gamma_{gt}}{\sum_{\forall g}\left(\gamma_{gt} \times \sum_{\forall r} RESMS_{grt}\right)}$$

Where:

γ_{gt} = the Alt HAN Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g);

NM_t = the number of months (or part months) in Regulatory Year (t);

$AHFR_t$ = the Alt HAN Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t);

$$\forall g \forall r \quad RESMS_{grt} = REDSMS_{grt} + RENSMS_{grt}$$

$RENSMS_{grt}$ = the estimate pursuant to Section K5.2A(d) for Regulatory Year (t), each Charging Group (g) and each Region (r);

$REDSMS_{grt}$ = the estimate pursuant to Section K5.3(d) for Regulatory Year (t), each Charging Group (g) and each Region (r).

K6. DETERMINING FIXED CHARGES AFTER THE COMR PERIOD (ENDURING)

Introduction

K6.1 The DCC will determine the Fixed Charges for each Regulatory Year following the COMR Period in accordance with this Section K6, using:

(a) the National Fixed Revenue, the Regional Fixed Revenue and the Regional Communications Hub Fixed Revenue for that Regulatory Year determined in accordance with Section K3;

(b) an estimate, in accordance with this Section K6, of the number of Smart Metering Systems that will have been (and remain) Enrolled as at the beginning of that Regulatory Year; and

(c) the Charging Group Weighting Factors and other relevant matters described in Section K3.

Estimates

K6.2 In respect of Regulatory Years occurring after the COMR Period, the DCC will estimate the number of Smart Metering Systems that will have been (and remain) Enrolled as at the beginning of that Regulatory Year. The DCC shall undertake such estimates for Domestic Premises and Non-Domestic Premises separately (being *EDSMS* and *ENSMS* respectively). For each such Regulatory Year (t), the DCC will estimate the average number of persons within each Charging Group (g) for such Smart Metering Systems, and break down such estimates by reference to the Region (r) in which the premises is located, such that:

$$\forall g \forall r \quad ESMS_{grt} = EDSMS_{grt} + ENSMS_{grt}$$

Where:

$EDSMS_{grt}$ = the DCC’s estimate of the number of persons within each Charging Group (g) for Smart Metering Systems for Domestic Premises that will have been (and remain) Enrolled as at the beginning of that Regulatory Year (t), broken down by Region (r); and

$ENSMS_{grt}$ = the DCC’s estimate of the number of persons within each Charging Group (g) for Smart Metering Systems for Non-Domestic Premises that will have been (and remain) Enrolled as at the beginning of that Regulatory Year (t), broken down by Region (r).

Determining the Fixed Charges

K6.3 For each Regulatory Year (t), the DCC will determine the Fixed Charge payable in respect of each month (or part month) of Regulatory Year (t) by each person within each Charging Group (g) in respect of each Enrolled Smart Metering System for a Non-Domestic Premises and for a Domestic Premises (EFCgt) as follows:

$$EFC_{gt} = \frac{\left(NFR_t + \sum_{\forall r} RFR_{rt}\right)}{NM_t} \times \frac{\alpha_{gt}}{\sum_{\forall g}\left(\alpha_{gt} \times \sum_{\forall r} ESMS_{grt}\right)} + \frac{\sum_{\forall r} RCHFR_{rt}}{NM_t} \times \frac{\beta_{gt}}{\sum_{\forall g}\left(\beta_{gt} \times \sum_{\forall r} ESMS_{grt}\right)}$$

Where:

α_{gt} =the Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g)

β_{gt} =the CH Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g)

NM_t =the number of months (or part months) in Regulatory Year (t)

NFR_t =the National Fixed Revenue (determined in accordance with Section K3_ for Regulatory Year (t)

$ESMS_{grt}$ = the estimated number of persons within each Charging Group (g) for Enrolled Smart Metering Systems determined in accordance with Section K6.2 for Regulatory Year (t) and each Region (r)

RFR_{rt} = the Regional Fixed Revenue (determined in accordance with Section K3) for Regulatory Year (t) and each Region (r)

$RCHFR_{rt}$ = the Regional Communications Hub Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t) and Region (r)

K6.4 [Not used]

Calculating number of ESMSs for Fixed Charge Payment

K6.5 Following the end of each month (or part month) during each Regulatory Year occurring after the COMR Period, the DCC will:

(a) determine the actual number of Smart Metering Systems that have been (and remain) Enrolled as at the end of the 15th day of that month (or, in the case of a part month that ends on or prior to the 15th day of that month, at the end of that part month), whether Enrolled during that month or previously, and shall do so for Domestic Premises and for Non-Domestic Premises separately;

(b) calculate the number of persons within each Charging Group for such Enrolled Smart Metering Systems; and

(c) break down these calculations by reference to Parties (p), and (in the case of Smart Metering Systems for Non-Domestic Premises only) by reference to the Region in which such premises are located.

K6.6 The calculations in accordance with Section K6.5 of the number of Enrolled Smart Metering Systems as at the end of each month (or part month) (m) during Regulatory Year (t) within each Charging Group (g) broken down by reference to each Party (p), and (in the case of Non-Domestic Premises only) by reference to each Region (r), shall:

(a) in respect of Domestic Premises, be represented as $\mathrm{ADSMS}_{\mathrm{pgmt}}$; and

(b) in respect of Non-Domestic Premises, be represented as $\mathrm{ANSMS}_{\mathrm{pgrmt}}$.

K6A DETERMINING FIXED CH CHARGES

Introduction

K6A.1 The DCC will determine the Fixed CH Charges for each Regulatory Year during the UITMR Period or during or after the COMR Period in accordance with this Section K6A, using:

(a) the Regional Communications Hub Device Revenue for that Regulatory Year determined in accordance with Section K3;

(b) an estimate, in accordance with this Section K6A, of the average number of Smart Metering Systems that there will be during that Regulatory Year; and

(c) the CH Charging Group Weighting Factors and other relevant matters described in Section K3.

Estimates

K6A.2 In respect of each Regulatory Year occurring during the UITMR Period or during or after the COMR Period, the DCC will estimate the average number of Smart Metering Systems that there will be during the Regulatory Year. The DCC shall undertake such estimates for Domestic Premises and Non-Domestic Premises separately (being *EDCH* and *ENCH* respectively). For each such Regulatory Year (t), the DCC will estimate the average number of persons within each CH Charging Group (g) for such Smart Metering Systems, and break down such estimates by reference to the Region (r) in which the premises is located and the HAN Variant (h) forming part of each such Smart Metering System, such that:

$$\forall g \forall r \forall h \; ECH_{ghrt} = EDCH_{ghrt} + ENCH_{ghrt}$$

Where:

$EDCH_{ghrt}$ = the DCC’s estimate of the average number of persons within each CH Charging Group (g) for Smart Metering Systems for Domestic Premises during that Regulatory Year (t), broken down by Region (r) and HAN Variant (h); and

$ENCH_{ghrt}$ = the DCC’s estimate of the average number of persons within each CH Charging Group (g) for Smart Metering Systems for Non-Domestic Premises during that Regulatory Year (t), broken down by Region (r) and HAN Variant (h).

Determining the Fixed CH Charges

K6A.3 For each Regulatory Year (t), the DCC will determine the Fixed CH Charge payable in respect of each month (or part month) of Regulatory Year (t) by each person within each CH Charging Group (g) in respect of each Smart Metering System incorporating each HAN Variant (h) for a Non-Domestic Premises or for a Domestic Premises $(\mathrm{CHC}_{\mathrm{ght}})$ as follows:

Where:

$$CHC_{ght} = \frac{\sum_{\forall r} RCHDR_{hrt}}{NM_t} \times \frac{\beta_{gt}}{\sum_{\forall g}\left(\beta_{gt} \times \sum_{\forall r} ECH_{ghrt}\right)}$$

β_{gt} =the CH Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g)

NM_t =the number of months (or part months) in Regulatory Year (t)

$\mathrm{RCHDR}_{\mathrm{hrt}}$ = the Regional Communications Hub Device Revenue (determined in accordance with Section K3) for Regulatory Year (t), HAN Variant (h) and Region (r)

$\mathrm{ECH}_{\mathrm{ghrt}}$ = the estimated number of persons within each Charging Group (g) for Smart Metering Systems determined in accordance with Section K6A.2 for Regulatory Year (t), HAN Variant (h) and each Region (r).

K6A.4 [Not used]

Calculating number of CHs for Fixed CH Charge Payment

K6A.5 Following the end of each month (or part month) during each Regulatory Year occurring during the UITMR Period or during or after the COMR Period, the DCC will:

(d) determine the actual number of Smart Metering Systems that there are as at the end of the 15th day of that month (or, in the case of a part month that ends on or prior to the 15th day of that month, at the end of that part month), and shall do so for Domestic Premises and for Non-Domestic Premises separately;

(e) calculate the number of persons within each CH Charging Group for such Smart Metering Systems; and

(f) break down these calculations by reference to Parties (p), and (for transparency in the case of Smart Metering Systems for Non-Domestic Premises only) by reference to the Region in which such premises are located.

K6A.6 The calculations in accordance with Section K6A.5 of the number of Smart Metering Systems as at the end of each month (or part month) (m) during Regulatory Year (t) within each Charging Group (g) broken down by reference to each Party (p), and (for transparency in the case of Non-Domestic Premises only) by reference to each Region (r) and HAN Variant (h), shall:

(g) in respect of Domestic Premises, be represented as $\mathrm{ADCH}_{\mathrm{pghmt}}$; and

(h) in respect of Non-Domestic Premises, be represented as $\mathrm{ANCH}_{\mathrm{pgrhmt}}$.

K6B DETERMINING FIXED ALT HAN CHARGES AFTER THE COMR PERIOD (ENDURING)

K6B.1 The DCC will determine the Fixed Alt HAN Charges for each Regulatory Year after the COMR Period in accordance with this Section K6B, using:

(i) the Alt HAN Fixed Revenue, for that Regulatory Year estimated in accordance with Section K3;

(j) an estimate, in accordance with Section K6, of the number of Smart Metering Systems that there will have been (and remain) Enrolled at the beginning of that Regulatory Year; and

(k) the Alt HAN Charging Group Weighting Factors and other relevant matters described in Section K3.

Determining the Alt HAN Fixed Charges: Domestic

K6B.2 For each Regulatory Year (t) following the COMR Period, the DCC will determine the Alt HAN Fixed Charges payable in respect of each month (or part month) of Regulatory Year (t) by each person within each Alt HAN Charging Group (g) in respect of each Enrolled Smart Metering System for a Domestic Premises (*DAHFCgt*) as follows:

$$DAHFC_{gt} = \frac{AHFR_t}{NM_t} \times \frac{\mu_t \times \gamma_{gt}}{\sum_{\forall g}\left(\gamma_{gt} \times \sum_{\forall r} EDSMS_{grt}\right)}$$

Where:

μ_t =the Alt HAN Central Cost Domestic Allocation applicable to Regulatory Year (t) (set out in Section K3);

γ_{gt} =the Alt HAN Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g);

NM_t =the number of months (or part months) in Regulatory Year (t);

$EDSMS_{grt}$ =the estimated number of persons within each Charging Group (g) for Enrolled Smart Metering Systems for Domestic Premises determined in accordance with Section K6.2 for Regulatory Year (t) and each Region (r);

$AHFR_t$ =the Alt HAN Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t).

Determining the Alt HAN Fixed Charges: Non-Domestic

K6B.3 For each Regulatory Year (t) following the COMR Period, the DCC will determine the Alt HAN Fixed Charges payable in respect of each month (or part month) of Regulatory Year (t) by each person within each Alt HAN Charging Group (g) in respect of each Enrolled Smart Metering System for a Non-Domestic Premises $(NAHFC_{gt})$ as follows:

$$NAHFC_{gt} = \frac{AHFR_t}{NM_t} \times \frac{(1-\mu_t)\times\gamma_{gt}}{\sum_{\forall g}\left(\gamma_{gt} \times \sum_{\forall r} ENSMS_{grt}\right)}$$

Where:

μ_t =the Alt HAN Central Cost Domestic Allocation (set out in Section K3);

γ_{gt} =the Alt HAN Charging Group Weighting Factor (as set out in Section K3) applicable to Regulatory Year (t) and each Charging Group (g);

NM_t =the number of months (or part months) in Regulatory Year (t);

$ENSMS_{grt}$ =the estimated number of persons within each Alt HAN Charging Group (g) for Enrolled Smart Metering Systems for Non-Domestic Premises determined in accordance with Section K6.2 for Regulatory Year (t) and each Region (r);

$AHFR_t$ =the Alt HAN Fixed Revenue (estimated in accordance with Section K3) for Regulatory Year (t).

K7. DETERMINING EXPLICIT CHARGES

Introduction

K7.1 The Explicit Charges for each Regulatory Year are payable in respect of the Explicit Charging Metrics for that Regulatory Year.

K7.2 The Explicit Charging Metrics from time to time are as set out in this Section K7.

K7.3 Part of the rationale for Explicit Charging Metrics is to allow the DCC to closely reflect the charges it pays to the DCC Service Providers in respect of certain services, to SECCo in respect of certain Recoverable Costs, and to AltHANCo in respect of the Alt HAN Costs, so as to minimise the risks for the DCC associated with uncertainty regarding the frequency with which such services are to be provided or such Alt HAN Costs are incurred. The Explicit Charging Metrics may comprise any or all of the Core Communication Services and of the Enabling Services (so they are a sub-set of all Services other than the Elective Communication Services) and of the Alt HAN Costs. The Explicit Charging Metrics represent those Core Communication Services, Enabling Services and Alt HAN Costs that are to be charged for separately from the Fixed Charges, Fixed CH Charges and Fixed Alt HAN Charges.

K7.4 The DCC will determine the Explicit Charges for each Regulatory Year in accordance with this Section K7.

Explicit Charging Metrics

K7.5 The Explicit Charging Metrics for each Party and the Charging Period for each month are as follows:

(a) ('*security assessments*') an obligation to pay arising during that Charging Period in respect of that Party pursuant to Section G8.51 (Users: Obligation to Pay Charges) in relation to User Security Assessments, Follow-up Security Assessments, User Security Assessment Reports or the activities of the Independent Security Assurance Service Provider;

(b) ('*privacy assessments*') an obligation to pay arising during that Charging Period in respect of that Party pursuant to Section I2.40 (Users: Obligation to Pay Charges) in relation to Full Privacy Assessments, Random Sample Privacy Assessments, Privacy Assessment Reports or the activities of the Independent Privacy Auditor;

(c) ('*LV gateway connection*') an obligation to pay arising during that Charging Period in accordance with an offer for a DCC Gateway LV Connection accepted by that Party pursuant to Section H15 (DCC Gateway Connections), including where the obligation to pay is preserved under Section H15.19(b) (Ongoing Provision of a DCC Gateway Connection);

(d) ('*HV gateway connection*') an obligation to pay arising during that Charging Period in accordance with an offer for a DCC Gateway HV Connection accepted by that Party pursuant to Section H15 (DCC Gateway Connections), including where the obligation to pay is preserved under Section H15.19(b) (Ongoing Provision of a DCC Gateway Connection);

(e) ('*gateway equipment relocation*') an obligation to pay arising during that Charging Period as a result of a request by that Party to relocate DCC Gateway Equipment under Section H15.27 (DCC Gateway Equipment);

(f) ('*elective service evaluations*') an obligation to pay arising during that Charging Period under the terms and conditions accepted by that Party for a Detailed Evaluation in respect of potential Elective Communication Services pursuant to Section H7.8 (Detailed Evaluations of Elective Communication Services);

(g) ('*P&C support*') an obligation to pay arising during that Charging Period under the terms and conditions accepted by that Party in relation to that Party's use or implementation of the Parse and Correlate Software pursuant to Section H11.12 (Provision of Support & Assistance to Users);

(h) ('*SM WAN for testing*') an obligation to pay arising during that Charging Period from the acceptance by that Party of the charges offered by the DCC to provide a connection to a simulation of the SM WAN pursuant to Section H14.31 (Device and User System Testing);

(i) ('*additional testing support*') an obligation to pay arising during that Charging Period from the acceptance by that Party of the charges offered by the DCC to provide additional testing support to that Party pursuant to Section H14.33 (Device and User System Testing);

(j) ('*communication services*') the number of each of the Services identified in the DCC User Interface Services Schedule which have been provided to that Party during that Charging Period;

(k) ('*CH non-standard delivery*') an obligation to pay arising during that Charging Period as a result of the request by that Party for non-standard Communications Hub Product delivery requirements pursuant to Section F6.17 (Non-Standard Delivery Options);

(l) ('*CH stock level charge*') the number (to be measured at the end of that Charging Period) of Communications Hubs that have been delivered to that Party under Section F6 (Delivery and Acceptance of Communications Hubs) or that have been transferred to that Party under Section F6A (Transferring Communications Hubs Between Parties) and for which none of the following has yet occurred: (i) identification on the Smart Metering Inventory as 'installed not commissioned' or 'commissioned'; (ii) rejection in accordance with Section F6.10 (Confirmation of Delivery);
(iii) delivery to the DCC in accordance with Section F8 (Removal and Return of Communications Hubs); (iv) notification to the DCC in accordance with Section F8 (Removal and Return of

Communications Hubs) that the Communications Hub has been lost or destroyed; or (v) transfer to another Party under Section F6A (Transferring Communications Hubs Between Parties);

(m) (*'GFI Testing'*) the number of each of the types of GFI Testing tools which have been delivered to that Party during that Charging Period under Section H14 (Testing Services) and in accordance with Section 15 of Appendix J (Enduring Testing Approach Document);

(n) ('*CH auxiliary equipment*') the number of each of the types of Communications Hub Auxiliary Equipment which have been delivered to that Party during that Charging Period under Section F6 (Delivery and Acceptance of Communications Hubs), and which have not been (and are not) rejected in accordance with Section F6.10 (Rejected Communications Hub Products) or (in the case of the Communications Hub Auxiliary Equipment to which Section F7.9 or F7.10 or both applies (Ownership of and Responsibility for Communications Hub Auxiliary Equipment)) returned, or notified as lost or destroyed, for a reason which is a CH Pre-Installation DCC Responsibility;

(o) ('*CH returned and redeployed*') the number of Communications Hubs which have been returned by that Party during that Charging Period for a reason which is a CH User Responsibility, and which have been (or are intended to be) reconditioned for redeployment pursuant to Section F8 (Removal and Return of Communications Hubs);

(p) ('*CH returned not redeployed*') the number of Communications Hubs which have been returned, or notified as lost or destroyed, by that Party during that Charging Period for a reason which is a CH User Responsibility, and which have not been (and are not intended to be) reconditioned for redeployment pursuant to Section F8 (Removal and Return of Communications Hubs);

(q) ('*CH wrong returns location*') an obligation to pay arising during that Charging Period as a result of the return by that Party of Communications Hubs to the wrong returns location as referred to in Section F8.9 (Return of Communications Hubs);

(r) ('*test comms hubs*') the number of Test Communications Hubs delivered to that Party during that Charging Period, and which have not been (and are not) returned to the DCC in accordance with Section F10.8 (Ordering, Delivery, Rejection and Returns);

(s) ('*additional CH Order Management System accounts*') the number of additional CH Order Management System accounts made available to that Party during that Charging Period in accordance with Section F5.23 (CH Order Management System Accounts);

(t) ('*shared solution Alt HAN Equipment*') the number (as measured at the end of that Charging Period) of MPANs associated with premises supplied with electricity by that Party and of MPRNs associated with premises supplied with gas by that Party, in respect of each of which premises (except where the Alt HAN Inventory records that Party as having elected to use Opted-out Alt HAN Equipment at that time) Central Shared Solution Alt HAN Equipment is installed;

(u) ('*point-to-point Alt HAN Equipment*') the number (as measured at the end of that Charging Period) of MPANs associated with premises supplied with electricity by that Party and of MPRNs associated with premises supplied with gas by that Party, in respect of each of which premises (except where the Alt HAN Inventory records that Party as having elected to use Opted-out Alt HAN Equipment at that time) Central Point-to-Point Alt HAN Equipment is installed;

(v) ('*stock level point-to-point Alt HAN Equipment*') the number of items of Central Point-to-Point Alt HAN Equipment (as measured at the end of that Charging Period) delivered to that Party but not installed;

(w) (*'RF Noise Testing'*) an obligation to pay arising during that Charging Period from the acceptance by that Party of the charges offered by the DCC to provide RF Noise Testing pursuant to Section H14.37 (Radio Frequency Noise Testing);

(x) (*'DCC Boxed'*) the number of each of the types of DCC Boxed which have been delivered to that Party during that Charging Period under Section H14 (Testing Services) and in accordance with Clause 18 of the Enduring Testing Approach Document; and

(y) (*'MAP/Manufacturer Reports'*) the number of MAP/Manufacturer reports provided to the Meter Asset Provider or Manufacturer during that Charging Period.

Explicit Charges

K7.6 The DCC will determine the Explicit Charges for each Explicit Charging Metric and each Regulatory Year:

(a) in the case of the Explicit Charging Metrics referred to in Section K7.5(a) and (b)('security assessments' and 'privacy assessments'), so as to pass-through to each Party the relevant expenditure incurred by the Panel in respect of the Explicit Charging Metric as notified by the Panel to the DCC for the purpose of establishing such Charges;

(b) (subject to Section K7.6(a)) in a manner consistent with the Charging Objectives referred to in Sections C1.4, C1.5 and C1.6(a), (b), and (c);

(c) (subject to Section K7.6(a) and the Charging Objective referred to in Section C1.4) on a non-discriminatory and cost reflective basis so as to recover the incremental cost to the DCC (including under the DCC Service Provider Contracts) associated with the occurrence of that Explicit Charging Metric (and disregarding any costs and expenses that would be incurred whether or not that Explicit Charging Metric occurred);

(d) in the case of the Explicit Charging Metrics referred to in Section K7.5(c) and (''LV gateway connection' and 'HV gateway connection'), the Explicit Charges may comprise an initial connection charge and an ongoing annual charge (which annual charge may be payable monthly or less frequently);

(e) in the case of the Explicit Charging Metrics referred to in Section K7.5(j) ('communication services'), in accordance with (c) above; save that (where the cost of implementing an Explicit Charge for one or more of the Services referred to in that Section would be disproportionate to the cost-reflective incremental cost) the Explicit Charge for those Services may be set at zero;

(f) in the case of the Explicit Charging Metrics referred to in Sections K7.5(l), (n), (o) and (p) ('CH stock level charge', 'CH auxiliary equipment', 'CH returned and redeployed', and 'CH returned not redeployed'), so as to ensure they are uniform across each month of a Regulatory Year and across each Region and do not make any distinction linked to use at Domestic Premises or Non- Domestic Premises;

(g) in the case of the Explicit Charging Metric referred to in Sections K7.5(l), (o) and (p) ('CH stock level charge', 'CH returned and redeployed' and 'CH returned not redeployed'), on the basis that there can be different charges for each HAN Variant;

(h) so that the Explicit Charging Metric referred to in Section K7.5(o) ('CH returned and redeployed') for each HAN Variant is not more than the Explicit Charging Metric for that HAN Variant referred to in Section K7.5(p) ('CH returned not redeployed');

(i) in the case of the Explicit Charging Metric referred to in Section K7.5(p) ('CH returned not redeployed'), in accordance with (c) above, for which purpose the incremental cost to DCC shall include any early termination fee payable in relation to the Communications Hub, or (if applicable) the net present value of the ongoing costs likely to be incurred by the DCC notwithstanding the fact that the Communications Hub has been removed, lost or destroyed;

(i)a in the case of the Explicit Charging Metric referred to in Sections K7.5(r) ('test comms hubs'), on the basis that there can be different charges for different types of Test Communications Hubs (including by reference to the HAN Variant to which they correspond); and

(j) in the case of the Explicit Charging Metrics referred to in Section K7.5(t), (u) and (v) ('shared solution Alt HAN Equipment', 'point-to-point Alt HAN Equipment' and 'stock level point-to-point Alt HAN Equipment), so as to pass- through to each Party the relevant costs of AltHANCo in respect of the Explicit Charging Metric as notified by AltHANCo to the DCC for the purpose of establishing such Charges.

K7.7 This Section K7.7 applies only in respect of the Explicit Charging Metrics referred to in Sections K7.5(f) and (g) ('elective service evaluation' and 'P&C support'). Where the DCC is simultaneously considering requests for an Explicit Charging Metric from two or more Parties, and where it would be advantageous to all such Parties for the DCC to do so, the DCC shall offer the Explicit Charging Metrics both conditionally on all the Parties taking up the Explicit Charging Metric and without such condition. In respect of the Explicit Charges to apply in respect of the conditional offer, the DCC shall calculate the Explicit Charges for each Party on the assumption that the other Parties accept the offers and shall accordingly apportion any common costs between the Parties on a non-discriminatory and cost-reflective basis.

Second-Comer Contributions

K7.8 This Section K7.8 applies only in respect of the Explicit Charging Metrics referred to in Sections K7.5(f) and (g) ('elective service evaluation' and 'P&C support'). Subject to Section K7.10, where:

(a) the DCC makes an offer in respect of any proposed Explicit Charging Metric to a person (the " **subsequent person**"); and

(b) prior to such offer being made to the subsequent person, another person (the "**initial contributor**") was obliged to pay Explicit Charges designed to recover any costs (the "**relevant costs**") that would otherwise (in accordance with this Charging Methodology) have been recoverable from the subsequent person,

then the DCC shall make an offer to the subsequent person that requires that subsequent person to pay by way of Explicit Charges such a contribution to the relevant costs as may be reasonable in all the circumstances.

K7.9 Subject to Section K7.10, where an offer made by the DCC that includes an element of relevant costs is accepted by the subsequent person, the DCC shall (following payment by the subsequent person) offer such rebate to the initial contributor as may be reasonable in all the circumstances.

K7.10 Sections K7.8 and K7.9 shall not apply:

(a) where the relevant costs are less than £20,000;

(b) where the relevant costs are between £20,000 and £500,000 (inclusive), and the initial contributor's offer for the Explicit Charging Metric was accepted more than 5 years before the offer to the subsequent contributor is made;

(c) where the relevant costs are more than £500,000, and the initial contributor's offer for the Explicit Charging Metric was accepted more than 10 years before the offer to the subsequent contributor is made; and/or

(d) where the initial contributor no longer exists or cannot be contacted by the DCC following reasonable enquiry.

K7.11 All references to an initial contributor in this Section K7 shall, in respect of any subsequent person, be interpreted so as to include any person that was previously a subsequent person in respect of the relevant costs in question and that paid Explicit Charges designed to recover an element of those relevant costs.

K8. DETERMINING ELECTIVE CHARGES

Introduction

K8.1 The Elective Charges for each Regulatory Year are payable in accordance with the relevant Bilateral Agreement.

K8.2 The terms and conditions of each Bilateral Agreement (including those in respect of the Elective Charges payable thereunder) are to be agreed or determined in accordance with Section H7 (Elective Communication Services) and the DCC Licence.

Determining the Elective Charges

K8.3 Where the DCC makes any offer to enter into a Bilateral Agreement in respect of an Elective Communication Service, the DCC shall offer Elective Charges in respect of each such Elective Communication Service determined by the DCC:

(a) in a manner consistent with the Charging Objectives referred to in Sections C1.6(a), (b), and (c);

(b) in a non-discriminatory and cost-reflective manner, so as to recover the total costs to the DCC (including under the DCC Service Provider Contracts) associated with that Bilateral Agreement (including so as to recover a reasonable proportion of any standing costs that would be incurred whether or not that Elective Communication Service was provided); and

(c) so that such proportion of such standing costs is recovered by way of a standing charge that is payable whether or not the service is requested or provided.

K8.4 Where the DCC is simultaneously considering requests for a formal offer to provide Elective Communication Services from two or more Parties, and where it would be advantageous to all such Parties for the DCC to do so, the DCC shall make the offer both conditionally on all the Parties accepting the offer and without such condition. In respect of the Elective Charges to apply in respect of the conditional offer, the DCC shall calculate the Elective Charges for each Party on the assumption that the other Parties accept the offers, and shall accordingly apportion any common costs between the Parties on a non-discriminatory and cost-reflective basis.

K8.5 Although this Code in no way binds the Authority it is acknowledged that any determination by the Authority of the Elective Charges in respect of a Bilateral Agreement will be undertaken as envisaged by the DCC Licence, including by reference to those matters set out in Sections K8.3 and K8.4.

Second-Comer Contributions

K8.6 Subject to Section K8.8, where:

(a) the DCC makes an offer in respect of any proposed Elective Communications Service to a person (the "**subsequent person**"); and

(b) prior to such offer being made to the subsequent person, another person (the "**initial contributor**") was obliged to pay Elective Charges designed to recover any costs (the "**relevant costs**") that would otherwise (in accordance with this Charging Methodology) have been recoverable from the subsequent person,

then the DCC shall make an offer to the subsequent person that requires that subsequent person to pay by way of Elective Charges such a contribution to the relevant costs as may be reasonable in all the circumstances.

K8.7 Subject to Section K8.8, where an offer made by the DCC that includes an element of relevant costs is accepted by the subsequent person, the DCC shall (following payment by the subsequent person) offer such rebate to the initial contributor as may be reasonable in all the circumstances.

K8.8 Sections K8.6 and K8.7 shall not apply:

(a) where the relevant costs are less than £20,000;

(b) where the relevant costs are between £20,000 and £500,000 (inclusive), and the initial contributor's offer for the Elective Communication Service was accepted more than 5 years before the offer to the subsequent contributor is made;

(c) where the relevant costs are more than £500,000, and the initial contributor's offer for the Elective Communication Service was accepted more than 10 years before the offer to the subsequent contributor is made; and/or

(d) where the initial contributor no longer exists or cannot be contacted by the DCC following reasonable enquiry.

K8.9 All references to an initial contributor in this Section K8 shall, in respect of any subsequent person, be interpreted so as to include any person that was previously a subsequent person in respect of the relevant costs in question and that paid Elective Charges designed to recover an element of those relevant costs.

K9. WITHIN-YEAR ADJUSTMENTS

Introduction

K9.1 The revenue restriction contained in the DCC Licence allows the DCC to carry forward any under or over recovery in respect of one Regulatory Year to the following Regulatory Year. Therefore, there is no absolute need for the DCC to alter the Charges part way through a Regulatory Year.

K9.2 Nevertheless, subject to compliance with Condition 19 of the DCC Licence, the DCC may alter the Charges part way through a Regulatory Year, including in one of the following two ways:

(a) where this Charging Methodology is amended and the amendment has effect part way through a Regulatory Year; or

(b) where the requirements of this Section K9 are met, by applying within-year adjustments for the matters set out in this Section K9.

Amending this Charging Methodology

K9.3 Where the Authority consents in accordance with Condition 19 of the DCC Licence, the DCC may recalculate the Charges in accordance with this Charging Methodology (including so as to take into account any modification of this Charging Methodology). In such circumstances, the references herein to a Regulatory Year shall be interpreted as meaning the remaining period of such Regulatory Year from the time at which the modified Charges in question are to apply.

Within-Year Adjustment for Bad Debt

K9.4 Where a Party fails to pay to the DCC an amount due by way of Charges such that an Event of Default has occurred, and provided the DCC has complied with its obligations under Section J (Charges) in respect of the same, the DCC may (where it reasonably considers it appropriate to do so, taking into account the matters referred to in Section K9.1) determine the **Unrecovered Bad Debt Payment** $(\mathrm{UBDP}_{\mathrm{pemt}})$ to be paid by every Compliant Party (p) in respect of that Event of Default (e) in one or more subsequent months (m) of such Regulatory Year (t) as the DCC may determine. $(\mathrm{UBDP}_{\mathrm{pemt}})$ shall be calculated as follows:

$$UBDP_{pemt} = \frac{UBP_e \times DS_{pe}}{BM_e}$$

Where:

BM_e is the number of months in the balance of the Regulatory Year over which the DCC decides it is to recover the amount owing in respect of the Event of Default

UBP_e is the amount owing in respect of the Event of Default (e) or such smaller amount as DCC decides to recover over the remainder of the Regulatory Year (t)

DS_{pe} is the share of the debt owing in respect of the Event of Default (e) to be paid by each Compliant Party (p), which is to be calculated as follows.

$$DS_{pe} = \frac{TMP_{pe}}{\sum_{\forall p} TMP_{pe}}$$

where TMP_{pe} is the total amount paid or payable by way of Charges by each Compliant Party (p) in respect of the 12 months preceding the month in respect of which the Event of Default (e) occurred

$\sum_{\forall p}$ represents a sum over all Compliant Parties for the Event of Default.

K9.5 Where the DCC:

(a) has levied a charge for an Unrecovered Bad Debt Payment; and

(b) subsequently recovers from the defaulting Party any or all of the unpaid debt to which the Unrecovered Bad Debt Payment related,

then the DCC shall return the money it has recovered from the defaulting Party to the Compliant Parties in proportion to their contributions to $UBDP_{pemt}$. In order to return such money, the DCC shall include a negative $UBDP_{pemt}$ amount in the Charges for the month following the month in which the DCC received payment (or part payment) from the defaulting Party.

Within-Year Adjustment for Liability Events

K9.6 If a Liability Event arises, the DCC may (where it reasonably considers it appropriate to do so, taking into account the matters referred to in Section K9.1 and having consulted with the Authority and the Panel) determine the **Liability Payment** (LP_{plmt}) to be paid by (or, in the case of negative Liability Sums, paid to) every other Party (p) in respect of that Liability Event (l) in one or more subsequent months (m) of such Regulatory Year (t) as the DCC may determine LP_{plmt} shall be calculated as follows:

$$LP_{plmt} = \frac{TLP_l \times LS_{pl}}{BM_l}$$

Where:

BM_l is the number of months in the balance of the Regulatory Year over which the DCC decides it is to recover the amount owing in respect of the Liability Event

TLP_l is the Liability Sum arising in respect of the Liability Event (l) or such smaller amount as DCC decides to recover over the remainder of the Regulatory Year (t)

LS_{pl} is the share of the liability owing in respect of the Liability Event (l) to be paid by (or, in the case of negative Liability Sums, paid to) each Party (p), which is to be calculated as follows.

$$LS_{pl} = \frac{TMP_{pl}}{\sum_{\forall p} TMP_{pl}}$$

where TMP_{pl} is the total amount paid or payable by way of Charges by each Party (p) in respect of the 12 months preceding the month in which the Liability Sum for the Liability Event (l) is payable to or by the DCC Service Providers $\sum_{\forall p}$ represents a sum over all Parties.

Within-Year Adjustment for Communications Hub Finance Acceleration Events

K9.7 For the purposes of Section K9.6:

(a) a Communications Hub Finance Acceleration Event and a 4G DBT Finance Acceleration Event are each a Liability Event;

(b) the amount due and payable by the DCC as a result of a Communications Hub Finance Acceleration Event and/or 4G DBT Finance Acceleration Event is a Liability Sum to the extent the DCC estimates that such amount will be recoverable by the DCC as Allowed Revenue;

(c) the reference to “Charges” in the definition of LS_{pl} shall (in the case of a Communications Hub Finance Acceleration Event) be interpreted as a reference to “Communications Hub Charges” and in the case of a 4G DBT Finance Acceleration Event be interpreted as a reference to "Fixed Charges"; and

(d) the amount payable by each Party in respect of such Liability Event shall (for the purposes of invoicing and payment under Section J (Charges) or Section M11.5(b) (Third Party Rights)) be treated as an amount due by way of Communications Hub Finance Charges relating to the Communications Hub Finance Facility in respect of which the Communications Hub Finance Acceleration Event has occurred and/or as an amount due by way of 4G DBT Finance Charges in respect of which the 4G DBT Finance Acceleration Event has occurred (as the case may be).

K10. CALCULATING MONTHLY PAYMENTS

Introduction

K10.1 The monthly payment of Charges payable by each Party shall be calculated in accordance with this Section K10, based on:

(a) the Fixed Charges determined in accordance with Section K5 or K6 (as applicable);

(b) the Fixed CH Charges determined in accordance with Section K6A;

(c) the Fixed Alt HAN Charges determined in accordance with Section K5A, K5B or K6B (as applicable);

(d) the Explicit Charges determined in accordance with Section K7;

(e) the Elective Charges determined in accordance with Section K8; and

(f) any within-year adjustments determined in accordance with Section K9.

Calculating Fixed Charges

K10.2 The Fixed Charges, Fixed CH Charges and Fixed Alt HAN Charges payable by each person in respect of any month (or part month) during a Regulatory Year shall be calculated following the end of that month based on the calculations in accordance with Section K5, K5A, K5B, K6, K6A or K6B (as applicable).

K10.3 The Fixed Charges and Fixed CH Charges are payable by the persons in each Charging Group, and the Fixed Alt HAN Charges are payable by the persons in the Alt HAN Charging Groups. The Fixed Charges and Fixed CH Charges payable by any Party that is not in a Charging Group shall be zero, and the Fixed Alt HAN Charges payable by any Party that is not in an Alt HAN Charging Group shall be zero.

Calculating Explicit Charges and Elective Charges Payments

K10.4 The Explicit Charges payable by each Party in respect of any month (or part month) during a Regulatory Year shall be calculated following the end of that month based on the Explicit Charging Metrics incurred by that Party during the Charging Period for that month.

K10.5 The Elective Charges payable by each Party in respect of any month (or part month) during a Regulatory Year shall be calculated following the end of that month based on the relevant Bilateral Agreement.

Calculating Monthly Payments (UITMR Period)

K10.6 No longer used.

K10.7 For each month (or part month) (m) during a Regulatory Year (t) during the UITMR Period, the rollout monthly payment (*RMP*) in respect of the Charges payable by each Party (p) shall be calculated as follows:

$$\begin{aligned} RMP_{pmt} = {} & \sum_{\forall g}\left(RFC_{gt} \times \left(ADSMS_{pgmt} + \sum_{\forall r} ANSMS_{pgrmt} \right)\right) \\ & + \sum_{\forall g \forall h}\left(CHC_{ght} \times \left(ADCH_{ght} + \sum_{\forall r} ANCH_{ghrt} \right)\right) \\ & + \sum_{\forall g}\left(RAHFC_{gt} \times ADSMS_{pgmt} \right) + \sum_{\forall g}\left(RAHFC_{gt} \times \sum_{\forall r} ANSMS_{pgrmt} \right) \\ & + \sum_{i=1}^{i=n}\left(EC_{it} \times ECM_{ipmt} \right) + TEP_{pmt} + \sum_{e \in m} UBDP_{pemt} + \sum_{l \in m} LP_{plmt} \end{aligned}$$

Where:

RFC_{gt} = the Fixed Charges payable in respect of months (or part months) during Regulatory Year (t) by persons in Charging Group (g) in respect of Mandated Smart Metering Systems for Domestic Premises and Enrolled = the Fixed Charges payable in respect of months (or part months) during Regulatory Year (t) by persons in Charging Group (g) in respect of Mandated Smart Metering Systems for Domestic Premises and Enrolled Smart Metering Systems for Non-Domestic Premises, calculated in accordance with Section K5;

$ADSMS_{pgmt}$ = the amount described as such in Section K5.9;

$ANSMS_{pgrmt}$ = the amount described as such in Section K5.7;

CHC_{ght} = the Fixed CH Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in CH Charging Group (g), for HAN Variant (h) in respect of Smart Metering Systems for both Non- Domestic Premises and Domestic Premises;

$ANCH_{ghrt}$ = the amount described in Section K6A.6;

$ADCH_{ght}$ = the amount described in Section K6A.6;

$RAHFC_{gt}$ = the Fixed Alt HAN Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in Alt HAN Charging Group (g) in respect of Mandated Smart Metering Systems for Domestic Premises and Smart Metering Systems for Non-Domestic Premises calculated in accordance with Section K5A;

EC_{it} = the Explicit Charge for an Explicit Charging Metric (i) and a Regulatory Year (t);

ECM_{ipmt} = the Explicit Charging Metrics incurred by a Party (p) during the Charging Period for that month (m) in a Regulatory Year (t);

TEP_{pmt} = the total amount payable by a Party (p) in respect of Elective Charges and a month (m) in a Regulatory Year (t);

$UBDP_{pemt}$ = the Unrecovered Bad Debt Payment in respect of a month (m) in a Regulatory Year (t) and each Event of Default (e), as calculated in accordance with Section K9;

LP_{plmt} = the Liability Payment in respect of a month (m) in a Regulatory Year (t) and each Liability Event (l), as calculated in accordance with Section K9.

Calculating Monthly Payments (COMR Period)

K10.7A For each month (or part month) (m) during a Regulatory Year (t) during the COMR Period, the rollout monthly payment (RMP) in respect of the Charges payable by each Party (p) shall be calculated as follows:

$$
\begin{aligned}
RMP_{pmt} = & \sum_{\forall g}\left(RFC_{gt} \times \left(ADSMS_{pgmt} + \sum_{\forall r} ANSMS_{pgrmt} \right)\right) \\
& + \sum_{\forall g \forall h}\left(CHC_{ght} \times \left(ADCH_{ght} + \sum_{\forall r} ANCH_{ghrt} \right)\right) \\
& + \sum_{\forall g}\left(RAHFC_{gt} \times ADSMS_{pgmt} \right) + \sum_{\forall g}\left(RAHFC_{gt} \times \sum_{\forall r} ANSMS_{pgrmt} \right) \\
& + \sum_{i=1}^{i=n}\left(EC_{it} \times ECM_{ipmt} \right) + TEP_{pmt} + \sum_{e \in m} UBDP_{pemt} + \sum_{l \in m} LP_{plmt}
\end{aligned}
$$

Where:

RFC_{gt} = the Fixed Charges payable in respect of months (or part months) during Regulatory Year (t) by persons in Charging Group (g) in respect of Mandated Smart Metering Systems for Domestic Premises and Mandated Non-Domestic Smart Metering Systems for Non-Domestic Premises, calculated in accordance with Section K5;

$ADSMS_{pgmt}$ = the amount described as such in Section K5.9;

$ANSMS_{pgrmt}$ = the amount described as such in Section K5.11;

CHC_{ght} = the Fixed CH Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in CH Charging Group (g), for HAN Variant (h) in respect of Smart Metering Systems for both Non-Domestic Premises and Domestic Premises;

$ANCH_{ghrt}$ = the amount described in Section K6A.6;

$ADCH_{ght}$ = the amount described in Section K6A.6;

$RAHFC_{gt}$ = the Fixed Alt HAN Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in Alt HAN Charging Group (g) in respect of Mandated Smart Metering Systems for Domestic Premises and Mandated Non-Domestic Smart Metering Systems for Non-Domestic Premises calculated in accordance with Section K5B;

EC_{it} = the Explicit Charge for an Explicit Charging Metric (i) and a Regulatory Year (t);

ECM_{ipmt} = the Explicit Charging Metrics incurred by a Party (p) during the Charging Period for that month (m) in a Regulatory Year (t);

TEP_{pmt} = the total amount payable by a Party (p) in respect of Elective Charges and a month (m) in a Regulatory Year (t);

$UBDP_{pemt}$ = the Unrecovered Bad Debt Payment in respect of a month (m) in a Regulatory Year (t) and each Event of Default (e), as calculated in accordance with Section K9;

LP_{plmt} = the Liability Payment in respect of a month (m) in a Regulatory Year (t) and each Liability Event (l), as calculated in accordance with Section K9.

Calculating Monthly Payments (Enduring)

K10.8 For each month (or part month) (m) during a Regulatory Year (t) after the COMR Period, the monthly payment (*MP*) in respect of the Charges payable by each Party (p) shall be calculated as follows:

Where:

$$
\begin{aligned}
MP_{pmt} = & \sum_{\forall g}\left(EFC_{gt} \times \left(ADSMS_{pgmt} + \sum_{\forall r} ANSMS_{pgrmt} \right)\right) \\
& + \sum_{\forall g \forall h}\left(CHC_{ght} \times \left(ADCH_{ght} + \sum_{\forall r} ANCH_{ghrt} \right)\right) \\
& + \sum_{\forall g}\left(DAHFC_{gt} \times ADSMS_{pgmt} \right) + \sum_{\forall g}\left(NAHFC_{gt} \times \sum_{\forall r} ANSMS_{pgrmt} \right) \\
& + \sum_{i=1}^{i=n}\left(EC_{it} \times ECM_{ipmt} \right) + TEP_{pmt} + \sum_{e \in m} UBDP_{pemt} + \sum_{l \in m} LP_{plmt}
\end{aligned}
$$

Where:

EFC_{gt} = the Fixed Charges payable in respect of months (or part months) during Regulatory Year (t) by persons in Charging Group (g) in respect of Enrolled Smart Metering Systems for both Non-Domestic Premises and Domestic Premises, calculated in accordance with Section K6;

$ADSMS_{pgmt}$ = the amount described as such in Section K6.7;

$ANSMS_{pgrmt}$ = the amount described as such in Section K6.7;

CHC_{ght} = the Fixed CH Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in CH Charging Group (g), for HAN Variant (h) in respect of Smart Metering Systems for both Non- Domestic Premises and Domestic Premises;

$ANCH_{ghrt}$ = the amount described in Section K6A.6;

$ADCH_{ght}$ =the amount described in Section K6A.6;

$DAHCFC_{gt}$ = the Domestic Fixed Alt HAN Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in Alt HAN Charging Group (g) in respect of Enrolled Smart Metering Systems for Domestic Premises calculated in accordance with Section K6B;

$NAHFC_{gt}$ = the Non-Domestic Fixed Alt HAN Charge payable in respect of months (or part months) during Regulatory Year (t) by persons in Alt HAN Charging Group (g) in respect of Enrolled Smart Metering Systems for Non-Domestic Premises calculated in accordance with Section K6B;

EC_{it} =the Explicit Charge for an Explicit Charging Metric (i) and a Regulatory Year (t);

ECM_{ipmt} = the Explicit Charging Metrics incurred by a Party (p) during the Charging Period for that month (m) in a Regulatory Year (t);

TEP_{pmt} =the total amount payable by a Party (p) in respect of Elective Charges and a month (m) in a Regulatory Year (t);

$UBDP_{pemt}$ = the Unrecovered Bad Debt Payment in respect of a month (m) in a Regulatory Year (t) and each Event of Default (e), as calculated in accordance with Section K9;

LP_{plmt}: =the Liability Payment in respect of a month (m) in a Regulatory Year (t) and each Liability Event (l), as calculated in accordance with Section K9.

K11. DEFINITIONS

K11.1 In this Charging Methodology, except where the context otherwise requires, the expressions in the left hand column below shall have the meanings given to them in the right hand column below:

Advanced Meter has the meaning given to that expression in:

a. with respect to the supply of electricity, standard licence condition 39 of the Electricity Supply Licence;
b. with respect to the supply of gas, standard licence condition 33 of the Gas Supply Licence.

Allowed Revenue has the meaning given to that expression in the revenue restriction conditions of the DCC Licence.

Alt HAN Charging Group has the meaning given to that expression in Section K3.10.

Alt HAN Charging Group Weighting Factors has the meaning given to that expression in Section K3.15.

Alt HAN Cost Domestic Allocation has the meaning given to that expression in Section K3.17.

Alt HAN Costs has the meaning given to that expression in Section Z6.1.

Alt HAN Fixed Revenue has the meaning given to that expression in Section K3.7.

Alt HAN Inventory has the meaning given to that expression in Section Z6.1.

AltHANCo has the meaning given to that expression in Section Z6.1.

Central Point-to-Point Alt HAN Equipment has the meaning given to that expression in Section Z6.1.

Central Shared Solution Alt HAN Equipment has the meaning given to that expression in Section Z6.1.

Charging Group has the meaning given to that expression in Section K3.10.

Charging Group Weighting Factor has the meaning given to that expression in Section K3.13.

Charging Period means, in respect of each month (the ‘current month’), the period from the start of the 16th day of the previous month to the end of the 15th day of the current month.

CH Charging Group has the meaning given to that expression in Section K3.9.

CH Charging Group Weighting Factor has the meaning given to that expression in Section K3.14.

COMR Period means the period, during which mass rollout of Smart Metering Systems is to be completed, which for these purposes:

a. commences immediately following the end of the UITMR Period; and
b. ends at the end of 31 March falling in the year determined for such purposes by the Secretary of State following consultation with the Authority, Parties, and the Panel.

Compliant Party means, in respect of any Event of Default giving rise to an Unrecovered Bad Debt Payment, all of the Parties other than: (a) the Defaulting Party in respect of that Event of Default; and (b) the Defaulting Party in respect of any other Event of Default giving rise to an Unrecovered Bad Debt Payment that is calculated under Section K9.4 during the same month as the Unrecovered Bad Debt Payment to which reference is first made in this definition.

Designated Premises has the meaning given to that expression in:

a. with respect to the supply of electricity, standard licence condition 1 (Definitions for standard conditions) of the Electricity Supply Licence;
b. with respect to the supply of gas, standard licence condition 1 (Definitions for standard conditions) of the Gas Supply Licence.

Elective Charges means the Charges payable in respect of Elective Communication Services.

Enrolled Smart Metering System means a Smart Metering System that has been Enrolled.

Estimated Allowed Revenue has the meaning given to that expression in Section K2.1.

Estimated Elective Service Revenue has the meaning given to that expression in Section K2.3.

Estimated Explicit Charges Revenue has the meaning given to that expression in Section K2.5.

Estimated Fixed Charges Revenue has the meaning given to that expression in Section K2.6.

Exit Criteria means the criteria that must be satisfied before testing can be considered complete.

Explicit Charges means the Charges calculated in accordance with Section K7, and payable in respect of the Explicit Charging Metrics.

Explicit Charging Metrics has the meaning given to that expression in Section K7.

Fixed Alt HAN Charges means the Charges calculated in accordance with Section K5A, K5B or K6B (as applicable).

Fixed CH Charges means the Charges calculated in accordance with Section K6A.

Fixed Charges means the Charges calculated in accordance with Section K5 or K6 (as applicable).

HAN Variant for the purposes of this Section K there shall be only two HAN Variants: Single Band and Dual Band, as further described in Appendix I (CH Installation and Maintenance Support Materials).

Liability Event means an event as a result of which either:
(a) the DCC has a net liability to the DCC Service Providers collectively (excluding in respect of charges arising in the ordinary course of events); or
(b) the DCC Service Providers collectively have a net liability to the DCC (excluding in respect of service credits or liquidated damages arising from poor service performance).

Liability Sum means, in respect of a Liability Event as a result of which:
(a) the DCC owes a net liability to the DCC Service Providers collectively, the amount of such net liability (having taken into account amounts recoverable by the DCC in respect of that Liability Event otherwise than pursuant to this Charging Methodology, including amounts recoverable from other Parties as a result of any breach of this Code by such Parties which caused or contributed to that Liability Event), but only to the extent that the DCC estimates that such net liability will be recoverable by the DCC as Allowed Revenue; or
(b) the DCC Service Providers collectively owe a net liability to the DCC, the net amount actually received by the DCC in respect of such net liability (having taken into account amounts owed by the DCC to other Parties and to third parties in respect of that Liability Event otherwise than pursuant to this Charging Methodology), but only to the extent that the DCC estimates that such net liability will reduce the Allowed Revenue that the DCC could otherwise recover by way of the Charges (which net amount will be expressed as a negative number).

Liability Payment has the meaning given to that expression in Section K9.6 (expressed as a negative number in the case of negative Liability Sums).

Mandated Non-Domestic Smart Metering System means, from time to time, each MPAN or MPRN associated with a Designated Premises (regardless of whether or not a Smart Metering System has been installed or Enrolled), but excluding:

a. those MPANs and MPRNs associated with premises in respect of which the DCC is exempted from the requirement to Enrol Smart Metering Systems in accordance with the Statement of Service Exemptions;
b. those MPANs that do not have the status of “traded” (as identified in the REC) and those MPRNs that do not have a status that indicates that gas is off-taken at the supply point (as identified in the UNC);
c. those MPANs associated with a Designated Premises at which there is installed an Advanced Meter pursuant to the provisions of standard condition 39 of the Electricity Supply Licence; and
d. those MPRNs associated with a Designated Premises at which there is installed an Advanced Meter pursuant to the provisions of standard condition 33 of the Gas Supply Licence.

Mandated Smart Metering System means, from time to time, each MPAN or MPRN associated with a Domestic Premises (regardless of whether or not a Smart Metering System has been installed or Enrolled), but excluding:

a. those MPANs and MPRNs associated with premises in respect of which the DCC is exempted from the requirement to Enrol Smart Metering Systems in accordance with the Statement of Service Exemptions; and
b. those MPANs and MPRNs that do not have an RMP Lifecycle Status of 'operational' (as recorded pursuant the REC).

National Fixed Revenue has the meaning given to that expression in Section K3.7.

Opted-out Alt HAN Equipment has the meaning given to that expression in Section Z6.1.

Regional Communications Hub Device Revenue has the meaning given to that expression in Section K3.9.

Regional Communications Hub Fixed Revenue has the meaning given to that expression in Section K3.9.

Regional Fixed Revenue has the meaning given to that expression in Section K3.9.

Regulatory Year means (subject to Section K9.3) a period of twelve months beginning at the start of 1 April in any calendar year and ending at the end of 31 March in the next following calendar year.

Test CH Services means the Services provided under Section F10 (Test Communications Hubs).

UITMR Period means the period, covering User integration testing and the mass rollout period, which for these purposes:

(a) commences at the start of the month in which the DCC is first obliged to make regular monthly payments to one or more of the DCC Service Providers;

and
(b) ends on 31 March 2021.

Unrecovered Bad Debt Payment has the meaning given to that expression in Section K9.4.

Unrecovered Bad Debt Payment has the meaning given to that expression in Section K9.4.

Weighting Factor means the Charging Group Weighting Factor, the CH Charging Group Weighting Factor or the Alt HAN Charging Group Weighting Factor.

Contents

L SMART METERING KEY INFRASTRUCTURE AND DCC KEY INFRASTRUCTURE

L1. SMKI POLICY MANAGEMENT AUTHORITY

Establishment of the SMKI PMA

L1.1 The Panel shall establish a Sub-Committee in accordance with the requirements of this Section L1, to be known as the "**SMKI PMA**".

L1.2 Save as expressly set out in this Section L1, the SMKI PMA shall be subject to the provisions concerning Sub-Committees set out in Section C6 (Sub-Committees).

Membership of the SMKI PMA

L1.3 The SMKI PMA shall be composed of the following persons (each an "**SMKI PMA Member**"):

(a) the SMKI PMA Chair (as further described in Section L1.5);

(b) four SMKI PMA (Supplier) Members (as further described in Section L1.6);

(c) two SMKI PMA (Network) Member (as further described in Section L1.8); and

(d) one representative of the Security Sub-Committee and one representative of the Technical Architecture and Business Architecture Sub-Committee (in each case as further described in Section L1.10); and

(e) one SMKI Specialist (appointed as described in the definition of that expression in Section A1 (Definitions)).

L1.4 Each SMKI PMA Member must be an individual (and cannot be a body corporate, association or partnership). No one person can hold more than one office as an SMKI PMA Member at the same time.

L1.5 The "**SMKI PMA Chair**" shall be such person as is (from time to time) appointed to that role by the Panel in accordance with a process designed to ensure that:

(a) the candidate selected is sufficiently independent of any particular Party or class of Parties;

(b) the SMKI PMA Chair is appointed for a three-year term (following which he or she can apply to be re-appointed);

(c) the SMKI PMA Chair is remunerated at a reasonable rate;

(d) the SMKI PMA Chair's appointment is subject to Section C6.9 (Member Confirmation), and to terms equivalent to Section C4.6 (Removal of Elected Members);

(e) provision is made for the SMKI PMA Chair to continue in office for a reasonable period following the end of his or her term of office in the event of any delay in appointing his or her successor; and

(f) where the SMKI PMA Chair's appointment (and for the purposes of this Section and Section L1.5A all references to appointment shall encompass re-appointment) is to take effect on or after the date this Section L1.5(f) comes into force, the Panel shall:

(i) notify the Secretary of State of the appointment it proposes to make;

(ii) not make the appointment unless and until the Secretary of State has confirmed in writing that they do not object to the appointment being made;

(iii) ensure that the terms of the appointment include terms which provide for the Panel to terminate the appointment where directed to do so by the Secretary of State pursuant to Section L1.5A and from such date or within such period as may be specified in the Secretary of State's direction; and

(iv) where the appointed person has not, at the date of the appointment, passed (as a minimum) a Security Check (or equivalent), ensure that the terms of the appointment include terms which:

(A) require the appointed person to apply for a Security Check (or equivalent) within one month of the date of the appointment;

(B) provide for the Panel to terminate the appointment if a Security Check (or equivalent) is not passed by the appointed person within 12 months of the date of the appointment (or such longer period as the Secretary of State may approve following a request from the Panel).

L1.5A The Secretary of State may, in respect of any SMKI PMA Chair appointment which takes effect on or after the date Section L1.5(f) comes into force, direct the Panel to terminate the appointment of the SMKI PMA Chair where the Secretary of State considers it necessary to do for the purposes of preserving the integrity of, and in the interests of maintaining, the security of the End-to-End Smart Metering System (or any part of that system).

L1.5B The Panel shall comply with any direction given to it by the Secretary of State pursuant to Section L1.5A.

L1.6 Each of the four "**SMKI PMA (Supplier) Members**" shall (subject to any directions to the contrary made by the Secretary of State for the purpose of transition on the incorporation of this Section L1 into this Code):

(a) be appointed in accordance with Section L1.7, subject to compliance by the appointed person with Section C6.9 (Member Confirmation);

(b) retire 2 years after his or her appointment (without prejudice to his or her ability to be nominated for a further term of office); and

(c) be capable of being removed from office in accordance with Sections C4.5 and C4.6 (Removal of Elected Members), for which purpose those Sections shall be read as if references to "Elected Member" were to "SMKI PMA (Supplier) Member", references to "Panel" were to "SMKI PMA", references to "Panel Chair" were to "SMKI PMA Chair", and references to "Panel Members" were to "SMKI PMA Members".

L1.7 Each of the four SMKI PMA (Supplier) Members shall be appointed in accordance with a process:

(a) by which three SMKI PMA (Supplier) Members will be elected by Large Supplier Parties, and one SMKI PMA (Supplier) Member will be elected by Small Supplier Parties;

(b) by which any person (whether or not a Supplier Party) shall be entitled to nominate candidates to be elected as an SMKI PMA (Supplier) Member; and

(c) that is otherwise the same as that by which Elected Members are elected under Sections C4.2 and C4.3 (as if references therein to "Panel" were to "SMKI PMA", references to "Panel Chair" were to "SMKI PMA Chair", references to "Panel Members" were to "SMKI PMA Members", and references to provisions of Section C or D were to the corresponding provisions set out in or applied pursuant to this Section L1).

L1.8 The two "**SMKI PMA (Network) Members**" shall (subject to any directions to the contrary made by the Secretary of State for the purpose of transition on the incorporation of this Section L1 into this Code):

(a) be appointed in accordance with Section L1.9, subject to compliance by the appointed person with Section C6.9 (Member Confirmation);

(b) retire 2 years after his or her appointment (without prejudice to his or her ability to be nominated for a further term of office); and

(c) be capable of being removed from office in accordance with Sections C4.5 and C4.6 (Removal of Elected Members), for which purpose those Sections shall be read as if references to "Elected Member" were to "SMKI PMA (Network) Members", references to "Panel" were to "SMKI PMA", references to "Panel Chair" were to "SMKI PMA Chair", and references to "Panel Members" were to "SMKI PMA Members".

L1.9 The two SMKI PMA (Network) Member shall be appointed in accordance with a process:

(a) by which one SMKI PMA (Network) Member will be elected by the Electricity Network Parties and one SMKI PMA (Network) Member will be elected by the Gas Network Parties; and

(b) that is otherwise the same as that by which Elected Members are elected under Sections C4.2 and C4.3 (as if references therein to "Panel" were to "SMKI PMA", to "Panel Chair" were to "PMA Chair", to "Panel Members" were to "SMKI PMA Members", and to provisions of Section C or D were to the corresponding provisions set out in or applied pursuant to this Section L1).

L1.10 The Security Sub-Committee and the Technical Architecture and Business Architecture Sub-Committee shall each nominate one of their members to be an SMKI PMA Member by notice to the Secretariat from time to time. The Security Sub-Committee or the Technical Architecture and Business Architecture Sub-Committee (as applicable) may each replace its nominee from time to time by prior notice to the Secretariat. Such nomination or replacement shall be subject to compliance by the relevant person with Section C6.9 (Member Confirmation). Until each such Sub-Committee exists, the Panel shall nominate a person to act as a representative of that Sub-Committee (and may from time to time replace such person).

L1.11 Each SMKI PMA Member must ensure that he or she reads the SMKI Document Set when first appointed, and subsequently from time to time, so that he or she is familiar with its content.

Proceedings of the SMKI PMA

L1.12 Each SMKI PMA Member shall be entitled to appoint an Alternate in accordance with Section C5.19 (as it applies pursuant to Section L1.15). The SMKI PMA Chair must nominate another person to act as Alternate for the SMKI PMA Chair (which person may be the SMKI Specialist but may not be another SMKI PMA Member, and which person must be sufficiently independent of any particular Party or class of Parties).

L1.13 No business shall be transacted at any meeting of the SMKI PMA unless a quorum is present at that meeting. The quorum for each such meeting shall be four of the SMKI PMA Members, at least one of whom must be the SMKI PMA Chair (or his or her Alternate).

L1.14 Without prejudice to the generality of Section C5.13(c) (Attendance by Other Persons) as it applies pursuant to Section L1.15:

(a) a representative of the DCC shall be invited to attend each and every SMKI PMA meeting (which representative shall be entitled to speak at SMKI PMA meetings without the permission of the SMKI PMA Chair); and

(b) other persons who may be invited to attend SMKI PMA meetings may include:

(i) the Independent SMKI Assurance Service Provider;

(ii) one or more representatives of Device Manufacturers; or

(iii) a specialist legal adviser.

L1.15 Subject to Sections L1.12, L1.13 and L1.14, the provisions of Section C5 (Proceedings of the Panel) shall apply to the proceedings of the SMKI PMA, for which purpose that Section shall be read as if references to "Panel" were to "SMKI PMA", references to "Panel Chair" were to "SMKI PMA Chair", and references to "Panel Members" were to "SMKI PMA Members".

L1.16 Notwithstanding Section C3.12 (Protections for Panel Members and Others), that Section shall not apply to the SMKI Specialist in any circumstances and the SMKI Specialist shall have no rights under that Section.

Duties of the SMKI PMA

L1.17 The SMKI PMA shall undertake the following duties:

(a) to approve the Device CPS, Organisation CPS and the IKI CPS, and any changes to those documents, in accordance with Sections L9;

(b) to propose variations to the SMKI SEC Documents, as further described in Section L1.19;

(c) to periodically review (including where directed to do so by the Panel) the effectiveness of the SMKI Document Set (including so as to evaluate whether the SMKI Document Set remains consistent with the SEC Objectives), and report to the Panel on the outcome of such review (such report to include any recommendations for action that the SMKI PMA considers appropriate);

(d) as soon as reasonably practicable following the incorporation of each of the following documents into this Code, its re-incorporation, or its modification in accordance with section 88 of the Energy Act 2008, to review that document in accordance with paragraph (c) above:

(i) the SMKI Compliance Policy;

(ii) the SMKI RAPP;

(iii) the Device Certificate Policy;

(iv) the Organisation Certificate Policy;

(v) the IKI Certificate Policy;

(vi) the SMKI Recovery Procedure,

and (where the SMKI PMA considers it appropriate to do so) submit one or more Draft Proposals in respect of those documents;

(e) to periodically review the effectiveness of the DCCKI Document Set and to:

(i) notify DCC where it considers that changes should be made to the DCCKI Document Set in order to ensure that DCC meets its obligations under Section G (Security) (such notification to include any recommendation for action that the SMKI PMA considers appropriate); and

(ii) copy any such notification to the Security Sub-Committee and, except to the extent that it is appropriate to redact information for security purposes, to other SEC Parties;

(f) as soon as reasonably practicable following the incorporation of each of the following documents into this Code, its re-incorporation, or its modification in accordance with section 88 of the Energy Act 2008, to review that document in accordance with paragraph (e) above:

(i) the DCCKI RAPP;

(ii) the DCCKI Certificate Policy;

(g) to review the DCCKI CPS, and any amendments proposed to be made to it by the DCC, in accordance with Section L13 (DCC Key Infrastructure);

(h) as part of its review of the SMKI Compliance Policy pursuant to paragraph (d) above, to consider whether SMKI Participants which are subject to assurance assessments pursuant to the SMKI Compliance Policy should be liable to meet the costs (or a proportion of the costs) of undertaking such assessments, and (where the SMKI PMA considers it appropriate to do so) submit one or more Draft Proposals as referred to in paragraph (d) above;

(i) in relation to any incident in which a Relevant Private Key is (or is suspected of being) Compromised, to decide, in accordance with the SMKI Recovery Key Guidance, whether or not to require the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key);

(j) to exercise the functions allocated to it under the SMKI Recovery Procedure, and in particular to exercise any power to nominate Parties for such purposes (and in accordance with such procedures) as may be set out in the SMKI Recovery Procedure;

(k) to provide the Panel, the Change Sub-Committee, the Change Board and Working Groups with support and advice in respect of Draft Proposals and Modification Proposals that provide for variations to the SMKI SEC Documents, the DCCKI SEC Documents, or the S1SPKM SEC Documents;

(l) to provide assurance in accordance with Section L2 (SMKI Assurance);

(m) to provide the Panel with support and advice in respect of Disputes for which the Panel is required to make a determination, insofar as such Disputes relate to the SMKI Document Set, the DCCKI Document Set or the S1SPKM Document Set;

(n) to provide the Panel and Sub-Committees with general advice and support with respect to the SMKI Services, the SMKI Repository Service, the DCCKI Services, the DCCKI Repository Service, each S1SPKI and each SMETS1 Symmetric Key Arrangement;

(o) to exercise such functions as are allocated to it under, and to comply with all the applicable requirements of, the SMKI Document Set in accordance with Section L9.1;

(p) in respect of each S1SPKI CPS, to review, and either to approve or determine not to reject (subject to such amendments as it may direct), or to reject:

(i) a draft of that document, in accordance with Section L14.11;

(ii) any proposed amendment to that document, in accordance with Section L14.13;

(q) to periodically review the effectiveness of the S1SPKM Document Set and to:

(i) notify DCC where it considers that changes should be made to the S1SPKM Document Set (such notification to include any recommendation for action that the SMKI PMA considers appropriate); and

(ii) copy any such notification to the Security Sub-Committee;

(r) as soon as reasonably practicable following the incorporation of each of the following documents into this Code, its re-incorporation, or its modification in accordance with section 88 of the Energy Act 2008, to review that document in accordance with paragraph (q) above:

(i) each S1SPKI Certificate Policy;

(ii) each S1SPKI RAPP;

(iii) each SMETS1 Cryptographic Key Management Policy;

(iv) the S1SPKM Compliance Policy; and

(s) to perform any other duties expressly ascribed to the SMKI PMA elsewhere in this Code.

L1.18 The SMKI PMA shall establish a process whereby the Code Administrator monitors Draft Proposals and Modification Proposals with a view to identifying (and bringing to the SMKI PMA's attention) those proposals that are likely to affect the SMKI SEC Documents. The Code Administrator shall comply with such process.

Modification of the SMKI SEC Documents and S1SPKM SEC Documents by the SMKI PMA

L1.19 Notwithstanding Section D1.3 (Persons Entitled to Submit Draft Proposals):

(a) the SMKI PMA shall be entitled to submit Draft Proposals in respect of any of the SMKI SEC Documents or S1SPKM SEC Documents where the SMKI PMA considers it appropriate to do so; and

(b) any SMKI PMA Member shall be entitled to submit Draft Proposals in respect of any of the SMKI SEC Documents or S1SPKM SEC Documents where he or she considers it appropriate to do so (where the SMKI PMA has voted not to do so).

Updated or Replacement Standards, Procedures and Guidelines

L1.20 In respect of the SMKI Document Set, the SMKI Services, the DCCKI Document Set, the DCCKI Services and Sections L2 to L13 shall be interpreted in accordance with the following provisions of this Section L1.

L1.21 As a consequence of its duties under Section L1.17, the SMKI PMA shall determine any updates that are required to standards, procedures and guidelines that apply to the operation of the SMKI Services and the DCCKI Services and shall publish the latest versions on the Website.

Transitional Period for Updated or Replacement Standards, Procedures and Guidelines

L1.22 Section L1.23 applies where:

(a) the DCC or any User is required, in accordance with any provision of the SMKI SEC Documents, to ensure that it, or that any of its policies, procedures, systems or processes, complies with:

(i) any standard, procedure or guideline issued by a third party; and

(ii) any equivalent to that standard, procedure or guideline which updates or replaces it from time to time; and

(b) the relevant third party issues an equivalent to that standard, procedure or guideline which updates or replaces it.

L1.23 Where this Section L1.23 applies, the obligation on the DCC or User (as the case may be):

(a) shall be read as an obligation to comply with the updated or replaced standard, procedure or guideline from such date as is determined by the SMKI PMA in respect of that document; and

(b) prior to that date shall be read as an obligation to comply (at its discretion) with either:

(i) the previous version of the standard, procedure or guideline; or

(ii) the updated or replaced standard, procedure or guideline.

L1.24 Any date determined by the SMKI PMA in accordance with Section L1.23 may be the subject of an appeal by the DCC or any User to the Panel (whose decision shall be final and binding for the purposes of this Code).

L2. SMKI ASSURANCE

SMKI Compliance Policy

L2.1 The SMKI PMA shall exercise the functions allocated to it by the SMKI Compliance Policy.

L2.2 The DCC shall procure all such services as are required for the purposes of complying with its obligations under the SMKI Compliance Policy.

SMKI Participants: Duty to Cooperate in Assessment

L2.3 Each SMKI Participant shall do all such things as may be reasonably requested by the SMKI PMA, or by any person acting on behalf of or at the request of the SMKI PMA (including in particular the Independent SMKI Assurance Service Provider), for the purposes of facilitating an assessment of that SMKI Participant's compliance with any applicable requirements of the SMKI Document Set.

L2.4 For the purposes of Section L2.3, an SMKI Participant shall provide the SMKI PMA (or the relevant person acting on its behalf or at its request) with:

(a) all such Data as may reasonably be requested, within such times and in such format as may reasonably be specified; and

(b) all such other forms of cooperation as may reasonably be requested, including in particular access at all reasonable times to:

(i) such parts of the premises of that SMKI Participant as are used for; and

(ii) such persons engaged by that SMKI Participant as carry out, or are authorised to carry out,

any activities related to its compliance with the applicable requirements of the SMKI Document Set.

Events of Default

L2.5 In relation to an Event of Default which consists of a material breach by an SMKI Participant of any applicable requirements of the SMKI Document Set, the provisions of Sections M8.2 (Notification of an Event of Default) to M8.4 (Consequences of an Event of Default) shall apply subject to the provisions of Sections L2.6 to L2.13.

L2.6 For the purposes of Sections M8.2 to M8.4 as they apply pursuant to Section L2.5, an Event of Default shall (notwithstanding the ordinary definition thereof) be deemed to have occurred in respect of the DCC where it is in material breach of any applicable requirements of the SMKI Document Set (provided that Sections M8.4(e), (f) and (g) shall never apply to the DCC).

L2.7 Where in accordance with Section M8.2 the Panel receives notification that an SMKI Participant is in material breach of any applicable requirements of the SMKI Document Set, it shall refer the matter to the SMKI PMA. On any such referral, the SMKI PMA may investigate the matter in accordance with Section M8.3 as if the references in that Section to the “Panel” were to the “SMKI PMA”.

L2.8 Where the SMKI PMA has:

(a) carried out an investigation in accordance with Section M8.3; or

(b) received a report from the Independent SMKI Assurance Service Provider, following an assessment by it of the compliance of any SMKI Participant with the applicable requirements of the SMKI Document Set, concluding that the SMKI Participant has not complied with those requirements,

the SMKI PMA shall consider the information available to it and shall determine whether any non-compliance with the SMKI Document Set has occurred and, if so, whether that non-compliance constitutes an Event of Default.

L2.9 Where the SMKI PMA determines that an Event of Default has occurred, it shall:

(a) notify the relevant SMKI Participant and any other Party it considers may have been affected by the Event of Default; and

(b) refer the matter to the Panel for the Panel to determine the appropriate steps to take in accordance with Section M8.4.

L2.10 Where the Panel is considering what steps to take in accordance with Section M8.4, it shall request and consider the advice of the SMKI PMA.

L2.11 Where the Panel determines that an SMKI Participant is required to give effect to a remedial action plan in accordance with Section M8.4(d) that plan must be approved by the SMKI PMA.

L2.12 Where, in accordance with Section L2.11, the SMKI PMA has approved a remedial action plan in relation to the provision by the DCC of the SMKI Services, the Panel shall ensure that the approved plan (being redacted only in so far as necessary for the purposes of security) is made available to all Parties.

L2.13 Where, in accordance with Section L2.11, the SMKI PMA has approved a remedial action plan in relation to:

(a) the DCC acting in a capacity other than as the provider of the SMKI Services, the Panel may arrange for a version of the approved plan (or parts of that plan) to be made available to all the Parties; or

(b) any other SMKI Participant, the Panel may arrange for an anonymised version of the approved plan (or parts of that plan) to be made available to all the Parties,

but (in each case) only where the Panel considers that such dissemination is necessary for the purposes of security.

Emergency Suspension of SMKI Services

L2.14 Where the SMKI PMA has reason to believe that there is any immediate threat of the DCC Total System, any User Systems, any Smart Metering Systems or any RDP Systems being Compromised to a material extent by the occurrence of an event arising in relation to the SMKI Services, it may instruct the DCC immediately to suspend:

(a) the provision (in whole or in part) of the SMKI Services and/or any other Services which rely on the use of Certificates;

(b) the rights of any SMKI Participant to receive (in whole or in part) the SMKI Services and/or any other Services which rely on the use of Certificates,

and thereafter to retain that suspension in effect until such time as the SMKI PMA instructs the DCC to reinstate the provision of the relevant Services or the rights of the SMKI Participant (as the case may be).

L2.15 Where the SMKI PMA takes any steps under Section L2.14, it:

(a) shall immediately thereafter notify the Authority;

(b) shall comply with any direction given to it by the Authority in relation to such steps; and

(c) may notify all the Parties of some or all of such steps (without identifying the SMKI Participant), but only where the Panel considers that such notification is necessary for the purposes of security.

L2.16 Any Party which is affected by the SMKI PMA taking any steps under Section L2.14 may appeal the decision to do so to the Authority, and the DCC shall comply with any decision of the Authority in respect of the matter (which shall be final and binding for the purposes of this Code).

L3. THE SMKI SERVICES

The SMKI Services

L3.1 For the purposes of this Section L3, the "**SMKI Services**" means all of the activities undertaken by the DCC in its capacity as:

(a) the Device Certification Authority;

(b) the Organisation Certification Authority; or

(c) the IKI Certification Authority,

in each case in accordance with the applicable requirements of the Code.

Authorised Subscribers

General Provisions

L3.2 For the purposes of this Section L3:

(a) any Party which has successfully completed the SMKI and Repository Entry Process Tests for the purposes of Section H14.22(a) in respect of any of the Certificate Policies;

(b) any RDP which has successfully completed the SMKI and Repository Entry Process Tests for the purposes of Section H14.22(a) in respect of the Organisation Certificate Policy; and

(c) SECCo or a Manufacturer in respect of the IKI Certificate Policy,

may apply to become an Authorised Subscriber in accordance with, and by following the relevant procedures set out in, that Certificate Policy and the SMKI RAPP.

L3.3 The DCC shall authorise SECCo, any Party, a Manufacturer or any RDP to submit a Certificate Signing Request, and so to become an Authorised Subscriber, where SECCo, that Party, that Manufacturer or that RDP has successfully completed the relevant procedures and satisfied the criteria set out in the relevant Certificate Policy and the SMKI RAPP.

L3.4 The DCC shall provide any SMKI Services that may be requested by an Authorised Subscriber where the request is made by that Authorised Subscriber in accordance with the applicable requirements of the SMKI SEC Documents.

L3.5 The DCC shall ensure that in the provision of the SMKI Services it acts in accordance with Good Industry Practice.

Registration Data Providers

L3.6 Where a Registration Data Provider (other than an Electricity Network Party or Gas Network Party which is deemed to be an RDP, acting in its capacity as such) has become an Authorised Subscriber, the

Network Party that nominated that Registration Data Provider shall ensure that the RDP complies with all of its obligations in that capacity under this Section L.

L3.7 Where a Registration Data Provider has been nominated as such by more than one Network Party:

(a) that RDP shall not, by virtue of acting in the capacity of an RDP for different Network Parties, be required to become a Subscriber for different Organisation Certificates;

(b) to the extent to which that RDP can be clearly identified as acting on behalf of one Network Party, that Network Party shall be subject to the requirements of Section L3.6 in respect of the actions of the RDP;

(c) to the extent to which that RDP cannot be clearly identified as acting on behalf of one Network Party, each of the Network Parties which nominated that RDP shall be subject to the requirements of Section L3.6 in respect of the actions of the RDP.

Determinations by the Panel

L3.8 Where the DCC has notified SECCo, a Party, a Manufacturer or an RDP that has applied to become an Authorised Subscriber that the DCC does not consider that it has satisfied the criteria set out in the relevant Certificate Policy and the SMKI RAPP for that purpose, SECCo, that Party, that Manufacturer or that RDP (as the case may be) may refer the matter to the Panel for determination.

L3.9 Following any reference made to it under Section L3.8, the Panel:

(a) shall determine whether the relevant applicant satisfies the criteria set out in the relevant Certificate Policy and the SMKI RAPP; and

(b) where the Panel determines that the relevant applicant meets those criteria, it shall notify the DCC, and the applicant shall (subject to any other requirements of the relevant Certificate Policy or the SMKI RAPP) become an Authorised Subscriber.

L3.10 Subject to the provisions of Section L3.11, any such determination of the Panel shall be final and binding.

L3.11 Nothing in Sections L3.8 to L3.10 shall be taken to prevent SECCo, any Party, any Manufacturer or any RDP from making a new application to DCC to become an Authorised Subscriber, in accordance with Section L3.2, at any time.

Changes in Circumstance

L3.12 Where SECCo, a Party, a Manufacturer or an RDP which is an Authorised Subscriber becomes aware of a change in circumstance which would be likely, if it were to make a new application to the DCC to become an Authorised Subscriber, to affect whether it would satisfy the criteria set out in the relevant Certificate Policy and the SMKI RAPP for that purpose, it shall as soon as is reasonably practicable notify the DCC of that change in circumstance.

L3.13 Where the DCC receives a notification from an Authorised Subscriber in accordance with Section L3.12, or otherwise becomes aware of a change in circumstance of the nature referred to in that Section, it shall:

(a) assess whether that Authorised Subscriber continues to satisfy the relevant criteria to be an Authorised Subscriber as set out in the relevant Certificate Policy and the SMKI RAPP; and

(b) where it determines that the Authorised Subscriber does not continue to satisfy the relevant criteria, notify the Authorised Subscriber which, subject to Section L3.14, shall cease to be an Authorised Subscriber in accordance with the Certificate Policy.

L3.14 Where the DCC has notified an Authorised Subscriber in accordance with Section L3.13(b):

(a) the provisions of Section L3.8 to L3.11 shall apply as if the person notified had made an unsuccessful application to become an Authorised Subscriber in respect of the relevant Certificate Policy; and

(b) where the relevant Certificate Policy is the Organisation Certificate Policy, the DCC shall, subject to any determination made by the Panel in accordance with Section L3.9, revoke any Organisation Certificates for which that person is the Subscriber;

(c) where the relevant Certificate Policy is the IKI Certificate Policy, the DCC shall, subject to any determination made by the Panel in accordance with Section L3.9, take such steps in relation to any IKI Certificates for which that person is the Subscriber as may be set out in that Certificate Policy or in the SMKI RAPP.

Eligible Subscribers

L3.15 An Authorised Subscriber:

(a) shall be known as an "**Eligible Subscriber**" in respect of a Certificate if it is entitled to become a Subscriber for that Certificate; and

(b) will be entitled to become a Subscriber for a Certificate only if it is identified as an Eligible Subscriber in respect of that Certificate in accordance with the following provisions of this Section L3.

Device Certificates

L3.16 A Party which is an Authorised Subscriber in accordance with the Device Certificate Policy will be an Eligible Subscriber in respect of a Device Certificate only where that Subject of that Device Certificate is one that is identified with that Party in the table immediately below.

Party	Subject
The DCC	Either: (a) a Communications Hub Function; or (b) a Gas Proxy Function.
An Import Supplier	Either: (a) an Electricity Smart Meter; or (b) a Type 1 Device.
A Gas Supplier	Either: (a) a Gas Smart Meter; (b) a Gas Proxy Function; or (c) a Type 1 Device.

Any other Party	Either: (a) an Electricity Smart Meter (b) a Gas Smart Meter; or (c) a Type 1 Device, but only in so far as the SMI Status of that Device is not set to 'commissioned' or 'installed not commissioned'.
The DCC acting as the Production Proving Function	Any Production Proving Device.

DCA Certificates

L3.17 Where the DCC (acting in its capacity as Root DCA or Issuing DCA) is an Authorised Subscriber in accordance with the Device Certificate Policy:

(a) it (and only it) will be an Eligible Subscriber in respect of DCA Certificates;

(b) (save for the purposes of the replacement of the Root DCA Certificate) it will be an Eligible Subscriber only in respect of a single Root DCA Certificate.

Organisation Certificates and OCA Certificates

L3.18 Where the DCC, a Network Party or another Party which is (or is to become) a User, or any RDP, is an Authorised Subscriber in accordance with the Organisation Certificate Policy, that person will be an Eligible Subscriber in respect of an Organisation Certificate or OCA Certificate only where:

(a) if the Subject of that Certificate is:

(i) either the DCC (acting pursuant to its powers or duties under the Code) or a DCC Service Provider, that person is the DCC; or

(ii) not the DCC, that person is the Subject of the Certificate; and

(b) if the value of the X520OrganizationalUnitName field in that Certificate is a Remote Party Role corresponding to that listed in the table immediately below, either:

(i) that person is the DCC, it is the Party identified with that Remote Party Role in the second column of that table, the Certificate Signing Request originates from the individual System referred in the paragraph of the definition of DCC Live Systems identified in the fourth column of that table, and the Certificate is to be issued to the same individual System from which the Certificate Signing Request originates; or

(ii) that person is identified with that Remote Party Role in the second column of that table, and the value of the subjectUniqueID field in the Certificate is a User ID or RDP ID associated with any such User Role or with an RDP as may be identified in the third column of that table.

Remote Party Role	Party	User Role or RDP	DCC Live Systems definition paragraph
root	The DCC	[Not applicable]	(d)

recovery	The DCC	[Not applicable]	(f)
transitionalCoS	The DCC	[Not applicable]	(c)
wanProvider	The DCC	[Not applicable]	(a)
accessControlBroker	The DCC	[Not applicable]	(a) or (b) (as provided for in Section L3.18A)
issuingAuthority	The DCC	[Not applicable]	(d)
networkOperator	A Network Party	Either: (a) Electricity Distributor; or (b) Gas Transporter.	[Not applicable]
supplier	A Supplier Party	Either: (a) Import Supplier; or (b) Gas Supplier.	[Not applicable]
other	An RDP or any Party other than the DCC	Either: Other User; Registered Supplier Agent; Registration Data Provider; or Export Supplier.	[Not applicable]
pPPXmlSign	The DCC	[Not Applicable]	(g)
pPRDPFileSign	The DCC	[Not Applicable]	(g)
s1SPxmlSigning	The DCC	[Not Applicable]	(h)

xmlSign	An RDP or any Party other than the DCC	Either:
		Import Supplier;
		Gas Supplier;
		Electricity Distributor;
		Gas Transporter;
		Other User;
		Registered Supplier Agent;
		Registration Data Provider; or
		Export Supplier.

dSPXmlSign	The DCC	[Not Applicable]	(a)
aCBXmlSign	The DCC	[Not Applicable]	(b)
wANProviderXmlSign	The DCC	[Not Applicable]	(a)

L3.18A For the purposes of the fourth column of row 5 of the above table, where:

(a) the Certificate to be issued is to have a keyUsage value of digitalSignature, the Certificate Signing Request must only have originated from the individual System referred to at paragraph (a) of the definition of DCC Live Systems; and

(b) the Certificate to be issued is to have a keyUsage value of keyAgreement, the Certificate Signing Request must only have originated from the individual System referred to at paragraph (b) of the definition of DCC Live Systems.

L3.18B For the purposes of Section L3.18A, the term 'keyUsage', 'digitalSignature', and 'keyAgreement' shall have the meaning given to that term in the Organisation Certificate Policy.

OCA Certificates (further provisions)

L3.19 Where the DCC (acting in its capacity as Root OCA or Issuing OCA) is an Authorised Subscriber in accordance with the Organisation Certificate Policy:

(a) it (and only it) will be an Eligible Subscriber in respect of OCA Certificates;

(b) (save for the purposes of the replacement of the Root OCA Certificate) it will be an Eligible Subscriber only in respect of a single Root OCA Certificate.

IKI Certificates

L3.20 Where SECCo or any Party or Manufacturer or RDP is an Authorised Subscriber in accordance with the IKI Certificate Policy, it will be an Eligible Subscriber in respect of an IKI Certificate in the circumstances set out in the IKI Certificate Policy.

ICA Certificates

L3.21 Where the DCC (acting in its capacity as Root ICA or Issuing ICA) is an Authorised Subscriber in accordance with the IKI Certificate Policy:

(a) it (and only it) will be an Eligible Subscriber in respect of ICA Certificates;

(b) (save for the purposes of the replacement of the Root ICA Certificate) it will be an Eligible Subscriber only in respect of a single Root ICA Certificate.

Certificates for Commissioning of Devices

L3.22 The DCC shall establish and lodge in the SMKI Repository, and maintain such of its Certificates as are necessary to facilitate the installation at premises of Devices that are capable of being Commissioned.

L3.23 For the purposes of Section L3.22, the DCC shall ensure that the Certificates which are established, lodged in the SMKI Repository and subsequently maintained include at least the following:

(a) the Root OCA Certificate;

(b) the Issuing OCA Certificate;

(c) the Root DCA Certificate;

(d) the Issuing DCA Certificate;

(e) the Recovery Certificate;

(f) the DCC (access-Control-Broker) - digitalSignature Certificate;

(g) the DCC (access-Control-Broker) – keyAgreement Certificate;

(h) the DCC (wanProvider) Certificate; and

(i) the DCC (transitionalCoS) Certificate.

L3.24 For the purposes of Sections L3.23(e) - (i), the Certificates which are referred to in those paragraphs mean Organisation Certificates in respect of which, in each case:

(a) the value of the KeyUsage field is that identified in relation to the Certificate in the second column of the table immediately below;

(b) the value of the X520OrganizationalUnitName field corresponds to the Remote Party Role identified in relation to the Certificate in the third column of that table; and

(c) the Certificate is used for the purposes of discharging the obligations of the DCC in the role identified in relation to it in the fourth column of that table.

Certificate	keyUsage Value	Remote Party Role	DCC Role
Recovery Certificate	digitalSignature	recovery	The role of the DCC under the SMKI Recovery Procedure.
DCC (Access Control Broker) - digitalSignature Certificate	digitalSignature	accessControlBroker	AccessControlBroker
DCC (Access Control Broker) – keyAgreement Certificate	keyAgreement	accessControlBroker	AccessControlBroker

DCC (wanProvider) Certificate	digitalSignature	wanProvider	wanProvider
DCC (transitionalCoS) Certificate	digitalSignature	transitionalCoS	The role of the DCC as CoS Party

Market Participant Identifiers

Certificate Signing Requests

L3.25 Where the DCC (acting in its capacity as Registration Authority under the Organisation Certificate Policy) receives a Certificate Signing Request of the type described in Section L3.26(a), and the circumstances described in Section L3.26(b) apply, the DCC shall reject the Certificate Signing Request.

L3.26 For the purposes of Section L3.25:

(a) a Certificate Signing Request is of the type described in this sub-paragraph (a) if it is:

(i) made by a Supplier Party;

(ii) in respect of an Organisation Certificate having a keyUsage value of digitalSignature; and

(iii) of a type that, if approved, would result in the Issue of an Organisation Certificate containing one or more Market Participant Identifiers;

(b) the circumstances described in this sub-paragraph (b) are that, at the time at which the Certificate Signing Request referred to in Section L3.25 is made:

(i) an Organisation Certificate has already been Issued by the DCC (acting in its capacity as Issuing OCA) to a Supplier Party other than the Party making the Certificate Signing Request;

(ii) that Organisation Certificate contains at least one Market Participant Identifier that is also contained in the Certificate Signing Request; and

(iii) that Organisation Certificate has neither expired nor been revoked.

Eligible Subscribers

L3.27 Where a Party has been an Eligible Subscriber in respect of any type of Organisation Certificate, but then ceases to be an Eligible Subscriber in respect of Organisation Certificates of that type, the DCC (acting in its capacity as Issuing OCA) shall as soon as reasonably practicable revoke every Organisation Certificate previously Issued to that Party for which it is no longer an Eligible Subscriber (subject to Section L16.1 (Supplier of Last Resort)).

Determinations by the Panel

L3.28 A Supplier Party (A) may apply to the Panel for the revocation of any Organisation Certificate Issued to another Supplier Party (B) which:

(a) has a keyUsage value of digitalSignature;

(b) includes one or more Market Participant Identifiers with which, in the opinion of Supplier Party A, Supplier Party B should not be associated; and

(c) at the time of the application has neither expired nor been revoked.

L3.29 Following an application made to the Panel by Supplier Party A under Section L3.28:

(a) Supplier Parties A and B shall provide the Panel with such information and assistance as it may reasonably request;

(b) the Panel shall, applying such criteria as it considers suitable for the purpose, determine whether it is appropriate for Supplier Party B to be associated with each Market Participant Identifier which is the subject of the application by Supplier Party A; and

(c) the Panel shall notify both Supplier Parties A and B of its determination.

L3.30 Where the Panel has determined that it is not appropriate for Supplier Party B to be associated with any Market Participant Identifier, it shall at the same time determine to require the revocation of each Organisation Certificate Issued to Supplier Party B which:

(a) has a keyUsage value of digitalSignature;

(b) includes that Market Participant Identifier; and

(c) at the time of the determination has not already expired or been revoked.

L3.31 The Panel shall notify the SMKI PMA of any determination made by it under Section L3.30.

L3.32 Where it is notified of any determination made by the Panel under Section L3.30, the SMKI PMA shall direct the DCC (acting in its capacity as Issuing OCA) to revoke each Organisation Certificate Issued to Supplier Party B which falls within the scope of that determination.

L3.33 Any determination made by the Panel in accordance with Section L3.29 or L3.30 maybe appealed to the Authority by either Supplier Party A or B, and the decision of the Authority shall be final and binding for the purposes of this Code.

Definitions

L3.34 For the purposes of this Section L3:

(a) “**keyUsage**” means the field referred to as such in the Organisation Certificate Policy;

(b) “**X520OrganizationalUnitName**” and “**subjectUniqueID**” mean those fields which are identified as such in the Organisation Certificate Profile at Annex B of the Organisation Certificate Policy; and

(c) “**accessControlBroker**” and “**wanProvider**”, when used in relation to the roles of the DCC, mean those roles which are identified as such, and have the meanings given to them, in the GB Companion Specification.

L4. THE SMKI SERVICE INTERFACE

DCC: Obligation to Maintain the SMKI Service Interface

L4.1 The DCC shall maintain the SMKI Service Interface in accordance with the SMKI Interface Design Specification and make it available, for sending and receiving communications in accordance with the SMKI Code of Connection, via DCC Gateway Connections, to:

(a) Authorised Subscribers; and

(b) (where applicable) Parties for the purpose of undertaking SMKI Entry Process Testing.

L4.2 The DCC shall ensure that the SMKI Service Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3):

(a) from the date on which the DCC is first obliged to provide the SMKI Services in accordance with Section L3 (The SMKI Services); and

(b) prior to that date, on such dates and to such extent as is necessary for the purpose of facilitating SMKI Entry Process Testing.

The SMKI Service Interface

L4.3 For the purposes of this Section L4, the "**SMKI Service Interface**" means a communications interface designed to allow communications to be sent between an Authorised Subscriber and the DCC for the purposes of the SMKI Services.

SMKI Interface Design Specification

L4.4 For the purposes of this Section L4, the "**SMKI Interface Design Specification**" shall be a SEC Subsidiary Document of that name which:

(a) shall specify the technical details of the SMKI Service Interface;

(b) shall include the protocols and technical standards that apply to the SMKI Service Interface;

(c) shall base those technical standards on PKIX/IETF/PKCS open standards, where:

(i) PKIX is the Public Key Infrastructure for X.509 Certificates, being an IETF set of standards for certificate and certificate revocation list profiles as specified in IETF RFC 5280;

(ii) the IETF is the Internet Engineering Task Force; and

(iii) PKCS is the Public Key Cryptography Standard;

(d) may set out the procedure by which an Authorised Subscriber and the DCC may communicate over the SMKI Service Interface, and may in particular specify any requirements on:

(i) an Authorised Subscriber which accesses, or is seeking to access, the SMKI Service Interface;

(ii) the DCC in relation to the provision of means of access to the SMKI Service Interface and/or any steps which must be taken by it in relation to communications made by an Authorised Subscriber and received by it over the SMKI Service Interface; and

(e) may specify limits on the use of the SMKI Service Interface, including in particular limits on the time or extent of its use, or conditions which must be satisfied for the purposes of its use at a specified time or to a specified extent.

SMKI Code of Connection

L4.5 For the purposes of this Section L4, the "**SMKI Code of Connection**" shall be a SEC Subsidiary Document of that name which:

(a) sets out the way in which an Authorised Subscriber may access the SMKI Service Interface;

(b) may specify limits on the use of the SMKI Service Interface, including in particular limits on the time or extent of its use, or conditions which must be satisfied for the purposes of its use at a specified time or to a specified extent;

(c) specifies the procedure by which an Authorised Subscriber and the DCC may communicate over the SMKI Service Interface; and

(d) includes a description of the way in which the mutual authentication and protection of communications taking place over the SMKI Service Interface will operate.

SMKI Interface Document Development

L4.6 The DCC shall develop drafts of the SMKI Interface Design Specification and SMKI Code of Connection:

(a) in accordance with the process set out at Section L4.7; and

(b) so that the drafts are available by no later than the date which falls six months prior to the commencement of Code Implementation SIT or such later date as may be specified by the Secretary of State.

L4.7 The process set out in this Section L4.7 for the development of drafts of the SMKI Interface Design Specification and SMKI Code of Connection is that:

(a) the DCC shall, in consultation with the Parties and such other persons as it considers appropriate, produce a draft of each document;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of either document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the document;

(c) the DCC shall send a draft of each document to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft document to be fit for purpose;

(ii) copies of the consultation responses received; and

(iii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to either draft document, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of either document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

L5. THE SMKI REPOSITORY SERVICE

The SMKI Repository

L5.1 For the purposes of this Section L5, the "**SMKI Repository**" means a System for storing and (subject to the provisions of this Section) making available copies of the following:

(a) all Device Certificates;

(b) all DCA Certificates;

(c) all Organisation Certificates;

(d) all OCA Certificates;

(e) the IKI Certificates (to the extent required by the SMKI RAPP);

(f) any other IKI Certificates, and any ICA Certificates, which the DCC may from time to time consider appropriate;

(g) all versions of the Device Certificate Policy;

(h) all versions of the Organisation Certificate Policy;

(i) all versions of the IKI Certificate Policy;

(j) all versions of the SMKI RAPP;

(k) all versions of the SMKI Recovery Procedure;

(l) all versions of the SMKI Compliance Policy;

(m) the latest version of the Organisation CRL;

(n) the latest version of the Organisation ARL;

(o) such other documents or information (excluding any other public key infrastructure certificate) as may be specified by the SMKI PMA from time to time; and

(p) such other documents or information (excluding any other public key infrastructure certificate) as the DCC, in its capacity as the provider of the SMKI Services, may from time to time consider appropriate.

The SMKI Repository Service

L5.2 The DCC shall establish, operate, maintain and make available the SMKI Repository in accordance with the provisions of this Section L5 (the "**SMKI Repository Service**").

L5.3 The DCC shall ensure that the documents and information described in Section L5.1 may be lodged in the SMKI Repository:

(a) by itself, for the purpose of providing the SMKI Services or complying with any other requirements placed on it under the Code; and

(b) (except in the case of Certificates, the CRL and the ARL) by the SMKI PMA, or by the Code Administrator acting on its behalf, for the purpose of fulfilling its functions under the Code.

L5.4 The DCC shall ensure that no person may lodge documents or information in the SMKI Repository other than in accordance with Section L5.3.

L5.5 The DCC shall ensure that the SMKI Repository may be accessed for the purpose of viewing and/or obtaining a copy of any document or information stored on it by:

(a) any Party or RDP which reasonably requires such access in accordance, or for any purpose associated, with the Code;

(b) the Panel (or the Code Administrator acting on its behalf); and

(c) the SMKI PMA (or the Code Administrator acting on its behalf).

L5.6 The DCC shall ensure that no person may access documents or information in the SMKI Repository other than in accordance with Section L5.5 except where L5.6A applies.

L5.6A Any changes, alterations, modifications, deletions or replacement of any information or documentation contained in the SMKI Repository must be expressly approved by the SMKI PMA.

SMKI PMA: Role in relation to the SMKI Repository

L5.7 The SMKI PMA shall lodge each of the following documents in the SMKI Repository promptly upon the SMKI Repository Service first becoming available or (if later) the incorporation of that document into the Code:

(a) the Device Certificate Policy;

(b) the Organisation Certificate Policy;

(c) the IKI Certificate Policy; and

(d) the SMKI Compliance Policy.

L5.8 The SMKI PMA shall lodge in the SMKI Repository the modified version of each document referred to in Section L5.7 promptly upon any modification being made to that document in accordance with the Code.

L5.9 The SMKI PMA may require the DCC to lodge in the SMKI Repository such other documents or information as it may from time to time direct.

L5.10 Subject to Section L5.3, the SMKI PMA may lodge in the SMKI Repository such other documents or information as it may from time to time consider appropriate.

Parties: Duties in relation to the SMKI Repository

L5.11 Neither any Party nor RDP, or the SMKI PMA, may access the SMKI Repository for the purpose of viewing and/or obtaining a copy of any document or information stored on it except to the extent that it reasonably requires such access in accordance, or for any purpose associated, with the Code.

L6. THE SMKI REPOSITORY INTERFACE

DCC: Obligation to Maintain the SMKI Repository Interface

L6.1 The DCC shall maintain the SMKI Repository Interface in accordance with the SMKI Repository Interface Design Specification and make it available, via DCC Gateway Connections, to:

(a) the Parties and RDPs;

(b) the Panel (or the Code Administrator on its behalf); and

(c) the SMKI PMA (or the Code Administrator on its behalf),

to send and receive communications in accordance with the SMKI Repository Code of Connection and (where applicable) for the purpose of SMKI Entry Process Testing.

L6.2 The DCC shall ensure that the SMKI Repository Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3):

(a) from the date on which the DCC is first obliged to provide the SMKI Services in accordance with Section L3 (The SMKI Services); and

(b) prior to that date, on such dates and to such extent as is necessary for the purpose of facilitating SMKI Entry Process Testing.

The SMKI Repository Interface

L6.3 For the purposes of this Section L6, the "**SMKI Repository Interface**" means a communications interface designed to allow communications to be sent from and received by the SMKI Repository for the purposes of the SMKI Repository Service.

SMKI Repository Interface Design Specification

L6.4 For the purposes of this Section L6, the "**SMKI Repository Interface Design Specification**" shall be a SEC Subsidiary Document of that name which:

(a) specifies the technical details of the SMKI Repository Interface; and

(b) includes the protocols and technical standards that apply to the SMKI Repository Interface.

SMKI Repository Code of Connection

L6.5 For the purposes of this Section L6, the "**SMKI Repository Code of Connection**" shall be a SEC Subsidiary Document of that name which:

(a) sets out the way in which the Parties, the RDPs, the Panel and the SMKI PMA may access the SMKI Repository Interface;

(b) may specify limits on the use of the SMKI Repository Interface, including in particular limits on the time or extent of its use, or conditions which must be satisfied for the purposes of its use at a specified time or to a specified extent;

(c) specifies the procedure by which the Parties, the RDPs, the Panel and the SMKI PMA may communicate over the SMKI Repository Interface; and

(d) includes a description of the way in which the authentication and protection of communications taking place over the SMKI Repository Interface will operate.

