Technical Architecture and Business Architecture Sub-Committee (TABASC) Meeting Headlines on 17 September 2020

At each meeting, the TABASC reviews the actions outstanding (TABASC_57X_1709_01) and the confidential actions outstanding (TABASC_57X_1709_01CONF).

The following items were also discussed:

- The DCC provided the TABASC with an update on the action TABASC55/10, which called for the DCC to provide the TABASC with the mitigations to the risks highlight in the BEIS presentation on the Wide Area Network (WAN) Technology options. The TABASC noted the update and closed the action. (TABASC_57X_1709_02).
- The DCC provided the TABASC with an overview of the Network Evolution Comms Hub and Network Evolution Business Requirements document. The TABASC agreed that the Minimal Viable Product (MVP) requirements as indicated did relate to recognised User business needs. However, it was noted that the TABASC decision was just as a basis for the Request for Proposal (RFP) only, and not for contracting, due to a number of requirements being optional dependent upon output from the RFP process. The TABASC will review design options following the RFP. (TABASC_57X_1709_03).
- The DCC presented the TABASC with the Network Evolution Comms Hub and Networks End-to-End High Level Design document for information. The TABASC discussed the document and noted the update. (TABASC_57X_1709_04).
