## CSR Forecast Variance Panel Report V1.0

### Redacted Version

### June 2020

---

## 1 Introduction

This report is produced in accordance with SEC L8.9. This report is for the Panel and reports on the volume of actual Certificate Signing Requests (CSR) sent by all Authorised Subscribers during the month, the applicable calendar month shown in the report title, against the volumes in the latest aggregate forecast.

The report presents the aggregate number of Certificate Signing Requests in respect of Device Certificates sent by all Authorised Subscribers collectively during that month (in total and broken down between those which request the issue of a single Device Certificate and those which are Batched Certificate Signing Requests), and comparing the actual numbers for that month sent against the numbers most recently forecast for the applicable month.

Where the number of Certificate Signing Requests in respect of Device Certificates sent by any Authorised Subscriber during that month is greater than or equal to 110% of the Authorised Subscriber's most recent monthly forecast for the applicable month, the report details the identity of each such Authorised Subscriber and the number of Certificate Signing Requests in respect of Device Certificates sent by each such Authorised Subscriber (in total and broken down between those which request the Issue of a single Device Certificate and those which are Batched Certificate Signing Requests).

Where a forecast was received from an Authorised Subscriber for the applicable month but no actual Certificate Signing Requests were sent during the month by the Authorised Subscriber, the actual Certificate Signing Requests sent as a percentage of forecast shall be reported as 0% of forecast.

Where no forecast was received from an Authorised Subscriber for the applicable month but at least one actual Certificate Signing Request was sent by the Authorised Subscriber this shall be reported as an "N/A – No Forecast Submitted" and shall be considered a breach of the 110% threshold.

For the purposes of this report the definition of "sent" shall be interpreted the same as "receipt" in the SMKI Interface Design Specification.

## CSR Forecast Variance Panel Report V1.0 Redacted Version June 2020

### 2 Certificate Signing Request Aggregate Forecast Variance

Mode	Actual	Forecast	Variance Quantity	% of Forecast
Single	268,705	1,036,302	-853,949	17.6%
Batched	620,594	1,338,502	-1,014,280	24.2%
<b>Total</b>	<b>889,299</b>	<b>2,374,804</b>	<b>-1,868,229</b>	<b>21.3%</b>