SMKI Repository Interface Document Development

L6.6 The DCC shall develop drafts of the SMKI Repository Interface Design Specification and SMKI Repository Code of Connection:

(a) in accordance with the process set out at Section L6.7; and

(b) so that the drafts are available by no later than the date which falls six months prior to the commencement of Code Implementation SIT or such later date as may be specified by the Secretary of State.

L6.7 The process set out in this Section L6.7 for the development of drafts of the SMKI Repository Interface Design Specification and SMKI Repository Code of Connection is that:

(a) the DCC shall, in consultation with the Parties and such other persons as it considers appropriate, produce a draft of each document;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of either document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the document;

(c) the DCC shall send a draft of each document to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft document to be fit for purpose;

(ii) copies of the consultation responses received; and

(iii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to either document, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of either document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

L7. SMKI AND REPOSITORY ENTRY PROCESS TESTS

Eligibility Generally

L7.1 A Party or RDP shall not be entitled to:

(a) apply to become an Authorised Subscriber for the purposes of any Certificate Policy; or

(b) access the SMKI Repository,

until that Party or RDP has successfully completed the SMKI and Repository Entry Process Tests for the purposes of paragraph (a) or (b) above (as applicable).

L7.2 Only persons that are Parties or RDPs are eligible to complete the SMKI and Repository Entry Process Tests.

SMKI and Repository Entry Guide

L7.3 The DCC shall establish and arrange for the publication on the Website of a guide to the SMKI and Repository Entry Process Tests, which shall identify any information that a Party or RDP is required to provide in support of its application to complete the SMKI and Repository Entry Process Tests (whether for the purposes of Section L7.1(a) or (b) or both).

SMKI and Repository Entry Process Tests

L7.4 A Party or RDP that wishes to complete the SMKI and Repository Entry Process Tests (whether for the purposes of Section L7.1(a) or (b) or both) must apply to the DCC in compliance with any requirements identified in the guide referred to in Section L7.3.

L7.5 On receipt of an application from a Party or RDP pursuant to Section L7.4, the DCC shall process that Party’s or RDP's application to complete the SMKI and Repository Entry Process Tests in accordance with this Section L7.

SMKI and Repository Entry Process Test Requirements

L7.6 A Party or RDP wishing to:

(a) become an Authorised Subscriber for the purposes of any Certificate Policy must have successfully completed the SMKI and Repository Entry Process Tests for that purpose; or

(b) access the SMKI Repository must have successfully completed the SMKI and Repository Entry Process Tests for that purpose.

L7.7 A Party or RDP will have successfully completed the SMKI and Repository Entry Process Tests for a particular purpose once that Party or RDP has received confirmation from the DCC that it has met the relevant requirements of Section L7.6.

L7.8 Once a Party or RDP has successfully completed the SMKI and Repository Entry Process Tests for a particular purpose, the DCC shall confirm the same to the Panel.

Network Parties and RDPs

L7.9 Each Network Party shall ensure that its Registration Data Provider (being the Network Party itself where that is deemed to be the case in accordance with the definition of Registration Data Provider) shall, when acting in its capacity as the Network Party's RDP to undertake the SMKI and Repository Entry Process Tests, comply with the obligations expressed to be placed on RDPs under Section H14 (Testing Services) and the SMKI and Repository Test Scenarios Document.

L7.10 Where more than one Network Party nominates the same Registration Data Provider, each of those Network Parties shall be jointly and severally liable for any failure by that RDP, when acting in its capacity as the Network Parties' RDP to undertake the SMKI and Repository Entry Process Tests, to comply with any of the obligations expressed to be placed on RDPs under Section H14 (Testing Services) and the SMKI and Repository Test Scenarios Document.

L8. SMKI PERFORMANCE STANDARDS AND DEMAND MANAGEMENT

SMKI Services: Target Response Times

L8.1 The DCC shall undertake the following activities within the following time periods (each such time period being, in respect of each such activity, the "**Target Response Time**" for that activity):

(a) in response to a single Certificate Signing Request, sending to an Eligible Subscriber either an Organisation Certificate or Device Certificate within 30 seconds of receipt of the Certificate Signing Request from that Eligible Subscriber over the SMKI Service Interface; and

(b) in response to a Batched Certificate Signing Request, sending to an Eligible Subscriber the number of Device Certificates that were requested:

(i) where the receipt of the Batched Certificate Signing Request from that Eligible Subscriber over the SMKI Service Interface occurred between the hours of 08:00 and 20:00 on any day, by no later than 08:00 on the following day; or

(ii) where the receipt of the Batched Certificate Signing Request from that Eligible Supplier over the SMKI Service Interface did not occur between the hours of 08:00 and 20:00, within 24 hours of the time of that receipt.

L8.2 For the purposes of Section L8.1, a "**Batched Certificate Signing Request**" is a single communication containing Certificate Signing Requests for the Issue of more than one but no more than 50,000 Device Certificates.

L8.3 For the purposes of Section L8.1, the concepts of 'sending' and 'receipt' are to be interpreted in accordance with the explanation of those concepts in the SMKI Interface Design Specification.

SMKI Repository Service: Target Response Time

L8.4 The DCC shall send to a Party, an RDP, the Panel or the SMKI PMA (as the case may be) a copy of any document or information stored on the SMKI Repository within 3 seconds of receipt of a request for that document from that person or body over the SMKI Repository Interface (and that time period shall be the “**Target Response Time**” for that activity).

L8.5 For the purposes of Section L8.4, the concepts of ‘sending’ and ‘receipt’ are to be interpreted in accordance with the explanation of those concepts in the SMKI Repository Interface Design Specification.

Code Performance Measures

L8.6 Each of the following performance measures constitute a Code Performance Measure (to which the following Target Service Level and Minimum Service Level will apply, measured over the following Performance Measurement Period):

No.	Code Performance Measure	Performance Measurement Period	Target Service Level	Minimum Service Level
7	Percentage of Certificates delivered within the applicable Target Response Time for the SMKI Services.	monthly	99%	96%
8	Percentage of documents stored on the SMKI Repository delivered within the applicable Target Response Time for the SMKI Repository Service.	monthly	99%	96%

SMKI Services: Managing Exceptional Demand

L8.7 An Authorised Subscriber will be considered to have exceptional demand if it is aware that the number of Certificate Signing Requests which it will send in a month will increase by 150% or more (50% above) compared to the average number of Certificate Signing Requests sent in each of the previous 3 months.

L8.8 Each Party which is an Authorised Subscriber in accordance with the Device Certificate Policy shall, if it becomes aware of exceptional demand, provide the DCC with a forecast of the number of Certificate Signing Requests which it will send in the relevant month.

L9. THE SMKI DOCUMENT SET

Obligations on the SMKI PMA

L9.1 The SMKI PMA shall exercise the functions that are allocated to it under and (in so far as they apply to it) comply with the requirements of the SMKI Document Set.

Obligations on SMKI Participants

L9.2 Each SMKI Participant shall (in so far as they apply to it) comply with the requirements of the SMKI SEC Documents.

The SMKI Document Set

L9.3 For the purposes of this Section L, the "**SMKI Document Set**" means:

(a) the SMKI SEC Documents;

(b) the Device CPS;

(c) the Organisation CPS; and

(d) the IKI CPS.

The SMKI SEC Documents

L9.4 For the purposes of this Section L, the "**SMKI SEC Documents**" means the provisions of the Code comprising:

(a) the following SEC Subsidiary Documents:

(i) the Device Certificate Policy;

(ii) the Organisation Certificate Policy;

(iii) the IKI Certificate Policy;

(iv) the SMKI Compliance Policy;

(v) the SMKI RAPP;

(vi) the SMKI Recovery Procedure;

(vii) the SMKI Interface Design Specification;

(viii) the SMKI Code of Connection;

(ix) the SMKI Repository Interface Design Specification;

(x) the SMKI Repository Code of Connection;

(xi) the SMKI and Repository Test Scenarios Document;

(b) the provisions of Sections L1 to L12; and

(c) every other provision of the Code which relates to the provision or the use of the SMKI Services or the SMKI Repository Service or to any matters directly arising from or affecting the provision or the use of those Services.

The Registration Authority Policies and Procedures: Document Development

L9.5 The DCC shall develop a draft of the SMKI RAPP:

(a) to make provision for such matters as are specified in the Certificate Policies as being matters provided for in the SMKI RAPP;

(b) to make provision for such other matters as are necessary or appropriate in relation to the exercise of its functions as the Registration Authority;

(c) to make provision for such matters as are necessary or appropriate in relation to Test Certificates that are being made available to Testing Participants;

(d) to make such provision as the DCC may consider appropriate in relation to the means by which the identity and authorisation of individuals and Parties may be verified for the purposes of the DCCKI Services (in addition to any such provision made in respect of the SMKI Services);

(e) in accordance with the process set out at Section L9.6; and

(f) so that the draft is available by no later than the date which falls six months prior to the commencement of Code Implementation SIT or such later date as may be specified by the Secretary of State.

L9.6 The process set out in this Section L9.6 for the development of a draft of the SMKI RAPP is that:

(a) the DCC shall, in consultation with the Parties and such other persons as it considers appropriate, produce a draft of the SMKI RAPP;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of the SMKI RAPP, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the SMKI RAPP specified in Section L9.5;

(c) the DCC shall send a draft of the SMKI RAPP to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose; and

(ii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to the draft of the SMKI RAPP, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of the document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

The Device Certification Practice Statement

L9.7 The DCC shall establish, give effect to, maintain and comply with a document which shall be known as the "**Device CPS**".

L9.8 The Device CPS shall be a document which:

(a) sets out the policies and procedures of the DCC designed to ensure that it will comply with the requirements of the Device Certificate Policy;

(b) incorporates the detailed operating procedures to be used by the DCC for the purposes of its compliance with the requirements of that Policy;

(c) incorporates such other provisions as may be required by or in accordance with that Policy or any other part of the Code; and

(d) is approved by the SMKI PMA as appropriate for these purposes.

L9.9 For the purposes of the approval of the Device CPS by the SMKI PMA in accordance with Section L9.8(d):

(a) the DCC shall submit an initial draft of the Device CPS to the SMKI PMA by no later than the date which falls three months prior to the commencement of Code Implementation SIT or such later date as may be agreed by the SMKI PMA;

(b) the SMKI PMA shall review the initial draft of the Device CPS and shall:

(i) approve the draft, which shall become the Device CPS; or

(ii) state that it will approve the draft subject to the DCC first making such amendments to the document as it may direct; and

(c) the DCC shall make any amendments to the draft Device CPS that may be directed by the SMKI PMA, and the amended draft shall become the Device CPS.

L9.10 The DCC shall keep the Device CPS under review, and shall in particular carry out a review of the Device CPS whenever (and to the extent to which) it may be required to so by the SMKI PMA.

L9.11 Following any review of the Device CPS:

(a) the DCC may propose amendments to it, which it shall submit to the SMKI PMA for its approval; and

(b) those amendments may be made only to the extent to which the SMKI PMA has approved them.

L9.12 Both the DCC and the SMKI PMA shall treat the Device CPS as confidential.

The Organisation Certification Practice Statement

L9.13 The DCC shall establish, give effect to, maintain and comply with a document which shall be known as the "**Organisation CPS**".

L9.14 The Organisation CPS shall be a document which:

(a) sets out the policies and procedures of the DCC designed to ensure that it will comply with the requirements of the Organisation Certificate Policy;

(b) incorporates the detailed operating procedures to be used by the DCC for the purposes of its compliance with the requirements of that Policy;

(c) incorporates such other provisions as may be required by or in accordance with that Policy or any other part of the Code; and

(d) is approved by the SMKI PMA as appropriate for these purposes.

L9.15 For the purposes of the approval of the Organisation CPS by the SMKI PMA in accordance with Section L9.14(d):

(a) the DCC shall submit an initial draft of the Organisation CPS to the SMKI PMA by no later than the date which falls three months prior to the commencement of Code Implementation SIT or such later date as may be agreed by the SMKI PMA;

(b) the SMKI PMA shall review the initial draft of the Organisation CPS and shall:

(i) approve the draft, which shall become the Organisation CPS; or

(ii) state that it will approve the draft subject to the DCC first making such amendments to the document as it may direct; and

(c) the DCC shall make any amendments to the draft Organisation CPS that may be directed by the SMKI PMA, and the amended draft shall become the Organisation CPS.

L9.16 The DCC shall keep the Organisation CPS under review, and shall in particular carry out a review of the Organisation CPS whenever (and to the extent to which) it may be required to so by the SMKI PMA.

L9.17 Following any review of the Organisation CPS:

(a) the DCC may propose amendments to it, which it shall submit to the SMKI PMA for its approval; and

(b) those amendments may be made only to the extent to which the SMKI PMA has approved them.

L9.18 Both the DCC and the SMKI PMA shall treat the Organisation CPS as confidential.

The IKI Certification Practice Statement

L9.19 The DCC shall establish, give effect to, maintain and comply with a document which shall be known as the "**IKI CPS**".

L9.20 The IKI CPS shall be a document which:

(a) sets out the policies and procedures of the DCC designed to ensure that it will comply with the requirements of the IKI Certificate Policy;

(b) incorporates the detailed operating procedures to be used by the DCC for the purposes of its compliance with the requirements of that Policy;

(c) incorporates such other provisions as may be required by or in accordance with that Policy or any other part of the Code; and

(d) is approved by the SMKI PMA as appropriate for these purposes.

L9.21 For the purposes of the approval of the IKI CPS by the SMKI PMA in accordance with Section L9.20(d):

(a) the DCC shall submit an initial draft of the IKI CPS to the SMKI PMA by no later than the date which falls one month prior to the commencement of Code Implementation SIT or such later date as may be agreed by the SMKI PMA;

(b) the SMKI PMA shall review the initial draft of the IKI CPS and shall:

(i) approve the draft, which shall become the IKI CPS; or

(ii) state that it will approve the draft subject to the DCC first making such amendments to the document as it may direct; and

(c) the DCC shall make any amendments to the draft IKI CPS that may be directed by the SMKI PMA, and the amended draft shall become the IKI CPS.

L9.22 The DCC shall keep the IKI CPS under review, and shall in particular carry out a review of the IKI CPS whenever (and to the extent to which) it may be required to so by the SMKI PMA.

L9.23 Following any review of the IKI CPS:

(a) the DCC may propose amendments to it, which it shall submit to the SMKI PMA for its approval; and

(b) those amendments may be made only to the extent to which the SMKI PMA has approved them.

L9.24 Both the DCC and the SMKI PMA shall treat the IKI CPS as confidential.

Enquiries in relation to the SMKI Document Set

L9.25 The DCC shall respond within a reasonable time to any reasonable request for information made by a Party or RDP in relation to the SMKI Services, the SMKI Repository Services or the SMKI Document Set, but excluding any request for a copy of any document or information which can be accessed through the SMKI Repository.

L10. THE SMKI RECOVERY PROCEDURE

The SMKI Recovery Procedure

L10.1 For the purposes of this Section L10, the "**SMKI Recovery Procedure**" shall be a SEC Subsidiary Document of that name which sets out, in relation to any incident in which a Relevant Private Key is (or is suspected of being) Compromised:

(a) the mechanism by which Parties and RDPs may notify the DCC and the DCC may notify Parties, RDPs and the SMKI PMA that the Relevant Private Key has been (or is suspected of having been) Compromised;

(b) procedures relating to the use of the Recovery Private Key and Contingency Private Key (and the use of the Contingency Symmetric Key) where such use has been required in accordance with a decision of the SMKI PMA;

(c) procedures relating to:

(i) the distribution of new Root OCA Certificates and Organisation Certificates to Devices; and

(ii) the coordination of the submission of Certificate Signing Requests by Eligible Subscribers following the replacement of any OCA Certificate;

(d) steps to be taken by the DCC, the Parties (or any of them, whether individually or by Party Category), RDPs, the SMKI PMA (or any SMKI PMA Members) and the Panel (or any Panel Members), including in particular in respect of:

(i) notification of the Compromise (or suspected Compromise); and

(ii) the process for taking steps to avoid or mitigate the adverse effects of, or to recover from, the (actual or suspected) Compromise, which steps may differ depending on the Relevant Private Key that has been (or is suspected of having been) Compromised and the nature and extent of the (actual or suspected) Compromise and the adverse effects arising from it; and

(e) arrangements to be made preparatory to and for the purpose of ensuring the effective operation of the matters described in paragraphs (a) to (d), and the associated technical solutions employed by the DCC, including for their periodic testing.

L10.2 The SMKI Recovery Procedure:

(a) shall make provision for the use of the Recovery Private Key and Contingency Private Key (and the use of the Contingency Symmetric Key) only where such use has been required in accordance with a decision of the SMKI PMA;

(b) shall make provision for the DCC, if it has reason to believe that the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key) is likely to be required by the SMKI PMA, to take or instruct any Party, any SMKI PMA Member or any Panel Member to take such preparatory steps in respect of that use as it considers appropriate; and

(c) may make provision:

(i) that, in specified circumstances, certain requirements of the SMKI Recovery Procedure, or of decisions made under and in accordance with the provisions of the SMKI Recovery Procedure, may take precedence over the other provisions of the Code;

(ii) for the operation of procedures which, in specified circumstances, require that decisions over whether or not to take certain steps are referred to the SMKI PMA for its determination;

(iii) for the SMKI PMA to require any Party to nominate individuals for the purpose of performing specified tasks.

L10.3 Where the DCC follows any of the procedures specified in the SMKI Recovery Procedure, it shall, as soon as is reasonably practicable, notify the SMKI PMA of the steps that it has taken and provide such additional supporting information as the SMKI PMA reasonably requests.

SMKI Recovery Procedure: Obligations

L10.4 The DCC, each Party, the SMKI PMA (and SMKI PMA Members) and the Panel (and Panel Members) shall comply, in so far as applicable to it (or them), with any requirements set out in the SMKI Recovery Procedure.

L10.5 Any SMKI PMA Member or Panel Member who is appointed by (respectively) the SMKI PMA or Panel to carry out a specific role in respect of the SMKI Recovery Procedure must take reasonable steps to act in accordance with any instructions given to him by the SMKI PMA or Panel (as the case may be) in relation to the way in which that role is to be carried out.

L10.6 The DCC shall reimburse the reasonable costs of any Party which that Party can demonstrate were incurred by it solely and directly in consequence of actions taken by it to support the maintenance of the procedures and arrangements set out in the SMKI Recovery Procedure, and which it would not otherwise have incurred.

SMKI Recovery Procedure: Document Development

L10.7 The DCC shall develop a draft of the SMKI Recovery Procedure:

(a) in accordance with the process set out at Section L10.8; and

(b) so that the draft is available by no later than the date which falls six months prior to the commencement of Code Implementation SIT or such later date as may be specified by the Secretary of State.

L10.8 The process set out in this Section L10.8 for the development of a draft of the SMKI Recovery Procedure is that:

(a) the DCC shall, in consultation with the Parties, the SMKI PMA and such other persons as it considers appropriate, produce a draft of the SMKI Recovery Procedure;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of the SMKI Recovery Procedure, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the SMKI Recovery Procedure specified in Section L10.1;

(c) the DCC shall send a draft of the SMKI Recovery Procedure to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose; and

(ii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to the draft of the SMKI Recovery Procedure, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of the document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

The SMKI Recovery Key Guidance

L10.9 For the purposes of this Section L10, the "**SMKI Recovery Key Guidance**" shall be a document of that name which makes such provision as is appropriate, in relation to any incident in which a Relevant Private Key is (or is suspected of being) Compromised, for any one or more of the following:

(a) any factors which shall be taken into account by the SMKI PMA in deciding whether or not to require the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key);

(b) any other factors which may in particular be taken into account by the SMKI PMA for the purposes of that decision;

(c) any weighting or order of priority which shall, or may, be given by the SMKI PMA to any of the factors referred to in paragraphs (a) and (b); and

(d) any criteria that are to be applied by the SMKI PMA, any approach that is to be followed by it, or any steps that are to be taken by it, prior to making a decision whether or not to require the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key).

Recovery Key Guidance: Obligations

L10.10 The SMKI PMA:

(a) shall act in accordance with the SMKI Recovery Key Guidance in making any decision whether or not to require the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key); and

(b) may request such information and assistance from the DCC, the Security Sub- Committee or any Party as it reasonably considers appropriate for the purposes of making any such decision or ensuring that it will be prepared to make any such decision that may fall to be made by it at a future date.

L10.11 The DCC, each other Party, and the Security Sub-Committee shall promptly provide the SMKI PMA with such information and assistance as may be requested in accordance with Section L10.10.

L10.12 The DCC shall, where requested to do so, reimburse the reasonable costs of any Party associated with the provision of assistance in accordance with Section L10.11.

Recovery Key Guidance: Document Development

L10.13 The SMKI PMA shall:

(a) develop the SMKI Recovery Key Guidance, and for that purpose:

(i) consult with the DCC, the Security Sub-Committee, the Parties, the Secretary of State and the Authority; and

(ii) have regard to the views of each person consulted by it prior to determining the content of the document;

(b) periodically review the SMKI Recovery Key Guidance, and in particular carry out a review whenever (and to the extent to which) it may be required to do so by the Panel or the Authority;

(c) where, following any review, it proposes to amend the SMKI Recovery Key Guidance:

(i) consult the DCC, the Security Sub-Committee, the Parties and the Authority in relation to the proposed amendments; and

(ii) have regard to the views of each person consulted by it prior to making any amendments to the document; and

(d) publish the SMKI Recovery Key Guidance, as initially determined by it and on each amendment made to that document from time to time.

Recovery Events and Recovery Costs

Recovery Events

L10.14 For the purposes of this Section L10, a "**Recovery Event**" is an event that shall be taken to have occurred when the circumstances described in either Section L10.15 or L10.16 exist.

L10.15 The circumstances described in this Section L10.15 are that:

(a) the DCC has notified the SMKI PMA that a Relevant Private Key has been (or is suspected of having been) Compromised; and

(b) in consequence of that (actual or suspected) Compromise, the SMKI PMA has decided to require the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key) in accordance with the SMKI Recovery Procedure.

L10.16 The circumstances described in this Section L10.16 are that:

(a) the DCC has notified the SMKI PMA that a Relevant Private Key has been (or is suspected of having been) Compromised;

(b) the SMKI PMA has been provided with (or otherwise obtained) evidence that:

(i) attempts have been made, by means of sending appropriate Commands, to replace the Data comprising part of the Device Security Credentials of Relevant Devices which derive from any Organisation Certificate or OCA Certificate which is (or is suspected of being) Compromised; or

(ii) it was not feasible or appropriate for any such attempt to be made; and

(c) the SMKI PMA has decided not to require the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key).

Recovery Costs

L10.17 For the purposes of this Section L10, the "**Recovery Costs**" shall be such costs as are reasonably incurred in consequence of a Recovery Event (and which would not otherwise have incurred) by any Party:

(a) in respect of the use of the Recovery Private Key or Contingency Private Key (including in the latter case the use of the Contingency Symmetric Key) in accordance with the requirement of the SMKI PMA; and

(b) in taking such action as is necessary, where the Recovery Private Key or Contingency Private Key (including in the latter case the Contingency Symmetric Key) has not been used or has been used unsuccessfully, to replace:

(i) Relevant Devices for which that Party is the Responsible Supplier; or

(ii) the Data comprising part of the Device Security Credentials of such Relevant Devices which derive from any Organisation Certificate or OCA Certificate which is (or is suspected of being) Compromised.

Payment of Recovery Costs by the DCC

L10.18 Where any Party incurs Recovery Costs, it may submit to the DCC a request to be recompensed in respect of those costs.

L10.19 Where any Party wishes to submit a request in accordance with Section L10.18, it shall:

(a) within three months of the Recovery Event, notify the DCC of its intention to do so;

(b) unless, at the same time as notifying the DCC of that intention it also notifies the DCC of the total amount of the costs in respect of which it requests to be recompensed:

(i) provide to the DCC at that time its best estimate of the likely amount of those costs; and

(ii) at least once in every subsequent period of three months, until such time as it notifies the DCC of the total amount of the costs in respect of which it requests to be recompensed, provide to the DCC an updated best estimate of the likely amount of those costs; and

(c) as soon as possible, and in any event within three months of the date on which it ceases to incur Recovery Costs, notify the DCC of the total amount of the costs in respect of which it requests to be recompensed.

L10.20 A Party giving notice to the DCC in accordance with Section L10.19 shall:

(a) subject to paragraph (b), provide to the DCC such evidence in respect of the amount of the Recovery Costs incurred by that Party:

(i) as the DCC may reasonably require;

(ii) by such dates as the DCC may reasonably specify; or

(b) where the Panel considers the matter either of its own motion or on a referral by the Party or the DCC, provide to the DCC such evidence relating to the amount of the costs incurred by that Party:

(i) as the Panel may determine is reasonably required;

(ii) by such dates as the Panel may reasonably specify.

L10.21 The evidence referred to in Section L10.20 may include in particular, if the DCC or the Panel (as the case may be) determines that it is reasonably required, the report of an independent auditor verifying that the amount requested by a Party represents a fair and accurate statement of the Recovery Costs incurred by that Party.

L10.22 On receipt by it of a request from a Party to be recompensed in respect of Recovery Costs, the DCC shall, where it is satisfied that the amount of the costs requested by that Party is adequately supported by the evidence provided to it in accordance with Section L10.20, pay to the Party that amount.

L10.23 Where the DCC has any question whether the evidence provided to it by a Party is adequate to support the amount of the costs requested:

(a) it shall refer that question to the Panel for its determination; and

(b) the Panel shall determine that question by directing that the DCC shall pay to the Party the full amount requested or only part of that amount (in a sum that is specified by the Panel), or shall make no payment to that Party.

L10.24 Where the amount of the Recovery Costs requested by any Party is (whether alone or taken together with amounts requested by any other Parties in relation to the same Recovery Event) for a sum exceeding that which is determined from time to time by the Panel, following consultation with the Parties and the Authority, for the purposes of this Section L10.24:

(a) the DCC may refer to the Panel, for its determination, the question of the dates on which the payments of the amounts requested shall be made;

(b) the Panel shall determine the dates on which those payments shall be made, and may in particular determine that:

(i) different Parties shall be paid at different times; and

(ii) any amount which is to be paid to a Party shall be paid in instalments at different times; and

(c) the Panel shall consider whether to submit any Draft Proposal in relation to the Charging Methodology (taking into account whether it is proposed by the Authority to make any adjustment to the allowable revenues of the DCC, or by the DCC to amend the Charging Statement).

Breach of the Code by the Relevant Subscriber

L10.25 Where a Recovery Event occurs, and where the Relevant Subscriber is the DCC, the DCC shall be deemed to be in breach of:

(a) where the (actual or suspected) Compromise is to an Organisation Certificate, Section L11.9 (Organisation and IKI Certificates: Protection of Private Keys); or

(b) where the (actual or suspected) Compromise is to an OCA Certificate, Part 6.2.1 of the Organisation Certificate Policy (Cryptographic Module Standards and Controls).

L10.26 Where a Recovery Event occurs, and where the Relevant Subscriber is any Party other than the DCC, that Party shall be deemed to be in breach of Section L11.9 (Organisation and IKI Certificates: Protection of Private Keys), unless the (actual or suspected) Compromise to the Relevant Private Key which gave rise to the Recovery Event was due to the (actual or suspected) Compromise of an OCA Certificate.

L10.27 Where a Relevant Subscriber is, by virtue of Section L10.25 or L10.26, deemed to be in breach of a provision of this Code, it shall cease to be so deemed (and no such breach shall be treated as having occurred) where:

(a) within three months of the date of the Recovery Event it refers the matter to the Panel;

(b) following that referral it demonstrates to the reasonable satisfaction of the Panel, that the (actual or suspected) Compromise to the Relevant Private Key which gave rise to the Recovery Event was not due to its breach of Section L11.9 or of Part 6.2.1 of the Organisation Certificate Policy (as the case may be); and

(c) the Panel determines accordingly that no such breach occurred.

L10.28 In all circumstances other than those described in Section L10.27, and subject to the provisions of Section L10.29, where a breach is deemed to have occurred in accordance with Section L10.25 or L10.26, that shall be treated as a final and binding determination of its occurrence for the purposes of this Code.

Appeal to the Authority

L10.29 Any decision made by the Panel in accordance with Section L10.20, L10.23, L10.24 or L10.27 may be appealed to the Authority, whose decision shall be final and binding for the purposes of this Code.

Further Use of the Recovery Private Key

L10.29A Subject to Section L10.29B where, to the extent, and (where relevant) in the manner directed to do so by the SMKI PMA, the DCC shall use the Recovery Private Key to replace (in whole or in part) the data comprising the Device Security Credentials held on or in relation to one or more specified Devices that form part of one or more Enrolled Smart Metering Systems with data from one or more specified Organisation Certificates.

L10.29B A Recovery Key Direction may only be given by the SMKI PMA to the DCC in the following circumstances:

(a) the SMKI PMA believes that the data comprising the Device Security Credentials of one or more Devices that form part of one or more Enrolled Smart Metering Systems is incorrectly populated, and that this could be rectified through the use of the Recovery Private Key; and

(b) the SMKI PMA reasonably believes that it is not possible to rectify the incorrectly populated data using the Private Key(s) associated with the Public Key(s) contained in the Organisation Certificate(s) from which the incorrectly populated data originated because those Private Key(s) is/are Unavailable Private Keys; and

(c) the SMKI PMA has decided to direct the DCC to use the Recovery Private Key after taking into account the costs and benefits of doing so.

L10.29C As soon as reasonably practicable after the Recovery Private Key has been used pursuant to a Recovery Key Direction:

(a) the DCC shall provide a report to the SMKI PMA setting out the results of the actions that it has taken; and

(b) the SMKI PMA shall provide a report to the Panel explaining the circumstances which led it to decide to make a Recovery Key Direction and inform the Panel of the results of the DCC's actions.

Definitions

L10.30 For the purposes of this Section L10:

(a) a "**Relevant Device**" means a Device:

(i) which has, or had immediately prior to a Recovery Event, an SMI Status of 'commissioned'; and

(ii) the Device Security Credentials of which are populated with, or are reasonably believed immediately prior to a Recovery Event to have been populated with, Data from an Organisation Certificate or OCA Certificate which has been (or is suspected of having been) Compromised as a result of an (actual or suspected) Compromise to the Relevant Private Key which gave rise to the Recovery Event;

(b) the "**Relevant Subscriber**" means, where a Recovery Event has occurred, the Subscriber for an Organisation Certificate or OCA Certificate which has been (or is suspected of having been) Compromised as the result of an (actual or suspected) Compromise to the Relevant Private Key which gave rise to the Recovery Event;

(c) a "**Relevant Private Key**" means:

(i) the Contingency Symmetric Key;

(ii) a Private Key which is associated with a Public Key contained in any Organisation Certificate or OCA Certificate, Data from which is used to populate the Device Security Credentials of a Device comprising part of an Enrolled Smart Metering System;

(iii) a Private Key which is associated with a Public Key contained in any Organisation Certificate, Data from which is used to populate part of any Device Security Credentials held by an S1SP;

(iv) a Private Key which was used as part of the process of Issuing any OCA Certificate or Organisation Certificate referred to in paragraph (ii) or (iii) above;

(v) a Private Key which is used to Digitally Sign any XML Document, and which is associated with a Public Key that is contained within any Organisation Certificate; or

(vi) a Private Key which is associated with a Public Key contained in any certificate issued in accordance with an S1SPKI Certificate Policy, and which is determined by the SMKI PMA as being a Private Key for the purposes of this paragraph;

(d) a "**Recovery Key Pair**" means a Key Pair established by the DCC for the purposes of the replacement of Organisation Certificates on Devices after a Relevant Private Key has been Compromised, and:

(i) a "**Recovery Private Key**" means the Private Key which is part of that Key Pair; and

(ii) a "**Recovery Certificate**" means an Organisation Certificate Issued by the OCA and containing the Public Key which is part of that Key Pair;

(e) a "**Recovery Key Direction**" means a direction issued by the SMKI PMA to the DCC pursuant to Section L10.29A; and

(f) an "**Unavailable Private Key**" means a Private Key that has been destroyed or is unavailable for use because the Subscriber for the Organisation Certificate which contains the associated Public Key has never been, or has ceased to be a DCC User.

L11. THE SUBSCRIBER OBLIGATIONS

Certificate Signing Requests

L11.1 Each Eligible Subscriber shall ensure that all of the information contained in each Certificate Signing Request made by it is true and accurate.

L11.2 No Eligible Subscriber may make a Certificate Signing Request which contains:

(a) any information that constitutes a trade mark, unless it is the holder of the Intellectual Property Rights in relation to that trade mark; or

(b) any confidential information which would be contained in a Certificate Issued in response to that Certificate Signing Request.

L11.3 Each Eligible Subscriber shall ensure that either:

(a) where appropriate, in the case of a Certificate Signing Request for the Issue of an IKI Certificate, that Certificate Signing Request has been generated using a Cryptographic Credential Token that was provided by the DCC to the Eligible Subscriber in accordance with the SMKI RAPP; or

(b) in every other case, the Public Key that is included within a Certificate Signing Request is part of a Key Pair that has been generated using random numbers which are such as to make it computationally infeasible to regenerate that Key Pair even with knowledge of when and by means of what equipment it was generated.

L11.4 No Eligible Subscriber may make a Certificate Signing Request for the Issue of:

(a) a Device Certificate or DCA Certificate which contains the same Public Key as a Public Key which that Eligible Subscriber knows to be contained in any other Device Certificate or DCA Certificate;

(b) subject to Section 11.4A, an Organisation Certificate or OCA Certificate which contains the same Public Key as a Public Key which that Eligible Subscriber knows to be contained in any other Organisation Certificate or OCA Certificate (except in the case of the Root OCA Certificate to the extent to which it is expressly permitted in accordance with the Organisation Certificate Policy); or

(c) an IKI Certificate or ICA Certificate which contains the same Public Key as a Public Key which that Eligible Subscriber knows to be contained in any other IKI Certificate or ICA Certificate.

L11.4A Subject to 11.4B, the DCC may submit a Certificate Signing Request for, and may Issue, an Organisation Certificate that has the same Public Key as an existing Organisation Certificate.

L11.4B The circumstances in which 11.4A applies are:

(a) that the SMKI PMA (having taken into account the views of the Security Sub-Committee) has given approval for a Certificate to be Issued that contains the same Public Key as an existing Organisation Certificate; and

(b) the Remote Party Role Code for that Certificate is either: "recovery", "transitionalCoS", "wanProvider", or "accessControlBroker".

Subscribing for or Rejecting Organisation Certificates

L11.5 Where any Organisation Certificate is Issued to an Eligible Subscriber in response to a Certificate Signing Request, that Eligible Subscriber shall:

(a) establish whether the information contained in that Certificate is consistent with information that was contained in the Certificate Signing Request;

(b) if it identifies that the Certificate contains any information which is untrue or inaccurate:

(i) reject that Certificate; and

(ii) immediately inform the DCC that it rejects the Certificate and give to the DCC its reasons for doing so; and

(c) where it does not reject the Certificate, become a Subscriber for that Certificate.

Subscribing for or Rejecting Device Certificates

L11.6 Where any Device Certificate is Issued to an Eligible Subscriber in response to a Certificate Signing Request, that Eligible Subscriber shall:

(a) take reasonable steps to establish whether the information contained in that Certificate is consistent with information that was contained in the Certificate Signing Request;

(b) if it identifies that the Certificate contains any information which is untrue or inaccurate:

(i) reject that Certificate; and

(ii) immediately inform the DCC that it rejects the Certificate and give to the DCC its reasons for doing so; and

(c) where it does not reject the Certificate, become a Subscriber for that Certificate.

Subscribing for or Rejecting IKI Certificates

L11.7 Where any IKI Certificate is Issued to an Eligible Subscriber in response to a Certificate Signing Request, that Eligible Subscriber shall:

(a) establish whether the information contained in that Certificate is consistent with information that was contained in the Certificate Signing Request;

(b) if it identifies that the Certificate contains any information which is untrue or inaccurate:

(i) reject that Certificate;

(ii) immediately inform the DCC that it rejects the Certificate and give to the DCC its reasons for doing so; and

(c) where it does not reject the Certificate, become a Subscriber for that Certificate.

Use of Certificates and Key Pairs

L11.8 Each Subscriber shall ensure that it does not use any Certificate, Public Key contained within a Certificate, or Private Key associated with a Public Key contained in a Certificate, that is held by it other than for the purposes of creating, sending, receiving and processing communications sent to and from Devices and the DCC pursuant to the Code.

Organisation and IKI Certificates: Protection of Private Keys

L11.9 Each Subscriber shall (in addition, if it is the DCC, a User or an RDP, to its obligations under Section G (Security)) take reasonable steps to ensure that no Compromise occurs to any:

(a) Private Key which is associated with a Public Key contained in an Organisation Certificate or IKI Certificate for which it is the Subscriber; or

(b) Secret Key Material associated with that Private Key.

Organisation Certificates: Expiry of Validity Period

L11.10 Each Subscriber shall, prior to the expiry of the Validity Period of an Organisation Certificate or OCA Certificate for which it is the Subscriber:

(a) request a replacement for that Certificate by applying for the Issue of a new Organisation Certificate or OCA Certificate in accordance with the provisions of the Organisation Certificate Policy; and

(b) ensure that any Data from that Certificate which are used to populate the Device Security Credentials of any Device are replaced by Data from the new Certificate Issued to it by the OCA.

Organisation Certificates: Gas Network Parties

L11.11 Where a Subscriber is a Gas Network Party and intends to cease to be a DCC User, it must:

(a) ensure that the Gas Network Operator (GNO) Certificates in each of its SMETS2+ Gas Proxy Function (GPF) Trust Anchor Cells are replaced with Access Control Broker (ACB) Certificates.

(b) not make any further Certificate Signing Requests until such time as it returns to being a DCC User.

L12. RELYING PARTY OBLIGATIONS

Relying Parties

L12.1 For the purposes of this Section L12, a 'Relying Party' in relation to an Organisation Certificate, OCA Certificate, IKI Certificate or ICA Certificate means any Party or RDP which relies on the Certificate for the purposes of creating, sending, receiving or processing communications sent to and from a Device or another Party or RDP pursuant to this Code.

L12.2 For the purposes of Section L12.1, a Relying Party shall be deemed to include:

(a) in the case of a Device which relies on a Certificate, the Responsible Supplier for that Device; and

(b) in the case of a Communications Hub Function or Gas Proxy Function which relies on a Certificate, the DCC.

Duties in relation to Organisation Certificates, OCA Certificates, IKI Certificates and ICA Certificates

L12.3 Each Relying Party shall:

(a) before relying on any Organisation Certificate:

(i) Check Cryptographic Protection in respect of the Organisation CRL on the SMKI Repository; and

(ii) where that Certificate is shown on the Organisation CRL as having been revoked, not rely on the Certificate;

(b) before relying on any OCA Certificate:

(i) Check Cryptographic Protection in respect of the Organisation ARL on the SMKI Repository; and

(ii) where that Certificate is shown on the Organisation ARL as having been revoked, not rely on the Certificate;

(c) before relying on any IKI Certificate:

(i) Check Cryptographic Protection in respect of the IKI CRL; and

(ii) where that Certificate is shown on the IKI CRL as having been revoked, not rely on the Certificate; and

(d) before relying on any ICA Certificate:

(i) Check Cryptographic Protection in respect of the IKI ARL; and

(ii) where that Certificate is shown on the IKI ARL as having been revoked, not rely on the Certificate.

L12.4 No Relying Party may rely on an Organisation Certificate or IKI Certificate where the Validity Period of that Certificate has expired.

L12.5 No Relying Party may rely on an Organisation Certificate, OCA Certificate, IKI Certificate or ICA Certificate where it suspects that the Certificate has been Compromised.

L12.6 Each Relying Party shall take reasonable steps, by means of appropriate Systems, to verify Digital Signatures, Check Cryptographic Protection, Confirm Validity and perform other appropriate cryptographic operations before relying on any Organisation Certificate, OCA Certificate, IKI Certificate or ICA Certificate.

L13. DCC KEY INFRASTRUCTURE

The DCCKI Services

The DCCKI Services

L13.1 For the purposes of this Section L13, the "**DCCKI Services**" means all of the activities undertaken by the DCC in its capacity as the DCCKI Certification Authority in accordance with the applicable requirements of the Code.

DCCKI Authorised Subscribers

L13.2 Any Party or RDP may apply to become a DCCKI Authorised Subscriber in accordance with, and by following the relevant procedures set out in, the DCCKI Certificate Policy and the DCCKI RAPP.

L13.3 The DCC shall authorise any Party or RDP to submit a DCCKI Certificate Signing Request, or any User to submit a Personnel Authentication Certification Application, and so to become a DCCKI Subscriber, where that person has successfully completed the relevant procedures and satisfied the criteria set out in the DCCKI Certificate Policy and the DCCKI RAPP.

L13.4 The DCC shall provide any DCCKI Services that may be requested by a DCCKI Authorised Subscriber where the request is made by that DCCKI Authorised Subscriber in accordance with the applicable requirements of the DCCKI SEC Documents.

L13.5 The DCC shall ensure that in the provision of DCCKI Services it acts in accordance with Good Industry Practice.

Registration Data Providers

L13.6 Where a Registration Data Provider (other than an Electricity Network Party or Gas Network Party which is deemed to be an RDP, acting in its capacity as such) has become a DCCKI Authorised Subscriber, the Network Party that nominated that Registration Data Provider shall ensure that the RDP complies with all of its obligations in that capacity under this Section L13.

L13.7 Where a Registration Data Provider has been nominated as such by more than one Network Party:

(a) to the extent to which that RDP can be clearly identified as acting on behalf of one Network Party, that Network Party shall be subject to the requirements of Section L13.6 in respect of the actions of the RDP;

(b) to the extent to which that RDP cannot be clearly identified as acting on behalf of one Network Party, each of the Network Parties which nominated that RDP shall be subject to the requirements of Section L13.6 in respect of the actions of the RDP.

DCCKI Eligible Subscribers

L13.8 A DCCKI Authorised Subscriber:

(a) shall be known as a "**DCCKI Eligible Subscriber**" in respect of a DCCKI Certificate if it is entitled to become a DCCKI Subscriber for that DCCKI Certificate; and

(b) will be entitled to become a DCCKI Subscriber for a DCCKI Certificate only if it is identified as a DCCKI Eligible Subscriber in respect of that DCCKI Certificate in accordance with the provisions of the DCCKI Certificate Policy and the DCCKI RAPP.

DCCKI Subscribers

L13.9 A Party or RDP shall be entitled to become a DCCKI Subscriber in accordance with, and by following the relevant procedures set out in, the DCCKI Certificate Policy and the DCCKI RAPP.

The DCCKI Service Interface

DCC: Obligation to Maintain the DCCKI Service Interface

L13.10 The DCC shall maintain the DCCKI Service Interface in accordance with the DCCKI Interface Design Specification and make it available, to DCCKI Authorised Subscribers, for sending and receiving communications in accordance with the DCCKI Code of Connection.

L13.11 The DCC shall ensure that the DCCKI Service Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3):

(a) from the date on which the DCC is first obliged to provide the DCCKI Services in accordance with this Section L13; and

(b) prior to that date, on such dates and to such extent as is necessary for the purpose of facilitating Entry Process Testing.

The DCCKI Service Interface

L13.12 For the purposes of this Section L13, the “**DCCKI Service Interface**” means a communications interface designed to allow communications to be sent between a DCCKI Authorised Subscriber and the DCC for the purposes of the DCCKI Services.

DCCKI Interface Design Specification

L13.13 For the purposes of this Section L13, the “**DCCKI Interface Design Specification**” shall be a SEC Subsidiary Document of that name which:

(a) shall specify the technical details of the DCCKI Service Interface;

(b) shall include the protocols and technical standards that apply to the DCCKI Service Interface;

(c) shall base those technical standards on PKIX/IETF/PKCS open standards, where:

(i) PKIX is the Public Key Infrastructure for X.509 Certificates, being an IETF set of standards for certificate and certificate revocation list profiles as specified in IETF RFC 5280;

(ii) the IETF is the Internet Engineering Task Force; and

(iii) PKCS is the Public Key Cryptography Standard; and

(d) may set out the procedure by which a DCCKI Authorised Subscriber and the DCC may communicate over the DCCKI Service Interface, and may in particular specify any requirements on:

(i) a DCCKI Authorised Subscriber which accesses, or is seeking to access, the DCCKI Service Interface;

(ii) the DCC in relation to the provision of means of access to the DCCKI Service Interface and/or any steps which must be taken by it in relation to communications made by a DCCKI Authorised Subscriber and received by it over the DCCKI Service Interface.

DCCKI Code of Connection

L13.14 For the purposes of this Section L13, the "**DCCKI Code of Connection**" shall be a SEC Subsidiary Document of that name which:

(a) shall set out the way in which DCCKI Authorised Subscribers may access the DCCKI Service Interface;

(b) shall specify the procedure by which DCCKI Authorised Subscribers and the DCC may communicate over the DCCKI Service Interface;

(c) shall include a description of the way in which the mutual authentication and protection of communications taking place over the DCCKI Service Interface will operate; and

(d) may specify any requirements on a DCCKI Authorised Subscriber which accesses, or is seeking to access, the DCCKI Service.

DCCKI Interface Document Development

L13.15 The DCC shall develop drafts of the DCCKI Interface Design Specification and DCCKI Code of Connection:

(a) in accordance with the process set out at Section L13.16; and

(b) so that the drafts are available by no later than the commencement of Code Implementation SIT or 2 March 2015 (whichever is earlier), or such later date as may be specified by the Secretary of State.

L13.16 The process set out in this Section L13.16 for the development of drafts of the DCCKI Interface Design Specification and DCCKI Code of Connection is that:

(a) the DCC shall, in consultation with the Parties, RDPs and such other persons as it considers appropriate, produce a draft of each document;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of either document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the document;

(c) the DCC shall send a draft of each document to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft document to be fit for purpose; and

(ii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to either draft document, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of either document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

The DCCKI Repository Service

The DCCKI Repository

L13.17 For the purposes of this Section L13, the “**DCCKI Repository**” means a System for storing and (subject to the provisions of this Section) making available copies of the following:

(a) all DCCKI Infrastructure Certificates;

(b) the Root DCCKICA Certificate and the EII DCCKICA Certificate;

(c) all versions of the DCCKI Certificate Policy;

(d) the latest version of the DCCKI RAPP;

(e) the latest version of the EII DCCKICA CRL;

(f) the latest version of the DCCKI ARL; and

(g) such other documents or information as the DCC, in its capacity as the provider of the DCCKI Services, may from time to time consider appropriate.

The DCCKI Repository Service

L13.18 The DCC shall establish, operate, maintain and make available the DCCKI Repository in accordance with the provisions of this Section L13 (the "**DCCKI Repository Service**").

L13.19 The DCC shall ensure that the documents and information described in Section L13.17 may be lodged in the DCCKI Repository by itself for the purpose of providing the DCCKI Services or complying with any other requirements placed on it under the Code.

L13.20 The DCC shall ensure that no person may lodge documents or information in the DCCKI Repository other than in accordance with Section L13.19.

L13.21 The DCC shall ensure that the DCCKI Repository may be accessed for the purpose of viewing and/or obtaining a copy of any document or information stored on it by any Party or RDP which reasonably requires such access in accordance, or for any purpose associated, with the Code.

L13.22 The DCC shall make available a copy of any document stored on the DCCKI Repository to the Panel or the SMKI PMA (or the Code Administrator acting on their behalf) following receipt of a reasonable request to do so.

Parties: Duties in relation to the DCCKI Repository

L13.23 No Party or RDP may access the DCCKI Repository for the purpose of viewing and/or obtaining a copy of any document or information stored on it except to the extent that it reasonably requires such access in accordance, or for any purpose associated, with the Code.

The DCCKI Repository Interface

DCC: Obligation to Maintain the DCCKI Repository Interface

L13.24 The DCC shall maintain the DCCKI Repository Interface in accordance with the DCCKI Repository Interface Design Specification and make it available to the Parties and to RDPs to send and receive communications in accordance with the DCCKI Repository Code of Connection and (where applicable) for the purpose of Entry Process Testing.

L13.25 The DCC shall ensure that the DCCKI Repository Interface is available at all times (subject to Planned Maintenance undertaken in accordance with Section H8.3):

(a) from the date on which the DCC is first obliged to provide the DCCKI Services in accordance with this Section L13; and

(b) prior to that date, on such dates and to such extent as is necessary for the purpose of facilitating Entry Process Testing.

The DCCKI Repository Interface

L13.26 For the purposes of this Section L13, the "**DCCKI Repository Interface**" means a communications interface designed to allow communications to be sent from and received by the DCCKI Repository for the purposes of the DCCKI Repository Service.

DCCKI Repository Interface Design Specification

L13.27 For the purposes of this Section L13, the "**DCCKI Repository Interface Design Specification**" shall be a SEC Subsidiary Document of that name which:

(a) specifies the technical details of the DCCKI Repository Interface; and

(b) includes the protocols and technical standards that apply to the DCCKI Repository Interface.

DCCKI Repository Code of Connection

L13.28 For the purposes of this Section L13, the "**DCCKI Repository Code of Connection**" shall be a SEC Subsidiary Document of that name which sets out the way in which the Parties and RDPs may access the DCCKI Repository Interface.

DCCKI Repository Interface Document Development

L13.29 The DCC shall develop drafts of the DCCKI Repository Interface Design Specification and DCCKI Repository Code of Connection:

(a) in accordance with the process set out at Section L13.30; and

(b) so that the drafts are available by no later than the commencement of Code Implementation SIT or 2 March 2015 (whichever is earlier), or such later date as may be specified by the Secretary of State.

L13.30 The process set out in this Section L13.30 for the development of drafts of the DCCKI Repository Interface Design Specification and DCCKI Repository Code of Connection is that:

(a) the DCC shall, in consultation with the Parties, RDPs and such other persons as it considers appropriate, produce a draft of each document;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of either document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the document;

(c) the DCC shall send a draft of each document to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft document to be fit for purpose; and

(ii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to either draft document, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of either document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

The DCCKI Document Set

Obligations on the SMKI PMA

L13.31 The SMKI PMA shall exercise the functions that are allocated to it under and (in so far as they apply to it) comply with the requirements of the DCCKI Document Set.

Obligations on DCCKI Participants

L13.32 Each DCCKI Participant shall (in so far as they apply to it) comply with the requirements of the DCCKI SEC Documents.

The DCCKI Document Set

L13.33 For the purposes of this Section L13, the "**DCCKI Document Set**" means:

(a) the DCCKI SEC Documents; and

(b) the DCCKI CPS.

The DCCKI SEC Documents

L13.34 For the purposes of this Section L13, the "**DCCKI SEC Documents**" means the provisions of the Code comprising:

(a) the following SEC Subsidiary Documents:

(i) the DCCKI Certificate Policy;

(ii) the DCCKI RAPP;

(iii) the DCCKI Interface Design Specification;

(iv) the DCCKI Code of Connection;

(v) the DCCKI Repository Interface Design Specification;

(vi) the DCCKI Repository Code of Connection;

(b) the provisions of this Section L13; and

(c) every other provision of the Code which relates to the provision or the use of the DCCKI Services or the DCCKI Repository Service or to any matters directly arising from or affecting the provision or the use of those Services.

The DCCKI Registration Authority Policies and Procedures: Document Development

L13.35 The DCC shall develop a draft of the DCCKI RAPP:

(a) to make provision for such matters as are specified in the DCCKI Certificate Policy as being matters provided for in the DCCKI RAPP;

(b) to make provision for such other matters as are necessary or appropriate in relation to the exercise of its functions as the DCCKI Registration Authority;

(c) in accordance with the process set out at Section L13.36; and

(d) so that the draft is available by no later than the commencement of Code Implementation SIT or 2 March 2015 (whichever is earlier), or such later date as may be specified by the Secretary of State.

L13.36 The process set out in this Section L13.36 for the development of a draft of the DCCKI RAPP is that:

(a) the DCC shall, in consultation with the Parties, RDPs and such other persons as it considers appropriate, produce a draft of the DCCKI RAPP;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of the DCCKI RAPP, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the DCCKI RAPP specified in Section L13.35;

(c) the DCC shall send a draft of the DCCKI RAPP to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose; and

(ii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to the draft of the DCCKI RAPP, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of the document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

The DCCKI Certification Practice Statement

L13.37 The DCC shall establish, give effect to, maintain and comply with a document which shall be known as the "**DCCKI CPS**".

L13.38 The DCCKI CPS shall be a document which:

(a) sets out the policies and procedures of the DCC designed to ensure that it will comply with the requirements of the DCCKI Certificate Policy;

(b) incorporates the detailed operating procedures to be used by the DCC for the purposes of its compliance with the requirements of that Policy;

(c) incorporates such other provisions as may be required by or in accordance with that Policy or any other part of the Code;

(d) is reviewed by the SMKI PMA to assess whether it is appropriate for these purposes; and

(e) is approved by the individual(s) carrying out the DCCKI PMA Functions as being appropriate for these purposes.

L13.39 For the purposes of the review of the DCCKI CPS by the SMKI PMA in accordance with Section L13.38(d), the DCC shall submit an initial draft of the DCCKI CPS to the SMKI PMA by no later than the commencement of Code Implementation SIT or 2 March 2015 (whichever is earlier), or such later date as may be agreed by the SMKI PMA.

L13.40 The DCC shall keep the DCCKI CPS under review, and shall in particular carry out a review of the DCCKI CPS:

(a) whenever (and to the extent to which) it may be required to so by the SMKI PMA or the individual(s) carrying out the DCCKI PMA Functions; and

(b) following receipt of a notification from the SMKI PMA in accordance with Section L1.17(e) (Duties of the SMKI PMA).

L13.41 Following:

(a) any review of the DCCKI CPS, the DCC may propose amendments to it, which it shall submit to:

(i) the SMKI PMA for its review; and

(ii) the individual(s) carrying out the DCCKI PMA Functions for his (or their) approval;

(b) a review carried out in accordance with Section L13.40(b), the DCC shall report to the SMKI PMA any remedial steps taken or proposed to be taken in order for it to continue to meet its obligations under Section G (Security).

Enquiries in relation to the DCCKI Document Set

L13.42 The DCC shall respond within a reasonable time to any reasonable request for information made by a Party or RDP in relation to the DCCKI Services, the DCCKI Repository Service or the DCCKI Document Set, but excluding any request for a copy of any document or information which can be accessed through the DCCKI Repository.

The DCCKI Subscriber Obligations

DCCKI Certificate Signing Requests and Personnel Authentication Certificate Applications

L13.43 Each DCCKI Eligible Subscriber shall ensure that all of the information contained in each DCCKI Certificate Signing Request and each Personnel Authentication Certificate Application made by it is true and accurate.

L13.44 No DCCKI Eligible Subscriber may make a DCCKI Certificate Signing Request or Personnel Authentication Certificate Application which contains:

(a) any information that constitutes a trade mark, unless it is the holder of the Intellectual Property Rights in relation to that trade mark; or

(b) any confidential information which would be contained in a DCCKI Certificate Issued in response to that DCCKI Certificate Signing Request or Personnel Authentication Certificate Application.

Subscribing for or Rejecting DCCKI Certificates

L13.45 Where any DCCKI Certificate is Issued to a DCCKI Eligible Subscriber in response to a DCCKI Certificate Signing Request, or any Personnel Authentication Certificate is Issued to a DCCKI Eligible Subscriber in response to a Personnel Authentication Certificate Application, that DCCKI Eligible Subscriber shall:

(a) establish whether the information contained in that DCCKI Certificate or Personnel Authentication Certificate is consistent with information that was contained in the DCCKI Certificate Signing Request or Personnel Authentication Certificate Application (as the case may be);

(b) if it identifies that the DCCKI Certificate or Personnel Authentication Certificate contains any information which is untrue or inaccurate immediately inform the DCC that it rejects the DCCKI Certificate or Personnel Authentication Certificate and give to the DCC its reasons for doing so; and

(c) in the absence of any such rejection, become a DCCKI Subscriber for that DCCKI Certificate or Personnel Authentication Certificate.

Use of DCCKI Certificates

L13.46 Each DCCKI Subscriber shall ensure that it does not use any DCCKI Certificate held by it other than for the purposes of creating, sending, receiving and processing communications sent to and from the DCC pursuant to the Code.

DCCKI Certificates: Protection of Private Keys

L13.47 Each DCCKI Subscriber shall (in addition, if it is the DCC, a User or an RDP, to its obligations under Section G (Security)) take reasonable steps to ensure that no Compromise occurs to any:

(a) Private Key which is associated with a Public Key contained in a DCCKI Certificate for which it is the DCCKI Subscriber; or

(b) Secret Key Material associated with that Private Key.

The DCCKI Relying Party Obligations

DCCKI Relying Parties

L13.48 For the purposes of this Section L13, a "**DCCKI Relying Party**" in relation to a DCCKI Certificate or DCCKICA Certificate, means any Party or RDP which relies on the Certificate for the purposes of creating, sending, receiving or processing communications sent to and from the DCC or another Party or RDP pursuant to this Code.

Duties in relation to DCCKI Certificates and DCCKICA Certificates

L13.49 Each DCCKI Relying Party shall:

(a) before relying on any DCCKI Certificate:

(i) Check Cryptographic Protection in respect of the EII DCCKICA CRL (or, in the case of DCC only, any DCCKI Certificate Revocation List relevant to that DCCKI Certificate) on the DCCKI Repository, in accordance with IETF RFC 5280; and

(ii) where that DCCKI Certificate is shown on the EII DCCKICA CRL (or, in the case of DCC only, any DCCKI Certificate Revocation List relevant to that DCCKI Certificate) as having been revoked, not rely on the DCCKI Certificate; and

(b) before relying on any DCCKICA Certificate:

(i) Check Cryptographic Protection in respect of the DCCKI ARL on the DCCKI Repository, in accordance with IETF RFC 5280; and

(ii) where that DCCKICA Certificate is shown on the DCCKI ARL as having been revoked, not rely on the DCCKICA Certificate.

L13.50 No DCCKI Relying Party may rely on a DCCKI Certificate where the Validity Period of that DCCKI Certificate has expired.

L13.51 No DCCKI Relying Party may rely on a DCCKI Certificate or DCCKICA Certificate where it suspects that the DCCKI Certificate has been Compromised.

L13.52 Each DCCKI Relying Party shall take reasonable steps, by means of appropriate Systems, to verify Digital Signatures, Check Cryptographic Protection, Confirm Validity and perform other appropriate cryptographic operations before relying on any DCCKI Certificate or DCCKICA Certificate.

The DCCKI PMA Functions

Performance of the DCCKI Functions

L13.53 The DCC shall make arrangements which shall ensure that:

(a) a senior member of DCC Personnel;

(b) a senior member of the personnel of a DCC Service Provider; or

(c) a number of individuals, each of whom falls within either paragraph (a) or (b), acting together,

shall carry out the DCCKI PMA Functions. The DCCKI PMA Functions

L13.54 For the purpose of this Section L13, the "**DCCKI PMA Functions**" shall mean the activities of:

(a) approving the DCCKI CPS, and any amendments to it;

(b) periodically:

(i) reviewing the effectiveness of the DCCKI Document Set (including so as to evaluate whether the DCCKI Document Set remains consistent with the SEC Objectives); and

(ii) identifying any changes that should be made to the DCCKI Document Set in order to ensure that the DCC meets its obligations under Section G (Security);

(c) as soon as is reasonably practicable following the incorporation of each of the following documents into this Code, its re-incorporation, or its modification in accordance with section 88 of the Energy Act 2008, carrying out in relation to it the activities specified in paragraph (a) above:

(i) the DCCKI Certificate Policy;

(ii) the DCCKI RAPP;

(d) on receipt by the DCC of a notification from the SMKI PMA in accordance with Section L1.17(e) (Duties of the SMKI PMA), carrying out in relation to the DCCKI Document Set the activities specified in paragraph (a) above, having regard in particular to any recommendation for action made by the SMKI PMA; and

(e) performing any other duties expressly described as DCCKI PMA Functions elsewhere in this Code.

The Duties of the DCC

L13.55 Where the individual(s) carrying out the DCCKI PMA Functions notifies the DCC of any matter, or makes any recommendation with regard to the compliance by the DCC with its obligations under Section G (Security) (including in particular any recommendation for the modification of the DCCKI Document Set for the purpose of ensuring such compliance), the DCC shall:

(a) consider and take into account the matter notified, or recommendation made, to it; and

(b) where, having done so, it considers that it would be appropriate to make a change to the:

(i) DCCKI SEC Documents, submit a Draft Proposal for that purpose; and

(ii) DCCKI CPS, propose amendments to it in accordance with Section L13.42.

L13.56 The DCC shall ensure that the SMKI PMA and Security Sub-Committee shall each be provided with such of the following information as it may request:

(a) any notification or recommendation made to the DCC by the individual(s) carrying out the DCCKI PMA Functions; and

(b) copies of all agenda and supporting papers available at any meeting between individuals acting together to carry out the DCCKI PMA Functions, insofar as those agenda and papers are reasonably relevant to the functions of the SMKI PMA or Security Sub-Committee (as the case may be).

L13.57 The DCC shall ensure that, where it receives any report with regard to its ISO 27001 certification and part of that report relates to any matters concerned with the DCCKI Services, it will as soon as reasonably practicable provide those parts of that report to the SMKI PMA.

L14. THE S1SPKM DOCUMENT SET

Obligations on the SMKI PMA

L14.1 The SMKI PMA shall exercise the functions that are allocated to it under and (in so far as they apply to it) comply with the requirements of the S1SPKM Document Set.

Obligations on the DCC

L14.2 The DCC shall (in so far as they apply to it) comply with the requirements of the S1SPKM Document Set.

The S1SPKM Document Set

L14.3 For the purposes of this Section L14, the "**SMETS1 Service Provider Key Management Document Set**" (or "**S1SPKM Document Set**") means:

(a) the S1SPKM SEC Documents; and

(b) each S1SPKI CPS.

The S1SPKM SEC Documents

L14.4 For the purposes of this Section L14, the "**SMETS1 Service Provider Key Management SEC Documents** " (or "**S1SPKM SEC Documents**") means the provisions of the Code comprising:

(a) the following SEC Subsidiary Documents:

(i) each S1SPKI Certificate Policy;

(ii) each S1SPKI RAPP;

(iii) each SMETS1 Cryptographic Key Management Policy;

(iv) the SMKI Recovery Procedure;

(v) the S1SPKM Compliance Policy;

(b) the provisions of this Section L14; and

(c) every other provision of the Code which relates to the establishment, provision or use of any the S1SPKI, or to any matters directly arising from or affecting the establishment, provision or use of the S1SPKI.

The S1SPKI Certificate Policies: Document Development

L14.5 The DCC shall develop a draft of one or more S1SPKI Certificate Policies:

(a) so that each such S1SPKI CP shall be in equivalent form, and have content which corresponds, to the Organisation Certificate Policy; and

(b) in accordance with the process set out at Section L14.8.

The S1SPKI Registration Authority Policies and Procedures: Document Development

L14.6 The DCC shall develop a draft of one or more S1SPKI Registration Authority Policies and Procedures:

(a) so that there shall be an S1SPKI RAPP in respect of each S1SPKI CP;

(b) so that each such S1SPKI RAPP shall make provision for such matters as are specified in the related S1SPKI CP as being matters to be provided for in that S1SPKI RAPP;

(c) in accordance with the process set out at Section L14.8.

The SMETS1 Cryptographic Key Management Policy: Document Development

L14.7 The DCC shall, in respect of each SMETS1 Symmetric Key Arrangement, develop a draft of a SMETS1 Cryptographic Key Management Policy, which shall:

(a) be in accordance with the requirements of "A10.1.2 – Key Management" of ISO 27001;

(b) set out the policy on the use, protection and duration of the Symmetric Keys throughout their entire lifecycle;

(c) make provision for managing those Symmetric Keys throughout their entire lifecycle, including in particular provision for generating, storing, archiving, distributing, retiring and destroying them;

(d) specify secure procedures and methods for:

(i) generating Symmetric Keys for different cryptographic systems and different applications;

(ii) distributing Symmetric Keys to intended recipients;

(iii) activating the Symmetric Keys when received;

(iv) storing Symmetric Keys and providing access to them for authorised users;

(v) changing or updating Symmetric Keys, including provision for how and when they will be changed or updated;

(vi) dealing with Compromised Symmetric Keys;

(vii) revoking Symmetric Keys, including provision for how and when they are to be withdrawn or deactivated;

(viii) recovering Symmetric Keys that are lost or corrupted;

(ix) backing-up or archiving Symmetric Keys;

(x) destroying Symmetric Keys; and

(xi) the logging and auditing of key management related activities; and

(e) be developed in accordance with the process set out at Section L14.8.

Document Development: Process

L14.8 The process set out in this Section L14.8 for the development of a draft of any S1SPKI CP, S1SPKI RAPP and SMETS1 Cryptographic Key Management Policy, is that, in respect of each such document:

(a) the DCC shall, as soon as reasonably practicable after the coming into effect of this Section L14, in consultation with the Parties and such other persons as it considers appropriate, produce a draft of the document;

(b) where a disagreement arises with any person who is consulted with regard to any proposal as to the content of the document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the document specified in Section L14.5, L14.6 or L14.7 (as the case may be);

(c) the DCC shall send a draft of the document to the Secretary of State as soon as is practicable after it is produced, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose; and

(ii) a summary of any disagreements that arose during consultation, identifying in particular any that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to the draft of the document, including in particular:

(i) any requirement to produce and submit to the Secretary of State a further draft of the document; and

(ii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

The S1SPKI Certification Practice Statement

L14.9 The DCC shall establish, give effect to, maintain and comply with one or more documents, each of which shall be known as an "**S1SPKI Certification Practice Statement**" (or "**S1SPKI CPS**"), so that there shall be an S1SPKI CPS in respect of each S1SPKI CP

L14.10 Each S1SPKI CPS shall be a document which:

(a) sets out the policies and procedures of the DCC designed to ensure that it will comply with the requirements of the related S1SPKI Certificate Policy;

(b) incorporates the detailed operating procedures to be used by the DCC for the purposes of its compliance with the requirements of that Policy;

(c) incorporates such other provisions as may be required by or in accordance with that Policy or any other part of the Code; and

(d) has been reviewed by the SMKI PMA and either approved by it or not rejected (whether or not following the making of such amendments as may be directed by the SMKI PMA) in accordance with the provisions of Section L14.11(b).

L14.11 For the purposes of the review of an S1SPKI CPS by the SMKI PMA in accordance with Section L14.10(d):

(a) the DCC shall submit an initial draft of the document to the SMKI PMA as soon as reasonably practicable after the coming into effect of this Section L14;

(b) the SKMI PMA shall review the initial draft of the document and shall:

(i) approve the draft;

(ii) determine that the draft is not rejected;

(iii) reject the draft; or

(iv) notify the DCC that it will either approve the draft or the determine that the draft is not rejected subject to the DCC first making such amendments to the document as it may direct; and

(c) the DCC shall make any amendments to the draft document that may be directed by the SMKI PMA in accordance with sub-paragraph (b)(iv).

L14.12 The DCC shall keep each S1SPKI CPS under review, and shall in particular carry out a review of an S1SPKI CPS:

(a) whenever (and to the extent to which) it may be required to so by the SMKI PMA; and

(b) following receipt of a notification from the SMKI PMA in accordance with Section L1.17(q) (Duties of the SMKI PMA).

L14.13 Following:

(a) any review of an S1SPKI CPS, the DCC may propose amendments to that document, and:

(i) any such amendments shall be submitted by the DCC to the SMKI PMA for its review; and

(ii) following the review by the SMKI PMA, the provisions of Sections L14.11(b) and (c) shall apply in respect of those amendments as they applied to the initial draft of the S1SPKI CPS; and

(b) a review carried out in accordance with Section L14.12(b), the DCC shall report to the SMKI PMA any remedial steps taken or proposed to be taken in order for it to continue to meet its obligations under Section G (Security).

L15. S1SPKM ASSURANCE

S1SPKM Compliance Policy

L15.1 The SKMI PMA shall exercise the functions allocated to it by the S1SPKM Compliance Policy.

L15.2 The DCC shall procure all such services as are required for the purposes of complying with its obligations under the S1SPKM Compliance Policy.

The DCC: Duty to Cooperate in Assessment

L15.3 The DCC shall do all such things as may be reasonably requested by the SMKI PMA, or by any person acting on behalf of or at the request of the SMKI PMA (including in particular the Independent S1SPKM Assurance Service Provider), for the purposes of facilitating an assessment of the DCC's compliance with any applicable requirements of the S1SPKM Document Set.

L15.4 For the purposes of Section L15.3, the DCC shall provide the SMKI PMA (or the relevant person acting on its behalf or at its request) with:

(a) all such Data as may reasonably be requested, within such times and in such format as may reasonably be specified; and

(b) all such other forms of cooperation as may reasonably be requested, including in particular access at all reasonable times to:

(i) such parts of the premises of the DCC as are used for; and

(ii) such DCC Personnel as carry out, or are authorised to carry out,

any activities related to its compliance with the applicable requirements of the S1SPKM Document Set.

Events of Default

L15.5 In relation to an Event of Default which consists of a material breach by the DCC of any applicable requirements of the S1SPKM Document Set, the provisions of Sections M8.2 (Notification of an Event of Default) to M8.4 (Consequences of an Event of Default) shall apply subject to the provisions of Sections L15.6 to L15.12.

L15.6 For the purposes of Sections M8.2 to M8.4 as they apply pursuant to Section L15.5, an Event of Default shall (notwithstanding the ordinary definition thereof) be deemed to have occurred in respect of the DCC where it is in material breach of any applicable requirements of the S1SPKM Document Set (provided that Sections M8.4(e), (f) and (g) shall never apply to the DCC).

L15.7 Where in accordance with Section M8.2 the Panel receives notification that the DCC is in material breach of any applicable requirements of the S1SPKM Document Set, it shall refer the matter to the SMKI PMA. On any such referral, the SMKI PMA may investigate the matter in accordance with Section M8.3 as if the references in that Section to the "Panel" were to the "SMKI PMA".

L15.8 Where the SMKI PMA has:

(a) carried out an investigation in accordance with Section M8.3; or

(b) received a report from the Independent S1SPKM Assurance Service Provider, following an assessment by it of the compliance of the DCC with the applicable requirements of the S1SPKM Document Set, concluding that the DCC has not complied with those requirements,

the SMKI PMA shall consider the information available to it and shall determine whether any non-compliance with the SMKI Document Set has occurred and, if so, whether that non-compliance constitutes an Event of Default.

L15.9 Where the SMKI PMA determines that an Event of Default has occurred, it shall:

(a) notify the DCC and any other Party it considers may have been affected by the Event of Default; and

(b) refer the matter to the Panel for the Panel to determine the appropriate steps to take in accordance with Section M8.4.

L15.10 Where the Panel is considering what steps to take in accordance with Section M8.4, it shall request and consider the advice of the SMKI PMA.

L15.11 Where the Panel determines that the DCC is required to give effect to a remedial action plan in accordance with Section M8.4(d) that plan must be approved by the SMKI PMA.

L15.12 Where, in accordance with Section L15.11, the SMKI PMA has approved a remedial action plan in relation to the DCC, the Panel may arrange for a version of the approved plan (or parts of that plan) to be made available to all the Parties, but only where the Panel considers that such dissemination is necessary for the purposes of security.

L16. SUPPLIER OF LAST RESORT

L16.1 Where the Authority notifies the DCC of a Failing Energy Supplier, the DCC shall notify the SMKI PMA, and the following shall apply:

(a) the DCC shall not revoke the Supplier Certificates of the Failing Energy Supplier until the DCC is directed to do so by the SMKI PMA;

(b) subject to consideration of the circumstances in Section L16.2, the SMKI PMA shall promptly:

(i) direct the DCC to immediately revoke one or more of the Supplier Certificates; and/or

(ii) notify the DCC of the SMKI PMA’s decision not to direct the immediate revocation of one or more of the Supplier Certificates; and

(c) the SMKI PMA shall notify the Authority of the SMKI PMA’s decision under Section L16.1(b).

L16.2 For the purposes of Section L16.1(b), the SMKI PMA shall (to the extent that the information is available to them) take into account the following:

(a) the fact that the Failing Energy Supplier will cease to be an Eligible Subscriber and/or DCCKI Eligible Subscriber for the Supplier Certificates when its Gas Supply Licence and/or Electricity Supply Licence is revoked;

(b) the arrangements in place under the Customer Supply Continuity Plan(s) of the Failing Energy Supplier;

(c) whether there is a Shared Resource Provider which provides (or provided) Shared Resources to the Failing Energy Supplier, and (if so):

(i) the ability of the Shared Resource Provider to send Service Requests and/or to amend Anomaly Detection Thresholds using the Private Keys associated with Public Keys in the Failing Energy Supplier's Supplier Certificates; and

(ii) whether the staff who operated the Failing Energy Supplier’s User Systems have been (or are likely to be) retained by the Supplier of Last Resort;

(d) whether the Failing Energy Supplier has (or had) any Pre-Payment Consumers;

(e) any adverse impact on the Energy Consumers of the Failing Energy Supplier that may arise from any decision made by the SMKI PMA to direct the revocation of one or more of the Supplier Certificates of the Failing Energy Supplier, including that this adverse impact might be exacerbated by the fact that there is likely to be a period of time between the appointment of the Supplier of Last Resort and the completion of the SoLR Change of Supplier Processes; and

(f) any other matters that the SMKI PMA considers relevant in the circumstances of the case.

L16.3 Where, in the case of a Failing Energy Supplier, the SMKI PMA notifies the Authority of the SMKI PMA's intention to not direct the immediate revocation of one or more of the Supplier Certificates, the Authority may direct a Shared Resource Provider for the Failing Energy Supplier to take action to maintain continuity of the physical supply of gas and/or electricity to the Pre-Payment Consumers of the Failing Energy Supplier.

L16.4 Where directed by the Authority under Section L16.3, the Shared Resource Provider shall expeditiously take the steps (if any) that are practically available to it to maintain continuity of the supply of gas and/or electricity to the Pre-Payment Consumers of the Failing Energy Supplier.

L16.5 It is acknowledged that:

(a) in order to meet its obligation under Section L16.4, a Shared Resource Provider may use the Private Keys associated with Public Keys contained within the Supplier Certificates of the Failing Energy Supplier in order to:

(i) submit Service Requests to the DCC that result in the sending of Commands to SMETS2+ Devices or to a SMETS1 Service Provider; and/or

(ii) modify the Anomaly Detection Thresholds in order to allow it to meet its obligation in a timely manner;

(b) in order to meet its obligation under Section L16.4 to take steps expeditiously, the Shared Resource Provider may need also to communicate with Smart Metering Systems which do not include Smart Meters operating as Pre-Payment Meters;

(c) the effect of the actions of the Shared Resource Provider may result in one or more of the Pre-Payment Consumers of the Failing Energy Supplier continuing to receive a physical supply of gas and/or electricity notwithstanding that no advance payment has been made for that supply; and

(d) the actions of the Shared Resource Provider may be taken before or after the Supplier of Last Resort is Registered as supplier to the Pre-Payment Consumers of the Failing Energy Supplier.

L16.6 Each Supplier of Last Resort shall, as soon as reasonably practicable after it is appointed as Supplier of Last Resort in relation to a Failing Energy Supplier, notify the SMKI PMA that the Supplier of Last Resort wishes the Shared Resource Provider to either:

(a) cease to use the Failing Energy Supplier's Private Keys in accordance with Section L16.4; or

(b) continue to use the Failing Energy Supplier's Private Keys in accordance with Section L16.4 for a period of time, and hence that Supplier of Last Resort does not wish the SMKI PMA to direct the DCC to revoke the Supplier Certificates of the Failing Energy Supplier that have not yet been revoked, in which case the Supplier of Last Resort shall:

(i) give details to the SMKI PMA to justify why the Supplier of Last Resort believes this is necessary;

(ii) set out its plans to complete the SoLR Change of Supplier Processes in relation to relevant Devices, including the timetable within which it expects this process to be completed; and

(iii) update the SMKI PMA on a weekly basis (or more regularly where requested by the SMKI PMA).

L16.7 Following a notification from the relevant Supplier of Last Resort pursuant to Section L16.6, the SMKI PMA shall consider whether or not to direct the DCC to revoke any or all of the Failing Energy Supplier's Supplier Certificates (by reference to the matters in Section L16.2). This is without prejudice to the authority of the SMKI PMA to, at any time, direct the DCC to revoke any or all of the Failing Energy Supplier's Supplier Certificates.

L16.8 Each of the Failing Energy Supplier and the Supplier of Last Resort hereby waives any and all claims it might otherwise have had against the Shared Resource Provider in respect of the steps taken by the Shared Resource Provider in compliance with Section L16.4.

L16.9 Where the SMKI PMA directs the DCC not to revoke one or more of the Failing Energy Supplier's Supplier Certificates, the SMKI PMA shall also direct the DCC not to recognise the transfer of the Failing Energy Supplier's Market Participant Identifiers to the Supplier of Last Resort, where this will assist in enabling the Shared Resource Provider to take steps required by this Section L16.1. The DCC shall comply with each such direction until the SMKI PMA or the Authority directs otherwise.

L17. INTERACTIONS WITH CSS

L17.1 The DCC shall use a Private Key associated with a Public Key that is contained within an Organisation Certificate to Digitally Sign any communication sent pursuant to Section E2.19.

M GENERAL

M1. COMMENCEMENT AND DURATION

Commencement

M1.1 This Code shall take effect from the effective date designated by the Secretary of State pursuant to Condition 22 of the DCC Licence.

Duration

M1.2 Once this Code comes into effect, it shall remain in effect:

(a) in respect of the DCC, until the DCC ceases to be a Party in accordance with Section M9 (Transfer of the DCC Licence); and

(b) in respect of each Party other than the DCC, until (subject to Section M8.14) such Party ceases to be a Party in accordance with Section M8 (Suspension, Expulsion and Withdrawal).

M2. LIMITATIONS OF LIABILITY

Unlimited Liabilities

M2.1 Nothing in this Code or any Bilateral Agreement shall exclude or limit a Party's Liability:

(a) for death or personal injury resulting from the negligence of that Party;

(b) for fraud or fraudulent misrepresentation;

(c) to pay the Charges and any interest accruing in respect of the Charges in accordance with this Code; or

(d) for any other type of Liability which cannot by law be excluded or limited.

Exclusion of Indirect Loss

M2.2 No Party shall in any circumstances be liable to another Party for loss arising as a result of a breach of this Code and/or any Bilateral Agreement that does not directly result from such breach and that was not reasonably foreseeable as likely to occur in the ordinary course of events.

Confidentiality and Intellectual Property Rights

M2.3 Each Party's Liability for breaches of Section M4 (Confidentiality) shall be:

(a) in the case of any breach of Section M4.20 (Confidentiality of DCC Data) relating to Data that has been clearly by the DCC as 'confidential', unlimited (save as provided in Section M2.2); and

(b) in the case of any other breach of Section M4, limited to £1,000,000 (one million pounds) in respect of each incident or series of related incidents, save as provided in Section M2.3A).

M2.3A The Liability of the DCC for a breach of Section M4.1 (Prohibition on disclosure and use by DCC) shall, where the amount of that Liability is recoverable by the DCC from a DCC Service Provider in accordance with the terms of a DCC Service Provider Contract, be:

(a) unlimited if the amount of the Liability that is recoverable from the DCC Service Provider is unlimited; or

(b) limited to any amount in which the Liability that is recoverable from the DCC Service Provider is limited, or to £1,000,000 (one million pounds) in respect of each incident or series of related incidents, whichever is the greater,

but, for the purposes of this Section, no regard shall be had to any limitation in a DCC Service Provider Contract which is expressed to be set by reference to any amount specified in or calculated under this Code.

M2.4 Each Party’s Liability for any breach of Section M5 (Intellectual Property Rights) shall be unlimited (save as provided in Section M2.2).

Damage to Physical Property

M2.5 Subject to Section M2.1, each Party’s Liability for loss of or damage to physical property (including loss of or damage to Systems, and loss or corruption of Data) arising as a result of a breach by that Party of this Code and/or any Bilateral Agreement shall be limited as follows:

(a) the Liability of the DCC shall be limited to £1,000,000 (one million pounds) in respect of each incident or series of related incidents; and

(b) the Liability of each Party other than the DCC shall be limited to £1,000,000 (one million pounds) in respect of each incident or series of related incidents,

for which purposes:

(c) where a defect in the design, manufacture, materials or workmanship of two (or more) Devices causes loss of or damage to physical property (including loss of or damage to Systems, and loss or corruption of Data), the defect in each such Device shall constitute a separate unrelated incident; and

(d) where a Party's Liability exceeds £1,000,000 (one million pounds) and is limited under this Section M2.5 and that Liability is in respect of loss or damage suffered by more than one other Party, each such other Party shall be entitled to recover a proportion of the £1,000,000 (one million pounds) calculated by reference to the amount of any loss and damage suffered by it expressed as a fraction of the total amount of loss and damage suffered by such other Parties collectively.

Recovery of Loss which is Expressly Permitted

M2.6 It is expressly agreed that a Party may recover the following losses arising as a result of a breach of this Code (and without intending to limit recovery of any other Liability that may arise as a result of such breach):

(a) (subject to Sections F9.25 (Exclusive Remedies for Site Visits) and M2.5) where such breach causes the loss of, or damage to, a Smart Metering System (or any part of it), the Import Supplier, Export Supplier and/or Gas Supplier (as applicable) for that Smart Metering System shall be entitled to recover the reasonable costs and expenses (including reasonable labour costs) incurred in attending the relevant premises for the purpose of repairing or replacing that Smart Metering System (or the relevant part of it);

(b) in the case of breaches of Section F6 (Delivery and Acceptance of Communications Hubs) and/or the CH Handover Support Materials, the DCC shall be entitled to recover the reasonable costs and expenses referred to in Section F6.18 (Failure to Accept Delivery);

(c) where such breach causes an Organisation Certificate to be Compromised or issued otherwise than in accordance with the relevant Certificate Policy (and, in either case, the Subscriber wishes it to be replaced), the reasonable costs and expenses (including reasonable labour costs) incurred in replacing any or all such Compromised Certificates held on Devices (but not the costs and expenses of replacing Device Certificates), limited to £1,000,000 (one million pounds) in respect of each incident or series of related incidents); and

(d) where such breach (including a breach which is deemed to occur in accordance with Section L10.26 (Breach of the Code by the Relevant Subscriber)) gives rise to a Recovery Event such that the DCC incurs (or is required to make payments in respect of) Recovery Costs under Section L10 (the SMKI Recovery Procedure), the DCC shall be entitled to recover the Recovery Costs that it has incurred (or been required so to pay), limited to £1,000,000 (one million pounds) in respect of each Recovery Event.

Exclusion of Loss of Profit etc.

M2.7 Subject to Sections M2.1 and M2.6 and save in the case of a breach referred to in Section M2.3(b) or M2.4, no Party shall in any circumstances be liable to another Party for any of the following losses arising as a result of a breach of this Code and/or any Bilateral Agreement:

(a) loss of profit;

(b) loss of revenue;

(c) loss of use;

(d) loss of contract;

(e) loss of goodwill; or

(f) loss resulting from the liability of such other Party to a third party for any of the matters referred to in paragraphs (a) to (e) above.

Exclusion of Other Liabilities

M2.8 Subject to Sections M2.1 and M2.6 and save in the case of a breach of those provisions referred to in Section M2.3 or M2.4, no Party shall be liable to any other Party for loss arising from any breach of this Code and/or any Bilateral Agreement other than for losses that are subject to Section M2.5. This Section M2.8 is without prejudice to the operation of the Charging Methodology, and the payments required under Section F9.22 (Payment of Type Fault and Batch Fault Compensation) or F9.23 (Compensation for Product Recall or Technology Refresh).

M2.9 The rights and remedies provided by this Code and/or any Bilateral Agreement are exclusive and not cumulative, and exclude and are in place of all substantive (but not procedural) rights or remedies provided by common law or statute in respect of the subject matter of this Code and/or any Bilateral Agreement, including any rights that any Party may possess in tort (or delict).

M2.10 Subject to Section M2.1, each of the Parties hereby waives to the fullest extent possible all such rights and remedies provided by common law or statute (and releases the other Parties to the same extent from all Liabilities or obligations provided by common law or statute in respect of the subject matter of this Code and/or any Bilateral Agreement).

Statutory Rights

M2.11 For the avoidance of doubt, nothing in this Section M2 shall exclude or restrict or otherwise prejudice or affect any of:

(a) the rights, powers, duties and obligations of any Party which are conferred or created by the Relevant Instruments; or

(b) the rights, powers and duties of the Authority or the Secretary of State.

Other Matters

M2.12 Each of the sub-clauses of this Section M2 shall be construed as a separate and severable contract term, and if one or more of such sub-clauses is held to be invalid, unlawful or otherwise unenforceable, then the other or others of such sub-clauses shall remain in full force and effect and shall continue to bind the Parties.

M2.13 In respect of all substantive (but not procedural) rights or remedies provided by common law or statute (including in tort or delict, but without prejudice to contractual rights or remedies) in respect of loss of or damage to physical property (including loss of or damage to Systems, and loss or corruption of Data) arising in relation to the subject matter of this Code and/or any Bilateral Agreement, it is agreed that:

(a) each Party hereby waives and releases (to the fullest extent possible at law) such rights and remedies in respect of such loss or damage as such Party may otherwise have against the contractors, employees and agents of each other Party (including the DCC Service Providers) in their capacity as such;

(b) the DCC shall ensure that each DCC Service Provider (when acting in its capacity as such) waives and releases (to the fullest extent possible at law) such rights and remedies in respect of such loss or damage as such DCC Service Provider may otherwise have against the Parties other than DCC in their capacity as such (and/or against the contractors, employees and agents of such Parties in their capacity as such);

(c) the waiver and release referred to in Section M2.13(a) is to be enforceable by the persons stated therein to have the benefit thereof in accordance with Section M11.5 (Third Party Rights); and

(d) the DCC shall ensure that the waiver and release referred to in Section M2.13(b) is enforceable by the persons stated therein to have the benefit thereof under the Contracts (Rights of Third Parties) Act 1999.

M2.14 Each Party shall be under a duty to mitigate its loss.

M2.15 Each Party hereby acknowledges and agrees that the provisions of this Section M2 are fair and reasonable having regard to the circumstances.

Conduct of Indemnity Claims

M2.16 Where this Code provides that one Party (the "Indemnifier") is to indemnify another Party (the "Indemnified Party") against third party claims, the Indemnified Party shall:

(a) promptly notify the Indemnifier of any such claim, and provide it with details in relation to the same and all relevant documentation excluding that which attracts legal privilege;

(b) consult with the Indemnifier with respect to the subject matter of the claim and the manner in which the Indemnified Party intends to deal with the same, keep the Indemnifier promptly advised of developments concerning the same, and have due regard to the Indemnifier's views in relation to the same;

(c) not settle, compromise or make any admission of liability concerning any such claim, without the prior written consent of the Indemnifier (such consent not to be unreasonably withheld or delayed); and

(d) where the Indemnifier so requests, allow the Indemnifier (or such person as the Indemnifier may nominate) to conduct all negotiations and proceedings regarding the claim (at the Indemnifier's cost), in which case the Indemnifier shall ensure that the claim is diligently defended in accordance with any reasonable instructions of the Indemnified Party and not settled or compromised without the Indemnified Party's consent (such consent not to be unreasonably withheld or delayed).

SECCo

M2.17 The provisions of this Section M2 (and the definitions used in this Section) shall apply to SECCo as if SECCo was a Party, but shall not limit SECCo's liability under Section C3.12 (Protections for Panel Members and Others).

M2.18 Nothing in this Section M2 shall limit the DCC's liability to reimburse SECCo in respect of Recoverable Costs.

M3. SERVICES FM AND FORCE MAJEURE

Force Majeure affecting the Services - Services FM

M3.1 The concept of Services FM applies in respect of the obligations of the DCC to provide the Services pursuant to this Code (including pursuant to any Bilateral Agreement).

M3.1A The concept of Services FM is in addition to the concept of OPR Exceptional Events which applies under and in accordance with Sections H13.7 to H13.14 (OPR Exceptional Events). It is possible for an event or circumstance to constitute both an OPR Exceptional Event and Services FM, in which case the DCC may seek relief under both Sections H13.7 to H13.14 (OPR Exceptional Events) and this Section M3. Notwithstanding any other provision of this Section M3, relief for the purposes of OPR Reporting will only arise under and in accordance with the process for OPR Exceptional Events in Sections H13.7 to H13.14 (OPR Exceptional Events).

M3.2 The DCC may claim relief from Liability for non-performance of its obligations in respect of the Services to the extent this is due to Services FM. To the extent that performance of the DCC's obligations is unaffected by the Services FM, the provisions of this Code and any Bilateral Agreement will continue to apply.

M3.3 The DCC cannot claim Services FM has occurred:

(a) in relation to any wilful act, neglect or failure to take reasonable precautions against the relevant Services FM event by the DCC or its servants, agents, employees or contractors (including the DCC Service Providers);

(b) in relation to any circumstances resulting from a failure or delay by any other person in the performance of that other person's obligations under a contract with the DCC other than this Code (unless that other person is itself prevented from or delayed in complying with its obligations as a result of Services FM); and/or

(c) as a result of any shortage of labour, material or other resources unless caused by circumstances which are themselves Services FM, and in any event, the DCC shall not be entitled to relief if and to the extent that it is required to comply with the BCDR Procedure in accordance with Sections H10.9 and H10.10 (the Business Continuity and Disaster Recovery Procedure) but has failed to do so (unless this failure is also due to Services FM affecting the operation of the BCDR Procedure).

M3.4 The DCC shall, as soon as reasonably practicable (and in any event within five (5) days of the occurrence of the Services FM), give to the Users that were due to receive the affected Services and to the Panel full details of the Services FM and any relief the DCC wishes to claim in connection with the Services FM.

M3.5 The DCC shall be entitled to relief in respect of Services FM to the extent that the Panel agrees following consultation with any relevant Sub-Committee (or it is subsequently determined by arbitration) that the requirements of Sections M3.2 and M3.3 are met, and that:

(a) the DCC could not have avoided the occurrence of the Services FM (or its consequences or likely consequences) by taking steps which the DCC was required to take (or procure) under this Code and any Bilateral Agreement or might reasonably be expected to have taken;

(b) the Services FM directly caused the non-performance of the Services for which relief is claimed;

(c) the time lost and/or relief from the obligations under this Code and any Bilateral Agreement claimed by the DCC could not reasonably be expected to be mitigated or recovered by the DCC acting in accordance with Good Industry Practice; and

(d) the DCC is taking all steps in accordance with Good Industry Practice to overcome or minimise the consequences of the Services FM on the performance of the Services.

M3.5A The Panel shall reach a determination as to whether the DCC is entitled to relief in respect of Services FM in accordance with Section M3.5 within 10 Working Days after the DCC notifies the Panel of the Services FM under Section M3.4.

M3.6 If the DCC is entitled to relief in respect of Services FM in accordance with Section M3.5, then:

(a) the DCC shall be relieved of Liability under this Code and any Bilateral Agreement in respect of the Services to the extent to which that Liability would otherwise have arisen solely as a result of the Services FM; and

(b) for the avoidance of doubt, the Charges (but not, for the avoidance of doubt, the Fixed Charges) payable by a User shall be reduced to the extent that the DCC does not provide the Services to that User as a result of the Services FM (and shall be calculated on the basis of the Services that are actually provided).

M3.7 The DCC shall notify the affected Users and the Panel as soon as reasonably practicable after the Services FM ceases or no longer causes the DCC to be unable to comply with its obligations under this Code and/or any Bilateral Agreement in respect of the Services. Following such notification, the Services shall continue to be performed in accordance with the terms and conditions existing immediately before the occurrence of the Services FM.

M3.8 The DCC hereby irrevocably and unconditionally waives all and any rights to claim any extension or allowance of time or other relief from performance of its obligations in respect of the Services other than to the extent caused by Services FM (but without prejudice to the process applying to OPR Exceptional Events. Each User hereby irrevocably and unconditionally waives all and any rights to claim compensation (including for breach of contract or in tort) for failure by the DCC to provide the Services to the extent caused by Services FM.

Force Majeure

M3.9 The concept of Force Majeure applies in respect of:

(a) all obligations of the DCC pursuant to this Code and any Bilateral Agreement other than the obligations of the DCC to provide the Services; and

(b) all obligations of the other Parties pursuant to this Code and any Bilateral Agreement,

all such obligations together being in this Section M3 the "**Relevant Obligations**". For clarity, OPR Exceptional Events (which are defined by reference to Force Majeure) also apply in respect of the DCC claiming relief in respect of its obligations to provide the Services for the purposes of OPR Reporting under Sections H13.7 to H13.14 (OPR Exceptional Events).

M3.10 Subject to Section M3.11, the Affected Party will not be in breach of this Code and/or any Bilateral Agreement or otherwise liable for any failure or delay in performance of any Relevant Obligations to the extent such failure or delay is caused by Force Majeure.

M3.11 An Affected Party may only rely upon Section M3.10 in respect of a failure or delay in performance of any Relevant Obligations to the extent that the Affected Party and the Party or Parties to whom the Affected Party owes the Relevant Obligations agree (or it is determined by arbitration) that the Affected Party:

(a) notified the Party or Parties to whom the Affected Party owes those Relevant Obligations of the matters constituting Force Majeure as soon as reasonably practicable following their occurrence;

(b) kept such Party or Parties fully informed as to the matters relating to the Force Majeure; and

(c) took all reasonable steps in accordance with Good Industry Practice to overcome the Force Majeure and/or minimise the consequences of the Force Majeure on the performance of the Relevant Obligations.

M3.12 The Affected Party shall notify the Party or Parties to whom the Affected Party owes the Relevant Obligations as soon as reasonably practicable after the Force Majeure ceases or no longer causes the Affected Party to be unable to comply with the Relevant Obligations.

M3.13 Each Party hereby irrevocably and unconditionally waives all and any rights to claim any extension or allowance of time or other relief from performance of the Relevant Obligations other than to the extent caused by Force Majeure. Each Party hereby irrevocably and unconditionally waives all and any rights to claim compensation (including for breach of contract or in tort) for, or to seek to expel the Affected Party from this Code for, any failure by the Affected Party to comply with the Relevant Obligations to the extent caused by Force Majeure.

SECCo

M3.14 The provisions of this Section M3 (and the definitions used in this Section) shall apply to SECCo as if SECCo was a Party.

M4. CONFIDENTIALITY

Prohibition on disclosure and use by DCC

M4.1 Subject to Sections M4.3 and M4.4, the DCC shall not disclose another Party's Confidential Information to, or authorise access to another Party's Confidential Information by, any person.

M4.2 Subject to Section M4.3, the DCC shall not use a Party's Confidential Information for any purpose other than the purpose for which it was provided (or otherwise made available) to the DCC, and in any event for any purpose other than the purposes of this Code

Circumstances in which disclosure or use by the DCC are permitted

M4.3 The restrictions on disclosure and authorisation of access in Section M4.1 and on use in Section M4.2 shall not apply to the disclosure or use of, or authorisation of access to, a Party's Confidential Information to the extent:

(a) expressly permitted or required by the DCC Licence;

(b) necessary for the exercise by the DCC of any of its obligations under the Electricity Act, the Gas Act, the DCC Licence, or this Code;

(c) made or given in accordance with the Authority's prior written consent;

(d) such Confidential Information is already available in the public domain other than as a result of a breach by the DCC of this Section M4 and/or the DCC Licence; or

(e) such Confidential Information is already lawfully in the possession of the DCC otherwise than as a result (whether directly or indirectly) of a breach of this Code and/or the DCC Licence (but without prejudice to any obligations to which the DCC is subject in respect of the use or disclosure of such Confidential Information under the arrangements relating to such lawful possession).

M4.4 The restrictions on disclosure and authorisation of access in Section M4.1 shall not apply to the disclosure of, or authorisation of access to, a Party's Confidential Information to the extent:

(a) made or given in order to comply with the DCC's duties under Laws and Directives or the rules of any recognised stock exchange; provided that, in so far as is reasonably practicable in accordance with such Laws and Directives or rules, the DCC shall provide that Party with prior notice of such proposed disclosure or authorisation of access; or

(b) made or given to the employees, other agents, contractors or advisers of the DCC to the extent such persons require such Confidential Information for the purpose of performing their roles as such; provided that such persons are subject to restrictions on the disclosure or use of, or authorisation of access to, such Confidential Information equivalent to those under this Section M4, and provided that the DCC shall be liable for any disclosure, authorisation or use by such persons otherwise than in accordance with this Section M4. This Section M4.4(b) is without prejudice to Section M4.5.

Restriction of disclosure to DCC employees who are leaving

M4.5 The DCC shall not (having regard to the nature and effective life of the Confidential Information in question) continue to disclose Confidential Information to (or authorise access to Confidential Information by) an employee or other agent of the DCC who has notified DCC of his or her intention to become engaged as an employee or agent of:

(a) any other Party; or

(b) a broker or consultant who is known to provide services in relation to the Supply of Energy and/or Commercial Activities,

save where the DCC could not, in all the circumstances, reasonably be expected to refrain from divulging to such employee or other agent Confidential Information which is required for the proper performance of his or her duties.

DCC Practices, Systems and Procedures

M4.6 The DCC shall put in place and at all times maintain managerial and operational practices, systems, and procedures designed to ensure that it complies with this Section M4.

Provision of Information to the Panel

M4.7 Each Party agrees, subject to any confidentiality provision binding on it, to provide to the Panel (or its Sub-Committees and/or Working Groups, including via the Code Administrator, the Secretariat or SECCo) all Data reasonably requested by the Panel (or its Sub-Committees and/or Working Groups, including via the Code Administrator, the Secretariat or SECCo) in order that they may properly carry out their duties and functions under this Code.

Confidentiality and the Panel

M4.8 Where a Party wishes its Party Data to remain confidential, it shall:

(a) in the case of the DCC (in so far as it acts in accordance with Sections M4.22 to M4.24), clearly mark such Party Data as either 'confidential' or 'controlled'; and

(b) in the case of any other Party, clearly mark such Party Data as 'confidential'.

M4.9 Where a Party does not clearly mark its Party Data as ’confidential’, or (in the case of the DCC only)'controlled', the Panel (or its Sub-Committees or Working Groups, the Code Administrator, the

Secretariat or SECCo, as applicable) may treat such Party Data as not being confidential (and shall have no confidentiality obligation in respect of the same).

M4.10 Subject to Section M4.11, the Panel shall not (and shall also ensure that its Sub- Committees and Working Groups, the Code Administrator, the Secretariat and SECCo shall not) disclose, or authorise access to, any Party Data provided (or otherwise made available) to them by a Party where that Party has clearly marked such Party Data as 'confidential' or (in the case of the DCC only) 'controlled' in accordance with Section M4.8.

M4.11 The restrictions in Section M4.10 on disclosures of, or authorisation of access to, Party Data shall not apply to the extent:

(a) made or given in accordance with duties under Laws and Directives or instructions of the Authority;

(b) such Party Data is already available in the public domain other than as a result of a breach by the Panel (or its Sub-Committees or Working Groups, the Code Administrator, the Secretariat or SECCo); or

(c) such Party Data is already lawfully in the possession of the Panel (or its Sub- Committees or Working Groups, the Code Administrator, the Secretariat or SECCo) otherwise than as a result (whether directly or indirectly) of this Code and/or the DCC Licence (but without prejudice to any obligations in respect of the use or disclosure of such Party Data under the arrangements relating to such lawful possession).

M4.12 The Parties acknowledge that, in order for the Panel (and its Sub-Committees and Working Groups, the Code Administrator, the Secretariat and SECCo) to properly carry out their duties and functions under this Code, the Panel may decide (or be obliged) to keep Data as confidential, and not disclose that Data to the Parties. The Panel shall take reasonable steps to keep such instances to a minimum.

Panel Information Policy

M4.13 The Panel shall establish and maintain a policy for classifying, labelling, handling and storing Party Data received by it (and its Sub-Committees and Working Groups, the Code Administrator, the Secretariat and SECCo) pursuant to the provisions of Section G (Security), Section I (Data Privacy), and Section L (Smart Metering Key Infrastructure) and its related SEC Subsidiary Documents.

M4.14 The Panel (and its Sub-Committees and Working Groups, the Code Administrator, the Secretariat and SECCo) shall act in accordance with the policy established and maintained in accordance with Section M4.13.

Confidentiality of DCC Data

M4.15 Where Data belonging to the DCC, or relating to the DCC or the Services, is disclosed (or otherwise becomes available) to another Party under or in relation to this Code, and where the DCC wishes such Data to remain confidential, the DCC shall (in so far as it acts in accordance with Sections M4.22 to M4.24) clearly mark such Data as either 'confidential' or 'controlled' and where the DCC does not do so, the other Parties may treat such Data as not being confidential (and shall have no confidentiality obligation in respect of the same).

