MP128B ‘Incorrect Gas Network Operator Certificates’ Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP128B Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP128B should be approved or rejected?

Question 1				
Respondent	Category	Response	Rationale	SECAS Response
Western Power Distribution	Network Party	Approve	We believe that this modification will better facilitate SEC Objective (d) by facilitating effective competition between persons engaged in, or in commercial activities connected with, the supply of energy and SEC Objective (g) by facilitating the efficient and transparent administration and implementation of this Code.	
BUUK	Network Party	Approve	We agree with the Proposer in the Modification Report that this modification better facilitates SEC Objective (d)- 'To facilitate effective competition between persons engaged in, or in commercial activities connected with, the supply of energy'.	
British Gas	Large Supplier	Approve	Better facilitates SEC Objective (d).	

Question 2: Please provide any further comments you may have

Question 2			
Respondent	Category	Comments	SECAS Response
Western Power Distribution	Network Party	Whilst we agree with the Legal text we feel for consistency in Clauses 5.3 (a) (ii) and 6.2 (c) access-Control-Broker, capital letters should be used.	The nomenclature used is taken directly from the SEC and is a specific technical reference, so the lower-case letter on the first word is correct.
BUUK	Network Party	We believe the modification is sensible in that it will allow amendment of incorrect SMKI certificates placed within a device which previously could not be changed where the GNO was a non-DCC User.	To clarify, MP128B prevents the occurrence of future instances of incorrect SMKI Certificates. MP128A 'Gas Network Operators SMKI Requirements' is intended to facilitate the correction of existing instances.
British Gas	Large Supplier	No further comments.
