Welcome to the Smart Energy Code

The Smart Energy Code (SEC) is a multi-Party agreement which defines the rights and obligations of energy suppliers, network operators and other relevant Parties involved in the end-to-end management of smart metering in Great Britain.

This document was put together to aid Parties in their journey through the DCC User Entry Process.

Where are EUI-64 Identifiers, Organisation numbers and Party Signifiers?

SEC Parties must be logged into the SEC website in order to access the information via the ID allocation spreadsheet as found **here**. If you do not have a member account on the SEC website, please email secas@gemserv.com.

Who are the Party Support Analysts for each Party Category?

The Party Support Analysts are the first point of contact for SEC Party Specific Queries. Their contact details can be found on the website **here**.

Security Assessments

Future DCC Users must undergo a Security Assessment as part of the User Entry Process to ensure the security of the End-to-End Smart Metering System.

Guidance and Application Form

The Security Controls Framework (SCF) has been developed to provide support and guidance to all Parties involved.

It requires being logged into the SEC Website. It outlines the Security Assessment methodology and all 47 SEC Section G obligations, and can be found here.

The DCC User Entry Process

The User Entry Process is a pre-requisite for all Parties wishing to become a DCC User. The guidance below lists and describes the various requirements SEC Parties will need to meet in order to become a DCC User. Find out more about mandates and obligations here.
SECAS have also developed an Estimated Timeline which indicates the time it will take to complete the User Entry Process.

The timeline and guidance can be found here.

DCC User Checklist

For convenience, SECAS has put together checklists for becoming a DCC User.

Large Suppliers

Small Suppliers

Distribution Network Operators

Other Parties

Privacy Assessments

SEC Parties wishing to act in the role of Other User must complete a Privacy Assessment as part of the User Entry Process.

The Privacy Controls Framework (PCF) can be found **here**.