M4.16 Where a Party wishes to dispute whether or not Data which the DCC has marked as 'controlled' may be given that designation in accordance with Section M4.23, that Party may refer the matter to arbitration in accordance with Section M7 (Dispute Resolution).

M4.17 Where a Party wishes to be able to receive from the DCC Data which the DCC marks as 'confidential', that Party shall:

(a) provide to the DCC a list containing the names and contact details of one or more individuals who are authorised by it to receive such Data; and

(b) where it wishes to change the names and/or contact details of the individuals on the list, provide an updated version of the list to the DCC a reasonable time in advance of the update taking effect.

M4.18 Where a Party has provided to the DCC in accordance with Section M4.17 the names and contact details of one or more individuals who are authorised by it to receive Data marked by the DCC as 'confidential', the DCC shall not disclose such Data to that Party except by sending it or making it available to all of those named individuals.

M4.19 Where a Party has not provided to the DCC the names and contact details of one or more individuals who are authorised by it to receive Data marked by the DCC as 'confidential':

(a) the DCC shall be under no obligation to, and shall not, disclose any such Data to that Party; and

(b) paragraph (a) shall be deemed to take precedence over any contrary provision of this Code, and any such provision shall be read as if it incorporated no requirement to disclose any Data marked by the DCC as 'confidential'.

M4.20 Each Party other than the DCC shall not disclose, or authorise access to, Data that is clearly marked by the DCC as either 'confidential' or 'controlled', in accordance with Section M4.15, provided that such restrictions on disclosure and access shall not apply to the extent that:

(a) the disclosure is made or given in accordance with duties under Laws and Directives or instructions of the Authority;

(b) such Data is already available in the public domain other than as a result of a breach of this Code by a Party;

(c) such Data is already lawfully in the possession of the Party otherwise than as a result (whether directly or indirectly) of this Code and/or the DCC Licence (but without prejudice to any obligations in respect of the use or disclosure of such Data under the arrangements relating to such lawful possession); or

(d) such Data is clearly marked by the DCC as 'confidential', but the DCC has disclosed it to the Party by sending or making it available to an individual not named in a list provided by the Party under Section M4.17, or by using contact details different to those specified in that list, and:

(i) the disclosure or access occurs as a direct consequence of that breach by the DCC of Section M4.18; and

(ii) if the Party was made or otherwise became aware of that breach by the DCC, it had taken all reasonable steps to avoid the disclosure or access.

Use of DCC Data

M4.21 The Parties other than the DCC may only use the Data belonging to the DCC, or relating to the DCC or the Services, which is disclosed (or otherwise becomes available) to them under or in relation to this Code for the purpose of performing their obligations or exercising their rights under this Code (or for any other use that is expressly authorised by the DCC in writing).

DCC Classification of Data

M4.22 For the purposes of Sections M4.8 and M4.15, the DCC may only mark Data as 'confidential' where:

(a) that Data relates to a DCC Service Provider providing services pursuant to a DCC Service Provider Contract which was referred to in paragraph 1.5 of schedule 1 to the DCC Licence on its grant;

(b) the DCC is subject to an existing obligation under the DCC Service Provider Contract referred to in paragraph (a) to ensure that that Data remains confidential;

(c) the DCC's Liability for breaching the obligation referred to in paragraph (b) is unlimited; and

(d) the DCC is not prohibited from marking that Data as 'confidential' under Section M4.24.

M4.23 For the purposes of Sections M4.8 and M4.15, the DCC may only mark Data as 'controlled' where:

(a) the uncontrolled disclosure of, or uncontrolled authorised access to, that Data could reasonably be considered to be prejudicial to the DCC (or any DCC Service Provider); and

(b) the DCC is not prohibited from marking that Data as 'controlled' under Section M4.24.

M4.24 The DCC shall not mark Data as either 'confidential' or 'controlled' where or to the extent that:

(a) the DCC is expressly required to place that Data in the public domain in order to comply with its duties under Laws and Directives;

(b) it is necessary for the exercise by the DCC of any of its obligations under the Electricity Act, the Gas Act, the DCC Licence, or this Code to place that Data in the public domain; or

(c) that Data is already in the public domain other than as a result of a breach by the Parties or the Panel of this Section M4 and/or the DCC Licence.

Onward Supply of Supplier Party Data

M4.25 Where the DCC is obliged under a condition of the DCC Licence to disclose to a third party for a specified purpose information relating to a Supplier Party, that Supplier Party shall, where requested to do so, consent to the further disclosure of that information by that third party to the extent such further disclosure is necessary to fulfil that specified purpose.

Injunctive Relief

M4.26 The Parties agree that damages may not be an adequate remedy in the event of breach of this Section M4, and that a Party may seek injunctive relief in respect of any breach or potential breach of this Section M4.

M5. INTELLECTUAL PROPERTY RIGHTS

SEC Materials

M5.1 Section M5.2 applies in respect of this Code and any and all documents, materials, reports, charts and tables, diagrams and specifications, and any and all other works, inventions, ideas, designs or proposals (in whatever form, and including Draft Proposals and Modification Proposals) arising out of or in connection with the central administration, operation and development of this Code, including any and all associated drafts and working papers (collectively, the "**SEC Materials**"); provided that the SEC Materials shall not include the Consumer Data or the Services IPR.

M5.2 The Parties agree that, as between the Parties, any and all Intellectual Property Rights subsisting in the SEC Materials and the whole of the title to the SEC Materials will:

(a) be owned by SECCo; and

(b) automatically and immediately vest in SECCo upon their creation or acquisition.

M5.3 Where a Party other than SECCo acquires (by operation of Laws and Directives or otherwise) any Intellectual Property Rights in the SEC Materials, then that Party:

(a) (as far as is permitted by law) hereby assigns such Intellectual Property Rights to SECCo with full title guarantee, by way of present assignment of future Intellectual Property Rights; and

(b) (to the extent such assignment is not permitted) shall (and shall procure that any of its employees, agents or contractors shall) do all acts and things and execute all documents that may be reasonably necessary to transfer such Intellectual Property Rights to SECCo with full title guarantee (and pending such assignment shall hold such rights on trust for SECCo).

M5.4 SECCo hereby grants to each of the other Parties (for so long as they remain a Party) a royalty-free, non-exclusive, non-transferable licence to use the SEC Materials for the sole purpose of participating as a Party (including exercising its rights and performing its obligations as a Party). Each licence granted to a Party under this Section M5.4 includes the right of that Party to grant sub-licences to its agents, contractors and advisers provided that they are granted solely in respect of that Party's participation as a Party (and the SEC Materials are used for no other purpose).

M5.5 SECCo hereby grants to each of the Panel Members, any Sub-Committee or Working Group members, the Code Administrator and the Secretariat (for so long as they each remain such) a royalty-free, non-exclusive, non-transferable licence to use the SEC Materials for the sole purpose of performing their roles as such. Each licence granted to a person under this Section M5.5 includes the right of that person to grant sub- licences to its agents, contractors and advisers provided that they are granted solely in respect of that person's performance of the role for which the licence was granted (and the SEC Materials are used for no other purpose).

Consumer Data

M5.6 Section M5.7 applies in respect of the Data that is obtained by the DCC (or its employees, other agents or contractors) as a result of providing Services to that User, including the Data contained in requests for Services and that is obtained as a result of communicating with Smart Metering Systems pursuant to this Code on behalf of a User (such Data being the "**Consumer Data**" of that User).

M5.7 As between the DCC and each User, any and all Intellectual Property Rights subsisting in the Consumer Data of that User shall be owned by that User (and the DCC shall make no claims in respect of such Intellectual Property Rights).

M5.8 Each User, in respect of its Consumer Data, hereby grants to the DCC a royalty-free, non-exclusive, non-transferable licence to use that Consumer Data for the sole purpose of DCC exercising its rights and performing its obligations under the Electricity Act, the Gas Act, the DCC Licence and this Code. Each licence granted to the DCC under this Section M5.8 includes the right of the DCC to grant sub-licences to its agents, contractors and advisers provided that they are granted solely in respect of the DCC's rights and obligations under the Electricity Act, the Gas Act, the DCC Licence and this Code (and the Consumer Data is used for no other purpose).

M5.9 Each User, in respect of its Consumer Data, shall ensure that the DCC (and its agents, contractors and advisers) can use that Consumer Data in the manner envisaged by Section M5.8, and shall indemnify the DCC in respect of any Liabilities suffered or incurred by the DCC (or its agents, contractors or advisers) as a result of claims brought by persons alleging that the use of that Consumer Data in the manner envisaged by Section M5.8 has infringed any Intellectual Property Rights.

Party Data

M5.10 Section M5.11 applies in respect of the Data (other than SEC Materials and Consumer Data) that is provided (or otherwise made available) pursuant to this Code to the Panel (or its Sub-Committees and/or Working Groups, including via the Code Administrator, the Secretariat or SECCo) by or on behalf of a Party (such Data being the "**Party Data**" of that Party).

M5.11 As between the Panel (including its Sub-Committees and/or Working Groups, the Code Administrator, the Secretariat and SECCo) and each Party, any and all Intellectual Property Rights subsisting in the Party Data of that Party shall be owned by that Party (and none of the Panel, its Sub-Committees, its Working Groups, the Code Administrator, the Secretariat or SECCo shall make any claims in respect of such Intellectual Property Rights).

M5.12 Without prejudice to Section M4.10 (Confidentiality and the Panel), each Party, in respect of its Party Data, hereby grants to SECCo, the Panel Members, any Sub- Committee or Working Group members, the Code Administrator and the Secretariat a royalty-free, non-exclusive, non-transferable licence to use that Party Data for the sole purpose of performing their roles as such. Each licence granted to a person under this Section M5.12 includes the right of that person to grant sub-licences to its agents, contractors and advisers provided that they are granted solely in respect of that person's performance of the role for which the licence was granted (and the Party Data is used for no other purpose).

M5.13 Without prejudice to Section M4.10, each Party, in respect of its Party Data, shall ensure that SECCo, the Panel Members, any Sub-Committee or Working Group members, the Code Administrator and the Secretariat (and their agents, contractors and advisers) can use that Party Data in the manner envisaged by Section M5.12, and shall indemnify the SECCo, the Panel Members, any Sub-Committee or Working Group members, the Code Administrator and the Secretariat in respect of any Liabilities suffered or incurred by them (or their agents, contractors or advisers) as a result of claims brought by persons alleging that the use of that Party Data in the manner envisaged by Section M5.12 has infringed any Intellectual Property Rights.

Services IPR

M5.14 Section M5.15 applies in respect of the Intellectual Property Rights created by, arising from or that are associated with:

(a) the activities undertaken by the DCC for the purposes of carrying on its Authorised Business (as defined in the DCC Licence) in accordance with the DCC Licence; or

(b) the operation of a DCC Service Provider Contract in accordance with its provisions,

such Intellectual Property Rights being the "**Services IPR**".

M5.15 As between the DCC and each User, the Services IPR shall be owned by the DCC (and no User shall make any claims in respect of the Services IPR).

M5.16 The DCC hereby grants to each User a royalty-free, non-exclusive, non-transferable licence to use the Services IPR for the sole purpose of receiving (and to the extent necessary to receive) the Services. Each licence granted by the DCC under this Section M5.16 includes the right of the User to grant sub-licences to its agents, and contractors provided that they are granted solely for the purpose of the User receiving (and to the extent necessary for the User to receive) the Services (and that the Services IPR is used for no other purpose).

M5.17 The DCC shall ensure that each User (and its agents and contractors) can use the Services IPR in the manner envisaged by Section M5.16, and shall indemnify each User in respect of any Liabilities suffered or incurred by that User (or its agents or contractors) as a result of claims brought by persons alleging that the use of that Services IPR in the manner envisaged by Section M5.16 has infringed any Intellectual Property Rights.

General

M5.18 For the avoidance of doubt, the use by a Party of Intellectual Property Rights licensed to it under this Section M5 otherwise than in accordance with such licence shall constitute a breach of this Code.

M5.19 The Parties agree that damages may not be an adequate remedy in the event of breach of this Section M5, and that a Party may seek injunctive relief in respect of any breach or potential breach of this Section M5.

SECCo

M5.20 The provisions of this Section M5 (and the definitions used in this Section) shall apply to SECCo as if SECCo was a Party.

M6. PARTY DETAILS

Provision of the Party Details

M6.1 Each Party's original Party Details shall be provided as part of its Framework Agreement counterpart or its Accession Agreement (as applicable).

Amendments to Party Details

M6.2 Each Party may amend its Party Details by notice to the Secretariat from time to time, and each Party shall ensure that its Party Details remain up-to-date.

Publication

M6.3 The Secretariat shall maintain a record of each Party's Party Details, and shall publish that record on the Website (other than those elements of the Party Details that are identified in Schedule 5 as being confidential).

M6.4 As soon as reasonably practicable after each person becomes a Party, or following notification of an amendment to a Party's Party Details in accordance with Section M6.2, the Secretariat shall update the record referred to in Section M6.3.

M6.5 The Secretariat shall take reasonable steps to identify any errors or omissions in each Party's Party Details, and shall notify the relevant Party of any such errors or omissions.

M7. DISPUTE RESOLUTION

Duty to Seek to Resolve

M7.1 Where a Dispute arises between two or more Parties, each such Party shall seek to resolve the Dispute amicably within a reasonable timescale through negotiation in good faith.

Reference to the Authority

M7.2 Any Dispute of a nature that is expressly stated in this Code or in the Electricity Act or the Gas Act or in the Energy Licences to be subject to determination by the Authority shall be subject to determination by the Authority (which shall be final and binding for the purposes of this Code). For the purposes of Condition 20.3(c) of the DCC Licence, disputes of the nature referred to in Condition 20 of the DCC Licence in respect of the following Other Enabling Services shall be subject to determination by the Authority pursuant to that condition:

(a) requests by TCH Participants for Test Communications Hubs pursuant to Section F10 Test Communications Hubs);

(b) requests by Parties for Detailed Evaluations pursuant to Section H7.7 (Detailed Evaluations of Elective Communication Services);

(c) requests by Parties for the provision of further assistance in respect of the Parse and Correlate Software pursuant to Section H11.12 (Provision of Support and Assistance to Users);

(d) requests by Testing Participants for the provision of a connection to a simulation of the SM WAN for the purposes of testing pursuant to Section H14.31 (Device and User System Tests);

(e) requests by Testing Participants for the provision of additional testing support pursuant to Section H14.33 (Device and User System Tests); and

(f) requests by Parties for DCC Gateway Connections pursuant to Section H15 (DCC Gateway Connections).

Reference to the Panel or its Sub-Committees

M7.3 Any Dispute of a nature that is expressly stated in this Code or a Bilateral Agreement to be subject to determination by the Panel (or one of its Sub-Committees) shall be subject to determination by the Panel (or that Sub-Committee). The Panel shall ensure that any such Dispute is determined within a reasonable period of time after its referral to the Panel (or its Sub-Committee).

M7.4 Unless such determination by the Panel (or one of its Sub-Committees) is expressly stated in this Code or a Bilateral Agreement to be final and binding, such disputes shall (following the Panel's or Sub-Committee's determination) be subject to final determination by the Authority (where this is expressly stated to be the case) or as referred to in Section M7.5.

Arbitration

M7.5 Subject to Sections M7.2, M7.3 and M7.4, any Dispute shall be subject to determination by arbitration in accordance with Section M7.6 (subject to Section M7.13).

M7.6 Where this Section M7.6 applies:

(a) the Party seeking to initiate the arbitration shall give a written notice to the other Party or Parties involved in the Dispute, stating that the matter is to be referred to arbitration and setting out a brief summary of the Dispute;

(b) the Party seeking to initiate the arbitration shall send a copy of that notice to the Panel;

(c) to the extent consistent with this Section M7.6, the arbitration shall be subject to the Arbitration Act 1996 and the rules of the London Court of International Arbitration (the LCIA);

(d) the arbitrator shall be a person appointed by agreement between the Parties involved in the Dispute, or (in the absence of agreement within 10 Working Days following the notice under Section M7.6(a)) appointed by the LCIA;

(e) (unless otherwise agreed by the Parties involved in the Dispute) the arbitration proceedings shall take place in London and in the English language;

(f) the Parties involved in the Dispute agree to keep the arbitration process (and the decision or anything said, done or produced in or in relation to the arbitration process) confidential, except as may be required by Laws and Directives and provided that representatives of the Panel may attend the arbitration and receive a copy of the decision;

(g) the Panel shall treat the decision and all other information relating to the arbitration as confidential, and Section M4.10 (Confidentiality and the Panel) shall apply to the decision and such information;

(h) the arbitrator shall have the power to make provisional awards as provided for in Section 39 of the Arbitration Act 1996; and

(i) subject to any contrary award by the arbitrator, each Party involved in the Dispute shall bear its own costs in relation to the arbitration and an equal share of the fees and expenses of the arbitrator.

M7.7 The decision of the arbitrator pursuant to a reference in accordance with Section M7.6 shall be final and binding on each of the Parties to the arbitration, except where there is a serious irregularity (as defined in section 68(2) of the Arbitration Act 1996) or a Party successfully appeals the arbitral award on a point of law in accordance with section 69 of the Arbitration Act 1996. Each Party shall comply with such decision provided that (for the avoidance of doubt) the arbitrator shall not have the power to modify this Code.

DCC Service Provider Disputes

M7.8 If any Dispute that is subject to determination by arbitration involves the DCC, and the DCC considers that the Dispute relates to a dispute it has under or in relation to one or more of the DCC Service Provider Contracts, then the DCC may join the relevant DCC Service Provider or DCC Service Providers to the arbitration, so that the arbitrator hears and determines the disputes under or in relation to the DCC Service Provider Contracts simultaneously with the Dispute. The Parties other than the DCC hereby consent to such joining of disputes.

M7.9 Where the DCC is aware of any dispute arising under or in relation to one or more DCC Service Provider Contracts that may reasonably relate to a Dispute or potential Dispute that would be subject to arbitration, then the DCC may give notice of that dispute to the Panel and to any or all of the other Parties.

M7.10 Where the DCC gives notice to a Party under Section M7.9, such notice shall only be valid if the DCC gives reasonable detail of such dispute and expressly refers to the waiver that may potentially be given by that Party under Section M7.12.

M7.11 Within 30 Working Days after the DCC has given a valid notification to a Party under Section M7.9 in respect of a dispute under or in relation to a DCC Service Provider Contract, that Party should give notice to the DCC of any Dispute that that Party wishes to bring in relation to that dispute. Where that Dispute is to be resolved by arbitration, the DCC may then exercise its rights under Section M7.8.

M7.12 Where the DCC gives notice to a Party in accordance with Section M7.9, and where that Party does not give notice to the DCC in accordance with Section M7.11, then that Party shall be deemed to have waived any right it may have to bring a claim against the DCC in respect of the subject matter of the dispute in question (and shall, notwithstanding Section M2 (Limitations of Liability), indemnify the DCC in full against any Liabilities incurred by the DCC as a consequence of that Party bringing any such claim).

Claims by Third Parties

M7.13 Subject to Section M7.14, if any person who is not a Party to this Code brings any legal proceedings in any court against any Party and that Party considers such legal proceedings to raise or involve issues that are or would be the subject matter of a Dispute or potential Dispute that would (but for this Section M7.13) be subject to arbitration, then (in lieu of arbitration) the court in which the legal proceedings have been commenced shall hear and determine the legal proceedings and the Dispute between such person and the Parties.

M7.14 If any person who is not a Party to this Code brings any legal proceedings in any court against any Party and that Party considers such legal proceedings to raise or involve issues that are the subject matter of a Dispute that is already subject to an ongoing arbitration, then Section M7.13 shall only apply where the arbitrator in that arbitration determines that such legal proceedings raise or involve issues that are the subject matter of the Dispute.

Injunctive Relief

M7.15 Nothing in this Section M7 shall prevent a Party seeking interim or interlocutory remedies in any court in relation to any breach of this Code.

SECCo

M7.16 The provisions of this Section M7 (and the definitions used in this Section) shall apply to SECCo as if SECCo was a Party.

M8. SUSPENSION, EXPULSION AND WITHDRAWAL

Events of Default

M8.1 An "**Event of Default**" shall have occurred in respect of any Party other than the DCC (the "**Defaulting Party**") if one or more of the following occurs in respect of the Defaulting Party:

(a) the Defaulting Party has committed a material breach of Section I1.2 (User Obligations);

(b) the Defaulting Party has failed in a material respect to comply with an enforcement notice served by the Information Commissioner pursuant to the Data Protection Legislation, whether such failure has been notified to the Panel by the Information Commissioner or the Panel has otherwise become aware of such failure;

(c) the DCC has served a notice on the Defaulting Party in accordance with Section J2.1 (Notification of Payment Failure) in respect of Charges payable by the Defaulting Party, and such Charges have not been paid within three (3) Working Days following that notice;

(d) the DCC has issued a notice to the Defaulting Party in accordance with Section J3.14 (Breach of Credit Cover Obligations) in respect of Credit Support required to be procured by the Defaulting Party, and such Credit Support has not been provided within three (3) Working Days following that notice;

(e) the Defaulting Party has not paid any amount other than in respect of the Charges (failures in respect of which are subject to Section M8.1(c)) which the Defaulting Party is due to have paid under this Code, and does not remedy such failure within five (5) Working Days after a notice requiring it to do so (which notice must refer to this Section M8);

(f) the Defaulting Party has made a material misrepresentation in its Application Form;

(g) the Defaulting Party is in material breach of any of its material obligations under this Code and/or any Bilateral Agreement (other than those that are subject to another paragraph of this Section M8.1) and the Defaulting Party has failed to remedy the breach (or to desist from the breach and mitigate its effects insofar as it is reasonably practicable to do so) within 20 Working Days after a notice requiring it to do so (which notice must describe the breach in reasonable detail and refer to this Section M8); and/or

(h) the Defaulting Party suffers an Insolvency Type Event.

Notification of an Event of Default

M8.2 Where the DCC or the Code Administrator or the Secretariat becomes aware that an Event of Default has occurred in respect of a Party, then the DCC or the Code Administrator or the Secretariat (as applicable) shall notify the Panel of such occurrence. Where any Party other than the DCC becomes aware that an Event of Default has occurred in respect of another Party, the Party that has become so aware may notify the Panel of such occurrence.

Investigation of an Event of Default

M8.3 Where the Panel has reason to believe that an Event of Default may have occurred in respect of a Party, then the Panel may investigate the circumstances relating to such potential Event of Default. Each Party shall provide all reasonable Data and cooperation as the Panel may reasonably request in respect of any such investigation.

Consequences of an Event of Default

M8.4 Where an Event of Default occurs in respect of a Defaulting Party and while that Event of Default is continuing, the Panel may take one or more of the following steps (in each case to the extent and at such time as the Panel sees fit, having regard to all the circumstances of the Event of Default and any representations made by any Competent Authority or any Party, provided that the Panel must always take the steps referred to in Section M8.4(a) and (b)):

(a) notify the Authority that such Event of Default has occurred in respect of the Defaulting Party;

(b) notify the Defaulting Party that such Event of Default has occurred in respect of it;

(c) notify each other Party that such Event of Default has occurred in respect of the Defaulting Party;

(d) require the Defaulting Party to give effect to a reasonable remedial action plan designed to remedy and/or mitigate the effects of the Event of Default within a reasonable timescale (a material breach of which plan shall in itself constitute an Event of Default);

(e) suspend one or more of the Defaulting Party's rights referred to in Section M8.5 (following such prior consultation with the Defaulting Party as the Panel considers appropriate);

(f) instruct the DCC to suspend (in which case the DCC shall, within one Working Day thereafter, suspend) one or more of the Defaulting Party's rights referred to in Section M8.6 (following such prior consultation with the Defaulting Party as the Panel considers appropriate); and/or

(g) expel the Defaulting Party from this Code subject to and in accordance with Section M8.10.

Suspension of Rights

M8.5 The rights referred to in Section M8.4(e) are:

(a) the right of the Defaulting Party (and each other member of its Voting Group) to vote in Panel Member elections under Section C4 (Panel Elections);

(b) the right of the Defaulting Party to raise new Draft Proposals under Section D (Modifications); and

(c) the right of the Defaulting Party to influence the appointment of a Change Board Member, so that:

(i) in the case of a Supplier Party, the Change Board Member appointed by the Voting Group of which that Supplier Party forms part shall be suspended; or

(ii) in the case of any Party other than a Supplier Party, the Secretariat shall ignore the views of that Party when considering any request to appoint or remove a Change Board Member appointed by the Party Category of which that Party forms part.

M8.6 The rights referred to in Section M8.4(f) are:

(a) the right of the Defaulting Party to receive Core Communication Services or Local Command Services in the ‘Other User’ User Role;

(b) (subject to the Authority's approval) the right of the Defaulting Party to receive Core Communication Services or Local Command Services in any User Role other than the 'Other User' User Role;

(c) (subject to the Authority’s approval) the right of the Defaulting Party to receive any or all Elective Communication Services;

(d) (subject to the Authority’s approval) the right of the Defaulting Party to initiate Enrolment of Smart Metering Systems; and

(e) (subject to the Authority’s approval) the right of the Defaulting Party to request or receive any or all Services other than those referred to elsewhere in this Section M8.6.

M8.7 The suspension of any or all of the Defaulting Party’s rights referred to in Section M8.5 or M8.6 shall be without prejudice to the Defaulting Party’s obligations and Liabilities under and in relation to this Code (whether accruing prior to, during, or after such suspension). Without prejudice to the generality of the foregoing, the Defaulting Party shall continue to be liable for all Charges that it is or becomes liable to pay under this Code.

M8.8 Where the Panel has, pursuant to Section M8.4(e) and/or (f), suspended a Party’s rights, then the Panel may at any time thereafter end such suspension (provided that, in the case of rights that the Panel cannot suspend without the Authority’s approval, the Panel may not end such suspension without the Authority’s approval).

Ceasing to be a Party

M8.9 A Party that holds an Energy Licence that requires that Party to be a party to this Code:

(a) cannot be expelled from this Code by the Panel unless the Authority has approved such expulsion (and, in the case of any such approval, Section M8.10(a) shall apply as if the Party did not hold an Energy Licence that requires it to be a party to this Code); and

(b) cannot voluntarily cease to be a Party while that Energy Licence remains in force.

M8.10 A Party that does not hold an Energy Licence that requires that Party to be a party to this Code:

(a) may (while an Event of Default is continuing in respect of that Party) be expelled from this Code with effect from such time on such date as the Panel may resolve (where the Panel considers it reasonable to do so in the circumstances); and

(b) may give notice to the Panel of that Party's intention to voluntarily cease to be a Party and of the time on the date from which it wishes to cease to be a Party. The Panel shall, following receipt of such a notice, resolve that that Party shall cease to be a Party with effect from the time on the date notified.

M8.11 The Panel shall notify the Authority and each remaining Party in the event that any person is expelled from this Code or voluntarily ceases to be a Party.

Appeal to the Authority

M8.12 Where the Panel resolves to suspend the rights of a Party and/or to expel a Party pursuant to this Section M, then that Party may at any subsequent time apply to the Authority to have such suspension lifted or to be reinstated as a Party. The Parties and the Panel shall give effect to any decision of the Authority pursuant to such application, which shall be final and binding for the purposes of this Code.

Consequences of Ceasing to be a Party

M8.13 Where the Panel makes a resolution in respect of a Party in accordance with Section M8.10, then with effect from the time on the date at which such resolutions are effective:

(a) that Party's accession to this Code shall be terminated, and it shall cease to be a Party; and

(b) subject to Section M8.14, that Party shall cease to have any rights or obligations under this Code or any Bilateral Agreement.

M8.14 The termination of a Party's accession to this Code shall be without prejudice to:

(a) those rights and obligations under this Code and/or any Bilateral Agreement that may have accrued prior to such termination; or

(b) those provisions of this Code or any Bilateral Agreement that are expressly or by implication intended to survive such termination, including Sections A (Definitions and Interpretation), J (Charges), L16 (Supplier of Last Resort), M2 (Limitations of Liability), M5 (Intellectual Property Rights), M7 (Dispute Resolution), M10 (Notices), and M11 (Miscellaneous).

M9. TRANSFER OF DCC LICENCE

Introduction

M9.1 This Section M9 is included in accordance with Condition 22 of the DCC Licence, and provides for the transfer of (amongst other things) the DCC's interest in this Code to a Successor Licensee.

Application and Interpretation of this Section M9

M9.2 This Section M9 shall only apply where two persons hold a DCC Licence at the same time. In such circumstances:

(a) "Transfer Date" has the meaning given to that expression in Condition 43 of the earlier of the two DCC Licences;

(b) until the Transfer Date, the holder of the earlier DCC Licence shall be "the DCC" for the purposes of this Code, and the holder of the later DCC Licence shall be "the Successor Licensee"; and

(c) from the Transfer Date, all references in this Code to "the DCC" shall be references to the holder of the later DCC Licence.

Novation Agreement

M9.3 Where this Section M9 applies, the DCC and the Successor Licensee shall each enter into a novation agreement in a form approved by the Authority.

M9.4 Such novation agreement will, with effect from the Transfer Date, novate to the Successor Licensee all rights and obligations of the DCC under the agreements referred to in Section M9.5 (including all rights obligations and liabilities of the DCC that may have accrued in respect of the period prior to the Transfer Date).

M9.5 Such novation agreement shall be in respect of the following agreements:

(a) the Framework Agreement;

(b) all Accession Agreements; and

(c) all Bilateral Agreements.

M9.6 The DCC shall enter into such novation agreement in (to the extent applicable) its own right, and also (to the extent applicable) on behalf of the Parties (which shall include SECCo) that are counterparties to the agreements referred to in Section M9.5.

DCC Authority to enter into Accession Agreements

M9.7 Each Party (which shall include SECCo) hereby irrevocably and unconditionally authorises the DCC to execute and deliver, on behalf of such Party, a novation agreement as envisaged by this Section M9.

Co-operation

M9.8 Each Party shall do all such things as the Panel may reasonably request in relation to the novation of the agreements referred to in Section M9.5 from the DCC to the Successor DCC.

M10. NOTICES

Communication via Specified Interfaces

M10.1 This Code requires certain communications to be sent via certain specified means, including as described in:

(a) Section E2 (Provision of Registration Data);

(b) Section H3 (DCC User Interface);

(c) Section H8 (Service Management, Self-Service Interface and Service Desk); and

(d) Section L4 (The SMKI Service Interface) and L5 (The SMKI Repository Interface).

Other Notices

M10.2 Save as referred to in Section M10.1, any notice or other communication to be made by one Party to another Party under or in connection with this Code or any Bilateral Agreement shall be in writing and shall be:

(a) delivered personally or by courier;

(b) sent by first class prepaid post; or

(c) sent by fax or email.

M10.3 All notices and communications as described in Section M10.2 shall be sent to the physical address, fax number or email address specified for such purpose in the relevant Party's Party Details. Where no fax or email address is specified for a particular type of notice or communication, notice may not be given in that manner.

M10.4 Subject to Section M10.5, all notices and communications as described in Section M10.2 shall be deemed to be received by the recipient:

(a) if delivered personally or by courier, when left at the address set out for such purpose in the relevant Party's Party Details;

(b) if sent by first class prepaid post, two Working Days after the date of posting;

(c) if sent by fax, upon production by the sender's equipment of a transmission report indicating that the fax was sent to the fax number of the recipient in full without error; and

(d) if sent by email, one hour after being sent, unless an error message is received by the sender in respect of that email before that hour has elapsed.

M10.5 Any notice that would otherwise be deemed to be received on a day that is not a Working Day, or after 17.30 hours on a Working Day, shall be deemed to have been received at 9.00 hours on the next following Working Day.

The Panel, Code Administrator, Secretariat and SECCo

M10.6 Notices between a Party and any of the Panel, the Code Administrator, the Secretariat or SECCo shall also be subject to this Section M. Notices to any of the Panel, the Code Administrator, the Secretariat or SECCo shall be sent to the relevant address given for such purpose, from time to time, on the Website (or, in the absence of any such address, to SECCo's registered office).

Process Agent

M10.7 Any Party (being a natural person) who is not resident in Great Britain or (not being a natural person) which is not incorporated in Great Britain shall, as part of its Party Details, provide an address in Great Britain for service of process on its behalf in any proceedings under or in relation to this Code and/or any Bilateral Agreement. Where any such Party fails at any time to provide such address, such Party shall be deemed to have appointed SECCo as its agent to accept such service of process on its behalf.

M11. MISCELLANEOUS

Entire Code

M11.1 This Code and any document referred to herein represents the entirety of the contractual arrangements between the Parties in relation to the subject matter of this Code. This Code and any document referred to herein supersedes any previous contract between any of the Parties with respect to the subject matter of this Code.

M11.2 Each Party confirms that, except as provided in this Code and without prejudice to any claim for fraudulent misrepresentation, it has not relied on any representation, warranty or undertaking which is not contained in this Code or any document referred to herein.

Severability

M11.3 If any provision of this Code shall be held to be invalid or unenforceable by a judgement or decision of any Competent Authority, that provision shall be deemed severable and the remainder of this Code shall remain valid and enforceable to the fullest extent permitted by law.

Waivers

M11.4 The failure by any Party to exercise, or the delay by any Party in exercising, any right, power, privilege or remedy provided under this Code or by law shall not constitute a waiver thereof nor of any other right, power, privilege or remedy. No single or partial exercise of any such right, power, privilege or remedy shall preclude any future exercise thereof or the exercise of any other right, power, privilege or remedy.

Third Party Rights

M11.5 The following persons shall be entitled to enforce the following rights in accordance with the Contracts (Rights of Third Parties) Act 1999:

(a) the person referred to in Sections C3.12 (Protections for Panel Members and Others) and M2.13(a) (Other Matters) shall be entitled to enforce the respective rights referred to in those Sections;

(b) the Approved Finance Party for each Communications Hub Finance Facility shall be entitled to exercise and/or enforce the following rights of the DCC in respect of the Communications Hub Finance Charges relating to that facility where a Communications Hub Finance Acceleration Event has occurred in respect of that Communications Hub Finance Facility and the Authority has determined that the DCC is unwilling or unable to do so:

(i) the right to calculate the amount of the Communications Hub Finance Charges arising as a result of that event (provided in such circumstances that the Approved Finance Party must demonstrate to the satisfaction of the Authority that the amount of the charges so calculated will in aggregate be no more than the amount contractually due and payable (but unpaid) by the DCC to the Approved Finance Party in respect of that event);

(ii) the right to invoice the Users in respect of the Communications Hub Finance Charges arising as a result of the Communications Hub Finance Acceleration Event (whether in the amount calculated by the DCC in accordance with this Code, or in the amount calculated by the Approved Finance Party and approved by the Authority under Section M11.5(b)); and/or

(iii) the right to enforce payment by the Users in accordance with this Code of the amount of Communications Hub Finance Charges invoiced in accordance with this Code,

and the payment of any amount by a User to an Approved Finance Party pursuant to this Section M11.5(b) shall satisfy that User's obligation to pay that amount to the DCC; and

(c) the Approved Finance Party for each 4G DBT Finance Facility shall be entitled to exercise and/or enforce the following rights of the DCC in respect of the 4G DBT Finance Charges relating to that facility where a 4G DBT Finance Acceleration Event has occurred in respect of that 4G DBT Finance Facility and the Authority has determined that the DCC is unwilling or unable to do so:

(i) the right to calculate the amount of the 4G DBT Finance Charges arising as a result of that event (provided in such circumstances that the Approved Finance Party must demonstrate to the satisfaction of the Authority that the amount of the charges so calculated will in aggregate be no more than the amount contractually due and payable (but unpaid) by the DCC to the Approved Finance Party in respect of that event);

(ii) the right to invoice the Users in respect of the 4G DBT Finance Charges arising as a result of the 4G DBT Finance Acceleration Event (whether in the amount calculated by the DCC in accordance with this Code, or in the amount calculated by the Approved Finance Party and approved by the Authority under Section M11.5(c)); and/or

(iii) the right to enforce payment by the Users in accordance with this Code of the amount of 4G DBT Finance Charges invoiced in accordance with this Code,

and the payment of any amount by a User to an Approved Finance Party pursuant to this Section M11.5(c) shall satisfy that User's obligation to pay that amount to the DCC; and

(d) AltHANCo (as defined in Section Z (Alt HAN Arrangements)) shall be entitled to enforce all rights which are conferred upon it under Section Z4 (Alt HAN Costs and Budgets), and shall (notwithstanding Section M11.8) be entitled to assign the benefit of these rights.

M11.6 Subject to Section M11.5, the Parties do not intend that any of the terms or conditions of this Code will be enforceable by a third party (whether by virtue of the Contracts (Rights of Third Parties) Act 1999 or otherwise).

M11.7 Notwithstanding that a person who is not a Party has the right to exercise and/or enforce particular rights in accordance with Section M11.5, the Parties may vary or terminate this Code in accordance with its terms without requiring the consent of any such person.

Assignment and Sub-contracting

M11.8 Without prejudice to a Party's right to appoint agents to exercise that Party's rights, no Party may assign any of its rights under this Code without the prior written consent of the other Parties.

M11.9 Any Party may sub-contract or delegate the performance of any or all of its obligations under this Code to any appropriately qualified and experienced third party, but such Party shall at all times remain liable for the performance of such obligations (and for the acts and omissions of such third party, as if they were the Party's own). It is expressly acknowledged that the DCC has sub-contracted a number of its obligations under this Code to the DCC Service Providers.

Agency

M11.10 Nothing in this Code shall create, or be deemed to create, a partnership or joint venture or relationship of employer and employee or principal and agent between the Parties and no employee of one Party shall be deemed to be or have become an employee of another Party.

M11.11 No Party shall:

(a) pledge the credit of another Party;

(b) represent itself as being another Party, or an agent, partner, employee or representative of another Party; or

(c) hold itself out as having any power or authority to incur any obligation of any nature, express or implied, on behalf of another Party.

Derogations

M11.12 A Party that holds an Energy Licence shall not be obliged to comply with its obligations under this Code to the extent to which such Party has the benefit of a derogation from the obligation to do so granted by the Authority under such Energy Licence.

Law and Jurisdiction

M11.13 This Code and any dispute or claim arising out of or in connection with it (including non-contractual claims) shall be governed by, and construed in accordance with, the laws of England and Wales.

M11.14 In relation to any dispute or claim arising out of or in connection with this Code (including in respect of non-contractual claims), each Party (subject to Section M7 (Dispute Resolution)) irrevocably agrees to submit to the exclusive jurisdiction of the courts of England and Wales and of Scotland. For the avoidance of doubt, the foregoing shall not limit a Party's right to enforce a judgment or order in any other jurisdiction.

SECCo

M11.15 The provisions of this Section M11 (and the definitions used in this Section) shall apply to SECCo as if SECCo was a Party.

N SMETS1 METERS

N1. DEFINITIONS FOR THIS SECTION N

N1.1 In this Section N, unless the context otherwise requires, the expressions in the left-hand column below shall have the meanings given to them in the right-hand column below:

Adoption means, in respect of a Communications Contract, to novate (with or without amendment) some or all of the Supplier Party's rights and obligations under the contract (to the extent arising after the date of novation) to the DCC; and "**Adopt**", "**Adopting**" and "**Adopted**" shall be interpreted accordingly.

Adoption Criteria means the non-exhaustive criteria (including those set out in Section N3.7) against which the DCC will analyse and report upon the feasibility and cost of Adopting a Communications Contract in order to facilitate the provision by the DCC of the Minimum SMETS1 Services in respect of the Eligible Meters that are the subject of that contract.

Communications Contract means, in respect of an Energy Meter, the contract or contracts (or the relevant parts thereof) pursuant to which the Supplier Party has (or, will following installation, have) the right to receive communication services in respect of that Energy Meter.

Eligible Meter means, in respect of each Supplier Party, an Energy Meter which is:
(a) either a SMETS1 Meter or subject to an upgrade plan which will result in it being a SMETS1 Meter prior to its Enrolment; and
(b) installed at premises (or planned to be installed at premises) for which that Supplier Party is an energy supplier.

Enrolment means, in respect of a SMETS1 Meter, the establishment by the DCC of communications with the SMETS1 Meter such that the DCC can (on an ongoing basis) provide the SMETS1 Services in respect of the SMETS1 Meter (and the words "**Enrol**" and "**Enrolled**" will be interpreted accordingly).

Initial Enrolment means the Enrolment of some or all of the Eligible Meters which were included within the scope of the Initial Enrolment Project Feasibility Report or within the scope of any additional analysis pursuant to Section N4A (Further Initial Enrolment Analysis).

Initial Enrolment Code Amendments has the meaning given to that expression in Section N3.1 (Overview of Initial Enrolment).

Initial Enrolment Project Feasibility Report has the meaning given to that expression in Section N3.1 (Overview of Initial Enrolment).

Minimum SMETS1 Services means those communication services described in Appendix F (Minimum Communication Services for SMETS1 Meters).

SMETS1 Meter means:

a. an Electricity Meter that has (as a minimum) the functional capability specified by and complies with the other requirements of a Version of the ESMETS with a Principal Version number of 1 (but not a Version of the ESMETS with a Principal Version number of greater than 1); or

b. a Gas Meter that has (as a minimum) the functional capability specified by and complies with the other requirements of a Version of the GSMETS with a Principal Version number of 1 (but not a Version of the GSMETS with a Principal Version number of greater than 1).

SMETS1 Services means those communication services described in Section N2.2 (SMETS1 Services).

N1.2 To the extent that Section A1.1 (Definitions) contains the same defined expressions as are set out in Section N1.1, the defined expressions in Section A1.1 shall not apply to this Section N.

N1.3 The expressions used in this Section N that are to have the meanings given in Section A1.1 (Definitions) and which have a meaning which relates directly or indirectly to the provision of Services in connection with Smart Metering Systems shall be interpreted by reference to the purposes of this Section N (including the purpose of establishing the feasibility, cost and means of providing the SMETS1 Services in connection with the SMETS1 Meters).

N2. SMETS1 ENROLMENT PROJECTS GENERALLY

Overview

N2.1 This Section N2 sets out certain matters which will apply to all projects to Enrol SMETS1 Meters, regardless of whether this is pursuant to the Initial Enrolment Code Amendments or any subsequent Modification Proposal.

SMETS1 Services

N2.2 The communication services to be provided in respect of particular SMETS1 Meters (the "**SMETS1 Services**") shall:

(a) be set out in the amendments to this Code (or where any such amendments have been proposed but not yet made, in such proposed amendments to this Code) pursuant to which those SMETS1 Meters become eligible for Enrolment; or

(b) prior to any such amendments being proposed, be determined in accordance with the Secretary of State's directions from time to time under Section N4A (Further Initial Enrolment Analysis).

N2.3 Not used

N2.4 Not used

N2.5 Not used

N2.6 Not used

N2.7 Not used

Testing

N2.8 Before Enrolling one or more SMETS1 Meters of a particular type, the DCC shall ensure that it has tested the DCC Systems and its processes to demonstrate that it is capable of discharging its obligations and exercising its rights under this Code (as amended pursuant to the Initial Enrolment Code Amendments or any subsequent Modification Proposal) in respect of that type of SMETS1 Meter.

N2.9 In discharging its obligations under Section N2.8, the DCC must prepare and follow an approach to testing that is (to the extent that it is appropriate to do so given the purpose for which the testing is being undertaken) consistent with the approach to testing set out in Section T (Testing During Transition). Where Section T has ceased to apply, this Section N2.9 shall be taken to refer to the provisions of Section T that applied immediately before it ceased to apply.

Security

N2.10 In producing the Initial Enrolment Project Feasibility Report or analysing and reporting on any subsequent Modification Proposal relating to the Enrolment of SMETS1 Meters, the DCC shall:

(a) prepare a risk assessment detailing the security risks associated with operating and using the SMETS1 Services;

(b) detail the measures (including Systems) proposed in order to ensure that the level of security risk to the DCC Total System, Enrolled Smart Metering Systems and/or User Systems will not be materially increased as a consequence of the provision of the SMETS1 Services; and

(c) prepare a risk treatment plan outlining the residual risks which exist once the measures referred to above have been taken.

N2.11 For the purposes of Section N2.10, the expressions Enrolled Smart Metering Systems, DCC Total System, and User Systems shall, when assessing the security risks that will apply as a consequence of the provision of the SMETS1 Services in respect of SMETS1 Meters, be interpreted so as to also include (respectively) those SMETS1 Meters and all additional Systems of the DCC and Users that would be used in relation to those SMETS1 Services.

In discharging its obligations under Section N2.10, the DCC shall consult with the Security Sub-Committee, and shall document the extent to which the views of the Security Sub-Committee have been taken into account.

N3. INITIAL ENROLMENT

Overview of Initial Enrolment

N3.1 This Section N3 together with Sections N4, N4A and N5 sets out the process by which the DCC will:

(a) analyse, evaluate and report (the “**Initial Enrolment Project Feasibility Report**”) to the Secretary of State regarding the feasibility and cost of the options for Initial Enrolment;

(b) undertake further analysis and evaluation as directed by the Secretary of State under Section N4A (Further Initial Enrolment Analysis); and

(c) prepare one or more sets of proposed amendments to this Code (the "**Initial Enrolment Code Amendments**") designed to deliver Initial Enrolment.

N3.2 The DCC shall comply with the Secretary of State’s directions from time to time regarding:

(a) the scope of the Initial Enrolment Project Feasibility Report;

(b) the scope and number of the Initial Enrolment Code Amendments to be prepared; and

(c) the timing and process to be followed by the DCC in relation to the production of the Initial Enrolment Project Feasibility Report and the Initial Enrolment Code Amendments.

DCC’s Invitation

N3.3 Where, and by such date as, the Secretary of State may direct for the purposes of this Section N3.3, the DCC shall send an invitation to each Supplier Party seeking details of the Energy Meters of that Supplier Party which the Supplier Party wishes to be included within the scope of the Initial Enrolment Project Feasibility Report.

N3.4 Each Supplier Party undertakes that it shall not propose Energy Meters to be included within the scope of the Initial Enrolment Project Feasibility Report unless those Energy Meters are Eligible Meters, and shall confirm to the DCC that the Energy Meters that it proposes are Eligible Meters. The DCC shall not be obliged to determine whether the Energy Meters proposed by each Supplier Party are Eligible Meters, and shall rely upon the confirmation provided by each Supplier Party.

N3.5 The DCC shall provide a copy of its invitation pursuant to Section N3.3 to the Secretary of State, the Authority and the Panel, and shall arrange for its publication on the DCC Website.

N3.6 The DCC’s invitation pursuant to Section N3.3 shall specify:

(a) the reasonable date by which Supplier Parties must respond in order for their Energy Meters to be included within the scope of the Initial Enrolment Project Feasibility Report;

(b) the reasonable format in which Supplier Parties must respond in order for their Energy Meters to be included within the scope of the Initial Enrolment Project Feasibility Report;

(c) any reasonable information which Supplier Parties must provide in order for their Energy Meters to be included within the scope of the Initial Enrolment Project Feasibility Report (which will include such details as the DCC shall specify regarding the Communications Contracts relating to those Energy Meters); and

(d) the Adoption Criteria.

N3.7 The Adoption Criteria specified by the DCC must include reference to Communications Contract provisions relating to the following concepts:

(a) novation;

(b) termination;

(c) liability;

(d) exclusivity and restrictions on competing activities;

(e) data ownership and security;

(f) confidentiality; and

(g) disaster recovery, business continuity and incident management.

N3.8 The DCC must respond in a timely manner to reasonable clarification requests from Supplier Parties regarding the DCC's invitation pursuant to Section N3.3, and any further information requests made by the DCC pursuant to this Section N3.

Suppliers' Response

N3.9 No Supplier Party is obliged to propose Energy Meters to be included within the scope of the Initial Enrolment Project Feasibility Report.

N3.10 Each Supplier Party that wishes to propose any or all of its Energy Meters for inclusion within the scope of the Initial Enrolment Project Feasibility Report must provide the DCC with the information in respect of those Energy Meters required by the DCC pursuant to this Section N3 by the date and in the format required by the DCC pursuant to this Section N3.

N3.11 Following receipt of each response from a Supplier Party pursuant to this Section N3, the DCC shall review the response to establish whether it complies with the requirements of this Section N3. Where a response is incomplete or the DCC reasonably requires supplementary information in respect of a response, the DCC may request that further information is provided within a reasonable period. The DCC must request further or supplementary information where it considers that the initial information provided by a Supplier Party is not sufficient to enable the DCC to include the Supplier Party's Energy Meters within the scope of the Initial Enrolment Project Feasibility Report.

Inclusion of Meters in Scope of Project

N3.12 The Energy Meters of a Supplier Party shall only be included within the scope of the Initial Enrolment Project Feasibility Report where the Supplier Party has provided all of the information in respect of those Energy Meters required by the DCC pursuant to this Section N3 by the date and in the format required by the DCC in accordance with this Section N3.

N3.13 In respect of each Energy Meter put forward by a Supplier Party, the DCC shall notify that Supplier Party whether the DCC considers that Energy Meter to be within (or outside) the scope of the Initial Enrolment Project Feasibility Report (determined as described in Section N3.12).

Disputes

N3.14 Without prejudice to Section N2.7 (SMETS1 Compliance), where:

(a) the DCC requests information from a Supplier Party pursuant to this Section N3, and the Supplier Party disputes whether that information has been requested in accordance with this Section N3; or

(b) a Supplier Party disagrees with the DCC's notification that some or all of the Supplier Party’s Energy Meters are outside the scope of the Initial Enrolment Project Feasibility Report,

then the Supplier Party may refer the matter to the Secretary of State (whose decision shall be final and binding for the purposes of this Code).

N4. INITIAL ENROLMENT PROJECT FEASIBILITY REPORT

Analysis

N4.1 The DCC shall analyse the information received from Supplier Parties pursuant to Section N3, evaluate the options for Initial Enrolment that the DCC considers are reasonable, and report to the Secretary of State in the Initial Enrolment Project Feasibility Report on the feasibility and estimated cost of each option and the manner in which it would be delivered.

Timetable

N4.2 As soon as reasonably practicable following receipt of the relevant information from Supplier Parties pursuant to Section N3, the DCC shall publish on the DCC Website its proposed timetable for undertaking the steps required under this Section N4.

Report

N4.3 The DCC shall include within the Initial Enrolment Project Feasibility Report the DCC’s analysis regarding the options for the Enrolment of all the Eligible Meters which were included within the scope of the Initial Enrolment Project Feasibility Report. Where the Enrolment of one or more subsets of such Eligible Meters would differ materially from the Enrolment of all of such Eligible Meters (in terms of risk, timescales and/or cost), then the DCC shall include its analysis for that subset (as well as for all of them).

N4.4 The DCC shall include within the Initial Enrolment Project Feasibility Report the DCC’s analysis regarding the following matters in respect of the Enrolment of all (and, where applicable in accordance with Section N4.3, each subset referred to in that Section) of the Eligible Meters which were included within the scope of the Initial Enrolment Project Feasibility Report:

(a) the timeframe and process for the Enrolment of the Eligible Meters;

(b) its assessment of the Communications Contracts against the Adoption Criteria, and of whether some or all of the Communications Contracts should be Adopted, and of whether those that are to be Adopted should be amended or consolidated following their Adoption;

(c) any amendments that would be required to existing DCC Service Provider Contracts in order to deliver Initial Enrolment;

(d) the establishment of any new contracts which the DCC would require in order to deliver Initial Enrolment;

(e) the means by which the DCC will provide SMETS1 Services in respect of the Eligible Meters such that (insofar as reasonably practicable) Users may send Service Requests and receive Service

Responses in respect of those communication services via the DCC User Interface (such that the format of communications over the DCC User Interface in relation to each SMETS1 Service is the same as that for existing equivalent DCC User Interface Services);

(f) where it better facilitates achievement of the SEC Objectives, the provision by the DCC to Users of the SMETS1 Services in respect of the Eligible Meters by another means than that referred to in (e) above;

(g) to the extent that they can be offered without a material increase in cost, risk or timescale, any rights for Parties also to Enrol SMETS1 Meters which were not included within the scope of the Initial Enrolment Project Feasibility Report;

(h) options for amendment of the Minimum SMETS1 Services such that DCC can provide additional Services to Parties which are equivalent to the DCC User Interface Services;

(i) options for provision by DCC to Users of a service for Eligible Meters to be commissioned first in the DCC (in addition to Enrolment post-commissioning);

(j) any Enabling Services that the DCC considers necessary to support Enrolment (including the equivalent of Testing Services);

(k) the development and testing of the Systems via which the Enrolment of Eligible Meters and provision of SMETS1 Services will be delivered, in compliance with the requirements of Section N2.8 (Testing);

(l) the measures proposed in order to ensure that the SMETS1 Services are delivered in a manner that will not materially increase the security risk, in compliance with the requirements of Section N2.10 (Security);

(m) an assessment of which Supplier Parties are (in accordance with the Charging Objectives) likely to pay a premium and its reasonable estimate of the amount of those premiums in respect of Enrolled SMETS1 Meters (over and above the Charges for Smart Metering Systems); and

(n) other matters required to be considered in compliance with the requirements of Section N2 (SMETS1 Enrolment Projects Generally).

Consultation

N4.5 Before submitting the Initial Enrolment Project Feasibility Report to the Secretary of State, the DCC shall produce a draft report and consult with the Panel, the Parties and other interested persons concerning the content of such draft. The DCC shall ensure that a reasonable period of time is allowed for consultation responses to be made, which period may not be less than two months.

N4.6 On submitting the Initial Enrolment Project Feasibility Report to the Secretary of State, the DCC shall also provide the Secretary of State with:

(a) copies of all consultation responses received;

(b) a commentary identifying where and the extent to which the DCC has amended its report to take into account any comments, representations or objections raised as part of such consultation responses; and

(c) where the DCC has not amended the report to address any comments or representations of objections raised as part of such consultation responses, the DCC's reasons for not doing so.

Inclusion or Exclusion of Meters from Scope of Report

N4.7 Before submitting the Initial Enrolment Project Feasibility Report to the Secretary of State, the DCC shall (subject to Section N4.11) publish a final draft of the report in the form it intends to submit to the Secretary of State (subject only to Section N4.9).

N4.8 On publishing the draft report pursuant to Section N4.7, the DCC shall notify the Supplier Parties that they each have two weeks to notify the DCC if they wish to include additional Energy Meters, or exclude some or all of their Energy Meters, from some or all of the options within the scope of the Initial Enrolment Project Feasibility Report. If no response is received from a Supplier Party within that period, the DCC shall assume that all of the Energy Meters previously included within the scope of the report remain within scope.

N4.9 The DCC shall include or exclude (as applicable) from the scope of the Initial Enrolment Project Feasibility Report those Energy Meters notified in accordance with Section N4.8, and:

(a) where the DCC considers that the inclusion or exclusion of those Energy Meters has a material impact on the Initial Enrolment Project Feasibility Report, then the DCC shall produce a further draft of the report, and undertake a further consultation in accordance with Section N4.5 (but without repeating the steps at Section N4.7 and N4.8); or

(b) where the DCC considers that the inclusion or exclusion of those Energy Meters does not have a material impact on the Initial Enrolment Project Feasibility Report, then the DCC shall amend the report only insofar as necessary to include or exclude those Energy Meters from the scope of the report and submit the report to the Secretary of State.

Redaction for Reasons of Security

N4.10 Before consulting on or publishing the draft report pursuant to Section N4.5 or N4.7, the DCC shall provide to the Panel and (on request) the Secretary of State:

(a) a copy of the draft report; and

(b) where relevant, a list of sections of the report which the DCC considers should be redacted prior to publication in order to avoid a risk of Compromise to the DCC Total System and/or User Systems .

N4.11 The DCC shall only consult on or publish its draft report pursuant to Section N4.5 or N4.7 after it has redacted those sections of the report which it is directed to redact by the Panel where the Panel considers that those sections contain information which may pose a risk of Compromise to the DCC Total System and/or User Systems (which sections may or may not include those sections which the DCC proposed for redaction).

N4A FURTHER INITIAL ENROLMENT ANALYSIS

Further Analysis and Reporting

N4A.1 Where from time to time directed to do so by the Secretary of State, the DCC shall undertake further analysis and/or evaluation relating to Initial Enrolment, and report to the Secretary of State on such analysis and/or evaluation.

N4A.2 The DCC shall comply with the Secretary of State's directions from time to time pursuant to this Section N4A, which may include directions in relation to one or more of the following:

(a) additional Energy Meters which are to be included within the scope of Initial Enrolment (including in terms of either or both Device Models or numbers of Energy Meters);

(b) Energy Meters which are to be excluded from the scope of Initial Enrolment (including in terms of either or both Device Models or numbers of Energy Meters);

(c) the aspects of Initial Enrolment that are to be further analysed and/or evaluated;

(d) consultation with such persons as the Secretary of State may direct regarding Initial Enrolment and/or the DCC's analysis and/or evaluation;

(e) further invitations to Supplier Parties to have additional Energy Meters included within the scope of Initial Enrolment;

(f) the timing and process to be followed by the DCC in relation to the further analysis and/or evaluation, and/or any consultation or information requests relating to such analysis and/or evaluation; and

(g) redaction of published information equivalent to that outlined in Section N4.10 (Redaction for Reasons of Security).

Supplier Information

N4A.3 The DCC may request information from Supplier Parties in relation to any further analysis and/or evaluation which the DCC is required to undertake under this Section N4A, where:

(a) such information is reasonably necessary for the purpose of the analysis and/or evaluation which the DCC is required to undertake (which may include copies of Communications Contracts); or

(b) the DCC is directed by the Secretary of State to request such information.

N4A.4 Each information request pursuant to Section N4A.3 must specify a reasonable date and a reasonable format for responses by Supplier Parties.

N4A.5 Each Supplier Party which wants its Energy Meters to remain within the scope of Initial Enrolment shall take all reasonable steps to provide the information requested by the DCC in accordance with Section N4A.3.

N4A.6 Where a Supplier Party does not provide the information requested by the DCC under Section N4A.3, and where the DCC considers that its analysis and/or evaluation cannot be completed in relation to that Supplier Party's Energy Meters without such information, then the DCC may apply to the Secretary of State to determine whether all (or a subset) of that Supplier Party's Energy Meters should be excluded from the scope of Initial Enrolment.

N4A.7 In respect of each response from a Supplier Party to a DCC request pursuant to Section N4A.3, the DCC shall notify the Supplier Party whether the DCC considers that the response has been made in accordance with the request (identifying any omissions or other deficiencies and allowing a reasonable period of time within which such omissions or other deficiencies can be rectified).

N4A.8 For the avoidance of doubt, the DCC shall only use the information obtained pursuant to this Section N4A for the purposes of the further analysis and/or evaluation required by this Section N4A, and all information obtained pursuant to this Section N4A shall be subject to the DCC's duties of confidentiality set out in the DCC Licence and Section M4 (Confidentiality).

N5. INITIAL ENROLMENT CODE AMENDMENTS

Amendments

N5.1 Where directed to do so by the Secretary of State, the DCC shall prepare Initial Enrolment Code Amendments in respect of one or more options for Initial Enrolment in respect of some or all of the Eligible Meters included within the scope of the Initial Enrolment Project Feasibility Report or included within the scope of any further analysis and/or evaluation pursuant to Section N4A (as directed by the Secretary of State).

N5.2 Such amendments shall include those necessary to enable the Enrolment of the relevant SMETS1 Meters, the request and receipt of SMETS1 Services in respect of those SMETS1 Meters, and the calculation of the Charges for the same in accordance with the Charging Objectives.

N5.3 Such amendments shall be prepared in a format capable of being laid before Parliament by the Secretary of State pursuant to section 88 of the Energy Act 2008.

Consultation

N5.4 Before submitting the Initial Enrolment Code Amendments to the Secretary of State pursuant to Section N5.1, the DCC shall produce draft amendments and consult with the Authority, the Panel, the Parties and other interested persons concerning such draft. The DCC shall ensure that a reasonable period of time is allowed for consultation responses to be made, which period may not be less than two months.

N5.5 On submitting the Initial Enrolment Code Amendments to the Secretary of State, the DCC shall also provide the Secretary of State with:

(a) copies of all consultation responses received;

(b) a commentary identifying where and the extent to which the DCC has amended its draft to take into account any comments, representations or objections raised as part of such consultation responses; and

(c) where the DCC has not amended its draft to address any comments or representations of objections raised as part of such consultation responses, the DCC’s reasons for not doing so.

N6. TRANSITION AND MIGRATION APPROACH DOCUMENT

Overview

N6.1 The Transition and Migration Approach Document is to be developed by the DCC pursuant to this Section N6, and incorporated into this Code pursuant to Part G of Condition 22 of the DCC Licence and Section X5 (Incorporation of Certain Documents into this Code).

Purpose of the Transition and Migration Approach Document

N6.2 The purposes of the Transition and Migration Approach Document are to:

(a) enable the Enrolment of SMETS1 Smart Metering Systems comprising SMETS 1 Devices that have previously been commissioned by a SMETS1 SMSO (whether or not they remain so commissioned immediately prior to their Enrolment);

(b) provide for additional and/or varied provisions to apply for a transitional period prior to, during and/or following the Enrolment of such SMETS1 Smart Metering Systems.; and

(c) facilitate the provision of Elective Communication Services in respect of SMETS 1 Smart Metering Systems.

Content of the Transition and Migration Approach Document

N6.3 The Transition and Migration Approach Document may include, without limitation, some or all of the following:

(a) rights and/or obligations of the DCC and other Parties designed to facilitate or achieve the purposes of the Transition and Migration Approach Document which are either additional to or vary other rights and/or obligations set out in this Code;

(b) the processes by which SMETS 1 Devices that have previously been commissioned by a SMETS1 SMSO may be Commissioned and Enrolled as SMETS1 Smart Metering Systems (which may include obligations to apply before, on and/or after such Commissioning);

(c) pre-conditions to apply in relation to the Commissioning of SMETS1 Devices, including by reference to the DCC, SMETS1 Device Model, Lead Supplier, Responsible Supplier, the SMETS1 SMSO by which the SMETS1 Devices were previously commissioned, and/or the Supplier Party by which the SMETS1 Devices were originally installed;

(d) rules and constraints concerning the scheduling and timing to be followed in respect of the Commissioning of SMETS1 Devices, including by reference to the relevant SMETS1 Device Model, Lead Supplier, Responsible Supplier, SMETS1 Service Provider, SMETS1 SMSO by which the SMETS1 Devices were previously commissioned, and/or Supplier Party by which the SMETS1 Devices were originally installed;

(e) obligations on one or more Parties to procure that SMETS1 SMSOs undertake specified activities to support the Enrolment of SMETS1 Smart Metering Systems;

(f) rules and requirements concerning the provision and sharing of Data in order to facilitate or achieve the purposes of the Transition and Migration Approach Document, which may include one or more

Parties being obliged to provide (or procure the provision of) Data (as further described in the Transition and Migration Approach Document);

(g) provisions concerning the re-configuration of SMETS1 Devices and/or the taking over and handing back of communications with SMETS1 Devices, which may include one or more Parties being obliged to make arrangements for the same (as further described in the Transition and Migration Approach Document);

(h) provisions concerning the exchange of security keys, security credentials and/or cryptographic material, which may include modification of the SMKI Services and the SMKI Repository Service to permit the Issuing of Organisation Certificates with additional Remote Party Roles (and their lodging in the SMKI Repository);

(i) provisions requiring the DCC and Users to enter into Bilateral Agreements for the provision of certain Elective Communication Services in respect of SMETS 1 Smart Metering Systems;

(j) provisions that permit the population and/or amendment of the Central Products List, SMETS1 Eligible Product Combinations, SMETS1Pending Product Combinations and/or the Smart Metering Inventory other than by means of the enduring arrangements;

(k) limitations and/or variations to the Services and/or the rights and/or obligations of the Parties to apply for a transitional period prior to and/or following the Enrolment of some or all SMETS1 Smart Metering Systems, which may include limitations and/or variations to Services in respect of SMETS2 Devices;

(l) the variation of limitations on liability provided for in this Code for a transitional period prior to and/or following the Enrolment of some or all SMETS1 Smart Metering Systems, and provision for the giving of indemnities against liabilities to which one or more Parties and/or SMETS1 SMSOs might be exposed in consequence of the Transition and Migration Approach Document;

(m) provision for SMETS1 SMSOs to be given rights to enforce certain provisions of the Transition and Migration Approach Document in accordance with the Contracts (Rights of Third Parties) Act 1999, notwithstanding Section M11.5 (Third Party Rights); and

(n) provision for the referral and determination of disputes in respect of the Transition and Migration Approach Document, which may include interim or final determinations by the Secretary of State, the Authority, the Panel or any other person specified by the Secretary of State.

Process to Develop Document for Designation

N6.4 The DCC shall, to the extent it has not already done so when this Section N6 comes into effect, develop and consult on the Transition and Migration Approach Document and submit it to the Secretary of State in accordance with the following process:

(a) the DCC shall, in consultation with the Parties and such other persons as are likely to be interested, produce a draft of the document;

(b) where a disagreement arises with any Party or other person with regard to any proposal as to the content of the document, the DCC shall endeavour to reach an agreed proposal with that person consistent with the purposes of the Transition and Migration Approach Document;

(c) the DCC shall send a draft of the Transition and Migration Approach Document to the Secretary of State as soon as is practicable after completion of the process described in (a) and (b) above, and shall when doing so provide to the Secretary of State:

(i) a statement of the reasons why the DCC considers that draft to be fit for purpose;

(ii) copies of the consultation responses received; and

(iii) a summary of any disagreements that arose during consultation and that have not been resolved by reaching an agreed proposal; and

(d) the DCC shall comply with any requirements in a direction given to it by the Secretary of State in relation to the draft document, including:

(i) any amendments to be made to the draft document;

(ii) any requirement to produce and submit to the Secretary of State a further draft of the document; and

(iii) any requirement as to the process to be followed by the DCC (and the time within which that process shall be completed) prior to submitting a further such draft.

N6.5 The DCC shall, where so directed by the Secretary of State from time to time, develop and consult upon a further draft of the Transition and Migration Approach Document and submit it to the Secretary of State in accordance with the process set out in Section N6.4.

Application of the Transition and Migration Approach Document

N6.6 The DCC and the categories of Party referred to in the Transition and Migration Approach Document shall comply with the Transition and Migration Approach Document.

N6.7 The Transition and Migration Approach Document shall have priority over the other SEC Subsidiary Documents in relation to the subject matter of the Transition and Migration Approach Document.

Expiry of Transition and Migration Approach Document

N6.8 The Transition and Migration Approach Document shall provide for a date (or a mechanism for determining a date) from which the Transition and Migration Approach Document is to no longer apply. From such date, the Transition and Migration Approach Document shall no longer have any effect (but without prejudice to the rights and obligations arising prior to that date).

Interpretation

N6.9 Expressions used in this Section N6 and in the Transition and Migration Approach Document shall be interpreted in accordance with Section A (Definitions and Interpretation), rather than Section N1 (Definitions for this Section N).

P PRODUCTION PROVING

P1. PRODUCTION PROVING

Purpose

P1.1 The purpose of Production Proving is to provide assurance on the operation of the DCC Total System.

Overview

P1.2 The DCC may, in its capacity as the Production Proving Function and subject to this Section P, to the extent reasonably necessary for the purposes of Production Proving:

(a) act as if it is a User (in different User Roles) to send Service Requests;

(b) act as if it is a User (in different User Roles) to receive Service Responses and Alerts in relation to Production Proving Devices (as if it was an Eligible User);

(c) act as if it is a User (in different User Roles) to access the Self-Service Interface; and

(d) act as if it is the CSS Provider in respect of Production Proving Registration Data.

Production Proving Devices

P1.3 The Production Proving Function is only entitled to send a Service Request or Signed Pre-Command to the DCC that will result in communication with a Device where that Device is a Production Proving Device.

P1.4 A "**Production Proving Device**" is a (real) Device of a Device Model identified in the Central Products List, but one that has been procured by the DCC for the purposes of Production Proving.

P1.5 The Production Proving Function may send a Service Request requesting that the DCC adds a Production Proving Device to the Smart Metering Inventory (to be listed with an SMI Status of 'pending'), and the DCC shall add the Production Proving Device to the Smart Metering Inventory provided that the Production Proving Device is of a Device Model that is identified in the Central Products List.

P1.6 The Production Proving Function may install and Commission Production Proving Devices in order to create Smart Metering Systems, but those Production Proving Devices (and Smart Metering Systems) cannot be ones that record the supply of gas, or import or export of electricity, to or from a Premises for the purposes of settlement under the Energy Codes.

P1.7 The DCC shall not allow Production Proving Devices to be linked in the Smart Metering Inventory to (real) MPANs or MPRNs.

Production Proving MPXNs

P1.8 Given the limitation set out in Section P1.7, the Production Proving Function is entitled to generate dummy MPANs and dummy MPRNs (collectively, "**Production Proving MPXNs**") for the purposes of Production Proving. The DCC may record these Production Proving MPXNs in the Smart Metering Inventory and link them to Production Proving Devices for the purposes of recording the

Commissioning of Production Proving Devices. The DCC shall publish on the DCC Website the range of values which the DCC uses for Production Proving MPXNs.

P1.9 The Production Proving Function shall ensure that the Production Proving MPXNs are different from any and all MPANs and MPRNs, including that the data values of each Production Proving MPXN are outside the range that may in the future be used in an MPAN or MPRN.

P1.10 The DCC shall ensure that each Production Proving MPXN is only linked in the Smart Metering Inventory to a Production Proving Device (and not any other Device).

Production Proving Registration Data

P1.11 The Production Proving Function may generate dummy Registration Data ("**Production Proving Registration Data**") for the purposes of Production Proving.

P1.12 The Production Proving Function shall ensure that the data fields in the Production Proving Registration Data by which Parties and other market participants are identified all contain data values which are different from the values used in the Registration Data to identify Parties and other market participants, including that the data values are outside the range that may in the future be used to identify Parties and other market participants.

P1.13 The Production Proving Function shall be entitled to send the Production Proving Registration Data to the DCC in accordance with Section E (Registration Data) acting as if the Production Proving Function was the CSS Provider.

Excluded Service Requests

P1.14 The Production Proving Function may not submit the following Service Requests (or send Signed Pre-Commands that relate to the following Service Requests):

(a) Update Security Credentials (KRP) (SRV 6.15);

(b) Request Handover Of DCC Controlled Device (SRV 6.21); or

(c) Update Security Credentials (CoS) (SRV 6.23).

Testing

P1.15 The DCC shall, before it undertakes any or all of the activities set out in Section P1.2, successfully complete reasonable and appropriate testing of the Systems to be used as the Production Proving System.

P1.16 Prior to sending a Service Request to the DCC, the Production Proving Function must have successfully completed testing equivalent to User Entry Process Tests in the relevant User Role in which it wishes to act in sending that Service Request.

P1.17 Not used.

General Standards

P1.18 Where the DCC undertakes Production Proving, it shall do so in accordance with Good Industry Practice, and in a manner that does not adversely affect the provision of the Services.

Production Proving IDs

P1.19 The Panel shall, where requested by the DCC, issue one or more Party Signifiers to the DCC for the purposes of identifying the DCC when acting as if it was a User or a CSS Provider in its capacity as the Production Proving Function, and the Production Proving Function shall use these signifiers for such purpose.

P1.20 The Panel shall, where requested by the DCC, issue a new range of EUI-64 Compliant identifiers for use as DCC IDs by the DCC when acting as the Production Proving Function. This range must be outside the range of identifiers used by DCC as DCC IDs for any other DCC purpose under this Code.

P1.21 The DCC shall assign one or more DCC IDs for use only by the Production Proving Function.

P1.22 The DCC shall notify the Panel which DCC IDs are associated with which Production Proving Function Party Signifier.

P1.23 The Production Proving Function shall not use User IDs for the purpose of Production Proving.

Security

P1.24 As the Production Proving Systems form part of the DCC Live Systems and the DCC Total System, the DCC shall ensure that it complies with the relevant requirements of Section G (Security) which apply as a consequence.

P1.25 The Production Proving Systems do not need to comply with the requirements of Section G (Security) which apply to User Systems or which apply to the CSS Provider Systems (via Section E (Registration Data)); save that Section G6 (Anomaly Detection Thresholds: Obligations on the DCC and Users) shall apply to the Production Proving Function as if it was a User.

P1.26 For such purposes of Section G6 (Anomaly Detection Thresholds: Obligations on the DCC and Users), the Production Proving Function shall set Anomaly Detection Thresholds that have been approved by the Security Sub-Committee (and the DCC shall not process any communication from the Production Proving Function until such threshold values have been approved and set).

P1.27 In respect of the DCC's obligations under Section G6 (Anomaly Detection Thresholds: Obligations on the DCC and Users), not acting in the capacity of the Production Proving Function, the DCC shall set the Anomaly Detection Thresholds for the following Service Requests from the Production Proving Function to zero:

(a) Update Security Credentials (KRP) (SRV 6.15);

(b) Request Handover Of DCC Controlled Device (SRV 6.21); and

(c) Update Security Credentials (CoS) (SRV 6.23).

Records and Reporting to the Security Sub-Committee

P1.28 The DCC shall:

(a) retain an audit log of the activities undertaken by the Production Proving Function for at least 6 years from the date on which the activity was undertaken;

(b) carry out post-event checks to confirm that no Service Requests or Signed Pre- Commands sent by the Production Proving Function resulted in communication with a Device which is not a Production Proving Device (or would have resulted in such communication had the DCC not rejected the message); and

(c) carry out post-event checks to ensure that the Production Proving Registration Data did not contain any (real) MPANs or MPRNs and did not use identifiers that are (or have been) used in the Registration Data to identify Parties and other market participants.

P1.29 The DCC shall, within 5 Working Days following the end of each month, provide a report to the Security Sub-Committee which summarises in respect of that month the matters referred to in Section P1.28.

SMKI Services and DCCKI Services

P1.30 The Production Proving Function shall be entitled to receive SMKI Services and DCCKI Services under and in accordance with the relevant provisions of Section L (Smart Metering Key Infrastructure and DCC Key Infrastructure) and the SEC Subsidiary Documents applying pursuant to Section L as if it was a Party other than the DCC.

P1.31 The effect of Section P1.30 is to entitle the Production Proving Function to become an Authorised Subscriber, and to be an Eligible Subscriber in respect of those Device Certificates and Organisation Certificates for which the Production Proving Function is expressly stated to be eligible in Section L (Smart Metering Key Infrastructure and DCC Key Infrastructure).

P1.32 Before the Production Proving Function can apply to become an Authorised Subscriber or access the SMKI Repository, the Production Proving Function must have successfully completed testing equivalent to the SMKI and Repository Entry Process Tests.

P1.33 The Production Proving Function shall not submit any Certificate Signing Requests for a Device Certificate other than in relation to a Production Proving Device.

P1.34 The Production Proving Function shall not submit any Certificate Signing Request for an Organisation Certificate other than the one in relation to which it is identified as an Eligible Subscriber in Section L3 (The SMKI Services).

P1.35 The DCC is not required to implement controls within the DCA, an Issuing DCA or within the Registration Authority that limit the issuing of Device Certificates to the Production Proving Function in relation Production Proving Devices.

P1.36 The DCC shall ensure that no Public Key that is used by a Production Proving Device in relation to the Remote Party Role of either supplier or networkOperator is contained within any Certificate or other public key infrastructure certificate.

T TESTING DURING TRANSITION

[Not in use]

X TRANSITION

X1. GENERAL PROVISIONS REGARDING TRANSITION

Overriding Nature of this Section

X1.1 The provisions of this Section X shall apply notwithstanding, and shall override, any other provision of this Code.

Transition Objective

X1.2 The objective to be achieved pursuant to this Section X (the "**Transition Objective**") is the efficient, economical, co-ordinated, timely, and secure process of transition to the Completion of Implementation.

X1.3 The "**Completion of Implementation**" shall occur on the date designated for the purpose of this Section X1.3 by the Secretary of State (or such person as the Secretary of State may designate for the purposes of this Section X1.3), once the Secretary of State (or the person so designated) is of the opinion that:

(a) the documents referred to in Section X5 and that the Secretary of State (or the person so designated) considers material to the implementation of this Code have been incorporated into this Code in accordance with that Section;

(b) the provisions of this Code that the Secretary of State (or the person so designated) considers material to the implementation of this Code apply in full without any variation pursuant to this Section X (or, where any such variations do apply, the requirements of Sections X1.3(c) will still be met despite such variations ending in accordance with Section X1.5(a) and/or X1.5A(a)); and

(c) each Party that holds an Energy Licence is (or would be had such Party acted in accordance with Good Industry Practice) reasonably able (on the assumption that such Party acts in accordance with Good Industry Practice) to perform its obligations, and to exercise its rights, under this Code to the extent that the Secretary of State (or the person so designated) considers such obligations or rights material to the implementation of this Code.

X1.4 Before designating a date for the purpose of Section X1.3, the Secretary of State (or the person designated for the purposes of this Section X1.3) must consult the Authority, the Panel and the Parties in respect of the proposed date. Such consultation must allow such period of time as the Secretary of State (or the person so designated) considers appropriate in the circumstances within which representations or objections may be made.

Ending of the Application of this Section X

X1.5 With effect from the earlier of:

(a) Completion of Implementation; or

(b) 31 October 2018,

this Code shall automatically be modified so as to delete the following provisions of this Section X (and all variations to this Code provided for in, or made by directions pursuant to, the following provisions shall cease to apply):

(i) Section X1.11;

(ii) Section X2 (Effective Provisions at Designation), except for:

(A) Section X2.3(d), which shall continue to apply, but re-numbered as Section X2.1; and

(B) Sections X2.7 and X2.8, which shall continue to apply, but re- numbered as Sections X2.2 and X2.3 respectively;

(iii) Section X3 (Provisions to Become Effective Following Designation), except for:

(A) Section X3.1, which shall continue to apply, but amended to read: "Each Section, Schedule and SEC Subsidiary Document (or any part thereof) shall be effective, unless (at the time of a provision being added or modified by the Secretary of State pursuant to section 88 of the Energy Act 2008) the Secretary of State directs that such addition or modification is not to have effect, or is not to have effect until a later date. Where the Secretary of State directs that an addition or modification is not to have effect, the Secretary of State may subsequently designate a date from which it is to have effect."; and

(B) Section X3.9, which shall continue to apply, but re-numbered as X3.2;

(iv) Section X4 (Governance Set-up Arrangements);

(v) Section X6 (Transitional Variations);

(vi) Section X7 (Transitional Incident Management Procedures);

(vii) Section X8 (Developing CH Support Materials); and

(viii) Section X10 (Threshold Anomaly Detection Procedures).

X1.5A With effect from:

(a) Completion of Implementation:

(i) this Code shall automatically be modified so as to delete the provisions of this Section X not deleted pursuant to Section X1.5, save for Section X1.1, X1.3, this Section X1.5A, Section X5 and Section X11 which shall not be deleted; and

(ii) any variations to this Code provided for in, or made by directions pursuant to, the provisions deleted by Section X1.5A(a) shall cease to apply (save as set out in Section X5.8);

(b) 1 November 2028, this Section X (and any variations to this Code provided for in, or made by directions pursuant to, this Section X) shall cease to apply (save as set out in Section X5.8), and this Code shall automatically be modified from that date so as to delete this Section X.

General Obligations

X1.6 Each Party shall take all reasonable steps to do all such things as are within its power and necessary or expedient in order to facilitate achievement of the Transition Objective.

X1.7 Each Party shall provide such reasonable co-operation and assistance to the other Parties and to the Panel as may be necessary to facilitate compliance with the provisions of this Section X, and with any variations to this Code provided for in (or made by directions pursuant to) this Section X.

X1.8 Without prejudice to its legal rights, no Party shall take any step, or exercise any right, which is intended to (or might reasonably be expected to) hinder or frustrate the achievement of the Transition Objective.

Information

X1.9 Each Party shall provide to the Secretary of State, in such manner and at such times as the Secretary of State may reasonably require, such Data as the Secretary of State may reasonably require in order to enable the Secretary of State to assess progress towards (and to facilitate) achievement of the Transition Objective. No Party shall be obliged to provide information under this Section X1.9 where such Party is obliged to provide such information under its Energy Licence, or where such information is expressly excluded from the information that such Party is obliged to provide under its Energy Licence.

X1.10 If a Party is aware of any matter or circumstance which it considers will materially delay or frustrate the achievement of the Transition Objective, that Party shall promptly inform the Secretary of State of such matter or circumstance.

Network Parties to become Subscribers

X1.11 [NOT IN USE]

Day-One Elective Communication Services

X1.12 Where the Secretary of State designates one or more draft Bilateral Agreements for the purposes of this Section X1.12 (each of which drafts must specify the potential Elective Communication Services to be provided thereunder, and the DCC's potential counterparty thereunder), then:

(a) the DCC shall, within 10 Working Days thereafter, make a formal offer to each of the counterparties in question for the Elective Communication Services in question as if Section H7.12 (Formal Offer) applied;

(b) such offer shall be on the basis of the draft Bilateral Agreement designated by the Secretary of State (subject only to the addition of the applicable Elective Charges, any termination fee and any credit support requirements);

(c) the counterparty shall be under no obligation to accept such offer; and

(d) any agreement entered into pursuant to this Section X1.12 shall be a Bilateral Agreement.

Disputes

X1.13 In the event of any dispute between the Parties (or between the Panel and any Party) as to whether a particular Party is obliged to undertake a particular activity pursuant to Section X1.6 to X1.12 (inclusive), a Party (or the Panel) may refer the matter to the Secretary of State (or, where designated by the

Secretary of State for such purposes, the Panel or the Authority) for determination (which determination may include a requirement to comply with such terms and conditions as the person making it considers appropriate in all the circumstances of the case). Any determination by the Secretary of State or by the Authority pursuant to this Section X1.13 shall be final and binding for the purposes of this Section X1. Any determination by the Panel pursuant to this Section X1.13 shall be subject to appeal to the Secretary of State (or, where designated by the Secretary of State for such purposes, to the Authority), the determination of such appeal being final and binding for the purposes of this Section X1.

Modification of this Section X

X1.14 The variations to this Code provided for in, or made by directions pursuant to, this Section X shall not constitute modifications that should be subject to Section D (Modification Process). For the avoidance of doubt, this Section X shall be capable of being modified under Section D (Modification Process).

SECCo

X1.15 The provisions of this Section X1 (and the definitions used in this Section) shall apply to SECCo as if SECCo was a Party.

Publication of Draft Subsidiary Documents by the DCC

X1.16 Where, pursuant to this Code or the DCC Licence, the DCC is required to prepare or produce and to consult upon a draft (or further draft) of a document (or to resubmit a document) that is intended to be incorporated into this Code as a SEC Subsidiary Document, the DCC shall, at or around the same time as the DCC sends such document to the Secretary of State, publish on the DCC Website:

(a) a copy of the document sent to the Secretary of State; and

(b) a summary of any material comments raised in response to the consultation and a brief description of the reasons why any associated changes to the document were or were not made.

Testing in respect of Additional Release Services

X1.17 A Party seeking to become a User for a particular User Role must undertake the User Entry Process Tests relevant to that User Role, as described in Sections H1 (User Entry Process) and H14 (Testing). Certain Services are only available to Parties that have become a User for the applicable User Role, as described in Section H3 (DCC User Interface) and the DCC User Interface Services Schedule. Where the Secretary of State makes directions pursuant to Section X3 (Provisions to Become Effective Following Designation) whereby the Common Test Scenarios Document is varied on it first becoming effective so that there are Service Requests that are deemed to be omitted from the document, then the following provisions shall apply:

(a) the Service Requests that are subject to such a direction shall, for so long as the variation in respect of that Service Request remains in effect, be "**Additional Release Services**";

(b) Parties that start User Entry Process Tests at a time where there are Additional Release Services shall undertake (and be able to successfully complete) the User Entry Process Tests without reference to those Additional Release Services;

(c) a User that completes User Entry Process Tests that did not include testing of Service Requests that used to be (but are no longer) Additional Release Services shall (notwithstanding any other provision of this Code) not be an Eligible User for those Service Requests until that User has successfully completed the applicable Additional SR Tests for those Service Requests; and

(d) "**Additional SR Tests**" means, in respect of one or more Service Requests that used to be (but are no longer) Additional Release Services, testing equivalent to User Entry Process Tests but undertaken only in respect of those Service Requests. Accordingly, and without limitation, the following shall apply:

(i) Additional SR Tests shall constitute a Testing Service, and shall therefore be subject to the provisions of Section H14 (Testing Services);

(ii) Additional SR Tests shall be provided by the DCC, and shall be capable of being undertaken by Parties, in accordance with Sections H14.12 to H14.21 (User Entry Process Tests), but:

(A) construed by reference to only those relevant Service Requests;

(B) where a Party has already demonstrated capability for the purposes of User Entry Process Tests, this can be relied upon for the purposes of the Additional SR Tests (unless the DCC considers that this is not appropriate for those Additional SR Tests);

(C) potentially (as provided for in the Common Test Scenarios Document) without the need to re-test the DCC Gateway Connection;

(D) without the need to re-test the Self-Service Interface; and

(E) subject to any other exceptions provided for in the Common Test Scenarios Document.

DCC Live Services Criteria Report

X1.18 This Section X1.18 shall apply where the DCC produces a report concerning its readiness to commence provision of the Services (or any part of the Services), and where the Secretary of State directs the Panel to review that report. Where this Section X1.18 applies, the Panel shall review the DCC's report and report to the Secretary of State in accordance with the criteria, scope and timing specified in the Secretary of State's direction.

Developing ETAD for RDP Entry Process Tests

X1.19 The DCC shall develop a revised Enduring Testing Approach Document which provides the detailed processes concerning the RDP Entry Process Tests in accordance with Section X1.20, such that the revised document can be re-designated pursuant to Section X5 (Incorporation of Certain Documents into this Code). The revisions shall include the following in respect of the RDP Entry Process Tests:

(a) entry criteria for RDPs wishing to undertake the tests;

(b) exit criteria demonstrating successful completion of the tests; and

(c) the process for first exchanging between the RDP and the DCC a full set of the Data to be exchanged under Section E2 (Provision of Data).

X1.20 The procedure by which the DCC is to develop the revisions to the Enduring Testing Approach Document is as follows:

(a) the DCC shall produce a draft by such date as the Secretary of State may direct;

(b) in producing the draft, the DCC must consult appropriately with Parties and other interested persons;

(c) where disagreements with the Parties arise concerning the proposed content of the draft, the DCC shall seek to reach an agreed solution with them, but without prejudice to the purposes of the document;

(d) having complied with (b) and (c) above, the DCC shall submit the draft revisions to the Secretary of State as soon as is reasonably practicable, and in any case by such date as the Secretary of State may direct;

(e) when submitting a draft under paragraph (d) above, the DCC shall indicate to the Secretary of State: (i) why the DCC considers the draft to be fit for purpose; (ii) copies of the consultation responses received; and (iii) any areas of disagreement that arose during the consultation process and that have not been resolved; and

(f) the DCC must comply with the requirements with respect to process, timeframe and/or further development of content in any direction that is given by the Secretary of State regarding the draft document.

X2. EFFECTIVE PROVISIONS AT DESIGNATION

Provisions to have Effect from Designation

X2.1 The Secretary of State shall be entitled to direct the Panel to cancel or suspend any Modification Proposal, in which case the Panel shall cancel or suspend the Modification Proposal in question and it shall not then be further progressed or implemented (or, in the case of suspension, shall not then be further progressed or implemented until the Secretary of State so directs).

X2.2 Where a Section is stated in this Section X2 to apply subject to more than one variation, then the Secretary of State may:

(a) designate different dates from which each such variation is to cease to apply; and/or

(b) designate a date from which one or more such variations are to cease to apply (without prejudice to the continued application of the other such variations).

X2.3 Before designating any dates for the purpose of this Section X2, the Secretary of State must consult the Authority, the Panel and the Parties in respect of the proposed date. Such consultation must allow such period of time as the Secretary of State considers appropriate in the circumstances within which to make representations or objections with respect to the proposed date. The requirement for consultation may be satisfied by consultation before, as well as after, the designation of this Code.

X3. PROVISIONS TO BECOME EFFECTIVE FOLLOWING DESIGNATION

Effective Dates

X3.1 Each Section, Schedule and SEC Subsidiary Document (or any part thereof) shall be effective, unless (at the time of a provision being added or modified by the Secretary of State pursuant to section 88 of the Energy Act 2008) the Secretary of State directs that such addition or modification is not to have effect, or is not to have an effect until a later date. Where the Secretary of State directs that an addition or modification is not to have effect, the Secretary of State may subsequently designate a date from which it is to have effect.

General

X3.2 Before designating any dates and/or making any directions for the purpose of this Section X3, the Secretary of State must consult the Authority, the Panel and the Parties in respect of the proposed date and/or the draft direction (as applicable). Such consultation must allow such period of time as the Secretary of State considers appropriate in the circumstances within which to make representations or objections with respect to the proposed date and/or the draft direction (as applicable).

X4. GOVERNANCE SET-UP ARRANGEMENTS

[NOT IN USE]

X5. INCORPORATION OF CERTAIN DOCUMENTS INTO THIS CODE

Smart Metering Equipment Technical Specifications

X5.1 The document designated by the Secretary of State, titled "Smart Metering Equipment Technical Specifications" and containing any one or more of the following:

(a) the ESME Technical Specification;

(b) the GSME Technical Specification;

(c) the IHD Technical Specification;

(d) the PPMID Technical Specification;

(e) the HCALCS Technical Specification; or

(f) the SAPC Technical Specification,

in accordance with Part G of Condition 22 of the DCC Licence shall, from the relevant date designated by the Secretary of State for the purpose of such document and of this Section X5.1, be incorporated in to this Code as the Schedule specified in such designation.

Communications Hub Technical Specifications

X5.2 The document designated by the Secretary of State as the Communications Hub Technical Specifications in accordance with Part G of Condition 22 of the DCC Licence shall, from the relevant date designated by the Secretary of State for the purpose of such document and this Section X5.2, be incorporated into this Code as the Schedule specified in such designation.

Certificate Policies

X5.3 Any document designated by the Secretary of State as a Certificate Policy in accordance with Part G of Condition 22 of the DCC Licence shall, from the relevant date designated by the Secretary of State for the purpose of such document and this Section X5.3, be incorporated into this Code as the Schedule or SEC Subsidiary Document specified in such designation.

Other Technical Specifications

X5.4 Each of the technical specifications and procedural or associated documents designated by the Secretary of State in accordance with Part G of Condition 22 of the DCC Licence shall, from the relevant date designated by the Secretary of State for the purpose of such document and this Section X5.4, be incorporated into this Code as the Schedule or SEC Subsidiary Document specified in such designation.

Re-Designation of Documents

X5.5 Paragraph 29(b) of Condition 22 of the DCC Licence includes a power for the Secretary of State to re-designate any document of a type referred to in Sections X5.1 to X5.4, subject to such amendments as he considers requisite or expedient. Where the Secretary of State exercises that power in relation to any such document:

(a) it shall be incorporated into this Code in substitution for the form of that document that was previously incorporated;

(b) the other provisions of this Section X5 shall apply to it as if it were a document being designated for the first time; and

(c) references in those provisions to the document being designated shall be read as referring to it being re-designated

Supplementary Provisions

X5.6 Paragraph 30 of Condition 22 of the DCC Licence includes a power for the Secretary of State to specify supplementary, incidental, consequential, governance or other provisions which are to have effect in this Code from the date designated for such purpose by the Secretary of State. This Code shall automatically be amended so as to include such provisions with effect from such date.

General

X5.7 This Code provides for the development of certain documents which may then be incorporated into this Code pursuant to this Section X5. Where this Code sets out the required purpose or content of such documents, the Secretary of State may designate for incorporation under this Section X5 documents that fulfil only part of that purpose or include only part of that content, with a view to subsequently re-designating more complete documents at a later date.

X5.8 The incorporation of documents into this Code pursuant to this Section X5 (and any provisions made pursuant to Section X5.6) shall not constitute a modification that should be subject to Section D (Modification Process). The incorporation of documents into this Code pursuant to this Section X5 (and any provisions made pursuant to Section X5.6) shall not constitute a variation of this Code that is time limited in accordance with Section X1.5A (and such documents and provisions shall remain part of this Code notwithstanding the deletion of this Section X5 in accordance with Section X1.5A).

X5.9 The documents incorporated into this Code pursuant to this Section X5 (and any provision made pursuant to Section X5.6) shall, from the date of their incorporation, be subject to modification in accordance with the provisions of this Code.

X5.10 Before designating any dates for the purpose of this Section X5, the Secretary of State must consult the Authority, the Panel and the Parties in respect of the proposed date. Such consultation must allow such period of time as the Secretary of State considers appropriate in the circumstances within which to make representations or objections with respect to the proposed date to be designated. The requirement for consultation may be satisfied by consultation before, as well as after, the designation of this Code.

X5.11 Before designating any date from which a document is to be incorporated into this Code pursuant to this Section X5, the content of such document must have been subject to such consultation as the Secretary of State considers appropriate in the circumstances (whether or not under this Code, whether or not undertaken by the Secretary of State and whether before or after the designation of this Code).

[NOT IN USE]

X7. TRANSITIONAL INCIDENT MANAGEMENT PROCEDURES

[NOT IN USE]

X8. DEVELOPING CH SUPPORT MATERIALS

[NOT IN USE]

X9. INTERIM DEVICE AND USER SYSTEM TESTING[1]

Interim Device Testing

X9.1 The DCC shall provide a testing service (referred to in this Section X9 as "**GFI Testing**") to enable eligible persons to test the interoperability of Devices (other than those comprising Communications Hubs) with the DCC Systems and with the Communications Hubs to be provided as part of the Testing Services, such that those Devices are able to respond to Commands received from or via the DCC in accordance with the requirements defined in the GB Companion Specification.

X9.2 The following shall apply in respect of GFI Testing:

(a) the following persons shall be eligible to undertake GFI Testing: Parties and persons that have signed agreements based on the Specimen Enabling Services Agreement (subject only to such variations from such specimen form as are reasonable in the circumstances, including so as to require compliance with this Section X9.2);

(b) the references in Section X9.1 to “Communications Hubs”, “DCC Systems” and “Devices” shall be interpreted as including reference to prototypes or simulations of those things (and GFI Testing shall not include communication via the SM WAN, or a simulation of the SM WAN);

(c) Section H14 (Testing Services) shall apply in respect of GFI Testing as if GFI Testing was a Testing Service, and the DCC and each person undertaking GFI Testing shall comply with Sections H14 in respect of GFI Testing as if GFI Testing was a Testing Service (provided that none of the following shall apply: Sections H14.3, H14.9, H14.10 and H14.11);

[1] This section X9 was included from 18 April 2016 as a variation under section X6 provisions.

(d) persons undertaking GFI Testing must each comply with such reasonable supplemental obligations as the DCC may notify to them from time to time (provided that such obligations are not inconsistent with the provisions of the Code that are in effect at that time); and

(e) the Testing Issue process in Section H14.37 to H14.45 (General: Testing Issue Resolution Process) shall not apply to GFI Testing, but the DCC must take reasonable steps to provide support and assistance to a person undertaking GFI Testing in order to assist that person in resolving Testing Issues encountered when undertaking GFI Testing.

Pre-UEPT Testing

X9.3 The DCC shall allow each Party that is entitled to use a DCC Gateway Connection to establish and validate a connection via that DCC Gateway Connection to a test environment to be used for the purposes of Pre-UEPT Testing.

X9.4 The DCC shall, with effect from 6 May 2016, provide a testing service (referred to in this Section X9 as " **Pre-UEPT Testing**") that enables Parties to test their capability (and that of their Systems) to undertake the following activities over a DCC Gateway Connection:

(a) the sending of (at least) the following Service Requests (which are identified by reference to the numbering used in the Common Test Scenarios Document):

(i) 4.1.1;

(ii) 5.1, 5.2 and 5.3;

(iii) 6.2.7, 6.11, 6.15.1, 6.15.2, 6.17, 6.20.1, 6.21 and 6.23;

(iv) 8.1.1, 8.2, 8.3, 8.4, 8.6, 8.7.1, 8.7.2, 8.8.1, 8.8.2, 8.9, 8.11, 8.12.1, 8.12.2, 8.13, 8.14.1, 8.14.2, 8.14.3 and 8.14.4; and

(v) 11.1, 11.2, 11.3, 12.1 and 12.2;

(b) the sending of one or more Signed Pre-Commands; and

(c) the receipt of Pre-Commands and Service Responses in respect of (at least) the Service Requests set out in paragraph (a) above (in the case of Pre-Commands, only to the extent those Service Requests are designed to generate Pre- Commands).

X9.5 From as soon as the DCC is reasonably able to do so, the DCC shall expand the Pre- UEPT Testing to include the ability of Parties to test their capability (and that of their Systems) to send each of the Service Requests identified in the Common Test Scenarios Document but not listed in Section X9.4(a).

X9.6 The following shall apply in respect of Pre-UEPT Testing:

(a) the references in Sections X9.4 and X9.5 to “Service Requests”, “Signed Pre- Commands”, “Pre-Commands”, “Service Responses”, “Device Alerts” and “DCC Alerts” shall be interpreted as including simulations of those things, which simulations may:

(i) include standardised or sample Data; and

(ii) omit Certificates, GBCS Payloads, Digital Signatures or Message Authentication Codes that would otherwise be required;

(b) Section H14 (Testing Services) shall apply in respect of Pre-UEPT Testing as if Pre-UEPT Testing was a Testing Service, and the DCC and each Party undertaking Pre-UEPT Testing shall comply with Sections H14 in respect of Pre-UEPT Testing as if Pre-UEPT Testing was a Testing Service (provided that none of the following shall apply: Sections H14.3, H14.4, H14.9 and H14.10);

(c) persons undertaking Pre-UEPT Testing must each comply with such reasonable supplemental obligations as the DCC may notify to them from time to time (provided that such obligations are not inconsistent with the provisions of the Code that are in effect at that time); and

(d) the Testing Issue process in Section H14.37 to H14.45 (General: Testing Issue Resolution Process) shall not apply to Pre-UEPT Testing, but the DCC must take reasonable steps to provide support and assistance to a Party undertaking Pre-UEPT Testing in order to assist that Party in resolving Testing Issues encountered when undertaking Pre-UEPT Testing.

X9.8 Not used.

X9.9 Not used.

X10. THRESHOLD ANOMALY DETECTION PROCEDURES

[NOT IN USE]

X11. SECRETARY-OF-STATE-LED VARIATIONS

Overview

X11.1 This Section X11 applies in respect of variations to this Code which the Secretary of State has the power to make under statute, Energy Licences and/or other provisions of this Code, and provides for a testing process to be followed in respect of such variations. References in this Section X11 to proposed variations includes variations which the Secretary of State is considering, is consulting on or has decided upon but not yet fully implemented.

Optional Analysis

X11.2 Where the Secretary of State so directs from time to time in respect of one or more proposed variations to this Code, the DCC shall analyse and report to the Secretary of State on the matters set out in that direction in accordance with the process and timescale set out in that direction. Such matters may include, without limitation:

(a) the extent to which changes would be required to the DCC Total System were the proposed variation to be made; and/or

(b) the likely development, capital and operating costs associated with such changes, and any consequential impact on the Charges.

SEC Variation Testing Approach Document

X11.3 Each SEC Variation Testing Approach Document is to be developed by the DCC pursuant to this Section X11, and then incorporated into this Code pursuant to Section X5 (Incorporation of Certain Documents into this Code).

X11.4 Where the Secretary of State so directs from time to time in respect of one or more proposed variations to this Code, the DCC shall develop a draft SEC Variation Testing Approach Document in respect of those proposed variations. The DCC shall develop that document in accordance with the timetable directed by the Secretary of State, in consultation with such other persons (if any) as the Secretary of State may direct, and otherwise in accordance with any process that the Secretary of State may direct.

X11.5 Each draft SEC Variation Testing Approach Document produced by the DCC shall set out the following in respect of the proposed variation(s), which must be consistent with any directions concerning the same made by the Secretary of State:

(a) the testing objectives;

(b) the testing to be undertaken;

(c) the testing environments to be used;

(d) the timetable for testing;

(e) the entry criteria for the start of testing or for the start of testing phases;

(f) the persons other than the DCC that are entitled or obliged to participate in testing;

(g) the entry criteria for the testing participants and the DCC;

(h) roles, responsibilities and obligations of the DCC and of the testing participants in respect of testing;

(i) the process for making amendments to the document, which shall include amendments directed by the Secretary of State;

(j) the process for resolving disputes under the document;

(k) the exit criteria for completion of testing (or stages of testing); and

(l) the process by which testing will be determined to be complete.

