# MP138 ‘DCC Service Testing in ETAD’ Conclusions Report – version 0.1

## About this document

---

This document summarises the responses received to the Modification Report Consultation.

## Summary of conclusions

---

### Modification Report Consultation

SECAS received three responses to the Modification Report Consultation. All three believe the modification should be approved. They considered the modification better facilitates SEC Objective (a).

## Modification Report Consultation responses

---

### Summary of responses

Three responses were received to the Modification Report Consultation. All three respondents believed the modification should be approved.

One respondent cited that the modification better facilitates SEC Objective (a)<sup>1</sup>. The rationale given was that the modification will provide an efficient operation of smart metering systems.

They also commented that the wording in the modification and in response to industry comments during the Refinement Process have been misleading. The modification states that there will be no further costs. However, they believe that there will be additional costs, but that these will come through explicit charges rather than implementation costs being paid by all parties.

Furthermore, they also provided comments on the proposed legal text changes. They have identified inconsistencies within the document which SECAS will look to address. The changes will be non-material and do not affect the Proposed Solution.

The two other respondents added no further comments.

---

<sup>1</sup> Facilitate the efficient provision, installation, operation and interoperability of smart metering systems at energy consumers' premises within Great Britain.
