

SEC Panel Feedback – OPSG

For Information

Joey Manners (SECAS)

SEC Panel Feedback

- **Network Evolution Programme (NEP) Update:**
 - **4G CH & Network: Programme Assumptions** – The Panel agreed with the recommendations made by the Sub-Committees on the Functional Optional Requirements A-I. The Panel agreed to write to the DCC to confirm the Panel’s recommendation, capturing the feedback from its September meeting.
- **Systems Performance Aspects of Ofgem’s OPR in the Operations Group** - The DCC sought the agreement of SEC Panel to remit work on DCC non-compliance against the SEC, including further work on the systems performance aspects of Ofgem’s Operational Performance Regime (OPR) to the SEC Operations Group (OPSG).
 - The SEC Panel **AGREED** that further work on proposing revised OPR Measures for Ofgem approval should be referred to the OPSG in the first instance, and the Panel will retain ownership of non-compliances.
 - The OPSG will be tasked with understanding the aspects of the PMR that the DCC cannot deliver and/or operationally comply with, and will subsequently provide initial input into any further modification work.
- **Consultation on the Design and Delivery of the Energy Code Reform** - On 20 July 2021, BEIS and Ofgem issued a joint consultation on Design and Delivery of Energy Code Reform, which contains 23 questions covering governance proposals. SECAS will incorporate the Panel feedback into the draft response and will seek Panel approval ex-committee, before submitting the response to BEIS and Ofgem.