X11.6 The DCC shall submit each draft SEC Variation Testing Approach Document to the Secretary of State, indicating:

(a) why the DCC considers the draft to be fit for purpose;

(b) copies of the consultation responses received; and

(c) any areas of disagreement that arose during the consultation process and that have not been resolved, and, the DCC shall comply with any direction given by the Secretary of State to re-consider, re-consult and/or re-submit the draft document.

Compliance with SEC Variation Testing Approach Document

X11.7 The DCC and each person other than the DCC that participates in (or is required to participate in) testing under a SEC Variation Testing Approach Document shall comply with the SEC Variation Testing Approach Document.

X11.8 Section H14 (Testing Services) and the Enduring Testing Approach Document shall apply in respect of testing under a SEC Variation Testing Approach Document as if such testing was a Testing Service under Section H14.34 (Modification Implementation Testing); and each participant in such testing shall be deemed to be a Testing Participant for such purposes.

Z THE ALT HAN ARRANGEMENTS

All references to "Communications Hubs" in this Section Z are references to "SMETS2+ Communications Hubs".

Z1. THE ALT HAN FORUM

Establishment of the Alt HAN Forum

Z1.1 The Alt HAN Forum (the **Forum**) is hereby established.

Z1.2 The Forum shall:

(a) pursue the objectives, carry out the functions and have the powers set out in Sections Z1.3 to Z1.6;

(b) have the composition described in Sections Z1.7 to Z1.13;

(c) conduct its activities in accordance with the procedures set out in Sections Z1.14 to Z1.41;

(d) have the ability to establish, and to delegate its duties, powers and functions to, Sub-Groups in accordance with Sections Z1.42 to Z1.60,

and appeals from decisions of the Forum may be made to the Authority in accordance with Sections Z1.61 to Z1.67.

Forum Objectives, Functions and Powers

Forum Objectives

Z1.3 The Forum shall, in the performance of its functions and exercise of its powers, always act in a manner designed to achieve the objectives (the **Forum Objectives**) that:

(a) by virtue of the operation of this Section Z, Relevant Supplier Parties are able to comply with their obligations under Standard Conditions 55.2 and 55.16 of the Electricity Supply Licence and Standard Conditions 49.2 and 49.16 of the Gas Supply Licence;

(b) the Alt HAN Arrangements are given effect so as:

(i) to facilitate the economic and efficient carrying out of the Alt HAN Activities and provision of the Alt HAN Services;

(ii) to facilitate competition between persons engaged in, or in Commercial Activities connected with, the Supply of Energy;

(iii) to ensure that Energy Consumers' experience of the installation of Alt HAN Equipment at their premises is consistent with their reasonable expectations;

(iv) to ensure that all activities undertaken by or on behalf of Relevant Supplier Parties in relation to the installation, operation, maintenance, removal and replacement of Alt HAN Equipment are carried out in a fair, transparent, appropriate and professional manner;

(v) to ensure the protection of Data and the security of Data and Systems used for the purpose of the carrying out of the Alt HAN Activities and provision of the Alt HAN Services; and

(vi) to ensure that the Alt HAN Arrangements are administered in an economic, efficient and transparent manner; and

(c) the Forum conducts its affairs in an open and transparent manner.

Forum Functions

Z1.4 The Forum shall, in accordance with the provisions of this Section Z:

(a) make all decisions required for the purpose of:

(i) carrying out the Alt HAN Activities and the making available and provision of the Alt HAN Services, except for any decisions which may from time to time be delegated by it to AltHANCo or any Forum Sub- Group;

(ii) managing, maintaining, reviewing and updating the Exempt Premises List and any separate database of Exempt Premises, including reviewing and proposing to the Secretary of State revisions to the Exempt Premises List as required by Standard Condition 55.16 of the Electricity Supply Licence and Standard Condition 49.16 of the Gas Supply Licence.

(b) determine which (if any) decisions are to be delegated to AltHANCo or any Forum Sub-Group;

(c) give such directions to AltHANCo or any Forum Sub-Group as the Forum may consider appropriate (which may include directions in relation to any decisions otherwise delegated by the Forum);

(d) approve the annual budget of AltHANCo;

(e) determine any appeals made to it from decisions made by AltHANCo or a Forum Sub-Group; and

(f) make such other decisions as may from time to time be required in accordance with the provisions of this Section Z.

Z1.5 The Forum shall:

(a) provide to the Panel such report or other information as the Panel may request for the purpose of fulfilling its duty at Section C2.3(h) (Panel Duties); and

(b) (to the extent to which it reasonably considers that it is necessary to do so) liaise and exchange information with, provide advice to, and seek the advice of the Technical Architecture and Business Architecture Sub-Committee and the Security Sub-Committee on matters which fall within the scope of the activities of each of those Sub-Committees.

Forum Powers

Z1.6 Without prejudice to any other rights or powers granted to the Forum in this Section Z, the Forum shall, in accordance with the provisions of this Section Z, have the power to:

(a) make written representations in relation to the purpose or effect of any Draft Proposal or Modification Proposal which:

(i) is likely to affect this Section Z;

(ii) is likely to affect the provisions relating to the Alt HAN Charges at Section K (Charging Methodology);

(iii) relates to other parts of the Code, but may have a material effect on the Alt HAN Arrangements;

(b) appoint and remove professional advisers;

(c) consider, approve and authorise the entering into by AltHANCo of contracts; and

(d) do anything else necessary for, or reasonably incidental to, the fulfilment of its functions under this Section Z.

Forum Membership

Appointment of Members

Z1.7 Each Relevant Supplier Party:

(a) shall nominate one person to represent it in the Forum; and

(b) may at any time nominate a different person for that purpose, in replacement for any person previously nominated,

where all such nominations shall be made in writing to the Alt HAN Secretariat, and the Forum shall be composed of each of the persons (**Forum Members**) who are from time to time so nominated by the Relevant Supplier Parties.

Z1.8 A person may be nominated as a Forum Member by, may represent, and may vote on behalf of any two or more Relevant Supplier Parties (but shall not be entitled to exercise any rights to vote in such manner as to vote for more than one outcome in respect of any resolution).

Z1.9 Each Forum Member must be an individual, and cannot be a body corporate, association or partnership.

Election of Forum Chair and Alternate Chair

Z1.10 The Forum Members:

(a) shall, as the first item of business at the first meeting of the Forum, elect one person to serve as chair of the Forum (the **Forum Chair**) and one person to serve as alternate to the chair of the Forum (the **Alternate Chair**); and

(b) may at any subsequent time elect a different person to either role, in replacement for any person previously elected.

Z1.11 The Forum Chair and Alternate Chair may each be a Forum Member or any other person on whose appointment to such role the Forum is resolved.

Z1.12 The Forum may decide that the person elected as the Forum Chair (or, where that person is in employment, his or her employer) shall be compensated for such time as he or she spends performing the role of the Forum Chair in such amount, or at such rate, as the Forum may determine.

Z1.13 Notwithstanding the provisions of Section Z1.26, the election of a Forum Chair and Alternate Chair shall be by a simple majority vote of Forum Members present at the meeting at which that election takes place, each Forum Member being entitled to exercise a single vote.

Proceedings of the Forum

Meetings of the Forum

Z1.14 The Forum shall hold meetings with such frequency as it may determine or the Forum Chair may direct, but in any event shall meet as often as necessary in order to ensure the efficient performance of its functions, and at least once in every two month period.

Z1.15 The location and timing of each meeting shall be determined by the Forum or, where no such determination has been made, by the Forum Chair.

Z1.16 Forum Members may attend a meeting by telephone conference or other technological means (provided that each Forum Member attending the meeting acknowledges that he or she can communicate with each of the others).

Z1.17 Subject to the other provisions of this Section Z, the Forum may regulate the conduct of its meetings as it sees fit.

Alternates

Z1.18 Each Forum Member may, in each case by notice in writing to the Alt HAN Secretariat, appoint another person from time to time to act as his or her alternate.

Z1.19 Where a Forum Member does not attend a Forum meeting, his or her alternate shall be entitled to attend (and count, in the capacity of alternate, towards the quorum at) that meeting, and to exercise all of the functions and powers of the Forum Member at that meeting.

Z1.20 A person appointed as an alternate by any Forum Member:

(a) shall immediately cease to be an alternate if the appointing person ceases to be a Forum Member; and

(b) may be removed or replaced by that Forum Member from time to time, by notice in writing to the Alt HAN Secretariat.

Z1.21 A person may be appointed as an alternate by:

(a) a Forum Member who represents two or more Relevant Supplier Parties; or

(b) two or more Forum Members,

but in either case shall not be entitled to exercise any rights to vote in such manner as to vote for more than one outcome in respect of any resolution.

Z1.22 Unless the context otherwise requires, any reference in this Section Z to:

(a) a Forum Member shall be construed as including a reference to that Forum Member's alternate;

(b) the Forum Chair shall be construed as including, where the Forum Chair is unable to be available to perform his or her role, a reference to the Alternate Chair.

Quorum and Attendance of the Forum Chair

Z1.23 No decision may be made at any meeting of the Forum unless:

(a) that meeting is quorate, which shall be treated as being the case only if either:

(i) at least one half of all Forum Members nominated at that time are present at that meeting; or

(ii) the Forum Members who are present at that meeting are entitled to exercise at least two-thirds of the votes available to be cast; and

(b) the Forum Chair is present at that meeting.

Forum Chair

Z1.24 The Forum Chair shall preside at every meeting of the Forum and, if he or she is unable to attend any meeting, shall ensure that the Alternate Chair attends the meeting to act as Forum Chair.

Voting

Z1.25 Each Forum Member shall be entitled to attend, and to speak and vote, at every meeting of the Forum.

Z1.26 All decisions of the Forum shall be by resolution. Subject to Section Z1.13, in order for a resolution of the Forum to be passed at a meeting, a weighted majority of Forum Members present at that meeting must vote in favour of that resolution.

Z1.27 For these purposes:

(a) a number of votes shall be attributed to each Relevant Supplier Party in accordance with Sections Z1.28 to Z1.30 (the **Supplier Weighted Vote**); and

(b) each Forum Member shall be entitled to exercise a number of votes corresponding to the aggregate of the Supplier Weighted Votes of the Relevant Supplier Parties which that Forum Member represents.

Z1.28 Where one or more Supplier Parties have been notified by the DCC that Alt HAN Charges are payable in respect of all or any part of the Relevant Preceding Period, the Supplier Weighted Vote for each Relevant Supplier Party shall be calculated as follows:

$$SWV_p = \frac{AHC_{RPP}}{TAHC_{RPP}} \times 1000$$

Where:

$\mathrm{SWV_p}$ means the Supplier Weighted Vote for that Relevant Supplier Party;

AHC_{RPP} means the Alt HAN Charges that were payable by that Relevant Supplier Party in respect of the Relevant Preceding Period, as calculated by the DCC in accordance with the Charging Methodology;

$TAHC_{RPP}$ means the total amount of the Alt HAN Charges that were payable by all Relevant Supplier Parties in respect of the Relevant Preceding Period, as calculated by the DCC in accordance with the Charging Methodology.

Z1.29 Where the circumstances described in Section Z1.28 do not apply, the Supplier Weighted Vote for each Relevant Supplier Party shall be calculated as follows:

$$SWV_p = \frac{MPxN_p}{MPxN_{All\_p}} \times 1000$$

Where:

SWV_p	means the Supplier Weighted Vote for that Relevant Supplier Party;
$MPxN_p$	means the total number of MPANs and MPRNs related to Domestic Premises for which the Relevant Supplier Party was the Responsible Supplier at 24:00 on the last day of the Relevant Preceding Period;
$MPxN_{All\_p}$	means the sum of the values of MPxNp for all Relevant Supplier Parties.

Z1.30 For the purposes of Sections Z1.28 and Z1.29:

(a) in calculating the Supplier Weighted Vote, any fraction of a number of votes shall be rounded to the nearest whole number (and 0.5 of a vote shall be rounded upwards);

(b) the Supplier Weighted Vote shall never have a value less than 1 (one);

(c) the **Relevant Preceding Period** shall be:

(i) in relation to any vote at a Forum meeting taking place in the period between 16 May and 15 November (inclusive) in any year, the month of April falling immediately prior to the start of that period; and

(ii) in relation to any vote at a Forum meeting taking place in the period between 16 November in any year and 15 May in the following year, the month of October falling immediately prior to the start of that period; and

(d) any information provided by the DCC for the purposes of calculating the Supplier Weighted Vote shall be deemed to be accurate unless and until the contrary is proved.

Z1.31 A resolution put to a vote at a Forum meeting shall be passed if the number of votes in favour of that resolution correspond to more than 50% of the total number of votes which all Forum Members attending that meeting are entitled to exercise.

Z1.32 The voting process, counting of votes, and calculation of Supplier Weighted Votes in respect of all resolutions which are required to be passed by a weighted majority of Forum Members shall take place in accordance with the Forum Voting Protocol. The Forum Voting Protocol may specify obligations on the DCC or any Party to provide information, or otherwise take any steps, for the purpose of facilitating that process, count or calculation.

Meeting Notice and Papers

Z1.33 Each meeting that the Forum determines, or the Forum Chair directs, is to be held shall be convened by the Alt HAN Secretariat. Such meeting shall be convened on at least 5 Working Days' advance notice (or such shorter period as the Forum may approve). Such notice shall be given to:

(a) each of the Forum Members (and any appointed alternates);

(b) each of the persons referred to in Section Z1.37; and

(c) each of the Relevant Supplier Parties.

Z1.34 The notice of each Forum meeting shall contain or be accompanied by a statement of the following:

(a) the time, date and location of the meeting;

(b) the arrangements for those wishing to attend the meeting by telephone conference or other technological means; and

(c) an agenda and any supporting papers.

Z1.35 The agenda for each Forum meeting shall include any such matters as:

(a) the Forum has determined;

(b) the Forum Chair has directed, or

(c) any two or more Relevant Supplier Parties (not being Parties which have the same ultimate holding company) have requested for inclusion.

Z1.36 The proceedings of a Forum meeting shall not be invalidated by the accidental omission to give notice of the meeting to (or non-receipt of that notice by) any person entitled to receive it.

Attendance by Other Persons

Z1.37 One representative from each of the following persons shall be entitled to attend and speak (but not vote) at any meeting of the Forum:

(a) the Secretary of State;

(b) the Authority; and

(c) any other person that the Forum determines, or the Forum Chair directs, should be invited to attend.

Z1.38 The Forum Chair may (at his or her discretion on grounds of confidentiality) exclude from any part of a Forum meeting any person admitted pursuant to Section Z1.37(c).

Minutes of Forum Meetings

Z1.39 The Alt HAN Secretariat shall, within 10 Working Days of each Forum meeting, circulate copies of the minutes of that meeting to each of the Forum Members, the Secretary of State and the Authority.

Z1.40 If any Forum Member, the Secretary of State or the Authority disagrees with any item in the minutes, he or she shall at the next Forum meeting notify the Forum Chair of the matters which are the cause of the disagreement, and those matters shall be discussed at that meeting.

Z1.41 The Alt HAN Secretariat shall maintain a record of all resolutions voted on by the Forum, which shall indicate how each Forum Member voted on each resolution and (where applicable) what voting share was attributable to that Forum Member at that meeting, and shall make such record available on request to any Relevant Supplier Party, the Secretary of State and the Authority.

Forum Sub-Groups

Establishing Forum Sub-Groups

Z1.42 The Forum may establish committees (**Forum Sub-Groups**) for the purposes of doing or assisting the Forum in doing anything to be done by the Forum pursuant to this Section Z.

Z1.43 The Forum may establish a Forum Sub-Group on a standing basis or for a fixed period or a finite purpose.

Z1.44 The Forum may decide that any Forum Sub-Group is to be dissolved.

Z1.45 The Forum may delegate to any Forum Sub-Group such of the duties, powers and functions of the Forum as the Forum may specify.

Membership of Forum Sub-Groups

Z1.46 Each Forum Sub-Group shall be composed of such persons of suitable experience and qualifications as the Forum shall decide and as are willing to serve thereon (**Forum Sub-Group Members**), which may include any Forum Member.

Z1.47 Each Forum Sub-Group Member must be an individual, and cannot be a body corporate, association or partnership.

Z1.48 Before establishing any Forum Sub-Group, the Forum shall invite (by such means as it considers appropriate) applications from individuals who wish to serve on the Forum Sub-Group.

Z1.49 Once a Forum Sub-Group has been established, the Forum may admit such additional persons as Forum Sub-Group Members, or remove any person from being a Forum Sub-Group Member, as the Forum considers appropriate (including on the application of any Relevant Supplier Party or any existing Forum Sub-Group Member).

Z1.50 Each Forum Sub-Group Member shall, when acting in that capacity:

(a) act independently, not as a delegate, and without undue regard to the interests of any Related Person; and

(b) act in a manner designed to facilitate the performance by the Forum of its duties under this Section Z.

Z1.51 Each person appointed as a Forum Sub-Group Member must confirm in writing to the Alt HAN Secretariat (for the benefit of AltHANCo and each Relevant Supplier Party) that that person:

(a) agrees to act as a Forum Sub-Group Member in accordance with this Section Z, including the requirements of Section Z1.50; and

(b) will be available as reasonably required throughout his or her term of office both to attend Forum Sub-Group meetings and to undertake work outside those meetings as may reasonably be required.

Z1.52 The Forum may, either generally or in relation to specific cases, approve:

(a) the payment to a Forum Sub-Group Member (or, where that person is in employment, his or her employer) of compensation for such time as he or she spends performing the role of a Forum Sub-Group Member; and

(b) the amount, rate, or means of calculation of such payment.

Terms of Reference and Procedure of Forum Sub-Groups

Z1.53 The Forum shall set out in writing any such duties, powers and functions of the Forum as it has delegated to each Forum Sub-Group.

Z1.54 The Forum shall specify in writing the terms of reference and procedural rules that are to be followed by each Forum Sub-Group (which may be revised from time to time by the Forum).

Z1.55 Save to the extent otherwise specified by the Forum, a Forum Sub-Group shall conduct its business in such manner as it considers appropriate.

Z1.56 No Forum Sub-Group may delegate any of its duties, powers or functions unless it has been expressly authorised to do so by the Forum.

Z1.57 Any resolutions of a Forum Sub-Group shall:

(a) only have binding effect as a decision of the Forum if the Forum has formally delegated the required decision-making power to that Forum Sub-Group; and

(b) within 10 Working Days of the date of the resolution be notified by the Forum Sub-Group, by means of the Alt HAN Secretariat, to each Relevant Supplier Party.

Appeals from Decisions of a Forum Sub-Group

Z1.58 A Relevant Supplier Party may appeal to the Forum any decision of a Forum Sub-Group which otherwise has binding effect as a decision of the Forum.

Z1.59 An appeal under Section Z1.58 will only be validly made if it is notified to the Alt HAN Secretariat within 20 Working Days of the date on which the Forum Sub-Group made the decision which is subject to appeal.

Z1.60 Where a decision of a Forum Sub-Group is appealed:

(a) the decision shall be treated as having no effect; and

(b) the Forum shall make the decision afresh, which shall then have effect for the purposes of this Section Z in substitution for the decision of the Forum Sub- Group.

Appeals from Decisions of the Forum

Z1.61 A Relevant Supplier Party may appeal to the Authority any decision of the Forum on the ground that it is inconsistent with the Forum Objectives.

Z1.62 An appeal under Section Z1.61 will only be validly made if:

(a) it is notified to the Authority within 30 Working Days of the date on which the Forum made the decision which is subject to appeal;

(b) a copy of the notice is given to the Alt HAN Secretariat on the same date on which it is sent to the Authority; and

(c) the notice specifies why the Relevant Supplier Party which is bringing the appeal considers that the decision which is subject to appeal is inconsistent with the Forum Objectives.

Z1.63 Where the Alt HAN Secretariat is notified of an appeal, it shall arrange for a copy of the notice of appeal to be provided to all Relevant Supplier Parties.

Z1.64 The Authority may adopt such process and procedure as it thinks fit in relation to the determination of any appeal, and may give interim directions as to the effect of the decision being appealed prior to the appeal being determined.

Z1.65 The Forum shall provide such information, support and assistance to the Authority in relation to the determination of any appeal as the Authority may reasonably request.

Z1.66 Where the Authority considers that the Relevant Supplier Party which brought the appeal:

(a) has failed to establish that the decision being appealed is inconsistent with the Forum Objectives, it shall uphold the decision; or

(b) has established that the decision being appealed is inconsistent with the Forum Objectives, it may:

(i) quash the decision;

(ii) remit the decision to be remade by the Forum; and/or

(iii) substitute its own decision for that of the Forum, which shall then have effect for the purposes of this Section Z as if it had been a decision of the Forum.

Z1.67 Any decision of the Authority in relation to a matter appealed to it under Section Z1.61 shall be final and binding for the purposes of this Section Z.

Z2. THE ALT HAN COMPANY

Establishment of AltHANCo

Z2.1 The Alt HAN Company (**AltHANCo**) shall be established in accordance with the Annex to this Section Z.

Z2.2 AltHANCo shall act as a corporate vehicle in relation to the business of the Forum, including entering into any contractual arrangements in order to give effect to any resolution of the Forum which it is necessary or desirable to implement by means of a binding contract.

Z2.3 AltHANCo shall pursue the objectives, fulfil the duties and have the powers set out in Sections Z2.5 to Z2.7, and all decisions on behalf of AltHANCo shall be made by the board of directors of AltHANCo (the **Board**).

Z2.4 The Board shall:

(a) have the membership described in Sections Z2.8 to Z2.22; and

(b) conduct its activities in accordance with the procedures set out in Sections Z2.23 to Z2.45,

and appeals from decisions of the Board may be made to the Forum in accordance with Sections Z2.46 to Z2.48.

AltHANCo Objectives, Duties and Powers

AltHANCo Objectives

Z2.5 AltHANCo shall, in the discharge of its duties and exercise of its powers, always act in a manner designed to achieve the objectives (the **AltHANCo Objectives**) that:

(a) the Forum Objectives are achieved;

(b) this Section Z is given effect in a fair manner without undue discrimination between the Relevant Supplier Parties or classes of Relevant Supplier Party; and

(c) AltHANCo conducts its affairs in an open, transparent and efficient manner.

AltHANCo Duties

Z2.6 AltHANCo shall, in accordance with the provisions of this Section Z:

(a) make all such decisions as may be delegated to it from time to time by the Forum;

(b) undertake such activities as are necessary for the purpose of giving effect to the decisions of the Forum;

(c) comply with any directions given to it by the Forum; and

(d) undertake such other activities and make such other decisions as may from time to time be required in accordance with the provisions of this Section Z.

AltHANCo Powers

Z2.7 Without prejudice to any other rights or powers granted to AltHANCo in this Section Z, AltHANCo shall, in accordance with the provisions of this Section Z, have the power:

(a) where the Forum has so resolved, to pay compensation to the Forum Chair (or to his or her employer) for such time as he or she spends performing the role of the Forum Chair in such amount, or at such rate, as the Forum has determined;

(b) where the Forum has approved the payment of compensation to any Forum Sub- Group Member (or his or her employer) for time spent performing the role of a Forum Sub-Group Member, to pay compensation to that Forum Sub-Group Member (or his or her employer) in such amount, at such rate or in accordance with such means of calculation as the Forum has approved;

(c) to appoint and remove professional advisers;

(d) to enter into contracts; and

(e) to do anything else necessary for, or reasonably incidental to, the discharge of its duties under this Section Z.

Board Membership

Board Composition

Z2.8 The Board shall be composed of no fewer than three persons (each a **Board Member**).

Z2.9 Each Board Member must be an individual, and cannot be a body corporate, association or partnership.

Election of Board Members

Z2.10 The first Board Members to be appointed shall be the persons elected following an election process administered by the Secretary of State prior to this Section Z coming into effect.

Z2.11 Of the persons appointed in accordance with Section Z2.10:

(a) one of them shall retire 12 months after this Section Z comes into effect; and

(b) two of them shall retire 24 months after this Section Z comes into effect,

as specified by the Secretary of State in a notice informing them of their appointment as Board Members following the election process referred to in that Section.

Z2.12 Each Board Member shall serve as such until his or her retirement in accordance with Section Z2.16 or resignation or removal in accordance with Sections Z2.17 and Z2.18.

Z2.13 The Board shall produce, and submit to the Forum, the draft of a document setting out the process by which Board Members are to be elected following the retirement, resignation or removal of those appointed in accordance with Section Z2.10.

Z2.14 The Forum:

(a) shall, subject to such amendments as it may determine, adopt the document produced by the Board which (in the form in which it is adopted) shall be known as the **AltHANCo Election Protocol** ; and

(b) may from time to time determine to modify the AltHANCo Election Protocol in such manner as it may consider appropriate.

Z2.15 The election of Board Members following the retirement, resignation or removal of those appointed in accordance with Section Z2.10 shall be conducted in accordance with the version of the AltHANCo Election Protocol which is in effect at that time.

Retirement of Board Members

Z2.16 Subject to earlier resignation or removal from office in accordance with Sections Z2.17 and Z2.18, and without prejudice to his or her ability to stand for re-election, each Board Member shall retire (at which point his or her office shall become vacant) as follows:

(a) a Board Member appointed in accordance with Section Z2.10 shall retire in accordance with the terms of the appointment specified by the Secretary of State under Section Z2.11; and

(b) a Board Member appointed following a subsequent election shall retire 24 months after that appointment took effect.

Resignation and Removal of Board Members

Z2.17 A Board Member may:

(a) resign his or her office on giving 10 Working Days' notice in writing to the Alt HAN Secretariat;

(b) be removed from office by the AltHANCo Chair on notice to the Alt HAN Secretariat if the Board Member fails to attend in person at least half of the Board meetings held in any period of 12 months; or

(c) be removed from office by the other Board Members (acting unanimously) on notice to the Alt HAN Secretariat if those other Board Members consider that he or she is in breach of the confirmation that was given in accordance with Section Z2.20.

Z2.18 A Board Member shall automatically be removed from office if he or she:

(a) dies;

(b) is admitted to hospital in pursuance of an application under the Mental Health Act 1983 or the Mental Health (Care and Treatment) (Scotland) Act 2003, or an order is made by a court with competent jurisdiction in matters concerning mental disorder for his detention or for the appointment of a receiver, curator bonis or other person with respect to his or her property or affairs;

(c) becomes bankrupt or makes any arrangement or composition with his or her creditors;

(d) becomes prohibited by law from being a director of a company under the Companies Act 2006; or

(e) is convicted of an indictable criminal offence.

Duties of Board Members

Z2.19 A person appointed as a Board Member, when acting in that capacity, shall:

(a) act independently, not as a delegate, and without undue regard to the interests of any Related Person;

(b) exercise reasonable skill and care to the standard reasonably expected of a director of a company under the Companies Act 2006; and

(c) act in a manner designed to facilitate the performance by AltHANCo of its duties under this Section Z.

Board Member Confirmation

Z2.20 Each person elected as a Board Member must confirm in writing to the Alt HAN Secretariat (for the benefit of AltHANCo and each Relevant Supplier Party) that that person:

(a) agrees to act as a Board Member in accordance with this Section Z, including the requirements of Section Z2.19;

(b) agrees to accept appointment as a director of AltHANCo, and to act in such capacity in accordance with this Section Z; and

(c) will be available as reasonably required throughout his or her term of office both to attend Board meetings and to undertake work outside those meetings as may reasonably be required,

and must further complete any and all forms required to be completed by law in order for that person to become a director of AltHANCo.

Z2.21 The appointment of a person who would otherwise be a Board Member shall lapse (and the relevant office shall become vacant) if that person does not comply with the requirements of Section Z2.20 within 20 Working Days after a request from the Alt HAN Secretariat to do so.

Notification of Related Persons

Z2.22 Each Board Member shall, as soon as reasonably practicable after his or her election and upon any later relevant change in circumstance, disclose in writing to the Alt HAN Secretariat, the name of each Related Person who is a Relevant Supplier Party or is otherwise likely to be materially affected by the Alt HAN Arrangements (other than in the capacity of Energy Consumer).

Proceedings of the Board

Appointment of the Chair

Z2.23 The Board Members:

(a) shall, as the first item of business at the first meeting of the Board, elect from among them one person to serve as chair of AltHANCo (the **Chair**); and

(b) may at any subsequent time elect from among them a different person for that purpose, in replacement for any person previously elected.

Meetings of the Board

Z2.24 The Board shall hold meetings with such frequency as it may determine or the Chair may direct, but in any event shall meet as often as necessary in order to ensure the efficient discharge of its duties, and at least once in every two month period.

Z2.25 The location and timing of each meeting shall be determined by the Board or, where no such determination has been made, by the Chair.

Z2.26 Board Members may attend a meeting by telephone conference or other technological means (provided that each Board Member attending the meeting acknowledges that he or she can communicate with each of the others).

Z2.27 Subject to the other provisions of this Section Z (including the Annex), the Board may regulate the conduct of its meetings as it sees fit.

Alternates

Z2.28 The Chair shall, and each other Board Member may, in each case by notice in writing to the Alt HAN Secretariat, appoint another person from time to time to act as his or her alternate.

Z2.29 Where a Board Member does not attend a Board meeting, his or her alternate shall be entitled to attend (and count, in the capacity of alternate, towards the quorum at) that meeting, and to exercise all of the functions and powers of the Board Member at that meeting.

Z2.30 A person appointed as an alternate by any Board Member:

(a) shall immediately cease to be an alternate if the appointing person ceases to be a Board Member; and

(b) may be removed or replaced by that Board Member from time to time, by notice in writing to the Alt HAN Secretariat.

Z2.31 Unless the context otherwise requires, any reference in this Section Z to a Board Member shall be construed as including a reference to that Board Member's alternate.

Quorum

Z2.32 No decision may be made at any meeting of the Board unless a quorum is present, and the quorum at each meeting of the Board shall be two, at least one of whom must be the Chair.

The Chair

Z2.33 The Chair shall preside at every meeting of the Board and, if he or she is unable to attend any meeting, shall ensure that his or her alternate attends the meeting to act as Chair.

Voting

Z2.34 Each Board Member shall be entitled to attend, and to speak and vote, at every meeting of the Board.

Z2.35 All decisions of the Board shall be by ordinary resolution, passed by a simple majority of Board Members present at the meeting at which the vote takes place.

Z2.36 For these purposes the Chair shall be entitled to vote, and if the votes are tied shall have a second and casting vote.

Meeting Notice and Papers

Z2.37 Each meeting that the Board determines, or the Chair directs, is to be held shall be convened by the Alt HAN Secretariat. Such meeting shall be convened on at least 5 Working Days' advance notice (or such shorter period as the Board may approve). Such notice shall be given to:

(a) each of the Board Members (and any appointed alternates);

(b) each of the persons referred to in Section Z2.40; and

(c) each Relevant Supplier Party.

Z2.38 The notice of each Board meeting shall contain or be accompanied by a statement of the following:

(a) the time, date and location of the meeting;

(b) the arrangements for those wishing to attend the meeting by telephone conference or other technological means; and

(c) an agenda and any supporting papers.

Z2.39 The proceedings of a Board meeting shall not be invalidated by the accidental omission to give notice of the meeting to (or non-receipt of that notice by) any person entitled to receive it.

Attendance by Other Persons

Z2.40 One representative from each of the following persons shall be entitled to attend and speak (but not vote) at any meeting of the Board:

(a) the Secretary of State;

(b) the Authority; and

(c) any other person that the Board determines, or the Chair directs, should be invited to attend.

Z2.41 Any Relevant Supplier Party shall be entitled to send a representative to attend a Board meeting provided that the Relevant Supplier Party gives the Alt HAN Secretariat notice of its intention to do so at least 3 Working Days' notice in advance of that meeting (or such shorter period of notice as the Chair may approve). Such a representative shall be entitled to attend and (at the Chair's invitation) speak (but in no circumstances vote) at the meeting.

Z2.42 The Chair may (at his or her discretion on grounds of confidentiality) exclude from any part of a Forum meeting any person admitted pursuant to Section Z2.40(c).

Minutes of Board Meetings

Z2.43 The Alt HAN Secretariat shall, within 10 Working Days of each Board meeting, circulate copies of the minutes of that meeting to each of the Board Members, each Relevant Supplier Party, the Secretary of State and the Authority.

Z2.44 If any Board Member disagrees with any item in the minutes, he or she shall at the next Board meeting notify the Chair of the matters which are the cause of the disagreement, and those matters shall be discussed at that meeting.

Z2.45 The Alt HAN Secretariat shall maintain a record of all resolutions voted on by the Board, which shall indicate how each Board Member voted on each resolution, and shall make such record available on request to any Relevant Supplier Party.

Appeals from Decisions of the Board

Z2.46 A Relevant Supplier Party may appeal to the Forum any decision of the Board.

Z2.47 An appeal under Section Z2.46 will only be validly made if it is notified to the Alt HAN Secretariat within 20 Working Days of the date on which the Board made the decision which is subject to appeal.

Z2.48 Where a decision of the Board is appealed:

(a) the decision shall be treated as having no effect; and

(b) the Forum shall make the decision afresh, which shall then have effect for the purposes of this Section Z in substitution for the decision of the Board.

Z2.49 Where personnel of AltHANCo (or its contractor) reasonably require, in connection with the Alt HAN Activities, access to a premises (or part of a premises) to which members of the public do not generally have free access, then:

(a) each Relevant Supplier Party agrees that these personnel may identify themselves as a representative of the Relevant Supplier Parties when seeking to obtain verbal permission from a relevant Energy Consumer to access such premises or part of a premises (for which purpose, a "relevant Energy Consumer" is one of the Relevant Supplier Party's Energy Consumers who reasonably appears to have authority to grant such permission);

(b) subject to obtaining such permission from a relevant Energy Consumer, these personnel may access such premises or part of a premises as the Relevant Supplier Party's representative for purposes connected to the Alt HAN Activities;

(c) AltHANCo shall ensure that these personnel shall, while attending the premises of Energy Consumers in connection with the Alt HAN Activities, act in accordance with Good Industry Practice, the site rules and reasonable instructions of the owner and/or occupier of the relevant premises notified to such personnel, and all Laws and/or Directives applicable to representatives of Relevant Supplier Parties when attending premises;

(d) AltHANCo shall ensure that each Relevant Supplier Party has the right under the Contract (Rights of Third Parties) Act 1999 to enforce breaches of paragraph (c) above against AltHANCo's contractor in accordance with AltHANCo's contract with such contractor; and

(e) AltHANCo shall ensure that the personnel who attend the premises of Energy Consumers pursuant to this Section Z2.49 are subject to such reasonable vetting, and comply with such reasonable consumer protection measures, as the Forum may determine from time to time.

Z3. ALT HAN SECRETARIAT

Z3.1 AltHANCo shall, from time to time, appoint and remove, or make arrangements for the appointment and removal of, one or more persons to be known as the **Alt HAN Secretariat**.

Z3.2 The Alt HAN Secretariat shall perform those tasks and functions expressly ascribed to it under this Section Z, and any other tasks and functions that either the Forum or AltHANCo may assign to it from time to time. In particular, the Alt HAN Secretariat shall:

(a) support the election of Board Members in accordance with the provisions of the AltHANCo Election Protocol;

(b) support the voting of Forum Members in accordance with the Forum Voting Protocol;

(c) provide such other support to the proceedings of the Forum, any Forum Sub-Group and the Board as each of them may respectively require; and

(d) provide or procure such facilities and services in connection with the operation of the Forum, any Forum Sub-Group and the Board as each of them may respectively require.

Z3.3 AltHANCo shall be responsible for ensuring that the Alt HAN Secretariat undertakes its tasks and functions in respect of this Section Z. In particular, AltHANCo shall ensure that the arrangements under which the Alt HAN Secretariat is appointed oblige it to undertake such tasks and functions on terms no less onerous than those provided for by this Code.

Z3.4 Subject to the other requirements of this Section Z3, the Alt HAN Secretariat shall be appointed by AltHANCo on such terms and conditions and in return for such remuneration as AltHANCo sees fit.

Z3.5 The person appointed as the Alt HAN Secretariat may be the person appointed to carry out the role of Code Administrator and/or the Secretariat.

Z4. ALT HAN COSTS AND BUDGETS

General

Z4.1 The costs and expenses incurred by (or on behalf of) the Forum in exercising its powers, performing its functions and discharging its duties in respect of this Section Z shall be incurred by AltHANCo, and the DCC shall provide AltHANCo:

(a) with the funds necessary to meet such costs and expenses; and

(b) with the funds necessary to meet all other costs and expenses incurred by AltHANCo in the exercise of its duties, powers and functions under this Section Z.

Alt HAN Costs and Expenses

Z4.2 The costs and expenses capable of recovery under this Section Z4 (the **Alt HAN Costs**) shall be all the reasonable costs and expenses incurred:

(a) subject to Section Z4.3, by the Forum Chair, Alternate Chair, Forum Members, Board Members and Forum Sub-Group Members in their capacities as such;

(b) by AltHANCo under or in connection with contracts that AltHANCo has entered into in accordance with this Section Z, including in particular any contracts for:

(i) the acquisition of any services which comprise or form a part of the Alt HAN Activities;

(ii) the provision of any Alt HAN Services;

(iii) the appointment of the Forum Chair;

(iv) the appointment of Forum Sub-Group Members;

(v) the appointment of the Alt HAN Secretariat; and

(vi) the appointment of advisers;

(c) by AltHANCo under or in connection with the DAB Phase Financing (the "**DAB Phase Financing Alt HAN Costs**");

(d) by AltHANCo under or in connection with the Roll Out Phase Financing (the "**Roll Out Financing Alt HAN Costs**"); and

(e) by AltHANCo under or in connection with any provision of this Section Z,

(in each case) provided that such costs or expenses are provided for in, or otherwise consistent with, an Approved Alt HAN Budget or an Approved Alt HAN Financing Budget.

Z4.3 Subject to the terms of those contracts referred to in Section Z4.2(b):

(a) the Forum Chair, Alternate Chair, Forum Members, Board Members and Forum Sub-Group Members shall be entitled to recover all reasonable travel expenses properly incurred by them in their roles as such (and the Board shall adopt a policy that sets out guidelines regarding what constitutes reasonable travel expenses);

(b) no Alternate Chair, Forum Member or Board Member shall be entitled to a salary in respect of his or her role as such, or to any payment in respect of the time he or she spends in performing that role; and

(c) no Forum Sub-Group Member shall be entitled to a salary in respect of his or her role as such, or to any payment in respect of the time he or she spends in performing that role, except to the extent that the Forum has approved any such payment.

Z4.4 Where the Forum Chair, Alternate Chair or any Forum Member, Board Member or Forum Sub-Group Member wishes to recover any cost or expense (excepting, in the case of the Forum Chair, any regular payment of salary for which no claim is required to be made) he or she shall submit evidence of the cost or expense in question to the Board (or a named person approved by the Board) for approval.

Z4.5 Any cost or expenses referred to in Section Z4.4 shall only be approved to the extent that it is an Alt HAN Cost, and only if the evidence is submitted in a timely manner (and in any event on or before the 20th Working Day following the end of the relevant Regulatory Year). Once approved, the evidence of the Alt HAN Cost shall be submitted to AltHANCo for payment.

Z4.6 Within 20 Working Days following receipt of evidence of an Alt HAN Cost that has been approved in accordance with Section Z4.5, AltHANCo shall pay the relevant amount to the Forum Chair, Alternate Chair, Forum Member, Board Member or Forum Sub-Group Member making the claim.

Alt HAN Costs to be Reimbursed by the DCC

Z4.7 The Alt HAN Costs incurred by AltHANCo shall be reimbursed to AltHANCo by the DCC. Nothing in Section M2 (Limitations of Liability) shall limit the DCC's liability to reimburse AltHANCo for the AltHANCo Costs.

Z4.8 AltHANCo may periodically invoice the DCC for the Alt HAN Costs incurred, or reasonably expected to be incurred, by AltHANCo in accordance with the Approved Alt HAN Budget or Approved Alt HAN Financing Budget, provided that AltHANCo shall deduct from such invoice any amounts that represent previous overpayments by the DCC (due to the inaccuracy of AltHANCo estimates, or otherwise) on the basis that AltHANCo shall:

(a) only deduct from an invoice for DAB Phase Financing Alt HAN Costs any previous overpayment in respect of a DAB Phase Financing Alt HAN Cost; and

(b) only deduct from an invoice for Roll Out Financing Alt HAN Costs any previous overpayment in respect of a Roll Out Financing Alt HAN Cost.

Z4.9 The DCC shall pay each invoice submitted by AltHANCo in accordance with Section Z4.7 within 10 Working Days of receipt of such invoice by the DCC, to the account or accounts for payment specified by AltHANCo to the DCC from time to time.

Z4.10 It is acknowledged that the DCC is entitled to recover amounts paid by it to AltHANCo in accordance with this Section Z4 through the Charges (subject to the requirements of the DCC Licence).

Z4.11 In the event that the DCC does not pay AltHANCo in accordance with Section Z4.9, and subject to prior approval from the Authority, AltHANCo may invoice the Relevant Supplier Parties for the unpaid amount (and those Parties shall pay the invoiced amounts to AltHANCo as if they were Charges).

Z4.12 Where Section Z4.11 applies, the amount to be paid by each Relevant Supplier Party shall, unless the Authority approves or directs the use of an alternative methodology, be the same as the amount that the Relevant Supplier Party would have paid in Fixed Alt HAN Charges and in Explicit Charges under Section K7.6(j), calculated in accordance with the Charging Methodology, had the amounts been recovered by the DCC through the Charges.

Z4.13 Any amounts paid by a Relevant Supplier Party in accordance with Section Z4.12 shall be reimbursed by AltHANCo to that Relevant Supplier Party (plus interest at the Non- Default Interest Rate) at such time as the Authority may determine.

Budgets and Work Plans

Timetable

Z4.14 The Board shall take all reasonable steps to give effect to the provisions of Sections Z4.15 to Z4.19 so that a copy of each Approved Alt HAN Budget is provided to the DCC by no later than 1 December in the year prior to the commencement of the first Regulatory Year to which that Approved Alt HAN Budget relates.

Draft Budgets and Work Plans

Z4.15 The Board shall during each Regulatory Year prepare and circulate to all Relevant Supplier Parties, the Secretary of State and the Authority a draft budget in respect of Alt HAN Costs for the next two Regulatory Years commencing thereafter (a **Draft Alt HAN Budget**).

Z4.16 Each Draft Alt HAN Budget:

(a) shall set out the Board's good-faith estimate of the Alt HAN Costs that it anticipates will be incurred (or committed to) during each of the relevant Regulatory Years (but excluding DAB Phase Financing Alt HAN Costs and Roll Out Financing Alt HAN Costs to the extent that the Board is satisfied those costs are or will be covered by a separate budget as contemplated under Section Z4.17A);

(b) shall set out how that estimate is composed of the Board's estimates of the total costs and expenses that it anticipates will be incurred (or committed to) during each of the relevant Regulatory Years in relation to:

(i) the carrying out of the Alt HAN Activities;

(ii) the provision of Alt HAN Services in respect of:

(A) installed Shared Solution Alt HAN Equipment;

(B) installed Point-to-Point Alt HAN Equipment; and

(C) Point-to-Point Alt HAN Equipment that has been provided to a Party, but has not yet been installed by or on behalf of a Relevant Supplier Party;

(c) shall be accompanied by a detailed work plan showing the activities and projects to which the relevant costs and expenses relate; and

(d) may make reasonable provision for contingencies.

Z4.17 Each Draft Alt HAN Budget must provide for limits (both individually and in the aggregate) on costs and expenses not expressly provided for in the budget which can be incurred without having to amend the budget.

Z4.17A The Board may prepare and circulate to all Relevant Supplier Parties, the Secretary of State and Authority separate budgets in respect of:

(a) the DAB Phase Financing Alt HAN Costs (a **Draft Alt HAN (DAB Phase) Financing Budget**); and

(b) the Roll Out Financing Alt HAN Costs (a **Draft Alt HAN (Roll Out) Financing Budget).**

Z4.17B Each Draft Alt HAN Financing Budget that the Board decides to prepare and circulate:

(a) shall set out the Board's good-faith estimate of the DAB Phase Financing Alt HAN Costs or, as applicable, Roll Out Financing Alt HAN Costs, that the Board anticipates will be incurred (or committed to) over whatever period the Board may determine provided such period shall be no longer than necessary to support the DAB Phase Financing or Roll Out Phase Financing, (as relevant);

(b) shall be accompanied by evidence showing the basis for any estimate provided in accordance with paragraph (a) above; and

(c) may make reasonable provision for contingencies.

Approval of Budgets

Z4.18 In relation to (1) the Draft Alt HAN Budget circulated in any Regulatory Year in respect of the next two Regulatory Years commencing thereafter and (2) any Draft Alt HAN Financing Budget, the Board shall:

(a) arrange for the circulation to all the Relevant Supplier Parties of the comments received from each Relevant Supplier Party regarding the Draft Alt HAN Budget or Draft Alt HAN Financing Budget during the 20 Working Days following the date of its circulation;

(b) consider and respond to those comments, and circulate its responses to all Relevant Supplier Parties;

(c) to the extent that it considers it appropriate to do so, amend the Draft Alt HAN Budget and/or the accompanying work plan or the Draft Alt HAN Financing Budget in the light of those comments; and

(d) submit that Draft Alt HAN Budget or Draft Alt HAN Financing Budget to the Forum for its approval, subject to any amendments that the Forum may determine,

and (1) the Draft Alt HAN Budget in such form as it may be approved by the Forum shall be the **Approved Alt HAN Budget** for the relevant Regulatory Year and (2) any Draft Alt HAN Financing Budget in such form as it may be approved by the Forum shall be an **Approved Alt HAN Financing Budget** for the period covered by any such Approved Alt HAN Financing Budget.

Z4.19 The Board shall, promptly upon its approval by the Forum, provide the DCC with a copy of the Approved Alt HAN Budget and any Approved Alt HAN Financing Budget, together (in each case) with such supporting information as may reasonably be requested by the DCC.

Amendments to Budgets

Z4.20 The Approved Alt HAN Budget relating to each Regulatory Year may be amended from time to time (whether before, during or after that Regulatory Year, and including in respect of Alt HAN Costs already incurred) and any Approved Alt HAN Financing Budget may be amended from time to time (including in respect of Alt HAN Costs already incurred), provided that, (in each case):

(a) the Board has first followed the procedure set out in Section Z4.18 in relation to the amendment as if it were a Draft Alt HAN Budget or a Draft Alt HAN Financing Budget; and

(b) the Forum has approved either the proposed amendment or such alternative amendment as it may determine.

Provision of Information to the DCC

Timetable

Z4.21 The Board shall take all reasonable steps to give effect to the provisions of Sections Z4.22 to Z4.29 so that a copy of each set of Approved Alt HAN Charging Data is provided to the DCC by no later than 1

December in the year prior to the commencement of the first Regulatory Year to which that Approved Alt HAN Charging Data relates.

Draft Alt HAN Charging Data

Z4.22 The Board shall during each Regulatory Year prepare and circulate to all Relevant Supplier Parties, the Secretary of State and the Authority draft information in respect of the Explicit Charges for Alt HAN Equipment for the next Regulatory Year commencing thereafter (the **Draft Alt HAN Charging Data**).

Z4.23 Each set of Draft Alt HAN Charging Data shall consist of the information:

(a) referred to in Section Z4.24 in respect of Central Shared Solution Alt HAN Equipment; and

(b) referred to in Section Z4.25 in respect of Central Point-to-Point Alt HAN Equipment.

Shared Solution Alt HAN Equipment

Z4.24 The information referred to in this Section Z4.24 is the Board's best estimate of:

(a) the total annual incremental cost of the provision of Alt HAN Services in the relevant Regulatory Year in respect of MPANs and MPRNs associated with premises in respect of which there is (or will be) installed Central Shared Solution Alt HAN Equipment;

(b) the average number of MPANs and MPRNs during the relevant Regulatory Year that will be associated with premises in respect of which there is (or will be) installed Central Shared Solution Alt HAN Equipment (excluding any in relation to which the Responsible Supplier has elected to use Opted-out Alt HAN Equipment); and

(c) the average monthly incremental cost (expressed in £ per Smart Metering System per month) of the provision of Alt HAN Services in the relevant Regulatory Year in relation to each MPAN and MPRN associated with premises in respect of which there is (or will be) installed Central Shared Solution Alt HAN Equipment during that Regulatory Year (excluding any in relation to which the Responsible Supplier has elected to use Opted-out Alt HAN Equipment).

Point-to-Point Alt HAN Equipment

Z4.25 The information referred to in this Section Z4.25 is the Board's best estimate of:

(a) the total annual incremental cost of the provision of Alt HAN Services in the relevant Regulatory Year in respect of Central Point-to-Point Alt HAN Equipment that will be (or will have been) provided to Parties by the end of the relevant Regulatory Year (whether provided during the relevant or previous Regulatory Year);

(b) the average number, during the relevant Regulatory Year, of items of Central Point-to-Point Alt HAN Equipment that will have been provided to Parties (whether provided in the relevant or any previous Regulatory Year);

(c) the average monthly incremental cost (expressed in £ per item of Central Point-to-Point Alt HAN Equipment) of the provision of Alt HAN Services in the relevant Regulatory Year in respect of Central Point-to-Point Alt HAN Equipment that will have been provided to Parties by the end of the Regulatory Year (whether provided during the relevant or any previous Regulatory Year); and

(d) the average monthly incremental cost (expressed in £ per MPAN and MPRN) of the provision of Alt HAN Services in the relevant Regulatory Year in relation to each MPAN and MPRN associated with premises in respect of which there is (or will be) installed Central Point-to-Point Alt HAN Equipment during that Regulatory Year (excluding any in relation to which the Responsible Supplier has elected to use Opted-out Alt HAN Equipment).

Z4.26 Not used.

Z4.27 The incremental costs referred to in Sections Z4.24 and Z4.25 shall include all the costs of making available and providing the relevant Alt HAN Services but shall not include any costs or expenses in relation to the carrying out of the Alt HAN Activities.

Approved Alt HAN Charging Data

Z4.28 In relation to the Draft Alt HAN Charging Data circulated in any Regulatory Year in respect of the next Regulatory Year commencing thereafter, the Board shall:

(a) arrange for the circulation to all the Relevant Supplier Parties of the comments received from each Relevant Supplier Party regarding the Draft Alt HAN Charging Data during the 20 Working Days following the date of its circulation;

(b) consider and respond to those comments, and circulate its responses to all Relevant Supplier Parties;

(c) to the extent that it considers it appropriate to do so (consistent with Section Z4.27) amend the Draft Alt HAN Charging Data; and

(d) submit that Draft Alt HAN Charging Data to the Forum for its approval, subject to any amendments that the Forum may (consistent with Section Z4.27) determine,

and the Draft Alt HAN Charging Data in such form as it may be approved by the Forum shall be the **Approved Alt HAN Charging Data** for the relevant Regulatory Year.

Z4.29 The Board shall, promptly upon its approval by the Forum, for the purposes of the determination by the DCC of Explicit Charges under Section K7.6(j), provide the DCC with a copy of the Approved Alt HAN Charging Data together with such supporting information as may reasonably be requested by the DCC.

The Alt HAN Inventory

Establishment and Maintenance of the Alt HAN Inventory

Z4.30 The Forum shall ensure that a database (the **Alt HAN Inventory**) is established and at all times maintained which shall include data in respect of:

(a) Central Shared Solution Alt HAN Equipment and Central Point-to-Point Alt HAN Equipment which has been installed in respect of premises, and the MPANs and MPRNs that are associated with those premises;

(b) Opted-out Alt HAN Equipment which has been installed at premises, and the MPANs and MPRNs associated with those premises; and

(c) where Opted-out Alt HAN Equipment has been installed in respect of premises, whether any Relevant Supplier Party which is the Responsible Supplier for a Smart Metering System that is capable of using that Opted-out Alt HAN Equipment has elected to use it in respect of an MPAN or MPRN with which it is associated.

Z4.31 Each Relevant Supplier Party shall ensure that the Alt HAN Inventory is promptly updated upon:

(a) the installation in respect of premises of Alt HAN Equipment which is capable of being used by a Smart Metering System in respect of which that Party is the Responsible Supplier;

(b) that Party electing either:

(i) to use any Opted-out Alt HAN Equipment which is capable of being used by a Smart Metering System in respect of which it is the Responsible Supplier; or

(ii) to cease to use any such Opted-out Alt HAN Equipment.

Z4.32 When a Relevant Supplier Party ensures that the Alt HAN Inventory is updated in accordance with Section Z4.31(a), it shall also ensure that the Alt HAN Inventory records whether the Alt HAN Equipment which has been installed is Opted-out Alt HAN Equipment or otherwise.

Z4.33 The information contained on the Alt HAN Inventory at any time shall be treated as conclusive evidence of whether a Relevant Supplier Party has elected at that time to use any Opted-out Alt HAN Equipment in respect of an MPAN or MPRN.

Z4.34 The Forum shall ensure that all Relevant Supplier Parties have available to them a means by which they can ensure that the Alt HAN Inventory is updated in accordance the requirements of Sections Z4.31 and Z4.32.

Provision of Information to the DCC

Z4.35 In each month of each year, the Board shall provide to the DCC the information set out in Section Z4.36, so that the information is:

(a) obtained by extracting it from the Alt HAN Inventory on the 15th day of that month; and

(b) provided to the DCC within five Working Days of being obtained.

Z4.36 The information set out in this Section Z4.36 is:

(a) for the purposes of the Explicit Charging Metric referred to at Section K7.5(t) ('shared solution Alt HAN Equipment'), a list of MPANs and MPRNs associated with premises in respect of which there is installed Central Shared Solution Alt HAN Equipment (excluding any MPAN or MPRN associated with premises in relation to which the Responsible Supplier has elected to use Opted-out Alt HAN Equipment);

(b) for the purposes of the Explicit Charging Metric referred to at Section K7.5(u) ('point-to-point solution Alt HAN Equipment'), a list of MPANs and MPRNs associated with premises in respect of which there is installed Central Point-to-Point Alt HAN Equipment to which the Alt HAN Services relate (excluding any MPAN or MPRN associated with premises in relation to which the Responsible Supplier has elected to use Opted-out Alt HAN Equipment); and

(c) for the purposes of the Explicit Charging Metric referred to at Section K7.5(v) ('stock level point-to-point solution Alt HAN Equipment'):

(i) a list of Parties which have been provided with Central Point-to-Point Alt HAN Equipment which has not yet been installed by or on behalf of a Relevant Supplier Party; and

(ii) a statement of the number of items of Central Point-to-Point Alt HAN Equipment which have been provided to each such Party and not yet installed by or on behalf of a Relevant Supplier Party.

Reports

Z4.37 The Board shall, as soon as is reasonably practicable following the end of each Regulatory Year, produce and circulate to:

(a) the Relevant Supplier Parties; and

(b) on request, the Secretary of State and the Authority,

a report on the Alt HAN Costs incurred (or committed to) during that Regulatory Year and the activities and projects to which those Alt HAN Costs relate.

Audit

Z4.38 The Board shall arrange for the monies paid by and to AltHANCo pursuant to this Section Z4 during each Regulatory Year to be audited by a firm of chartered accountants on an annual basis in order to verify whether the requirements of this Section Z4 have been met.

Z4.39 The Board shall send a copy of such auditor's report to all Relevant Supplier Parties and to the Authority within 10 Working Days of its receipt by the Board.

Z4.40 The Authority may from time to time require the Board to provide any information in relation to the Alt HAN Costs that the Authority may specify or describe in a notice given to the Board in accordance with this Section Z4.40, and the Board shall ensure that all such information is provided to the Authority by any date and in any format that the Authority may specify for that purpose.

Z4.41 The Authority may arrange for any such audit of the accounts and financial information of AltHANCo as it may consider appropriate for the purpose of verifying whether or not the Alt HAN Costs have been economically and efficiently incurred, and where it does so the Board shall co-operate fully with the Authority and any person acting on its behalf in order to ensure that any such audit is effective for that purpose.

Z5. TRANSITIONAL PROVISIONS

Forum Members

Z5.1 Where, prior to the coming into force of this Section Z, a Relevant Supplier Party:

(a) nominated a person to represent it in the Forum; and

(b) did not at a later date nominate any different person for that purpose in replacement for the person previously nominated, the person so nominated shall be treated as being a Forum Member on the date on which this Section Z comes into force.

Z5.2 For the purposes of this Section Z5, a person shall be treated as having been nominated by a Relevant Supplier Party if:

(a) that nomination was made in writing to the Secretary of State; and

(b) the nominating Party is a Relevant Supplier Party on the date on which this Section Z comes into force.

Forum Decisions

Z5.3 Where, prior to the coming into force of this Section Z, a decision was made:

(a) at a meeting of persons who were, at the date of that meeting, nominated by Relevant Supplier Parties to represent their interests in the Forum;

(b) in circumstances in which that meeting would be quorate if it took place on the day on which this Section Z comes into force;

(c) in relation to a matter on which a decision could be made by the Forum in accordance with this Section Z if it were made on the date on which this Section Z comes into force;

(d) in accordance with a process which could properly be followed by the Forum if it were followed on the date on which this Section Z comes into force;

(e) in a manner that is substantially consistent with the Forum Voting Protocol applicable on the date on which this Section Z comes into force;

(f) such that, if each person exercising a vote in respect of the relevant resolution at that meeting did so in the same way at a meeting taking place on the day on which this Section Z comes into force, the decision would be the same,

then that decision shall be treated as a decision of the Forum made on the date on which this Section Z comes into force, and for the purposes of this Section Z5 shall be referred to as a **Transitional Decision**.

Contrary Decisions

Z5.4 The making of a Transitional Decision shall not preclude the Forum from making any contrary decision on or after the date on which this Section Z comes into force, in which case the later decision shall prevail.

Forum Sub-Groups

Z5.5 By virtue of one or more Transitional Decisions, a Forum Sub-Group may be treated on the date on which this Section Z comes into force as being established and having duties, powers or functions delegated to it by the Forum, but no decision that was made by any Forum Sub-Group Members in any meeting prior to this Section Z coming into force shall be treated as having any binding effect.

Appeals

Z5.6 A Transitional Decision shall be capable of appeal, and the provisions of Sections Z1.61 to Z1.67 (Appeals from Decisions of the Forum) shall apply to it as they do to any other decision of the Forum.

Board Decisions

Z5.7 Where:

(a) prior to the coming into effect of this Section Z, any decision was made by the Board; and

(b) by virtue of paragraph 3 of the Annex to this Section Z, that decision has effect on and from the date on which this Section Z comes into effect,

that decision shall be capable of appeal, the provisions of Sections Z2.46 to Z2.48 (Appeals from Decisions of the Board) shall apply in relation to it as they do to any other decision of the Board, and for the purposes of those Sections the decision shall be treated as if it were made on the date on which this Section Z comes into effect.

Z6. DEFINITIONS

Z6.1 For the purpose of this Section Z, unless the context otherwise requires, the following words shall have the meaning given to them below:

Alt HAN Activities has the meaning given to that expression in Standard Condition 55.6 of the Electricity Supply Licence and Standard Condition 49.6 of the Gas Supply Licence

Alt HAN Costs has the meaning given to that expression in Section Z4.2 (Alt HAN Costs and Expenses).

Alt HAN Equipment has the meaning given to that expression in Standard Condition 55.8 of the Electricity Supply Licence and Standard Condition 49.8 of the Gas Supply Licence.

Alt HAN Inventory has the meaning given to that expression in Section Z4.30 (Establishment and Maintenance of the Alt HAN Inventory).

Alt HAN Secretariat has the meaning given to that expression in Section Z3.1 (Alt HAN Secretariat).

Alt HAN Services has the meaning given to that expression in Standard Condition 55.7 of the Electricity Supply Licence and Standard Condition 49.7 of the Gas Supply Licence.

Alternate Chair has the meaning given to that expression in Section Z1.10 (Election of Forum Chair and Alternate Chair).

AltHANCo has the meaning given to that expression in Section Z2.1 (Establishment of AltHANCo).

AltHANCo Election Protocol has the meaning given to that expression in Section Z2.14 (Election of Board Members).

AltHANCo Objectives has the meaning given to that expression in Section Z2.5 (AltHANCo Objectives).

Approved Alt HAN Budget has the meaning given to that expression in Section Z4.18 (Approval of Budgets).

Approved Alt HAN Charging Data has the meaning given to that expression in Section Z4.28 (Approved Alt HAN Charging Data).

Approved Alt HAN Financing Budget has the meaning given to that expression in Section Z4.18 (Approval of Budgets).

Board has the meaning given to that expression in Section Z2.3 (Establishment of AltHANCo).

Board Member has the meaning given to that expression in Section Z2.8 (Board Composition).

Central Point-to-Point Alt HAN Equipment means Point-to-Point Alt HAN Equipment which is not Opted-out Alt HAN Equipment.

Central Shared Solution Alt HAN Equipment means Shared Solution Alt HAN Equipment which is not Opted-out Alt HAN Equipment.

Chair has the meaning given to that expression in Section Z2.23 (Appointment of the Chair).

DAB Phase Financing means any debt financing entered into by AltHANCo for the purpose of financing Alt HAN Costs in respect of:

a. the design assurance and build phase of the technological solution development of the Alt HAN Equipment;
b. the operational mobilisation work necessary for the roll-out of the chosen Alt HAN Equipment; and
c. fees, costs and expenses in connection with the same.

DAB Phase Financing Alt HAN Costs has the meaning given that expression in Section Z4.2(c) (Alt HAN Costs and Expenses).

DCC Licence means the licence for the provision of a smart meter communication service granted pursuant to sections 6(1A) and (1C) of the Electricity Act 1989.

Draft Alt HAN Budget has the meaning given to that expression in Section Z4.15 (Draft Budgets and Work Plans).

Draft Alt HAN Charging Data has the meaning given to that expression in Section Z4.22 (Draft Alt HAN Charging Data).

Draft Alt HAN Financing Budget means a Draft Alt HAN (DAB Phase) Financing Budget, or a Draft Alt HAN (Roll Out) Financing Budget.

Draft Alt HAN (DAB Phase) Financing Budget has the meaning given to that expression in Section Z4.17A (Draft Budgets and Work Plans).

Draft Alt HAN (Roll Out) Financing Budget has the meaning given to that expression in Section Z4.17A (Draft Budgets and Work Plans).

Exempt Premises has the meaning given to that expression in Standard Condition 55.10 of the Electricity Supply Licence and Standard Condition 49.10 of the Gas Supply Licence.

Exempt Premises List has the meaning given to that expression in Standard Condition 55.12 of the Electricity Supply Licence and Standard Condition 49.12 of the Gas Supply Licence.

Explicit Charges has the meaning given to that expression in Section K11.1 (Definitions).

Explicit Charging Metrics has the meaning given to that expression in Section K11.1 (Definitions).

Forum Chair has the meaning given to that expression in Section Z1.10 (Election of Forum Chair and Alternate Chair).

Forum Member has the meaning given to that expression in Section Z1.7 (Appointment of Members).

Forum Objectives has the meaning given to that expression in Section Z1.3 (Forum Objectives).

Forum Sub-Group has the meaning given to that expression in Section Z1.42 (Establishing Forum Sub-Groups).

Forum Sub-Group Member has the meaning given to that expression in Section Z1.46 (Membership of Forum Sub-Groups).

Forum Voting Protocol means the SEC Subsidiary Document of that name set out in Appendix [TBC].

Opted-out Alt HAN Equipment means Alt HAN Equipment which is installed and maintained at premises otherwise than under and in accordance with the arrangements set out at this Section Z.

Relevant Preceding Period has the meaning given to that expression in Section Z1.30 (Voting).

Relevant Supplier Party means a Supplier Party which is required in accordance with standard condition 39 of an Electricity Supply Licence or standard condition 33 of a Gas Supply Licence (in each case entitled 'Smart Metering System – Roll-out, Installation and Maintenance') to install a Smart Metering System at any premises.

Roll Out Financing Alt HAN Costs has the meaning given that expression in Section Z4.2(d) (Alt HAN Costs and Expenses).

Roll Out Phase Financing means any debt financing entered into by AltHANCo for the purpose of raising finance to support the roll out of the Alt HAN Equipment, related ancillary services and any fees, costs and expenses in connection with the same.

Supplier Weighted Vote has the meaning given to that expression in Section Z1.27 (Voting).

Transitional Decision has the meaning given to that expression in Section Z5.3 (Forum Decisions).

SEC SCHEDULE 1 – FRAMEWORK AGREEMENT

Dated:________________2013

The Original Parties

and

Smart Energy Code Company Limited

Smart Energy Code Framework Agreement

THIS FRAMEWORK AGREEMENT is made on ______________2013

BETWEEN:

(1). the persons whose details are set out in the Schedule (the "Original Parties"); and

(2). **Smart Energy Code Company Limited** a company incorporated in England and Wales with company number 08430267 ("**SECCo**").

WHEREAS

(A). Certain of the Original Parties are the holders of Energy Licences that oblige them to be a party to, and to comply with, the Smart Energy Code.

(B). The Original Parties that do not hold an Energy Licence, or do not hold an Energy Licence that obliges them to be party to the Smart Energy Code, have chosen to become a party to the Smart Energy Code in order to receive Services from the DCC.

(C). SECCo is a company established to facilitate the operation of the Smart Energy Code.

(D). The Original Parties and SECCo have agreed to give effect to, and to be bound by, the Smart Energy Code in accordance with this Framework Agreement.

NOW IT IS HEREBY AGREED as follows:

1. Interpretation

1.1 In this Framework Agreement, including the recitals hereto, "Smart Energy Code" means the code of that name designated by the Secretary of State pursuant to the smart meter communication licences granted pursuant to the Electricity Act 1989 and the Gas Act 1986, as such code is modified from time to time in accordance with its provisions.

1.2 Subject to clause 1.1 above, the words and expressions used in this Framework Agreement shall be construed and interpreted in accordance with the definitions and provisions regarding interpretation set out in Section A (Definitions and Interpretation) of the Smart Energy Code, as if those definitions and provisions regarding interpretation were set out in this Framework Agreement and as if the references therein to "this Code" were to "this Framework Agreement".

2. Compliance with the Smart Energy Code

2.1 With effect from the date hereof, SECCo and each of the Original Parties hereby undertakes, for the benefit of each other Party from time to time, to comply with the Smart Energy Code in accordance with, and subject to, its terms and conditions.

3. Identity of the Parties

3.1 SECCo and each of the Original Parties acknowledges that it has agreed a mechanism (set out in Section B

(Accession) of the Smart Energy Code) by which New Parties may become bound by the Smart Energy Code, each of whom will then become a Party for the purposes of clause 2 above (and otherwise).

3.2 Each of the Original Parties acknowledges that it has agreed a mechanism (set out in Section M8 (Suspension, Expulsion and Withdrawal) of the Smart Energy Code) by which it may cease to be bound by the Smart Energy Code, from which time it will (subject to Section M8 of the Smart Energy Code) cease to be obliged to comply with the Smart Energy Code.

3.3 SECCo and each of the Original Parties acknowledges that it has agreed a mechanism (set out in Section M8 (Suspension, Expulsion and Withdrawal) of the Smart Energy Code) by which other Parties may cease to be bound by the Smart Energy Code, from which time such other Parties will (subject to Section M8 of the Smart Energy Code) cease to be a Party for the purposes of clause 2 above (and otherwise).

4. Party Details

4.1 The Party Details for each of the Original Parties shall (as at the date hereof, and subject to future amendment in accordance with Section M6 (Party Details) of the Smart Energy Code) be those details set out as such in the Schedule.

5. Third Party Rights

5.1 Without prejudice to any provisions of the Smart Energy Code permitting enforcement of the Smart Energy Code by third parties, the Original Parties do not intend that any of the terms or conditions of this Framework Agreement will be enforceable by a third party (whether by virtue of the Contracts (Rights of Third Parties) Act 1999 or otherwise).

6. Counterparts

6.1 This Framework Agreement may be executed in any number of counterparts, each of which shall be an original but all of which together shall constitute one and the same instrument. The counterpart executed by each of the Original Parties shall attach a schedule containing details of the relevant Original Party, all of which schedules together shall comprise the "Schedule".

7. Governing Law and Jurisdiction

7.1 This Framework Agreement and any dispute or claim arising out of or in connection with it (including non-contractual claims) shall be governed by, and construed in accordance with, the laws specified in Section M11 (Miscellaneous) of the Smart Energy Code from time to time for the purpose of disputes or claims arising out of or in connection with the Smart Energy Code.

7.2 In relation to any dispute or claim arising out of or in connection with this Framework Agreement (including in respect of non-contractual claims), each of the Original Parties and SECCo irrevocably agrees to submit to the exclusive jurisdiction of the relevant person, panel, court or other tribunal specified in Section M7 (Dispute Resolution) of the Smart Energy Code from time to time for the purpose of disputes or claims of that nature.

THIS FRAMEWORK AGREEMENT has been executed and delivered as a **DEED** on the date first stated above.

Schedule to the Framework Agreement – Original Parties

(1). The Party's full name.

(2). Whether the Party is a company or a natural person or a partnership etc.

(3). The Party's jurisdiction of incorporation (if applicable).

(4). The Party's registered number (if applicable).

(5). The Party's registered address (or, if not applicable, its principal address).

(6). Where the Party is incorporated or resident outside Great Britain, an address in Great Britain for the receipt of legal notices on the Party's behalf.

(7). The Party's VAT registration number (if applicable).

(8). The Party's address for invoices under the Code.

(9). The Party's address or addresses for all other notices under the Code.

(10). The Party Category into which the Party considers it will initially fall.

(11). The Energy Licences held by the Party (including any for which it has applied).

(12). Details of any Parties that are Affiliates of the Party (where the Party is a company).

(13). Where the Party holds one or more Energy Licences, details of any unique identifiers by which the Party is identified under the MRA and/or the UNC (as applicable).

SEC SCHEDULE 2 – ACCESSION AGREEMENT

Dated:2[XXX]

[New Party]

and

Smart Energy Code Company Limited

Smart Energy Code
Accession Agreement

THIS ACCESSION AGREEMENT is made on2[XXX]

BETWEEN:

(1). [**TBC**] a company incorporated in [Jurisdiction] (registered number [TBC]) whose registered office is at [TBC] (the "**New Party**"); and

(2). **Smart Energy Code Company Limited** a company incorporated in England and Wales with company number 08430267 ("**SECCo**").

WHEREAS

(A). The New Party is either obliged by its Energy Licence to become a party to the Smart Energy Code, or wishes to become a party to the Smart Energy Code in order to receive Services from the DCC.

(B). SECCo is authorised by the Parties to the Smart Energy Code to accept the accession to the Smart Energy Code of the New Party.

NOW IT IS HEREBY AGREED as follows:

1. Interpretation

1.1 In this Accession Agreement, including the recitals hereto, "**Smart Energy Code**" means the code of that name designated by the Secretary of State pursuant to the smart meter communication licences granted pursuant to the Electricity Act 1989 and the Gas Act 1986, as such code is modified from time to time in accordance with its provisions.

1.2 Subject to clause 1.1 above, the words and expressions used in this Accession Agreement shall be construed and interpreted in accordance with the definitions and provisions regarding interpretation set out in Section A (Definitions and Interpretation) of the Smart Energy Code, as if those definitions and provisions regarding interpretation were set out in this Accession Agreement and as if the references therein to "this Code" were to "this Accession Agreement".

2. Compliance with the Smart Energy Code

2.1 With effect from the date hereof, the New Party hereby undertakes, for the benefit of SECCo and each other Party from time to time, to comply with the Smart Energy Code in accordance with, and subject to, its terms and conditions.

3. Identity of the Parties

3.1 The New Party acknowledges that the Original Parties became bound by the Smart Energy Code pursuant to the Framework Agreement, and that each such Original Party is a Party for the purposes of clause 2 above (and otherwise).

3.2 The New Party acknowledges that it has agreed a mechanism (set out in Section B (Accession) of the Smart Energy Code) by which New Parties other than itself may have (or may in the future) become bound by the

Smart Energy Code, each of whom is (or will then become) a Party for the purposes of clause 2 above (and otherwise).

3.3 The New Party acknowledges that it has agreed a mechanism (set out in Section M8 (Suspension, Expulsion and Withdrawal) of the Smart Energy Code) by which it may cease to be bound by the Smart Energy Code, from which time it will (subject to Section M8 of the Smart Energy Code) cease to be obliged to comply with the Smart Energy Code.

3.4 The New Party acknowledges that it has agreed a mechanism (set out in Section M8 (Suspension, Expulsion and Withdrawal) of the Smart Energy Code) by which other Parties may cease to be bound by the Smart Energy Code, from which time such other Parties will (subject to Section M8 of the Smart Energy Code) cease to be a Party for the purposes of clause 2 above (and otherwise).

4. Party Details

4.1 The New Party's Party Details shall (as at the date hereof, and subject to future amendment in accordance with Section M6 (Party Details) of the Smart Energy Code) be those details set out as such in the Schedule.

5. Third Party Rights

5.1 Without prejudice to any provisions of the Smart Energy Code permitting enforcement of the Smart Energy Code by third parties, neither the New Party nor

5.2 SECCo intends that any of the terms or conditions of this Accession Agreement will be enforceable by a third party (whether by virtue of the Contracts (Rights of Third Parties) Act 1999 or otherwise).

6. Execution

6.1 This Accession Agreement may be executed in any number of counterparts, each of which shall be an original but all of which together shall constitute one and the same instrument.

6.2 Where the Code Administrator has provided unexecuted counterparts of this Accession Agreement to the New Party, the New Party should sign (but not date) both counterparts of this Accession Agreement, and return them to the Code Administrator. In doing so, the New Party will be deemed to have authorised SECCo (by its signature of the counterparts) to complete the agreement and to date the counterparts with the date of such completion.

7. Governing Law and Jurisdiction

7.1 This Accession Agreement and any dispute or claim arising out of or in connection with it (including non-contractual claims) shall be governed by, and construed in accordance with, the laws specified in Section M11 (Miscellaneous) of the Smart Energy Code from time to time for the purpose of disputes or claims arising out of or in connection with the Smart Energy Code.

7.2 In relation to any dispute or claim arising out of or in connection with this Accession Agreement (including in respect of non-contractual claims), each of the New Party and SECCo irrevocably agrees to submit to the exclusive jurisdiction of the relevant person, panel, court or other tribunal specified in Section M7 (Dispute Resolution) of the Smart Energy Code from time to time for the purpose of disputes or claims of that nature.

THIS ACCESSION AGREEMENT has been executed and delivered as a **DEED** on the date first stated above.

Schedule to the Accession Agreement – Party Details

[To include the information referred to in paragraphs 6 to 15 (inclusive) of Schedule 5 (Accession Information).]

SEC SCHEDULE 3 – SPECIMEN BILATERAL AGREEMENT

Dated:2[XXX]

[User]

and

[DCC]

Smart Energy Code
Bilateral Agreement

THIS BILATERAL AGREEMENT is made on 2[XXX]

BETWEEN:

(1). [**TBC**] a company incorporated in [Jurisdiction] (registered number [TBC]) whose registered office is at [TBC] (the "**User**"); and

(2). [**TBC**] a company incorporated in [Jurisdiction] (registered number [TBC]) whose registered office is at [TBC] (the "**DCC**").

WHEREAS

(A). The User wishes to procure the Elective Communication Service pursuant to the Smart Energy Code.

(B). The DCC has agreed to provide the Elective Communication Service pursuant to this Bilateral Agreement and the Smart Energy Code, in consideration of the Elective Charges.

NOW IT IS HEREBY AGREED as follows:

1. Interpretation

1.1 In this Bilateral Agreement, unless the context otherwise requires:

"**Elective Charges**" means the charges described as such in Schedule 1.

"**Elective Communication Service**" means the service described as such in Schedule 2.

"**Smart Energy Code**" means the code of that name designated by the Secretary of State pursuant to the smart meter communication licences granted to the DCC pursuant to the Electricity Act 1989 and the Gas Act 1986, as such code is modified from time to time in accordance with its provisions.

1.2 In this Bilateral Agreement, unless the context otherwise requires, references to "Clauses" and "Schedules" are to the clauses of, and schedules to, this Bilateral Agreement.

1.3 Subject to Clauses 1.1 and 1.2, the words and expressions used in this Bilateral Agreement shall be construed and interpreted in accordance with the definitions and provisions regarding interpretation set out in Section A (Definitions and Interpretation) of the Smart Energy Code, as if those definitions and provisions regarding interpretation were set out in this Bilateral Agreement and as if the references therein to "this Code" were to "this Bilateral Agreement".

1.4 The Parties acknowledge that the Smart Energy Code is subject to modification from time to time in accordance with its provisions, and that the Smart Energy Code as so modified from time to time shall apply for the purposes of this Bilateral Agreement. References to Sections of the Smart Energy Code shall be to those sections as modified and/or renumbered from time to time.

1.5 The provisions of this Bilateral Agreement are without prejudice to the rights and obligations of the Parties under the Smart Energy Code. The Parties acknowledge that certain provisions of the Smart Energy Code apply, but such acknowledgments are without prejudice to the potentially broader application of the Smart Energy Code. In the event of any conflict between the provisions of this Bilateral Agreement and the provisions of the Smart Energy Code, the Smart Energy Code shall prevail.

2. Commencement of this Bilateral Agreement

2.1 This Bilateral Agreement shall commence on [TBC][1].

3. Provision of the Elective Communication Services

3.1 The DCC shall provide the Elective Communication Services to the User subject to and in accordance with this Bilateral Agreement and the Smart Energy Code.

3.2 The provision of the Elective Communication Services is subject to the User having completed the User Entry Process. The provision of the Elective Communication Services in respect of any Smart Metering System is subject to that Smart Metering System having been Enrolled.

4. Elective Charges

4.1 The User shall pay the Elective Charges in accordance with Section J (Charges) of the Smart Energy Code.

4.2 [The Elective Charges include a standing charge (as further described in Schedule 1) that is payable by the User regardless of whether or not the Elective Communication Services are requested or provided.][2]

5. Security and Data Privacy

5.1 The Parties acknowledge that the provisions of Section G (Security) of the Smart Energy Code apply.

5.2 The Parties acknowledge that the provisions of Section I (Data Privacy) of the Smart Energy Code apply.

6. Termination or Expiry of this Bilateral Agreement

6.1 Subject to earlier termination in accordance with this Clause 6, this Bilateral Agreement shall expire on [TBC].

6.2 This Bilateral Agreement shall automatically terminate on the User being expelled from, or voluntarily ceasing to be party to, the Smart Energy Code in accordance with Section M8 (Suspension, Expulsion and Withdrawal) of the Smart Energy Code.

6.3 The User shall, at its discretion, be entitled to terminate this Bilateral Agreement on 20 Working Days' prior notice in writing to the DCC.

[1] [*Note: consider whether agreement should be conditional on provision of adequate credit support. If so, also add a termination right linked to failure of credit support.*]

[2] [*Note: delete or retain as applicable.*]

6.4 In the event of termination of this Bilateral Agreement in accordance with Clause 6.3, the User shall not be obliged to pay compensation on termination to the extent such compensation is intended to recover investments made for the purposes of providing the Elective Communication Service where (and to the extent that)the DCC subsequently offers a Service listed in the DCC User Interface Services Schedule that relies upon such investments. Any dispute under this Clause 6.4 may be referred to the Panel for initial determination, but shall ultimately be subject to arbitration.

6.5 Where this Bilateral Agreement terminates in accordance with Clause 6.2 or 6.3, the User shall (subject to Clause 6.4) pay any compensation on termination described in Schedule 1.

7. Suspension

7.1 The User acknowledges that the DCC may suspend provision of the Elective Communication Services where the Panel directs that the DCC should do so pursuant to Section M8 (Suspension, Expulsion and Withdrawal) of the Smart Energy Code. Such suspension shall be without prejudice to any take or pay obligation described in Schedule 1.

8. Communications

8.1 The Parties acknowledge and agree that the provisions of Sections H3 (DCC User Gateway) and M10 (Notices) apply.

9. Amendments

9.1 Without prejudice to Clause 1.4, this Bilateral Agreement may only be amended by agreement in writing by the Parties or in order to give effect to any determination of disputes by the Authority pursuant to the DCC Licence.

9.2 Without prejudice to Clause1.5, the Parties shall amend this Bilateral Agreement where it has become inconsistent with the Smart Energy Code in order to correct such inconsistency (including where the Specimen Bilateral Agreement is modified, in which case the Parties shall amend this Bilateral Agreement in the same manner and to the same extent).

9.3 The User hereby authorises the DCC to make the amendments to this Bilateral Agreement required pursuant to Clause 9.2 on the User's behalf. Where the User disputes the requirement for, or form of, any such amendments made by the DCC on the User's behalf, then the User may refer the matter to the Panel for its determination. Nothing in this Clause 9.3 shall fetter the User's right to refer disputes to the Authority pursuant to the DCC Licence.

10. Miscellaneous

10.1 The Parties acknowledge that the provisions of Sections M2 (Limitations of Liability), M3 (Services FM and Force Majeure), M4 (Confidentiality), and M5 (Intellectual Property Rights) of the Smart Energy Code apply.

10.2 The Parties acknowledge and agree that this Bilateral Agreement may be novated to DCC's successor in accordance with Section M9 (DCC Transfer) of the Smart Energy Code.

10.3 This Bilateral Agreement may be executed in any number of counterparts, each of which shall be an original but all of which together shall constitute one and the same instrument.

10.4 The provisions of Section M11 (Miscellaneous) of the Smart Energy Code shall apply as if set out in this Bilateral Agreement and as if the references therein to "this Code" were to "this Bilateral Agreement".

11. Governing Law and Jurisdiction

11.1 This Bilateral Agreement and any dispute or claim arising out of or in connection with it (including non-contractual claims) shall be governed by, and construed in accordance with, the relevant laws specified in Section M11 (Miscellaneous) of the Smart Energy Code from time to time for the purpose of disputes or claims of that nature.

11.2 In relation to any dispute or claim arising out of or in connection with this Bilateral Agreement (including in respect of non-contractual claims), each of the Parties irrevocably agrees to submit to the exclusive jurisdiction of the relevant person, panel, court or other tribunal specified in Section M7 (Dispute Resolution) of the Smart Energy Code from time to time for the purpose of disputes or claims of that nature.

THIS BILATERAL AGREEMENT has been entered into on the date first stated above.

Schedule 1 – Elective Charges

[Note: to include charges determined in accordance with the Charging Methodology, and to include standing charges and early termination compensation payments where required in accordance with Section H7.]

Schedule 2 – Elective Communication Services

[Note: to identify services in a manner consistent with the DCC User Interface Services Schedule and Section H7.14.]

SEC SCHEDULE 4 – SECCO

1. Background

1.1 Smart Energy Code Company Limited (registered in England and Wales with company number 08430267) ("SECCo") has been established on behalf of the Parties in order to fulfil the Objective (as defined below), and in doing so will act as the contracting body for the Panel.

1.2 It is intended that the shareholders of SECCo shall be limited to Eligible Parties in accordance with this Schedule.

1.3 The Shareholders have agreed that their respective rights as Shareholders shall be regulated by the provisions of this Schedule. The rights of the Eligible Parties as Shareholders are set out exclusively in this Schedule. No other provision of this Code shall apply to the regulation of the rights and obligations of Shareholders in their capacity as Shareholders.

1.4 SECCo has agreed with the Shareholders to comply with the provisions of this Schedule insofar as it relates to SECCo.

2. Additional Definitions and Interpretation

2.1 In this Schedule, except where the context otherwise requires, the following words and expressions shall have the following meanings:

Articles means the articles of association of SECCo, as amended from time to time.

Board means the board of directors of SECCo at the relevant time.

Director means a director of SECCo from time to time.

Eligible Party means a Party that is not the DCC (which, for the avoidance of doubt, does not include SECCo), and which either:

(a) holds an Energy Licence that obliges it to be a party to this Code; or

(b) does not hold an Energy Licence that obliges it to be a party to this Code, but has opted (by notice in writing to the SECCo Secretary) to be a Shareholder.

Objective means acting as a corporate vehicle to assist the Panel in exercising its powers, duties and functions (including entering into contracts where necessary or desirable in order to implement any Panel Decision).

Panel Decision means a resolution of the Panel (or a resolution made by any Sub-Committee to which the Panel has delegated decision-making authority in accordance with Section C7 (Sub-Committees)), and cognate terms shall be construed accordingly.

Retiring Shareholder means either:

(c) a Shareholder that ceases to be a Party; or

(d) a Shareholder that does not hold an Energy Licence that obliges it to be a party to this Code and which gives notice that it no longer wishes to be a Shareholder (such notice to be given in writing to the SECCo Secretary).

SECCo Chair means the chairman of the Board from time to time.

SECCo Secretary means the company secretary of SECCo from time to time.

Share means an ordinary share of £1 each in the share capital of SECCo.

Shareholder means a person from time to time registered as a holder of a Share.

Subscribing Shareholders means each Eligible Party that agreed (prior to the designation of this Code) to become a Shareholder with effect from the designation of this Code.

2.2 Words and expressions defined elsewhere in this Code shall have the same meaning in this Schedule unless the context otherwise requires.

3. Acknowledgement of Preliminary Matters Already Undertaken

3.1 It is acknowledged that resolutions of the Board and of the Shareholders were made prior to the designation of this Code, at which the business set out in annex 1 to this Schedule was undertaken. As set out in that annex, such business is to have effect from the designation of this Code.

3.2 The consequence of the resolutions referred to above is that, with effect from the designation of this Code, each of the Subscribing Shareholders is a Shareholder and each of the Panel Members is a Director.

4. SECCo's Objective

4.1 The Shareholders and SECCo acknowledge and agree that SECCo shall not undertake any activities other than those that are reasonably necessary for carrying out the Objective.

4.2 Each Shareholder acknowledges and agrees that SECCo will have complete independence from its Shareholders in its operations and undertakes not to take any action which obstructs or interferes with, or seeks to obstruct or interfere with, the carrying out of the Objective (provided that this Paragraph 4.2 shall not restrict the exercise of Shareholder rights in order to comply with the requirements of this Schedule).

5. SECCo's Business

5.1 Each Shareholder agrees with each other Shareholder to exercise its rights under this Schedule and as a Shareholder in SECCo so as to ensure that:

(a) SECCo performs and complies with all its obligations under this Code (including without limitation this Schedule) and complies with the restrictions (if any) imposed on it by the Articles; and

(b) SECCo's activities are conducted in accordance with sound and good business practice with a view to achieving the Objective.

6. New Shareholders

6.1 Any Eligible Party, from time to time, which is not a Shareholder may apply to the SECCo Secretary to become a Shareholder. An Eligible Party holding an Energy Licence that obliges it to be a party to this Code shall be deemed to have so applied on its accession to this Code pursuant to Section B (Accession). Upon any such application, the Directors shall either:

(a) procure the transfer to such Eligible Party of one Share then held by a nominee in accordance with Paragraph 7.2 or 7.3; or

(b) allot to such Eligible Party one Share.

6.2 For the purposes of Paragraph 6.1(b), the Shareholders agree that, where no Shares are otherwise available for issue, they will exercise the voting rights attaching to their Shares to procure that all necessary steps are taken to create and/or authorise the issue of further Shares.

7. Dealings with Shares

7.1 Otherwise than in accordance with the following provisions of this Paragraph 7, no Shareholder shall:

(a) pledge, mortgage (whether by way of fixed or floating charge) or otherwise encumber its legal or beneficial interest in its Shares; or

(b) sell, transfer or otherwise dispose of any of such Shares (or any legal or beneficial interest therein); or

(c) enter into any agreement in respect of the votes attached to Shares; or

(d) agree, whether or not subject to any condition precedent or subsequent, to do any of the foregoing.

7.2 Upon written notice by the Board requiring it to do so, a Retiring Shareholder shall pay up all amounts which remain unpaid on any Share held by it. The Retiring Shareholder will transfer its Shares at par to a nominee who will hold the Shares for and on behalf of all the other Shareholders. The nominee will be selected by the Directors. All costs and expenses of such transfer shall be for the account of the Retiring Shareholder.

7.3 If a Retiring Shareholder fails or refuses to transfer any Shares in accordance with its obligations under Paragraph 7.2, the Retiring Shareholder irrevocably appoints by way of security for the failure to perform obligations under this Paragraph 7.3 any Director to execute and deliver a transfer of the Shares from the Retiring Shareholder to a nominee on behalf of the Retiring Shareholder. SECCo may accept the consideration for the transfer (subject to the Retiring Shareholder paying-up all amounts which remain unpaid on any Share) and hold it on trust for the Retiring Shareholder, which acceptance shall be a good discharge to the nominee, and may set off such amounts against the costs and expenses of the transfer. The Directors shall cause the nominee to be registered as the holder of such Share and, following the registration of the transfer, the validity of the proceedings shall not be questioned by SECCo or any Shareholder.

7.4 The nominee referred to in Paragraphs 7.2 and 7.3 shall hold Shares transferred to it until such time as it is directed by the Directors to transfer them (or some of them) in accordance with Paragraph 6.1(a) and for such period (and only for such period) as the nominee holds any Shares, all rights attaching to the Share shall be suspended, including:

(a) the right to receive income and/or capital;

(b) the right to attend and vote or appoint proxies to attend and vote at general meetings of SECCo (whether on a show of hands or on a poll and in the case of proxies only on a poll); and

(c) the right to appoint and remove a Director.

7.5 The Shareholders shall procure that, save in the case of any nominee for the purposes of Paragraphs 7.2 and 7.3:

(a) no person who is not an Eligible Party may at any time become a Shareholder; and

(b) no Eligible Party shall hold more than one Share at any time,

and the Directors shall be entitled to refuse to allot and/or to register any transfer of a Share that would result in a breach of this Paragraph 7.5.

8. Composition and Proceedings of the Board

8.1 SECCo and the Shareholders acknowledge that this Code contains detailed provisions regarding the composition of the Panel, and that it is the intention of SECCo and the Shareholders that the composition of the Board is identical to the composition of the Panel. The Shareholders shall, accordingly, procure that:

(a) each of the Panel Members from time to time shall be appointed as a Director; and

(b) the Panel Chair from time to time shall be appointed as the SECCo Chair.

8.2 SECCo and the Shareholders acknowledge that this Code contains detailed provisions regarding the procedural rules of the Panel, and that it is the intention of SECCo and the Shareholders that the procedural rules of the Board are identical to the procedural rules of the Panel. The remaining provisions of this Paragraph 8 shall therefore have effect subject to the procedural rules of the Board set out in Section C (Governance); save only to the extent that such procedural rules applicable to the Panel are incompatible with Laws and Directives stipulating procedural rules for company boards of directors.

8.3 Each Director shall be deemed to have appointed his or her Alternate as his or her alternate Director, and shall be deemed to have removed such person from such position on that person ceasing to be his or her Alternate. Any such alternate Director shall be entitled to receive notice of all Board meetings and attend and vote as such at any meeting at which the appointing Director is not present and generally in the absence of his or her appointor to do all the things which his or her appointor is authorised or empowered to do. A Director who is also an alternate is entitled, in the absence of his or her appointor:

(a) to a separate vote on behalf of his or her appointor in addition to his or her own vote; and

(b) to be counted as part of the quorum of the Board on his or her own account and also in respect of the Director for whom he or she is the alternate.

8.4 If a Director ceases to be a Panel Member, the Shareholders shall exercise their powers to ensure that such person ceases to be a Director. The DCC shall indemnify SECCo against all Liabilities which SECCo may suffer or incur by reason of any claim by that person in connection with his removal from office as a Director.

8.5 The SECCo Chair shall chair any Board meeting. If the SECCo Chair is unable to be present at a Board meeting, the SECCo Chair's alternate appointed in accordance with Paragraph 8.3 may act as chair of that Board meeting.

8.6 The person appointed from time to time as the Secretariat shall be appointed as the SECCo Secretary.

8.7 All resolutions of the Board shall be made by simple majority of those Directors present at the meeting. Each Director shall have one vote, provided that the SECCo Chair shall have no vote (except in the case of equality of votes, in which case the SECCo Chair shall have the casting vote). Notwithstanding the foregoing, in the case of the person appointed as SECCo Chair by virtue of being Panel Chair in accordance with Section X (Transition), that person shall have a vote as a Director and shall not have any casting vote.

8.8 The Board shall meet at intervals of not less than once in any period of two months unless otherwise agreed by the Directors. Insofar as reasonably practicable, meetings of the Board shall follow on immediately from meetings of the Panel. A meeting of the Board may be convened at any reasonable time at the request of any Director by written notice to the SECCo Secretary.

8.9 Meetings of the Board may be held by means of any telecommunications equipment provided that each of the Directors attending the meeting acknowledges that he or she can communicate with each other. In any such case, the meeting shall be deemed to take place in the location of the SECCo Chair during such meeting.

8.10 Each of the Directors shall be given notice by the SECCo Secretary of each meeting of the Board setting out details of the time, date and place of meeting at least 10 Working Days prior to the date of such meeting (provided that such period of notice may be shortened for particular meetings by unanimous written consent of all Directors entitled to attend and vote at the meeting).

8.11 The quorum for each meeting of the Board is one half of all Directors appointed at the relevant time, at least one of whom must be the SECCo Chair (or his or her alternate as such).

8.12 A written resolution signed by a majority of the Directors shall be as valid and effective as a resolution passed by a meeting of the Board properly convened and constituted in accordance with the terms of this Schedule and the Articles.

8.13 As soon as reasonably practicable and in any event no later than five Working Days after each Board meeting, the SECCo Secretary shall circulate minutes of that meeting to each of the Directors.

8.14 The Board may delegate any of its powers to committees of the Board consisting of such persons as the Board may resolve. Any such committee shall exercise only powers expressly delegated to it and shall comply with any regulations imposed on it by the Board.

9. Expenditure and Working Capital

9.1 The Shareholders intend that SECCo should be run on a “break even” basis and shall procure that any surplus working capital shall, rather than being distributed to Shareholders, be retained by SECCo and applied to subsequent expenditure.

9.2 None of the Shareholders shall be obliged to provide any finance to SECCo or to provide any guarantee, indemnity or other security which third parties may require to secure the obligations of SECCo.

9.3 The Shareholders shall exercise the rights attaching to their Shares with a view to ensuring that SECCo does not incur costs unless authorised to do so in accordance with Section C8 (Panel Costs and Budgets), except insofar as is necessary in order to comply with legally binding obligations to which SECCo is subject.

10. Accounts

10.1 As soon as reasonably practicable following the end of each Regulatory Year, SECCo shall procure that an account shall be taken of all the assets and liabilities of SECCo and of all the dealings and transactions of SECCo during such Regulatory Year.

10.2 The Board shall prepare a report and accounts in accordance with the Companies Act 2006 to be audited within three months after the end of each Regulatory Year.

11. Conflict with the Articles

11.1 In the event of any ambiguity created by or discrepancy between the provisions of this Schedule and the Articles, it is the intention that the provisions of this Schedule shall prevail and accordingly the Shareholders shall exercise all voting and other rights and powers available to them so as to give effect to the provisions of this Schedule and shall further, if necessary, procure any required amendment to the Articles.

11.2 Any Shareholder failing to comply with the provisions of Paragraph 11.1 shall be deemed to have appointed SECCo as its lawful attorney for the purpose of signing any written resolution (or receiving notices of and attending and voting at all meetings) of the members of the SECCo to give effect to the provisions of Paragraph 11.1 and to effect any required amendment to the Articles (including to conform the Articles to this Schedule), and this power of attorney (which is given by way of security to secure the performance of obligations owed by the Shareholder to the SECCo under Paragraph 11.1) shall be irrevocable.

12. Further Assurance

Each Shareholder shall co-operate with the other Shareholders and execute and deliver to the other Shareholders such other instruments and documents and take such other actions as may be reasonably requested from time to time in order to carry out, evidence and confirm their rights under, and the intended purpose of, this Schedule.

13. Duration and Termination

13.1 This Schedule shall continue in full force and effect, save in respect of any antecedent breach, until the earlier of:

(a) the termination of this Code; and

(b) the date on which an effective resolution is passed, or a binding order is made, for the winding up of SECCo, provided, however, that this Schedule shall cease to have effect as regards any Eligible Party who, having been entitled under the terms of this Schedule to hold Shares, ceases to hold any Shares.

provided, however, that this Schedule shall cease to have effect as regards any Eligible Party who, having been entitled under the terms of this Schedule to hold Shares, ceases to hold any Shares.

ANNEX 1

Prior to designation of this Code, SECCo (acting by its directors from time to time) and/or the shareholders of SECCo (as applicable) approved the following matters:

1. the change of name of SECCo to Smart Energy Code Company Limited;

2. the transfer of the subscription share in the capital of SECCo to a nominee as if Paragraph 7.2 applied;

3. the change of the registered office of SECCo to the registered address of the Secretariat;

4. the change of the accounting reference date of SECCo to 31 March;

5. the adoption of new Articles of Association of SECCo as per Annex 2;

6. the subscription for Shares in SECCo by the Subscribing Shareholders;

7. the appointment as Directors of SECCo of the Panel Members nominated pursuant to Section X (Transition);

8. the appointment as the company secretary of SECCo of the Secretariat nominated pursuant to Section X (Transition);

9. conflicts of interest (if any) of the incoming Directors of SECCo;

10. the resignation of the incumbent Director of SECCo appointed at incorporation; and

11. the filings at Companies House and updates to the statutory books of SECCo in relation to the matters referred to at 1 – 10 above.

ANNEX 2

Form of New Articles

ARTICLES OF ASSOCIATION

THE COMPANIES ACT 2006

ARTICLES OF ASSOCIATION

of

Smart Energy Code Company Limited (the "Company")

(Registered No. 08430267)

(adopted by Special Resolution passed on [ ])

1. Defined terms

1.1 In these articles:

"**CA 2006**" means the Companies Act 2006;

"**Code**" means the Smart Energy Code designated by the Secretary of State pursuant to the smart meter communication licences granted pursuant to the Electricity Act 1989 and the Gas Act 1986, as such code is modified from time to time in accordance with its provisions;

"**Companies Acts**" means the Companies Acts (as defined in section 2 of the CA 2006), in so far as they apply to the company;

"**connected persons**" in relation to a director means persons connected with that director for the purposes of section 252 CA 2006;

"**eligible director**" means, in relation to a matter or decision, a director who is or would be entitled to count in the quorum and vote on the matter or decision at a meeting of directors (but excluding any director whose vote is not to be counted in respect of the particular matter or decision);

"**Group Company**" means a body corporate which is at the relevant time:

(a) a subsidiary of the Company; or

(b) the Company's holding company or a subsidiary of that holding company,

and for these purposes "**holding company**" and "**subsidiary**" have the meanings given to those expressions in section 1159 CA 2006;

"**Model Articles**" means the regulations contained in Schedule 3 to The Companies (Model Articles) Regulations 2008; and

"**Panel**" has the meaning given to that expression in the Code.

1.2 Unless the context otherwise requires, other words or expressions contained in these articles bear the same meaning as in the Model Articles and CA 2006, in each case as in force on the date when these articles become binding on the Company.

1.3 For the purposes of these articles a corporation shall be deemed to be present in person if its representative duly authorised in accordance with the Companies Acts is present in person.

1.4 Headings in these articles are used for convenience only and shall not affect the construction or interpretation of these articles.

1.5 A reference in these articles to an "article" is a reference to the relevant article of these articles unless expressly provided otherwise.

1.6 Unless expressly provided otherwise, a reference to a statute, statutory provision or subordinate legislation is a reference to it as it is in force from time to time, taking account of:

(a) any subordinate legislation from time to time made under it; and

(b) any amendment or re-enactment,

and includes any statute, statutory provision or subordinate legislation which it amends or re-enacts.

1.7 Any phrase in these articles or the Model Articles introduced by the terms "including", "include", "in particular" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

2. Adoption and variation of Model Articles

2.1 Subject as provided in these articles, the Model Articles shall apply to the Company.

2.2 Model Articles 7, 8(2), 11, 12, 13(3), 16, 17(2), 18(4), 19, 20, 21, 23, 41, 52 – 62 (inclusive), and 70 – 77 (inclusive) shall not apply to the Company.

3. Conflicts of interest

3.1 In this article and articles 4 and 5:

"**authorise**" means to authorise in accordance with section 175(5)(a) CA 2006 and "**authorisation**", "**authorised**" and cognate expressions shall be construed accordingly;

a "**conflict of interest**" includes a conflict of interest and duty and a conflict of duties;

"**conflicted director**" means a director in relation to whom there is a conflicting matter;

"**conflicting matter**" means a matter which would or might (if not authorised or if not permitted under article 4) constitute or give rise to a breach of the duty of a director under section 175(1) CA 2006 to avoid a conflict situation;

"**conflict situation**" means a situation in which a director has, or can have, a direct or indirect interest that conflicts, or possibly may conflict, with the interests of the company (including a conflict of interest);

"**interested director**" means a director who has, in any way, a material direct or indirect interest in a matter or decision;

a conflicting matter, conflict situation or interest is "**material**" unless it cannot reasonably be regarded as likely to give rise to a conflict of interest; and

"**other directors**" means, in relation to a particular conflicting matter, directors who are not interested directors in relation to that conflicting matter.

3.2 Exercise of the power of the directors to authorise a conflicting matter shall be subject to the provisions of this article.

3.3 The provisions of this article apply:

(a) subject to article 4; and

(b) without prejudice (and subject) to the provisions of section 175(6) CA 2006.

Nothing in these articles shall invalidate an authorisation.

3.4 A conflicted director seeking authorisation of any conflicting matter shall disclose to the other directors the nature and extent of the conflicting matter as soon as is reasonably practicable. The conflicted director shall provide the other directors with such details of the conflicting matter as are necessary for the other directors to decide how to address the conflicting matter, together with such additional information as may be requested by the other directors.

3.5 Any director (including the conflicted director) may propose that a conflicted director's conflicting matter be authorised. Any such proposal, and any authorisation given by the directors, shall be effected in the same way as any other matter that may be proposed to and resolved on by the directors under the provisions of these articles, except that:

(a) the conflicted director and any other interested director shall not count towards the quorum nor vote on any resolution giving that authorisation; and

(b) the conflicted director and any other interested director may, if the other directors so decide, be excluded from any meeting of the directors while the conflicting matter and the giving of that authorisation are under consideration.

3.6 Where the directors authorise a conflicted director's conflicting matter:

(a) the directors may (whether at the time of giving the authorisation or subsequently):

(i) require that the conflicted director is excluded from the receipt of information, the participation in discussions and/or the making of decisions (whether at meetings of the directors or otherwise) in relation to which any actual or potential conflict of interest may arise from the conflicting matter; and

(ii) impose on the conflicted director such other terms or conditions for the purpose of dealing with any actual or potential conflict of interest which may arise from the conflicting matter as they may determine;

(b) the conflicted director shall conduct himself in accordance with any terms or conditions imposed by the directors (whether at the time of giving that authorisation or subsequently);

(c) the directors may provide that, where the conflicted director obtains (otherwise than through his position as a director) information that is confidential to a third party, the conflicted director will not be obliged to disclose the information to the company, or to use or apply the information in relation to the company's affairs, where to do so would amount to a breach of that confidence;

(d) the terms of the authorisation shall be recorded in writing (but the authorisation shall be effective whether or not the terms are so recorded); and

(e) the directors may revoke or vary the authorisation at any time but no such action will affect anything done by the conflicted director prior to that action in accordance with the terms of the authorisation.

4. Permitted conflict situations

4.1 If a director or a connected person of a director:

(a) is or becomes a member, director, manager or employee of the company or any other Group Company; or

(b) acquires and holds shares in the capital of any other body corporate, wherever incorporated, provided that the shares held by the director and his connected persons do not exceed 3% of the nominal value of the issued share capital of that body corporate;

any conflict situation which arises only by reason of such a conflicting matter is permitted by this article and the relevant conflicting matter does not require disclosure and authorisation in accordance with article 3.

4.2 A director shall not, by reason of his office or of the resulting fiduciary relationship, be liable to account to the company for any benefit which he (or a person connected with him) derives from:

(a) a conflicting matter authorised by the directors;

(b) a conflicting matter to which article 4.1 applies; or

(c) a decision of the directors in relation to which, in accordance with article 5.2, the director was an eligible director, notwithstanding his relevant conflicting interest,

and no transaction or arrangement shall be liable to be avoided on the grounds of any such interest or benefit.

5. Directors' interests and decision making

5.1 Model Articles - 8 – 10 (inclusive), 13, 17 and 18 shall take effect subject to the terms of the Code.

5.2 A director who has a direct or indirect interest or duty that conflicts with the interests of the company in relation to a proposed decision of the directors is not an eligible director in relation to that decision unless article 5.3 applies to him.

5.3 A director who has a direct or indirect interest that conflicts with the interests of the company in relation to a proposed decision of the directors (a "relevant conflicting interest") shall be an eligible director in relation to that decision, provided that:

(a) in a case where the relevant conflicting interest is in an actual or proposed transaction or arrangement with the company, the nature and extent of the relevant conflicting interest either:

(i) has been duly declared to the other directors in accordance with section 177 or section 182 CA 2006, as the case may require; or

(ii) is not required by the terms of either of those sections to be declared; and

(A) where the relevant conflicting interest is constituted by, or arises from, a conflicting matter of the director and:

(1) that conflicting matter (or any breach of the relevant director's duty under section 175(1) CA 2006 by reason of that conflicting matter) is or has been authorised, permitted, approved or ratified, either in accordance with article 3 or article 4 or by the members (and that authorisation, permission, approval or ratification has not been revoked, withdrawn or reversed); and

(2) the relevant director has not been required to be excluded from participation in discussions

and/or the making of decisions in relation to which the director has the relevant conflicting interest; or

(B) where the relevant conflicting interest is constituted by, or arises from, a conflicting matter of the director and that conflicting matter (or any breach of the relevant director's duty under section 175(1) CA 2006 by reason of that conflicting matter) is not or has not been authorised, permitted, approved or ratified, either in accordance with article 3 or article 4 or by the members:

(1) the conflict situation arising by reason of that conflicting matter is not material; or

(2) the other directors are aware of the relevant conflicting interest and have determined that the director shall be an eligible director in relation to that decision; and

(b) in any other case:

(i) the director has disclosed the nature and extent of the relevant conflicting interest, or has not done so where:

(A) it cannot reasonably be regarded as likely to give rise to a conflict of interest; or

(B) the other directors are already aware of it; and

(ii) where the relevant conflicting interest is constituted by, or arises from, a conflicting matter of the director and:

(A) that conflicting matter (or any breach of the relevant director's duty under section 175(1) CA 2006 by reason of that conflicting matter) is or has been authorised, permitted, approved or ratified, either in accordance with article 3 or article 4 or by the members (and that authorisation, permission, approval or ratification has not been revoked, withdrawn or reversed); and

(B) the relevant director has not been required to be excluded from participation in discussions and/or the making of decisions in relation to which the director has the relevant conflicting interest; or

(iii) where the relevant conflicting interest is constituted by, or arises from, a conflicting matter of the director and that conflicting matter (or any breach of the relevant director's duty under section 175(1) CA 2006 by reason of that conflicting matter) is not or has not been authorised, permitted, approved or ratified, either in accordance with article 3 or article 4 or by the members:

(A) the conflict situation arising by reason of that conflicting matter is not material; or

(B) the other directors are aware of the relevant conflicting interest and have determined that the director shall be an eligible director in relation to that decision; but

the provisions of this article do not apply in relation to a decision under article 3.5.

For the purposes of this article, the other directors are to be treated as aware of anything of which they ought reasonably to be aware.

5.4 If a question arises at a meeting of the directors about whether or not a director (other than the chair of the meeting):

(a) has a material conflict situation for the purposes of articles 3 or 4;

(b) can vote (where that director does not agree to abstain from voting) on the issue in relation to which the conflict situation arises; or

(c) can be counted in the quorum (where that director does not agree not to be counted in the quorum) for the purpose of voting on the issue in relation to which the conflict arises,

the question must (unless article 5.5 applies) be referred to the chair of the meeting. The ruling of the chair of the meeting in accordance with this article 5.4 about any director other than himself is final and conclusive, unless the nature or extent of the director's conflict situation (so far as it is known to him) has not been fairly disclosed to the other directors.

5.5 If in relation to a question of the kind referred to in article 5.4 the chair of the meeting is an interested director, the question must be referred to the other directors in accordance with article 5.5 as if it were a question about the chair of the meeting.

5.6 If a question of the kind referred to in article 5.4 arises about the chair of the meeting (or if article 5.5 applies), the question shall be decided by a resolution of the other directors. The chair of the meeting (or conflicted director) cannot vote on the question but can be counted in the quorum. The other directors' resolution about the chair of the meeting (or conflicted director) is conclusive, unless the nature and extent of the chair's (or conflicted director's) conflict situation (so far as it is known to him) has not been fairly disclosed to the other directors.

5.7 For the purposes of:

(a) any meeting (or part of a meeting) held in accordance with article 3 to authorise a director's conflict; or

(b) any determination in accordance with article 5.4 or 5.6,

if there is only one director present who is not an interested director for the purpose of that authorisation or determination, the quorum for that meeting (or part of a meeting) is one eligible director.

5.8 For the purposes of:

(a) any written directors' resolution to authorise a director's conflict in accordance with article 3; or

(b) any written determination in accordance with article 5.4 or 5.6,

if there is only one director in office who is not an interested director for the purpose of that authorisation or determination, the quorum for the purpose of signing that resolution or determination is one eligible director.

5.9 Nothing in this article 5 shall be taken as absolving any director from any of the obligations set out in article 3. A determination by the directors in accordance with article 5.3(a)(ii)(B)(2) or 5.3(b)(iii)(B) that a conflicted director may be an eligible director in relation to a decision of the directors does not amount to authorisation of the relevant conflict situation.

5.10 The company may, by ordinary resolution, ratify any transaction, arrangement or other matter which has not been properly authorised by reason of a contravention of these articles.

6. Decision-making by directors: general

6.1 Subject to the terms the Code, the general rule about decision-making by directors is that any decision of the directors must be either a majority decision at a meeting or by written resolution in accordance with Model Article 18.

6.2 The quorum for each meeting of the Board is one half of all Directors appointed at the relevant time, at least one of whom must be the SECCo Chair (or his or her alternate as such). If:

(a) the Company only has one director; and

(b) no other provision of these articles requires it to have more than one director,

the general rule does not apply, the quorum for meetings of the directors shall be one and the director may take decisions without regard to any of the provisions of these articles relating to directors' decision-making, other than the provisions of articles 6.3 and 6.7.

6.3 The directors must ensure that the Company keeps a record, in writing, for at least 10 years from the date of the decision recorded, of every unanimous or majority decision taken by the directors.

6.4 Model Article 9(3) shall be modified so that any meeting where all the directors participating are not in the same place shall be treated as taking place in the place where the chair of the meeting is.

6.5 Model Article 10(2) shall be read:

(a) subject to articles 5 and 6.2; and

(b) as if the final word was deleted and the words "two eligible directors" were added in its place.

6.6 The chair of directors' meetings shall have no vote, save in the event of an equality of votes, where he shall have a casting vote, and Model Article 13(2) shall be modified accordingly.

6.7 Model Article 14(2) shall be read as if the words "to be counted" to "voting purposes" inclusive were omitted and the words "an eligible director for the purposes of that meeting (or part of a meeting)" were added in their place.

6.8 For the purposes of Model Articles 17 and 18, a written resolution of the directors may be in electronic form. Model Article 18 shall be read as if the words "all the directors" were omitted and the words "a simple majority of the directors" were added in their place.

6.9 A decision may not be taken in accordance with Model Article 18 if the eligible directors making that decision would not have formed a quorum at a directors' meeting resolving on the same matter.

6.10 Save for the chair person, the directors shall not be entitled to any remuneration from the Company. This is without prejudice to the recovery of reasonable expenses properly incurred in connection with the Company.

7. General meetings and written resolutions

7.1 Voting rights attaching to a share may be exercised, either at a general meeting or on any written resolution, notwithstanding that amounts are outstanding, due and payable to the Company in respect of that share.

8. Allotment of shares

8.1 Without prejudice to any special rights previously conferred on the holders of any existing shares or class of shares, all shares shall be issued to the persons, on the terms and conditions and with the rights, priorities, privileges or restrictions in each case as provided in the resolution creating or issuing the relevant shares. In the absence of any such provision, the directors may issue the shares, subject to section 551 CA 2006, to such persons at such times and generally on such terms and conditions and with such rights, priorities, privileges or restrictions as they may think fit. Accordingly, and in accordance with section 570 CA 2006, sections 561(1) and 562 CA 2006 shall not apply to the Company.

8.2 No share shall be issued to any infant, bankrupt, insolvent body corporate or person who, by reason of that person's mental health, is subject to a court order which wholly or partly prevents that person from personally exercising any powers or rights which that person would otherwise have.

9. Transmission of shares

9.1 Nothing in these articles or the Model Articles releases the estate of a deceased member from any liability in respect of a share solely or jointly held by that member.

10. Return of capital

10.1 The Shareholders intend that the Company should be run on a "break even" basis and shall procure that any surplus working capital shall, rather than being distributed to Shareholders, be retained by the Company and applied to subsequent expenditure.

10.2 Subject to articles 10.1 and 10.3, on a return of capital on liquidation, capital reduction or otherwise, the surplus assets of the Company remaining after the payment of its liabilities shall be applied:

(a) in paying to each holder of shares an amount in respect of each share held equal to the amount paid up thereon (including any premium); and

(b) thereafter, in distributing the balance of such assets amongst the holders of the shares in proportion to the amounts paid up or credited as paid up on the shares and held by them.

10.3 Any Shareholder may elect (by notice to the Company secretary) to pay up all amounts which remain unpaid on any Share immediately prior to any return of capital of the kind referred to in article 10.2.

11. Delivery of documents and information

11.1 Any notice, document or other information shall be deemed to be served on and delivered to the intended recipient:

(a) if properly addressed and sent by prepaid United Kingdom first class post to an address in the United Kingdom, 48 hours after it was posted (or five business days after posting either to an address outside the United Kingdom or from outside the United Kingdom to an address within the United Kingdom, if (in each case) sent by reputable international overnight courier addressed to the intended recipient, provided that delivery in at least five business days was guaranteed at the time of sending and the sending party receives a confirmation of delivery from the courier service provider);

(b) if properly addressed and delivered by hand, when it was given or left at the appropriate address; and

(c) if sent or supplied by means of a website, when the material is first made available on the website or (if later) when the recipient receives (or is deemed to have received) notice of the fact that the material is available on the website.

For the purposes of this article, no account shall be taken of any part of a day that is not a working day.

11.2 In proving that any notice, document or other information was properly addressed, it shall be sufficient to show that the notice, document or other information was delivered to an address permitted for the purpose by CA 2006.

11.3 For the purposes of section 1147(3) CA 2006, where a document or information is sent or supplied by the Company to any member by electronic means, and the Company is able to show that it was properly addressed, it is deemed to have been received by the intended recipient one hour after it was sent (but subject to section 1147(5)).

11.4 Where a document or information is sent or supplied to the Company by one person (the "**agent**") on behalf of another person (the "**sender**"), the Company may require reasonable evidence of the authority of the agent to act on behalf of the sender.

12. The Code

12.1 In addition to the provisions of these Articles, the members shall be obliged (except to the extent, if any, prohibited by law) to give effect to the Code in force at the relevant time.

12.2 Each Shareholder shall procure, to the extent reasonably possible, that the Directors shall act in all reasonable respects in relation to the Company so as to give effect to the Code, provided always that each Director will not be required to act in any manner prejudicial to his fiduciary duties as a Director of the Company.

SEC SCHEDULE 5 – ACCESSION INFORMATION

1. The Applicant’s full name.

2. Whether the Applicant is a company or a natural person or a partnership etc.

3. The Applicant’s jurisdiction of incorporation (if applicable).

4. The Applicant’s registered number (if applicable).

5. The Applicant’s registered address (or, if not applicable, its principal address).

6. Where the Applicant is incorporated or resident outside Great Britain, an address in Great Britain for the receipt of legal notices on the Applicant’s behalf.

7. The Applicant’s VAT registration number (if applicable).

8. The Applicant’s address for invoices under the Code.

9. The Applicant’s address or addresses for all other notices under the Code.

10. The Party Category into which the Applicant considers it will initially fall.

11. The Energy Licences held by the Applicant (including any for which it has applied).

12. Details of any Parties that are Affiliates of the Applicant (where the Applicant is a company).

13. Where the Applicant holds one or more Energy Supply Licences, details of the unique identifiers by which the Applicant is identified under the BSC and/or the UNC (as applicable) for the purposes of recording the Applicant's Registration for an MPAN or MPRN.

14. Where the Applicant holds an Electricity Distribution Licence or a Gas Transporter Licence, details of the unique identifier by which the Applicant is identified under the BSC and/or the UNC (as applicable) for the purposes of recording the network to which an MPAN or MPRN relates.

15. Where applicable, details of the unique identifiers by which the Applicant is identified as a Meter Operator or a Meter Asset Manager for an MPAN or MPRN.

16. The name of the person or persons who will enter into the Accession Agreement on behalf of the Applicant.

SEC SCHEDULE 6 - FORM OF LETTER OF CREDIT

Form of Document: Irrevocable Standby Letter of Credit

Documentary Credit Number: []

Date of Issue: [ ]

Issuing Bank: []

At the request of the Applicant, the Issuing Bank issues this irrevocable standby letter of credit ("**Standby Letter of Credit**") in the Beneficiary's favour on the following terms and conditions.

In this Standby Letter of Credit:

"**Applicant**" means [insert User's name]

"**Beneficiary**" means [DCC] [insert company number and address], and its successors as the DCC under the Smart Energy Code

"Beneficiary Statement" means a demand on the Beneficiary's letterhead, stating the name and title of the person signing on behalf of the Beneficiary, in the form set out at in the schedule to this Standby Letter of Credit.

"**Effective Date**" means [ ] (London, UK)

"**Expiry Date**" means [ ] (London, UK)

"**Maximum Amount**" means []

"**Smart Energy Code**" means the code of that name designated by the Secretary of State pursuant to the smart meter communication licences granted pursuant to the Electricity Act 1989 and the Gas Act 1986, as such code is modified from time to time.

1. From the Effective Date, this Standby Letter of Credit is available for payment at sight against presentation to the Issuing Bank of a Beneficiary Statement.

2. The Issuing Bank will not be obliged to make a payment under this Standby Letter of Credit if as a result the aggregate of all payments made by it under this Standby Letter of Credit would exceed the Maximum Amount.

3. The Beneficiary Statement must be presented to the Issuing Bank on or before the Expiry Date.

4. All payments under this Letter of Credit shall be made in Pounds Sterling in immediately available, freely transferable funds and for value on the due date to the account set out in the Beneficiary Statement.

5. The Issuing Bank hereby waives any right to set off or counterclaim whatsoever against any amounts payable under this Standby Letter of Credit in respect of any claims the Issuing Bank may have against the Beneficiary and such amounts shall be paid free and clear of all deductions or withholdings whatsoever. If the Issuing Bank is required by law to make a tax deduction from any amounts payable under this Standby Letter of Credit, the amount due from the Issuing Bank shall be increased to an amount which (after such tax deduction) leaves an amount equal to the payment which would have been due if no tax deduction had been required.

6. This Standby Letter of Credit is personal to the Beneficiary, and the Beneficiary's rights hereunder (including the right to receive proceeds) are not assignable; provided that such rights shall enure for the benefit of the DCC's successors under the Smart Energy Code.

7. Except to the extent it is inconsistent with the express terms of this Standby Letter of Credit, this Standby Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (2007 Revision), International Chamber of Commerce Publication No. 600 other than Article 38 thereof which is hereby waived and Article 36 is varied as below. Other than a person to whom this Standby Letter of Credit has been transferred in accordance with clause 6, this Standby Letter of Credit shall not confer any benefit on or be enforceable by any third party. If this Standby Letter of Credit expires during any interruption of business as described in Article 36 of said Publication 600, the Issuing Bank specifically agrees to honour any demand made under this Standby Letter of Credit within thirty (30) days after the resumption of business.

8. This Standby Letter of Credit and any non-contractual obligations or disputes arising out of or in connection with it shall be governed by and construed in accordance with the laws of England and the parties submit to the exclusive jurisdiction of the Courts of England for all disputes arising under, out of, or in relation to this Letter of Credit.

Signed for and on behalf of

Issuing Bank

Schedule - Form of Beneficiary Statement

We, the DCC under the Smart Energy Code (the “Beneficiary”), hereby state that we are entitled, in accordance with the Smart Energy Code, to demand ……….[insert amount being claimed] under Standby Letter of Credit number……..... issued by …………[insert name of Issuing Bank]. Payment in respect of this demand shall be effected immediately to [insert relevant account details]. We confirm that the signatory(ies) to this demand are empowered to sign and make this demand on behalf of the Beneficiary.

SEC SCHEDULE 7 – SPECIMEN ENABLING SERVICES AGREEMENT

Dated:2[XXX]

[Participant]

and

[DCC]

Smart Energy Code
Enabling Services
Agreement

THIS ENABLING SERVICE AGREEMENT is made on 2[XXX]

BETWEEN:

(1). [**TBC**] a company incorporated in [*Jurisdiction*] (registered number [TBC]) whose registered office is at [TBC] (the "**Participant**"); and

(2). [**TBC**] a company incorporated in [*Jurisdiction*] (registered number [TBC]) whose registered office is at [TBC] (the "**DCC**").

WHEREAS

(A). The Participant wishes to procure the Enabling Services pursuant to the Smart Energy Code.

(B). The DCC has agreed to provide the Enabling Services pursuant to this Enabling Services Agreement, in consideration of the Enabling Service Charges.

NOW IT IS HEREBY AGREED as follows:

1. Interpretation

1.1 In this Enabling Services Agreement, unless the context otherwise requires:

"**Enabling Service Charges**" means those charges described in Schedule 2.

"**Enabling Services**" means the services described in Schedule 1.

"**Event of Default**" means that the Participant:

(a) is in material breach of any of its material obligations under this Enabling Services Agreement, and the Participant has failed to remedy the breach within 20 Working Days after a notice from the DCC requiring such remedy; and/or

(b) suffers an Insolvency Type Event.

"**Party**" means the DCC or the Participant; and "**Parties**" means both of them.

"**Smart Energy Code**" means the code of that name designated by the Secretary of State pursuant to the smart meter communication licences granted to the DCC pursuant to the Electricity Act 1989 and the Gas Act 1986, as such code is modified from time to time in accordance with its provisions.

1.2 In this Enabling Services Agreement, unless the context otherwise requires, references to "Clauses" and "Schedules" are to the clauses of, and schedules to, this Enabling Services Agreement.

1.3 Subject to Clauses 1.1 and 1.2, the words and expressions used in this Enabling Services Agreement shall be construed and interpreted in accordance with the definitions and provisions regarding interpretation set out in Section A (Definitions and Interpretation) of the Smart Energy Code, as if:

(a) those definitions and provisions regarding interpretation were set out in this Enabling Services Agreement;

(b) the uses therein of the words defined in Clause 1.1 were interpreted in accordance with Clause 1.1; and

(c) the references therein to:

(i) "Charges" were to "Enabling Service Charges";

(ii) "Services" were to "Enabling Services";

(iii) "User" were to "Participant"; and

(iv) "this Code" or "this Code and/or any Bilateral Agreement" were to "this Enabling Services Agreement".

1.4 The Parties acknowledge that the Smart Energy Code is subject to modification from time to time in accordance with its provisions and law, and that the Smart Energy Code as so modified from time to time shall apply for the purposes of this Enabling Services Agreement.

1.5 References in this Enabling Services Agreement (or in provisions incorporated herein by reference) to Sections of the Smart Energy Code shall be to those sections as incorporated into this Enabling Services Agreement, as such sections are modified and/or renumbered from time to time.

2. Commencement of this Enabling Services Agreement

2.1 This Enabling Services Agreement shall commence on [TBC].

3. Provision of the Enabling Services

3.1 The DCC shall provide the Enabling Services to the Participant subject to and in accordance with this Enabling Services Agreement.

3.2 The DCC and the Participant shall each comply with the additional obligations assigned to them in Schedule 1.

4. Enabling Service Charges

4.1 The Participant shall pay the Enabling Service Charges in respect of which Sections J1 (Payment of Charges) and J2 (Payment Default and Disputes) shall apply as if:

(a) those Sections were set out in this Enabling Services Agreement;

(b) the uses therein of the words defined in Clause 1.1 were interpreted in accordance with Clause 1.1;

(c) the references therein to expressions referred to in Clause 1.3(c) were interpreted as referred to in that Clause; and

(d) Section J2.7 (Pursing Non-Payment) did not apply.

5. Limitations of Liability

5.1 The DCC's and the Participant's liability under or in connection with this Enabling Services Agreement shall be limited in accordance with Section M2 (Limitations of Liability) as if:

(a) that Section was set out in this Enabling Services Agreement;

(b) the uses therein of the words defined in Clause 1.1 were interpreted in accordance with Clause 1.1;

(c) the references therein to expressions referred to in Clause 1.3(c) were interpreted as referred to in that Clause; and

(d) Sections M2.17 and M2.18 (SECCo) did not apply.

6. Termination or Expiry of this Enabling Services Agreement

6.1 Subject to earlier termination in accordance with this Clause 6, this Enabling Services Agreement shall expire on [TBC].

6.2 The Participant shall, at its discretion, be entitled to terminate this Enabling Services Agreement on 20 Working Days' prior notice in writing to the DCC.

6.3 The DCC shall be entitled to immediately terminate this Agreement on notice to the Participant where an Event of Default occurs.

6.4 The expiry or earlier termination of this Agreement shall be without prejudice to:

(a) those rights and obligations under this Enabling Services Agreement that may have accrued prior to such expiry or termination; or

(b) those provisions of this Enabling Services Agreement that are expressly or by implication intended to survive such expiry or termination, including Clauses 4 and 5.

7. Amendments

7.1 Without prejudice to Clause 1.4, this Enabling Services Agreement may only be amended by agreement in writing by the Parties or in order to give effect to any determination of disputes by the Authority pursuant to the DCC Licence.

7.2 The Parties shall amend this Enabling Services Agreement where it has become inconsistent with the Smart Energy Code in order to correct such inconsistency (including where the Specimen Enabling Services Agreement is modified, in which case the Parties shall amend this Enabling Services Agreement in the same manner and to the same extent).

7.3 The Participant hereby authorises the DCC to make the amendments to this Enabling Services Agreement required pursuant to Clause 7.2 on the Participant's behalf. Where the Participant disputes the requirement for, or form of, any such amendments made by the DCC on the Participant's behalf, then the Participant may refer the matter to the Panel for its determination. Nothing in this Clause 7.3 shall fetter the Participant's right to refer disputes to the Authority pursuant to the DCC Licence.

8. Miscellaneous

8.1 The Parties agree that the provisions of Sections M3 (Services FM and Force Majeure), M4 (Confidentiality), M7 (Dispute Resolution), M9 (DCC Transfer), M10 (Notices) and M11 (Miscellaneous) of the Smart Energy Code shall apply to this Enabling Services Agreement, as if:

(a) those Sections were set out in this Enabling Services Agreement;

(b) the uses therein of the words defined in Clause 1.1 were interpreted in accordance with Clause 1.1;

(c) the references therein to expressions referred to in Clause 1.3(c) were interpreted as referred to in that Clause; and

(d) the following Sections did not apply: Sections M3.14 (SECCo), M7.16 (SECCo), M10.1 (Communication via Specified Interfaces), M10.6 (The Panel, Code Administrator, Secretariat and SECCo), M11.5 (Third Party Rights), and M11.15 (SECCo).

8.2 This Enabling Services Agreement may be executed in any number of counterparts, each of which shall be an original but all of which together shall constitute one and the same instrument.

9. Governing Law

9.1 In accordance with Clause 8, this Enabling Services Agreement and any dispute or claim arising out of or in connection with it (including non-contractual claims) shall be governed by, and construed in accordance with, the relevant laws specified in Section M11 (Miscellaneous) of the Smart Energy Code from time to time for the purpose of disputes or claims of that nature.

THIS ENABLING SERVICES AGREEMENT has been entered into on the date first stated above.

Schedule 1 – Enabling Services

[The Enabling Services shall comprise the provision of Test Communications Hubs in accordance with Section F10 (Test Communications Hubs). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section F10 (the Participant complying with those obligations assigned to TCH Participants).]

[The Enabling Services shall comprise the provision of either or both those Device and User System Tests described in Section H14.31(a) and (b) (Device and User System Tests) in accordance with Section H14 (Testing Services). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H14 (the Participant complying with those obligations assigned to Testing Participants).]

[The Enabling Services shall comprise the provision of SMETS1 Pending Product Combinations Tests in accordance with Section H14 (Testing Services). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H14 (the Participant complying with those obligations assigned to Testing Participants).]

[The Enabling Services shall comprise the provision of RF Noise Testing in accordance with Section H14 (Testing Services). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H14 (the Participant complying with those obligations assigned to Testing Participants).]

[The Enabling Services shall comprise the provision of Interoperability and Innovation Events in accordance with Section H14 (Testing Services). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H14 (the Participant complying with those obligations assigned to Testing Participants).]

[The Enabling Services shall comprise the provision of GFI Testing in accordance with Section H14 (Testing Services). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H14 (the Participant complying with those obligations assigned to Testing Participants).]

[The Enabling Services shall comprise the provision of DCC Boxed in accordance with Section H14 (Testing Services). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H14 (the Participant complying with those obligations assigned to Testing Participants).]

[The Enabling Services shall comprise the provision of MAP/Manufacturer Reports in accordance with Section H17 (MAP/Manufacturer Reports). The DCC and the Participant shall each comply with their respective obligations set out or referred to in that Section H17.]

Schedule 2 – Enabling Service Charges

The Enabling Service Charges shall comprise those charges set out in the Charging Statement from time to time that apply to the Explicit Charging Metrics (as defined in the Charging Methodology) that comprise the Enabling Services, being the Explicit Charge applicable to the:

[ordering of Test Communications Hubs pursuant to Section F10 (Test Communications Hubs)] / [the provision of a connection to the SM WAN pursuant to Section H14.31 (Device and User System Testing)] / [the provision of additional testing support pursuant to Section H14.33 (Device and User System Testing)].

Version A4.0

Appendix A

Device Certificate Policy

CONTENTS

Part **Heading** **Page**

1 INTRODUCTION

The document comprising this Appendix A (together with its Annexes A and B):

- shall be known as the " **Device Certificate Policy**" (and in this document is referred to simply as the "**Policy**"),
- is a SEC Subsidiary Document related to Section L9 of the Code (The SMKI Document Set).

1.1 OVERVIEW

(A) This Policy sets out the arrangements relating to:

(i) Device Certificates; and

(ii) DCA Certificates.

(B) This Policy is structured according to the guidelines provided by IETF RFC 3647, with appropriate extensions, modifications and deletions.

(C) Except where the context otherwise requires, words or expressions used in this Policy shall have the meanings ascribed to them in IETF RFC 5280 where they:

(i) appear in `Courier New` font;

(ii) are accompanied by the descriptor 'field', 'type' or 'extension'; and/or

(iii) take the form of a conjoined string of two or more words, such as '`digitalSignature`'.

1.2 DOCUMENT NAME AND IDENTIFICATION

(A) This Policy has been assigned an OID of 1.2.826.0.1. 8641679.1.2.1.2.

1.3 SMKI PARTICIPANTS

1.3.1 The Device Certification Authority

(A) The definition of Device Certification Authority is set out in Annex A.

1.3.2 Registration Authorities

(A) The definition of Registration Authority is set out in Annex A.

1.3.3 Subscribers

(A) In accordance with Section L3 of the Code (The SMKI Services), certain Parties may become Authorised Subscribers.

(B) In accordance with Section L3 of the Code (The SMKI Services), an Authorised Subscriber shall be an Eligible Subscriber in relation to certain Certificates.

(C) The SMKI RAPP sets out the procedure to be followed by an Eligible Subscriber in order to become a Subscriber for one or more Certificates.

(D) Eligible Subscribers are subject to the applicable requirements of the SMKI RAPP and Section L11 of the Code (Subscriber Obligations).

(E) Obligations on the DCC acting in the capacity of an Eligible Subscriber are set out in Section L11 of the Code (Subscriber Obligations).

(F) The definitions of the following terms are set out in Section A of the Code (Definitions and Interpretation):

(i) Authorised Subscriber;

(ii) Eligible Subscriber;

(iii) Subscriber.

1.3.4 Subjects

(A) The Subject of a Device Certificate must be a Device (other than a Type 2 Device) represented by the identifier in the `subjectAltName` field of the Device Certificate Profile in accordance with Annex B.

(B) The Subject of a DCA Certificate must be the entity identified by the `subject` field of the Root DCA Certificate Profile or Issuing DCA Certificate Profile (as the case may be) in accordance with Annex B.

(C) The definition of Subject is set out in Annex A.

1.3.5 Relying Parties

(A) In accordance with Section L12 of the Code, certain Parties may be Relying Parties.

(B) Relying Parties are subject to the applicable requirements of Section L12 of the Code (Relying Party Obligations).

(C) Obligations on the DCC acting in the capacity of a Relying Party are set out in Section L12 of the Code.

(D) The definition of Relying Party is set out in Annex A.

1.3.6 SMKI Policy Management Authority

(A) Provision in relation to the SMKI PMA is made in Section L1 of the Code (SMKI Policy Management Authority).

1.3.7 SMKI Repository Provider

(A) Provision in relation to the SMKI Repository Service is made in Section L5 of the Code (The SMKI Repository Service).

1.4 USAGE OF DEVICE CERTIFICATES AND DCA CERTIFICATES

1.4.1 Appropriate Certificate Uses

(A) The DCA shall ensure that Device Certificates are Issued only:

(i) subject to paragraph (B), to Eligible Subscribers; and

(ii) for the purposes of the creation, sending, receipt and processing of communications to and from Devices in accordance with or pursuant to the Code.

(B) For the purposes of paragraph (A), the DCA may treat any of the following as if they were an Eligible Subscriber:

(i) in relation to a Device that has an SMI Status that is not set to ‘commissioned’ or ‘installed not commissioned’, any Authorised Subscriber; or

(ii) in relation to a Device that has an SMI Status of ‘commissioned’ or ‘installed not commissioned’, the DCC or any Authorised Subscriber that is a User which acts (or is to act) in the User Role of either Import Supplier or Gas Supplier.

(C) The DCA shall ensure that DCA Certificates are Issued only to the DCA:

(i) in its capacity as, and for the purposes of exercising the functions of, the Root DCA; and

(ii) in its capacity as, and for the purposes of exercising the functions of, the Issuing DCA.

(D) Further provision in relation to the use of Certificates is made in Section L11 (Subscriber Obligations) and Section L12 (Relying Party Obligations) of the Code.

1.4.2 Prohibited Certificate Uses

(A) No Party shall use a Certificate other than for the purposes specified in Part 1.4.1 of this Policy.

1.5 POLICY ADMINISTRATION

1.5.1 Organisation Administering the Document

(A) This Policy is a SEC Subsidiary Document and is administered as such in accordance with the provisions of the Code.

1.5.2 Contact Person

(A) Questions in relation to the content of this Policy should be addressed to the DCA or the SMKI PMA.

1.5.3 Person Determining Device CPS Suitability for the Policy

(A) Provision is made in Section L9.8 (d) of the Code for the SMKI PMA to approve the Device CPS.

1.5.4 Device CPS Approval Procedures

(A) Provision is made in Section L9.9 of the Code for the procedure by which the SMKI PMA may approve the Device CPS.

1.5.5 Registration Authority Policies and Procedures

(A) The SMKI Registration Authority Policies and Procedures (the **SMKI RAPP**) are set out at Appendix D of the Code.

1.6 DEFINITIONS AND ACRONYMS

1.6.1 Definitions

(A) Definitions of the expressions used in this Policy are set out in Section A of the Code (Definitions and Interpretation) and Annex A.

1.6.2 Acronyms

(A) Any acronyms used for the purposes of this Policy are set out in Section A of the Code (Definitions and Interpretation) and Annex A.

2 PUBLICATION AND REPOSITORY RESPONSIBILITIES

2.1 REPOSITORIES

(A) Provision is made in Section L5 of the Code (The SMKI Repository Service) for the establishment, operation and maintenance of the SMKI Repository.

2.2 PUBLICATION OF CERTIFICATION INFORMATION

(A) The DCA shall lodge copies of the following in the SMKI Repository:

(i) each Device Certificate that has been accepted by a Subscriber;

(ii) each DCA Certificate;

(iii) each version of the SMKI RAPP;

(iv) each version of the SMKI Recovery Procedure; and

(v) any other document or information that may from time to time be specified, for the purposes of this provision, by the SMKI PMA.

(B) The DCA may lodge in the SMKI Repository such other documents or information as it may from time to time consider appropriate.

(C) Further provision on the lodging of documents and information in the SMKI Repository is made in Section L5 of the Code (The SMKI Repository Service).

2.3 TIME OR FREQUENCY OF PUBLICATION

(A) The DCA shall ensure that:

(i) each Device Certificate is lodged in the SMKI Repository promptly on its acceptance by a Subscriber;

(ii) each DCA Certificate is lodged to the SMKI Repository promptly on being Issued;

(iii) the Policy is lodged in the SMKI Repository, and a revised version of the Policy is lodged in the SMKI Repository promptly following each modification to it made in accordance with the Code;

(iv) the SMKI RAPP is lodged in the SMKI Repository, and a revised version of the SMKI RAPP is lodged in the SMKI Repository promptly following each modification to it made in accordance with the Code;

(v) the SMKI Recovery Procedure is lodged in the SMKI Repository, and a revised version of the SMKI Recovery Procedure is lodged in the SMKI Repository promptly following each modification to it made in accordance with the Code; and

(vi) any other document that may from time to time be specified by the SMKI PMA is lodged in the SMKI Repository within such time as may be directed by the SMKI PMA.

2.4 ACCESS CONTROLS ON REPOSITORIES

(A) Provision in relation to access controls for the SMKI Repository is made in Sections L5.5, L5.6 and L5.6A of the Code.

3 IDENTIFICATION AND AUTHENTICATION

3.1 NAMING

3.1.1 Types of Names

(A) Provision is made in the SMKI RAPP to ensure that the name of the Subject of each Certificate is in accordance with the relevant Certificate Profile at Annex B.

3.1.2 Need for Names to be Meaningful

(A) Provision is made in the SMKI RAPP to ensure that the name of the Subject of each Certificate is meaningful and consistent with the relevant Certificate Profile in Annex B.

3.1.3 Anonymity or Pseudonymity of Subscribers

(A) Provision is made in the SMKI RAPP to:

(i) prohibit Eligible Subscribers from requesting the Issue of a Certificate anonymously or by means of a pseudonym; and

(ii) permit the DCA to Authenticate each Eligible Subscriber.

3.1.4 Rules for Interpreting Various Name Forms

(A) Provision in relation to name forms is made in Annex B.

3.1.5 Uniqueness of Names

(A) Provision in relation to the uniqueness of names is made in Annex B.

3.1.6 Recognition, Authentication, and Role of Trademarks

(A) Provision in relation to the use of trademarks, trade names and other restricted information in Certificates is made in Section L11 of the Code (Subscriber Obligations).

3.2 INITIAL IDENTITY VALIDATION

3.2.1 Method to Prove Possession of Private Key

(A) Provision is made in the SMKI RAPP in relation to:

(i) the procedure to be followed by an Eligible Subscriber in order to prove its possession of the Private Key which is associated with the Public Key to be contained in any Certificate that is the subject of a Certificate Signing Request; and

(ii) the procedure established for this purpose is in accordance with the procedure in PKCS#10.

3.2.2 Authentication of Organisation Identity

(A) Provision is made in the SMKI RAPP section 5.5 in relation to the:

(i) procedure to be followed by a Party in order to become an Authorised Subscriber;

(ii) criteria in accordance with which the DCA will determine whether a Party is entitled to become an Authorised Subscriber; and

(iii) requirement that the Party shall be Authenticated by the DCA for that purpose.

(B) Provision is made in the SMKI RAPP section 5 for the purpose of ensuring that the criteria in accordance with which the DCA shall Authenticate a Party shall be set to the level pursuant to the SMKI PMA Guidance on "Verifying Organisation Identity" published on the Website.

3.2.3 Authentication of Individual Identity

(A) Provision is made in the SMKI RAPP sections 5.2 and 5.3 in relation to the Authentication of persons engaged by Authorised Subscribers, which provides for all such persons to have their identity and authorisation verified to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.

3.2.4 Authentication of Devices

(A) Not used.

3.2.5 Non-verified Subscriber Information

(A) The DCA shall:

(i) verify all information in relation to DCA Certificates;

(ii) require each Eligible Subscriber to verify the information contained in any Certificate Signing Request in respect of a Device Certificate.

(B) Further provision on the content of DCA Certificates is made in Section L11 of the Code (Subscriber Obligations).

3.2.6 Validation of Authority

See Part 3.2.2 of this Policy.

3.2.7 Criteria for Interoperation

[*Not applicable in this Policy*]

3.3 IDENTIFICATION AND AUTHENTICATION FOR RE-KEY REQUESTS

3.3.1 Identification and Authentication for Routine Re-Key

(A) This Policy does not support Certificate Re-Key.

(B) The DCA shall not provide a Certificate Re-Key service.

3.3.2 Identification and Authentication for Re-Key after Revocation

[*Not applicable in this Policy*]

3.4 IDENTIFICATION AND AUTHENTICATION FOR REVOCATION REQUEST

[*Not applicable in this Policy*]

4 CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS

4.1 CERTIFICATE APPLICATION

4.1.1 Submission of Certificate Applications

(A) Provision is made in the SMKI RAPP in relation to:

(i) in respect of a Device Certificate:

(a) the circumstances in which an Eligible Subscriber may submit a Certificate Signing Request; and

(b) the means by which it may do so, including through the use of an authorised System.

4.1.2 Enrolment Process and Responsibilities

(A) Provision is made where applicable in the SMKI RAPP sections 5 and 6 in relation to the:

(i) establishment of an enrolment process in respect of organisations, individuals, Systems and Devices in order to Authenticate them and verify that they are authorised to act on behalf of an Eligible Subscriber or Authorised Subscriber in its capacity as such; and

(ii) maintenance by the DCA of a list of organisations, individuals, Systems and Devices enrolled in accordance with that process.

4.1.3 Enrolment Process for the Registration Authority and its Representatives

(A) Provision is made in the SMKI RAPP section 6 in relation to the establishment of an enrolment process in respect of DCA Personnel and DCA Systems:

(i) in order to Authenticate them and verify that they are authorised to act on behalf of the DCA in its capacity as the Registration Authority; and

(ii) including in particular, for that purpose, provision:

(a) for the face-to-face or video link Authentication of all SMKI Registration Authority Personnel by a SMKI Registration Authority Manager; and

(b) for all SMKI Registration Authority Personnel to have their identify and authorisation verified to the level pursuant to the SMKI PMA Guidance on “Verifying Individual Identity” published on the Website.

4.2 CERTIFICATE APPLICATION PROCESSING

4.2.1 Performing Identification and Authentication Functions

(A) Provision is made in the SMKI RAPP section 5 in relation to the Authentication by the DCA of Eligible Subscribers which submit a Certificate Signing Request.

4.2.2 Approval or Rejection of Certificate Applications

(A) Where any Certificate Signing Request fails to satisfy the requirements set out in the SMKI RAPP, the SMKI Interface Design Specification (SMKI IDS), this Policy or any other provision of the Code, the DCA:

(i) shall reject it and refuse to Issue the Certificate which was the subject of the Certificate Signing Request; and

(ii) shall give notice to the Party which made the Certificate Signing Request of the reasons for its rejection.

(B) Where any Certificate Signing Request satisfies the requirements set out in the SMKI RAPP, SMKI IDS, this Policy or any other provision of the Code, the DCA shall Issue the Certificate which was the subject of the Certificate Signing Request.

4.2.3 Time to Process Certificate Applications

(A) Provision in relation to the performance of the SMKI Services by the DCA is made in Section L8 of the Code (SMKI Performance Standards and

Demand Management).

4.3 CERTIFICATE ISSUANCE

4.3.1 DCA Actions during Certificate Issuance

(A) The DCA may Issue a Certificate only:

(i) in accordance with the provisions of this Policy, the SMKI RAPP and the SMKI IDS; and

(ii) in response to a Certificate Signing Request made by an Eligible Subscriber in accordance with the SMKI RAPP.

(B) The DCA shall ensure that:

(i) each DCA Certificate Issued by it contains information that it has verified to be correct and complete; and

(ii) each Device Certificate Issued by it contains information consistent with the information in the Certificate Signing Request.

(C) A DCA Certificate may only be:

(i) Issued by the DCA; and

(ii) for that purpose, signed using the Root DCA Private Key.

(D) A Device Certificate may only be:

(i) Issued by the DCA; and

(ii) for that purpose, signed using an Issuing DCA Private Key.

(E) The DCA shall not Issue a Device Certificate which is signed using an Issuing DCA Private Key after the first in time of the following:

(i) the time which is three months after the time at which any element of the Issuing DCA Private Key first became operational;

(ii) the time at which the DCA Issues the 100,000th Device Certificate which is signed using that Issuing DCA Private Key.

(F) For the purposes of paragraph (E), the DCA shall ensure that the Device CPS incorporates:

(i) a procedure for determining:

(a) how the DCA will calculate when each of the times specified in that paragraph occurs; and

(b) for that purpose, when any element of the Issuing DCA Private Key first became operational; and

(ii) provisions for notifying the SMKI PMA when either of the times specified in that paragraph is approaching.

(G) The DCA shall not issue a Certificate containing a Public Key where it is aware that the Public Key is the same as the Public Key contained in any other Certificate that was previously issued by it.

4.3.2 Notification to Eligible Subscriber by the DCA of Issuance of Certificate

(A) Provision is made in the SMKI IDS sections 2.3.1.9, 2.4.1.4 and 2.5.1.4for the DCA to notify an Eligible Subscriber where that Eligible Subscriber is Issued with a Certificate which was the subject of a Certificate Signing Request made by it.

4.4 CERTIFICATE ACCEPTANCE

4.4.1 Conduct Constituting Certificate Acceptance

(A) Provision is made in the SMKI IDS to:

(i) specify a means by which an Eligible Subscriber may clearly indicate to the DCA its rejection of a Certificate which has been Issued to it (SMKI IDS sections 2.3.1.10, 2.4.1.5 and 2.5.1.5); and

(ii) ensure that each Eligible Subscriber to which a Certificate has been Issued, and which has not rejected it, is treated as having accepted that

Certificate (SMKI IDS section 2.2).

(B) A Certificate which has been Issued by the DCA shall not be treated as valid for any purposes of this Policy or the Code until it is treated as having been accepted by the Eligible Subscriber to which it was Issued.

(C) The DCA shall maintain a record of all Certificates which have been Issued by it and are treated as accepted by a Subscriber.

(D) Further provision in relation to the rejection and acceptance of Certificates is made in Section L11.6 of the Code.

4.4.2 Publication of Certificates by the DCA

(A) Provision in relation to the publication of Certificates is made in Part 2 of this Policy.

4.4.3 Notification of Certificate Issuance by the DCA to Other Entities

(A) The DCA shall give notice of the Issue of a Certificate only to the Eligible Subscriber which submitted a Certificate Signing Request in respect of that Certificate (SMKI IDS sections 2.3.1.9, 2.4.1.4 and 2.5.1.4).

4.5 KEY PAIR AND CERTIFICATE USAGE

4.5.1 Subscriber Private Key and Certificate Usage

(A) Provision for restrictions on the use by Subscribers of Private Keys in respect of Certificates is made in:

(i) Section L11.8 of the Code; and

(ii) this Policy.

4.5.2 Relying Party Public Key and Certificate Usage

(A) Provision in relation to reliance that may be placed on a Certificate is made in Section L12 of the Code (Relying Party Obligations).

4.6 CERTIFICATE RENEWAL

4.6.1 Circumstances of Certificate Renewal

(A) This Policy does not support the renewal of Certificates.

(B) The DCA may only replace, and shall not renew, any Certificate.

4.6.2 Circumstances of Certificate Replacement

(A) Where the DCA Systems or any DCA Private Key is (or is suspected by the DCA of being) Compromised, the DCA shall:

(i) immediately notify the SMKI PMA;

(ii) provide the SMKI PMA with all of the information known to it in relation to the nature and circumstances of the event of Compromise or suspected Compromise; and

(iii) where the Compromise or suspected Compromise relates to a DCA Private Key:

(a) ensure that the Private Key is no longer used;

(b) promptly notify each of the Subscribers for any Device Certificates Issued using that Private Key; and

(c) promptly both notify the SMKI PMA and verifiably destroy the DCA Private Key Material.

(B) Where the Root DCA Private Key is Compromised (or is suspected by the DCA of being Compromised), the DCA:

(i) may issue a replacement for any DCA Certificate that has been Issued using that Private Key; and

(ii) shall ensure that the Subscriber for that DCA Certificate applies for the Issue of a new Certificate in accordance with this Policy.

(C) An Eligible Subscriber may request a replacement for a Certificate at any time by applying for the Issue of a new Device Certificate in accordance with this Policy.

4.6.3 Who May Request a Replacement Certificate

See Part 4.1 of this Policy.

4.6.4 Processing Replacement Certificate Requests

See Part 4.2 of this Policy

4.6.5 Notification of Replacement Certificate Issuance to a Subscriber

See Part 4.3.2 of this Policy.

4.6.6 Conduct Constituting Acceptance of a Replacement Certificate

See Part 4.4.1 of this Policy.

4.6.7 Publication of a Replacement Certificate by the DCA

See Part 4.4.2 of this Policy.

4.6.8 Notification of Certificate Issuance by the DCA to Other Entities

See Part 4.4.3 of this Policy

4.7 CERTIFICATE RE-KEY

4.7.1 Circumstances for Certificate Re-Key

(A) This Policy does not support Certificate Re-Key.

(B) The DCA shall not provide a Certificate Re-Key service.

(C) Where a new Key Pair has been generated by a Device, the Eligible Subscriber which is responsible for that Device shall apply for the Issue of a new Certificate in accordance with this Policy.

4.7.2 Who may Request Certification of a New Public Key

[*Not applicable in this Policy*]

4.7.3 Processing Certificate Re-Keying Requests

[*Not applicable in this Policy*]

4.7.4 Notification of New Certificate Issuance to Subscriber

[*Not applicable in this Policy*]

4.7.5 Conduct Constituting Acceptance of a Re-Keyed Certificate

[*Not applicable in this Policy*]

4.7.6 Publication of the Re-Keyed Certificate by the DCA

[*Not applicable in this Policy*]

4.7.7 Notification of Certificate Issuance by the DCA to Other Entities

[*Not applicable in this Policy*]

4.8 CERTIFICATE MODIFICATION

4.8.1 Circumstances for Certificate Modification

(A) This Policy does not support Certificate modification.

(B) Neither the DCA nor any Subscriber may modify a Certificate.

4.8.2 Who may request Certificate Modification

[*Not applicable in this Policy*]

4.8.3 Processing Certificate Modification Requests

[*Not applicable in this Policy*]

4.8.4 Notification of New Certificate Issuance to Subscriber

[*Not applicable in this Policy*]

4.8.5 Conduct Constituting Acceptance of Modified Certificate

[*Not applicable in this Policy*]

4.8.6 Publication of the Modified Certificate by the DCA

[*Not applicable in this Policy*]

4.8.7 Notification of Certificate Issuance by the DCA to Other Entities

[*Not applicable in this Policy*]

4.9 CERTIFICATE REVOCATION AND SUSPENSION

4.9.1 Circumstances for Revocation

(A) This Policy does not support the revocation or suspension of Certificates.

(B) The DCA shall not provide any service of revoking or suspending a Certificate.

4.9.2 Who can Request Revocation

[*Not applicable in this Policy*]

4.9.3 Procedure for Revocation Request

[*Not applicable in this Policy*]

4.9.4 Revocation Request Grace Period

[*Not applicable in this Policy*]

4.9.5 Time within which DCA must process the Revocation Request

[*Not applicable in this Policy*]

4.9.6 Revocation Checking Requirements for Relying Parties

[*Not applicable in this Policy*]

4.9.7 CRL Issuance Frequency (if applicable)

[*Not applicable in this Policy*]

4.9.8 Maximum Latency for CRLs (if applicable)

[*Not applicable in this Policy*]

4.9.9 On-line Revocation/Status Checking Availability

[*Not applicable in this Policy*]

4.9.10 On-line Revocation Checking Requirements

[*Not applicable in this Policy*]

4.9.11 Other Forms of Revocation Advertisements Available

[*Not applicable in this Policy*]

4.9.12 Special Requirements in the Event of Key Compromise

See Part 4.6.2 of this Policy.

4.9.13 Circumstances for Suspension

[*Not applicable in this Policy*]

4.9.14 Who can Request Suspension

[*Not applicable in this Policy*]

4.9.15 Procedure for Suspension Request

[*Not applicable in this Policy*]

4.9.16 Limits on Suspension Period

[*Not applicable in this Policy*]

4.10 CERTIFICATE STATUS SERVICES

4.10.1 Operational Characteristics

[*Not applicable in this Policy*]

4.10.2 Service Availability

[*Not applicable in this Policy*]

4.10.3 Optional Features

[*Not applicable in this Policy*]

4.11 END OF SUBSCRIPTION

[*Not applicable in this Policy*]

4.12 KEY ESCROW AND RECOVERY

4.12.1 Key Escrow and Recovery Policies and Practices

(A) This Policy does not support Key Escrow.

(B) The DCA shall not provide any Key Escrow service.

4.12.2 Session Key Encapsulation and Recovery Policy and Practices

[*Not applicable in this Policy*]

5 FACILITY, MANAGEMENT AND OPERATIONAL CONTROLS

5.1 PHYSICAL CONTROLS

5.1.1 Site Location and Construction

(A) The DCA shall ensure that the DCA Systems are operated in a sufficiently secure environment, which shall at least satisfy the requirements set out at Section G2 (System Security: Obligations on the DCC) and Section G5 (Information Security: Obligations on the DCC and Users) of the Code.

(B) The DCA shall ensure that:

(i) all of the physical locations in which the DCA Systems are situated, operated, routed or directly accessed are in the United Kingdom;

(ii) all bespoke Security Related Functionality is developed, specified, designed, built and tested only within the United Kingdom; and

(iii) all Security Related Functionality is integrated, configured, tested in situ, implemented, operated and maintained only within the United Kingdom.

(C) The DCA shall ensure that the DCA Systems cannot be indirectly accessed from any location outside the United Kingdom.

(D) The DCA shall ensure that the Device CPS incorporates provisions designed to ensure that all physical locations in which the manufacture of Certificates and Time-Stamping take place are at all times manually or electronically monitored for unauthorised intrusion in accordance with the SMKI PMA Guidance on “Protective Monitoring” published on the Website.

(E) The DCA shall ensure that the Device CPS incorporates provisions designed to ensure that all PINs, pass-phrases and passwords used for the purposes of carrying out the functions of the DCA are stored in secure containers accessible only to appropriately authorised individuals.

(F) The DCA shall ensure that the DCA Systems are Separated from any OCA

Systems, save that any Systems used for the purposes of the Registration Authority functions of the DCA and OCA shall not require to be Separated.

5.1.2 Physical Access

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to access control, including in particular provisions designed to:

(i) establish controls such that only appropriately authorised personnel may have unescorted physical access to DCA Systems or any System used for the purposes of Time-Stamping;

(ii) ensure that any unauthorised personnel may have physical access to such Systems only if appropriately authorised and supervised;

(iii) ensure that a site access log is both maintained and periodically inspected for all locations at which such Systems are sited; and

(iv) ensure that all removable media which contain sensitive plain text Data and are kept at such locations are stored in secure containers accessible only to appropriately authorised individuals.

5.1.3 Power and Air Conditioning

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to power and air conditioning at all physical locations in which the DCA Systems are situated.

5.1.4 Water Exposure

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to water exposure at all physical locations in which the DCA Systems are situated.

5.1.5 Fire Prevention and Protection

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to fire prevention and protection at all physical locations in which the DCA

Systems are situated.

5.1.6 Media Storage

(A) The DCA shall ensure that the Device CPS incorporates provisions designed to ensure that appropriate controls are placed on all media used for the storage of Data held by it for the purposes of carrying out its functions as the DCA.

5.1.7 Waste Disposal

(A) The DCA shall ensure that all media used to store Data held by it for the purposes of carrying out its functions as the DCA are disposed of only using secure methods of disposal in accordance with https://www.ncsc.gov.uk/guidance/secure-sanitisation-storage-media.

5.1.8 Off-Site Back-Up

(A) The DCA shall regularly carry out a Back-Up of:

(i) all Data held on the DCA Systems which are critical to the operation of those Systems or continuity in the provision of the SMKI Services; and

(ii) all other sensitive Data.

(B) For the purposes of paragraph (A), the DCA shall ensure that the Device CPS incorporates provisions which identify the categories of critical and sensitive Data that are to be Backed-Up.

(C) The DCA shall ensure that Data which are Backed-Up in accordance with paragraph (A):

(i) are stored on media that are located in physically secure facilities in different locations to the sites at which the Data being Backed-Up are ordinarily held;

(ii) are protected in accordance with the outcome of a risk assessment which is documented in the Device CPS, including when being transmitted for the purposes of Back-Up; and

(iii) to the extent to which they comprise DCA Private Key Material, are Backed-Up:

(a) using the proprietary Back-Up mechanisms specific to the relevant Cryptographic Module; and

(b) in a manner that is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(D) The DCA shall ensure that, where any elements of the DCA Systems, any Data held for the purposes of providing the SMKI Services, or any items of DCA equipment are removed from their primary location, they continue to be protected in accordance with the security standard appropriate to the primary location.

5.2 PROCEDURAL CONTROLS

5.2.1 Trusted Roles

(A) The DCA shall ensure that:

(i) no individual may carry out any activity which involves access to resources, or Data held on, the DCA Systems unless that individual has been expressly authorised to have such access;

(ii) each member of DCA Personnel has a clearly defined level of access to the DCA Systems and the premises in which they are located;

(iii) no individual member of DCA Personnel is capable, by acting alone, of engaging in any action by means of which the DCA Systems may be Compromised to a material extent; and

(iv) the Device CPS incorporates provisions designed to ensure that appropriate controls are in place for the purposes of compliance by the DCA with the requirements of this paragraph.

5.2.2 Number of Persons Required per Task

(A) The DCA shall ensure that the Device CPS incorporates provisions designed to establish:

(i) the appropriate separation of roles between the different members of DCA Personnel; and

(ii) the application of controls to the actions of all members of DCA Personnel who are Privileged Persons, identifying in particular any controls designed to ensure that the involvement of more than one individual is required for the performance of certain functions.

(B) The DCA shall ensure that the Device CPS, as a minimum, makes provision for the purposes of paragraph (A) in relation to the following roles:

(i) DCA Systems administration;

(ii) DCA Systems operations;

(iii) DCA Systems security; and

(iv) DCA Systems auditing.

5.2.3 Identification and Authentication for Each Role

See Part 5.2.2 of this Policy.

5.2.4 Roles Requiring Separation of Duties

See Part 5.2.2 of this Policy.

5.3 PERSONNEL CONTROLS

5.3.1 Qualification, Experience and Clearance Requirements

(A) The DCA shall ensure that all DCA Personnel must:

(i) be appointed to their roles in writing;

(ii) be bound by contract to the terms and conditions relevant to their roles;

(iii) have received appropriate training with respect to their duties;

(iv) be bound by contract not to disclose any confidential, sensitive, personal or security-related Data except to the extent necessary for the performance of their duties or for the purposes of complying with any requirement of law; and

(v) in so far as can reasonably be ascertained by the DCA, not have been previously relieved of any past assignment (whether for the DCA or any other person) on the grounds of negligence or any other failure to perform a duty.

(B) The DCA shall ensure that all DCA Personnel have, as a minimum, passed a Security Check before commencing their roles.

5.3.2 Background Check Procedures

See Part 5.3.1 of this Policy.

5.3.3 Training Requirements

See Part 5.3.1 of this Policy.

5.3.4 Retraining Frequency and Requirements

(A) The DCA shall ensure that the Device CPS incorporates appropriate provisions relating to the frequency and content of retraining and refresher training to be undertaken by members of DCA Personnel.

5.3.5 Job Rotation Frequency and Sequence

(A) The DCA shall ensure that the Device CPS incorporates appropriate provisions relating to the frequency and sequence of job rotations to be undertaken by members of DCA Personnel.

5.3.6 Sanctions for Unauthorised Actions

(A) The DCA shall ensure that the Device CPS incorporates appropriate provisions relating to sanctions for unauthorised actions undertaken by members of DCA Personnel.

5.3.7 Independent Contractor Requirements

(A) In accordance with the provisions of the Code, references to the DCA in this Policy include references to persons with whom the DCA contracts in order to secure performance of its obligations as the DCA.

5.3.8 Documentation Supplied to Personnel

(A) The DCA shall ensure that all DCA Personnel are provided with access to all documents relevant to their roles or necessary for the performance of their duties, including in particular:

(i) this Policy;

(ii) the Device CPS; and

(iii) any supporting documentation, statutes, policies or contracts.

5.4 AUDIT LOGGING PROCEDURES

5.4.1 Types of Events Recorded

(A) The DCA shall ensure that:

(i) the DCA Systems record all systems activity in an audit log;

(ii) the Device CPS incorporates a comprehensive list of all events that are to be recorded in an audit log in relation to:

(a) the activities of DCA Personnel;

(b) the use of DCA equipment;

(c) the use of (including both authorised and unauthorised access, and attempted access to) any premises at which functions of the DCA are carried out;

(d) communications and activities that are related to the Issue of

Certificates (in so far as not captured by the DCA Systems audit log); and

(iii) it records in an audit log all the events specified in paragraph (ii).

5.4.2 Frequency of Processing Log

(A) The DCA shall ensure that:

(i) the audit logging functionality in the DCA Systems is fully enabled at all times;

(ii) all DCA Systems activity recorded in the Audit Log is recorded in a standard format that is compliant with:

(a) British Standard BS 10008:2014 (Evidential Weight and Legal Admissibility of Electronic Information); or

(b) any equivalent to that British Standard which updates or replaces it from time to time; and

(iii) it monitors the DCA Systems in compliance with the SMKI PMA Guidance on “Protective Monitoring” published on the Website.

(B) The DCA shall ensure that the Device CPS incorporates provisions which specify:

(i) how regularly information recorded in the Audit Log is to be reviewed; and

(ii) what actions are to be taken by it in response to types of events recorded in the Audit Log.

(C) The DCA shall ensure that the Device CPS incorporates provisions in relation to access to the Audit Log, providing in particular that:

(i) Data contained in the Audit Log must not be accessible other than on a read-only basis; and

(ii) access to those Data must be limited to those members of DCA Personnel who are performing a dedicated system audit role.

5.4.3 Retention Period for Audit Log

(A) The DCA shall:

(i) retain the Audit Log so that it incorporates, on any given date, a record of all system events occurring during a period of at least twelve months prior to that date; and

(ii) ensure that a copy of the Audit Log incorporating a record of all system events occurring prior to the beginning of that period is archived in accordance with the requirements of Part 5.5 of this Policy.

5.4.4 Protection of Audit Log

(A) The DCA shall ensure that:

(i) to the extent to which the Audit Log is retained electronically, the Data stored in it cannot be accessed other than on a read-only basis, and are protected from unauthorised viewing, modification and deletion in accordance with:

(a) British Standard BS 10008:2014 (Evidential Weight and Legal Admissibility of Electronic Information); or

(b) any equivalent to that British Standard which updates or replaces it from time to time; and

(ii) to the extent to which the Audit Log is retained in non-electronic form, the Data stored in it are appropriately protected from unauthorised viewing, modification and destruction in order to ensure that their integrity is maintained for evidential purposes.

5.4.5 Audit Log Back-Up Procedures

(A) The DCA shall ensure that the Data contained in the Audit Log are Backed-

Up (or, to the extent that the Audit Log is retained in non-electronic form, are copied):

(i) on a daily basis; or

(ii) if activity has taken place on the DCA Systems only infrequently, in accordance with the schedule for the regular Back-Up of the Data held on those Systems.

(B) The DCA shall ensure that all Data contained in the Audit Log which are Backed-Up are, during Back-Up:

(i) held in accordance with the outcome of a risk assessment which is documented in the Device CPS; and

(ii) protected to the same standard of protection as the primary copy of the Audit Log in accordance with Part 5.4.4 of this Policy.

5.4.6 Audit Collection System (Internal or External)

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to its system for collecting Data for the purpose of populating the Audit Log.

5.4.7 Notification to Event-Causing Subject

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to its notification of any person who is (or is responsible for any System which is) the direct cause of an event recorded in the Audit Log.

5.4.8 Vulnerability Assessments

(A) Provision is made in Sections G2.13 to G2.14 of the Code (Management of Vulnerabilities) in relation to the carrying out of vulnerability assessments in respect of the DCA Systems.

5.5 RECORDS ARCHIVAL

5.5.1 Types of Records Archived

(A) The DCA shall ensure that it archives:

(i) the Audit Log in accordance with Part 5.4.3 of this Policy;

(ii) its records of all Data submitted to it by Eligible Subscribers for the purposes of Certificate Signing Requests; and

(iii) any other Data specified in this Policy or the Code as requiring to be archived in accordance with this Part 5.5.

5.5.2 Retention Period for Archive

(A) The DCA shall ensure that all Data which are Archived are retained for a period of at least seven years from the date on which they were Archived.

5.5.3 Protection of Archive

(A) The DCA shall ensure that Data held in its Archive are:

(i) protected against any unauthorised access;

(ii) adequately protected against environmental threats such as temperature, humidity and magnetism; and

(iii) incapable of being modified or deleted.

5.5.4 Archive Back-Up Procedures

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to its procedures for the Back-Up of its Archive.

5.5.5 Requirements for Time-Stamping of Records

(A) Provision in relation to Time-Stamping is made in Part 6.8 of this Policy.

5.5.6 Archive Collection System (Internal or External)

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to its system for collecting Data for the purpose of populating the Archive.

5.5.7 Procedures to Obtain and Verify Archive Information

(A) The DCA shall ensure that:

(i) Data held in the Archive are stored in a readable format during their retention period; and

(ii) those Data remains accessible at all times during their retention period, including during any period of interruption, suspension or cessation of the DCA's operations.

(B) The DCA shall ensure that the Device CPS incorporates provisions in relation to the periodic verification by the DCA of the Data held in the Archive.

5.6 KEY CHANGEOVER

5.6.1 Device Certificate Key Changeover

(A) The DCA shall Issue a new Device Certificate in relation to a Device where a new Certificate Signing Request is submitted by an Eligible Subscriber in accordance with the requirements of the SMKI IDS sections 2.3.1.6 to 2.3.1.10, 2.4.1.1 to 2.4.1.5 and 2.5.1.1 to 2.5.1.4and this Policy.

5.6.2 DCA Key Changeover

(A) Where the DCA ceases to use an Issuing DCA Private Key in accordance with the requirements of Part 4.3.1(E) of this Policy, it shall:

(i) verifiably destroy the Issuing DCA Private Key Material;

(ii) not revoke the related Issuing DCA Certificate (which may continue to be used for the purpose of validating Digital Signatures generated using the Issuing DCA Private Key);

(iii) generate a new Key Pair;

(iv) ensure that any Device Certificate subsequently Issued by it is Issued using the Issuing DCA Private Key from the newly-generated Key Pair:

(a) until the time determined in accordance with Part 4.3.1(E) of this Policy; and

(b) subject to the provisions of Part 5.7.1(C) of this Policy; and

(v) in its capacity as the Root DCA:

(a) Issue a new Issuing DCA Certificate; and

(b) promptly lodge that Issuing DCA Certificate in the SMKI Repository.

(B) The DCA shall ensure that the actions taken by it in accordance with the requirements of paragraph (A) are managed so as to prevent any disruption to the provision of the SMKI Services.

5.7 COMPROMISE AND DISASTER RECOVERY

5.7.1 Incident and Compromise Handling Procedures

(A) The DCA shall ensure that the Device CPS incorporates a business continuity plan which shall be designed to ensure continuity in, or (where there has been unavoidable discontinuity) the recovery of, the provision of the SMKI Services in the event of any Compromise of the DCA Systems or major failure in the DCA processes.

(B) The DCA shall ensure that the procedures set out in the business continuity plan are:

(i) compliant with ISO 22301 and ISO 27031 (or any equivalent to those standards which update or replace them from time to time); and

(ii) tested periodically, and in any event at least once in each year, in order to ensure that they are operationally effective.

(C) In the event of the Compromise of any DCA Private Key, the DCA shall:

(i) not revoke the related Issuing DCA Certificate;

(ii) not revoke any Device Certificates Issued using the Issuing DCA Private Key;

(iii) not issue any further Device Certificates using the Issuing DCA Private Key;

(iv) treat the event in the same manner as if it were a Major Security Incident in accordance with Section G2 of the Code (System Security: Obligations on the DCC); and

(v) immediately notify the SMKI PMA.

(D) The DCA shall ensure that the Device CPS incorporates provisions setting out the approach to be taken by it in circumstances in which it suspects (or has reason to suspect) that any Issuing DCA Private Key or any part of the DCA Systems is Compromised.

5.7.2 Computing Resources, Software and/or Data are Corrupted

(A) The DCA shall ensure that the business continuity plan established in accordance with Part 5.7.1 of this Policy incorporates provisions setting out the steps to be taken in the event of any loss of or corruption to computing resources, software or Data.

5.7.3 Entity Private Key Compromise Procedures

See Part 5.7.1 of this Policy.

5.7.4 Business Continuity Capabilities after a Disaster

(A) The DCA shall ensure that the business continuity plan established in accordance with Part 5.7.1 of this Policy is designed to ensure the recovery of the provision of the SMKI Services within not more than 12 hours of the occurrence of any event causing discontinuity.

5.8 CERTIFICATION AUTHORITY AND REGISTRATION AUTHORITY TERMINATION

[*Not applicable in this Policy*]

6 <u>TECHNICAL SECURITY CONTROLS</u>

The DCA shall ensure that the Device CPS incorporates detailed provision in relation to the technical controls to be established and operated for the purposes of the exercise of its functions as the Root DCA, the Issuing DCA and the Registration Authority.

6.1 KEY PAIR GENERATION AND INSTALLATION

6.1.1 Key Pair Generation

(A) The DCA shall ensure that all Key Pairs which it uses for the purposes of this Policy are generated:

(i) in a protected environment compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time);

(ii) using multi-person control, such that no single Privileged Person is capable of generating any DCA Key; and

(iii) using random numbers which are such as to make it computationally infeasible to regenerate those Key Pairs even with knowledge of when and by means of what equipment they were generated.

(B) The DCA shall not generate any Private Key or Public Key other than a DCA Key.

6.1.2 Private Key Delivery to Subscriber

(A) In accordance with Part 6.1.1(B), the DCA shall not generate any Private Key for delivery to a Subscriber.

6.1.3 Public Key Delivery to Certificate Issuer

(A) The DCA shall ensure that the Device CPS incorporates provisions:

(i) in relation to the mechanism by which Public Keys of Subscribers are delivered to it for the purpose of the exercise of its functions as the Root DCA and Issuing DCA; and

(ii) ensuring that the mechanism uses a recognised standard protocol such as PKCS#10.

6.1.4 DCA Public Key Delivery to Relying Parties

(A) The DCA shall ensure that the Device CPS incorporates provisions:

(i) in relation to the manner by which each DCA Public Key is to be lodged in the SMKI Repository; and

(ii) designed to ensure that the DCA Public Keys are securely lodged in the SMKI Repository in such a manner as to guarantee that their integrity is maintained.

6.1.5 Key Sizes

(A) The DCA and every Subscriber shall ensure that all Private Keys and Public Keys which each of them may use for the purposes of this Policy are of the size and characteristics set out in the GB Companion Specification.

6.1.6 Public Key Parameters Generation and Quality Checking

(A) The DCA shall ensure that any Public Key used by it for the purposes of this Policy shall be of values and lengths that make the success of known attacks infeasible.

(B) Each Subscriber shall ensure that any Public Key used by it for the purposes of this Policy shall be of values and lengths that make the success of known attacks infeasible.

6.1.7 Key Usage Purposes (as per X.509 v3 `keyUsage` Field)

(A) The DCA shall ensure that each Certificate that is Issued by it has a `keyUsage` field in accordance with RFC5759 and RFC5280.

(B) The DCA shall ensure that each Device Certificate that is Issued by it has a `keyUsage` of either:

(i) `digitalSignature`; or

(ii) `keyAgreement`.

(C) The DCA shall ensure that each DCA Certificate that is Issued by it has a `keyUsage` of `keyCertSign`.

(D) The DCA shall ensure that no `keyUsage` values may be set in a Device Certificate or DCA Certificate other than in accordance with this Part 6.1.7.

6.2 PRIVATE KEY PROTECTION AND CRYPTOGRAPHIC MODULE ENGINEERING CONTROLS

6.2.1 Cryptographic Module Standards and Controls

(A) The DCA shall ensure that all DCA Private Keys shall be:

(i) protected to a high standard of assurance by physical and logical security controls; and

(ii) stored in and operated from within a Cryptographic Module which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(B) The DCA shall ensure that all DCA Private Keys shall, where they affect the outcome of any Certificates Issued by it, be protected by, stored in and operated from within a Cryptographic Module which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(C) The DCA shall ensure that no DCA Private Key shall be made available in either complete or unencrypted form except in a Cryptographic Module which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(D) The DCA shall ensure that any Cryptographic Module which is used for any purpose related to Certificate life-cycle management shall:

(i) operate so as to block access to itself following a number of failed consecutive attempts to access it using Activation Data, where that number shall be set out in the Device CPS; and

(ii) be required to be unblocked by an authorised member of DCA Personnel who has been Authenticated as such following a process which shall be set out in the Device CPS.

6.2.2 Private Key (m out of n) Multi-Person Control

See Part 6.1.1 of this Policy.

6.2.3 Private Key Escrow

(A) This Policy does not support Key Escrow.

(B) The DCA shall not provide any Key Escrow service.

6.2.4 Private Key Back-Up

(A) The DCA may Back-Up DCA Private Keys insofar as:

(i) each Private Key is protected to a standard which is at least equivalent to that required in relation to the principal Private Key in accordance with this Policy; and

(ii) where more than one Private Key is Backed-Up within a single security environment, each of the Private Keys which is Backed-Up within that environment must be protected to a standard which is at least equivalent to that required in relation to an Issuing DCA Private Key in accordance with this Policy.

6.2.5 Private Key Archival

(A) The DCA shall ensure that no DCA Key which is a Private Key is archived.

6.2.6 Private Key Transfer into or from a Cryptographic Module

(A) The DCA shall ensure that no DCA Private Key is transferred or copied other than:

(i) for the purposes of:

(a) Back-Up; or

(b) establishing an appropriate degree of resilience in relation to the provision of the SMKI Services;

(ii) in accordance with a level of protection which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

6.2.7 Private Key Storage on Cryptographic Module

See Part 6.2.1 of this Policy.

6.2.8 Method of Activating Private Key

(A) The DCA shall ensure that the Cryptographic Module in which any DCA Private Key is stored may be accessed only by an authorised member of DCA Personnel who has been Authenticated following an Authentication process which:

(i) has an appropriate level of strength to ensure the protection of the Private Key; and

(ii) involves the use of Activation Data.

6.2.9 Method of Deactivating Private Key

(A) The DCA shall ensure that any DCA Private Key shall be capable of being de-activated by means of the DCA Systems, at least by:

(i) the actions of:

(a) turning off the power;

(b) logging off;

(c) carrying out a system reset; and

(ii) a period of inactivity of a length which shall be set out in the Device CPS.

6.2.10 Method of Destroying Private Key

(A) The DCA shall ensure that the Device CPS incorporates provisions for the exercise of strict controls in relation to the destruction of DCA Keys.

(B) The DCA shall ensure that no DCA Key (whether in active use, existing as a copy for the purposes of resilience, or Backed-Up) is destroyed except in accordance with a positive decision by the DCA to destroy it.

6.2.11 Cryptographic Module Rating

See Part 6.2.1 of this Policy.

6.3 OTHER ASPECTS OF KEY PAIR MANAGEMENT

6.3.1 Public Key Archival

(A) The DCA shall ensure that it archives DCA Public Keys in accordance with the requirements of Part 5.5 of this Policy.

6.3.2 Certificate Operational Periods and Key Pair Usage Periods

(A) The DCA shall ensure that:

(i) the Validity Period of each Certificate shall be an indefinite period; and

(ii) for this purpose, it uses the `notAfter` value specified in Annex B.

6.4 ACTIVATION DATA

6.4.1 Activation Data Generation and Installation

(A) The DCA shall ensure that any Cryptographic Module within which a DCA Key is held has Activation Data that are unique and unpredictable.

(B) The DCA shall ensure that:

(i) these Activation Data, in conjunction with any other access control, shall be of an appropriate level of strength for the purposes of protecting the DCA Keys; and

(ii) where the Activation Data comprise any PINs, passwords or pass-phrases, the DCA shall have the ability to change these at any time.

6.4.2 Activation Data Protection

(A) The DCA shall ensure that the Device CPS incorporates provision for the use of such cryptographic protections and access controls as are appropriate to protect against the unauthorised use of Activation Data.

6.4.3 Other Aspects of Activation Data

[*Not applicable in this Policy*]

6.5 COMPUTER SECURITY CONTROLS

6.5.1 Specific Computer Security Technical Requirements

(A) The DCA shall ensure that the Device CPS incorporates provisions in relation to the identification and implementation, following the conclusion of any threat assessment, of security measures which make provision for at least the following:

(i) the establishment of access controls in relation to the activities of the DCA;

(ii) the appropriate allocation of responsibilities to Privileged Persons;

(iii) the identification and Authentication of organisations, individuals and Systems involved in DCA activities;

(iv) the use of cryptography for communication and the protection of Data stored on the DCA Systems;

(v) the audit of security related events; and

(vi) the use of recovery mechanisms for DCA Keys.

6.5.2 Computer Security Rating

(A) The DCA shall ensure that the Device CPS incorporates provisions relating to the appropriate security rating of the DCA Systems.

6.6 LIFE-CYCLE TECHNICAL CONTROLS

6.6.1 System Development Controls

(A) The DCA shall ensure that any software which is developed for the purpose of establishing a functionality of the DCA Systems shall:

(i) take place in a controlled environment that is sufficient to protect against the insertion into the software of malicious code;

(ii) be undertaken by a developer which has a quality system that is:

(a) compliant with recognised international standards (such as ISO 9001:2000 or an equivalent standard); or

(b) available for inspection and approval by the SMKI PMA, and has been so inspected and approved.

6.6.2 Security Management Controls

(A) The DCA shall ensure that the Device CPS incorporates provisions which are designed to ensure that the DCA Systems satisfy the requirements of Section G2 (System Security: Obligations on the DCC) and Section G5 (Information Security: Obligations on the DCC and Users) of the Code.

6.6.3 Life-Cycle Security Controls

See Part 6.6.2 of this Policy.

6.7 NETWORK SECURITY CONTROLS

6.7.1 Use of Offline Root DCA

(A) The DCA shall ensure that its functions as the Root DCA are carried out on a part of the DCA Systems that is neither directly nor indirectly connected to any System which is not a part of the DCA Systems.

6.7.2 Protection Against Attack

(A) The DCA shall use its best endeavours to ensure that the DCA Systems are not Compromised, and in particular for this purpose that they are designed and operated so as to detect and prevent:

(i) any Denial of Service Event; and

(ii) any unauthorised attempt to connect to them.

(B) The DCA shall take reasonable steps to ensure that the DCA Systems cause or permit to be open at any time only those network ports, and allow only those protocols, which are required at that time for the effective operation of those Systems, and block all network ports and protocols which are not so required.

6.7.3 Separation of Issuing DCA

(A) The DCC shall ensure that, where its functions as the Issuing DCA are carried out on a part of the DCA Systems that is connected to an external network, they are carried out on a System that is Separated from all other DCA Systems.

6.7.4 Health Check of DCA Systems

(A) The DCA shall ensure that, in relation to the DCA Systems, a vulnerability assessment in accordance with Sections G2.13 – G2.15 of the Code (Management of Vulnerabilities) is carried out with such frequency as may be specified from time to time by the Independent SMKI Assurance Service Provider.

6.8 TIME-STAMPING

6.8.1 Use of Time-Stamping

(A) The DCA shall ensure that Time-Stamping takes place in relation to all Certificates and all other DCA activities which require an accurate record of time.

(B) The DCA shall ensure that the Device CA incorporates provisions in relation to the time source and mechanisms used by any Time-Stamping Authority which carries out Time-Stamping on behalf of the DCA.

7 CERTIFICATE, CRL AND OCSP PROFILES

7.1 CERTIFICATE PROFILES

(A) The DCA shall use only the Certificate Profiles in Annex B.

7.1.1 Version Number(s)

[*Not applicable in this Policy*]

7.1.2 Certificate Extensions

[*Not applicable in this Policy*]

7.1.3 Algorithm Object Identifiers

[*Not applicable in this Policy*]

7.1.4 Name Forms

[*Not applicable in this Policy*]

7.1.5 Name Constraints

[*Not applicable in this Policy*]

7.1.6 Certificate Policy Object Identifier

[*Not applicable in this Policy*]

7.1.7 Usage of Policy Constraints Extension

[*Not applicable in this Policy*]

7.1.8 Policy Qualifiers Syntax and Semantics

[*Not applicable in this Policy*]

7.1.9 Processing Semantics for the Critical Certificate Policies Extension

[*Not applicable in this Policy*]

7.2 CRL PROFILE

7.2.1 Version Number(s)

[*Not applicable in this Policy*]

7.2.2 CRL and CRL Entry Extensions

[*Not applicable in this Policy*]

7.3 OCSP PROFILE

7.3.1 Version Number(s)

[*Not applicable in this Policy*]

7.3.2 OCSP Extensions

[*Not applicable in this Policy*]

8 COMPLIANCE AUDIT AND OTHER ASSESSMENTS

8.1 FREQUENCY OR CIRCUMSTANCES OF ASSESSMENT

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.2 IDENTITY/QUALIFICATIONS OF ASSESSOR

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.3 ASSESSOR'S RELATIONSHIP TO ASSESSED ENTITY

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.4 TOPICS COVERED BY ASSESSMENT

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.5 ACTIONS TAKEN AS A RESULT OF DEFICIENCY

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.6 COMMUNICATION OF RESULTS

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

9 OTHER BUSINESS AND LEGAL MATTERS

In so far as provision is made in relation to all the matters referred to in this Part, it is found in the DCC Licence and the provisions of the Code (including in Section L11 (Subscriber Obligations) and Section L12 (Relying Party Obligations) of the Code).

9.1 FEES

(A) See the statement at the beginning of this Part.

9.1.1 Certificate Issuance or Renewal Fees

(A) See the statement at the beginning of this Part.

9.1.2 Device Certificate Access Fees

(A) See the statement at the beginning of this Part.

9.1.3 Revocation or Status Information Access Fees

(A) See the statement at the beginning of this Part.

9.1.4 Fees for Other Services

(A) See the statement at the beginning of this Part.

9.1.5 Refund Policy

(A) See the statement at the beginning of this Part.

9.2 FINANCIAL RESPONSIBILITY

9.2.1 Insurance Coverage

(A) See the statement at the beginning of this Part.

9.2.2 Other Assets

(A) See the statement at the beginning of this Part.

9.2.3 Insurance or Warranty Coverage for Subscribers and Subjects

(A) See the statement at the beginning of this Part.

9.3 CONFIDENTIALITY OF BUSINESS INFORMATION

9.3.1 Scope of Confidential Information

(A) See the statement at the beginning of this Part.

9.3.2 Information not within the Scope of Confidential Information

(A) See the statement at the beginning of this Part.

9.3.3 Responsibility to Protect Confidential Information

(A) See the statement at the beginning of this Part.

9.4 PRIVACY OF PERSONAL INFORMATION

9.4.1 Privacy Plan

(A) See the statement at the beginning of this Part.

9.4.2 Information Treated as Private

(A) See the statement at the beginning of this Part.

9.4.3 Information not Deemed Private

(A) See the statement at the beginning of this Part.

9.4.4 Responsibility to Protect Private Information

(A) See the statement at the beginning of this Part.

9.4.5 Notice and Consent to Use Private Information

(A) See the statement at the beginning of this Part.

9.4.6 Disclosure Pursuant to Judicial or Administrative Process

(A) See the statement at the beginning of this Part.

9.4.7 Other Information Disclosure Circumstances

(A) See the statement at the beginning of this Part.

9.5 INTELLECTUAL PROPERTY RIGHTS

(A) See the statement at the beginning of this Part.

9.6 REPRESENTATIONS AND WARRANTIES

9.6.1 Certification Authority Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.2 Registration Authority Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.3 Subscriber Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.4 Relying Party Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.5 Representations and Warranties of Other Participants

(A) See the statement at the beginning of this Part.

9.7 DISCLAIMERS OF WARRANTIES

(A) See the statement at the beginning of this Part.

9.8 LIMITATIONS OF LIABILITY

(A) See the statement at the beginning of this Part.

9.9 INDEMNITIES

(A) See the statement at the beginning of this Part.

9.10 TERM AND TERMINATION

9.10.1 Term

(A) See the statement at the beginning of this Part.

9.10.2 Termination of Device Certificate Policy

(A) See the statement at the beginning of this Part.

9.10.3 Effect of Termination and Survival

(A) See the statement at the beginning of this Part.

9.11 INDIVIDUAL NOTICES AND COMMUNICATIONS WITH PARTICIPANTS

9.11.1 Subscribers

(A) See the statement at the beginning of this Part.

9.11.2 Device Certification Authority

(A) See the statement at the beginning of this Part.

9.11.3 Notification

(A) See the statement at the beginning of this Part.

9.12 AMENDMENTS

9.12.1 Procedure for Amendment

(A) See the statement at the beginning of this Part.

9.12.2 Notification Mechanism and Period

(A) See the statement at the beginning of this Part.

9.12.3 Circumstances under which OID Must be Changed

(A) See the statement at the beginning of this Part.

9.13 DISPUTE RESOLUTION PROVISIONS

(A) See the statement at the beginning of this Part.

9.14 GOVERNING LAW

(A) See the statement at the beginning of this Part.

9.15 COMPLIANCE WITH APPLICABLE LAW

(A) See the statement at the beginning of this Part.

9.16 MISCELLANEOUS PROVISIONS

9.16.1 Entire Agreement

(A) See the statement at the beginning of this Part.

9.16.2 Assignment

(A) See the statement at the beginning of this Part.

9.16.3 Severability

(A) See the statement at the beginning of this Part.

9.16.4 Enforcement (Attorney's Fees and Waiver of Rights)

(A) `See the statement at the beginning of this Part.

9.16.5 Force Majeure

(A) See the statement at the beginning of this Part.

9.17 OTHER PROVISIONS

9.17.1 Device Certificate Policy Content

(A) See the statement at the beginning of this Part.

9.17.2 Third Party Rights

(A) See the statement at the beginning of this Part.

Annex A: Definitions and Interpretation

In this Policy, except where the context otherwise requires -

- expressions defined in Section A of the Code (Definitions and Interpretation) have the same meaning as is set out in that Section,
- the expressions in the left hand column below shall have the meanings given to them in the right hand column below,
- where any expression is defined in Section A of the Code (Definitions and Interpretation) and in this Annex, the definition in this Annex shall take precedence for the purposes of the Policy,
- the rule of interpretation set out at Part 1.1 of this Policy shall apply.

Activation Data

means any private Data (such as a password or the Data on a smartcard) which are used to access a Cryptographic Module.

Archive

means the archive of Data created in accordance with Part 5.5.1 of this Policy (and “**Archives**” and “**Archived**” shall be interpreted accordingly).

Audit Log

means the audit log created in accordance with Part 5.4.1 of this Policy.

Authentication

means the process of establishing that an individual, organisation, System or Device is what he or it claims to be (and “**Authenticate**” shall be interpreted accordingly).

Authorised Subscriber

means a Party or RDP which has successfully completed the procedures set out in the SMKI RAPP and has been authorised by the DCA to submit a Certificate Signing Request.

Certificate means either a Device Certificate or a DCA Certificate.

Certificate Profile means a table bearing that title in Annex B and specifying certain parameters to be contained within a Certificate.

Certificate Re-Key means a change to the Public Key contained within a Certificate bearing a particular serial number.

Certificate Signing Request means a request for a Certificate submitted by an Eligible Subscriber in accordance with the SMKI RAPP.

DCA Key means any Private Key or a Public Key generated by the DCA for the purposes of complying with its obligations under the Code.

DCA Personnel means those persons who are engaged by the DCC, in so far as such persons carry out, or are authorised to carry out, any function of the DCA.

DCA Private Key means a DCA Key which is a Private Key.

DCA Public Key means a DCA Key which is a Public Key.

DCA Systems means the Systems used by the DCA in relation to the SMKI Services.

DCA Certificate means either a Root DCA Certificate or an Issuing DCA Certificate.

Device Certificate means a certificate in the form set out in the Device Certificate Profile in accordance with Annex B, and Issued by the Issuing DCA in accordance with this Policy.

Device Certification Authority (or **DCA**) means the DCC, acting in the capacity and exercising the functions of one or more of:

(a) the Root DCA;

(b) the Issuing DCA; and

(c) the Registration Authority.

Eligible Subscriber means:

(a) in relation to a Device Certificate, an Authorised Subscriber which is identified as an Eligible Subscriber in accordance with Section L3.16 of the Code (Device Certificates); and

(b) in relation to a DCA Certificate, an Authorised Subscriber which is identified as an Eligible Subscriber in accordance with Section L3.17 of the Code (DCA Certificates).

Issue means the act of the DCA, in its capacity as the Root DCA or Issuing DCA, and acting in accordance with this Policy, of creating and signing a Certificate which is bound to both a Subject and a Subscriber (and "**Issued**" and "**Issuing**" shall be interpreted accordingly).

Issuing Device Certification Authority (or **Issuing DCA**) means the DCC exercising the function of Issuing Device Certificates to Eligible Subscribers and of storing and managing the Private Keys associated with that function.

Issuing DCA Certificate means a certificate in the form set out in the Issuing DCA Certificate Profile in accordance with Annex B, and Issued by the Root DCA to the Issuing DCA in accordance with this Policy.

Issuing DCA Private Key means a Private Key which is stored and managed by the DCA acting in its capacity as the Issuing DCA.

Issuing DCA Public Key means the Public Key which is part of a Key Pair with an Issuing DCA Private Key.

Key Escrow means the storage of a Private Key by a person other than the Subscriber or Subject of the Certificate which contains the related Public Key.

Object Identifier (or **OID**) means an Object Identifier assigned by the Internet Address Naming Authority.

OCA has the meaning given to that expression in Appendix B of the Code (Organisation Certificate Policy).

OCA Systems has the meaning given to that expression in Appendix B of the Code (Organisation Certificate Policy).

Policy means this Device Certificate Policy.

Private Key Material in relation to a Private Key, means that Private Key and the input parameters necessary to establish, use and maintain it.

Registration Authority means the DCC exercising the function of receiving and processing Certificate Signing Requests made in accordance with the SMKI RAPP.

Root Device Certification Authority (or **Root DCA**) means the DCC exercising the function of Issuing DCA Certificates to the Issuing DCA and storing and managing Private Keys associated with that function.

Root DCA Certificate means a certificate in the form set out in the Root DCA Certificate Profile in accordance with Annex B and self-signed by the Root DCA in accordance with this Policy.

Root DCA Private Key means a Private Key which is stored and managed by the DCA acting in its capacity as the Root DCA.

Security Related Functionality means the functionality of the DCA Systems which is designed to detect, prevent or mitigate the adverse effect of any Compromise of that System.

SMKI Registration Authority Manager has the meaning given to that expression in the SMKI RAPP.

SMKI Registration Authority Personnel has the meaning given to that expression in the SMKI RAPP.

Subject means:

(a) in relation to a Device Certificate, the Device identified by the Device ID in the `hwSerialNum` field of the Device Certificate Profile in Annex B; and

(b) in relation to a DCA Certificate, the Root DCA or Issuing DCA as identified by the `subject` field of the relevant Certificate Profile in Annex B.

Subscriber means, in relation to any Certificate, a Party or RDP which has been Issued with and accepted that Certificate, acting in its capacity as the holder of the Certificate.

Time-Stamping means the act that takes place when a Time-Stamping Authority, in relation to a Certificate, stamps a particular datum with an accurate indicator of the time (in hours, minutes and seconds) at which the activity of stamping takes place.

Time-Stamping Authority means that part of the DCA that:

(a) where required, provides an appropriately precise time-stamp in the format required by this Policy; and

(b) relies on a time source that is:

(i) accurate;

(ii) determined in a manner that is independent of any other part of the DCA Systems; and

(iii) such that the time of any time-stamp can be verified to be that of the Independent Time Source at the time at which the time-stamp was applied.

Validity Period means, in respect of a Certificate, the period of time for which that Certificate is intended to be valid.

Annex B: DCA Certificate and Device Certificate Profiles

End Entity Certificate Structure and Contents

This Annex lays out requirements as to structure and content with which DCA Certificates and Device Certificates shall comply. All terms in this Annex shall, where not defined in the Code, this Policy, or the GB Companion Specification, have the meanings in IETF RFC 5759 or IETF RFC 5280.

Common requirements applicable to DCA Certificates and Device Certificates

All DCA Certificates and Device Certificates that are validly authorised within the SMKI for use within the scope of the GB Companion Specification:

- shall be compliant with IETF RFC 5759 and so with IETF RFC 5280.
- for clarity and in adherence with the requirements of IETF RFC 5759, all DCA Certificates and Device Certificates shall:
    - contain the `authorityKeyIdentifier` extension, except where the Certificate is the Root DCA Certificate;
    - contain the `keyUsage` extension which shall be marked as critical;
- be X.509 v3 certificates as defined in IETF RFC 5280, encoded using the ASN.1 Distinguished Encoding Rules;
- only contain Public Keys of types that are explicitly allowed by the GBCS. This means all Public Keys shall be elliptic curve Public Keys on the NIST P-256 curve;
- only contain Public Keys in uncompressed form i.e. contain an elliptic curve point in uncompressed form as detailed in Section 2.2 of IETF RFC 5480;
- only provide for signature methods that are explicitly allowed within the GBCS. This means using P-256 Private Keys with SHA 256 and ECDSA;
- contain a `certificatePolicies` extension containing at least one `CertPolicyID` which shall be marked as critical. For clarity and in adherence with IETF RFC 5280, Certification Path Validation undertaken by Devices shall interpret this extension;
- contain a `serialNumber` of no more than 16 octets in length;

- contain a subjectKeyIdentifier which shall be marked as non-critical;
- contain an authorityKeyIdentifier in the form [0] KeyIdentifier which shall be marked as non-critical, except where the Certificate is the Root DCA Certificate;
- only contain KeyIdentifiers generated as per method (2) of Section 4.2.1.2 of IETF RFC 5280 and so which shall always be 8 octets in length;
- contain an issuer field whose contents MUST be identical to the contents of the signer's subject field in the signer's Certificate;
- have a valid notBefore field consisting of the time of issue encoded and a valid notAfter field for a not well-defined expiraton date as per IETF RFC 5280 Section 4.1.2.5.

Requirements applicable to Device Certificates only

All Device Certificates that are issued by the DCA shall:

- not have a well-defined expiration date and so the notAfter shall be assigned the GeneralizedTime value of 99991231235959Z;
- have an empty subject field;
- contain subjectAltName extension which contains a single GeneralName of type otherName that is further sub-typed as a hardwareModuleName (id-on-hardwareModuleName) as defined in RFC 4108 section 5. The hwSerialNum field shall be set to the Device's Entity Identifier. In adherence to IETF RFC 5280, the subjectAltName shall be marked as critical;
- contain a single Public Key;
- contain a keyUsage extension marked as critical, with a value of only one of:
    - digitalSignature; or
    - keyAgreement.
- contain a single CertPolicyID in the certificatePolicies extension that refers to the OID applicable to the version of this Device Certificate Policy applicable at the time that the Device Certificate was issued.

Requirements applicable to the Root DCA and Issuing DCA

All DCA Certificates issued by the DCA shall:

- not have a well-defined expiration date and so the notAfter shall be assigned the GeneralizedTime value of 99991231235959Z;
- must have a Valid notBefore field consisting of the time of issue encoded as per RFC 5280;
- Per RFC 5280, the IssuerName of any certificates MUST be identical to the signer's subject;
- have a globally unique subject;
- contain a single Public Key;
- contain a keyUsage extension marked as critical and defined as keyCertSign;
- For Issuing DCA Certificates contain at least one CertPolicyID in the certificatePolicies extension that refers to the OID of the version of this Device Certificate Policy prevailing at the time.
- For the Root DCA Certificate contain a single CertPolicyID in the certificatePolicies extension that refers to the OID for anyPolicy.
- For Issuing DCA Certificates, contain the basicConstraints extension, with values cA=True, and pathLen=0. This extension shall be marked as critical.
- For the Root DCA Certificate, contain the basicConstraints extension, with the value cA=True and pathLen absent (unlimited). This extension shall be marked as critical.

Device Certificate Profile

Field Name	RFC 5759/5280 Type	Value	Reference
version	INTEGER	v3	

serialNumber	INTEGER	Positive Integer of up to 16 Octets	
signature	AlgorithmIdentifier	SHA256 with ECDSA	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the "Issuer X520 Common Name")	UTF8String	Globally unique common name of Issuing DCA of up to 4 Octets (as defined in the Issuing DCA Certificate Profile)	
keyIdentifier in Authoritykeyidentifier (the "Authority Key Identifier")	keyIdentifier	A unique value that matches the subjectKeyIdentifier value of the issuer's credential	
keyIdentifier in SubjectKeyIdentifier (the "Subject Key Identifier")	keyIdentifier	Provides a means for identifying certificates containing the particular Public Key used in an application	
notBefore	Time	Creation time of the Device Certificate	
notAfter	Time	shall be assigned the GeneralizedTime value of 99991231235959Z	

The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the "Subject X520 Common Name")	UTF8String	EMPTY	
subjectAltName	OtherName	contains a single GeneralName of type OtherName that is further sub-typed as a HardwareModuleName (id-on-hardwareModuleName) as defined in RFC 4108 section 5. The hwSerialNum field shall be set to the Device's Entity Identifier	
subjectPublicKeyInfo	SubjectPublicKeyInfo	The Subject's Public Key	
extensions	Extensions	Critical and non-critical extensions	
signatureAlgorithm	AlgorithmIdentifier	SHA256 with ECDSA	
signatureValue	BIT STRING	Subject Device Certificate signature	

Interpretation

`version`

The version of the X.509 Device Certificate. Valid Device Certificates shall identify themselves as version 3.

`serialNumber`

Device Certificate serial number, a positive integer of up to 16 octets. The `serialNumber` identifies the Device Certificate, and shall be created by the Issuing DCA that signs the Device Certificate. The `serialNumber` shall be unique in the scope of Device Certificate signed by the Issuing DCA.

`signature`

The identity of the signature algorithm used to sign the Device Certificate. The field is identical to the value of the Device Certificate `signatureAlgorithm` field explained further under the next **`signatureAlgorithm`** heading below.

Issuer X520 Common Name

The name of the signer of the Device Certificate. This will be the gloablly unique name of the Issuing DCA of up to 4 Octets (as defined in the Issuing DCA Certificate Profile).

Authority Key Identifier

To optimize building the correct credential chain, the non-critical Authority Key Identifier extension shall be populated with a unique value as recommended by RFC 5280 and shall be included in all Device Certificates.

Subject Key Identifier

The Subject Key Identifier extension should be included and marked as non-critical in the Device Certificate.

`validity`

The time period over which the Issuing DCA expects the Device Certificate to be valid. The `validity` period is the period of time from `notBefore` through `notAfter`, inclusive.

Device Certificate are expected to operate indefinitely into the future and should use the value 99991231235959Z. Solutions verifying a Device Certificate are expected to accept this value indefinitely.

All times shall be stated in the Universal Coordinated Time (UTC) time zone. Times up to and including 23:59:59 December 31, 2049 UTC shall be encoded as `UTCTime` as YYMMDDHHmmssZ.

Times later than 23:59:59 December 31, 2049 UTC shall be encoded as `GeneralizedTime` as YYYYMMDDHHmmssZ.

`notBefore`

The earliest time a Device Certificate may be used. This shall be the time the Device Certificate is created.

`notAfter`

The latest time a Device Certificate is expected to be used. Device Certificate are expected to operate indefinitely into the future and should use the value 99991231235959Z. Solutions verifying a Device Certificate are expected to accept this value indefinitely.

Subject X520 Common Name

This field must be EMPTY.

`subjectAltName`

The non-critical `subjectAltName` extension shall contain a single `GeneralName` of type `OtherName` that is further sub-typed as a `HardwareModuleName` (`id-on-hardwareModuleName`) as defined in RFC 4108 section 5. The `hwSerialNum` field shall be set to the Device ID.

subjectPublicKeyInfo

The Device Certificate `subjectPublicKeyInfo` field shall indicate the Public Key algorithm identifier and the Public Key in the specified algorithm format as specified in RFC 3279 and RFC 5480.

The algorithm field in the `subjectPublicKeyInfo` structure shall contain the following identifier:

```
id-ecPublicKey OBJECT IDENTIFIER ::= {iso(1) member-body(2)
us(840) ansi-X9-62(10045) keyType(2) 1 }
```

id-ecPublicKey indicates that the algorithms that can be used with the subject Public Key are unrestricted. The key is only restricted by the values indicated in the `KeyUsage` Device Certificate extension (explained further under the next **`extensions`** heading below).

The parameter for `id-ecPublicKey` is as follows and shall always be present:

```
ECParameters ::= CHOICE {

    namedCurve          OBJECT IDENTIFIER

    -- implicitCurve   NULL

    -- specifiedCurve  SpecifiedECDomain

  }
```

Only the following field in ECParameters shall be used:

- o `namedCurve` - identifies all the required values for a particular set of elliptic curve domain parameters to be represented by an object identifier.

The `OBJECT IDENTIFIER` for the curve choice to be used in Device Certificate is:

```
secp256r1  OBJECT  IDENTIFIER  ::=  {  iso(1)  member-body(2)
us(840) ansi-X9-62(10045) curves(3) prime(1) 7 }
```

The `subjectPublicKey` from `SubjectPublicKeyInfo` is the ECC Public Key.

Implementations of Elliptic Curve Cryptography according to this document shall only support the uncompressed form.

The first octet of the `subjectPublicKey` indicates whether the key is compressed or uncompressed. The uncompressed form is indicated by 0x04 (the compressed form is indicated by either 0x02 or 0x03). The Public Key shall be rejected if any value other than 0x04 is in the first octet.

signatureAlgorithm

The `signatureAlgorithm` field shall indicate the Issuing DCA signature algorithm used to sign this Device Certificate is as defined under the next **Signature Method (ECDSA)** heading.

signatureValue

The Issuing DCA's signature of the Device Certificate shall be computed using the Issuing DCA's private signing key using the algorithm identified under the next **Signature Method (ECDSA)** heading.

The structure for ECDSA signatures shall be as per RFC 5480.

extensions

Device Certificates shall contain the extensions described below. They SHOULD NOT contain any additional `extensions`:

- `certificatePolicy`
- `subjectAltName`
- `keyUsage`
- `authorityKeyIdentifier`
- `subjectKeyIdentifier`

Cryptographic Primitives for Signature Method

Signature Method (ECDSA)

The ECDSA signature method is defined in NIST FIPS 186-4. When implementing ECDSA, the SHA-256 message digest algorithm and the P-256 elliptic curve as defined in FIPS 186-4 Annex D, D.1.2.3, shall be used.

The signature algorithm shall be `ecdsa-with-SHA256` as specified in RFC 5759. The algorithm identifier is:

```
ecdsa-with-SHA256 OBJECT IDENTIFIER ::= { iso(1) member-body(2) us(840) ansi-X9-62(10045) signatures(4) ecdsa-with-sha2(3) 2 }
```

SHA-256 hash algorithm

The hash algorithm used shall be the SHA-256 secure hash algorithm as defined in NIST FIPS 180-4.

Root DCA Certificate Profile

Field Name	RFC 5759/5280 Type	Value	Reference
`version`	`INTEGER`	v3	
`serialNumber`	`INTEGER`	Positive Integer of up to 16 Octets	
`signature`	`AlgorithmIdentifier`	SHA256 with ECDSA	
The `value` field of the `AttributeTypeAndValue` structure within the `subject` field whose `type` is `id-at-`	`UTF8String`	Globally unique common name of Root DCA of up to 4 Octets	

commonName (the “Issuer X520 Common Name”)			
keyIdentifier in subjectKeyIdentifier (the "Subject Key Identifider")	keyIdentifier	A unique value that matches the subjectKeyIdentifier of the issuer’s credential	
notBefore	Time	Creation time of the Certificate	
notAfter	Time	shall be assigned the GeneralizedTime value of 99991231235959Z	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the “Subject X520 Common Name”)	UTF8String	Globally unique name of Root DCA of up to 4 Octets (same as Issuer name)	
subjectPublicKeyInfo	SubjectPublicKeyInfo	The Subject’s Public Key	
extensions	Extensions	Critical and non-critical extensions	

`signatureAlgorithm`	`AlgorithmIdentifier`	SHA256 with ECDSA	
`signatureValue`	`BIT STRING`	Subject Certificate signature	

These certificates are the root of trust for the Devices SMKI.

`version`

The version of the X.509 Certificate. Valid Certificates shall identify themselves as version 3.

`serialNumber`

Certificate serial number, a positive integer of up to 16 octets. The `serialNumber` identifies the Certificate, and shall be created by the DCA that signs the Certificate (self-signed by Root DCA). The `serialNumber` shall be unique in the scope of Certificates signed by the DCA.

`signature`

The identity of the signature algorithm used to sign the Certificate. The field is identical to the value of the Root DCA Certificate's `signatureAlgorithm` field explained further under the next signatureAlgorithm heading.

Issuer X520 Common Name

The name of the signer of the Certificate. This will be the gloablly unique name of the Root DCA of up to 4 Octets. This will be the same as the `subject` as it is self-signed by the Root DCA.

Subject Key Identifier

The `subjectKeyIdentifier` extension should be included and marked as non-critical in the Certificate.

`validity`

The time period over which the issuer expects the Certificate to be valid. The validity period is the period of time from `notBefore` through `notAfter`, inclusive.

Root DCA certificates are expected to operate indefinitely into the future and should use the value 99991231235959Z. Solutions verifying a Root DCA certificate are expected to accept this value indefinitely.

All times shall be stated in the Universal Coordinated Time (UTC) time zone. Times up to and including 23:59:59 December 31, 2049 UTC shall be encoded as `UTCTime` as YYMMDDHHmmssZ.

Times later than 23:59:59 December 31, 2049 UTC shall be encoded as `GeneralizedTime` as YYYYMMDDHHmmssZ.

`notBefore`

The earliest time a Certificate may be used. This shall be the time the Certificate is created.

`notAfter`

The latest time a Certificate is expected to be used. Certificates are expected to operate indefinitely into the future and should use the value 99991231235959Z. Solutions verifying a Certificate are expected to accept this value indefinitely.

Subject X520 Common Name

This field must be populated with the globally unique name of the Root DCA of up to 4 Octets.

`subjectPublicKeyInfo`

The Certificate's `subjectPublicKeyInfo` field shall indicate the Public Key algorithm identifier and the Public Key in the specified algorithm format as specified in RFC 3279 and RFC 5480.

The algorithm field in the `subjectPublicKeyInfo` structure shall be use the following identifier:

```
id-ecPublicKey OBJECT IDENTIFIER ::= {iso(1) member-
body(2) us(840) ansi-X9-62(10045) keyType(2) 1 }
```

`id-ecPublicKey` indicates that the algorithms that can be used with the subject Public Key are unrestricted. The key is only restricted by the values indicated in the Key Usage Certificate extension (explained further under the next **extensions** heading).

The parameter for `id-ecPublicKey` is as follows and shall always be present:

```
ECParameters ::= CHOICE {

    namedCurve         OBJECT IDENTIFIER

    -- implicitCurve   NULL

    -- specifiedCurve  SpecifiedECDomain

  }
```

Only the following field in ECParameters shall be used:

o `namedCurve` - identifies all the required values for a particular set of elliptic curve domain parameters to be represented by an `OBJECT IDENTIFIER`.

The object identifier for the curve choice to be used in DCA Certificates is:

```
secp256r1 OBJECT IDENTIFIER ::= { iso(1) member-body(2)
us(840) ansi-X9-62(10045) curves(3) prime(1) 7 }
```

The `subjectPublicKey` from `SubjectPublicKeyInfo` is the ECC Public Key.

Implementations of Elliptic Curve Cryptography according to this document shall only support the uncompressed form.

The first octet of the `subjectPublicKey` indicates whether the key is compressed or uncompressed. The uncompressed form is indicated by 0x04 (the compressed form is indicated by either 0x02 or 0x03). The Public Key shall be rejected if any value other than 0x04 is in the first octet.

`signatureAlgorithm`

The `signatureAlgorithm` field shall indicate the Root DCA signature algorithm used to sign this Certificate as defined under the next **Signature Method (ECDSA)** heading.

`signatureValue`

The Root DCA's signature of the Certificate shall be computed using the Root DCA's private signing key using the algorithm identified under the next **Signature Method (ECDSA)** heading .

The structure for ECDSA signatures shall be as per RFC 5480.

`extensions`

Certificates MUST contain the extensions described below and MUST have the name form as described. They SHOULD NOT contain any additional extensions:

Extensions:

- `certificatePolicy`
- `keyUsage`
- `basicConstraints`
- `subjectKeyIdentifer`

Cryptographic Primitives for Signature Method

Signature Method (ECDSA)

The ECDSA signature method is defined in NIST FIPS 186-4. When implementing ECDSA, the SHA-256 message digest algorithm and the P-256 elliptic curve as defined in FIPS 186-4 Annex D, D.1.2.3, shall be used.

The signature algorithm shall be `ecdsa-with-SHA256` as specified in RFC 5759. The algorithm identifier is:

```
ecdsa-with-SHA256 OBJECT IDENTIFIER ::= { iso(1) member-body(2) us(840) ansi-X9-62(10045) signatures(4) ecdsa-with-sha2(3) 2 }
```

SHA-256 hash algorithm

The hash algorithm shall be the SHA-256 secure hash algorithm as defined in NIST FIPS 180-4.

Issuing DCA Certificate Profile

Field Name	RFC 5759/5280 Type	Value	Reference
version	INTEGER	v3	
serialNumber	INTEGER	Positive Integer of up to 16 Octets	
signature	AlgorithmIdentifier	SHA256 with ECDSA	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the "Issuer X520 Common Name")	UTF8String	Globally unique name of Root DCA of up to 4 Octets (as defined in the Root DCA Certificate Profile)	
keyIdentifier in subjectKeyIdentifier (the "Subject Key Identifier")	keyIdentifier	Provides a means for identifying certificates containing the particular Public Key used in an application	

keyIdentifier in authorityKeyIdentifier (the "Authority Key Identifier")	keyIdentifier	A unique value that matches the subjectKeyIdentifier value of the issuer's credential	
notBefore	Time	Creation time of the certificate	
notAfter	Time	shall be assigned the GeneralizedTime value of 99991231235959Z	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the "Subject X520 Common Name")	UTF8String	Globally unique name of Issuing DCA of up to 4 Octets	
subjectPublicKeyInfo	SubjectPublicKeyInfo	The Subject's Public Key	
extensions	Extensions	Critical and non-critical extensions	
signatureAlgorithm	AlgorithmIdentifier	SHA256 with ECDSA	
signatureValue	BIT STRING	Subject certificate signature	

`version`

The version of the X.509 Certificate. Valid Certificates shall identify themselves as version 3.

`serialNumber`

Certificate serial number, a positive integer of up to 16 octets. The `serialNumber` identifies the Certificate, and shall be created by the Issuing DCA that signs the Certificate. The `serialNumber` shall be unique in the scope of Certificates signed by the Root DCA.

`signature`

The identity of the signature algorithm used to sign the Certificate. The field is identical to the value of the Issuing DCA Certificate's `signatureAlgorithm` field explained further under the next **signatureAlgorithm** heading.

Issuer X520 Common Name

The name of the signer of the Certificate. This will be the gloablly unique name of the Root DCA of up to 4 Octets (as defined in the Root DCA Certificate Profile).

Subject Key Identifier

The `subjectKeyIdentifier` extension should be included and marked as non-critical in the Certificate.

Authority Key Identifier

To optimize building the correct credential chain, the non-critical `authorityKeyIdentifier` extension shall be populated with a unique value as recommended by RFC 5280 and shall be included in all device Certificates.

`validity`

The time period over which the issuer expects the Certificate to be valid. The `validity` period is the period of time from `notBefore` through `notAfter`, inclusive.

Issuing DCA certificates are expected to operate indefinitely into the future and should use the value 99991231235959Z. Solutions verifying a Issuing DCA certificate are expected to accept this value indefinitely.

All times shall be stated in the Universal Coordinated Time (UTC) time zone. Times up to and including 23:59:59 December 31, 2049 UTC shall be encoded as `UTCTime` as YYMMDDHHmmssZ.

Times later than 23:59:59 December 31, 2049 UTC shall be encoded as `GeneralizedTime` as YYYYMMDDHHmmssZ.

`notBefore`

The earliest time a Certificate may be used. This shall be the time the Certificate is created.

`notAfter`

The latest time a Certificate is expected to be used. Certificates are expected to operate indefinitely into the future and should use the value 99991231235959Z. Solutions verifying a Certificate are expected to accept this value indefinitely.

Subject X520 Common Name

This field shall be populated with the globally unique name of the Issuing DCA of up to 4 Octets.

`subjectPublicKeyInfo`

The Certificate's `subjectPublicKeyInfo` field shall indicate the Public Key algorithm identifier and the Public Key in the specified algorithm format as specified in RFC 3279 and RFC 5480.

The algorithm field in the `subjectPublicKeyInfo` structure shall contain the following identifier:

```
id-ecPublicKey OBJECT IDENTIFIER ::= {iso(1) member-body(2)
us(840) ansi-X9-62(10045) keyType(2) 1 }
```

`id-ecPublicKey` indicates that the algorithms that can be used with the subject Public Key are unrestricted. The key is only restricted by the values indicated in the key usage Certificate extension (explained further under the next **extensions** heading).

The parameter for `id-ecPublicKey` is as follows and shall always be present:

```
  ECParameters ::= CHOICE {

       namedCurve          OBJECT IDENTIFIER

       -- implicitCurve    NULL

       -- specifiedCurve   SpecifiedECDomain

     }
```

Only the following field in ECParameters shall be used:

o `namedCurve` - identifies all the required values for a particular

set of elliptic curve domain parameters to be represented by an

`OBJECT IDENTIFIER`.

The object identifier for the curve choice to be used in Certificates is:

```
secp256r1  OBJECT  IDENTIFIER  ::=  {  iso(1)  member-body(2)
us(840) ansi-X9-62(10045) curves(3) prime(1) 7 }
```

The `subjectPublicKey` from `SubjectPublicKeyInfo` is the ECC Public Key.

Implementations of Elliptic Curve Cryptography according to this document shall only support the uncompressed form.

The first octet of the `subjectPublicKey` indicates whether the key is compressed or uncompressed. The uncompressed form is indicated by 0x04 (the compressed form is indicated by either 0x02 or 0x03). The Public Key MUST be rejected if any value other than 0x04 is included in the first octet.

`signatureAlgorithm`

The `signatureAlgorithm` field shall indicate the Root DCA signature algorithm used to sign this Certificate as defined under the next **Signature Method (ECDSA)** heading.

`signatureValue`

The Root DCA's signature of the Certificate shall be computed using the Root DCA's private signing key using the algorithm identified under the next **Signature Method (ECDSA)** heading.

The structure for ECDSA signatures shall be as per RFC 5480.

`extensions`

Issuing-CA certificates shall contain the `extensions` described below. They SHOULD NOT contain any additional extensions:

- `certificatePolicy`
- `keyUsage`
- `basicConstraints`
- `subjectKeyIdentifer`
- `authorityKeyIdentifier`
- `subjectAltName`

Cryptographic Primitives for Signature Method

Signature Method (ECDSA)

The ECDSA signature method is defined in NIST FIPS 186-4. When implementing ECDSA, the SHA-256 message digest algorithm and the P-256 elliptic curve as defined in FIPS 186-4 Annex D, D.1.2.3, shall be used.

The signature algorithm shall be `ecdsa-with-SHA256` as specified in RFC 5759. The algorithm identifier is:

```
ecdsa-with-SHA256 OBJECT IDENTIFIER ::= { iso(1) member-
body(2) us(840) ansi-X9-62(10045) signatures(4) ecdsa-with-
sha2(3) 2 }
```

SHA-256 hash algorithm

The hash algorithm used shall be the SHA-256 secure hash algorithm as defined in NIST FIPS 180-4.

Version B 10.0

Appendix B

Organisation Certificate Policy

CONTENTS

Part Heading Page

1 INTRODUCTION

The document comprising this Appendix B (together with its Annexes A and B):

- shall be known as the "**Organisation Certificate Policy**" (and in this document is referred to simply as the "**Policy**"),
- is a SEC Subsidiary Document related to Section L9 of the Code (The SMKI Document Set).

1.1 OVERVIEW

(A) This Policy sets out the arrangements relating to:

(i) Organisation Certificates; and

(ii) OCA Certificates.

(B) This Policy is structured according to the guidelines provided by IETF RFC 3647, with appropriate extensions, modifications and deletions.

(C) Except where the context otherwise requires, words or expressions used in this Policy shall have the meanings ascribed to them in IETF RFC 5280 where they:

(i) appear in `Courier New` font;

(ii) are accompanied by the descriptor 'field', 'type' or 'extension'; and/or

(iii) take the form of a conjoined string of two or more words, such as '`digitalSignature`'.

1.2 DOCUMENT NAME AND IDENTIFICATION

(A) This Policy has been assigned an OID of 1.2.826.0.1. 8641679.1.2.1.1.

1.3 SMKI PARTICIPANTS

1.3.1 The Organisation Certification Authority

(A) The definition of Organisation Certification Authority is set out in Annex A.

1.3.2 Registration Authorities

(A) The definition of Registration Authority is set out in Annex A.

1.3.3 Subscribers

(A) In accordance with Section L3 of the Code (The SMKI Services), certain Parties may become Authorised Subscribers.

(B) In accordance with Section L3 of the Code (The SMKI Services), an Authorised Subscriber shall be an Eligible Subscriber in relation to certain Certificates.

(C) The SMKI RAPP sets out the procedure to be followed by an Eligible Subscriber in order to become a Subscriber for one or more Certificates.

(D) Eligible Subscribers are subject to the applicable requirements of the SMKI RAPP and Section L11 of the Code (Subscriber Obligations).

(E) Obligations on the DCC acting in the capacity of an Eligible Subscriber are set out in Section L11 of the Code (Subscriber Obligations).

(F) The definitions of the following terms are set out in Section A of the Code (Definitions and Interpretation):

(i) Authorised Subscriber;

(ii) Eligible Subscriber;

(iii) Subscriber.

1.3.4 Subjects

(A) The Subject of an Organisation Certificate must be an Organisation and be identified in the `subject` field of the Organisation Certificate Profile in accordance with Annex B.

(B) The Subject of an OCA Certificate must be the entity identified by the subject field of the Root OCA Certificate Profile or Issuing OCA Certificate Profile (as the case may be) in accordance with Annex B.

(C) The definition of Subject is set out in Annex A.

1.3.5 Relying Parties

(A) In accordance with Section L12 of the Code, certain Parties may be Relying Parties.

(B) Relying Parties are subject to the applicable requirements of Section L12 of the Code (Relying Party Obligations).

(C) Obligations on the DCC acting in the capacity of a Relying Party are set out in Section L12 of the Code (Relying Party Obligations).

(D) The definition of Relying Party is set out in Annex A.

1.3.6 SMKI Policy Management Authority

(A) Provision in relation to the SMKI PMA is made in Section L1 of the Code (SMKI Policy Management Authority).

1.3.7 SMKI Repository Provider

(A) Provision in relation to the SMKI Repository Service is made in Section L5 of the Code (The SMKI Repository Service).

1.4 USAGE OF ORGANISATION CERTIFICATES AND OCA CERTIFICATES

1.4.1 Appropriate Certificate Uses

(A) The OCA shall ensure that Organisation Certificates are Issued only:

(i) to Eligible Subscribers; and

(ii) for the purposes of the creation, sending, receipt and processing of communications to and from Organisations in accordance with or pursuant to the Code.

(B) The OCA shall ensure that OCA Certificates are Issued only to the OCA:

(i) in its capacity as, and for the purposes of exercising the functions of, the Root OCA; and

(ii) in its capacity as, and for the purposes of exercising the functions of, the Issuing OCA.

(C) Further provision in relation to the use of Certificates is made in Section L11 (Subscriber Obligations) and Section L12 (Relying Party Obligations) of the Code.

1.4.2 Prohibited Certificate Uses

(A) No Party or RDP shall use a Certificate other than for the purposes specified in Part 1.4.1 of this Policy.

1.5 POLICY ADMINISTRATION

1.5.1 Organisation Administering the Document

(A) This Policy is a SEC Subsidiary Document and is administered as such in accordance with the provisions of the Code.

1.5.2 Contact Person

(A) Questions in relation to the content of this Policy should be addressed to the OCA or the SMKI PMA.

1.5.3 Person Determining Organisation CPS Suitability for the Policy

(A) Provision is made in Section L9.14 (d) of the Code for the SMKI PMA to approve the Organisation CPS.

1.5.4 Organisation CPS Approval Procedures

(A) Provision is made in Section L9.15 of the Code for the procedure by which the SMKI PMA may approve the Organisation CPS.

1.5.5 Registration Authority Policies and Procedures

(A) The SMKI Registration Authority Policies and Procedures (the **SMKI RAPP**) are set out at Appendix D of the Code.

1.6 DEFINITIONS AND ACRONYMS

1.6.1 Definitions

(A) Definitions of the expressions used in this Policy are set out in Section A of the Code (Definitions and Interpretation) and Annex A.

1.6.2 Acronyms

(A) Any acronyms used for the purposes of this Policy are set out in Section A of the Code (Definitions and Interpretation) and Annex A.

2 PUBLICATION AND REPOSITORY RESPONSIBILITIES

2.1 REPOSITORIES

(A) Provision is made in Section L5 of the Code (The SMKI Repository Service) for the establishment, operation and maintenance of the SMKI Repository.

2.2 PUBLICATION OF CERTIFICATION INFORMATION

(A) The OCA shall lodge copies of the following in the SMKI Repository:

(i) each Organisation Certificate that has been accepted by a Subscriber;

(ii) each OCA Certificate;

(iii) each version of the SMKI RAPP;

(iv) each version of the SMKI Recovery Procedure;

(v) the latest version of the Organisation CRL;

(vi) the latest version of the Organisation ARL; and

(vii) any other document or information that may from time to time be specified, for the purposes of this provision, by the SMKI PMA.

(B) The OCA may lodge in the SMKI Repository such other documents or information as it may from time to time consider appropriate.

(C) Further provision on the lodging of documents and information in the SMKI Repository is made in Section L5 of the Code (The SMKI Repository Service).

2.3 TIME OR FREQUENCY OF PUBLICATION

(A) The OCA shall ensure that:

(i) each Organisation Certificate is lodged in the SMKI Repository promptly on its acceptance by a Subscriber;

(ii) each OCA Certificate is lodged to the SMKI Repository promptly on being Issued;

(iii) the Policy is lodged in the SMKI Repository, and a revised version of the Policy is lodged in the SMKI Repository promptly following each modification to it made in accordance with the Code;

(iv) the SMKI RAPP is lodged in the SMKI Repository, and a revised version of the SMKI RAPP is lodged in the SMKI Repository promptly following each modification to it made in accordance with the Code;

(v) the SMKI Recovery Procedure is lodged in the SMKI Repository, and a revised version of the SMKI Recovery Procedure is lodged in the SMKI Repository promptly following each modification to it made in accordance with the Code;

(vi) the Organisation CRL is lodged in the SMKI Repository, and a revised version of the Organisation CRL is lodged in the SMKI Repository within such time as is specified in Part 4.9.7 of this Policy;

(vii) the Organisation ARL is lodged in the SMKI Repository, and a revised version of the Organisation ARL is lodged in the SMKI Repository within such time as is specified in Part 4.9.7 of this Policy; and

(viii) any other document that may from time to time be specified by the SMKI PMA is lodged in the SMKI Repository within such time as may be directed by the SMKI PMA.

2.4 ACCESS CONTROLS ON REPOSITORIES

(A) Provision in relation to access controls for the SMKI Repository is made in Sections L5.5, L5.6 and L5.6A of the Code.

3 IDENTIFICATION AND AUTHENTICATION

3.1 NAMING

3.1.1 Types of Names

(A) Provision is made in the SMKI RAPP to ensure that the name of the entity that is the Subject of each Certificate is in accordance with the relevant Certificate Profile at Annex B.

3.1.2 Need for Names to be Meaningful

(A) Provision is made in the SMKI RAPP to ensure that the name of the Subject of each OCA Certificate is meaningful and consistent with the relevant Certificate Profile in Annex B.

3.1.3 Anonymity or Pseudonymity of Subscribers

(A) Provision is made in the SMKI RAPP to:

(i) prohibit Eligible Subscribers from requesting the Issue of a Certificate anonymously or by means of a pseudonym; and

(ii) permit the OCA to Authenticate each Eligible Subscriber.

3.1.4 Rules for Interpreting Various Name Forms

(A) Provision in relation to name forms is made in Annex B.

3.1.5 Uniqueness of Names

(A) Provision in relation to the uniqueness of names is made in Annex B.

3.1.6 Recognition, Authentication, and Role of Trademarks

(A) Provision in relation to the use of trademarks, trade names and other restricted information in Certificates is made in Section L11 of the Code (Subscriber Obligations).

3.2 INITIAL IDENTITY VALIDATION

3.2.1 Method to Prove Possession of Private Key

(A) Provision is made in the SMKI RAPP in relation to:

(i) the procedure to be followed by an Eligible Subscriber in order to prove its possession of the Private Key which is associated with the Public Key to be contained in any Certificate that is the subject of a Certificate Signing Request; and

(ii) the procedure established for this purpose is in accordance with the procedure in PKCS#10.

3.2.2 Authentication of Organisation Identity

(A) Provision is made in the SMKI RAPP section 5.5 in relation to the:

(i) procedure to be followed by a Party or RDP in order to become an Authorised Subscriber;

(ii) criteria in accordance with which the OCA will determine whether a Party or RDP is entitled to become an Authorised Subscriber; and

(iii) requirement that the Party or RDP shall be Authenticated by the OCA for that purpose.

(B) Provision is made in the SMKI RAPP section 5.1 to ensure that each Eligible Subscriber has one or more DCC ID, User ID or RDP ID that is EUI-64 Compliant and has been allocated to that Eligible Subscriber in accordance with Section B2 (DCC, User and RDP Identifiers).

(C) Provision is made in the SMKI RAPP section 5 for the purpose of ensuring that the criteria in accordance with which the OCA shall Authenticate a Party or RDP shall be set to the level pursuant to the SMKI PMA Guidance on “Verifying Organisation Identity” published on the Website.

3.2.3 Authentication of Individual Identity

(A) Provision is made in the SMKI RAPP sections 5.2 and 5.3 in relation to the Authentication of persons engaged by Authorised Subscribers, which provides for all such persons to have their identity and authorisation verified to the level pursuant to the SMKI PMA Guidance on “Verifying Individual Identity” published on the Website.

3.2.4 Non-verified Subscriber Information

(A) The OCA shall verify all information in relation to Certificates.

(B) Further provision on the content of OCA Certificates is made in Section L11 of the Code (Subscriber Obligations).

3.2.5 Validation of Authority

See Part 3.2.2 of this Policy.

3.2.6 Criteria for Interoperation

[*Not applicable in this Policy*]

3.3 IDENTIFICATION AND AUTHENTICATION FOR RE-KEY REQUESTS

3.3.1 Identification and Authentication for Routine Re-Key

(A) This Policy does not support Certificate Re-Key.

(B) The OCA shall not provide a Certificate Re-Key service.

3.3.2 Identification and Authentication for Re-Key after Revocation

[*Not applicable in this Policy*]

3.4 IDENTIFICATION AND AUTHENTICATION FOR REVOCATION REQUEST

3.4.1 Authentication for Certificate Revocation Requests

(A) Provision is made in the SMKI RAPP section 8.2.2 in relation to procedures designed to ensure the Authentication of persons who submit a Certificate Revocation Request and verify that they are authorised to submit that request.

4 CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS

4.1 CERTIFICATE APPLICATION

4.1.1 Submission of Certificate Applications

(A) Provision is made in the SMKI RAPP in relation to:

(i) in respect of an Organisation Certificate:

(a) the circumstances in which an Eligible Subscriber may submit a Certificate Signing Request; and

(b) the means by which it may do so, including through the use of an authorised System.

4.1.2 Enrolment Process and Responsibilities

(A) Provision is made, where applicable, in the SMKI RAPP sections 5 and 6 in relation to the:

(i) establishment of an enrolment process in respect of organisations, individuals, Systems and Devices in order to Authenticate them and verify that they are authorised to act on behalf of an Authorised Subscriber or Eligible Subscriber in its capacity as such; and

(ii) maintenance by the OCA of a list of organisations, individuals, Systems and Devices enrolled in accordance with that process.

4.1.3 Enrolment Process for the Registration Authority and its Representatives

(A) Provision is made in the SMKI RAPP section 6 in relation to the establishment of an enrolment process in respect of OCA Personnel and OCA Systems:

(i) in order to Authenticate them and verify that they are authorised to act on behalf of the OCA in its capacity as the Registration Authority; and

(ii) including in particular, for that purpose, provision:

(a) for the face-to-face or video link Authentication of all SMKI Registration Authority Personnel by a SMKI Registration Authority Manager; and

(b) for all SMKI Registration Authority Personnel to have their identify and authorisation verified to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.

4.2 CERTIFICATE APPLICATION PROCESSING

4.2.1 Performing Identification and Authentication Functions

(A) Provision is made in the SMKI RAPP section 5 in relation to the Authentication by the OCA of Eligible Subscribers which submit a Certificate Signing Request.

4.2.2 Approval or Rejection of Certificate Applications

(A) Where any Certificate Signing Request fails to satisfy the requirements set out in the SMKI RAPP, the SMKI Interface Design Specification (SMKI IDS), this Policy or any other provision of the Code, the OCA:

(i) shall reject it and refuse to Issue the Certificate which was the subject of the Certificate Signing Request; and

(ii) shall give notice to the Party or RDP which made the Certificate Signing Request of the reasons for its rejection.

(B) Where any Certificate Signing Request satisfies the requirements set out in the SMKI RAPP, the SMKI IDS, this Policy or any other provision of the Code, the OCA shall Issue the Certificate which was the subject of the Certificate Signing Request.

4.2.3 Time to Process Certificate Applications

(A) Provision in relation to the performance of the SMKI Services by the OCA is made in Section L8 of the Code (SMKI Performance Standards and

Demand Management).

4.3 CERTIFICATE ISSUANCE

4.3.1 OCA Actions during Certificate Issuance

(A) The OCA may Issue a Certificate only:

(i) in accordance with the provisions of this Policy, the SMKI RAPP and the SMKI IDS; and

(ii) in response to a Certificate Signing Request made by an Eligible Subscriber in accordance with the SMKI RAPP.

(B) The OCA shall ensure that:

(i) each OCA Certificate Issued by it contains information that it has verified to be correct and complete; and

(ii) each Organisation Certificate Issued by it contains information consistent with the information in the Certificate Signing Request.

(C) An OCA Certificate may only be:

(i) Issued by the OCA; and

(ii) for that purpose, signed using the Root OCA Private Key.

(D) An Organisation Certificate may only be:

(i) Issued by the OCA; and

(ii) for that purpose, signed using an Issuing OCA Private Key.

(E) The OCA shall not Issue:

(i) an Issuing OCA Certificate using a Root OCA Private Key after the expiry of the Validity Period of a Root OCA Certificate containing the Public Key associated with that Private Key;

(ii) an Organisation Certificate using an Issuing OCA Private Key after the expiry of the Validity Period of an Issuing OCA Certificate containing the Public Key associated with that Private Key; or

(iii) any Certificate containing a Public Key where it is aware that the Public Key is the same as the Public Key contained in any other Certificate that was previously Issued by it (except that the OCA may Issue an OCA Root Certificate containing the same Public Key in so far as it contains a different, or differently encrypted, Contingency Public Key).

4.3.2 Notification to Eligible Subscriber by the OCA of Issuance of Certificate

(A) Provision is made in the SMKI IDS sections 2.3.1.4 (c) and 2.6.1.4 (d) for the OCA to notify an Eligible Subscriber where that Eligible Subscriber is Issued with a Certificate which was the subject of a Certificate Signing Request made by it.

4.4 CERTIFICATE ACCEPTANCE

4.4.1 Conduct Constituting Certificate Acceptance

(A) Provision is made in the SMKI IDS to:

(i) Specify a means by which an Eligible Subscriber may clearly indicate to the OCA its rejection of a Certificate which has been Issued to it (SMKI IDS sections 2.3.1.5 and 2.6.1.5); and

(ii) ensure that each Eligible Subscriber to which a Certificate has been Issued, and which has not rejected it, is treated as having accepted that Certificate (SMKI IDS section 2.2).

(B) A Certificate which has been Issued by the OCA shall not be treated as valid for any purposes of this Policy or the Code until it is treated as having been accepted by the Eligible Subscriber to which it was Issued.

(C) The OCA shall maintain a record of all Certificates which have been Issued by it and are treated as accepted by a Subscriber.

(D) Further provision in relation to the rejection and acceptance of Certificates is made in Section L11.5 of the Code.

4.4.2 Publication of Certificates by the OCA

(A) Provision in relation to the publication of Certificates is made in Part 2 of this Policy (Publication and Repository Responsibilities) and Section L5 of the Code (The SMKI Repository Service).

4.4.3 Notification of Certificate Issuance by the OCA to Other Entities

(A) The OCA shall give notice of the Issue of a Certificate only to the Eligible Subscriber which submitted a Certificate Signing Request in respect of that Certificate (SMKI IDS sections 2.3.1.4 and 2.6.1.4).

4.5 KEY PAIR AND CERTIFICATE USAGE

4.5.1 Subscriber Private Key and Certificate Usage

(A) Provision for restrictions on the use by Subscribers of Private Keys in respect of Certificates is made in:

(i) Section L11.8 of the Code; and

(ii) this Policy.

4.5.2 Relying Party Public Key and Certificate Usage

(A) Provision in relation to reliance that may be placed on a Certificate is made in Section L12 of the Code (Relying Party Obligations).

4.6 CERTIFICATE RENEWAL

4.6.1 Circumstances of Certificate Renewal

(A) This Policy does not support the renewal of Certificates.

(B) The OCA may only replace, and shall not renew, any Certificate.

4.6.2 Circumstances of Certificate Replacement

(A) Where the OCA Systems or any OCA Private Key is (or is suspected by the

OCA of being) Compromised, the OCA shall:

(i) immediately notify the SMKI PMA;

(ii) provide the SMKI PMA with all the information known to it in relation to the nature and circumstances of the event of Compromise or suspected Compromise; and

(iii) where the Compromise or suspected Compromise relates to an OCA Private Key (but subject to the provisions of the SMKI Recovery Procedure):

(a) ensure that the Private Key is no longer used;

(b) promptly notify each of the Subscribers for any Organisation Certificates Issued using that Private Key; and

(c) promptly both notify the SMKI PMA and, subject to the provisions of the SMKI Recovery Procedure, verifiably destroy the OCA Private Key Material.

(B) Where the OCA Root Private Key is Compromised (or is suspected by the OCA of being Compromised), the OCA:

(i) may issue a replacement for any OCA Certificate that has been Issued using that Private Key; and

(ii) shall ensure that the Subscriber for that OCA Certificate applies for the Issue of a new Certificate in accordance with this Policy.

(C) A Subscriber for an Organisation Certificate may request a replacement for that Certificate at any time by applying for the Issue of a new Organisation Certificate in accordance with this Policy.

4.6.3 Who May Request a Replacement Certificate

See Part 4.1 of this Policy.

4.6.4 Processing Replacement Certificate Requests

See Part 4.2 of this Policy

4.6.5 Notification of Replacement Certificate Issuance to a Subscriber

See Part 4.3.2 of this Policy.

4.6.6 Conduct Constituting Acceptance of a Replacement Certificate

See Part 4.4.1 of this Policy.

4.6.7 Publication of a Replacement Certificate by the OCA

See Part 4.4.2 of this Policy.

4.6.8 Notification of Certificate Issuance by the OCA to Other Entities

See Part 4.4.3 of this Policy

4.7 CERTIFICATE RE-KEY

4.7.1 Circumstances for Certificate Re-Key

(A) This Policy does not support Certificate Re-Key.

(B) The OCA shall not provide a Certificate Re-Key service.

(C) Where a new Key Pair has been generated for use by the Subject of an Organisation Certificate, the Subscriber for a Certificate which is associated with the previous Key Pair shall apply for the Issue of a new Certificate in accordance with this Policy.

4.7.2 Who may Request Certification of a New Public Key

[*Not applicable in this Policy*]

4.7.3 Processing Certificate Re-Keying Requests

[*Not applicable in this Policy*]

4.7.4 Notification of New Certificate Issuance to Subscriber

[*Not applicable in this Policy*]

4.7.5 Conduct Constituting Acceptance of a Re-Keyed Certificate

[*Not applicable in this Policy*]

4.7.6 Publication of the Re-Keyed Certificate by the OCA

[*Not applicable in this Policy*]

4.7.7 Notification of Certificate Issuance by the OCA to Other Entities

[*Not applicable in this Policy*]

4.8 CERTIFICATE MODIFICATION

4.8.1 Circumstances for Certificate Modification

(A) This Policy does not support Certificate modification (except to the extent to which it permits the OCA to Issue an OCA Root Certificate containing the same Public Key as a Certificate previously Issued by it, where the Certificates contain different, or differently encrypted, Contingency Public Keys).

(B) Subject to paragraph (A), neither the OCA nor any Subscriber may modify a Certificate.

4.8.2 Who may request Certificate Modification

[*Not applicable in this Policy*]

4.8.3 Processing Certificate Modification Requests

[*Not applicable in this Policy*]

4.8.4 Notification of New Certificate Issuance to Subscriber

[*Not applicable in this Policy*]

4.8.5 Conduct Constituting Acceptance of Modified Certificate

[*Not applicable in this Policy*]

4.8.6 Publication of the Modified Certificate by the OCA

[*Not applicable in this Policy*]

4.8.7 Notification of Certificate Issuance by the OCA to Other Entities

[*Not applicable in this Policy*]

4.9 CERTIFICATE REVOCATION AND SUSPENSION

4.9.1 Circumstances for Revocation

(A) A Subscriber shall ensure that it submits a Certificate Revocation Request in relation to a Certificate:

(i) (subject to the provisions of the SMKI Recovery Procedure) immediately upon becoming aware that the Certificate has been Compromised, or is suspected of having been Compromised, due to the Compromise of the Private Key associated with the Public Key contained within that Certificate;

(ii) immediately upon ceasing to be an Eligible Subscriber in respect of that Certificate; provided that, where a Supplier of Last Resort has been appointed in relation to premises supplied by the Subscriber, the Subscriber shall not submit a Certificate Revocation Request; or

(iii) (where the Subscriber is a Gas Network Party) immediately upon intending to cease to be a DCC User.

(B) The OCA must revoke a Certificate upon:

(i) (subject to the provisions of the SMKI Recovery Procedure) receiving a Certificate Revocation Request if the Certificate to which that request relates has been Authenticated in accordance with Part 3.4.1 of this Policy; or

(ii) being directed to do so by the SMKI PMA.

(C) The OCA must revoke a Certificate in relation to which it has not received a

Certificate Revocation Request:

(i) (subject to the provisions of the SMKI Recovery Procedure) where it becomes aware that the Certificate has been Compromised, or is suspected of having been Compromised, due to the Compromise of the Private Key associated with the Public Key contained within that Certificate;

(ii) (subject to the Section L16.11 (Supplier of Last Resort) of the Code) where it has determined that the Subscriber for that Certificate does not continue to satisfy the criteria set out in this Policy and the SMKI RAPP for being an Authorised Subscriber;

(iii) (subject to the Section L16.1 (Supplier of Last Resort) of the Code) where it becomes aware that the Subscriber for that Certificate has ceased to be an Eligible Subscriber in respect of the Certificate.

(D) In an extreme case, where it considers it necessary to do so for the purpose of preserving the integrity of the SMKI Services, the OCA may, on the receipt of a Certificate Revocation Request in relation to a Certificate which has not been Authenticated in accordance with Part 3.4.1 of this Policy, revoke that Certificate.

(E) Where the OCA revokes a Certificate in accordance with paragraph (D) it shall notify the SMKI PMA and provide a statement of its reasons for the revocation.

4.9.2 Who can Request Revocation

(A) Any Subscriber may submit a Certificate Revocation Request in relation to a Certificate for which it is the Subscriber, and shall on doing so:

(i) provide all the information specified in the SMKI RAPP section 8.2.2 (including all the information necessary for the Authentication of the Certificate); and

(ii) specify its reason for submitting the Certificate Revocation Request (which shall be a reason consistent with Part 4.9.1(A) of this Policy).

(B) The SMKI PMA may direct the OCA to revoke a Certificate.

(C) The OCA may elect to revoke a Certificate in accordance with Part 4.9.1(D) of this Policy.

4.9.3 Procedure for Revocation Request

(A) Provision is made in the SMKI RAPP section 8.2.2 in relation to the procedure for submitting and processing a Certificate Revocation Request.

(B) On receiving a Certificate Revocation Request, the OCA shall take reasonable steps to:

(i) Authenticate the Subscriber making that request;

(ii) Authenticate the Certificate to which the request relates; and

(iii) confirm that a reason for the request has been specified in accordance with Part 4.9.2 of this Policy.

(C) Where the OCA, in accordance with Part 4.9.1(C) of this Policy, intends to revoke a Certificate in relation to which it has not received a Certificate Revocation Request, it shall use its best endeavours prior to revocation to confirm with the Subscriber for that Certificate the circumstances giving rise to the revocation.

(D) The OCA shall inform the Subscriber for a Certificate where that Certificate has been revoked.

4.9.4 Revocation Request Grace Period

[*Not applicable in this Policy*]

4.9.5 Time within which OCA must process the Revocation Request

(A) The OCA shall ensure that it processes all Certificate Revocation Requests as soon as practicable, and in any event in accordance with such time as is specified in the SMKI RAPP section 8.2.2.

4.9.6 Revocation Checking Requirements for Relying Parties

(A) Provision in relation to the revocation checking requirements for Relying Parties is made in Section L12.3 of the Code.

4.9.7 CRL Issuance Frequency (if applicable)

(A) The OCA shall ensure that an up to date version of the Organisation ARL is lodged in the SMKI Repository:

(i) at least once in every period of twelve months; and

(ii) promptly on the revocation of an OCA Certificate.

(B) Each version of the Organisation ARL shall be valid until the date which is up to 13 months after the date on which that version of the Organisation ARL is lodged in the SMKI Repository.

(C) Further provision in relation to the reliance that may be placed on the Organisation ARL (and on versions of it) is set out in Section L12 of the Code (Relying Party Obligations).

(D) The OCA shall ensure that an up to date version of the Organisation CRL is lodged in the SMKI Repository:

(i) at least once in every period of twelve hours; and

(ii) within one hour on the revocation of an Organisation Certificate.

(E) Each version of the Organisation CRL shall be valid until 48 hours from the time at which it is lodged in the SMKI Repository.

(F) Further provision in relation to the reliance that may be placed on the Organisation CRL (and on versions of it) is set out in Section L12 of the Code (Relying Party Obligations).

(G) The OCA shall ensure that each up to date version of the Organisation ARL and Organisation CRL:

(i) continues to include each relevant revoked Certificate until such time as the Validity Period of that Certificate has expired; and

(ii) does not include any revoked Certificate after the Validity Period of that Certificate has expired.

(H) The OCA shall ensure that the Organisation CRL contains a non-critical entry extension which identifies the reason for the revocation of each Certificate listed on it in accordance with RFC 5280 (section 5.3.1).

(I) The OCA shall retain a copy of the information contained in all versions of the Organisation CRL and Organisation ARL, together with the dates and times between which each such version was valid. This information shall be made available as soon as is reasonably practicable, on receipt of a request, to the Panel, the SMKI PMA, any Subscriber or any Relying Party.

4.9.8 Maximum Latency for CRLs (if applicable)

See Part 4.9.7 of this Policy.

4.9.9 On-line Revocation/Status Checking Availability

(A) This Policy does not support on-line revocation status checking.

(B) The OCA shall not provide any on-line revocation status checking service.

4.9.10 On-line Revocation Checking Requirements

[*Not applicable in this Policy*]

4.9.11 Other Forms of Revocation Advertisements Available

[*Not applicable in this Policy*]

4.9.12 Special Requirements in the Event of Key Compromise

See Part 4.6.2 of this Policy.

4.9.13 Circumstances for Suspension

[*Not applicable in this Policy*]

4.9.14 Who can Request Suspension

[*Not applicable in this Policy*]

4.9.15 Procedure for Suspension Request

[*Not applicable in this Policy*]

4.9.16 Limits on Suspension Period

[*Not applicable in this Policy*]

4.10 CERTIFICATE STATUS SERVICES

4.10.1 Operational Characteristics

[*Not applicable in this Policy*]

4.10.2 Service Availability

(A) In circumstances in which:

(i) an up to date version of the Organisation ARL has not been lodged in the SMKI Repository in accordance with Part 4.9.7(A) of this Policy; or

(ii) the SMKI Repository Service is unavailable,

a Relying Party shall be entitled to rely on the Organisation ARL for the period during which it remains valid in accordance with the provisions of Part 4.9.7(B) of this Policy, but thereafter shall not rely on any Organisation Certificate or any OCA Certificate.

(B) In circumstances in which:

(i) an up to date version of the Organisation CRL has not been lodged in the SMKI Repository in accordance with Part 4.9.7(C) of this Policy;

or

(ii) the SMKI Repository Service is unavailable,

a Relying Party shall be entitled to rely on the Organisation CRL for the period during which it remains valid in accordance with the provisions of Part 4.9.7(D) of this Policy, but thereafter shall not rely on any Organisation Certificate.

4.10.3 Optional Features

[*Not applicable in this Policy*]

4.11 END OF SUBSCRIPTION

[*Not applicable in this Policy*]

4.12 KEY ESCROW AND RECOVERY

4.12.1 Key Escrow and Recovery Policies and Practices

(A) This Policy does not support Key Escrow.

(B) The OCA shall not provide any Key Escrow service.

4.12.2 Session Key Encapsulation and Recovery Policy and Practices

[*Not applicable in this Policy*]

5 FACILITY, MANAGEMENT AND OPERATIONAL CONTROLS

5.1 PHYSICAL CONTROLS

5.1.1 Site Location and Construction

(A) The OCA shall ensure that the OCA Systems are operated in a sufficiently secure environment, which shall at least satisfy the requirements set out at Section G2 (System Security: Obligations on the DCC) and Section G5 (Information Security: Obligations on the DCC and Users) of the Code.

(B) The OCA shall ensure that:

(i) all of the physical locations in which the OCA Systems are situated, operated, routed or directly accessed are in the United Kingdom;

(ii) all bespoke Security Related Functionality is developed, specified, designed, built and tested only within the United Kingdom; and

(iii) all Security Related Functionality is integrated, configured, tested in situ, implemented, operated and maintained only within the United Kingdom.

(C) The OCA shall ensure that the OCA Systems cannot be indirectly accessed from any location outside the United Kingdom.

(D) The OCA shall ensure that the Organisation CPS incorporates provisions designed to ensure that all physical locations in which the manufacture of Certificates and Time-Stamping take place are at all times manually or electronically monitored for unauthorised intrusion in accordance with the SMKI PMA Guidance on "Protective Monitoring" published on the Website.

(E) The OCA shall ensure that the Organisation CPS incorporates provisions designed to ensure that all PINs, passphrases and passwords used for the purposes of carrying out the functions of the OCA are stored in secure containers accessible only to appropriately authorised individuals.

(F) The OCA shall ensure that the OCA Systems are Separated from any DCA

Systems, save that any Systems used for the purposes of the Registration Authority functions of the OCA and DCA shall not require to be Separated.

5.1.2 Physical Access

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to access control, including in particular provisions designed to:

(i) establish controls such that only appropriately authorised personnel may have unescorted physical access to OCA Systems or any System used for the purposes of Time-Stamping;

(ii) ensure that any unauthorised personnel may have physical access to such Systems only if appropriately authorised and supervised;

(iii) ensure that a site access log is both maintained and periodically inspected for all locations at which such Systems are sited; and

(iv) ensure that all removable media which contain sensitive plain text Data and are kept at such locations are stored in secure containers accessible only to appropriately authorised individuals.

5.1.3 Power and Air Conditioning

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to power and air conditioning at all physical locations in which the OCA Systems are situated.

5.1.4 Water Exposure

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to water exposure at all physical locations in which the OCA Systems are situated.

5.1.5 Fire Prevention and Protection

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to fire prevention and protection at all physical locations in which the OCA Systems are situated.

5.1.6 Media Storage

(A) The OCA shall ensure that the Organisation CPS incorporates provisions designed to ensure that appropriate controls are placed on all media used for the storage of Data held by it for the purposes of carrying out its functions as the OCA.

5.1.7 Waste Disposal

(A) The OCA shall ensure that all media used to store Data held by it for the purposes of carrying out its functions as the OCA are disposed of only using secure methods of disposal in accordance with https://www.ncsc.gov.uk/guidance/secure-sanitisation-storage-media.

5.1.8 Off-Site Back-Up

(A) The OCA shall regularly carry out a Back-Up of:

(i) all Data held on the OCA Systems which are critical to the operation of those Systems or continuity in the provision of the SMKI Services; and

(ii) all other sensitive Data.

(B) For the purposes of paragraph (A), the OCA shall ensure that the Organisation CPS incorporates provisions which identify the categories of critical and sensitive Data that are to be Backed-Up.

(C) The OCA shall ensure that Data which are Backed-Up in accordance with paragraph (A):

(i) are stored on media that are located in physically secure facilities in different locations to the sites at which the Data being Backed-Up are ordinarily held;

(ii) are protected in accordance with the outcome of a risk assessment which is documented in the Organisation CPS, including when being transmitted for the purposes of Back-Up; and

(iii) to the extent to which they comprise OCA Private Key Material, are Backed-Up:

(a) using the proprietary Back-Up mechanisms specific to the relevant Cryptographic Module; and

(b) in a manner that is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(D) The OCA shall ensure that, where any elements of the OCA Systems, any Data held for the purposes of providing the SMKI Services, or any items of OCA equipment are removed from their primary location, they continue to be protected in accordance with the security standard appropriate to the primary location.

5.2 PROCEDURAL CONTROLS

5.2.1 Trusted Roles

(A) The OCA shall ensure that:

(i) no individual may carry out any activity which involves access to resources, or Data held on, the OCA Systems unless that individual has been expressly authorised to have such access;

(ii) each member of OCA Personnel has a clearly defined level of access to the OCA Systems and the premises in which they are located;

(iii) no individual member of OCA Personnel is capable, by acting alone, of engaging in any action by means of which the OCA Systems may be Compromised to a material extent; and

(iv) the Organisation CPS incorporates provisions designed to ensure that appropriate controls are in place for the purposes of compliance by the OCA with the requirements of this paragraph.

5.2.2 Number of Persons Required per Task

(A) The OCA shall ensure that the Organisation CPS incorporates provisions designed to establish:

(i) the appropriate separation of roles between the different members of OCA Personnel; and

(ii) the application of controls to the actions of all members of OCA Personnel who are Privileged Persons, in particular:

(a) identifying any controls designed to ensure that the involvement of more than one individual is required for the performance of certain functions; and

(b) providing that the revocation of any OCA Certificate is one such function.

(B) The OCA shall ensure that the Organisation CPS, as a minimum, makes provision for the purposes of paragraph (A) in relation to the following roles:

(i) OCA Systems administration;

(ii) OCA Systems operations;

(iii) OCA Systems security; and

(iv) OCA Systems auditing.

5.2.3 Identification and Authentication for Each Role

See Part 5.2.2 of this Policy.

5.2.4 Roles Requiring Separation of Duties

See Part 5.2.2 of this Policy.

5.3 PERSONNEL CONTROLS

5.3.1 Qualification, Experience and Clearance Requirements

(A) The OCA shall ensure that all OCA Personnel must:

(i) be appointed to their roles in writing;

(ii) be bound by contract to the terms and conditions relevant to their roles;

(iii) have received appropriate training with respect to their duties;

(iv) be bound by contract not to disclose any confidential, sensitive, personal or security-related Data except to the extent necessary for the performance of their duties or for the purposes of complying with any requirement of law; and

(v) in so far as can reasonably be ascertained by the OCA, not have been previously relieved of any past assignment (whether for the OCA or any other person) on the grounds of negligence or any other failure to perform a duty.

(B) The OCA shall ensure that all OCA Personnel have, as a minimum, passed a Security Check before commencing their roles.

5.3.2 Background Check Procedures

See Part 5.3.1 of this Policy.

5.3.3 Training Requirements

See Part 5.3.1 of this Policy.

5.3.4 Retraining Frequency and Requirements

(A) The OCA shall ensure that the Organisation CPS incorporates appropriate provisions relating to the frequency and content of retraining and refresher training to be undertaken by members of OCA Personnel.

5.3.5 Job Rotation Frequency and Sequence

(A) The OCA shall ensure that the Organisation CPS incorporates appropriate provisions relating to the frequency and sequence of job rotations to be undertaken by members of OCA Personnel.

5.3.6 Sanctions for Unauthorised Actions

(A) The OCA shall ensure that the Organisation CPS incorporates appropriate provisions relating to sanctions for unauthorised actions undertaken by members of OCA Personnel.

5.3.7 Independent Contractor Requirements

(A) In accordance with the provisions of the Code, references to the OCA in this Policy include references to persons with whom the OCA contracts in order to secure performance of its obligations as the OCA.

5.3.8 Documentation Supplied to Personnel

(A) The OCA shall ensure that all OCA Personnel are provided with access to all documents relevant to their roles or necessary for the performance of their duties, including in particular:

(i) this Policy;

(ii) the Organisation CPS; and

(iii) any supporting documentation, statutes, policies or contracts.

5.4 AUDIT LOGGING PROCEDURES

5.4.1 Types of Events Recorded

(A) The OCA shall ensure that:

(i) the OCA Systems record all systems activity in an audit log;

(ii) the Organisation CPS incorporates a comprehensive list of all events that are to be recorded in an audit log in relation to:

(a) the activities of OCA Personnel;

(b) the use of OCA equipment;

(c) the use of (including both authorised and unauthorised access, and attempted access to) any premises at which functions of the OCA are carried out;

(d) communications and activities that are related to the Issue of Certificates (in so far as not captured by the OCA Systems audit log); and

(iii) it records in an audit log all the events specified in paragraph (ii).

5.4.2 Frequency of Processing Log

(A) The OCA shall ensure that:

(i) the audit logging functionality in the OCA Systems is fully enabled at all times;

(ii) all OCA Systems activity recorded in the Audit Log is recorded in a standard format that is compliant with:

(a) British Standard BS 10008:2014 (Evidential Weight and Legal Admissibility of Electronic Information); or

(b) any equivalent to that British Standard which updates or replaces it from time to time; and

(iii) it monitors the OCA Systems in compliance with the SMKI PMA Guidance on “Protective Monitoring” published on the Website.

(B) The OCA shall ensure that the Organisation CPS incorporates provisions which specify:

(i) how regularly information recorded in the Audit Log is to be reviewed; and

(ii) what actions are to be taken by it in response to types of events recorded in the Audit Log.

(C) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to access to the Audit Log, providing in particular that:

(i) Data contained in the Audit Log must not be accessible other than on a read-only basis; and

(ii) access to those Data must be limited to those members of OCA Personnel who are performing a dedicated system audit role.

5.4.3 Retention Period for Audit Log

(A) The OCA shall:

(i) retain the Audit Log so that it incorporates, on any given date, a record of all system events occurring during a period of at least twelve months prior to that date; and

(ii) ensure that a copy of the Audit Log incorporating a record of all system events occurring prior to the beginning of that period is archived in accordance with the requirements of Part 5.5 of this Policy.

5.4.4 Protection of Audit Log

(A) The OCA shall ensure that:

(i) to the extent to which the Audit Log is retained electronically, the Data stored in it cannot be accessed other than on a read-only basis, and are protected from unauthorised viewing, modification and deletion in accordance with:

(a) British Standard BS 10008:2014 (Evidential Weight and Legal Admissibility of Electronic Information); or

(b) any equivalent to that British Standard which updates or replaces it from time to time; and

(ii) to the extent to which the Audit Log is retained in non-electronic form, the Data stored in it are appropriately protected from unauthorised viewing, modification and destruction in order to ensure that their integrity is maintained for evidential purposes.

5.4.5 Audit Log Back-Up Procedures

(A) The OCA shall ensure that the Data contained in the Audit Log are Backed-Up (or, to the extent that the Audit Log is retained in non-electronic form, are copied):

(i) on a daily basis; or

(ii) if activity has taken place on the OCA Systems only infrequently, in accordance with the schedule for the regular Back-Up of the Data held on those Systems.

(B) The OCA shall ensure that all Data contained in the Audit Log which are Backed-Up are, during Back-Up:

(i) held in accordance with the outcome of a risk assessment which is documented in the Organisation CPS; and

(ii) protected to the same standard of protection as the primary copy of the Audit Log in accordance with Part 5.4.4 of this Policy.

5.4.6 Audit Collection System (Internal or External)

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to its system for collecting Data for the purpose of populating the Audit Log.

5.4.7 Notification to Event-Causing Subject

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to its notification of any person who is (or is responsible for any System which is) the direct cause of an event recorded in the Audit Log.

5.4.8 Vulnerability Assessments

(A) Provision is made in Sections G2.13 to G2.14 of the Code (Management of Vulnerabilities) in relation to the carrying out of vulnerability assessments in respect of the OCA Systems.

5.5 RECORDS ARCHIVAL

5.5.1 Types of Records Archived

(A) The OCA shall ensure that it archives:

(i) the Audit Log in accordance with Part 5.4.3 of this Policy;

(ii) its records of all Data submitted to it by Eligible Subscribers for the purposes of Certificate Signing Requests; and

(iii) any other Data specified in this Policy or the Code as requiring to be archived in accordance with this Part 5.5.

5.5.2 Retention Period for Archive

(A) The OCA shall ensure that all Data which are Archived are retained for a period of at least seven years from the date on which they were Archived.

5.5.3 Protection of Archive

(A) The OCA shall ensure that Data held in its Archive are:

(i) protected against any unauthorised access;

(ii) adequately protected against environmental threats such as temperature, humidity and magnetism; and

(iii) incapable of being modified or deleted.

5.5.4 Archive Back-Up Procedures

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to its procedures for the Back-Up of its Archive.

5.5.5 Requirements for Time-Stamping of Records

(A) Provision in relation to Time-Stamping is made in Part 6.8 of this Policy.

5.5.6 Archive Collection System (Internal or External)

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to its system for collecting Data for the purpose of populating the

Archive.

5.5.7 Procedures to Obtain and Verify Archive Information

(A) The OCA shall ensure that:

(i) Data held in the Archive are stored in a readable format during their retention period; and

(ii) those Data remains accessible at all times during their retention period, including during any period of interruption, suspension or cessation of the OCA's operations.

(B) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to the periodic verification by the OCA of the Data held in the Archive.

5.6 KEY CHANGEOVER

5.6.1 Organisation Certificate Key Changeover

(A) The OCA shall Issue a new Organisation Certificate in relation to an Organisation where a new Certificate Signing Request is submitted by an Eligible Subscriber in accordance with the requirements of the SMKI IDS sections 2.3.1.1 to 2.3.1.4 and 2.6.1.1 to 2.6.1.4and this Policy.

5.6.2 OCA Key Changeover

(A) Where the OCA ceases to use an OCA Private Key in accordance with the requirements of Part 4.3.1(E) of this Policy, it shall:

(i) either:

(a) verifiably destroy the OCA Private Key Material; or

(b) retain the OCA Private Key Material in such a manner that it is adequately protected against being put back into use;

(ii) not revoke the related OCA Public Key (which may continue to be used for the purpose of validating Digital Signatures generated using the OCA Private Key);

(iii) generate a new Key Pair;

(iv) ensure that any relevant Certificate subsequently Issued by it is Issued using the OCA Private Key from the newly-generated Key Pair:

(a) until the time determined in accordance with Part 4.3.1(E) of this Policy; and

(b) subject to the provisions of Part 5.7.1(C) of this Policy; and

(v) in its capacity as the Root OCA:

(a) Issue a new relevant OCA Certificate; and

(b) promptly lodge that OCA Certificate in the SMKI Repository.

(B) The OCA shall ensure that the actions taken by it in accordance with the requirements of paragraph (A) are managed so as to prevent any disruption to the provision of the SMKI Services.

5.6.3 Subscriber Key Changeover

(A) Where:

(i) a Certificate has been revoked in accordance with Part 4.9 of this Policy; and

(ii) the Subscriber for that Certificate submits to the OCA a Certificate Signing Request for the Issue of a replacement Certificate,

the OCA shall verify that the reasons for the revocation and replacement of the previous Certificate have been satisfactorily addressed, and may Issue a Certificate in accordance with the Certificate Signing Request only after it has done so.

5.7 COMPROMISE AND DISASTER RECOVERY

5.7.1 Incident and Compromise Handling Procedures

(A) The OCA shall ensure that the Organisation CPS incorporates a business continuity plan which shall be designed to ensure:

(i) continuity in, or (where there has been unavoidable discontinuity) the recovery of, the provision of the SMKI Services in the event of any Compromise of the OCA Systems or major failure in the OCA processes; and

(ii) that priority is given to maintain continuity in, or to recovering the capacity for, the revocation of Certificates and the making available of an up to date Organisation ARL and Organisation CRL.

(B) The OCA shall ensure that the procedures set out in the business continuity plan are:

(i) compliant with ISO 22301 and ISO 27031 (or any equivalent to those standards which update or replace them from time to time); and

(ii) tested periodically, and in any event at least once in each year, in order to ensure that they are operationally effective.

(C) The OCA shall ensure that the Organisation CPS incorporates provisions setting out the approach to be taken by it in circumstances in which it suspects (or has reason to suspect) that any OCA Private Key or any part of the OCA Systems is Compromised.

5.7.2 Computing Resources, Software and/or Data are Corrupted

(A) The OCA shall ensure that the business continuity plan established in accordance with Part 5.7.1 of this Policy incorporates provisions setting out the steps to be taken in the event of any loss of or corruption to computing resources, software or Data.

5.7.3 Entity Private Key Compromise Procedures

See Part 5.7.1 of this Policy.

5.7.4 Business Continuity Capabilities after a Disaster

(A) The OCA shall ensure that the business continuity plan established in accordance with Part 5.7.1 of this Policy is designed to ensure the recovery of the provision of the SMKI Services within not more than 12 hours of the occurrence of any event causing discontinuity.

5.8 CERTIFICATION AUTHORITY AND REGISTRATION AUTHORITY TERMINATION

[*Not applicable in this Policy*]

6 <u>TECHNICAL SECURITY CONTROLS</u>

The OCA shall ensure that the Organisation CPS incorporates detailed provision in relation to the technical controls to be established and operated for the purposes of the exercise of its functions as the Root OCA, the Issuing OCA and the Registration Authority.

6.1 KEY PAIR GENERATION AND INSTALLATION

6.1.1 Key Pair Generation

(A) The OCA shall ensure that all Key Pairs which it uses for the purposes of this Policy are generated:

(i) in a protected environment compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time);

(ii) using multi-person control, such that no single Privileged Person is capable of generating any such Key Pair; and

(iii) using random numbers which are such as to make it computationally infeasible to regenerate those Key Pairs even with knowledge of when and by means of what equipment they were generated.

(B) The OCA shall not generate any Private Key or Public Key other than an OCA Key.

6.1.2 Private Key Delivery to Subscriber

(A) In accordance with Part 6.1.1(B), the OCA shall not generate any Private Key for delivery to a Subscriber.

6.1.3 Public Key Delivery to Certificate Issuer

(A) The OCA shall ensure that the Organisation CPS incorporates provisions:

(i) in relation to the mechanism by which Public Keys of Subscribers are delivered to it for the purpose of the exercise of its functions as the

Root OCA and Issuing OCA; and

(ii) ensuring that the mechanism uses a recognised standard protocol such as PKCS#10.

6.1.4 OCA Public Key Delivery to Relying Parties

(A) The OCA shall ensure that the Organisation CPS incorporates provisions:

(i) in relation to the manner by which each OCA Public Key is to be lodged in the SMKI Repository; and

(ii) designed to ensure that the OCA Public Keys are securely lodged in the SMKI Repository in such a manner as to guarantee that their integrity is maintained.

6.1.5 Key Sizes

(A) The OCA and every Subscriber shall ensure that all Private Keys and Public Keys which each of them may use for the purposes of this Policy are of the size and characteristics set out in the GB Companion Specification.

6.1.6 Public Key Parameters Generation and Quality Checking

(A) The OCA shall ensure that any Public Key used by it for the purposes of this Policy shall be of values and lengths that make the success of known attacks infeasible.

(B) Each Subscriber shall ensure that any Public Key used by it for the purposes of this Policy shall be of values and lengths that make the success of known attacks infeasible.

6.1.7 Key Usage Purposes (as per X.509 v3 `keyUsage` Field)

(A) The OCA shall ensure that each Certificate that is Issued by it has a `keyUsage` field in accordance with RFC5759 and RFC5280.

(B) The OCA shall ensure that each Organisation Certificate that is Issued by it has a `keyUsage` of either:

(i) `digitalSignature`; or

(ii) `keyAgreement`.

(C) The OCA shall ensure that each OCA Certificate that is Issued by it has a `keyUsage` of either:

(i) `keyCertSign`; or

(ii) `CRLSign`.

(D) The OCA shall ensure that no `keyUsage` values may be set in an Organisation Certificate or OCA Certificate other than in accordance with this Part 6.1.7.

6.2 PRIVATE KEY PROTECTION AND CRYPTOGRAPHIC MODULE ENGINEERING CONTROLS

6.2.1 Cryptographic Module Standards and Controls

(A) The OCA shall ensure that all OCA Private Keys shall be:

(i) protected to a high standard of assurance by physical and logical security controls; and

(ii) stored in and operated from within a Cryptographic Module which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(B) The OCA shall ensure that all OCA Private Keys shall, where they affect the outcome of any Certificates Issued by it, be protected by, stored in and operated from within a Cryptographic Module which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(C) The OCA shall ensure that no OCA Private Key shall be made available in either complete or unencrypted form except in a Cryptographic Module which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

(D) The OCA shall ensure that any Cryptographic Module which is used for any purpose related to Certificate life-cycle management shall:

(i) operate so as to block access to itself following a number of failed consecutive attempts to access it using Activation Data, where that number shall be set out in the Organisation CPS; and

(ii) be required to be unblocked by an authorised member of OCA Personnel who has been Authenticated as such following a process which shall be set out in the Organisation CPS.

6.2.2 Private Key (m out of n) Multi-Person Control

See Part 6.1.1 of this Policy.

6.2.3 Private Key Escrow

(A) This Policy does not support Key Escrow.

(B) The OCA shall not provide any Key Escrow service.

6.2.4 Private Key Back-Up

(A) The OCA may Back-Up OCA Private Keys insofar as:

(i) each Private Key is protected to a standard which is at least equivalent to that required in relation to the principal Private Key in accordance with this Policy; and

(ii) where more than one Private Key is Backed-Up within a single security environment, each of the Private Keys which is Backed-Up within that environment must be protected to a standard which is at least equivalent to that required in relation to an Issuing OCA Private Key in accordance with this Policy.

6.2.5 Private Key Archival

(A) The OCA shall ensure that no OCA Key which is a Private Key is archived.

6.2.6 Private Key Transfer into or from a Cryptographic Module

(A) The OCA shall ensure that no OCA Private Key is transferred or copied other than:

(i) for the purposes of:

(a) Back-Up;

(b) establishing an appropriate degree of resilience in relation to the provision of the SMKI Services; or

(c) in other circumstances where the SMKI PMA has (following consultation with the Security Sub-Committee) given explicit approval to do so in order to maintain continuity of the provision of SMKI Services.

(ii) in accordance with a level of protection which is compliant with FIPS 140-2 Level 3 (or any equivalent to that Federal Information Processing Standard which updates or replaces it from time to time).

6.2.7 Private Key Storage on Cryptographic Module

See Part 6.2.1 of this Policy.

6.2.8 Method of Activating Private Key

(A) The OCA shall ensure that the Cryptographic Module in which any OCA Private Key is stored may be accessed only by an authorised member of OCA Personnel who has been Authenticated following an Authentication process which:

(i) has an appropriate level of strength to ensure the protection of the Private Key; and

(ii) involves the use of Activation Data.

6.2.9 Method of Deactivating Private Key

(A) The OCA shall ensure that any OCA Private Key shall be capable of being de-activated by means of the OCA Systems, at least by:

(i) the actions of:

(a) turning off the power;

(b) logging off;

(c) carrying out a system reset; and

(ii) a period of inactivity of a length which shall be set out in the Organisation CPS.

6.2.10 Method of Destroying Private Key

(A) The OCA shall ensure that the Organisation CPS incorporates provisions for the exercise of strict controls in relation to the destruction of OCA Keys.

(B) The OCA shall ensure that no OCA Key (whether in active use, existing as a copy for the purposes of resilience, or Backed-Up) is destroyed except in accordance with a positive decision by the OCA to destroy it.

6.2.11 Cryptographic Module Rating

See Part 6.2.1 of this Policy.

6.3 OTHER ASPECTS OF KEY PAIR MANAGEMENT

6.3.1 Public Key Archival

(A) The OCA shall ensure that it archives OCA Public Keys in accordance with the requirements of Part 5.5 of this Policy.

6.3.2 Certificate Operational Periods and Key Pair Usage Periods

(A) The OCA shall ensure that the Validity Period of each Certificate Issued by it shall be as follows:

(i) in the case of an Organisation Certificate, 10 years or, a different duration in circumstances approved by the SMKI PMA (having taken into account the views of the Security Sub-Committee;

(ii) in the case of an Issuing OCA Certificate, 25 years; and

(iii) in the case of a Root OCA Certificate, 50 years.

(B) For the purposes of paragraph (A), the OCA shall set the `notAfter` value specified in Annex B in accordance with that paragraph.

(C) The OCA shall ensure that no OCA Private Key is used after the end of the Validity Period of the Certificate containing the Public Key which is associated with that Private Key.

6.4 ACTIVATION DATA

6.4.1 Activation Data Generation and Installation

(A) The OCA shall ensure that any Cryptographic Module within which an OCA Key is held has Activation Data that are unique and unpredictable.

(B) The OCA shall ensure that:

(i) these Activation Data, in conjunction with any other access control, shall be of an appropriate level of strength for the purposes of protecting the OCA Keys; and

(ii) where the Activation Data comprise any PINs, passwords or pass-phrases, the OCA shall have the ability to change these at any time.

6.4.2 Activation Data Protection

(A) The OCA shall ensure that the Organisation CPS incorporates provision for the use of such cryptographic protections and access controls as are appropriate to protect against the unauthorised use of Activation Data.

6.4.3 Other Aspects of Activation Data

[*Not applicable in this Policy*]

6.5 COMPUTER SECURITY CONTROLS

6.5.1 Specific Computer Security Technical Requirements

(A) The OCA shall ensure that the Organisation CPS incorporates provisions in relation to the identification and implementation, following the conclusion of any threat assessment, of security measures which make provision for at least the following:

(i) the establishment of access controls in relation to the activities of the OCA;

(ii) the appropriate allocation of responsibilities to Privileged Persons;

(iii) the identification and Authentication of organisations, individuals and Systems involved in OCA activities;

(iv) the use of cryptography for communication and the protection of Data stored on the OCA Systems;

(v) the audit of security related events; and

(vi) the use of recovery mechanisms for OCA Keys.

6.5.2 Computer Security Rating

(A) The OCA shall ensure that the Organisation CPS incorporates provisions relating to the appropriate security rating of the OCA Systems.

6.6 LIFE-CYCLE TECHNICAL CONTROLS

6.6.1 System Development Controls

(A) The OCA shall ensure that any software which is developed for the purpose of establishing a functionality of the OCA Systems shall:

(i) take place in a controlled environment that is sufficient to protect against the insertion into the software of malicious code;

(ii) be undertaken by a developer which has a quality system that is:

(a) compliant with recognised international standards (such as ISO 9001:2000 or an equivalent standard); or

(b) available for inspection and approval by the SMKI PMA, and has been so inspected and approved.

6.6.2 Security Management Controls

(A) The OCA shall ensure that the Organisation CPS incorporates provisions which are designed to ensure that the OCA Systems satisfy the requirements of Section G2 (System Security: Obligations on the DCC) and Section G5 (Information Security: Obligations on the DCC and Users) of the Code.

6.6.3 Life-Cycle Security Controls

See Part 6.6.2 of this Policy.

6.7 NETWORK SECURITY CONTROLS

6.7.1 Use of Offline Root OCA

(A) The OCA shall ensure that its functions as the Root OCA are carried out on a part of the OCA Systems that is neither directly nor indirectly connected to any System which is not a part of the OCA Systems.

6.7.2 Protection Against Attack

(A) The OCA shall use its best endeavours to ensure that the OCA Systems are not Compromised, and in particular for this purpose that they are designed and operated so as to detect and prevent:

(i) any Denial of Service Event; and

(ii) any unauthorised attempt to connect to them.

(B) The OCA shall take reasonable steps to ensure that the OCA Systems cause or permit to be open at any time only those network ports, and allow only those protocols, which are required at that time for the effective operation of those Systems, and block all network ports and protocols which are not so required.

6.7.3 Separation of Issuing OCA

(A) The DCC shall ensure that, where its functions as the Issuing OCA are carried out on a part of the OCA Systems that is connected to an external network, they are carried out on a System that is Separated from all other OCA Systems.

6.7.4 Health Check of OCA Systems

(A) The OCA shall ensure that, in relation to the OCA Systems, a vulnerability assessment in accordance with Section G2.13 – G2.15 of the Code (Management of Vulnerabilities) is carried out with such frequency as may be specified from time to time by the Independent SMKI Assurance Service Provider.

6.8 TIME-STAMPING

6.8.1 Use of Time-Stamping

(A) The OCA shall ensure that Time-Stamping takes place in relation to all Certificates and all other OCA activities which require an accurate record of time.

(B) The OCA shall ensure that the Organisation CA incorporates provisions in relation to the time source and mechanisms used by any Time-Stamping Authority which carries out Time-Stamping on behalf of the OCA.

7 <u>CERTIFICATE, CRL AND OCSP PROFILES</u>

7.1 CERTIFICATE PROFILES

(A) The OCA shall use only the Certificate Profiles in Annex B.

7.1.1 Version Number(s)

[*Not applicable in this Policy*]

7.1.2 Certificate Extensions

[*Not applicable in this Policy*]

7.1.3 Algorithm Object Identifiers

[*Not applicable in this Policy*]

7.1.4 Name Forms

[*Not applicable in this Policy*]

7.1.5 Name Constraints

[*Not applicable in this Policy*]

7.1.6 Certificate Policy Object Identifier

[*Not applicable in this Policy*]

7.1.7 Usage of Policy Constraints Extension

[*Not applicable in this Policy*]

7.1.8 Policy Qualifiers Syntax and Semantics

[*Not applicable in this Policy*]

7.1.9 Processing Semantics for the Critical Certificate Policies Extension

[*Not applicable in this Policy*]

7.2 CRL PROFILE

7.2.1 Version Number(s)

(A) The OCA shall ensure that the Organisation ARL and Organisation CRL conform with X.509 v2 and IETF RFC 5280.

7.2.2 CRL and CRL Entry Extensions

(A) The OCA shall notify Parties of the profile of the Organisation CRL and of any Organisation CRL extensions.

7.3 OCSP PROFILE

7.3.1 Version Number(s)

[*Not applicable in this Policy*]

7.3.2 OCSP Extensions

[*Not applicable in this Policy*]

8 COMPLIANCE AUDIT AND OTHER ASSESSMENTS

8.1 FREQUENCY OR CIRCUMSTANCES OF ASSESSMENT

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.2 IDENTITY/QUALIFICATIONS OF ASSESSOR

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.3 ASSESSOR'S RELATIONSHIP TO ASSESSED ENTITY

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.4 TOPICS COVERED BY ASSESSMENT

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.5 ACTIONS TAKEN AS A RESULT OF DEFICIENCY

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

8.6 COMMUNICATION OF RESULTS

(A) Provision in relation to this is made in Appendix C of the Code (SMKI Compliance Policy).

9 OTHER BUSINESS AND LEGAL MATTERS

In so far as provision is made in relation to all the matters referred to in this Part, it is found in the DCC Licence and the provisions of the Code (including in Section L11 (Subscriber Obligations) and Section L12 (Relying Party Obligations) of the Code).

9.1 FEES

(A) See the statement at the beginning of this Part.

9.1.1 Certificate Issuance or Renewal Fees

(A) See the statement at the beginning of this Part.

9.1.2 Organisation Certificate Access Fees

(A) See the statement at the beginning of this Part.

9.1.3 Revocation or Status Information Access Fees

(A) See the statement at the beginning of this Part.

9.1.4 Fees for Other Services

(A) See the statement at the beginning of this Part.

9.1.5 Refund Policy

(A) See the statement at the beginning of this Part.

9.2 FINANCIAL RESPONSIBILITY

9.2.1 Insurance Coverage

(A) See the statement at the beginning of this Part.

9.2.2 Other Assets

(A) See the statement at the beginning of this Part.

9.2.3 Insurance or Warranty Coverage for Subscribers and Subjects

(A) See the statement at the beginning of this Part.

9.3 CONFIDENTIALITY OF BUSINESS INFORMATION

9.3.1 Scope of Confidential Information

(A) See the statement at the beginning of this Part.

9.3.2 Information not within the Scope of Confidential Information

(A) See the statement at the beginning of this Part.

9.3.3 Responsibility to Protect Confidential Information

(A) See the statement at the beginning of this Part.

9.4 PRIVACY OF PERSONAL INFORMATION

9.4.1 Privacy Plan

(A) See the statement at the beginning of this Part.

9.4.2 Information Treated as Private

(A) See the statement at the beginning of this Part.

9.4.3 Information not Deemed Private

(A) See the statement at the beginning of this Part.

9.4.4 Responsibility to Protect Private Information

(A) See the statement at the beginning of this Part.

9.4.5 Notice and Consent to Use Private Information

(A) See the statement at the beginning of this Part.

9.4.6 Disclosure Pursuant to Judicial or Administrative Process

(A) See the statement at the beginning of this Part.

9.4.7 Other Information Disclosure Circumstances

(A) See the statement at the beginning of this Part.

9.5 INTELLECTUAL PROPERTY RIGHTS

(A) See the statement at the beginning of this Part.

9.6 REPRESENTATIONS AND WARRANTIES

9.6.1 Certification Authority Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.2 Registration Authority Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.3 Subscriber Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.4 Relying Party Representations and Warranties

(A) See the statement at the beginning of this Part.

9.6.5 Representations and Warranties of Other Participants

(A) See the statement at the beginning of this Part.

9.7 DISCLAIMERS OF WARRANTIES

(A) See the statement at the beginning of this Part.

9.8 LIMITATIONS OF LIABILITY

(A) See the statement at the beginning of this Part.

9.9 INDEMNITIES

(A) See the statement at the beginning of this Part.

9.10 TERM AND TERMINATION

9.10.1 Term

(A) See the statement at the beginning of this Part.

9.10.2 Termination of Organisation Certificate Policy

(A) See the statement at the beginning of this Part.

9.10.3 Effect of Termination and Survival

(A) See the statement at the beginning of this Part.

9.11 INDIVIDUAL NOTICES AND COMMUNICATIONS WITH PARTICIPANTS

9.11.1 Subscribers

(A) See the statement at the beginning of this Part.

9.11.2 Organisation Certification Authority

(A) See the statement at the beginning of this Part.

9.11.3 Notification

(A) See the statement at the beginning of this Part.

9.12 AMENDMENTS

9.12.1 Procedure for Amendment

(A) See the statement at the beginning of this Part.

9.12.2 Notification Mechanism and Period

(A) See the statement at the beginning of this Part.

9.12.3 Circumstances under which OID Must be Changed

(A) See the statement at the beginning of this Part.

9.13 DISPUTE RESOLUTION PROVISIONS

(A) See the statement at the beginning of this Part.

9.14 GOVERNING LAW

(A) See the statement at the beginning of this Part.

9.15 COMPLIANCE WITH APPLICABLE LAW

(A) See the statement at the beginning of this Part.

9.16 MISCELLANEOUS PROVISIONS

9.16.1 Entire Agreement

(A) See the statement at the beginning of this Part.

9.16.2 Assignment

(A) See the statement at the beginning of this Part.

9.16.3 Severability

(A) See the statement at the beginning of this Part.

9.16.4 Enforcement (Attorney’s Fees and Waiver of Rights)

(A) See the statement at the beginning of this Part.

9.16.5 Force Majeure

(A) See the statement at the beginning of this Part.

9.17 OTHER PROVISIONS

9.17.1 Organisation Certificate Policy Content

(A) See the statement at the beginning of this Part.

9.17.2 Third Party Rights

(A) See the statement at the beginning of this Part.

ANNEX A: DEFINITIONS AND INTERPRETATION

In this Policy, except where the context otherwise requires -

- expressions defined in Section A of the Code (Definitions and Interpretation) have the same meaning as is set out in that Section,
- the expressions in the left-hand column below shall have the meanings given to them in the right-hand column below,
- where any expression is defined in Section A of the Code (Definitions and Interpretation) and in this Annex, the definition in this Annex shall take precedence for the purposes of the Policy,
- the rule of interpretation set out at Part 1.1 of this Policy shall apply.

Activation Data means any private Data (such as a password or the Data on a smartcard) which are used to access a Cryptographic Module.

Archive means the archive of Data created in accordance with Part 5.5.1 of this Policy (and "**Archives**" and "**Archived**" shall be interpreted accordingly).

Audit Log means the audit log created in accordance with Part 5.4.1 of this Policy.

Authentication means the process of establishing that an individual, Certificate, System or Organisation is what he or it claims to be (and "**Authenticate**" and "**Authenticated**" shall be interpreted accordingly).

Authorised Subscriber means a Party or RDP which has successfully completed the procedures set out in the SMKI RAPP and has been authorised by the OCA to submit a Certificate Signing Request.

Certificate means either an Organisation Certificate or an OCA Certificate.

Certificate Profile means a table bearing that title in Annex B and specifying certain parameters to be contained within a Certificate.

Certificate Re-Key means a change to the Public Key contained within a Certificate bearing a particular serial number.

Certificate Revocation Request means a request for the revocation of a Certificate by the OCA, submitted by the Subscriber for that Certificate to the OCA in accordance with the SMKI RAPP and this Policy.

DCA Systems has the meaning given to that expression in Appendix A of the Code (Device Certificate Policy).

Eligible Subscriber means:

(a) in relation to an Organisation Certificate, an Authorised Subscriber which is identified as an Eligible Subscriber in accordance with Section L3.18 of the Code (Organisation Certificates); and

(b) in relation to an OCA Certificate, an Authorised Subscriber which is identified as an Eligible Subscriber in accordance with Section L3.19 of the Code (OCA Certificates).

Entity Identifier means a User ID, RDP ID or a DCC ID as required by the context.

Issue means the act of the OCA, in its capacity as the Root OCA or Issuing OCA, and acting in accordance with this Policy, of creating and signing a Certificate which is bound to both a Subject and a Subscriber (and “**Issued**” and “**Issuing**” shall be interpreted accordingly).

Issuing Organisation Certification Authority (or **Issuing OCA**) means the DCC exercising the function of Issuing Organisation Certificates to Eligible Subscribers and of storing and managing the Private Keys associated with that function.

Issuing OCA Certificate means a certificate in the form set out in the Issuing OCA Certificate Profile in accordance with Annex B, and Issued by the Root OCA to the Issuing OCA in accordance with this Policy.

Issuing OCA Private Key means a Private Key which is stored and managed by the OCA acting in its capacity as the Issuing OCA.

Issuing OCA Public Key means the Public Key which is part of a Key Pair with an Issuing OCA Private Key.

Key Escrow means the storage of a Private Key by a person other than the Subscriber or Subject of the Certificate which contains the related Public Key.

Object Identifier (or **OID**) means an Object Identifier assigned by the Internet Address Naming Authority.

OCA Certificate means either a Root OCA Certificate or an Issuing OCA Certificate.

OCA Key means any Private Key or a Public Key generated by the OCA for the purposes of complying with its obligations under the Code.

OCA Personnel means the DCC Personnel working on behalf of the OCA.

OCA Private Key means either a Root OCA Private Key or an Issuing OCA Private Key.

OCA Systems means the Systems used by the OCA in relation to the SMKI Services.

Organisation Authority Revocation List (or **ARL**) means a list, produced by the OCA, of all OCA Certificates that have been revoked in accordance with this Policy.

Organisation Certificate means a certificate in the form set out in the Organisation Certificate Profile in accordance with Annex B, and Issued by the Issuing OCA in accordance with this Policy.

Organisation Certificate Revocation List (or **CRL**) means a list, produced by the OCA, of all Organisation Certificates that have been revoked in accordance with this Policy.

Organisation Certification Authority (or **OCA**) means the DCC, acting in the capacity and exercising the functions of one or more of:

(a) the Root OCA;

(b) the Issuing OCA; and

(c) the Registration Authority.

Private Key Material in relation to a Private Key, means that Private Key and the input parameters necessary to establish, use and maintain it.

Registration Authority means the DCC exercising the function of receiving and processing Certificate Signing Requests made in accordance with the SMKI RAPP.

SMKI Registration Authority Manager has the meaning given to that expression in the SMKI RAPP.

SMKI Registration Authority Personnel has the meaning given to that expression in the SMKI RAPP.

Root Organisation Certification Authority (or **Root OCA**) means the DCC exercising the function of Issuing OCA Certificates to the Issuing OCA and storing and managing Private Keys associated with that function.

Root OCA Certificate means a certificate in the form set out in the Root OCA Certificate Profile in accordance with Annex B and self-signed by the Root OCA in accordance with this Policy.

Root OCA Private Key means a Private Key which is stored and managed by the OCA acting in its capacity as the Root OCA.

Security Related Functionality means the functionality of the OCA Systems which is designed to detect, prevent or mitigate the adverse effect of any Compromise of that System.

Subject means:

(a) in relation to an Organisation Certificate, the Organisation identified by the `subject` field of the Organisation Certificate Profile in Annex B; and

(b) in relation to an OCA Certificate, the globally unique name of the Root OCA or Issuing OCA as identified by the `subject` field of the relevant Certificate Profile in Annex B.

Subscriber means, in relation to any Certificate, a Party or RDP which has been Issued with and accepted that Certificate, acting in its capacity as the holder of the Certificate.

Time-Stamping means the act that takes place when a Time-Stamping Authority, in relation to a Certificate, stamps a particular datum with an accurate indicator of the time (in hours, minutes and seconds) at which the activity of stamping takes place.

Time-Stamping Authority means that part of the OCA that:

(a) where required, provides an appropriately precise time-stamp in the format required by this Policy; and

(b) relies on a time source that is:

(i) accurate;

(ii) determined in a manner that is independent of any other part of the OCA Systems; and

(iii) such that the time of any time-stamp can be verified to be that of the Independent Time Source at the time at which the time-stamp was applied.

Validity Period means, in respect of a Certificate, the period of time for which that Certificate is intended to be valid.

ANNEX B: OCA CERTIFICATE AND ORGANISATION CERTIFICATE PROFILES

End Entity Certificate Structure and Contents

This Annex lays out requirements as to structure and content with which OCA Certificates and Organisation Certificates shall comply. All terms in this Annex shall, where not defined in the Code, this Policy, or the GB Companion Specification, have the meanings in IETF RFC 5759 and IETF RFC5280.

Common requirements applicable to OCA Certificates and Organisation Certificates

All OCA Certificates and Organisation Certificates that are validly authorised within the SMKI for use within the scope of GB Smart Metering:

- shall be compliant with IETF RFC 5759 and so with IETF RFC5280.
- for clarity and in adherence with the requirements of IETF RFC5759, all OCA Certificates and Organisation Certificates shall:
    - contain the `authorityKeyIdentifier` extension, except where the Certificate is the Root OCA Certificate;
    - contain the `keyUsage` extension which shall be marked as critical;
- be X.509 v3 certificates as defined in IETF RFC 5280, encoded using the ASN.1 Distinguished Encoding Rules;
- shall, in relation to communications with devices, contain a non-empty subject field which contains an `X520OrganizationalUnitName` whose value is to be expressed as the human-readable two octet hexadecimal representation of the integer Remote Party Role that the Certificate allows the Subject of the Certificate to perform;
- only contain Public Keys of types that are explicitly allowed by the GBCS. This means all Public Keys shall be elliptic curve Public Keys on the NIST P-256 curve;
- only contain Public Keys in uncompressed form i.e. contain an elliptic curve point in uncompressed form as detailed in Section 2.2 of IETF RFC5480;
- only provide for signature methods that are explicitly allowed within the GBCS. This means using P-256 Private Keys with SHA 256 and ECDSA;

- contain a `certificatePolicies` extension containing at least one `CertPolicyID` which shall be marked as critical. For clarity and in adherence with IETF RFC 5280, Certification Path Validation undertaken by Parties and Devices shall interpret this extension;
- contain a `serialNumber` of no more than 16 octets in length;
- contain a `subjectKeyIdentifier` which shall be marked as non-critical;
- contain an `authorityKeyIdentifier` in the form `[0] KeyIdentifier` which shall be marked as non-critical, except where the Certificate is the Root OCA Certificate. Note this exception only applies where Remote Party Role as specified in the `X520OrganizationalUnitName` part of the `subject` field = root;
- only contain `KeyIdentifiers` generated as per method (2) of Section 4.2.1.2 of IETF RFC 5280 and so which shall always be 8 octets in length;
- contain an `issuer` field whose contents MUST be identical to the contents of the signer's `subject` field in the signer's Certificate;
- have a valid `notBefore` field consisting of the time of issue encoded and a valid `notAfter` field expiration date as per IETF RFC 5280 Section 4.1.2.5.

Requirements applicable to Organisation Certificates only

All Organisation Certificates that are issued by the OCA shall:

- within the `subject` field, in addition to other attributes, contain an `AttributeTypeAndValue` structure whose type shall be `id-at-uniqueIdentifier {joint-iso-itu-t(2) ds(5) attributeType(4) uniqueIdentifier(45)}` and whose value shall be the 8 octet Entity Identifier of the subject of the Certificate;
- contain a single Public Key;
- contain a `keyUsage` extension marked as critical, with a value of only one of:
  - `digitalSignature`; or
  - `keyAgreement`.

- contain a single `CertPolicyID` in the `certificatePolicies` extension that refers to the OID of this Policy under which the Certificate is issued.

Requirements applicable to the Root OCA and Issuing OCA

All OCA Certificates issued by the OCA shall:

- have globally unique `subject` field contents;
- contain a single public key except for the Root-CA where there shall be two public keys. The second public key shall be referred to as the Contingency Key and shall be present in the `WrappedApexContingencyKey` extension with the meaning of IETF RFC5934 section 9. The Contingency Key shall be encrypted as per the requirements of the GBCS;
- contain a `keyUsage` extension marked as critical and defined as:
  - `keyCertSign`; and
  - `cRLSign`;
- for Issuing OCA Certificates, contain at least one `CertPolicyID` in the `certificatePolicies` extension that refers to the OID of this Policy under which the Certificate is issued;
- for the Root OCA Certificate, contain a single `CertPolicyID` in the `certificatePolicies` extension that refers to the OID for `anyPolicy`;
- for Issuing OCA Certificates, contain the `basicConstraints` extension, with values `cA=True`, and `pathLen=0`. This extension shall be marked as critical;
- for the Root OCA Certificate, contain the basicConstraints extension, with the value `cA=True` and `pathLen absent` (unlimited). This extension shall be marked as critical.

Organisation Certificate Profile

Field Name	RFC 5759/5280 Type	Value	Reference
version	INTEGER	v3	
serialNumber	INTEGER	Positive Integer of up to 16 Octets	
signature	AlgorithmIdentifier	SHA256 with ECDSA	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the "Issuer X520 Common Name")	UTF8String	Globally unique common name of Issuing OCA of up to 4 Octets (as defined in the Issuing OCA Certificate Profile)	
keyIdentifier in Authoritykeyidentifier (the "Subject Key Identifier")	keyIdentifier	A unique value that matches the subjectKeyIdentifier value of the issuer's credential	
keyIdentifier in subjectKeyIdentifier (the "Subject Key Identifier")	keyIdentifier	Provides a means for identifying certificates containing the particular Public Key used in an application	

notBefore	Time	Creation time of the Organisation Certificate	
notAfter	Time	Expiry time of the Certificate	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the “Subject X520 Common Name”)	UTF8String	Name of the Subject of up to 16 Octets	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-organizationalUnitName (the “Subject X520 Organizational Unit Name”)	UTF8String	Remote Party Role of the subject of the Certificate	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-uniqueIdentifier	UniqueIdentifier	The 64 bit Entity Identifier of the subject of the Certificate	

(the “Subject Unique Identifier”)			
`subjectPublicKeyInfo`	`SubjectPublicKeyInfo`	The subject’s Public Key	
`extensions`	`Extensions`	Critical and non-critical extensions	
`signatureAlgorithm`	`AlgorithmIdentifier`	SHA256 with ECDSA	
`signatureValue`	`BIT STRING`	Subject Organisation Certificate signature	

Interpretation

`version`

The version of the X.509 Organisation Certificate. Valid Organisation Certificates shall identify themselves as version 3.

`serialNumber`

Organisation Certificate serial number, a positive integer of up to 16 octets. The `serialNumber` identifies the Organisation Certificate, and shall be created by the Issuing OCA that signs the Organisation Certificate. The `serialNumber` shall be unique in the scope of Organisation Certificate signed by the Issuing OCA.

`signature`

The identity of the signature algorithm used to sign the Organisation Certificate. The field is identical to the value of the Organisation Certificate `signatureAlgorithm` field explained further under the next **`signatureAlgorithm`** heading.

Issuer X520 Common Name

The name of the signer of the Organisation Certificate. This will be the gloablly unique name of the Issuing OCA of up to 4 Octets (as defined in the Issuing OCA Certificate Profile).

Authority Key Identifier

To optimize building the correct credential chain, the non-critical Authority Key Identifier extension shall be populated with a unique value as recommended by RFC 5280 and shall be included in all Organisation Certificates.

Subject Key Identifier

The Subject Key Identifier extension shall be included and marked as non-critical in the Organisation Certificate.

`validity`

The time period over which the Issuing OCA expects the Organisation Certificate to be valid. The `validity` period is the period of time from `notBefore` through `notAfter`, inclusive.

All times shall be stated in the Universal Coordinated Time (UTC) time zone. Times up to and including 23:59:59 December 31, 2049 UTC shall be encoded as `UTCTime` as YYMMDDHHmmssZ.

Times later than 23:59:59 December 31, 2049 UTC shall be encoded as `GeneralizedTime` as YYYYMMDDHHmmssZ.

`notBefore`

The earliest time an Organisation Certificate may be used. This shall be the time the Organisation Certificate is created.

`notAfter`

The latest time an Organisation Certificate is expected to be used. The value in a `notAfter` field shall be treated as specified in RFC 5280.

Subject X520 Common Name

This field shall contain a unique X.500 Distinguished Name (DN).

This field shall only be populated with a value where:

- the value of `keyUsage` within **extensions** is `digitalSignature`; and
- the **Subject X520 Organizational Unit Name** field has a value of either '02' or '87'.

Where this field is populated:

- it shall, where the **Subject X520 Organizational Unit Name** field has a value of '02' (so Supplier with its GBCS meaning), contain the string which the eligible subscriber wishes to have displayed in the Supplier's name field within Contact Details (with its SMETS meaning), should the Certificate be placed on a Smart Meter; and
- it shall, where the **Subject X520 Organizational Unit Name** field has a value of '87' (so corresponding to the Remote Party Role of xmlSign with its Section L meaning):
    - where the Subject Unique Identifier field is to be populated with an identification number that is (or is to be) used by the eligible subscriber acting in the User Role of Import Supplier and/or Gas Supplier and/or Export Supplier, include one or two of the Market Participant Identifiers by which the eligible subscriber may be identified in the Party Details. Where two such identifiers are included, only one shall relate to the supply of gas and one to the supply of electricity, and they shall be separated by a single space character. There shall be no other whitespace characters; or
    - otherwise, be populated with a string chosen by the eligible subscriber.

The field shall be a maximum of 16 characters in length.

Subject X520 Organizational Unit Name

The Subject X520 Organizational Unit Name attribute of `subject` shall be populated with the Remote Party Role Code that the Certificate allows the subject of the Certificate to perform.

Subject Unique Identifier

This shall be populated with the 64-bit Entity Identifier of the subject of the Certificate

`subjectPublicKeyInfo`

The Organisation Certificate `subjectPublicKeyInfo` field shall indicate the Public Key algorithm identifier and the Public Key in the specified algorithm format as specified in RFC 3279 and RFC 5480.

The algorithm field in the `subjectPublicKeyInfo` structure shall contain the following identifier:

```
id-ecPublicKey OBJECT IDENTIFIER ::= {iso(1) member-body(2)
us(840) ansi-X9-62(10045) keyType(2) 1 }
```

`id-ecPublicKey` indicates that the algorithms that can be used with the subject Public Key are unrestricted. The key is only restricted by the values indicated in the `keyUsage` Organisation Certificate extension (explained further under the next **`extensions`** heading).

The parameter for `id-ecPublicKey` is as follows and shall always be present:

```
ECParameters ::= CHOICE {

      namedCurve         OBJECT IDENTIFIER

      -- implicitCurve   NULL

      -- specifiedCurve  SpecifiedECDomain

    }
```

Only the following field in ECParameters shall be used:

- o `namedCurve` - identifies all the required values for a particular set of elliptic curve domain parameters to be represented by an object identifier.

The `OBJECT IDENTIFIER` for the curve choice to be used in Organisation Certificate is:

```
secp256r1 OBJECT IDENTIFIER ::= { iso(1) member-body(2)
us(840) ansi-X9-62(10045) curves(3) prime(1) 7 }
```

The `subjectPublicKey` from `SubjectPublicKeyInfo` is the ECC Public Key.

Implementations of Elliptic Curve Cryptography according to this document shall only support the uncompressed form.

The first octet of the `subjectPublicKey` indicates whether the key is compressed or uncompressed. The uncompressed form is indicated by 0x04 (the compressed form is indicated by either 0x02 or 0x03). The Public Key shall be rejected if any value other than 0x04 is in the first octet.

`signatureAlgorithm`

The `signatureAlgorithm` field shall indicate the Issuing OCA signature algorithm used to sign this Organisation Certificate is as defined under the next **Signature Method (ECDSA)** heading.

`signatureValue`

The Issuing OCA's signature of the Organisation Certificate shall be computed using the Issuing OCA's private signing key using the algorithm identified under the next **Signature Method (ECDSA)** heading.

The structure for ECDSA signatures shall be as per RFC 5480.

`extensions`

Organisation Certificates shall contain the `extensions` described below. They SHOULD NOT contain any additional `extensions`:

- `certificatePolicy`
- `keyUsage`
- `authorityKeyIdentifier`
- `subjectKeyIdentifier`

Cryptographic Primitives for Signature Method

Signature Method (ECDSA)

The ECDSA signature method is defined in NIST FIPS 186-4. When implementing ECDSA, the SHA-256 message digest algorithm and the P-256 elliptic curve as defined in FIPS 186-4 Annex D, D.1.2.3, shall be used.

The signature algorithm shall be `ecdsa-with-SHA256` as specified in RFC 5759. The algorithm identifier is:

```
ecdsa-with-SHA256 OBJECT IDENTIFIER ::= { iso(1) member-
body(2) us(840) ansi-X9-62(10045) signatures(4) ecdsa-with-
sha2(3) 2 }
```

SHA-256 hash algorithm

The hash algorithm used shall be the SHA-256 secure hash algorithm as defined in NIST FIPS 180-4.

Root OCA Certificate Profile

Field Name	RFC 5759/5280 Type	Value	Reference
`version`	`INTEGER`	v3	
`serialNumber`	`INTEGER`	Positive Integer of up to 16 Octets	
`signature`	`AlgorithmIdentifier`	SHA256 with ECDSA	
The value field of the `AttributeTypeAndValue` structure within the `subject` field whose type is `id-at-`	`UTF8String`	Globally unique common name of Root OCA of up to 4 Octets	

commonName (the “Issuer X520 Common Name”)			
keyIdentifier in SubjectKeyIdentifier (the "Subject Key Identifier")	keyIdentifier	A unique value that matches the subjectKeyIdentifier of the issuer’s credential	
notBefore	Time	Creation time of the Certificate	
notAfter	Time	Expiry time of the Certificate	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the “Subject X520 Common Name”)	UTF8String	Globally unique name of Root OCA of up to 4 Octets (same as Issuer name)	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-organizationalUnitName (the “Subject X520 Organizational Unit Name”)	UTF8String	Remote Party Role of the subject of the Certificate	

`subjectPublicKeyInfo`	`SubjectPublicKeyInfo`	The Subject’s Public Key	
The `extnValue` in the `extension` whose `extnID` is `id-pe-WrappedApexContingencyKey`	`ApexContingencyKey`	The Subject’s protected (encrypted) Public Key used for recovery purposes	
`extensions`	`Extensions`	Critical and non-critical extensions	
`signatureAlgorithm`	`AlgorithmIdentifier`	SHA256 with ECDSA	
`signatureValue`	`BIT STRING`	Subject Certificate signature	

These certificates are the root of trust for the Organisations SMKI.

`version`

The version of the X.509 Certificate. Valid Certificates shall identify themselves as version 3.

`serialNumber`

Certificate serial number, a positive integer of up to 16 octets. The `serialNumber` identifies the Certificate, and shall be created by the OCA that signs the Certificate (self-signed by Root OCA). The `serialNumber` shall be unique in the scope of Certificates signed by the OCA.

`signature`

The identity of the signature algorithm used to sign the Certificate. The field is identical to the value of the Root OCA Certificate’s signatureAlgorithm field explained further under the next `signatureAlgorithm` heading.

Issuer X520 Common Name

The name of the signer of the Certificate. This will be the gloablly unique name of the Root OCA of up to 4 Octets. This will be the same as the `subject` as it is self-signed by the Root OCA.

Subject Key Identifier

The `SubjectKeyIdentifier` extension shall be included and marked as non-critical in the Certificate.

`validity`

The time period over which the issuer expects the Certificate to be valid. The validity period is the period of time from `notBefore` through `notAfter`, inclusive.

All times shall be stated in the Universal Coordinated Time (UTC) time zone. Times up to and including 23:59:59 December 31, 2049 UTC shall be encoded as `UTCTime` as YYMMDDHHmmssZ.

Times later than 23:59:59 December 31, 2049 UTC shall be encoded as `GeneralizedTime` as YYYYMMDDHHmmssZ.

`notBefore`

The earliest time a Certificate may be used. This shall be the time the Certificate is created.

`notAfter`

The latest time a Certificate is expected to be used. The value in a `notAfter` field shall be treated as specified in RFC 5280.

Subject X520 Common Name

This field must be populated with the globally unique name of the Root OCA of up to 4 Octets.

Subject X520 Organizational Unit Name

The Subject X520 `OrganizationalUnitName` attribute of `subject` shall be populated with the Remote Party Role Code that the Certificate allows the subject of the Certificate to perform.

subjectPublicKeyInfo

The Certificate's `subjectPublicKeyInfo` field shall indicate the Public Key algorithm identifier and the Public Key in the specified algorithm format as specified in RFC 3279 and RFC 5480.

The algorithm field in the `subjectPublicKeyInfo` structure shall be use the following identifier:

```
id-ecPublicKey OBJECT IDENTIFIER ::= {iso(1) member-body(2)
us(840) ansi-X9-62(10045) keyType(2) 1 }
```

`id-ecPublicKey` indicates that the algorithms that can be used with the subject Public Key are unrestricted. The key is only restricted by the values indicated in the `KeyUsage` Certificate extension (explained further under the next **`extensions`** heading).

The parameter for `id-ecPublicKey` is as follows and shall always be present:

```
ECParameters ::= CHOICE {

    namedCurve         OBJECT IDENTIFIER

    -- implicitCurve   NULL

    -- specifiedCurve  SpecifiedECDomain

  }
```

Only the following field in ECParameters shall be used:

o namedCurve - identifies all the required values for a particular set of elliptic curve domain parameters to be represented by an `OBJECT IDENTIFIER`.

The object identifier fo the curve choice to be used in OCA Certificates is:

```
secp256r1 OBJECT IDENTIFIER ::= { iso(1) member-body(2)
us(840) ansi-X9-62(10045) curves(3) prime(1) 7 }
```

The `subjectPublicKey` from `SubjectPublicKeyInfo` is the ECC Public Key.

Implementations of Elliptic Curve Cryptography according to this document shall only support the uncompressed form.

The first octet of the `subjectPublicKey` indicates whether the key is compressed or uncompressed. The uncompressed form is indicated by 0x04 (the compressed form is indicated by either 0x02 or 0x03). The Public Key shall be rejected if any value other than 0x04 is in the first octet.

`signatureAlgorithm`

The `signatureAlgorithm` field shall indicate the Root OCA signature algorithm used to sign this Certificate as defined in section under the next **Signature Method (ECDSA)** heading.

`signatureValue`

The Root OCA's signature of the Certificate shall be computed using the Root OCA's private signing key using the algorithm identified under the next **Signature Method (ECDSA)** heading.

The structure for ECDSA signatures shall be as per RFC 5480.

`extensions`

Certificates shall contain the `extensions` described below. They SHOULD NOT contain any additional `extensions`:

- `certificatePolicy`
- `keyUsage`
- `basicConstraints`
- `subjectKeyIdentifer`

Cryptographic Primitives for Signature Method

Signature Method (ECDSA)

The ECDSA signature method is defined in NIST FIPS 186-4. When implementing ECDSA, the SHA-256 message digest algorithm and the P-256 elliptic curve as defined in FIPS 186-4 Annex D, D.1.2.3, shall be used.

The signature algorithm shall be `ecdsa-with-SHA256` as specified in RFC 5759. The algorithm identifier is:

```
ecdsa-with-SHA256 OBJECT IDENTIFIER ::= { iso(1) member-
body(2) us(840) ansi-X9-62(10045) signatures(4) ecdsa-with-
sha2(3) 2 }
```

SHA-256 hash algorithm

The hash algorithm shall be the SHA-256 secure hash algorithm as defined in NIST FIPS 180-4.

Issuing OCA Certificate Profile

Field Name	RFC 5759/5280 Type	Value	Reference
`version`	`INTEGER`	v3	
`serialNumber`	`INTEGER`	Positive Integer of up to 16 Octets	
`signature`	`AlgorithmIdentifier`	SHA256 with ECDSA	
The `value` field of the `AttributeTypeAndValue` structure within the `subject` field whose `type` is `id-at-`	`UTF8String`	Globally unique name of Root OCA of up to 4 Octets (as defined in the	

commonName (the "Issuer X520 Common Name")		Root OCA Certificate Profile)	
keyIdentifier in subjectKeyIdentifier (the "Subject Key Identifier")	keyIdentifier	Provides a means for identifying certificates containing the particular Public Key used in an application	
keyIdentifier in authorityKeyIdentifier (the "Authority Key Identifier")	keyIdentifier	A unique value that matches the subjectKeyIdentifier value of the issuer's credential	
notBefore	Time	Creation time of the certificate	
notAfter	Time	Expiry time of the Certificate	
The value field of the AttributeTypeAndValue structure within the subject field whose type is id-at-commonName (the "Subject X520 Common Name")	UTF8String	Globally unique name of Issuing OCA of up to 4 Octets	
The value field of the AttributeTypeAndValue structure within the subject field	UTF8String	Remote Party Role of the Subject of the Certificate	

whose `type` is `id-at-organizationalUnitName` (the "Subject X520 Organizational Unit Name")			
`subjectPublicKeyInfo`	`SubjectPublicKeyInfo`	The Subject's Public Key	
`extensions`	`Extensions`	Critical and non-critical extensions	
`signatureAlgorithm`	`AlgorithmIdentifier`	SHA256 with ECDSA	
`signatureValue`	`BIT STRING`	Subject certificate signature	

`version`

The version of the X.509 Certificate. Valid Certificates shall identify themselves as version 3.

`serialNumber`

Certificate serial number, a positive integer of up to 16 octets. The serialNumber identifies the Certificate, and shall be created by the Root OCA that signs the Certificate. The serialNumber shall be unique in the scope of Certificates signed by the Root OCA.

`signature`

The identity of the signature algorithm used to sign the Certificate. The field is identical to the value of the Issuing OCA Certificate's `signatureAlgorithm` field explained further under the next **`signatureAlgorithm`** heading.

Issuer X520 Common Name

The name of the signer of the Certificate. This will be the gloablly unique name of the Root OCA of up to 4 Octets (as defined in the Root OCA Certificate Profile).

Subject Key Identifier

The `SubjectKeyIdentifier` extension shall be included and marked as non-critical in the Certificate.

Authority Key Identifier

To optimize building the correct credential chain, the non-critical `AuthorityKeyIdentifier` extension shall be populated with a unique value as recommended by RFC 5280 and shall be included in all Organisation Certificates.

`validity`

The time period over which the issuer expects the Certificate to be valid. The `validity` period is the period of time from `notBefore` through `notAfter`, inclusive.

All times shall be stated in the Universal Coordinated Time (UTC) time zone. Times up to and including 23:59:59 December 31, 2049 UTC shall be encoded as `UTCTime` as YYMMDDHHmmssZ.

Times later than 23:59:59 December 31, 2049 UTC shall be encoded as `GeneralizedTime` as YYYYMMDDHHmmssZ.

`notBefore`

The earliest time a Certificate may be used. This shall be the time the Certificate is created.

`notAfter`

The latest time a Certificate is expected to be used. The value in a `notAfter` field shall be treated as specified in RFC 5280.

Subject X520 Common Name

This field shall be populated with the globally unique name of the Issuing OCA of up to 4 Octets.

Subject X520 Organizational Unit Name

The Subject X520 Organizational Unit Name attribute of subject shall be populated with the Remote Party Role Code that the Certificate allows the subject of the Certificate to perform.

`subjectPublicKeyInfo`

The Certificate's `subjectPublicKeyInfo` field shall indicate the Public Key algorithm identifier and the Public Key in the specified algorithm format as specified in RFC 3279 and RFC 5480.

The algorithm field in the `subjectPublicKeyInfo` structure shall contain the following identifier:

```
id-ecPublicKey OBJECT IDENTIFIER ::= {iso(1) member-body(2)
us(840) ansi-X9-62(10045) keyType(2) 1 }
```

`id-ecPublicKey` indicates that the algorithms that can be used with the subject Public Key are unrestricted. The key is only restricted by the values indicated in the `KeyUsage` Certificate extension (explained further under the next **`extensions`** heading).

The parameter for `id-ecPublicKey` is as follows and shall always be present:

```
ECParameters ::= CHOICE {

    namedCurve         OBJECT IDENTIFIER

    -- implicitCurve   NULL

    -- specifiedCurve  SpecifiedECDomain

  }
```

Only the following field in ECParameters shall be used:

o `namedCurve` - identifies all the required values for a particular set of elliptic curve domain parameters to be represented by an

OBJECT IDENTIFIER.

The object identifier fo the curve choice to be used in Certificates is:

```
secp256r1 OBJECT IDENTIFIER ::= { iso(1) member-body(2)
us(840) ansi-X9-62(10045) curves(3) prime(1) 7 }
```

The subjectPublicKey from SubjectPublicKeyInfo is the ECC Public Key.

Implementations of Elliptic Curve Cryptography according to this document shall only support the uncompressed form.

The first octet of the subjectPublicKey indicates whether the key is compressed or uncompressed. The uncompressed form is indicated by 0x04 (the compressed form is indicated by either 0x02 or 0x03). The Public Key MUST be rejected if any value other than 0x04 is included in the first octet.

signatureAlgorithm

The signatureAlgorithm field shall indicate the Root OCA signature algorithm used to sign this Certificate as defined under the next **Signature Method (ECDSA)** heading.

signatureValue

The Root OCA's signature of the Certificate shall be computed using the Root OCA's private signing key using the algorithm identified under the next **Signature Method (ECDSA)** heading.

The structure for ECDSA signatures shall be as per RFC 5480.

extensions

Issuing-CA Certificates shall contain the extensions described below. They SHOULD NOT contain any additional extensions:

- certificatePolicy
- keyUsage

- `basicConstraints`
- `subjectKeyIdentifer`
- `authorityKeyIdentifier`

Cryptographic Primitives for Signature Method

Signature Method (ECDSA)

The ECDSA signature method is defined in NIST FIPS 186-4. When implementing ECDSA, the SHA-256 message digest algorithm and the P-256 elliptic curve as defined in FIPS 186-4 Annex D, D.1.2.3, shall be used.

The signature algorithm shall be `ecdsa-with-SHA256` as specified in RFC 5759. The algorithm identifier is:

```
ecdsa-with-SHA256 OBJECT IDENTIFIER ::= { iso(1) member-
body(2) us(840) ansi-X9-

62(10045) signatures(4) ecdsa-with-sha2(3) 2 }
```

SHA-256 hash algorithm

The hash algorithm used shall be the SHA-256 secure hash algorithm as defined in NIST FIPS 180-4.

Version C 3.0

Appendix C

SMKI Compliance Policy

Contents

1 INTRODUCTION

1.1 The document comprising this Appendix C:

(a) shall be known as the "**SMKI Compliance Policy**" (and in this document is referred to simply as the " **Policy**"),

(b) is a SEC Subsidiary Document related to Section L2 of the Code (SMKI Assurance).

2 SMKI INDEPENDENT ASSURANCE SCHEME

DCC: Duty to Submit to an SMKI Independent Assurance Scheme

2.1 The DCC shall subject the SMKI Services to assessment against an assurance scheme which satisfies:

(a) the quality requirements specified in Part 2.2 of this Policy;

(b) the independence requirements specified in Part 2.3 of this Policy; and

(c) the approval requirements specified in Part 2.5 of this Policy,

and that scheme is referred to in this Policy as the "**SMKI Independent Assurance Scheme**".

Quality Requirements

2.2 The quality requirements specified in this Part 2.2 are that the SMKI Independent Assurance Scheme must be a scheme:

(a) which is recognised as an accreditation scheme for the purposes of the eIDAS Regulation (No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market).

(b) which is based on ISO 27001; and

(c) the provider of which:

(i) is used by the United Kingdom Government to provide assurance in relation to electronic trust services; and

(ii) requires all its scheme assessors to be UKAS certified.

Independence Requirements

2.3 The independence requirements specified in this Part 2.3 are that the provider of the SMKI Independent Assurance Scheme must be independent of the DCC and of each DCC Service Provider from which the DCC acquires capability for the purposes of the provision of the SMKI Services (referred to in this Policy as a " **Relevant DCC Service Provider**").

2.4 For the purposes of Part 2.3 of this Policy, the provider of the SMKI Independent Assurance Scheme is to be treated as independent of the DCC (and of Relevant DCC Service Providers) only if:

(a) neither the DCC nor any of its subsidiaries (or any Relevant DCC Service Provider or any of its subsidiaries) holds or acquires any investment by way of shares, securities or other financial rights or interests in the provider of the scheme;

(b) either:

(i) no director or employee of the DCC (or of any Relevant DCC Service Provider) is or becomes a director or employee of the provider of the scheme; or

(ii) where any person is or becomes both a director or employee of the DCC (or of any Relevant DCC Service Provider) and a director or employee of the provider of the scheme, appropriate arrangements are in place to ensure that that person is able to have no influence on any decisions made by the provider of the scheme in respect of the approval of any person or the accreditation of any thing in accordance with the scheme;

(c) no person who is a director or employee of the DCC (or of any Relevant DCC Service Provider) holds or acquires any investment by way of shares, securities or other financial rights or interests in the provider of the scheme, except where sub-paragraph (b)(ii) applies and that investment is acquired by that person by way of reasonable compensation for his or her performance as a director or employee of the provider of the scheme; and

(d) the provider of the scheme does not hold or acquire a participating interest (as defined in section 421A of the Financial Services and Markets Act 2000) in the DCC (or in any Relevant DCC Service Provider).

Approval Requirements

2.5 Before entering into any agreement with the provider of the SMKI Independent Assurance Scheme, in accordance with its obligation under Section L2.2 of the Code (SMKI Compliance Policy), the DCC shall submit to the SMKI PMA for approval:

(a) its proposed choice of scheme; and

(b) the proposed terms and conditions of its agreement with the provider of that scheme,

and shall not enter into any such agreement unless the SMKI PMA has first approved the proposed SMKI Independent Assurance Scheme and the proposed terms and conditions of that agreement.

2.6 If the SMKI PMA does not approve either the proposed SMKI Independent Assurance Scheme or the proposed terms and conditions of the DCC's agreement with the provider of that scheme:

(a) the SMKI PMA shall provide the DCC with a statement of its reasons for not doing so; and

(b) the DCC shall submit to the SMKI PMA for approval, as soon as is reasonably practicable, a revised proposal in relation to the scheme.

3 INDEPENDENT ASSURANCE SERVICE PROVIDER

DCC: Duty to Procure Independent Assurance Services

3.1 For the purposes of complying with its obligation under Section L2.2 of the Code (SMKI Compliance Policy), the DCC shall procure the provision of assurance services:

(a) of the scope specified in Part 3.2 of this Policy;

(b) from a person who:

(i) is suitably qualified in accordance with Part 3.3 of this Policy; and

(ii) satisfies the independence requirements specified in Part 3.4 of this Policy,

and that person is referred to in this Policy as the "**Independent SMKI Assurance Service Provider**".

Scope of Independent Assurance Services

3.2 The assurance services specified in this Part 3.2 are services in accordance with which the Independent SMKI Assurance Service Provider shall:

(a) undertake an initial assessment of the SMKI Services against the SMKI Independent Assurance Scheme in accordance with Part 4 of this Policy;

(b) subsequently undertake further assessments of the SMKI Services against the SMKI Independent Assurance Scheme:

(i) at a frequency recommended by the provider of that scheme; or

(ii) where there is no such recommended frequency, or where the SMKI PMA otherwise determines, at a frequency specified by the SMKI PMA;

(c) at the request of, and to an extent determined by, the SMKI PMA, carry out an assessment of the compliance of any SMKI Participant with the applicable requirements of the SMKI Document Set;

(d) at the request of the SMKI PMA, provide to it advice in relation to the compliance of any SMKI Participant with the applicable requirements of the SMKI Document Set;

(e) at the request of the SMKI PMA, provide to it advice in relation to a review of this Policy, which shall include in particular:

(i) recommendations as to the scope and frequency of assessments carried out in accordance with this Policy; and

(ii) advice in relation to the suitability of any remedial action plan for the purposes of Section M8.4 of the Code (Consequences of an Event of Default), including where the Defaulting Party is the DCC in accordance with Section L2.6 of the Code (Events of Default); and

(f) at the request of the SMKI PMA Chair, provide a representative to attend and contribute to the discussion at any meeting of the SMKI PMA.

Suitably Qualified Service Provider

3.3 The Independent SMKI Assurance Service Provider shall be treated as suitably qualified in accordance with this Part 3.3 only if it is recognised by the provider of the SMKI Independent Assurance Scheme as being qualified to carry out assessments against that scheme.

Independence Requirements

3.4 The independence requirements specified in this Part 3.4 are that the Independent SMKI Assurance Service Provider must be independent of each SMKI Participant and of each service provider from whom that SMKI Participant acquires capability for any purpose related to its compliance with its obligations under the Code (but excluding any provider of corporate assurance services to that SMKI Participant).

3.5 For the purposes of Part 3.4 of this Policy, the Independent SMKI Assurance Service Provider is to be treated as independent of an SMKI Participant (and of a relevant service provider of that SMKI Participant) only if:

(a) neither that SMKI Participant nor any of its subsidiaries (or such a service provider or any of its subsidiaries) holds or acquires any investment by way of shares, securities or other financial rights or interests in the Independent SMKI Assurance Service Provider;

(b) no director of that SMKI Participant (or of any such service provider) is or becomes a director or employee of, or holds or acquires any investment by way of shares, securities or other financial rights or interests in, the Independent SMKI Assurance Service Provider; and

(c) the Independent SMKI Assurance Service Provider does not hold or acquire a participating interest (as defined in section 421A of the Financial Services and Markets Act 2000) in that SMKI Participant (or in any such service provider).

4 INITIAL ASSURANCE ASSESSMENT

DCC: Duty to Procure Initial Assessment

4.1 The DCC shall ensure that an initial assurance assessment of the SMKI Services:

(a) against the SMKI Independent Assurance Scheme; and

(b) in respect of compliance by the DCC with the applicable requirements of the SMKI Document Set,

is undertaken by the Independent SMKI Assurance Service Provider in accordance with Part 4.2 of this Policy.

Nature of the Initial Assessment

4.2 The initial assessment referred to in Part 4.1 of this Policy shall be undertaken in two stages, as described in Parts 4.3 and 4.5 of this Policy.

4.3 The first stage of the initial assessment shall:

(a) be undertaken by no later than such date as is necessary in order to ensure that an assessment report may be produced in accordance with paragraph (b); and

(b) result in an assessment report to be known as the "**Stage 1 Assurance Report**" in relation to the SMKI Services being produced by the Independent SMKI Assurance Service Provider by no later than such date as the SMKI PMA shall determine.

4.4 The Stage 1 Assurance Report shall:

(a) clearly identify any failure of the DCC to comply with the applicable requirements of the SMKI Document Set;

(b) recommend that the assurance status of the DCC in relation to the SMKI Services should be set at:

(i) approved;

(ii) approved with caveats; or

(iii) not approved; and

(c) be provided to both the DCC and the SMKI PMA promptly upon completion.

4.5 The second stage of the initial assessment shall:

(a) be undertaken by no later than such date as is necessary in order to ensure that an assessment report may be produced in accordance with paragraph (b); and

(b) result in an assessment report to be known as the "**Stage 2 Assurance Report**" in relation to the SMKI Services being produced by the Independent SMKI Assurance Service Provider by no later than such date as the SMKI PMA shall determine.

4.6 The Stage 2 Assurance Report shall:

(a) clearly identify any failure of the DCC to comply with the applicable requirements of the SMKI Document Set;

(b) recommend that the assurance status of the DCC in relation to the SMKI Services should be set at:

(i) approved;

(ii) approved with caveats; or

(iii) not approved; and

(c) be provided to both the DCC and the SMKI PMA promptly upon completion.

PMA: Response to the Initial Assessment

4.7 On receiving either the Stage 1 Assurance Report or Stage 2 Assurance Report, the SMKI PMA shall:

(a) promptly consider that report;

(b) determine that the assurance status of the DCC in relation to the SMKI Services is to be set at:

(i) approved;

(ii) approved with caveats; or

(iii) not approved;

(c) where the SMKI PMA has set the assurance status of the DCC in relation to the SMKI Services at ‘approved with caveats’, state in writing its reasons for considering that it is acceptable for the DCC to:

(i) in the case of the Stage 1 Assurance Report, commence the provision of the SMKI Services; or

(ii) in the case of the Stage 2 Assurance Report, continue to provide the SMKI Services; and

(d) provide a copy of the report (being redacted only in so far as necessary for the purposes of security) and a statement of its determination (and of any reasons accompanying that determination) to all Parties.

4.8 Where the SMKI PMA has set the assurance status of the DCC in relation to the SMKI Services at ‘approved with caveats’ or ‘not approved’ it shall:

(a) require that the DCC submit to it as soon as reasonably practicable a remedial action plan; and

(b) within one month of the submission of that plan, require the DCC to make any changes to it that the SMKI PMA may specify.

DCC: Duty in relation to Remedial Action Plan

4.9 Where the DCC is required to do so in accordance with Part 4.8(a) of this Policy, it shall as soon as reasonably practicable submit to the SMKI PMA a remedial action plan.

4.10 Where the DCC is required by the SMKI PMA in accordance with Part 4.8(b) of this Policy to make changes to the remedial action plan, it may appeal that decision to the Authority and:

(a) the Authority shall determine what changes (if any) shall be made to the remedial action plan; and

(b) the determination of the Authority shall be final and binding for the purposes of the Code.

4.11 The DCC shall implement any remedial action plan subject to any required changes to it specified by:

(a) the SMKI PMA in accordance with Part 4.8(b) of this Policy; or

(b) the Authority in accordance with Part 4.10 of this Policy.

5 PMA: DUTY TO PROVIDE INFORMATION

Initial Assurance Assessment

5.1 The SMKI PMA shall, on request, provide to the Secretary of State and the Authority a copy of:

(a) the Stage 1 Assurance Report received by it in accordance with Part 4.4 of this Policy;

(b) the Stage 2 Assurance Report received by it in accordance with Part 4.6 of this Policy; and

(c) any remedial action plan that the DCC is required to implement in accordance with Part 4.11 of this Policy.

Subsequent Assurance Assessments

5.2 Following any assessment carried out by the Independent SMKI Assurance Service Provider of the compliance of the DCC with the applicable requirements of the SMKI Document Set, the SMKI PMA's determination as to the extent to which the DCC is compliant with those requirements shall be made available by it to:

(a) all Parties;

(b) the Panel;

(c) the Authority; and

(d) on request, the Secretary of State.

5.3 On receiving any subsequent assurance report, the SMKI PMA shall:

(a) promptly consider that report;

(b) determine that the assurance status of the DCC in relation to the SMKI Services is to be set at:

(i) approved;

(ii) approved with caveats; or

(iii) not approved;

(c) where the SMKI PMA has set the assurance status of the DCC in relation to the SMKI Services at ‘approved with caveats’, state in writing its reasons for considering that it is acceptable for the DCC to commence the provision of the SMKI Services; and

(d) provide a summary of any non-compliances and a SMKI PMA statement of its determination (and of any reasons accompanying that determination) to all Parties.

5.4 Where the SMKI PMA has set the assurance status of the DCC in relation to the SMKI Services at ‘approved with caveats’ or ‘not approved’ it shall:

(a) require that the DCC submit to it as soon as reasonably practicable a remedial action plan; and

(b) within one month of the submission of that plan, require the DCC to make any changes to it that the SMKI PMA may specify.

5.5 Where the DCC is required by the SMKI PMA in accordance with Part 5.4 of this Policy to make changes to the remedial action plan, it may appeal that decision to the SEC Panel and:

(a) the SEC Panel shall determine what changes (if any) shall be made to the remedial action plan; and

(b) the determination of the SEC Panel shall be final and binding for the purposes of the Code.

5.6 The DCC shall implement any remedial action plan subject to any required changes to it specified by:

(a) the SMKI PMA in accordance with Part 5.4 of this Policy; or

(b) the SEC Panel in accordance with Part 5.5 of this Policy.

APPENDIX D

SMKI Registration Authority Policies and Procedures

(SMKI RAPP)

Contents

1. Introduction

1.1 Purpose

Section L9.6 of the Code sets out the process for the DCC to develop the SMKI Registration Authority Policies and Procedures (SMKI RAPP) as a SMKI SEC Document as defined in Section L 9.4 (a) (v).

The SMKI RAPP sets out the principal obligations and activities undertaken by the DCC in its capacity as the SMKI Registration Authority in accordance with Section L of the Code, and Appendices A, B and Q of the Code. The SMKI RAPP also sets out the activities undertaken by the SMKI Registration Authority in support of the procedures set out in the DCCKI RAPP, as set out in Section 2 of this document.

2. SMKI Registration Authority obligations to support DCCKI identity verification

The DCCKI RAPP sets out the procedures by which nominated individuals may become DCCKI Senior Responsible Officers and/or DCCKI Authorised Responsible Officers in order to act on behalf of a Party, RDP or a DCC Service Provider in respect of DCCKI Services and the DCCKI Repository Service. The DCCKI RAPP also sets out the activities undertaken by the DCC as DCCKI Registration Authority.

Upon request from the DCCKI Registration Authority to verify the identity of an individual nominated to be a DCCKI SRO or DCCKI ARO, the SMKI Registration Authority shall:

a) arrange a verification meeting with the nominated individual, at a date and time that is mutually agreed;

b) at the verification meeting, verify the individual identity of the nominated individual to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website, or except to the extent that the DCC otherwise notifies the SMKI Registration Authority, to such equivalent level within a comparable authentication framework as may be agreed by the SMKI PMA for the purposes of verification of individuals to become a SMKI SRO or SMKI ARO;

c) following the verification meeting, notify the nominated individual whether the process to verify their individual identity has been successful; and

d) following the verification meeting, notify the DCCKI Registration Authority whether the identity of the individual has been successfully verified.

Provided that the DCC need not repeat these processes in relation to an individual for the purposes of verifying their identity for the purposes of becoming a DCCKI SRO and/or DCCKI ARO where the required verification processes have already been carried out for the purposes of identifying them as being an SMKI SRO and/or SMKI ARO respectively.

The DCC and any Party or RDP may agree that any action taken by either of them prior to the date of the designation of this SMKI RAPP shall, if the equivalent action taken after that date would have satisfied a requirement of this SMKI RAPP for the purposes of appointing a DCCKI ARO or DCCKI SRO, be treated as if it had taken place after that date.

3. SMKI Roles

This SMKI RAPP details the roles of Parties, RDPs, Manufacturers, SECCo and the DCC in the context of access to SMKI Services and/or the SMKI Repository Service as set out in the Code, this SMKI RAPP and the SMKI interface documents. The SMKI RAPP sets out the procedures by which nominated individuals may become Senior Responsible Officers and/or Authorised Responsible Officers in order to act on behalf of a Party, RDP, Manufacturer, SECCo or the DCC (acting in its role as DCC Service Provider) in respect of SMKI Services and the SMKI Repository Service.

This SMKI RAPP also details the obligations in respect of the SMKI Registration Authority and the individuals acting on its behalf as SMKI Registration Authority Managers or SMKI Registration Authority Personnel.

From time to time, the SMKI PMA may require documents or information to be lodged in the SMKI Repository. In such instances, it shall submit a request via the Service Desk and provide such documents and/or information to be lodged in the SMKI Repository. The DCC shall lodge documents and/or information provided to the SMKI Repository, as soon as reasonably practicable following receipt.

3.1 Party, RDP, Manufacturer, SECCo and DCC representatives

Individuals permitted to act as representatives of a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider) are as set out immediately below:

- **Senior Responsible Officer (SRO)**. The process by which an individual is nominated and their authorisation is checked and their identity verified, so as to be an SRO and act on behalf of an organisation is set out in SMKI RAPP Section 5.2. An individual is nominated to become an SRO by a Director or Company Secretary for a Party, RDP, Manufacturer, SECCo or the DCC (for DCC Service Provider personnel). Once an individual has become an SRO, the SRO may at any time nominate individuals to undertake to become Authorised Responsible Officers (AROs) and to access SMKI Services and/or the SMKI Repository Service. An SRO may also nominate themselves to become an ARO as described below.

- **Authorised Responsible Officer (ARO)**. The process by which an individual is nominated, verified and authorised to be an ARO is set out in SMKI RAPP Section 5.3. The means by which AROs are provided with credentials to authenticate access to SMKI Services and/or the SMKI Repository Service is set out in Section 5.4. The DCC shall permit only AROs to act on behalf of a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider) for the purposes of accessing SMKI Services and/or the SMKI Repository Service. Depending upon the processes followed, an ARO may also be authorised to act on behalf of a Party, RDP or the DCC (in its role as DCC Service Provider) to be an Authorised Subscriber for Organisation Certificates, Device Certificates or both, following successful completion of SMKI and Repository Entry Process Tests. All AROs are also permitted to access the SMKI Repository Service on behalf of the organisation that they represent, as set out in the SMKI Repository Interface Design Specification.

Each Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider) that wishes to:

a) become an Authorised Subscriber for Organisation Certificates and/or Device Certificates;

b) become an Authorised Subscriber for an IKI Certificate for the purposes of Digitally Signing of files; or

c) have access only to the SMKI Repository,

shall have at least one ARO successfully appointed (and therefore one SRO).

The DCC shall not be required to repeat processes in relation to an individual for the purposes of verifying their identity for the purposes of becoming an SRO and/or ARO in respect of SMKI Services or the SMKI Repository Service, where the required verification processes have already been carried out for the purposes of identifying them as being a DCCKI SRO and/or DCCKI ARO respectively.

The DCC and any Party or RDP may agree that any action taken by either of them prior to the date of the designation of this SMKI RAPP shall, if the equivalent action taken after that date would have satisfied a requirement of this SMKI RAPP for the purposes of appointing an ARO or SRO or the Party or RDP becoming an Authorised Subscriber, be treated as if it had taken place after that date.

3.2 SMKI Registration Authority representatives

Individuals acting as representatives of the DCC in its role as SMKI Registration Authority are:

- **SMKI Registration Authority Manager**. The process by which a SMKI Registration Authority Manager is nominated, verified, authorised and provided with the means to authenticate their access to SMKI Services and/or the SMKI Repository Service is set out in SMKI RAPP Sections 6.2 and 6.4.

- **SMKI Registration Authority Personnel.** The process by which SMKI Registration Authority Personnel are nominated, verified, authorised and provided with the means to authenticate their access to SMKI Services and/or SMKI Repository is set out in SMKI RAPP Sections 6.3 and 6.4.

The DCC shall ensure that only a SMKI Registration Authority Manager or SMKI Registration Authority Personnel may act on behalf of the DCC in respect of matters relating to the SMKI Registration Authority. Each Party, RDP, Manufacturer, SECCo and the DCC (in its role of DCC Service Provider) shall refrain from dealing with DCC Personnel (including SMKI Registration Authority Managers and SMKI Registration Authority Personnel) other than as directed by the Service Desk for the purposes of submitting Certificate Signing Requests (CSRs) and Certificate Revocation Requests (CRRs).

The DCC, in order to perform its role as SMKI Registration Authority, shall nominate at least two individuals to become a SMKI Registration Authority Manager, each of which will have responsibility for:

a) management of the SMKI Registration Authority function and SMKI Registration Authority Personnel;

b) nomination of individuals to become SMKI Registration Authority Personnel;

c) authentication and verification of SMKI Registration Authority Personnel, as set out in Section 6.3 of this document;

d) provision of the means to authenticate access to SMKI Services and/or the SMKI Repository Service for authorised Party, RDP, Manufacturer or SECCo representatives and DCC Personnel (including SMKI Registration Authority Personnel);

e) managing the process by which documents and information are lodged in the SMKI Repository; and

f) approval of CRRs.

A SMKI Registration Authority Manager may nominate individuals to become SMKI Registration Authority Personnel and to act on behalf of the SMKI Registration Authority as set out in this SMKI RAPP and the Code. The primary responsibilities of SMKI Registration Authority Personnel are:

a) to conduct registration processes as set out in SMKI RAPP Sections 5.1 to 5.5, incorporating:

   i. verification of organisational identity;

   ii. verification and authorisation of individuals nominated to become SROs or AROs, as set out in Section 5.2 and 5.3 of this document;

   iii. provision of the means to authenticate access to SMKI Services and/or the SMKI Repository Service for authorised Party, RDP, Manufacturer, SECCo representatives and DCC personnel; and

   iv. assessment of whether an organisation qualifies to become an Authorised Subscriber for Organisation Certificates and/or Device Certificates.

b) processing and approval (where required) of Certification Signing Requests and processing of Certificate Revocation Requests; and

c) processing of requests for revocation of credentials used to access SMKI Services and/or the SMKI Repository Service.

The DCC shall ensure that SMKI Registration Authority Managers and SMKI Registration Authority Personnel, where required, are available to undertake the obligations in respect of procedures set out in this SMKI RAPP:

a) in respect of the verification, processing and approval of CRRs, on a 24*7 basis; and

b) in respect of all other procedures as set out in this SMKI RAPP, on a Working Day basis and during standard working hours in England.

The DCC and any Party, RDP, Manufacturer or SECCo may agree that any action taken by either of them prior to the date of the designation of this SMKI RAPP shall, if the equivalent action taken after that date would have satisfied a requirement of this SMKI RAPP for the purposes of appointing a SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel, be treated as if it had taken place after that date.

4. Party, RDP, Manufacturer, SECCo and DCC (as DCC Service Provider) registration procedures

4.1 General registration obligations

4.1.1 Organisation, individual, and RA obligations

Each Party, RDP, Manufacturer, SECCo and the DCC (in its role as DCC Service Provider) shall ensure that its nominated representatives wishing to access SMKI Services and/or the SMKI Repository Service shall undertake the procedures and processes as set out in SMKI RAPP Sections 5.1 to 5.5, as appropriate.

To facilitate this, the SMKI Registration Authority shall:

a) make the forms as set out in SMKI RAPP Annex A, available from the DCC Website or via the DCC SharePoint site as advised by the DCC;

b) provide reasonable support and advice to each Party, RDP, Manufacturer, SECCo and DCC Service Providers in relation to the procedures as set out in SMKI RAPP sections 5.1 to 5.5;

c) place no restriction on the number of individuals that can be nominated as SROs or AROs in respect of any Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider);

d) permit an individual to become an ARO to represent multiple parties, by successfully completing the procedures in SMKI RAPP section 5.3 and 5.4 as are necessary;

e) store and maintain records relating to the nomination, verification and authorisation of individuals and organisations (but not the personal details of individuals) as set out Sections 5.1 to 5.5, and in accordance with the Code and the DCC's data retention policy and data protection policy;

f) not permit any nominated individual to access the SMKI Services or relevant the SMKI Repository Service on behalf of a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider) until they have become an ARO;

g) ensure that credentials issued under the IKI Certificate Policy to AROs have a lifetime of ten years and that such credentials and shall cease to be valid after ten years following issuance;

h) for authentication and file signing credentials issued under the IKI Certificate Policy and where the Key Pair and Certificate Signing Request are both generated by the prospective ARO on a Cryptographic Credential Token during the ARO verification meeting, that the prospective ARO has an opportunity to validate and agree information (e.g. role and other organisation and individual identity) against which the Certificate is Issued is accurate and that it reflects the identity of the ARO or system that is the subject of the Certificate;

i) for authentication and file signing credentials issued under the IKI Certificate Policy and which are delivered to the SMKI Registration Authority in the form of a Certificate Signing Request generated by the prospective ARO's organisation and provided by the prospective ARO during the ARO verification meeting, that the prospective ARO has an opportunity to validate the information in the resulting Certificate reflects that provided in the Certificate Signing Request and that it is accurate and reflects the identity of the prospective ARO or system that is the subject of the Certificate;

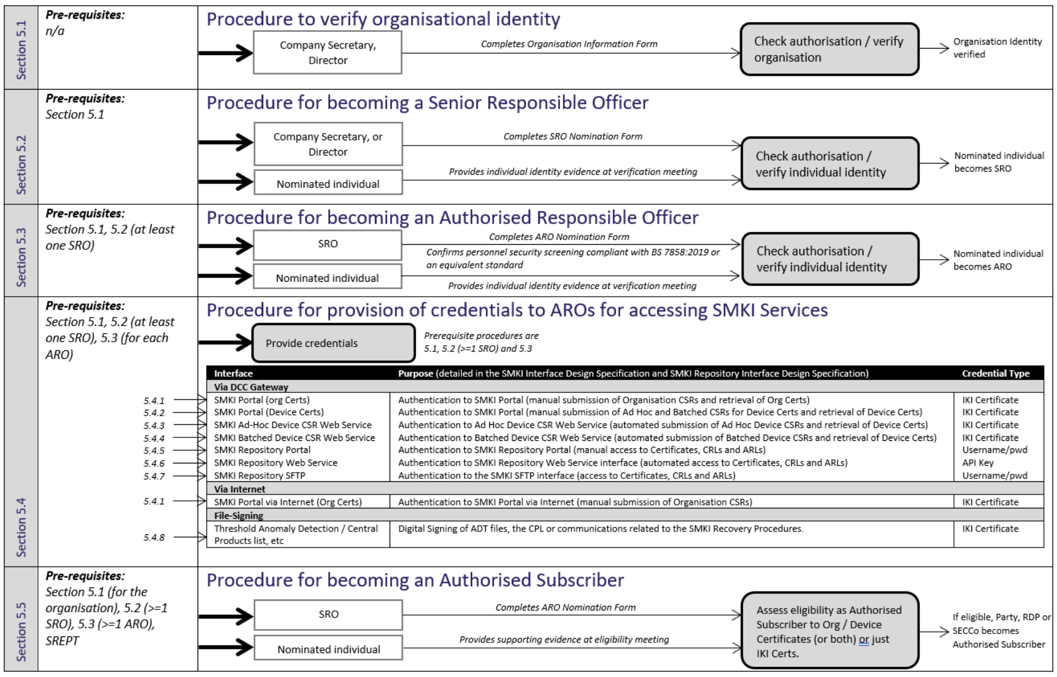
j) for authentication credentials not issued under the IKI Certificate Policy, shall ensure that such authentication credentials remain valid until revoked; and

k) produce, each month, and make available to each Party, RDP, Manufacturer and SECCo, a report for that organisation which details the list of SROs, AROs, the credentials that have been issued to each ARO and those AROs for which credentials will expire in the following month.

4.1.2 High level overview of SMKI Registration Authority procedures

Figure 1 as set out immediately below provides a high level view of the procedures required in order for a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider) to:

- verify their organisational identity;
- become an SRO;
- become an ARO;
- gain credentials for accessing SMKI Services and/or the SMKI Repository Service;
- become an Authorised Subscriber for:
  - Organisation Certificates or Device Certificates, or both;
  - a File Signing Certificate (issued under the IKI Certificate Policy) for the purposes of verifying Digital Signatures of files in accordance with the Code;
- gain access to Organisation Certificates and/or Device Certificates and other material via the SMKI Repository; and
- gain access to File Signing Certificates, and their corresponding Private Keys to be used for the purposes of Digitally Signing files.



Section 5.1
Pre-requisites:
n/a
Procedure to verify organisational identity
Company Secretary, Director
Completes Organisation Information Form
Check authorisation / verify organisation
Organisation Identity verified
Section 5.2
Pre-requisites:
Section 5.1
Procedure for becoming a Senior Responsible Officer
Company Secretary, or Director
Completes SRO Nomination Form
Nominated individual
Provides individual identity evidence at verification meeting
Check authorisation / verify individual identity
Nominated individual becomes SRO
Section 5.3
Pre-requisites:
Section 5.1, 5.2 (at least one SRO)
Procedure for becoming an Authorised Responsible Officer
SRO
Completes ARO Nomination Form
Confirms personnel security screening compliant with BS 7858:2019 or an equivalent standard
Nominated individual
Provides individual identity evidence at verification meeting
Check authorisation / verify individual identity
Nominated individual becomes ARO
Section 5.4
Pre-requisites:
Section 5.1, 5.2 (at least one SRO), 5.3 (for each ARO)
Procedure for provision of credentials to AROs for accessing SMKI Services
Provide credentials
Prerequisite procedures are 5.1, 5.2 (>=1 SRO) and 5.3
5.4.1
5.4.2
5.4.3
5.4.4
5.4.5
5.4.6
5.4.7
5.4.1
5.4.8
Section 5.5
Pre-requisites:
Section 5.1 (for the organisation), 5.2 (>=1 SRO), 5.3 (>=1 ARO), SREPT
Procedure for becoming an Authorised Subscriber
SRO
Completes ARO Nomination Form
Nominated individual
Provides supporting evidence at eligibility meeting
Assess eligibility as Authorised Subscriber to Org / Device Certificates (or both) or just IKI Certs.
If eligible, Party, RDP or SECCo becomes Authorised Subscriber

Interface	Purpose (detailed in the SMKI Interface Design Specification and SMKI Repository Interface Design Specification)	Credential Type
Via DCC Gateway		
SMKI Portal (org Certs)	Authentication to SMKI Portal (manual submission of Organisation CSRs and retrieval of Org Certs)	IKI Certificate
SMKI Portal (Device Certs)	Authentication to SMKI Portal (manual submission of Ad Hoc and Batched CSRs for Device Certs and retrieval of Device Certs)	IKI Certificate
SMKI Ad-Hoc Device CSR Web Service	Authentication to Ad Hoc Device CSR Web Service (automated submission of Ad Hoc Device CSRs and retrieval of Device Certs)	IKI Certificate
SMKI Batched Device CSR Web Service	Authentication to Batched Device CSR Web Service (automated submission of Batched Device CSRs and retrieval of Device Certs)	IKI Certificate
SMKI Repository Portal	Authentication to SMKI Repository Portal (manual access to Certificates, CRLs and ARLs)	Username/pwd
SMKI Repository Web Service	Authentication to SMKI Repository Web Service interface (automated access to Certificates, CRLs and ARLs)	API Key
SMKI Repository SFTP	Authentication to the SMKI SFTP interface (access to Certificates, CRLs and ARLs)	Username/pwd
Via Internet		
SMKI Portal via Internet (Org Certs)	Authentication to SMKI Portal via Internet (manual submission of Organisation CSRs)	IKI Certificate
File-Signing		
Threshold Anomaly Detection / Central Products list, etc	Digital Signing of ADT files, the CPL or communications related to the SMKI Recovery Procedures.	IKI Certificate

Figure 1: Overview of SMKI access registration processes

- SMKI RAPP Section 5.1 sets out the procedure and detailed processes for confirming the role of the nominating individual and verifying the organisational identity of the Party, RDP, Manufacturer, SECCo or DCC Service Provider, which shall be conducted where its identity has not previously been established.

- SMKI RAPP Section 5.2 sets out the procedure and detailed processes for verifying the identity of an individual nominated to become an SRO. The DCC shall ensure that an individual cannot become an SRO until the organisational identity of the applicant has been verified.

- SMKI RAPP Section 5.3 sets out the procedure and detailed processes for verifying the identity of an individual nominated to become an ARO. The DCC shall ensure that an individual cannot become an ARO until the organisation has at least one SRO and the organisational identity of the applicant has been verified.

- Once an individual has become an ARO, SMKI RAPP Section 5.4 sets out the procedure and detailed processes by which the appropriate credentials used to access SMKI Services and/or the SMKI Repository Service are provided to AROs.

- Where an applicant wishes to be an Authorised Subscriber for Organisation Certificates or Device Certificates or both, Section 5.5 of the SMKI RAPP sets out the procedure and detailed processes by which the DCC determines if the applicant is eligible to become an Authorised Subscriber for such Organisation Certificates or Device Certificates or both.

In respect of the procedures and detailed processes set out in SMKI RAPP Sections 5.1 to 5.5, the DCC shall place no restriction on the number of forms that can be submitted by an individual Party, RDP, Manufacturer, SECCo or the DCC. Where reasonably practicable, the DCC shall conduct the procedures as set out in SMKI RAPP Sections 5.1 to 5.5 such that where multiple forms are submitted at the same time, multiple procedures can be conducted via a video link by the applicant's nominated individuals.

4.1.3 Change of details

If there is a change to any of the information used to verify the organisational identity of any Party, RDP, Manufacturer, SECCo or a DCC Service Provider (acting on behalf of the DCC), an SRO shall advise the Service Desk of the change and shall ensure that the procedure and detailed processes as set out in SMKI RAPP Section 5.1 is undertaken in respect of the revised evidence of identity, as soon as is reasonably practicable after the change occurs.

If there is a material change to any of the information used to verify the identity of any SRO or ARO, an SRO shall:

a) advise the Service Desk of the change;

b) where required to do so by the SMKI Registration Authority, check the name and address of an ARO before issuing a replacement token, ensure that its SRO or ARO undertakes the procedures as set out in SMKI RAPP Sections 5.2 or 5.3 in respect of the revised evidence of identity, as soon as is reasonably practicable after a material change occurs; and

c) where necessary, for an ARO ensure that credentials used to access SMKI Services and/or the SMKI Repository Service are revoked as set out in SMKI RAPP Section 8.3.

No Party, RDP, Manufacturer, SECCo or the DCC (acting as DCC Service Provider) shall unreasonably withhold information that is required by the SMKI Registration Authority in order to perform the procedures as set out in SMKI RAPP Sections 5.1 to 5.5.

4.1.4 Director or Company Secretary ceasing to be eligible to act on behalf of a Party, RDP, Manufacturer or SECCo

Where Director or Company Secretary ceases to be eligible to act on behalf of a Party, RDP, Manufacturer or SECCo in respect of the procedures set out in the SMKI RAPP:

a) the Director or Company Secretary themselves, or a Senior Responsible Officer (SRO) whose identity has previously been verified by the DCC, shall advise the Service Desk of the change;

b) the DCC shall confirm such information from the relevant Nominee Details Form, in order to provide confidence that the request is from a Director, Company Secretary or SRO; and

c) if b) is successful, the DCC shall update the DCC’s records of authorised individuals for the Party, RDP, Manufacturer or SECCo and shall no longer consider the individual to be able to act on behalf of that Party, RDP, Manufacturer or SECCo.

4.1.5 SROs ceasing to be eligible to act on behalf of a Party, RDP, Manufacturer or SECCo

Where an SRO ceases to be eligible to act on behalf of a Party, RDP, Manufacturer or SECCo in respect of the procedures set out in the SMKI RAPP:

a) the SRO themselves, or a Director, Company Secretary or SRO whose identity has previously been verified by the DCC, shall advise the Service Desk of the change;

b) the DCC shall confirm such information from the relevant Nominee Details Form, in order to provide confidence that the request is from an SRO, Director or Company Secretary; and

c) if b) is successful, update the DCC's records of authorised individuals for the Party, RDP, Manufacturer or SECCo and shall no longer consider the individual to be able to act on behalf of that Party, RDP, Manufacturer or SECCo.

5. Detailed Party, RDP, Manufacturer, SECCo and DCC (as DCC Service Provider) registration procedures and processes

Each Party, RDP, Manufacturer, SECCo and DCC (in its role as DCC Service Provider) shall ensure that its nominated representatives wishing to access SMKI Services and/or the SMKI Repository Service shall undertake the procedures and processes as set out in SMKI RAPP Sections 5.1 to 5.5, as appropriate.

5.1 Procedure and processes to verify organisational identity

The processes as detailed immediately below shall be conducted by the SMKI Registration Authority in order to verify the organisational identity of a Party, RDP, Manufacturer, SECCo or DCC Service Provider (acting on behalf of the DCC).

Step	When	Obligation	Responsibility	Next Step
5.1.1	As required	The applicant organisation shall complete the Organisation Information Form, as set out in SMKI RAPP Annex A (A1). In doing so, the applicant organisation shall ensure that: a. the information entered on the form is complete and accurate; b. the EUI-64 Compliant identifier range for any particular User Role is defined by the applicant organisation such that the range is continuous and does not overlap with	Director or Company Secretary, on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC Service Provider	5.1.2

		the EUI-64 Compliant identifier range for any other User Role, other than where a particular EUI-64 Compliant identifier is allowed to be used for more than one User Role in accordance with H1.5; and c. the Organisation Information Form is authorised by a Director or Company Secretary on behalf of the applicant organisation. The applicant organisation shall also complete the Nominee Details Form, as set out in SMKI RAPP Annex A (A5), for the Director or Company Secretary that has authorised the Organisation Information Form. In doing so, the applicant organisation shall ensure that the information entered on the form is complete and accurate.		
5.1.2	As required, following 5.1.1	Submit the completed Organisation Information Form and Nominee Details Form to the SMKI Registration Authority,	Director or Company Secretary, on behalf of the applicant organisation,	5.1.3

		in writing, as directed on the DCC Website.	which shall be a Party, RDP, Manufacturer, SECCo or DCC Service Provider	
5.1.3	As soon as reasonably practicable following receipt of completed Organisation Information Form	Acknowledge receipt by email to the Director or Company Secretary that has authorised the Organisation Information Form.	Service Desk	5.1.4
5.1.4	As soon as reasonably practicable following 5.1.3	Confirm that the nominating Director or Company Secretary holds such a position within the application organisation, via a public information source. Analyse the information entered on the Organisation Information Form and Nominee Details Form, to determine completeness, discrepancies and whether the submitted EUI-64 Compliant identifier ranges are consistent with the restriction set out in step 5.1.1. Where there are omissions/discrepancies or the submitted identifier ranges are not consistent with the restriction set out in step 5.1.1, the SMKI Registration Authority shall agree actions and/or amendments, via email, with the Director or Company Secretary that has authorised the Organisation Information Form.	SMKI Registration Authority Personnel	If complete, accurate and no discrepancies, 5.1.6; if not complete and accurate or any discrepancies, 5.1.5
5.1.5	Once omissions / discrepancies addressed	Submit a revised Organisation Information Form and/or Nominee Details Form to the SMKI Registration Authority, or in writing as directed on the DCC Website.	Director or Company Secretary, on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC Service Provider	5.1.3

5.1.6	As soon as reasonably practicable, following 5.1.4	Agree with the applicant organisation and confirm, by email, the date and time of a meeting to verify the organisation identity to the Director, or Company Secretary that has signed the Organisation Information Form. The meeting shall be held via a video link or face to face if preferred.	SMKI Registration Authority	5.1.7
5.1.7	As soon as reasonably practicable on becoming aware of unavailability	If it is identified that SMKI Registration Authority Personnel will be unavailable to conduct the verification meeting on the agreed date and time, the SMKI Registration Authority shall inform the applicant Director or Company Secretary by email, and shall agree and confirm an alternative date and time. If it is identified that the individual(s) acting on behalf of the applicant organisation will be unavailable to attend the verification meeting on the agreed date and time, the individual(s) shall inform the SMKI Registration Authority, by email, and shall agree and confirm an alternative date and time.	SMKI Registration Authority or applicant organisation, as appropriate	5.1.8
5.1.8	In meeting to verify organisational identity	Verify: a. the organisational identity of the applicant organisation to the level pursuant to the SMKI PMA Guidance on "Verifying Organisation Identity" published on the Website; b. via information held by SECCo, that the applicant organisation has the User Role or User Roles as specified in Organisation Information Form; c. proof of individual identity provided for the nominating individual against the information listed on the Organisation Information Form and the Nominee Details Form; and d. the individual identity of the nominating individual to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.	SMKI Registration Authority Personnel	If not successful, 5.1.9; if successful, 5.1.10
5.1.9	As soon as reasonably practicable, following 5.1.8	If verification in 5.1.8 is unsuccessful, notify the nominating Director, Company Secretary or SRO that verification of the organisational identity has been unsuccessful, by email.	SMKI Registration Authority Personnel	5.1.5 once issues addressed

5.1.10	As soon as reasonably practicable, following 5.1.8	If verification in 5.1.8 is successful, inform the nominating Director or Company Secretary that the organisational identity has been successfully verified, by email.	SMKI Registration Authority	5.1.11
5.1.11	As soon as reasonably practicable, following 5.1.10	Add the verified organisation to the DCC's list of such organisations, in accordance with Section 4.1.2 (A) (ii) of Appendix A to the Code and Section 4.1.2 (A) (ii) of Appendix B to the Code.	SMKI Registration Authority	End of procedure

5.2 Procedure for becoming a Senior Responsible Officer

The procedure as detailed immediately below shall be conducted by the SMKI Registration Authority in order to check the authorisation and verify the identity of any individual that has been nominated to become a Senior Responsible Officer in respect of that Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider).

Step	When	Obligation	Responsibility	Next Step
5.2.1	As required	Complete the SMKI SRO Nomination Form and Nominee Details Form, as set out in SMKI RAPP Annex A (A3) and Annex A (A5). In doing so, the individual completing the SMKI SRO Nomination Form and Nominee Details Form shall ensure that the information entered on the forms is complete and accurate, and that: a. the nominating individual is for a Party, RDP, Manufacturer, SECCo or the DCC (as DCC Service Provider), a Director of, or Company Secretary of and an employee of, the applicant organisation or its parent organisation; and b. the SMKI SRO Nomination Form and Nominee Details Form are both authorised, where applicable, by a Director or Company Secretary on behalf of the applicant organisation.	Director or Company Secretary, on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider).	5.2.2
5.2.2	As required, following 5.2.1	Submit the completed SMKI SRO Nomination Form and Nominee Details Form to the SMKI Registration Authority, in writing, as	Director or Company Secretary, on behalf of the applicant organisation,	5.2.3

		directed on the DCC Website.	which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider).	
5.2.3	As soon as reasonably practicable following receipt of completed SRO Nomination Form	Acknowledge receipt to the Director or Company Secretary that has authorised the SMKI SRO Nomination Form.	Service Desk	5.2.4
5.2.4	As soon as reasonably practicable following 5.2.3	Analyse the information entered on the SMKI SRO Nomination Form and Nominee Details Form, to: a. determine completeness and any discrepancies; and b. confirm, using the DCC's records or using publicly available information, that the Director or Company Secretary that has authorised the SMKI SRO Nomination Form has the role indicated on the SMKI SRO Nomination Form. Where there are omissions/discrepancies, agree actions with the nominating individual, via email.	SMKI Registration Authority Personnel	If complete, 5.2.6; if not complete, 5.2.5
5.2.5	Once omissions / discrepancies addressed	Submit a revised SMKI SRO Nomination Form and/or Nominee Details Form to the SMKI Registration Authority, in writing as directed on the DCC Website.	Director or Company Secretary, on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider).	5.2.3

5.2.6	As soon as reasonably practicable, following 5.2.4	If the SMKI Registration Authority has any questions about the information submitted, contact the Director or Company Secretary that nominated the individual, via telephone, using the telephone number provided previously in the SMKI SRO Nomination Form, to confirm whether each nominated individual on the SMKI SRO Nomination Form is authorised to act on behalf of the organisation as SRO and seek confirmation of information provided on the SMKI SRO Nomination Form in order to provide confidence that the correct person has been contacted.	SMKI Registration Authority Personnel	If confirmed as authorised, 5.2.8; if not confirmed as authorised, 5.2.7
5.2.7	As soon as reasonably practicable following rejection	Inform the applicant organisation that the application to become a Senior Responsible Officer has not been successful, by email to the Director or Company Secretary that has authorised the SMKI SRO Nomination Form.	SMKI Registration Authority Personnel	5.2.6 once issues resolved
5.2.8	As soon as reasonably practicable, following 5.2.6	Agree, via email with the individual nominated to become a Senior Responsible Officer, a date and time for the nominated individual(s) to attend a face to face verification meeting in person or by video link.	SMKI Registration Authority Personnel	5.2.9
5.2.9	As soon as reasonably practicable on becoming aware of unavailability	If it is identified that SMKI Registration Authority Personnel will be unavailable to conduct the verification meeting on the agreed date and time, the SMKI Registration Authority shall inform the nominated individual, and shall agree and confirm an alternative date and time. If it is identified that the individual(s) nominated to act on behalf of the applicant organisation will be unavailable to attend the verification meeting on the agreed date and time, the nominated individual shall inform the SMKI Registration Authority, by email and telephone, and shall agree and confirm an alternative date and time.	SMKI Registration Authority or applicant organisation, as appropriate	5.2.10
5.2.10	In SRO verification meeting	At the face-to-face SRO verification meeting in person or by video link, the SMKI Registration Authority shall, in person: a. check proof of individual identity provided for each nominated individual against the information listed on the SRO Nomination Form and the	SMKI Registration Authority	If not successfully verified, 5.2.11; if successfully verified, 5.2.12

		Nominee Details Form; and b. verify the individual identity for each nominated individual to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.		
5.2.11	As soon as reasonably practicable, following verification meeting	Notify the Director or Company Secretary in writing, that the nominated individual(s) has not been verified successfully and has not become a Senior Responsible Officer on behalf of the applicant organisation.	SMKI Registration Authority	5.2.5 once issues addressed
5.2.12	As soon as reasonably practicable, following verification meeting	Notify the Director or Company Secretary in writing, that the nominated individual(s) has become a Senior Responsible Officer on behalf of the applicant organisation.	SMKI Registration Authority	5.2.13
5.2.13	As soon as reasonably practicable, 5.2.12	Add the relevant SRO to the DCC's list of SROs, in accordance with Section 4.1.2 (A) (ii) of Appendix A to the Code and Section 4.1.2 (A) (ii) of Appendix B to the Code.	SMKI Registration Authority	End of Procedure

5.3 Procedure for becoming an Authorised Responsible Officer

The procedure as detailed immediately below shall be conducted by the SMKI Registration Authority in order to check the authorisation and verify the identity of any individual that has been nominated to become an Authorised Responsible Officer in respect of that Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider).

Step	When	Obligation	Responsibility	Next Step
5.3.1	As required	Complete the SMKI ARO Nomination Form and Nominee Details Form as set out in SMKI RAPP Annex A (A4) and Annex A (A5), ensuring that; a. the information entered on the forms is complete and	SRO on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider)	5.3.2

		accurate; b. the SMKI ARO Nomination Form and Nominee Details Form are authorised by an SRO on behalf of the applicant organisation; and c. the SRO has confirmed that the SMKI ARO Nominee has been subject to a standard that is compliant with BS 7858:2019 or an equivalent standard.		

5.3.2	As required, following 5.3.1	Submit the completed SMKI ARO Nomination Form and Nominee Details Form to the SMKI Registration Authority in writing, as directed on the DCC Website.	SRO on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider)	5.3.3

5.3.3	As soon as reasonably practicable following receipt of completed ARO Nomination Form and Nominee Details Form	Acknowledge receipt by email to the SRO as identified on the SMKI ARO Nomination Form.	Service Desk	5.3.4

5.3.4	As soon as reasonably	Analyse the information entered on the SMKI ARO Nomination Form and Nominee Details	SMKI Registration Authority	If complete,

	practicable following 5.3.3	Form; determine completeness and any discrepancies. Where there are omissions/discrepancies, agree actions with the SRO via email.		5.3.6; if not complete, 5.3.5
5.3.5	Once omissions / discrepancies are addressed	Submit a revised SMKI ARO Nomination Form and/or Nominee Details Form to the Registration Authority in writing as directed on the DCC Website.	SRO on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider)	5.3.3
5.3.6	As soon as reasonably practicable, following 5.3.4	If the SMKI Registration Authority has any questions about the information submitted, contact an SRO of the applicant organisation via telephone, using the registered contact information for the SRO as held by the SMKI Registration Authority, to confirm whether the nominated individual is authorised to become an ARO.	SMKI Registration Authority	If confirmed as authorised, 5.3.8; if not authorised, 5.3.7
5.3.7	As soon as reasonably practicable following rejection	Notify the individual and an SRO that the procedure for becoming an ARO has not been successful for relevant nominated individual, by email.	SMKI Registration Authority	5.3.5 once issues addressed
5.3.8	As soon as reasonably practicable, following 5.3.6	Agree with the applicant organisation and confirm the date and time for the ARO verification meeting, via email to the nominated individual and an SRO of the applicant organisation.	SMKI Registration Authority	5.3.9
5.3.9	As soon as reasonably practicable on becoming aware of unavailability	If it is identified that SMKI Registration Authority Personnel will be unavailable to conduct the verification meeting on the agreed date and time, the SMKI Registration Authority shall inform an SRO and the nominated individual, by email, and shall agree and confirm an alternative date and time. If it is identified that the nominated individual(s) acting on behalf of the applicant organisation will be unavailable to attend the verification meeting on the agreed date and time, an SRO shall inform the SMKI Registration Authority, by	SMKI Registration Authority or applicant organisation, as appropriate	5.3.10

		email, and shall agree and confirm an alternative date and time.		
5.3.10	In ARO verification meeting	At the ARO face-to-face verification meeting, the SMKI Registration Authority shall, in person, for the nominated individual: a. check proof of individual identity provided against the information listed on the ARO Nomination Form and Nominee Details Form; and b. verify the identity of the nominated individual to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.	SMKI Registration Authority	If verified, 5.3.12; if not verified, 5.3.11
5.3.11	As soon as reasonably practicable, following ARO verification meeting	Notify: a. the nominated individual that they have become an ARO, verbally; or b. in writing to the SRO, that the verification has not been successful for the nominated individual, that the nominated individual has not become an ARO, and provide reasons for the rejection and request that the nominated individual is required to attend a further ARO verification meeting once the issues have been remedied.	SMKI Registration Authority	If successful, 5.3.12; otherwise 5.3.5 once issues are addressed
5.3.12	As soon as reasonably practicable, following ARO verification meeting	Ensure that the applicant organisation is notified of the individuals whose identity has been verified and have become AROs by email or via the Service Desk updating the relevant ticket, ensuring that there is a record for audit purposes.	SMKI Registration Authority or Service Desk	5.3.13
5.3.13	As soon as reasonably practicable, following 5.3.12	Add the relevant individual to the DCC's list of AROs, in accordance with Section 4.1.2 (A) (ii) of Appendix A to the Code and Section 4.1.2 (A) (ii) of Appendix B to the Code.	SMKI Registration Authority	Procedure as set out in SMKI RAPP section 5.5

5.4 Procedure for provision of credentials to AROs for accessing SMKI Services and the SMKI Repository Service and file signing

The procedure and processes as detailed immediately below shall be conducted by the SMKI Registration Authority in order to provide credentials for accessing SMKI Services and/or the SMKI Repository Service or for file signing to Authorised Responsible Officers in respect of a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider). The SMKI Registration Authority shall not provide such credentials to an individual on behalf of a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider), other than where the organisation has completed SMKI and Repository Entry Process Tests and such individuals have become Authorised Responsible Officers.

Step	When	Obligation	Responsibility	Next Step
5.4.1	During ARO verification meeting and after becoming an ARO	**IKI credentials for submission of CSRs in respect of Organistion Certificates using SMKI Portal via DCC Gateway Connection or SMKI Portal via the Internet** If the applicant has indicated on the Authorised Subscriber application form that it wishes to be an Authorised Subscriber for Organisation Certificates and/or Device Certificates, and where the Party, RDP, Manufacturer, SECCo or DCC Service Provider has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall, if the ARO wishes to access the SMKI Portal interface, provide the ARO with: a. If the	SMKI Registration Authority	5.4.2

		applicant organisation has access to a DCC Gateway Connection, one Cryptographic Credential Token containing credentials issued under the applicable IKI Certification Authority that authenticate the ARO to access the SMKI Portal Interface for the purposes of submission of CSRs in respect of Organisation Certificates and retrieval of corresponding Organisation Certificates via a DCC Gateway Connection. The DCC shall ensure that the Cryptographic Credential Token enables the ARO to set a PIN code which shall be used each		

		time the Cryptographic Credential Token is used, to render the Cryptographic Credential Token operative. Such credentials shall not allow the ARO to access the SMKI Portal Interface via the Internet. b. If the applicant organisation does not have access to a DCC Gateway Connection, one Cryptographic Credential Token containing credentials issued under the applicable IKI Certification Authority that authenticate the ARO to access the SMKI Portal Interface via the Internet for the purposes of submission of CSRs in respect of		

		Organisation Certificates and retrieval of corresponding Organisation Certificates. The DCC shall ensure that the Cryptographic Credential Token enables the ARO to set a PIN code which shall be used each time the Cryptographic Credential Token is used, to render the Cryptographic Credential Token operative. Such credentials shall not allow the ARO to access the SMKI Portal Interface via a DCC Gateway Connection. Where the Party, RDP, Manufacturer, SECCo or DCC (in its role as DCC Service Provider) has not successfully completed SMKI and Repository Entry Process Tests, the DCC shall retain such		

		Cryptographic Credential Token until such time as the Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider) has successfully completed SMKI and Repository Entry Process Tests, at which point the DCC shall send such Cryptographic Credential Token to the ARO via secure courier.		

5.4.2	During ARO verification meeting and after becoming an ARO	**IKI credentials for submission of CSRs in respect of Device Certificates using SMKI Portal via DCC Gateway Connection** If the applicant has indicated on the Authorised Subscriber application form that it wishes to be an Authorised Subscriber for Device Certificates, the Registration Authority shall determine, in accordance with the steps set out in Section 5.5 of the SMKI RAPP, whether there is reasonable evidence to suggest that it is necessary for the applicant organisation to become an Authorised Subscriber for Device Certificates in order for them to carry out business processes that will, or are likely to, lead to the installation of Devices in premises. Where there is such reasonable evidence, and where the applicant organisation has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall, if the ARO wishes to access the SMKI Portal Interface, provide the ARO with: a. If the applicant organisation has access to a DCC Gateway Connection, one Cryptographic Credential Token containing credentials issued under the applicable IKI Certification Authority that authenticate the ARO to access the SMKI Portal Interface for the purposes of submission of CSRs in respect of Device Certificates and retrieval of corresponding Device Certificates via a DCC Gateway Connection. The DCC shall ensure that the Cryptographic	SMKI Registration Authority	5.4.3

		Credential Token enables the ARO to set a PIN code which shall be used each time the Cryptographic Credential Token is used, to render the Cryptographic Credential Token operative. Such credentials shall not allow the ARO to access the SMKI Portal Interface via the Internet. Where the Party, RDP or DCC (in its role as DCC Service Provider) has not successfully completed SMKI and Repository Entry Process Tests, the DCC shall retain such Cryptographic Credential Token until such time as the Party, RDP or DCC (as DCC Service Provider) has successfully completed SMKI and Repository Entry Process Tests, at which point the DCC shall send such Cryptographic Credential Token to the ARO via secure courier.		

5.4.3	During ARO verification meeting and after becoming an ARO	**IKI credentials for Ad Hoc Device CSR Web Service** If the applicant has indicated on the Authorised Subscriber application form that it wishes to be an Authorised Subscriber for Device Certificates and it wishes to use the Ad Hoc Device CSR Web Service, the SMKI Registration Authority shall, if the applicant organisation has access to a DCC Gateway Connection and is a Supplier Party or the DCC, and where the Supplier Party or DCC (in its role as DCC Service Provider) has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall provide the ARO, via USB token or optical media, with Ad Hoc Device CSR Web Service access credentials for Device Certificates, which corresponds with a CSR that shall be provided, via USB token or optical media, by the applicant organisation in accordance with the SMKI Interface Design Specification, sections 2.4 xv, xvi & xvii. If the Supplier Party or DCC (in its role as DCC Service Provider) has not successfully completed SMKI and Repository Entry Process Tests at the time of the verification meeting, once the Supplier Party or DCC (as DCC Service Provider) has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall provide, on a USB token or optical media via secure courier or by secured electronic means, the appointed ARO with Ad	SMKI Registration Authority	5.4.4

		Hoc Device CSR Web Service access credentials for Device Certificates, which corresponds with a CSR that shall be provided by the applicant organisation in accordance with the SMKI Interface Design Specification.		
5.4.4	During ARO verification meeting and after becoming an ARO	**IKI credentials for Batched Device CSR Web Service** If the applicant has indicated on the Authorised Subscriber application form that it wishes to be an Authorised Subscriber for Device Certificates and it wishes to use the Batched Device CSR Web Service, the SMKI Registration Authority shall determine, if the applicant organistaion has access to a DCC Gateway Connection and the applicant is not a Supplier Party or the DCC, in accordance with the steps set out in Section 5.5 of the SMKI RAPP, whether there is reasonable evidence to suggest that it is necessary for the applicant organisation to become an Authorised Subscriber for Device Certificates in order for them to carry out business processes that will, or are likely to, lead to the installation of Devices in premises. Where there is such reasonable evidence, and where the applicant organisation has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall provide the appointed ARO, via USB token or optical media, with Batched Device CSR Web Service access credentials for Device Certificates, which shall be Issued by the DCC in response to a valid CSR that shall be provided by the applicant organisation in accordance with the SMKI Interface Design Specification, sections 2.5 xxvi & xxvii. If the applicant organisation has not successfully completed SMKI and Repository Entry Process Tests at the time of the verification meeting, once the applicant organisation has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall provide, on a USB token or optical media via secure courier or by secured electronic means, the appointed ARO with Batched Device CSR Web Service access credentials for Device Certificates, which corresponds with a CSR that shall be provided by the applicant organisation in accordance with the SMKI Interface Design Specification.	SMKI Registration Authority	5.4.5

5.4.5	During ARO verification meeting and after becoming an ARO	**Credentials for SMKI Repository portal** If the applicant organisation has access to a DCC Gateway Connection, and it wishes to access the SMKI Repository via the SMKI Repository Portal and has successfully completed SMKI and Repository Entry Process Tests, provide the appointed ARO with a username and password, to be accessed via the SMKI Repository Portal, that is specific to the Authorised Responsible Officer, for the purposes of authenticating to the SMKI Repository Portal via DCC Gateway Connection, as set out in the SMKI Repository Interface Design Specification, section 2.1.2. If the applicant organisation has access to a DCC Gateway Connection, it wishes to access the SMKI Repository via the SMKI Repository Portal but has not successfully completed SMKI and Repository Entry Process Tests at the time of the verification meeting: a. DCC shall, once the applicant organisation has successfully completed SMKI and Repository Entry Process Tests, provide the appointed ARO with a username and password via secured electronic means that is specific to the Authorised Responsible Officer, for the purposes of authenticating to the SMKI Repository Portal via DCC Gateway Connection, as set out in the SMKI Repository Interface Design Specification, section 2.1.2.	SMKI Registration Authority	5.4.6

5.4.6	During ARO verification meeting and after becoming an ARO	**Credentials for SMKI Repository web service** If the applicant organisation has access to a DCC Gateway Connection, and wishes to access the SMKI Repository Web Service interface and has successfully completed SMKI and Repository Entry Process Tests, provide the ARO with the credentials required to authenticate to the SMKI Repository Web Service interface, as set out in the SMKI Repository Interface Specification section 2.2.1, along with a certificate which enables verification of the SMKI Repository Web Service server identity. If the applicant organisation has access to a DCC Gateway Connection, wishes to access the SMKI Repository Web Service interface but has not successfully completed SMKI and Repository Entry Process Tests at the time of the	SMKI Registration Authority	5.4.7

		verification meeting, once the applicant organisation has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall provide, on electronic media as set out in the "SMKI Repository User Guide", the ARO with the credentials required to authenticate to the SMKI Repository Web Service interface, as set out in the SMKI Repository Interface Design Specification section 2.2.1.		
5.4.7	During ARO verification meeting and after becoming an ARO	**Credentials for SMKI Repository Portal SFTP** If the applicant organisation has access to a DCC Gateway Connection, wishes to access the SMKI Repository using SSH File Transfer Protocol (SFTP) access credentials and has successfully completed SMKI and Repository Entry Process Tests, provide the ARO with credentials, in the form of a username and password, used to access the SSH File Transfer Protocol (SFTP) interface, as set out in the SMKI Repository Interface Design Specification section 2.3.1. If the applicant organisation has access to a DCC Gateway Connection, wishes to access the SMKI Repository using SSH File Transfer Protocol (SFTP) access credentials but has not successfully completed SMKI and Repository Entry Process Tests at the time of the verification meeting, once the applicant organisation has successfully completed SMKI and Repository Entry Process Tests, the SMKI Registration Authority shall provide the ARO, via the SMKI Repository Portal profile page, with credentials, in the form of a username and password, used to access the SSH File Transfer Protocol (SFTP) interface, as set out in the SMKI Repository Interface Design Specification section 2.3.1.	SMKI Registration Authority	5.4.8
5.4.8	During ARO verification meeting and after becoming an ARO	**IKI credentials for file signing** If the applicant organisation wishes the ARO to be Issued with a File Signing Certificate for the purposes as set out in the Code, the SMKI Registration Authority shall either: a. provide the ARO with a Cryptographic Credential Token enabling the ARO to submit a CSR for a File Signing Certificate; in which case, the ARO shall use the software on the Cryptographic	SMKI Registration Authority	5.4.9

		Credential Token to generate a Private Key for a File Signing Certificate to submit a CSR for a File Signing Certificate; and if the CSR is valid, the ICA shall Issue a File Signing Certificate under the IKI Certificate Policy, to be used for the purposes as set out in the Code; or b. provide the appointed ARO, via USB token or optical media, with an IKI File Signing Certificate, which shall be Issued by the DCC in response to a valid CSR that shall be provided by the applicant organisation.		
5.4.9	During ARO verification meeting and after issuance of credentials	**Acceptance of credentials issued in steps 5.4.1 to 5.4.8** The SMKI Registration Authority shall complete the relevant sections of the Nominee Details Form in Annex A (A5) accordingly to confirm credential issuance either manually or digitally and give the form to the ARO, retaining a copy of the original. The ARO shall confirm receipt of and acceptance of the credentials issued by completing the relevant sections of the Nominee Details Form in Annex A (A5) either manually or digitally. The SMKI Registration Authority shall retain a copy of the receipt. Should the ARO not wish to accept these credentials, the ARO shall notify the SMKI Registration Authority immediately and not sign for the Certificate and / or Cryptographic Credential.	SMKI Registration Authority ARO	End of procedure

5.5 Procedure for becoming an Authorised Subscriber

An organisation is an Authorised Subscriber for IKI File Signing Certificates where it has successfully appointed and maintains in place at least one SRO and at least one ARO.

The procedure detailed immediately below shall be conducted by the DCC, in order to determine whether a Party, RDP or the DCC (in its role as DCC Service Provider) has become an Authorised Subscriber for Organisation Certificates, an Authorised Subscriber for Device Certificates, or both.

Step	When	Obligation	Responsibility	Next Step
5.5.1	As required	Complete the Authorised Subscriber / Interface Access Application Form as set out in SMKI	SRO on behalf of the applicant	5.5.2

		RAPP Annex A (A2), ensuring that the information entered on the form is complete and accurate, and the Authorised Subscriber Application Form is authorised by an SRO on behalf of the applicant organisation.	organisation, which shall be a Party, RDP or the DCC (in its role as DCC Service Provider)	
5.5.2	As required, following 5.5.1	Submit the completed Authorised Subscriber Application Form to the SMKI Registration Authority in writing, as directed on the DCC Website.	Applicant organisation, which shall be a Party or RDP	5.5.3
5.5.3	As soon as reasonably practicable following 5.5.2	Acknowledge receipt by email to the SRO as identified on the Authorised Subscriber / Interface Access Application Form.	SMKI Registration Authority	5.5.4
5.5.4	As soon as reasonably practicable following 5.5.3	Analyse the information entered on the Authorised Subscriber / Interface Access Application Form; determine completeness and any discrepancies. Where there are omissions/discrepancies, agree actions with an SRO via email.	SMKI Registration Authority	If complete, 5.5.6; if not complete, 5.5.5
5.5.5	Once omissions / discrepancies are addressed	Submit a revised Authorised Subscriber / Interface Access Application Form to the SMKI Registration Authority in writing, as directed on the DCC Website.	SRO on behalf of the applicant organisation, which shall be a Party, RDP or the DCC (in its role as DCC Service Provider)	5.5.3
5.5.6	As soon as reasonably practicable, following 5.5.4	Contact the SRO as identified on the Authorised Subscriber / Interface Access Application Form via telephone, using the registered contact information for the SRO as held by the SMKI Registration Authority. The SMKI Registration Authority shall verbally confirm details for the SRO as held by the DCC to verify that the correct individual has been contacted. The SMKI Registration Authority shall confirm the applications indicated on the Authorised Subscriber / Interface Access Application Form are authorised.	SMKI Registration Authority	If confirmed as authorised, 5.5.8; if not authorised, 5.5.7

5.5.7	As soon as reasonably practicable following rejection	Notify the SRO as identified on the Authorised Subscriber / Interface Access Application Form that the procedure in respect of the application has not been successful, in writing.	SMKI Registration Authority	5.5.5 once issues addressed
5.5.8	As requested	Where the application organisation is not a DCC Service Provider, conduct the SMKI and Repository Entry Process Tests if SMKI and Repository Entry Process Tests have not been completed previously, in accordance with Sections H14.22 to H14.30 of the Code.	Applicant organisation, in respect of the corresponding Authorised Subscriber / Interface Access Application Form	If successful or the applicant organisation is a DCC Service Provider (acting on behalf of the DCC), 5.5.10; if not successful, 5.5.9
5.5.9	As soon as reasonably practicable, following 5.5.8	The DCC shall confirm in writing, to the SRO as identified on the Authorised Subscriber / Interface Application Form, that the SMKI and Repository Entry Process Tests were not completed successfully.	DCC	5.5.8 once issues addressed
5.5.10	As soon as reasonably practicable, following 5.5.8	The DCC shall confirm in writing to the relevant Party that the SMKI and Repository Entry Process Tests have been completed successfully.	DCC	5.5.11
5.5.11	As soon as reasonably practicable, following 5.5.10	If the applicant organisation has indicated on its Authorised Subscriber / Interface Access Application Form that it wishes to become an Authorised Subscriber in respect of the Organisation Certificate Policy, the SMKI Registration Authority shall confirm in writing to the SRO as identified on the Authorised Subscriber / Interface Access Application Form that it the applicant organisation has become an Authorised Subscriber for Organisation Certificates. Where appropriate, the DCC shall issue credentials enabling the applicant to act as an Authorised Subscriber for Organisation Certificates, in accordance with the procedural steps as set out in section 5.4 of this document.	SMKI Registration Authority	If the applicant organisation has indicated that it wishes to become an Authorised Subscriber for Device Certificates, 5.5.12; otherwise, 5.5.17

5.5.12	As soon as possible, following 5.5.11	If the applicant organisation has indicated on the Authorised Subscriber / Interface Access Application Form that it wishes to become an Authorised Subscriber in respect of the Device Certificate Policy, the SMKI Registration Authority shall assess whether there is evidence to confirm that the Party has completed the User Entry Process (defined in Section H1.10) and will use a DCC Gateway Connection to obtain Device Certificates.	SMKI Registration Authority	If determined to be an Authorised Subscriber for Device Certificates, 5.5.15; otherwise 5.5.13
5.5.13	As soon as possible, following 5.5.12	Confirm by email, to the SRO as identified on the Authorised Subscriber / Interface Access Application Form, that the DCC has determined that applicant organisation is not eligible to become an Authorised Subscriber for Device Certificates.	SMKI Registration Authority	5.5.14
5.5.14	As soon as possible, following 5.5.13	In the case of a dispute by the SRO where the DCC has determined that there is no evidence as defined in 5.5.12 to support the applicant organisation to become such an Authorised Subscriber, the DCC shall notify the SMKI PMA of the refusal.	SMKI Registration Authority	End of procedure
5.5.15	As soon as reasonably practicable, following 5.5.12, or, where a Supplier Party or the DCC (in its role as DCC Service Provider) has indicated that it wishes to become an Authorised Subscriber in respect of the Device Certificate Policy	The SMKI Registration Authority shall confirm by email, to the SRO as identified on the Authorised Subscriber / Interface Access Application Form, that the applicant organisation has become an Authorised Subscriber for Device Certificates and will also notify the Service Desk.	SMKI Registration Authority	5.5.16

5.5.16	As soon as reasonably practicable, following 5.5.15	The SMKI Registration Authority shall arrange and conduct a meeting, as soon as reasonably practicable, at which the credentials as set out in steps 5.4.2, 5.4.3 and 5.4.5 (as set out in Section 5.4 of this document) shall be provided, as appropriate.	SMKI Registration Authority	5.5.17
5.5.17	As soon as reasonably practicable, following 5.5.11 or 5.5.16	Update the DCC's list of Authorised Subscribers for Organisation Certificates and/or Device Certificates, for audit purposes.	SMKI Registration Authority	End of procedure

6. SMKI Registration Authority registration procedures

The procedures as set out in SMKI RAPP Sections 6.2 to 6.4 shall be undertaken in order for nominated individuals to act on behalf of the SMKI Registration Authority as a SMKI Registration Authority Manager or a member of SMKI Registration Authority Personnel.

6.1 General registration obligations

The SMKI Registration Authority shall:

a) not permit any nominated individual to access Systems used to provide SMKI Services and/or the SMKI Repository Service as a SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel until the procedures in SMKI RAPP Sections 6.2 or 6.3 have been successfully completed;

b) in performing the procedures as set out in SMKI RAPP Sections 6.2 and 6.3, store and maintain records relating to individuals becoming SMKI Registration Authority Managers and SMKI Registration Authority Personnel, in accordance with the Code and the DCC's data retention policy;

c) ensure that, at all times, there are at least two SMKI Registration Authority Managers;

d) if there is a material change to any of the information used to verify the identity of any SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel, ensure that its SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel undertakes the procedures as set out in SMKI RAPP Sections 6.2 or 6.3 in respect of the revised evidence of identity; and

e) check the name and address of the SMKI Registration Authority Manager or member of the SMKI Registration Authority Personnel before issuing a replacement token.

The DCC shall ensure that:

a) for authentication credentials issued under the IKI Certificate Policy to Authorised Responsible Officers, such authentication credentials have a lifetime of ten years following issuance of such authentication credentials and shall cease to function upon after ten years following issuance; and

b) for authentication credentials not issued under the IKI Certificate Policy, that such authentication credentials remain valid until revoked.

6.2 Procedure for becoming a SMKI Registration Authority Manager

The procedure for becoming a SMKI Registration Authority Manager as detailed immediately below shall be conducted by DCC's Chief Information Security Officer (CISO), or an individual that they have authorised to act on their behalf in this capacity, on behalf of the DCC, in order to nominate, authorise and verify a SMKI Registration Authority Manager.

Step	When	Obligation	Responsibility	Next Step
6.2.1	As required	Nominate an individual to become a SMKI Registration Authority Manager, who shall be an employee of the DCC or be contracted to the DCC, and advise the nominated individual of the evidence to be provided in order to verify their identity.	DCC Chief Information Security Officer, on behalf of the DCC	6.2.2
6.2.2	As soon as reasonably practicable following 6.2.1	Confirm verification meeting date/time with nominated individual.	DCC Chief Information Security Officer, on behalf of the DCC	6.2.3
6.2.3	In verification meeting	The CISO shall, in accordance with the provisions of Sections G4.4 to G4.8: a. check proof of identity provided against the information provided by the nominated individual; and b. verify the identity of the nominated individual to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.	DCC Chief Information Security Officer, on behalf of the DCC	If verified, 6.2.5. If not verified, 6.2.4
6.2.4	In verification meeting	If the identity of the nominated individual is not successfully verified, provide reasons for the failure to the individual and notify the individual that a further verification meeting is required to remedy the unsuccessful elements of the verification.	DCC Chief Information Security Officer, on behalf of the DCC	6.2.5
6.2.5	In verification meeting	If the identity of the nominated individual is successfully verified, notify the individual verbally and subsequently in writing that they have become a SMKI Registration Authority Manager and notify the SMKI PMA that the	DCC Chief Information Security Officer, on behalf of the DCC	6.2.6

		nominated individual has become a SMKI Registration Authority Manager.		
6.2.6	As soon as reasonably practicable following 6.2.5	Record the details of the individual that has become a SMKI Registration Authority Manager, in a manner which is auditable.	SMKI Registration Authority	Procedure as set out in SMKI RAPP Section 6.4

6.3 Procedure for becoming a member of SMKI Registration Authority Personnel

The procedure for becoming a member of SMKI Registration Authority Personnel as detailed immediately below shall be conducted by a SMKI Registration Authority Manager on behalf of the SMKI Registration Authority, in order to nominate, verify, authorise and provide means for authenticating access to Systems used to provide SMKI Services and/or the SMKI Repository Service in respect of a member of SMKI Registration Authority Personnel.

Step	When	Obligation	Responsibility	Next Step
6.3.1	As required	Nominate an individual to become a member of SMKI Registration Authority Personnel, who shall be an employee of the DCC or be contracted to the DCC.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	6.3.2
6.3.2	As soon as reasonably practicable following 6.3.1	Confirm verification meeting date/time with nominated individual.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	6.3.3
6.3.3	In verification meeting	In the verification meeting, the SMKI Registration Authority Manager shall, in accordance with the provisions of Sections G4.4 to G4.8: a. check proof of identity provided against the information provided by the nominated individual; and b. verify the identity of the nominated individual to the level pursuant to the SMKI PMA Guidance on "Verifying Individual Identity" published on the Website.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	If successful, 6.3.5. If not successful, 6.3.4
6.3.4	In verification meeting	If the identity of the nominated individual is not successfully verified, provide reasons for the rejection to the individual and notify the	SMKI Registration Authority Manager, on behalf of the	6.3.2

		individual that a further meeting is required to remedy the affected elements of the verification.	SMKI Registration Authority	
6.3.5	As soon as reasonably practicable, following 6.3.3	If the identity of the nominated individual is successfully verified, notify the individual verbally and subsequently in writing that they have become a member of SMKI Registration Authority Personnel.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	6.3.6
6.3.6	As soon as reasonably practicable following 6.3.5	Record the details of the individual that has become a member of SMKI Registration Authority Personnel in respect of the SMKI Registration Authority, in a manner which is auditable.	SMKI Registration Authority	Procedure as set out in SMKI RAPP Section 6.4

6.4 Procedure for provision of credentials to a SMKI Registration Authority Manager or a member of SMKI Registration Authority Personnel

The procedure for provision of credentials to a SMKI Registration Authority Manager or a member of SMKI Registration Authority Personnel, as detailed immediately below, shall be conducted by the DCC's CISO in respect of a SMKI Registration Authority Manager or a SMKI Registration Authority Manager in respect of a member of SMKI Registration Authority Personnel.

Step	When	Obligation	Responsibility	Next Step
6.4.1	In verification meeting, following confirmation of becoming a SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel	Provide credentials in accordance with step 6.4.2 or 6.4.3 below, depending on whether the individual has become a SMKI Registration Authority Manager or a member of SMKI Registration Authority Personnel.	DCC CISO or SMKI Registration Authority Manager	If providing to a SMKI Registration Authority Manager, 6.4.2; if providing to a member of SMKI Registration Authority Personnel, 6.4.3
6.4.2	In verification meeting, following confirmation	Provide the SMKI Registration Authority Manager with credentials as listed immediately below, to be used to perform activities on behalf of the SMKI Registration Authority: a. one Cryptographic Credential Token	DCC CISO	6.4.4

	of becoming a SMKI Registration Authority Manager	containing authentication credentials issued under the IKI Certificate Policy which can be used to authenticate the individual to the SMKI Portal; and b. usernames and passwords enabling for the purposes of authentication to the SMKI Repository portal.		
6.4.3	In verification meeting, following confirmation of becoming a member of SMKI Registration Authority Personnel	Provide the member of SMKI Registration Authority Personnel with credentials as listed immediately below, to be used to perform activities on behalf of the SMKI Registration Authority: a. one Cryptographic Credential Token containing authentication credentials issued under the IKI Certificate Policy which can be used to authenticate the individual to the SMKI Portal; and b. usernames and passwords enabling for the purposes of authentication to the SMKI Repository Portal.	SMKI Registration Authority Manager	6.4.4
6.4.4	In verification meeting, following issuance of credentials	The SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel shall sign that they accept the credentials issued to them on the Cryptographic Credential Token. Where the SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel does not accept the credentials they shall notify the DCC's CISO (in the case of the SMKI Registration Authority Manager) or otherwise the SMKI Registration Authority Manager and shall not sign for the Cryptographic Credential Token.	SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel	End of Procedure

7. Submission of CSRs and Issuance of Certificates

7.1 Submission of Certificate Signing Requests

The SMKI Interface Design Specification (SMKI IDS) and the Code sets out the provisions in respect of:

a) the mechanism established for this purpose is in accordance with the procedure in PKCS#10;

b) naming restrictions in respect of the Subject of each Certificate in accordance with the relevant Certificate Policy;

c) the circumstances in which an Authorised Subscriber may submit a Certificate Signing Request (CSR) in respect of a Device Certificate and the means by which it may do so (SMKI IDS sections 2.3.1.6, 2.4.1.1 and 2.5.1.1);

d) the circumstances in which an Authorised Subscriber may submit a CSR in respect of an Organisation Certificate and the means by which it may do so (SMKI IDS sections 2.3.1.1 and 2.6.1.1);

e) the circumstances in which an Authorised Subscriber for an IKI Certificate may submit a CSR in respect of an IKI Certificate and the means by which it may do so (SMKI IDS sections 2.4 and 2.5); and

f) requirements in respect of validation of the format of a CSR, checking that the submitting organisation is an Eligible Subscriber for the Certificate and rejection if such requirements are not met.

The SMKI Registration Authority shall validate the Subject of each CSR in respect of an Organisation Certificate to ensure that each CSR corresponds with an EUI-64 Compliant identifier range that is applicable to the relevant User Role, as provided in the Organisation Information Form.

Subject to the provisions of the Code and this SMKI RAPP, the DCC shall accept requests for copies of Organisation Certificates and/or Device Certificates from non DCC Users by phone via the Service Desk or, in the case of Organisation Certificates, via the SMKI Portal via the Internet. The DCC shall, following such a request, provide the relevant information as soon as is reasonably practicable, via a secured electronic means.

7.2 Processing of CSRs for XML Signing Certificates

Upon receipt of a Certificate Signing Request from a Supplier Party seeking to be Issued with an Organisation Certificate that has a Remote Party Role of xmlSign and where that Supplier Party is seeking to include within the Subject X520 Common Name field (with the meaning given to that term in the Organisation Certificate Policy) one or more Market Participant Identifier(s) by which that Supplier Party may be identified in the Party Details, the SMKI Registration Authority shall reject that Certificate Signing Request if:

a) there is more than one such identifier that relates to the supply of gas;

b) there is more than one such identifier that relates to the supply of electricity;

c) the Market Participant Identifier(s) included with the Certificate Signing Request are identifiers that the Panel has notified the DCC are not associated with that Supplier Party pursuant to Section B1.21 of the Code; and

d) any of the Market Participant Identifier(s) included within the Certificate Signing Request is already included within the Subject X520 Common Name field (with the meaning given to that term in the Organisation Certificate Policy) of another Organisation Certificate that has been Issued to a different Supplier Party and any such other Organisation Certificate:

   i. has not been revoked; or

   ii. has not expired.

7.3 Issuance of Certificates

The SMKI Interface Design Specification sets out the provisions in respect of:

a) the circumstances in which the DCA shall issue Device Certificates (SMKI IDS sections 2.3.1.9, 2.4.1.4 and 2.5.1.4);

b) the circumstances in which the OCA shall issue Organisation Certificates (SMKI IDS sections 2.3.1.4 and 2.6.1.4);

c) the circumstances in which the ICA shall issue IKI Certificates (SMKI IDS sections 2.4 and 2.5); and

d) the obligations in respect of lodging Certificates in the SMKI Repository (SMKI IDS sections 2.3.1.4, 2.3.1.9, 2.4.1.4 and 2.5.1.4).

8. Revocation

The procedures as set out in this Section 8 shall be undertaken for the revocation of Certificates except where SEC Section L16 (Supplier of Last Resort) applies.

8.1 Revocation of Device Certificates

In line with the Device Certificate Policy section 4.9.1, Device Certificates cannot be revoked.

8.2 Revocation of Organisation Certificates

8.2.1 General Organisation Certificate revocation obligations

The DCC shall permit each of the following individuals to request the revocation of an Organisation Certificate, where the reasons for such revocation request must be one of the permitted reasons for Organisation Certificate revocation as set out in Section 4.9.1 in Appendix B of the Code:

a) Any SMKI PMA member, on behalf of the SMKI PMA;

b) Any Senior Responsible Officer for a Subscriber for an Organisation Certificate; or

c) Any SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel, on behalf of the DCC.

The DCC, in its role as SMKI Registration Authority, shall only accept CRRs through the following mechanisms (or a combination of such mechanisms):

a) in writing, via registered post;

b) via a secured electronic means; or

c) in person, at the offices of the SMKI Registration Authority, where the address of such offices shall be as set out on the DCC Website.

The revocation of an Organisation Certificate shall be permanent and the SMKI Registration Authority shall ensure that no revoked Organisation Certificate may be reinstated.

The DCC shall, each month, prepare and submit a report to the SMKI PMA regarding the number and nature of Organisation Certificate revocations. A null report is not required.

8.2.2 Procedure for Organisation Certificate Revocation

The procedure for authorisation, verification and, where verified, revocation of Certificates is as set out immediately below.

Step	When	Obligation	Responsibilit y	Next Step
8.2.2.1	As soon as reasonably practicable when Certificate revocation is required	A SMKI PMA Member on behalf of the SMKI PMA, an SRO on behalf of a Subscriber or the SMKI Registration Authority Manager or a member of SMKI Registration Authority Personnel on behalf of the DCC shall submit, using the mechanisms set out in SMKI RAPP Section 8.2.1, a CRR to the SMKI Registration Authority. The reason for such CRR shall be one of the permitted reasons for Organisation Certificate revocation as set out in Section 4.9 in Appendix B of the Code. Each CRR shall contain the following information, as set out in SMKI RAPP Annex A (A7) : a. Identify the Subscriber; b. Identify the individual who is submitting the CRR; c. Unambiguously (i.e. by specifying the serial number of the Certificate) identify the Certificate to be revoked; and d. State the reason for the Certificate revocation.	SMKI PMA Member, Subscriber requiring Organisation Certificate revocation or SMKI Registration Authority Manager or SMKI Registration Authority Personnel	8.2.2.2
8.2.2.2	As soon as reasonably practicable, following 8.2.2.1	On receipt of a CRR, notify the SMKI Registration Authority Manager for verification, processing and/or approval. The SMKI Registration Authority shall treat each CRR and any associated circumstances as confidential. Where the CRR is submitted by an SMKI Registration Authority Manager, the approval in this step must be sought from a different SMKI Registration Authority Manager or the DCC’s CISO.	SMKI Registration Authority Personnel	8.2.2.3
8.2.2.3	As soon as reasonably practicable following receipt	Where it has been submitted by an SRO, validate the Certificate Revocation Request by contacting a Senior Responsible Officer and confirming details for the SRO as provided in the original application to become an SRO: a. Where submitted in writing, the SMKI Registration Authority shall send an email	SMKI Registration Authority Manager or DCC's CISO	If validated, 8.2.2.5; if invalid (considere d malicious

		to a Senior Responsible Officer. The SMKI Registration Authority shall 1) confirm such information from the relevant SRO Nomination Form, in order to provide confidence that the request is from an authorised SRO; 2) confirm the details of the Organisation Certificate to which the revocation request received relates (as provided in the submitted letter); and 3) confirm that a reason for the request has been specified in accordance with section 4.9.2 of the Organisation Certificate Policy. b. Where submitted in person, the SMKI Registration Authority shall 1) verify the handwritten signature of the Senior Responsible Officer against that held by the SMKI Registration Authority; 2) confirm details provided in the relevant SRO Nomination Form, in order determine that the request is authentic; 3) confirm the details of the Organisation Certificate to which the CRR received relates; and 4) confirm that a reason for the request has been specified in accordance with section 4.9.2 of the Organisation Certificate Policy. Where the Certificate Revocation Request was submitted by a SMKI Registration Authority Manager, a member of the SMKI Registration Authority Personnel or a member of the SMKI PMA, validate the Certificate Revocation Request by contacting a SMKI Registration Authority Manager or the SMKI PMA to confirm details of the Certificate Revocation Request.		and/or inauthentic) or incomplete , 8.2.2.4

8.2.2.4	As soon as reasonably practicable following unsuccessful validation	Where the Certificate Revocation Request is not validated as in 8.2.2.3, reject the revocation request and notify the individual that was contacted in step 8.2.2.3 to validate the revocation request, in writing, including the reasons for rejection and identify resulting steps to be taken.	SMKI Registration Authority Manager or DCC's CISO	End of procedure

8.2.2.5	As soon as reasonably practicable following successful validation	Where the Certificate Revocation Request is validated in 8.2.2.3, the DCC shall carry out a check that the	SMKI Registration Authority Manager (s) and/or DCC's CISO (as needed for two party approval).	8.2.2.6

		correct Certificate is to be revoked and to obtain and record two-party approval of the authorisation and record the time from which the revocation is to take effect.		
8.2.2.6	As soon as reasonably practicable following 8.2.2.5	Revoke the identified Organisation Certificate that is the subject of the CRR.	SMKI Registration Authority Manager	8.2.2.7
8.2.2.7	As soon as reasonably practicable following notification, or every hour (whichever is sooner)	Update the relevant Certificate Revocation List (CRL) and publish such CRL to the SMKI Repository, as set out in Appendix B of the Code, section 4.9.7 (D).	SMKI Registration Authority	8.2.2.8
8.2.2.8	Following revocation	Notify the individual submitting the CRR of the successful revocation of the Organisation Certificate in the CRR, by email.	SMKI Registration Authority Manager	End of procedure

8.3 Revocation of SMKI Services and / or the SMKI Repository Service access credentials and / or IKI File Signing Certificates

8.3.1 General obligations relating to revocation of ARO credentials for accessing SMKI Services and / or the SMKI Repository Service and / or File Signing Certificates

A Senior Responsible Officer on behalf of a Party, RDP, Manufacturer, SECCo or the DCC (in its role as DCC Service Provider) may request the revocation of access credentials in respect of an Authorised Responsible Officer acting on behalf of that Party, RDP, Manufacturer, SECCo or the DCC (as DCC Service Provider) or revocation of an IKI File Signing Certificate for which that Party, RDP, Manufacturer, SECCo is an Authorised Subscriber, using the form as set out in Annex A (A7) and clearly identifying the credentials to be revoked.

The permitted reasons for revocation of authentication credentials shall be as listed immediately below:

a) An applicant wishes an IKI File Signing Certificate or the credentials of an ARO to be revoked.

b) A Party, RDP, Manufacturer, SECCo or the DCC (as DCC Service Provider), of which the ARO is a representative, becomes ineligible to access SMKI Services and/or the SMKI Repository Service or ceases to become an Authorised Subscriber for Device Certificates or Organisation Certificates, or both, as appropriate.

c) If there is a change to any of the information that was used to verify the identity of an ARO (but where the renewal or replacement of documents used to verify such identity, where the identity information remains the same, shall not constitute a change).

d) A Party, RDP, Manufacturer, DCC (as DCC Service Provider), or SECCo notifies the SMKI Registration Authority that it reasonably believes that the ARO is a threat to the security, integrity, or stability of the SMKI Services and/or the SMKI Repository Service.

e) The information on which the identity of an ARO was established is known, or is reasonably suspected, to be inaccurate.

f) The authentication credentials issued to the ARO are lost, stolen, inoperative, or destroyed. The DCC shall ensure that the Cryptographic Credential Token issued to an ARO is automatically rendered inoperative where the PIN code on the Cryptographic Credential Token used to access SMKI Services has been entered incorrectly 15 consecutive times.

Where access credentials have been revoked and the Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider) wishes to receive new access credentials, that Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider) shall submit a new ARO Nomination Form.

8.3.2 Procedure for revocation of SMKI Services and / or the SMKI Repository Service access credentials for AROs and / or IKI File Signing Certificates

The procedure for verification and, where verified, revocation of authentication credentials or IKI File Signing Certificates is as set out immediately below.

Step	When	Obligation	Responsibility	Next Step
8.3.2.1	As required	Complete the Credential Revocation Request Form as set out in SMKI RAPP Annex A (A7), ensuring that the information entered on the form is complete and accurate, and the Credential Revocation Request Form is authorised by an SRO on behalf of the applicant organisation.	SRO on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider)	8.3.2.2

8.3.2.2	As required, following 8.3.2.1	Submit the completed Credential Revocation Request Form to the SMKI Registration Authority via a secured electronic means, as directed on the DCC Website.	SRO on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider)	8.3.2.3
8.3.2.3	As soon as reasonably practicable following 8.3.2.2	Acknowledge receipt by email to the SRO as identified on the Credential Revocation Request Form or via the Service Desk updating the relevant ticket, ensuring a record is kept.	SMKI Registration Authority or Service Desk	8.3.2.4
8.3.2.4	As soon as reasonably practicable following 8.3.2.3	Analyse the information entered on the Credential Revocation Request Form; determine completeness and any discrepancies. Where there are omissions/discrepancies, agree actions with an SRO via email.	SMKI Registration Authority	If complete, 8.3.2.6; if not complete, 8.3.2.5
8.3.2.5	Once omissions / discrepancies are addressed	Submit a revised Credential Revocation Request Form to the SMKI Registration Authority via a secured electronic means, as directed on the DCC Website.	SRO on behalf of the applicant organisation, which shall be a Party, RDP, Manufacturer, SECCo or DCC (as DCC Service Provider)	8.3.2.3
8.3.2.6	As soon as reasonably practicable, following 8.3.2.4	Contact the SRO as identified on the Credential Revocation Request Form, using the registered contact information for the SRO as held by the SMKI Registration Authority, to confirm the application identified by the Credential Revocation Request Form is authorised.	SMKI Registration Authority	If confirmed as authorised, 8.3.2.8; if not authorised, 8.3.2.7
8.3.2.7	As soon as reasonably practicable following rejection	Notify the SRO that was contacted in step 8.3.2.3, that the procedure in respect of the application has not been successful, by email.	SMKI Registration Authority	End of procedure

8.3.2.8	As soon as reasonably practicable following 8.3.2.6	Notify the SRO that was contacted in step 8.3.2.3, and the DCC's CISO by email that the revocation request has been accepted.	SMKI Registration Authority Personnel, on behalf of the SMKI Registration Authority	8.3.2.9

8.3.2.9	As soon as reasonably practicable following 8.3.2.8	Revoke the credentials for the relevant service, for the identified ARO or relevant IKI File Signing Certificate as indicated by the SRO on the Credential Revocation Request Form. In doing so, the DCC shall, where required to revoke the credentials, revoke all associated IKI Certificates. DCC shall ensure that access to the relevant service is prevented from the point of revocation.	SMKI Registration Authority Personnel, on behalf of the SMKI Registration Authority	8.3.2.10

8.3.2.10	As soon as reasonably practicable following 8.3.2.9	Notify the SRO that was contacted in step 8.3.2.3 of the successful revocation of credentials for the ARO or relevant IKI File Signing Certificate. Where such revocation results in the individual that is the subject of the Credential Revocation Request Form no longer having any valid credentials issued to them in accordance with the SMKI RAPP, the SMKI Registration Authority shall notify the SRO that was contacted in step 8.3.2.3 that the individual is no longer an ARO, by email.	SMKI Registration Authority Personnel, on behalf of the SMKI Registration Authority	8.3.2.11

8.3.2.11	As soon as reasonably practicable following 8.3.2.10	Where the revoked credentials were issued on a Cryptographic Credential Token or Cryptographic Credential Tokens, the Party, RDP, Manufacturer, SECCo or DCC Service Provider shall, where such Cryptographic Credential Tokens are in the possession of the applicant organisation, send the Cryptographic Credential Token or Cryptographic	SRO on behalf of the applicant organisation	8.3.2.12

		Credential Tokens to the DCC, via secure courier.		

8.3.2.12	As soon as reasonably practicable following 8.3.2.11	The DCC shall verifiably destroy all Secret Key Material or Certificates contained on the returned Cryptographic Credential Token.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	8.3.2.13

8.3.2.13	As soon as reasonably practicable following 8.3.2.12	Record the details of the credentials that have been revoked in respect of the ARO as identified on the Credential Revocation Request Form or relevant IKI File Signing Certificate, plus, if relevant, update the DCC's list of AROs, in a manner which is auditable.	SMKI Registration Authority	End of procedure

8.3.3 General obligations relating to revocation of SMKI Registration Authority Manager or SMKI Registration Authority Personnel credentials for accessing SMKI Services and / or the SMKI Repository Service

The following parties may request the revocation of authentication credentials in respect of SMKI Registration Authority Personnel, using the form referred to in Annex A (A7):

a) Any SMKI PMA member, on behalf of the SMKI PMA;

b) A SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority; and

c) DCC's CISO.

The permitted reasons for revocation of authentication credentials shall be as listed immediately below:

a) A SMKI Registration Authority Manager or DCC's CISO wishes the credentials of a SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel to be revoked.

b) A member of SMKI Registration Authority Personnel becomes ineligible to access SMKI Services and/or the SMKI Repository Service.

c) A member of SMKI Registration Authority Personnel fails to comply with Appendix A, Appendix B and Appendix Q of the Code, or this SMKI RAPP.

d) Any information used to verify the identity of a member of SMKI Registration Authority Personnel changes, the individual leaves the employment of the DCC, or moves within DCC to a role in which they are not entitled to access SMKI Services and/or the SMKI Repository Service.

e) A SMKI Registration Authority Manager becomes aware that the member of SMKI Registration Authority Personnel or a SMKI Registration Authority Manager is a potential threat to the security, integrity, or stability of the SMKI Services and/or the SMKI Repository Service.

f) The information on which the identity of a SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel was established is known, or is suspected, to be inaccurate.

g) The authentication credentials issued to a member of SMKI Registration Authority Personnel are lost, stolen, inoperative, or destroyed. The DCC shall ensure that the Cryptographic Credential Token issued to a member of SMKI Registration Authority Personnel is automatically rendered inoperative where the PIN code on the Cryptographic Credential Token used to access SMKI Services has been entered incorrectly 15 consecutive times.

8.3.4 Procedure for revocation of SMKI Services access credentials for SMKI Registration Authority Managers and SMKI Registration Authority Personnel

The procedure for verification and, where verified, revocation of credentials in respect of a SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel is as set out immediately below.

Step	When	Obligation	Responsibility	Next Step
8.3.4.1	As required	Complete the Credential Revocation Request Form as set out in SMKI RAPP Annex A (A7), ensuring that the information entered on the form is complete and accurate, and the Credential Revocation Request Form is authorised: a. for a member of SMKI Registration Authority Personnel, by a SMKI Registration Authority Manager; or b. for a SMKI Registration Authority Manager, by the DCC's CISO.	DCC CISO, SMKI Registration Authority Manager, or SMKI PMA Member	8.3.4.2
8.3.4.2	As required, following 8.3.4.1	Submit the completed Credential Revocation Request Form to a SMKI Registration Authority Manager.	DCC CISO, SMKI Registration Authority Manager, or SMKI PMA Member	8.3.4.3
8.3.4.3	As soon as reasonably practicable following 8.3.4.2	Analyse the information entered on the Credential Revocation Request Form; determine completeness and any discrepancies. Where there are omissions/discrepancies, agree amendments and adjust form contents.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	8.3.4.4

8.3.4.4	As soon as reasonably practicable following 8.3.4.3	Revoke the credentials of the identified SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel as indicated on the Credential Revocation Request Form. Where the Credential Revocation Request is validated as in 8.3.4.3, the DCC shall carry out a check that the correct credential is to be revoked and record approval of the authorisation.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	8.3.4.5
8.3.4.5	As soon as reasonably practicable following 8.3.4.4	Where such revoked credentials were issued on a Cryptographic Credential Token, the DCC shall retrieve such Cryptographic Credential Token from the identified SMKI Registration Authority Manager or member of SMKI Registration Authority Personnel and shall verifiably destroy all Secret Key Material or Certificates contained on the Cryptographic Credential Token.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	8.3.4.6
8.3.4.6	As soon as reasonably practicable following 8.3.4.5	Record the details of the credentials that have been revoked in respect of the member of SMKI Registration Authority Personnel or SMKI Registration Authority Manager as identified on the Credential Revocation Request Form.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	8.3.4.7
8.3.4.7	As soon as reasonably practicable following 8.3.4.5	Notify DCC's CISO or SMKI Registration Authority Manager who submitted the original Credential Revocation Request Form that the revocation has been completed.	SMKI Registration Authority Manager, on behalf of the SMKI Registration Authority	End of procedure

Annex A – Form Templates

The form templates listed in Annex A are available from the DCC Website or via the DCC SharePoint site as advised by the DCC.

The DCC may, subject to the approval of the SMKI PMA, modify the form templates from time to time.

A1. **Organisation Information Form**

A2. **Authorised Subscriber / Interface Access Application Form**

A3. **SMKI SRO Nomination Form**

A4. **SMKI ARO Nomination Form**

A5. **Nominee Details Form**

A6. **Organisation Certificate Revocation Request Form**

A7. **Credential Revocation Request Form**

Annex B – Definitions

In this Policy, except where the context otherwise requires:

- expressions defined in Section A of the Code (Definitions and Interpretation) have the same meaning as is set out in that Section;
- the expressions in the left hand column below shall have the meanings given to them in the right hand column below; and
- where any expression is defined in Section A of the Code (Definitions and Interpretation) and in this Annex, the definition in this Annex shall take precedence for the purposes of this document.

Ad Hoc Device CSR Web Service	The system-to-system interface provided for the purposes of Authorised Subscribers systems submitting individual CSRs in respect of Device Certificates.
Authorised Responsible Officer (ARO)	Means an individual that has successfully completed the process for becoming an ARO on behalf of a Party, RDP, Manufacturer, SECCo or a DCC Service Provider in accordance with the SMKI RAPP and/or the DCCKI RAPP (as applicable).
Authorised Subscriber / Interface Access Application Form	Means the for as specified in section A2 of this SMKI RAPP.
Batched Device CSR Web Service	The system-to-system interface provided for the purposes of Authorised Subscribers systems submitting batches of CSRs in respect of Device Certificates and subsequently a synchronous mechanism to retrieve the resulting Device Certificates.
Chief Information Security Officer (CISO)	Has the meaning given to that expression in the SMKI Recovery Procedure.
Certificate Revocation Request	Has the meaning given to that expression in the Organisation Certificate Policy.

Credential Revocation Request Form	Means the form as specified in section A7 of this SMKI RAPP.
Cryptographic Credential Token	Means a FIPS 140-2 Level 3 token containing Secret Key Material, as issued in accordance with the SMKI RAPP
IKI Certification Authority	Has the meaning given to that expression in the IKI Certificate Policy.
Issue	Has the meaning given to that expression in SEC Section A and like terms shall be interpreted accordingly.
Nominee Details Form	Means the form as specified in section A5 of this SMKI RAPP.
Organisation Certificate Revocation Request Form	Means the form as specified in section A6 of this SMKI RAPP.
Organisation Information Form	Means the form as specified in section A1 of this SMKI RAPP.
Party	Has the meaning set out in SEC Section A except for the DCC, which shall not be a Party in this document.
SMKI Portal	Has the meaning given to that expression in the SMKI Interface Design Specification.
SMKI Registration Authority	Means the DCC acting in its capacity as such for the purposes of the Organisation Certificate Policy, Device Certificate Policy or IKI Certificate Policy.
SMKI Registration Authority Manager	Means an individual who acts on behalf of the SMKI Registration Authority to perform tasks relating to the management of the SMKI Registration Authority, as set out in the SMKI RAPP
SMKI Registration Authority Personnel	Means those persons who are engaged by DCC, in so far as such persons carry out functions of the SMKI Registration Authority as set out in the SMKI RAPP
SMKI ARO Nomination Form	Means the form as specified in section A4 of this SMKI RAPP.
SMKI SRO Nomination Form	Means the form as specified in section A3 of this SMKI RAPP.

Senior Responsible Officer (SRO)	Means an individual that has successfully completed the process for becoming an SRO on behalf of a Party, RDP, Manufacturer, SECCo or a DCC Service Provider in accordance with the SMKI RAPP and/or the DCCKI RAPP (as applicable).

Version E 8.0

APPENDIX E

DCC User Interface Services Schedule

Contents

DCC USER INTERFACE SERVICES SCHEDULE

Service Reference	Service Reference Variant	Description	Eligible Users	SMETS2+ Target Response Time	SMETS1 Target Response Time	Non-Device Services	Notes
1.1	1.1.1	Update Import Tariff (Primary Element)	Import Supplier, Gas Supplier	30 seconds	16 seconds		
1.1	1.1.2	Update Import Tariff (Secondary Element)	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
1.2	1.2.1	Update Price (Primary Element)	Import Supplier, Gas Supplier	24 hours	24 hours		
1.2	1.2.2	Update Price (Secondary Element)	Import Supplier	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
1.5	1.5	Update Meter Balance	Import Supplier, Gas Supplier	30 seconds	16 seconds		
1.6	1.6	Update Payment Mode	Import Supplier, Gas Supplier	30 seconds	16 seconds		
1.7	1.7	Reset Tariff Block	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for

		Counter Matrix					this Service in respect of SMETS2+ Devices
2.1	2.1	Update Prepay Configuration	Import Supplier, Gas Supplier	30 seconds	16 seconds		
2.2	2.2	Top Up Device	Import Supplier, Gas Supplier	30 seconds	16 seconds		
2.3	2.3	Update Debt	Import Supplier, Gas Supplier	30 seconds	16 seconds		
2.5	2.5	Activate Emergency Credit	Import Supplier, Gas Supplier	30 seconds	16 seconds		
3.1	3.1	Display Message	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
3.2	3.2	Restrict Access for Change of Tenancy	Import Supplier, Gas Supplier	30 seconds	16 seconds		
3.3	3.3	Clear Event Log	Import Supplier, Gas Supplier	30 seconds	16 seconds		
3.4	3.4	Update Supplier Name	Import Supplier, Gas Supplier	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices

3.5	3.5	Disable Privacy PIN	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
4.1	4.1.1	Read Instantaneous Import Registers	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter	30 seconds	16 seconds		
4.1	4.1.2	Read Instantaneous Import ToU Matrices	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter	30 seconds	16 seconds		
4.1	4.1.3	Read Instantaneous Import ToU with Blocks Matrices	Import Supplier, Electricity Distributor	30 seconds	16 seconds		
4.1	4.1.4	Read Instantaneous Import Block Counters	Gas Supplier	30 Seconds	16 seconds		
4.2	4.2	Read Instantaneous Export Register Values	Export Supplier, Electricity Distributor	30 seconds	16 seconds		
4.3	4.3	Read Instantaneous Prepayment	Import Supplier, Gas Supplier	30 seconds	16 seconds		

		Register Values					
4.4	4.4.2	Retrieve Change of Mode / Tariff Triggered Billing Data Log	Import Supplier, Gas Supplier,	30 seconds	16 seconds		
4.4	4.4.3	Retrieve Billing Calendar Triggered Billing Data Log	Import Supplier, Gas Supplier	30 seconds	16 seconds		
4.4	4.4.4	Retrieve Billing Data Log (Payment Based Debt Payments)	Import Supplier, Gas Supplier	30 seconds	16 seconds		
4.4	4.4.5	Retrieve Billing Data Log (Prepayment Credits)	Import Supplier, Gas Supplier	30 seconds	16 seconds		
4.6	4.6.1	Retrieve Import Daily Read Log	Import Supplier, Gas Supplier	30 seconds	16 seconds		Where a change of supplier occurs on any day, both the new supplier and the old supplier will be eligible to retrieve the daily read log for that day.
4.6	4.6.2	Retrieve Export Daily Read Log	Export Supplier	30 seconds	n/a		Where a change of supplier occurs on any day, both the new supplier and the old supplier will be eligible to retrieve the daily

							read log for that day. Users may only be Eligible Users for this Service in respect of SMETS2+ Devices

4.8	4.8.1	Read Active Import Profile Data	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Other User	5,600 seconds	16 seconds		

4.8	4.8.2	Read Reactive Import Profile Data	Import Supplier, Electricity Distributor, Other User	30 seconds	16 seconds		

4.8	4.8.3	Read Export Profile Data	Export Supplier, Electricity Distributor, Other User	30 seconds	16 seconds		

4.10	4.10	Read Network Data	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter	30 seconds	16 seconds		

4.11	4.11.1	Read Tariff (Primary Element)	Import Supplier, Gas Supplier, Other User	30 seconds	16 seconds		

4.11	4.11.2	Read Tariff (Secondary Element)	Import Supplier, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
4.12	4.12.1	Read Maximum Demand Import Registers	Import Supplier, Electricity Distributor	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
4.12	4.12.2	Read Maximum Demand Export Registers	Export Supplier, Electricity Distributor	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
4.13	4.13	Read Prepayment Configuration	Import Supplier Gas Supplier	30 seconds	16 seconds		
4.14	4.14	Read Prepayment Daily Read Log	Import Supplier Gas Supplier	30 seconds	n/a		Where a change of supplier occurs on any day, both the new supplier and the old supplier will be eligible to retrieve the daily read log for that day. Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
4.15	4.15	Read Load Limit Data	Import Supplier, Electricity Distributor	24 hours	24 hours		
4.16	4.16	Read Active Power Import	Import Supplier, Electricity Distributor	30 seconds	16 seconds		

4.17	4.17	Retrieve Daily Consumption Log	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
4.18	4.18	Read Meter Balance	Import Supplier, Gas Supplier	30 seconds	16 seconds		
5.1	5.1	Create Schedule	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Other User	24 hours	24 hours	✓	
5.2	5.2	Read Schedule	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Other User	24 hours	24 hours	✓	
5.3	5.3	Delete Schedule	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transport	24 hours	24 hours	✓	

			er, Export Supplier, Other User				
6.2	6.2.1	Read Device Configuration (Voltage)	Import Supplier, Electricity Distributor, Registered Supplier Agent	30 seconds	16 seconds		
6.2	6.2.2	Read Device Configuration (Randomisation)	Import Supplier, Electricity Distributor, Registered Supplier Agent	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.2	6.2.3	Read Device Configuration (Billing Calendar)	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	16 seconds		
6.2	6.2.4	Read Device Configuration (Identity exc. MPXN)	Import Supplier, Export Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Registered Supplier Agent, Other User	30 seconds	16 seconds		
6.2	6.2.5	Read Device Configuratio	Import Supplier,	30 seconds	16 seconds		

		n (Instantaneous Power Thresholds)	Registered Supplier Agent				
6.2	6.2.7	Read Device Configuration (MPXN)	Import Supplier, Export Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Registered Supplier Agent, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.2	6.2.8	Read Device Configuration (Gas)	Gas Supplier, Registered Supplier Agent, Gas Transporter	30 seconds	16 seconds		
6.2	6.2.9	Read Device Configuration (Payment Mode)	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	16 seconds		
6.2	6.2.10	Read Device Configuration (Event and Alert behaviours)	Import Supplier, Gas Supplier, Electricity Distributor	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.4	6.4.1	Update Device Configuratio	Import Supplier	30 seconds	16 seconds		

		n (Load Limiting General Settings)					
6.4	6.4.2	Update Device Configuration (Load Limiting Counter Reset)	Import Supplier	30 seconds	16 seconds		
6.5	6.5	Update Device Configuration (Voltage)	Electricity Distributor	30 seconds	16 seconds		
6.6	6.6	Update Device Configuration (Gas Conversion)	Gas Supplier	24 hours	24 hours		
6.7	6.7	Update Device Configuration (Gas Flow)	Gas Supplier	24 hours	24 hours		
6.8	6.8	Update Device Configuration (Billing Calendar)	Import Supplier, Gas Supplier	30 seconds	16 seconds		
6.11	6.11	Synchronise Clock	Import Supplier, Gas Supplier	30 seconds	16 seconds		
6.12	6.12	Update Device Configuration (Instantaneous Power Threshold)	Import Supplier	30 seconds	16 seconds		

6.13	6.13	Read Event or Security Log	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Registered Supplier Agent	30 seconds	16 seconds		
6.14	6.14.1	Update Device Configuration (Auxiliary Load Control Description)	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.14	6.14.2	Update Device Configuration (Auxiliary Load Control Scheduler)	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.14	6.14.3	Update Device Configuration (Auxiliary Controller Scheduler)	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.15	6.15.1	Update Security Credentials (KRP)	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter	30 seconds	16 seconds		
6.15	6.15.2	Update Security Credentials (Device)	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in

							respect of SMETS2+ Devices
6.17	6.17	Issue Security Credentials	Import Supplier, Gas Supplier	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.18	6.18.1	Set Maximum Demand Configurable Time Period	Electricity Distributor	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.18	6.18.2	Reset Maximum Demand Registers	Electricity Distributor	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.20	6.20.1	Set Device Configuration (Import MPxN)	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.20	6.20.2	Set Device Configuration (Export MPxN)	Export Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.21	6.21	Request Handover Of DCC Controlled Device Service Request	Import Supplier, Gas Supplier	30 seconds	16 seconds		
6.22	6.22	Configure Event Behaviour	Import Supplier, Gas Supplier, Electricity	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices

			Distributor,				
6.23	6.23	Update Security Credentials (CoS)	Import Supplier, Gas Supplier	35 seconds	21 seconds		
6.24	6.24.1	Retrieve Device Security Credentials (KRP)	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter	30 seconds	16 seconds		
6.24	6.24.2	Retrieve Device Security Credentials (Device)	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.25	6.25	Set Electricity Supply Tamper State	Import Supplier	30 seconds	16 seconds		
6.26	6.26	Update Device Configuration (daily resetting of Tariff Block Counter Matrix)	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.27	6.27	Update Device Configuration (RMS Voltage Counter Reset)	Electricity Distributor	30 seconds	16 seconds		

6.28	6.28	Set CHF Sub GHz Configuration	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.29	6.29	Request CHF Sub GHz Channel Scan	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.30	6.30	Read CHF Sub GHz Configuration	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.31	6.31	Read CHF Sub GHz Channel	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
6.32	6.32	Read CHF Sub GHz Channel Log	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.1	7.1	Enable Supply	Import Supplier	30 seconds	16 seconds		
7.2	7.2	Disable Supply	Import Supplier, Gas Supplier	30 seconds	16 seconds		
7.3	7.3	Arm Supply	Import Supplier,	30 seconds	16 seconds		

			Gas Supplier				
7.4	7.4	Read Supply Status	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Registered Supplier Agent	30 seconds	16 seconds		
7.5	7.5	Activate Auxiliary Load	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.6	7.6	Deactivate Auxiliary Load	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.7	7.7	Read Auxiliary Load Control Switch Data	Import Supplier, Electricity Distributor, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.8	7.8	Reset Auxiliary Load	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.9	7.9	Add Auxiliary Load To Boost Button	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices

7.10.	7.10.	Remove Auxiliary Load From Boost Button	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.11	7.11	Read Boost Button Details	Import Supplier, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.12	7.12	Set Randomised Offset Limit	Import Supplier	24 hours	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.13	7.13	Set Auxiliary Controller State	Import Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.14	7.14	Read Auxiliary Controller Configuration Data	Import Supplier, Electricity Distributor, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.15	7.15	Read Auxiliary Controller Operational Data	Import Supplier, Electricity Distributor, Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
7.16	7.16	Limit APC Level	None	n/a	n/a		Not used
8.1	8.1.1	Commission Device	Import Supplier, Gas Supplier	30 seconds	16 seconds		

8.2	8.2	Read Inventory	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Registered Supplier Agent, Other User	30 seconds	16 seconds	✓	
8.3	8.3	Decommission Device	Import Supplier, Gas Supplier	30 seconds	16 seconds	✓	
8.4	8.4	Update Inventory	Import Supplier, Gas Supplier, Registered Supplier Agent, Electricity Distributor, Gas Transporter, Export Supplier, Other User	30 seconds	16 seconds	✓	Where a Device has an SMI Status of 'pending' only the User that added the Device to the Smart Metering Inventory may either update the details of that Device, or delete that Device from the Smart Metering Inventory. For Devices with an SMI Status other than 'pending', only the Responsible Supplier may amend the SMI Status of that Device.
8.5	8.5	Service Opt Out	None	n/a	n/a		Not used
8.6	8.6	Service Opt In	None	n/a	n/a		Not used

8.7	8.7.1	Join Service (Critical)	Import Supplier, Gas Supplier	30 seconds	16 seconds		
8.7	8.7.2	Join Service (Non-Critical)	Import Supplier, Gas Supplier, Other User	30 seconds	16 seconds		1. The only Devices that Other Users may join are Type 2 Devices that are not IHDs 2. Where a Gas Proxy Function is to be joined to a Gas Smart Meter, any Gas Supplier or Import Supplier that is a Responsible Supplier for any Device which is associated with the same Communications Hub Function as the Gas Proxy Function may request this Join Service Request.
8.8	8.8.1	Unjoin Service (Critical)	Import Supplier, Gas Supplier	30 seconds	16 seconds		

8.8	8.8.2	Unjoin Service (Non-Critical)	Import Supplier, Gas Supplier, Other User	30 seconds	16 seconds		1. The only Devices that Other Users may unjoin are Type 2 Devices that are not IHDs 2. Where a Gas Proxy Function is to be unjoined from a Gas Smart Meter, any Gas Supplier or Import Supplier who is a Responsible Supplier for any Device which is associated with the same Communications Hub Function as the Gas Proxy Function may request this Unjoin Service Request.
8.9	8.9	Read Device Log	Import Supplier, Gas Supplier, Other User	30 seconds	16 seconds		

8.11	8.11	Update HAN Device Log	Import Supplier, Gas Supplier, Other User	30 seconds	16 seconds		Other Users may only add (or remove) Type 2 Devices that are not IHDs to (or from) a HAN Device Log.
8.12	8.12.1	Restore HAN Device Log	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
8.12	8.12.2	Restore GPF Device Log	Import Supplier, Gas Supplier	30 seconds	n/a		Any Gas Supplier or Import Supplier who is a Responsible Supplier for any Device which is associated with the same Communications Hub Function as the relevant Gas Proxy Function may request this Restore GPF Device Log Service Request. Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
8.13	8.13	Return Local Command Response	Import Supplier, Gas Supplier	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
8.14	8.14.1	Communications Hub Status Update-CHF Install Success SM WAN	Import Supplier, Gas Supplier,	30 seconds	n/a	✓	Users may only be Eligible Users for this Service in respect of SMETS2+ Devices

8.14	8.14.2	Communications Hub Status Update-CHF Install Success No SM WAN	Import Supplier, Gas Supplier	30 seconds	n/a	✓	Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
8.14	8.14.3	Communications Hub Status Update. – Fault Return	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	n/a	✓	Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
8.14	8.14.4	Communications Hub Status Update – No Fault Return	Import Supplier, Gas Supplier, Registered Supplier Agent	30 seconds	n/a	✓	Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
9.1	9.1	Request Customer Identification Number	Other User	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
11.1	11.1	Update Firmware	Import Supplier, Gas Supplier	24 hours	24 hours	✓	In respect of SMETS2+ Devices the DCC must ensure that the associated firmware update has been delivered to all relevant Communications Hub Functions within 5 days of receipt of the Service Request.
11.2	11.2	Read Firmware Version	Import Supplier, Gas Supplier,	30 seconds	16 seconds		

			Electricity Distributor, Gas Transporter, Export Supplier, Registered Supplier Agent, Other User				
11.3	11.3	Activate Firmware	Import Supplier, Gas Supplier	30 seconds	5 days		
11.4	11.4	Update PPMID Firmware	Import Supplier, Gas Supplier	24 hours	n/a	✓	In respect of SMETS2+ Devices the DCC must ensure that the associated firmware update has been delivered to all relevant Communications Hub Functions within 5 days of receipt of the Service Request.
12.1	12.1	Request WAN Matrix	Import Supplier, Gas Supplier, Registered Supplier Agent, Export Supplier, Electricity Distributor, Gas Transporter, Other User	30 seconds	n/a	✓	Users may only be Eligible Users for this Service in respect of SMETS2+ Devices
12.2	12.2	Device Pre-notification	Import Supplier, Gas	30 seconds	16 seconds	✓	

			Supplier, Registered Supplier Agent, Electricity Distributor, Gas Transporter, Export Supplier, Other User				
14.1	14.1	Record Network Data (GAS)	Gas Transporter	30 seconds	n/a		Users may only be Eligible Users for this Service in respect of SMETS2+ Devices

1 For the purposes of Section H3.11 (Categories of Service), Scheduled Services, On-Demand Services and Future-Dated Services are identified in the DCC User Gateway Interface Specification.

2 For Future-Dated Services, the Target Response Time shall be 30 seconds for an Update Security Credentials (COS) Service Request and shall be 24 hours for any other Service Request.

3 For Scheduled Services, the Target Response Time shall always be 24 hours.

4 Subject to paragraphs 2 and 3 above, the Target Response Time for Service Responses shall be as set out in the table above, in the column headed “SMETS2+ Target Response Time” or “SMETS1 Target Response Time” (as applicable, depending upon the Device to which the Service Response relates). In respect of SMETS2+ Devices, the Target Response Time for Service Responses refers to the period starting as described in Section H3.14 and ending on provision of the Service Response to the User, but only counting the processing time between (1) the DCC User Interface to the Communications Hub (inclusive); and/or (2) the Communications Hub to the DCC User Interface (inclusive). In respect of SMETS1 Devices, the Target Response Time for Service Responses refers to the period starting as described in paragraph 5 and ending on provision of the Service Response to the User, but only counting the processing time between (1) the DCC User Interface to the DCC SMETS1 Processing Systems (inclusive); and/or (2) the DCC SMETS1 Processing Systems to the DCC User Interface (inclusive). For the purpose of which, the "DCC SMETS1 Processing Systems" are the DCC Systems used to process communications and data relating to SMETS1 Devices, but excluding the SMETS1 SM WAN.

5 In relation to SMETS1 Devices, the start of the period referred to in paragraph 4 shall be:

(a) for SMETS1 Service Requests that are not a Sequenced Service, a Future Dated Service or a Scheduled Service, the receipt by the DCC of the relevant Service Request over the User Interface;

(b) for Sequenced Service Requests, the receipt by the DCC Individual Live System referred to at paragraph (a) of the definition of DCC Live Systems of the communication upon which the Service Request is dependent;

(c) for Future Dated Services or for Scheduled Services, the time and date for execution specified in the Service Request received by the DCC; or

(d) for SMETS1 Alerts and S1SP Alerts, the point in time at which the DCC SMETS1 Processing Systems have available to them the information that means that the relevant alert should be sent.

6 In the table above, where a "✓" appears in the column headed "Non-Device Service Request", this indicates that the Service Request described is a Non-Device Service Request.

7 The column of the table above headed "Notes":

(a) sets out further restrictions on which Users are eligible to receive the Services (and the definition of Eligible User and Eligible User Role will be interpreted accordingly); and

(b) sets out further restrictions that may apply, depending on the Device Type, that may be the target of a Service Request of that type from particular Users.

8 For the avoidance of doubt, none of the Services described in this Appendix attract an Explicit Charge.

9 The Monthly Service Metrics and Monthly Service Thresholds (referred to in Section H3.24 for reporting) are as set out in the table below. These shall not apply in respect of SMETS1 Smart Metering Systems. Accordingly, SMETS1 Service Requests and SMETS1 Smart Metering Systems shall be excluded from each of the calculations set out below.

Monthly Service Metric applies to Users acting in the following User Roles**	Monthly Service Metric applies to Service Requests for the following Services	Monthly Service Metric (excluding SMETS1 Service Requests and SMETS1 SMS)	Monthly Service Threshold
Import Supplier Gas Supplier	3.1 Display Message	The total over month m and the previous eleven months of the number of Service Requests; divided by the User ASMS$_m$.	24
Import Supplier Gas Supplier Export Supplier	4.8 Read Profile Data	The number of Service Requests in month m; divided by the number of Smart Metering Systems for which that User is a Responsible Supplier on the 15th day of month m.	The number of days in month m
Import Supplier Gas Supplier	11.1 Send Firmware	The total over month m and the previous eleven months of the number of Service Requests; divided by the User ASMS$_m$.	6
Electricity Distributor Gas Transporter	4.8 Read Profile Data	The number of Service Requests in month m; divided by the number of Smart Metering Systems for which the User is the Electricity Distributor or Gas Transporter on the 15th day of month m.	10^(-3) x 48 x the number of days in month m

Electricity Distributor Gas Transporter	4.8 Read Profile Data	The total over month m and the previous eleven months of the number of Service Requests; divided by the User $ASMS_m$.	4
Electricity Distributor	4.10 Read Network Data	The number of Service Requests in month m; divided the number of Smart Metering System for which the User is the Electricity Distributor or Gas Transporter on the 15th day of month m.	10^(-3) x the number of days in month m
Electricity Distributor	4.10 Read Network Data	The total over month m and the previous eleven months of the number of Service Requests; divided by the User $ASMS_m$.	4
Import Supplier Gas Supplier	11.4 Update PPMID Firmware	The total over month m and the previous eleven months of the number of Service Requests; divided by the User $ASMS_m$.	6

- In the above table, "User ASMSm" is determined in relation to each User and each month m as the mean of the numbers of Smart Metering Systems (excluding SMETS1 SMS) for which that User is a Responsible Supplier, Electricity Distributor or Gas Transporter (as applicable) on the 15th day of month m and on the 15th day of each of the previous 11 months.

- For each User, the "First Service Month" shall by the month following the month in which that User first sends a Service Request (of any type, but excluding SMETS1 Service Requests). No Monthly Service Metric shall be determined for a User in relation to any month prior to that User’s First Service Month.

- Where a Monthly Service Metric is to be determined for a User which includes a requirement to determine the number of Service Requests of a particular type sent over a time period which includes any time prior to that User’s First Service Month then:

  - the Monthly Service Metric for that User shall be the value determined in accordance with the table above, multiplied by twelve and divided by the number of months in that time period from (and including) the First Service Month; and

  - for the purposes of determining User ASMSm any months prior to the First Service Month shall be disregarded.

Version 1.0

APPENDIX F – MINIMUM COMMUNICATION SERVICES FOR SMETS1 METERS

Ref	Description	Eligible Users
1.1	Update Import Tariff (prepayment)	Import Supplier, Gas Supplier
1.1	Update Import Tariff (credit)	Import Supplier, Gas Supplier
1.2	Update Price (prepayment)	Import Supplier, Gas Supplier
1.2	Update Price (credit)	Import Supplier, Gas Supplier
1.5	Update Balance	Import Supplier, Gas Supplier
1.6	Update Payment Mode	Import Supplier, Gas Supplier
2.1	Update Prepay Configuration	Import Supplier, Gas Supplier
2.2	Top Up Device	Import Supplier, Gas Supplier
2.3	Update Debt	Import Supplier, Gas Supplier
2.5	Activate Emergency Credit	Import Supplier, Gas Supplier
3.2	Restrict Access – CoT	Import Supplier, Gas Supplier
3.3	Clear Event Log	Import Supplier, Gas Supplier
4.1	Read Instantaneous Import Register Values	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter
4.2	Read Instantaneous Export Register Values	Export Supplier, Electricity Distributor
4.3	Read Instantaneous Prepayment Register Values	Import Supplier, Gas Supplier
4.4	Retrieve Billing Data Log	Import Supplier, Gas Supplier

4.8	Read Profile Data	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Other User
4.10	Read Network Data	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter
4.11	Read Tariff	Import Supplier, Gas Supplier, Other User
4.16	Read Active Power Import	Import Supplier, Electricity Distributor
6.2	Read Device Configuration	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Registered Supplier Agent, Other User
6.4	Update Device Configuration (Load Limiting)	Import Supplier, Gas Supplier
6.5	Update Device Configuration (Voltage)	Electricity Distributor
6.6	Update Device Configuration (Gas Conversion)	Gas Supplier
6.7	Update Device Configuration (Gas Flow)	Gas Supplier
6.8	Update Device Configuration (Billing Calendar)	Import Supplier, Gas Supplier
6.11	Synchronise Clock	Import Supplier, Gas Supplier
6.12	Update Device Configuration (Instantaneous Power Threshold)	Import Supplier, Gas Supplier
6.13	Read Event or Security Log	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Registered Supplier Agent
6.15	Update Security Credentials	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter
6.23	Update Security Credentials (CoS)	Import Supplier, Gas Supplier
7.1	Enable Supply	Import Supplier
7.2	Disable Supply	Import Supplier, Gas Supplier

7.3	Arm Supply	Import Supplier, Gas Supplier
7.4	Read Supply Status	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Registered Supplier Agent
11.1	Update Firmware	Import Supplier, Gas Supplier
11.2	Read Firmware Version	Import Supplier, Gas Supplier, Electricity Distributor, Gas Transporter, Export Supplier, Registered Supplier Agent, Other User

Version G 3.0

Appendix G

DCC Gateway Connection Code of Connection

DEFINITIONS

Connection Period	means the period for which a DCC Gateway Connection is to be provided, as determined in accordance with the provisions of clause 1.6 of this document or pursuant to section H15.18(c) of the Code.
Contractual Bandwidth	means, in relation to any particular DCC Gateway HV Connection, the maximum number of megabits of data that are permitted to be transmitted each second over that connection.
DCC Gateway Connection Performance Report	means a monthly report relating to the performance of a DCC Gateway Connection containing the information set out in clauses 1.29 to 1.31 of this document.
Electronic Site Review	means a remote, desk-based assessment of the location at which the DCC Gateway Connection is required to assess whether a physical Site Survey is required.
Enabling Works	means any building or civil works, including laying of cables and gaining the necessary wayleaves or consents, required to be undertaken by a DCC Gateway Party and/or the DCC, to enable the DCC to provide a DCC Gateway Connection.
Inbound	means ‘to the DCC Gateway Equipment’.
Load	means the number of bits transferred in a given interval divided by the duration of that interval, expressed in bits per second.
Maximum Physical Bandwidth	means 100 megabits per second (Mbps) or such increases as may be notified to DCC Gateway Parties by the DCC from time to time.
Outbound	means ‘from the DCC Gateway Equipment’.
Site Survey	means a physical assessment of the location at which the DCC Gateway Connection is required, to assess whether any Enabling Works are required inside and/or outside the DCC Gateway Party’s premises and to detail preparatory works to be carried out by the DCC Gateway Party to be reflected in the offer made pursuant to section H15.12 of the Code.

1. DCC GATEWAY CONNECTIONS

1.1 Section H15 sets out principal rights and obligations applying to the provision of DCC Gateway Connections which are supplemented by the provisions set out below.

General Obligations

1.2 A DCC Gateway LV Connection will provide a download bandwidth of up to 40Mbps and an upload bandwidth of up to 10Mbps or such increases as may be notified to DCC Gateway Parties by the DCC from time to time.

1.3 A DCC Gateway HV Connection will provide a bandwidth of up to the Maximum Physical Bandwidth, which can be specified in increments of 10Mbps.

1.4 Each Party that wishes to establish a DCC Gateway Connection shall submit a request for a connection. Such request shall specify the DCC Gateway Bandwidth Option and:

(a) in the case of a request for a DCC Gateway LV Connection, the Connection Period; or

(b) in the case of a request for a DCC Gateway HV Connection;

(i) the required Contractual Bandwidth in relation to that connection, provided that the Contractual Bandwidth for any connection shall be an integer multiple of 10Mbps, and shall not exceed the Maximum Physical Bandwidth;

(ii) and the Connection Period; and

shall be made using the application form for such requests as published on the DCC Website.

1.5 Following a request for a connection being submitted, the DCC and the Party that submitted the request shall inform each other of the contact details of one or more persons working for their respective organisations for the purposes of communications associated with the establishment and management of DCC Gateway Connection(s). The following information shall be provided in relation to each such person (and shall subsequently be kept up to date by the providing Party):

(a) contact name;

(b) contact email;

(c) contact telephone;

(d) contact role(s);

(e) contact address;

and any other contact details as may be reasonably required by the DCC or the other Party from time to time.

Connection Mechanisms and Period of Connection

1.6 Where a DCC Gateway Party wishes to procure a DCC Gateway Connection:

(a) the connection may be requested for an initial period of either one or three years from the point at which the connection becomes capable of operation; and

(b) the DCC shall notify the DCC Gateway Party when the connection becomes capable of operation.

1.7 Where a DCC Gateway Party requests multiple DCC Gateway Connections for a single location at the same time, the DCC shall take all reasonable steps to conduct any Site Surveys in a single visit to that location.

1.8 Where any Enabling Works are required, the DCC Gateway Party and the DCC shall inform each other of the progress and completion of the Enabling Works.

1.9 In the event that a DCC Gateway Party wishes to decrease the Contractual Bandwidth of its DCC Gateway HV Connection during its Connection Period:

(a) the DCC Gateway Party shall inform the DCC, provided that the requested decrease shall be an integer multiple of 10Mbps;

(b) the DCC shall reduce the Contractual Bandwidth accordingly as soon as is reasonably practicable and in any event within 30 days of being informed of the required adjustment; and

(c) the DCC shall provide the DCC Gateway Party with advance notice of the date from which the adjusted Contractual Bandwidth shall take effect.

1.10 In the event that a DCC Gateway Party wishes to increase the Contractual Bandwidth of its DCC Gateway HV Connection during its Connection Period:

(a) the DCC Gateway Party shall inform the DCC, provided that the requested increase shall be an integer multiple of 10Mbps, and shall not exceed the Maximum Physical Bandwidth of that connection;

(b) the DCC shall confirm to the DCC Gateway Party the applicable charges arising from the increase as soon as reasonably practicable and in any event within 5 Working Days;

(c) following notification of the applicable charges, the DCC Gateway Party shall, within 30 days, confirm to the DCC that the DCC Gateway Party wishes to proceed with the increase (and where no such confirmation is provided within 30 days, the DCC's offer to increase the bandwidth at the notified applicable charge shall lapse);

(d) where the DCC receives confirmation from the DCC Gateway Party within 30 days that it wishes to proceed with the increase, the DCC shall increase the Contractual Bandwidth accordingly as soon as is reasonably practicable and in any event within 30 days of receiving such confirmation; and

(e) the DCC shall provide the DCC Gateway Party with advance notice of the date from which the adjusted Contractual Bandwidth shall take effect.

Installation, Maintenance and Removal of DCC Gateway Equipment

1.11 Sections H15.20 to H15.28 set out principal rights and obligations relating to DCC Gateway Equipment which are supplemented with the provisions set out below.

1.12 Where the DCC is undertaking works at the DCC Gateway Party's premises for the purposes of installation, maintenance or removal of DCC Gateway Equipment, the DCC shall take all reasonable steps to avoid interrupting the DCC Gateway Party's existing telecommunications services at those premises. In the event that it is necessary to interrupt the DCC Gateway Party's existing telecommunications services:

(a) the DCC shall take all reasonable steps to provide the DCC Gateway Party with advance notice of the interruption; and

(b) the DCC Gateway Party shall have the right to request that such interruption be rescheduled, such request not to be unreasonably withheld or delayed by the DCC.

1.13 Where the DCC Gateway Party's existing telecommunications services are interrupted as a result of DCC undertaking works as set out in clause 1.12, the DCC shall:

(a) take all reasonable steps to minimise the length and impact of the interruption; and

(b) ensure that the telecommunications services are restored as soon as is reasonably practicable and in any event immediately following the completion of the works.

1.14 Where maintenance undertaken by the DCC requires the replacement of DCC Gateway Equipment:

(a) the DCC shall remove that equipment within 30 days of the date of the replacement activity; and

(b) in the event that such equipment is not removed within 30 days, the DCC Gateway Party may dispose of the equipment and shall notify the DCC at least 5 days prior to disposing of the DCC Gateway Equipment, provided that the DCC shall have the right to remove the equipment prior to the end of that 5 day period.

1.15 Subject to the obligations in Sections H15.20, H15.21, and H15.28(b) for the DCC to act in accordance with Good Industry Practice, the DCC shall not be responsible for or liable to the DCC Gateway Party for making good any minor repairs to decoration that have become necessary as a result of the DCC's installation, maintenance or removal of DCC Gateway Equipment.

1.16 Each DCC Gateway Party shall make available to the DCC all information, facilities and services reasonably required by the DCC to carry out installation, maintenance or removal of DCC Gateway Equipment.

1.17 Where reasonably requested by a DCC Gateway Party, the DCC shall provide such information as required by the DCC Gateway Party in order to facilitate the installation, maintenance or removal of DCC Gateway Equipment. Following receipt of that information, the DCC Gateway Party shall have the right to reschedule the visit by the DCC. The DCC Gateway Party acknowledges that rescheduling of the visit required for installation may give rise to the DCC notifying a revised connection date pursuant to H15.15 and that rescheduling the visit for maintenance or removal may give rise to corresponding delays for the completion of that maintenance or removal.

1.18 Subject to Section H15.24, and except where such steps are necessary on security or safety grounds, each DCC Gateway Party shall not take any steps that may affect the operation of the DCC Gateway Connection without prior agreement of the DCC, such agreement not to be unreasonably withheld or delayed, and shall ensure that no person other than the DCC undertakes any maintenance of the DCC Gateway Equipment.

1.19 The DCC Gateway Party shall implement and maintain controls to ensure the physical security of the DCC Gateway Equipment, including that only appropriately authorised persons have access to such equipment, and that this access is recorded in a log maintained for that purpose.

1.20 The DCC shall take all reasonable steps to comply with any DCC Gateway Party's reasonable requests in respect of installation or relocation of DCC Gateway Equipment. The DCC Gateway Party shall be entitled to make the final decision on the routing of cables and location of the DCC Gateway Equipment, subject to such decision not impacting on the DCC's ability to provide and maintain the DCC Gateway Connection.

1.21 The DCC may modify or replace the DCC Gateway Equipment where necessary to maintain the operation of the DCC Gateway Connection, provided that such modification or replacement does not materially diminish the performance of the DCC Gateway Connection, and only after giving reasonable notice of the need to modify or replace the DCC Gateway Equipment to the DCC Gateway Party.

1.22 The DCC shall wherever possible carry out maintenance of the DCC Gateway Equipment installed at a DCC Gateway Party's site remotely, using the network connection itself to gain access to the DCC Gateway Equipment:

(a) where reasonably practicable, the DCC shall provide reasonable advance notice to the DCC Gateway Party of such maintenance;

(b) such advance notice shall be provided to a contact nominated to the DCC for that purpose by the DCC Gateway Party, or otherwise the contact provided pursuant to clause 1.5; and

(c) the DCC Gateway Party shall have the right to request that the maintenance is rescheduled, such request not to be unreasonably withheld or delayed by the DCC.

1.23 The DCC and each DCC Gateway Party shall provide sufficient information to each other to enable the establishment and maintenance of the network layer connectivity across the DCC Gateway Connection.

1.24 The DCC shall give the DCC Gateway Party reasonable notice of required site visits to perform installation, maintenance or removal of DCC Gateway Equipment and the DCC shall accommodate the DCC Gateway Party's reasonable requests regarding the timing of such visits.

Reporting Obligations

1.25 Where a DCC Gateway Party notifies the DCC that the DCC Gateway Party wishes to receive DCC Gateway Connection Performance Reports, the DCC shall provide such DCC Gateway Connection Performance Reports, in accordance with clause 1.26, until notified by the DCC Gateway Party that it no longer wishes to receive such reports. The DCC shall notify DCC Gateway Parties of the DCC contact details for these purposes.

1.26 By the end of the 10th Working Day following the end of each calendar month, the DCC shall provide each DCC Gateway Party who has requested a report pursuant to clause 1.25 with a DCC Gateway Connection Performance Report for each of their DCC Gateway Connections for the previous calendar month (the 'reporting period').

1.27 The DCC shall provide DCC Gateway Connection Performance Reports to DCC Gateway Parties via an appropriate mechanism (as reasonably determined by the DCC) and notify each DCC Gateway Party of such mechanism. Where the DCC first proposes a mechanism or proposes to change the mechanism for the provision of the DCC Gateway Connection Performance Reports, the DCC shall:

(a) undertake reasonable consultation with DCC Gateway Parties regarding the proposed mechanism or the proposed modification thereto;

(b) give due consideration to, and take into account, any consultation responses received;

(c) publish a statement of its reasons for proposing or modifying the mechanism, as applicable, together with copies of any consultation responses received; and

(d) provide reasonable notice to DCC Gateway Parties of the mechanism or any changes in the mechanism, as applicable.

1.28 The DCC shall ensure that each DCC Gateway Connection Performance Report is made available to be accessed (via the mechanism described in clause 1.27) by the relevant DCC Gateway Party at any time in the six month period following the provision of the report.

1.29 The DCC shall ensure that each DCC Gateway Connection Performance Report shall include values for each of the data elements set out in Table 1 (DCC Gateway Connection performance measures) in respect of the performance of the relevant DCC Gateway Connection during the reporting period.

1.30 The DCC shall ensure that each DCC Gateway Connection Performance Report is provided in a Portable Document Format (PDF).

1.31 The DCC shall provide the data (recorded in per minute intervals) used to calculate the values for each of the data elements set out in Table 1in a separate file in Comma Separated Variable (CSV) format except those data that relate to:

(a) changes in values between the relevant reporting period and the preceding reporting period;

(b) calculation of Jitter and Latency (as defined in Table 1 below); and

(c) outages and availability (as defined in Table 1 below).

Table 1: DCC Gateway Connection performance measures

Data element	**Description**
95th percentile Load Inbound	Load Inbound values for each minute during the reporting period shall be ranked from highest to lowest and the top five percent shall be discarded. The highest value of those which remain shall be the 95th percentile Load Inbound.
95th percentile Load Outbound	Load Outbound values for each minute during the reporting period shall be ranked from highest to lowest and the top five percent shall be discarded. The highest value of those which remain shall be the 95th percentile Load Outbound.
95th percentile utilisation Inbound	The 95th percentile Load Inbound as a proportion of the Contractual Bandwidth, expressed as a percentage.
95th percentile utilisation Outbound	The 95th percentile Load Outbound as a proportion of the Contractual Bandwidth, expressed as a percentage.

Availability	The percentage of time for which the DCC Gateway Equipment or the network used by the DCC to transfer data to or from the DCC Gateway Equipment, was available during the reporting period.
Average Load Inbound	The mean value of Load Inbound during the reporting period.
Average Load Outbound	The mean value of Load Outbound during the reporting period.
Average utilisation Inbound	The mean Load Inbound during the reporting period as a proportion of the Contractual Bandwidth, expressed as a percentage.
Average utilisation Outbound	The mean Load Outbound during the reporting period as a proportion of the Contractual Bandwidth, expressed as a percentage.
Change in the 95th percentile Load	The difference in the 95th percentile Load Inbound or Outbound between the reporting period and the preceding reporting period, whichever difference is greater (the highest absolute value, ignoring the sign), as a proportion of the equivalent Load for the preceding reporting period, expressed as a percentage.
Change in volume	The difference in the total amount of data transferred Inbound or Outbound between the reporting period and the preceding reporting period, whichever difference is greater (the highest absolute value, ignoring the sign), as a proportion of the equivalent value for the preceding reporting period, expressed as a percentage.
Discards	The total number of data packets not delivered due to network routing issues during the reporting period.
Errors	The total number of data packets where discrepancies were identified during transmission in the reporting period, expressed as a percentage.
Jitter	The time, in milliseconds, measuring the variation in latency. The interval over which the variation is measured is determined in accordance with Good Industry Practice.
Latency	The time, in milliseconds, taken for a test ping to be transferred Inbound and Outbound.
Outages	The total time, in minutes, for which the DCC Gateway Equipment or the network used by the DCC to transfer data to or from the DCC Gateway Equipment was not available during the reporting period.
Peak Load Inbound	The highest single value of Load Inbound during the reporting period.

Peak Load Outbound	The highest single value of Load Outbound during the reporting period.
Peak utilisation Inbound	The peak Load Inbound during the reporting period as a proportion of the Contractual Bandwidth, expressed as a percentage.
Peak utilisation Outbound	The peak Load Outbound during the reporting period as a proportion of the Contractual Bandwidth, expressed as a percentage.
Volume Inbound	The total amount of data Inbound during the reporting period, expressed in bytes.
Volume Outbound	The total amount of data Outbound during the reporting period, expressed in bytes.

Version H 3.0

APPENDIX H

CH Handover Support Materials

Definitions

Advanced Shipment Notification (or ASN)	means, in relation to a Region, the notification containing the information listed in Annex A of this document under ‘Advanced Shipment Notification’ identified as being provided in relation to that Region.
Cellular Communications Hub	means a WAN Variant in the Central Region and the South Region which is capable of using mobile cellular radio technology to connect to the SM WAN.
Central Region	means the Region which covers the majority of Wales and the majority of central England.
CH Delivery and Returns	means the OMS Account profile which enables the user of an OMS Account with this profile or the DCC on their behalf to carry out the following activities on the OMS: a. the viewing and amendment of Communication Hub Consignments; b. the viewing and downloading of Advanced Shipment Notifications; c. the creation, acceptance and rejection of requests to return Communications Hubs and Communications Hub Auxiliary Equipment to the DCC; and d. the maintenance of Delivery Location information and Party contact details in relation to Communications Hub Orders.
CH Ordering	means the OMS Account profile which enables the user of an OMS Account with this profile or the DCC on their behalf to carry out the following activities on the OMS: a. the creation, submission, viewing, and amendment of Communications Hub Forecasts, Communications Hub Orders; b. the creation of Delivery Location information; and c. all activities that can be carried out under an OMS Account with the CH Delivery and Returns profile.
CH Supporting Information	means the materials identified as such which: a. are published by the DCC on the DCC Website; and b. contain the information required by clause 1.4 of this document.
CH Query	means the OMS Account profile which enables the user of an OMS Account with this profile or the DCC on their behalf to carry out the following activities on the OMS: a. the viewing of Communication Hub Consignments, Communications Hub Forecasts, Communications Hub Orders; and b. the viewing and downloading of Advanced Shipment Notifications.
CHF Identifier	has the meaning given to that term in the CHTS.
Communications Hub Variants	means variations of Communications Hubs describing their HAN and WAN communications characteristics.

Communications Hub Transfer Reference	means a reference that is unique to a Communications Hub Transfer and which is first notified as set out in clause 9.1.
Coverage Area	means the geographical coverage of the SM WAN at a point in time.
Delivery Issues Report Notification (or DIRN)	means the report provided to a Party by the DCC pursuant to clause 6.23.
Delivery Note	means, in relation to a Region, the documentation containing the information listed in Annex A under 'Delivery Note' identified as being provided in relation to that Region.
Dual Band Communications Hub	a HAN Variant which is capable of using 2.4GHz and Sub GHz frequencies for communication on the Home Area Network (HAN).
GPF Identifier	has the meaning given to that term in the CHTS.
Installation Location	means the location of the premises at which a Communications Hub is planned to be, or has been, installed.
M1 Aerial Type	means the low gain mesh aerial type in the Central Region and the South Region further described in the Communications Hub Supporting Information and which may not be ordered by Parties but is supplied and fitted directly by DCC.
M2 Aerial Type	means the high-gain mesh aerial type in the Central Region and the South Region further described in the Communications Hub Supporting Information and which may not be ordered by Parties but is supplied and fitted directly by DCC.
Mesh Communications Hub	means a WAN Variant in the Central Region and the South Region which is capable of using both mobile cellular radio technology and wireless mesh radio technology to connect to the SM WAN.
North Region	means the Region which covers the majority of Scotland and the majority of northern England.
OMS Account	means an arrangement by which a user is given access to an OMS profile by entering a unique username and password.
OMS Order Reference	means a reference that is unique to a Communications Hub Order and which is first notified as set out in clause 3.19.
Order Management System (or **OMS)**	means the systems comprising part of the CH Ordering System and which are used for: a. the submission of information comprising Communications Hub Forecasts and Communications Hub Orders;

	b. the management and tracking of Communications Hub Orders and deliveries of Communications Hubs and Communications Hub Auxiliary Equipment; and c. the rejection, return or replacement of Communications Hubs and Communications Hub Auxiliary Equipment.
Significant Metallic Obstruction	has the meaning given to that term in the CH Installation and Maintenance Support Materials.
Single Band Communications Hub	means a HAN Variant which is only capable of using 2.4GHz frequency for communication on the Home Area Network (HAN).
South Region	means the Region which covers the majority of southern England.
Special Installation Mesh Communications Hub	means a WAN Variant in the Central Region and the South Region which provides two external aerial ports on the front face to enable connection of two external aerials – one cellular (either a T1 Aerial Type, T2 Aerial Type or T3 Aerial Type) and one mesh (either an M1 Aerial Type or M2 Aerial Type). This WAN variant may not be ordered by Parties but is supplied and fitted directly by DCC
T1 Aerial Type	means the low gain aerial type in the Central Region and the South Region further described in the Communications Hub Supporting Information and which do not comprise part of the Communications Hub and may be ordered as Communications Hub Auxiliary Equipment.
T2 Aerial Type	means the high gain aerial type in the Central Region and the South Region further described in the Communications Hub Supporting Information and which do not comprise part of the Communications Hub and may be ordered as Communications Hub Auxiliary Equipment.
T3 Aerial Type	means the high gain aerial type in the Central Region and the South Region further described in the Communications Hub Supporting Information and which may not be ordered by Parties but is supplied and fitted directly by DCC.
Transfer Note	means, in relation to a Communications Hub Transfer, the documentation containing the information listed in Annex A under 'Delivery Note' identified as being provided in relation to that transfer.
Transfer Window	means, in relation to a Communications Hub Transfer, the collection window (of at least four hours) on the Transfer Date, as agreed under Clause 9.
Working Hours	for the purposes of this document, means the period between 07:00 and 17:00 during a Working Day.

1. INTRODUCTION

Document purpose

1.1 This document is the CH Handover Support Materials, and forms Appendix H of the Code.

General clarifications

1.2 Unless expressly stated otherwise, the obligations in this document are applicable in relation to all Regions.

1.3 Unless expressly stated otherwise, none of the obligations in this document apply to Test Communications Hubs.

1.4 The DCC shall publish the CH Supporting Information on the DCC website, which shall include the following information:

(a) information regarding Advance Shipment Notification format for Communications Hubs and Aerial Types that can be ordered through OMS;

(b) additional diagrammatical information supporting the definition of Significant Metallic Obstruction;

(c) a description of the way in which LED indicators depict the operational status of a Communications Hub; and

(d) a description of the aerial types DCC makes available within the South Region and Central Region (T1 Aerial Type, T2 Aerial Type, T3 Aerial Type, M1 Aerial Type and M2 Aerial Type).

1.5 Prior to first publication of, and any subsequent modification to the CH Supporting Information the DCC shall:

(a) undertake reasonable consultation with Parties regarding its content or any proposed modification thereto;

(b) give due consideration to, and take into account, any consultation responses received; and

(c) publish a statement of its reasons for including or modifying content, as applicable, together with copies of any consultation responses received that are not marked as confidential.

1.6 The DCC shall publish the initial CH Supporting Information and any subsequently modified versions on the DCC Website as soon as reasonably practicable following the completion of the activities set out in clause 1.5.

2. ORDER MANAGEMENT SYSTEM

2.1 Subject to the remaining provisions set out in clauses 2.1 to 2.7 of this document, the DCC shall provide each Party with access to the Order Management System (OMS) for each Region via:

(a) the Self-Service Interface; and

(b) a public internet link.

Access to the OMS

2.2 A Party other than the DCC shall only access the OMS via an OMS Account.

2.3 Any Party first seeking to access the OMS for a Region shall submit a valid request for one or more OMS Accounts via the Service Desk.

2.4 Each Party may request access for OMS Accounts in relation to each Region. DCC shall provide four OMS Accounts per Region at no additional Charge. A Party may request more than four OMS Accounts per Region, subject to Section F5.23.

2.5 A request for an OMS Account shall be considered valid if it includes:

(a) the Party Signifier for the Party making the request;

(b) a username comprised of an email address for each OMS Account being requested, which shall not be used for any other accounts accessing the OMS for that Region;

(c) the OMS profile(s) to be associated with each OMS Account being requested; and

(d) the Region for which access is being requested.

2.6 The DCC shall provide a password to be associated with each individual OMS Account to the requesting Party no later than four Working Days following the receipt of a valid request for an OMS Account. The requesting Party may then use the combination of username and password to access the relevant instance of the OMS.

2.7 A Party may request a change to the OMS profile(s) that are available via an OMS Account, modify the OMS Account or close the OMS Account by submitting a request to the Service Desk. The DCC shall implement such a change no later than four Working Days following the receipt of such a request and shall notify the Party on the day of completion.

3. FORECASTING AND ORDERING COMMUNICATIONS HUBS

Communications Hub Forecasts

3.1 Following receipt of a Communications Hub Forecast or the deeming of a Communications Hub Forecast by the DCC in accordance with Section F5.6, the DCC shall notify via email to all OMS Accounts associated with that Party that the following information is available via the OMS:

(a) a unique reference for the relevant Communications Hub Forecast; and

(b) the associated date, which shall be:

(i) where a Communication Hub Forecast has been submitted by a Party, the date of submission; or

(ii) where the Communications Hub forecast has not been submitted by a Party, the date at which the DCC has deemed that forecast.

SM WAN coverage information

3.2 The DCC shall provide Parties with information regarding SM WAN coverage at potential Installation Locations and the WAN Variant (and, where applicable, the Communications Hub Auxiliary Equipment) required for each Installation Location via the SM WAN Coverage Database. The DCC shall make the SM WAN Coverage Database information available via:

(a) the Self Service Interface;

(b) responses to Service Request 12.1 (Request WAN matrix); or

(c) a reasonable alternative method, as specified by the DCC, where the methods specified in clauses 3.2(a), 3.2(b) are not available.

3.3 Where a Party requires SM WAN coverage information for an Installation Location where there is no associated postcode in DCC Systems, the Party may raise a Service Management Service Request with the DCC, and in so doing shall provide the geographic latitude and longitude, for the Installation Location. The DCC shall resolve the Service Management Service Request by providing SM WAN coverage information for the Installation Location to the Party which raised the matter, and by additionally allocating the Installation Location to a Region.

Delivery Locations

3.4 A Party shall provide Delivery Locations on the OMS using the CH Ordering profile and shall provide and maintain the following information for each Delivery Location:

(a) the full delivery address;

(b) operating hours; and

(c) the name, email address, and telephone number for a nominated contact in relation to Communications Hubs Orders.

3.5 The DCC shall ensure that the OMS allows each Party using the CH Ordering profile to select a maximum of two Delivery Locations for each Communications Hub Order.

Deemed Communications Hub Orders

3.6 Where, in accordance with Section F5.13(c), the DCC deems the quantities of Communications Hubs to be included in a Communications Hub Order for a Party, it shall inform via email notification to all OMS Accounts associated with that Party that a deemed order has been made and make available, via the OMS, details of the deemed quantity of each Device Model and of any Communications Hub Auxiliary Equipment.

3.7 Where a Party receives a notification in accordance with clause 3.6, that Party shall specify a Delivery Location or Delivery Locations for the Communications Hub Order within two Working Days and shall comply with, and provide the further information set out in, clauses 3.13 and 3.14.

3.8 Where a Party has not specified a Delivery Location or Delivery Locations, or provided the other information required, in accordance with clause 3.7, the DCC shall specify the Communications Hub Order Delivery Location or Delivery Locations using Delivery Locations provided for any previous orders and, specify the further information set out in, clauses 3.13 and 3.14.

3.9 Where the DCC has determined the Delivery Location(s) pursuant to clause 3.8 and the relevant Party has not notified the DCC within 30 days of the DCC's notification pursuant to clause 3.6, that the extant delivery details are correct, then the relevant Party shall be deemed to have requested cancellation of the

Consignment or Consignments (and Section F5.19 shall be deemed to apply). The DCC shall notify that such a request has been deemed, via an email to all OMS Accounts associated with that Party.

Submitting Communications Hub Orders

3.10 When submitting a Communications Hub Order, each Party shall ensure that only such Communications Hub Variants and Communications Hub Auxiliary Equipment are ordered as it may reasonably require to:

(a) complete planned installations using the WAN Variants and Communication Hub Auxiliary Equipment that are indicated as required for the relevant Installation Location(s) on the SM WAN Coverage Database;

(b) conform to the proportions of T1 Aerial Type and T2 Aerial Type estimated as necessary within the CH Supporting Information to provide for Mesh Communications Hub installations; and

(c) maintain sufficient stock to resolve coverage Incidents and Communication Hub faults as described in the CH Installation and Maintenance Support Materials.

3.11 Where a Party submits a Communications Hub Order for the Central Region or the South Region that results in greater than 10% of the total number of Communications Hubs in the Communications Hub Order being Mesh Communications Hubs, the DCC may request an explanation why the quantity of Mesh Communications Hubs ordered is required and where such an explanation is requested the Party shall provide the explanation via email promptly.

3.12 Each Party shall ensure that its Communications Hubs Order is such that it would not result in a requirement for the DCC to deliver a single Consignment that comprises only Communications Hub Auxiliary Equipment.

3.13 In addition to complying with the requirements set out in Section F5.8, for each Communications Hub Order that it submits, a Party shall:

(a) request delivery to no more than two Delivery Locations per Region;

(b) request delivery to each Delivery Location no more than once in any single week; and

(c) specify a Delivery Date and associated Delivery Window that is within Working Hours.

3.14 A Party submitting a Communications Hub Order shall ensure that for each delivery that will result from that Communications Hub Order and in relation to the Region to which the Order relates:

(a) the number of each Communications Hub Variant is an integer multiple of the quantity of Communications Hubs that are contained in a carton for that Communications Hub Variant, as specified in Annex B of this document;

(b) the total number of Communications Hubs ordered is such that a pallet layer contains the total number of cartons for that pallet layer as specified in Annex B of this document and only contains a single Communications Hub Variant; and

(c) the total number of Communications Hubs is greater than or equal to the quantity of Communications Hubs contained in a complete standard pallet, as specified in Annex B of this document.

3.15 The DCC shall package and load Communications Hubs as described in Annex D of this document.

3.16 The DCC shall make available to a Party via the CH Ordering System at least one contact telephone number and email address for the DCC which is relevant to each Communications Hub Order placed by that Party for the purposes of allowing a Party to request amendments to Delivery Locations, Delivery Dates, or Delivery Windows in relation to a Communications Hub Order that it has submitted.

3.17 A Party shall make available to the DCC via the CH Ordering System at least one contact telephone number and email address for that Party which is relevant to each of its Communications Hub Orders, which shall be used by the DCC for any email or telephone communications regarding the order.

3.18 For each Communications Hub Order, where the DCC identifies an opportunity for consolidation of a Party's Consignments into a single delivery vehicle, the DCC may request permission to amend a Communications Hub Order to enable such consolidation. The agreement of the Party to such a request shall not be unreasonably withheld.

Order Verification and Acceptance

3.19 The notification that the DCC is required to provide pursuant to Section F5.16 shall be provided by the DCC via email to all OMS Accounts associated with that Party notifying that information is available via the OMS. Such information will consist of the following;

(a) an OMS Order Reference; and

(b) confirmation that the Communications Hub Order is:

(i) compliant with the requirements of Section F5 (and therefore accepted without amendment); or

(ii) not compliant with the requirements of Section F5.

3.20 Where a notification has been made of the type set out in clause 3.19(b)(ii), the further notification that DCC is required to provide pursuant to Section F5.17 shall be provided by the DCC via email to all OMS Accounts associated with that Party notifying that information is available via the OMS. The information on the OMS shall state whether the Order is:

(a) accepted, in full and is not subject to amendment;

(b) accepted, in part or is subject to amendment; or

(c) rejected;

and in each case

(d) the reason for the decision.

3.21 In the event that a Party submits a Communications Hub Order, or subsequently seeks to amend that order pursuant to clause 4.3, that would result in one or more deliveries that do not meet the conditions set out in clause 3.12, 3.13 and 3.14, such an order shall be deemed to be a request for non-standard delivery instructions in accordance with Section F6.17.

3.22 Where a Party has or has been deemed to have requested non-standard delivery instructions, the DCC shall provide a non-binding estimate of any applicable Charge for that Communications Hub Order to that Party within five Working Days of receipt of such request.

3.23 On receipt of an estimate of the applicable non-standard delivery Charge pursuant to clause 3.22, the relevant Party shall, within five Working Days, either;

(a) leave the non-standard delivery order unchanged on the OMS, and therefore be deemed to have agreed to pay any applicable Explicit Charges pursuant to Sections F6.17 and K7.5(k); or

(b) amend the relevant Communications Hub Order via the OMS using the CH Ordering profile such that it no longer results in non-standard delivery instructions.

4. ORDER MANAGEMENT

Non-standard cancellation of Consignments

4.1 Pursuant to Section F5.19, a Party wishing to obtain an estimate of costs and expenses in relation to the cancellation of a Consignment shall submit a request for this estimate by contacting the Service Desk.

4.2 Where pursuant to Section F5.19 a Party wishes to cancel a Consignment, its notification to this effect must be provided to the Service Desk.

Delivery Date and Time Amendments

4.3 Following acceptance of a Communications Hub Order by the DCC, a Party may request amendments to the Delivery Date or Delivery Window for a Consignment up to 30 days prior to the original Delivery Date. Such requests shall be submitted via the OMS through a direct update to the order details using the CH Ordering profile.

4.4 Any request by a Party for an amendment pursuant to clause 4.3, in addition to the provisions in clauses 3.13 and 3.14, is subject to the following restrictions:

(a) the revised Delivery Date for a Consignment must be a Working Day within five days of the original Delivery Date and within the same Delivery Month; and

(b) the revised Delivery Window for a Consignment must be within Working Hours.

4.5 In the event that a Party wishes to request an amendment to the Delivery Date or Delivery Window for a Consignment within 30 days of the Delivery Date, or where the Party wishes to request an amendment to the Delivery Location because exceptional circumstances mean that delivery to the original specified Delivery Location is no longer practicable, that Party shall contact the DCC directly using the contact details set out in clause 3.16; in this event the restrictions as detailed in clause 4.4 shall apply and DCC may specify further reasonable restrictions which shall be notified via telephone or email and may deem such a request to be a request for non- standard delivery instructions.

4.6 Where the DCC deems such a request to be a request for non-standard delivery instructions, clause 3.22 shall apply. Upon receipt of an estimate of the applicable non-standard delivery Charge, the relevant Party shall, within five Working Days, either;

(a) leave the non-standard delivery order unchanged on the OMS, in which case, the Party shall be deemed to have withdrawn its request for an amendment pursuant to 4.5; or

(b) notify the DCC of its agreement to pay any applicable Explicit Charges pursuant to Sections F6.17 and K7.5(k) and the DCC shall update the OMS accordingly.

4.7 The DCC may consider an amendment to the Delivery Date or Delivery Window for a Consignment made within five Working Days of the Delivery Date, but shall not be obliged to do so.

4.8 Where the DCC has not deemed a request pursuant to clause 4.5 to be a request for non-standard delivery instructions, the DCC shall confirm acceptance of any request made by a Party in accordance with clause 4.5 and the DCC shall update the OMS to reflect the amendments agreed with the Party, as soon as is reasonably practical and in any event within five Working Days of the request having been made.

4.9 Where pursuant to clause 4.8 the DCC confirms to a Party that a change to the Delivery Date or Delivery Window, or Delivery Location is accepted; the DCC shall be obliged to deliver the Communications Hub Order in accordance with those updated instructions.

Monitoring Order Status

4.10 The DCC shall ensure that the following information is available to a Party via the OMS for all OMS Accounts associated with that Party in relation to each Communications Hub Order that it submitted in the previous 12 months:

(a) The Communications Hub Order status, being one of:

(i) Submitted – order submitted to the DCC;

(ii) Accepted – order (where appropriate, as amended) accepted by the DCC;

(iii) Rejected – full order rejected by DCC;

(iv) Partially Delivered – partial order delivered and accepted by the Party; or

(v) Delivered – all Consignments for the order accepted by the Party.

(b) the status of each Consignment within a Communications Hub Order, being one of:

(i) In Progress – Consignment scheduled for delivery within 30 days or less;

(ii) Shipped - Advance Shipment Notification (ASN) issued and Consignment in transit;

(iii) Delivered – Consignment delivered to Delivery Location;

(iv) Rejected – the Party has rejected all of the Consignment;

(v) Partially Delivered – partial Consignment acceptance by the Party;

(vi) Accepted – the Party has accepted delivery of all Communications Hubs in the Consignment; or

(vii) Cancelled – The Party has cancelled delivery of the Consignment.

5. DELIVERY DOCUMENTATION AND PACKAGING

Pre-handover delivery documentation

5.1 At least two Working Days prior to the Delivery Date for a Consignment, the DCC shall:

(a) notify the relevant Party via email that an ASN for that Consignment is available via the OMS; and

(b) ensure that the ASN is available for that Party to download from the OMS under all OMS Accounts associated with that Party in a Comma Separated Values (CSV) file format. The DCC shall ensure that the content of this CSV file is such that:

(i) the first row contains the column headings for each data item;

(ii) the first column in each subsequent row contains the unique CHF Identifier for a Communications Hub, with all other data items in that row being associated to that CHF Identifier;

(iii) the column headings contain the information listed under the header Advanced Shipment Notification in Annex A of this document for the relevant Region;

(iv) fields shall be comma-separated;

(v) fields shall only contain ASCII characters;

(vi) text fields shall be enclosed with opening and closing double quotation marks, but no quotation marks shall be used in date and numeric fields;

(vii) a (double) quote character within a text field must be represented by two (double) quote characters;

(viii) blank fields shall not contain characters other than opening and closing double quotation marks for text fields; and

(ix) records shall be terminated with a line feed (ASCII 10) character.

Delivery documentation and labelling

5.2 The DCC shall ensure that in relation to each Consignment, each carton and pallet will be labelled with identification information as listed under the columns titled “Carton Labels” and “Pallet Labels” in Annex A of this document.

5.3 The DCC shall ensure that a hard copy of the Delivery Note is provided to the Party on the arrival of the Consignment at the Delivery Location.

Communications Hub packaging and labelling information

5.4 The DCC shall permanently mark the identification information listed under the header CH Marking in Annex A of this document onto the front face of each Communications Hub, where that front face is the face of the Communications Hub which contains the M4 retaining screw.

Carton Packaging

5.5 The DCC shall provide packaged Communications Hubs in cardboard boxes within cartons, each carton containing the quantities of Communications Hubs for the relevant Region as set out in Annex B of this document.

5.6 The DCC shall provide cartons that contain only a single Communications Hub Variant.

Pallet Sizes

5.7 The DCC shall ensure that:

(a) cartons are loaded onto pallets of the relevant dimensions for a Region as set out in Annex B of this document;

(b) pallets are wrapped such that cartons are safely secured for transit, and that pallet and carton labelling is visible through the wrapping materials; and

(c) pallets are packed so as not to exceed the maximum specifications as set out in Annex B of this document.

6. HANDOVER PROCEDURE

Pre-delivery Checks

6.1 The DCC shall ensure that, prior to making the ASN for a Consignment available to a Party in accordance with clause 5.1(b), such ASN correctly identifies the total quantity of Communications Hub Device Models requested in that Consignment.

6.2 Each Party (other than the DCC) shall validate the content of an ASN provided to it against the relevant Consignment details derived from its submitted Communications Hub Order to check that the ASN correctly identifies the total quantity of Communications Hub Device Models requested in that Consignment by that Party.

6.3 Where a Party identifies that the ASN is incorrect, it shall notify the DCC using contact details provided in accordance with clause 3.16. The Party shall ensure that this notification is sent to the DCC at least 5 Working Hours before the Delivery Window for that Consignment.

6.4 Where the DCC receives a notification in accordance with clause 6.3, and where DCC agrees that the ASN does not reflect the Consignment, the DCC shall amend the ASN to correctly reflect the requested Consignment promptly and may propose amendments to the Delivery Date. The DCC shall notify the Party via email and via telephone of the steps that it has taken.

Delivery Changes

6.5 Where, prior to the Delivery Date, the DCC becomes aware that it will be unable to deliver the Consignment on the specified Delivery Date, it shall notify the affected Party of the delay and explain the reasons for the delay as soon as reasonably practicable via email and telephone and shall propose amendments to the Delivery Date.

6.6 Where DCC seeks to change a Delivery Date and Delivery Window in accordance with clause 6.4 or 6.5 the DCC shall list reasonable potential options for revised Delivery Dates and Delivery Windows and request a revised Delivery Date and Delivery Window from the affected Party.

6.7 Where a Party is notified in accordance with clause 6.6, the Party shall indicate which one of the potential Delivery Dates and Delivery Windows it prefers, and the DCC shall update the OMS with the Party's preferred rescheduled Delivery Date and Delivery Window for the affected Consignment.

6.8 Where, on or prior to the Delivery Date, the DCC considers that the Consignment will be delivered outside of the Delivery Window, the DCC shall notify the Party as soon as reasonably practicable via notification email and telephone. The DCC shall explain the reason for the delay and provide an estimate for a revised delivery time.

6.9 Where the Party is not able to accept the Consignment at the revised delivery time proposed pursuant to clause 6.8, the DCC shall provide a list of reasonable potential options for revised Delivery Dates and Delivery Windows and request a revised Delivery Date and Delivery Window from the Party. The Party shall indicate which one of the potential Delivery Dates and Delivery Windows offered by the DCC it prefers, and the DCC shall update the OMS accordingly.

Unloading

6.10 On the Delivery Date the Party shall:

(a) ensure that there is access for the DCC to the Delivery Location during the Delivery Window; and

(b) provide a dry receiving area large enough to receive all the pallets in the Consignment.

6.11 When the Consignment arrives at a Party's Delivery Location that Party shall:

(a) check the Delivery Note information to confirm that the Consignment matches the relevant ASN prior to unloading;

(b) protect the Consignment from moisture and extremes of temperature during unloading in accordance with the environmental conditions set out in Annex C of this document, and as amended from time to time;

(c) except where not required to do so pursuant to clause 6.12, unload pallets from the delivery vehicle; and

(d) unload the vehicle within two hours of the later of:

(i) the agreed Delivery Window: or

(ii) the delayed delivery arrival time where the delivery is delayed.

6.12 A Party:

(a) shall not unload pallets that are not identified on the ASN;

(b) may decline to unload pallets where pursuant to clause 6.18 they are going to reject a complete pallet; and

(c) may decline to unload pallets where to do so would present a health and safety risk.

6.13 Any pallets that are not unloaded for the reasons set out in clause 6.12 of this document shall be deemed to be rejected by the relevant Party, and that Party shall provide a notification to the DCC in accordance with clause 6.20 of this document.

Consignment Reconciliation

6.14 Following unloading, and without removing any packaging or breaking any security seals on the delivered pallets or Communications Hubs, the Party shall take reasonable steps to:

(a) scan or visually inspect the label on each unloaded pallet, and confirm that the

(i) pallet identifier;

(ii) OMS Order Reference;

(iii) Consignment reference; and

(iv) any carton identifiers that are visible,

match those shown on the ASN; and

(b) verify that the quantity of cartons on each pallet matches the quantity shown on the ASN.

6.15 The Party shall sign the Delivery Note to confirm completion of delivery prior to the delivery vehicle departing the Delivery Location.

6.16 If the Party is aware of any discrepancies that exist between the pallets or cartons of Communications Hubs unloaded and the information contained within the ASN or the Delivery Note, the Party shall note this on the Delivery Note prior to signing it.

6.17 The DCC shall ensure that the Party is provided with a hard copy of the signed Delivery Note as proof of delivery prior to the delivery vehicle leaving the Delivery Location.

Visual Inspection

6.18 In addition to the right to reject pursuant to Section F6.9 (a) to (c), a Party shall reject a complete pallet where any of the following is identified:

(a) heat or smoke damage to the external wrapping or packaging;

(b) evidence of tampering or interference with any packaging tamper seals; or

(c) damage, which is estimated to affect more than 50% of the cartons on that pallet as a result of:

(i) fork lift truck/handling damage or outer-wrapping damage where there are notable signs of packaging or product damage such as crushing, puncturing or scraping;

(ii) water ingress, or other liquid or chemical damage; or

(iii) signs of infestation by pests or mould.

6.19 Pursuant to Section F6.9 (d), a Party receiving a Consignment may reject individual damaged cartons where it has not rejected the whole pallet as set out in clause 6.18.

Delivery Confirmation Procedure

6.20 Pursuant to Section F6.7, a Party shall provide confirmation of whether or not a delivery of Communications Hubs Products has been made in compliance with the order by notifying the DCC via the OMS using either the CH Ordering or the CH Delivery and Returns profile. Such notification shall include details of any pallets or where applicable, individual cartons of Communications Hubs that are rejected, and provide the following:

(a) OMS Order Reference;

(b) Consignment reference;

(c) where a complete pallet is rejected:

(i) the pallet identifier;

(ii) quantity of cartons on the pallet; and

(iii) a description of the reason for rejection as listed in clause 6.21; and

(d) where a carton is rejected that is not part of a complete pallet:

(i) carton identifier; and

(ii) a description of the reason for rejection as listed in clause 6.21.

6.21 For the purposes of the notification under clause 6.20, the reason for rejection of all or part of a Consignment is one of those listed in Section F6.9 (a) to (c), or one of the following:

(a) pallet not unloaded for the reasons set out in clause 6.12;

(b) pallet rejected in accordance with clause 6.13;

(c) missing pallet from the Consignment as unloaded;

(d) pallet not identified within the Party’s ASN for that Consignment;

(e) pallet rejected in accordance with clause 6.18;

(f) carton missing from the Consignment as unloaded;

(g) carton not identified within the Party’s ASN for that Consignment; or

(h) carton rejected in accordance with clause 6.19.

6.22 A Party may only reject whole cartons of Communications Hubs.

Rejected Delivery Return Procedure

6.23 Following the receipt of a notification via the OMS in accordance with clause 6.20 of this document, the DCC shall notify the Party via an email to all OMS Accounts associated with that Party, that a Delivery Issues Report Notification (DIRN) for rejected Communications Hubs is available via the OMS, or include the DIRN within the email notification, within one Working Day. The DIRN shall contain the following:

(a) a unique DIRN reference;

(b) the date and time for collecting the Communications Hubs to be returned which shall be within five Working Days of the receipt of the notification.

6.24 Where the Party is unable to accommodate the collection date and time specified in the DIRN, it shall notify the DCC within one Working Day of receipt of the notification in accordance with clause 6.23 using the contact details published via the OMS for this purpose, and the DCC shall list reasonable potential options for revised collection dates and times and request a revised collection date and time from the Party, and that Party shall notify the DCC using the contact details published via the OMS for this purpose of its preferred collection date and time from the options presented.

6.25 The DCC make a printable DIRN label available via the CH Ordering System for each unique DIRN reference within one Working Day of either:

(a) the receipt of the notification of rejection in accordance with clause 6.20; or

(b) notification by the Party of its preferred collection date and time in accordance with clause 6.24.

6.26 Parties shall ensure that rejected Communications Hubs are packaged in the cartons in which they were originally received and loaded so as not to exceed the maximum number of Communications Hubs per layer and layers per pallet as set out in Annex B of this document. The Party shall print and securely attach the DIRN label to the outside of each complete pallet or where the pallet is not complete on the outside of each carton that is to be returned.

Rejected Delivery Return Handover Procedure

6.27 When the collection vehicle arrives at a Party's Delivery Location, that Party shall:

(a) load the vehicle within two hours of the collection time; or

(b) load the vehicle within two hours of the time that the collection vehicle arrives at the Delivery Location, where the delivery vehicle arrives within two hours of the collection time and the arrival time is during Working Hours and where the Party can reasonably be expected to have completed loading during Working Hours;

(c) take reasonable steps to load the vehicle within two hours where the arrival time is later than two hours of the collection time and the arrival time is during Working Hours and where the Party can reasonably be expected to have completed loading during Working Hours;

(d) during loading, protect the goods from moisture and extremes of temperature in accordance with the environmental conditions set out in Annex C of this document, and as amended from time to time; and

(e) only load pallets or cartons with IDs that are included on the DIRN and that have a valid DIRN label attached onto the collection vehicle.

6.28 Where it is not possible to fulfil the collection and the DCC (or a Party) seeks to rearrange a collection date and collection window, the DCC shall list reasonable potential options for revised collection dates and collection windows and request a revised collection date and collection window from the affected Party. The Party shall choose a revised date and time from the options provided.

6.29 Where requested to do so the DCC shall sign the Party's collection note to confirm completion of collection prior to the collection vehicle departing the Delivery Location and the Party may provide a hard copy of the collection note to the DCC prior to the collection vehicle leaving the Delivery Location.

Delivery of Replacement Communications Hubs

6.30 Pursuant to Section F6.13, where a Party notifies the DCC of rejection for non- compliance of all or part of a Consignment in accordance with clause 6.20 of this document, the DCC shall by the next Working Day provide to the Party a list of reasonable potential options for revised Delivery Dates and Delivery Windows in respect of replacement goods and request a revised Delivery Date and Delivery Window from the Party. The Party shall indicate which one of the potential Delivery Dates and Delivery Windows offered by the DCC it prefers, and the DCC shall update the OMS accordingly.

6.31 Following the receipt of the DCC notification in accordance with clause 6.30, the replacement goods shall be treated as if a Consignment being delivered as part of a Valid Communications Hub Order and Sections 5 and 6 of this document shall apply accordingly.

7. HANDOVER PROCEDURE – SPECIAL INSTALLATION MESH COMMUNICATIONS HUBS (SOUTH REGION AND CENTRAL REGION)

7.1 Where the DCC is in attendance at a premises in accordance with the special installations and modifications procedure as described in the CH Installation and Maintenance Support Materials, the DCC shall, subject to Section F7.4A(b), provide the Party with such Special Installation Mesh Communications Hubs as are required to complete the installation.

7.2 The DCC shall provide Special Installation Mesh Communications Hubs in individual packaging as described in Annex D of this document.

7.3 On receipt of a Special Installation Mesh Communications Hub, the Party shall undertake a visual inspection of the device packaging. In addition to the right to reject pursuant to Section F7.4A, a Party shall reject a Special Installation Mesh Communications Hub where any of the following is identified:

(a) heat or smoke damage to the external packaging;

(b) evidence of tampering or interference with any packaging tamper seals; or

(c) other damage, which may be reasonably identified as a result of:

(i) handling damage or outer-wrapping damage where there are notable signs of packaging or product damage such as crushing, puncturing or scraping;

(ii) water ingress, or other liquid or chemical damage; or

(iii) signs of infestation by pests or mould.

7.4 The DCC shall also make available any aerial that it plans to install with the Special Installation Mesh Communications Hub for inspection by the Party. This shall include any of the following variants (T1 Aerial Type, T2 Aerial Type, T3 Aerial Type, M1 Aerial Type and M2 Aerial Type) as deemed necessary.

7.5 The completion of hand over of the Special Installation Mesh Communications Hub for the purposes of Section F7.4A (c), shall be deemed to have occurred following the inspection and acceptance of the Special Installation Mesh Communications Hub by the Party.

7.6 In the event that a Special Installation Mesh Communications Hub is rejected and the DCC is in attendance and where the Party wishes to hand back the Special Installation Mesh Communications Hub the DCC shall accept the rejected Special Installation Mesh Communications Hub and shall provide a replacement immediately, subject to Section F7.4A(b). In the event that the Supplier considers that any of the aerials provided by the DCC is damaged and requests a replacement, the DCC shall make available a replacement for inspection.

8. COMMUNICATIONS HUB STORAGE AND TRANSIT REQUIREMENTS

Storage Conditions

8.1 Parties shall ensure that whilst the Party is in possession of the Communications Hub, Communications Hubs shall be handled, stored and delivered in accordance with the environmental conditions detailed in Annex C of this document.

Transit to and from Consumer Premises

8.2 Parties shall ensure that when transporting Communications Hubs, they meet the specifications as described in Annex D.1.1 and D.1.2 of this document.

8.3 Parties shall take reasonable steps to install Communications Hubs from stock on a ‘first-in-first out’ basis such that Communications Hubs are not held in storage for longer than is necessary.

9. COMMUNICATIONS HUB TRANSFER

Communications Hub Transfer Request

9.1 Following receipt of a Communications Hub Transfer Request in accordance with Section F6A, the DCC shall notify via email the following information:

(a) a unique reference for the Communication Hub Transfer Request

(b) the associated date which shall be where a Communications Hub Transfer Request has been submitted by a Party, the date of submission.

9.2 Where a Party notifies the DCC of Communications Hubs available to transfer in accordance with Section F6A.4, the Party shall:

(a) verify that the SMI Status of the Communications Hubs is ‘pending’;

(b) specify the CHF Identifier (EUI-64 unique number) for each available Communications Hub;

(c) provide the following information for each Transfer Location:

(i) the full delivery address;

(ii) operating hours; and

(iii) the name, email address, and telephone number for a nominated contact in relation to Communications Hub Transfers.

Transfer Dates and Time Amendments

9.3 Following acceptance of a Communications Hub Transfer Request, the transferring Party shall specify a Transfer Window. Such Transfer Window shall be submitted to the DCC via email.

9.4 Following acceptance of a Communications Hub Transfer Request, either of the requesting Party or the transferring Party may request amendments to the Transfer Date or Transfer Window up to 30 days prior to the original Transfer Date. Such requests shall be submitted to the DCC via email.

9.5 Any request by a Party for an amendment pursuant to clause 9.4, is subject to the following restrictions:

(a) the revised Transfer Date must be a Working Day within five days of the original Transfer Date; and

(b) the revised Transfer Window must be within Working Hours.

9.6 Following receipt of a notice or request under Clause 9.4 or 9.5, the DCC shall notify the other Party via email and that Party shall respond by emailing indicating (at its discretion) whether the Transfer Date or Transfer Window is:

(a) accepted;

(b) rejected; or

(c) rejected subject to a counterproposal.

9.7 The DCC shall confirm acceptance, rejection or rejection and counterproposal to the other Party as soon as reasonably practical and in any event within five Working Days of the request having been made.

9.8 Where pursuant to clause 9.6 the DCC confirms to a Party that a change to the Transfer Date or Transfer Window is accepted, the requesting Party shall be obliged to collect the Communications Hub Transfer in accordance with those updated instructions.

Transfer Documentation and Packaging

9.9 At least two Working Days prior to the Transfer Date, the DCC shall:

(a) notify the relevant Parties via email that an ASN for that Communications Hub Transfer is available for download via the DCC SharePoint; and

(b) ensure that the ASN is available for both transferring Parties to download from SharePoint in a Comma Separated Values (CSV) file format.

9.10 The DCC shall ensure that the content of this CSV file is such that:

(a) the first row contains the column headings for each data item;

(b) the first column in each subsequent row contains the unique CHF Identifier for a Communications Hub, with all other data items in that row being associated to that CHF Identifier;

(c) the column headings contain the information listed under the header Advanced Shipment Notification in Annex A of this document for the relevant Region;

(d) fields shall be comma-separated;

(e) fields shall only contain ASCII characters;

(f) text fields shall be enclosed with opening and closing double quotation marks, but no quotation marks shall be used in date and numeric fields;

(g) a (double) quote character within a text field must be represented by two (double) quote characters;

(h) blank fields shall not contain characters other than opening and closing double quotation marks for text fields; and

(i) records shall be terminated with a line feed (ASCII 10) character.

9.11 The DCC shall provide printable labels via SharePoint at least two Working Days prior to the Transfer Date to the Party transferring Communications Hubs to allow the Party to label each carton and pallet with identification information as listed under the columns titles “Carton Labels” and “Pallet Labels” in Annex A of this document.

9.12 The Party transferring Communications Hubs shall ensure a hard copy of the Transfer Note is provided to the requesting Party on collection of the Communications Hubs from the Transfer Location.

9.13 The Party transferring Communications Hubs shall ensure that all Communications Hub transferred are in packaging of equivalent standard to that in which a Communications Hub of that Device Model was originally packaged, not exceeding the maximum number of Communications Hubs per carton and cartons per pallet set out in Annex B of this document.

9.14 The Party transferring Communications Hubs shall ensure that:

(a) cartons are loaded onto pallets of the relevant dimensions for a Region as set out in Annex B of this document;

(b) pallets are wrapped such that cartons are safely secured for transit, and that pallet and carton labelling is visible through the wrapping materials; and

(c) pallets are packed so as not to exceed the maximum specifications as set out in Annex B of this document.

Pre-transfer Checks

9.15 The DCC shall ensure that, prior to making the ASN for a Communications Hub Transfer available to the requesting Party in accordance with clause 9.9(b), such ASN correctly identifies the total quantity of Communications Hub Device Models requested.

9.16 Each of the requesting Party and the transferring Party shall validate the content of an ASN provided against the relevant Communications Hub Transfer details derived from its submitted Communications Hub Transfer Request to check the ASN correctly identifies the total quantity of Communications Hub Device Models requested.

9.17 Where a Party identifies that the ASN is incorrect, it shall notify the DCC using the contact details provided in accordance with clause 9.2. The Party shall ensure that this notification is sent to the DCC at least 5 Working Hours before the Transfer Window for that transfer.

9.18 Where the DCC receives a notification in accordance with clause 9.17 and where the DCC agrees that the ASN does not reflect the Communications Hub Transfer, the DCC shall amend the ASN to correctly reflect the requested Communications Hub Transfer and may propose amendments to the Transfer Date. The DCC shall notify the Party via email and via telephone of the steps that it has taken.

Transfer Changes

9.19 Where, prior to the Transfer Date, a requesting Party becomes aware that it will be unable to collect the Communications Hubs on the specified Transfer Date, it shall notify the DCC of the delay and explain the reasons for the delay as soon as reasonably practicable via email and via telephone and shall propose amendments to the Transfer Date.

9.20 Where a Party seeks to change a Transfer Date in accordance with clause 9.19 the Party shall list reasonable potential options for revised Transfer Dates and request a revised Transfer Date from the DCC.

9.21 Upon receipt of a notification in accordance with clause 9.19 and 9.20, the DCC shall notify the transferring Party providing the list of potential options for revised Transfer Dates.

9.22 Where the transferring Party is notified in accordance with clause 9.21, the Party shall indicate which one of the potential Transfer Dates it prefers, and the DCC shall update all affected Parties with the preferred rescheduled Transfer Date via email.

9.23 Where, on or prior to the Transfer Date, a Party considers that the Communications Hub Transfer will be collected outside of the Transfer Window, the Party shall notify the DCC as soon as reasonably practicable via notification email and telephone. The Party shall explain the reason for the delay and provide an estimate for a revised delivery time.

9.24 Upon receipt of a notification in accordance with clause 9.23, the DCC shall notify the affected Party providing all notified information.

9.25 Where the affected Party is not able to accept the Communications Hub Transfer at the revised transfer time proposed pursuant to 9.23, the DCC shall provide a list of reasonable potential options for revised Transfer Dates and Transfer Windows and request a revised Transfer Date and Transfer Window from the Party. The Party shall indicate which one of the potential Transfer Dates and Transfer Windows offered it prefers, and the DCC shall update all affected Parties via email accordingly.

Loading of Transfer

9.26 On the Transfer Date the transferring Party shall:

(a) ensure that there is access for the requesting Party to the Transfer Location during the Transfer Window; and

(b) provide a dry receiving area large enough to load all the pallets in the Communications Hub Transfer.

9.27 When the requesting Party arrives at a Party's Transfer Location that Party shall:

(a) check the Transfer Note information to confirm that the Communications Hub Transfer matches the relevant ASN prior to loading;

(b) undertake a visual inspection of the Communications Hubs in accordance with clause 9.34;

(c) protect the Communications Hubs from moisture and extremes of temperature during loading in accordance with the environmental conditions set out in Annex C of this document, and as amended from time to time;

(d) except where not required to do so pursuant to clause 9.28, load pallets from the Transfer Location; and

(e) load the vehicle:

(i) within the agreed Transfer Window: or

(ii) within two hours of the delayed transfer arrival time where the transfer is delayed and notified under clause 9.22.

9.28 A requesting Party:

(a) shall not load pallets that are not identified on the ASN;

(b) shall decline to load pallets where pursuant to clause 9.34 they are going to reject a complete pallet; and

(c) shall decline to load pallets where to do so would present a health and safety risk.

9.29 Any pallets that are not loaded for the reasons set out in clause 9.28 of this document shall be deemed to be rejected by the relevant Party, and that Party shall provide a notification to the DCC in accordance with clause 9.36 of this document.

Transfer Reconciliation

9.30 Following loading, and without removing any packaging or breaking any security seals on the collected pallets or Communications Hubs, the requesting Party shall take reasonable steps to:

(a) scan or visually inspect the label on each loaded pallet, and confirm that the

(i) pallet identifier;

(ii) Communications Hub Transfer reference; and

(iii) any carton identifiers that are visible,

match those shown on the ASN; and

(b) verify that the quantity of cartons on each pallet matches the quantity shown on the ASN.

9.31 Each Party shall sign the Transfer Note to confirm completion of collection prior to the collection vehicle departing the Transfer Location.

9.32 If a Party is aware of any discrepancies that exist between the pallets or cartons of Communications Hubs loaded and the information contained within the ASN or the Transfer Note, the Party shall note this on the Transfer Note prior to signing it.

9.33 The transferring Party shall ensure that the requesting Party is provided with a hard copy of the signed Transfer Note as proof of collection prior to the collection vehicle leaving the Transfer Location.

Transfer Visual Inspection

9.34 In addition to the right to reject pursuant to Section F6A.15, a Party shall reject a complete pallet where any of the following is identified:

(a) heat or smoke damage to the external wrapping or packaging;

(b) evidence of tampering or interference with any packaging tamper seals; or

(c) damage, which is estimated to affect more than 50% of the cartons on that pallet as a result of:

(i) fork lift truck/handling damage or outer-wrapping damage where there are notable signs of packaging or product damage such as crushing, puncturing or scraping;

(ii) water ingress, or other liquid or chemical damage; or

(iii) signs of infestation by pests or mould.

9.35 The requesting Party may reject individual damaged cartons where it has not rejected the whole pallet as set out in clause 9.34.

Transfer Confirmation Procedure

9.36 Pursuant to Section F6A.13, a Party shall provide confirmation of whether or not a transfer of Communications Hubs has been made in compliance with the request by notifying the DCC via email. Such notification shall include details of any pallets or where applicable, individual cartons of Communications Hubs that are rejected, and provide the following:

(a) Communication Hub Transfer Request Reference;

(b) where a complete pallet is rejected:

(i) the pallet identifier;

(ii) quantity of cartons on the pallet; and

(iii) a description of the reason for rejection as listed in clause 9.37; and

(c) where a carton is rejected that is not part of a complete pallet:

(i) carton identifier; and

(ii) a description of the reason for rejection as listed in clause 9.37.

9.37 For the purposes of the notification under clause 9.36, the reason for rejection of all or part of a Communications Hub Transfer is one of those listed in Section F6A.15, or one of the following:

(a) pallet not loaded for the reasons set out in clause 9.28;

(b) pallet rejected in accordance with clause 9.29;

(c) missing pallet from the Communications Hub Transfer as loaded;

(d) pallet not identified within the Party's ASN for that Communications Hub Transfer;

(e) pallet rejected in accordance with clause 9.34;

(f) carton missing from the Communications Hub Transfer as loaded;

(g) carton not identified within the Party's ASN for that Communication Hub Transfer; or

(h) carton rejected in accordance with clause 9.35.

9.38 A Party may only reject whole cartons of Communications Hubs.

Annex A. Consignment Information

A.1. Consignment labelling and information
