MP191 ‘Extending CHTS v1.0 & v1.1 IVP and MVP end dates’ Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP191 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP191 should be approved?

Question 1				
Respondent	Category	Response	Rationale	SECAS Response
Western Power Distribution	Network Party	Approve	We believe this modification will better facilitates SEC Objective (a) To facilitate the efficient provision, installation, and operation, as well as interoperability, of Smart Metering Systems at Energy Consumers' premises within Great Britain.	-
Utilita Energy Limited	Large Supplier	Approve	A – extension of time in which CHs are permitted to be installed, when considering the volumes currently held by Suppliers, and the issues associated with installation of GBCS 3.2 CHs, makes sense and facilitates the efficient installation of smart metering systems.	-
British Gas	Large Supplier	Approve	It seems sensible that energy suppliers have longer to install required stock, to prevent wastage and unnecessary cost, in this circumstance. It specifically relates to the requirement to facilitate efficient provision, installation and operation of Smart Metering Systems in “A” the first General SEC Objective.	-

Question 2: Please provide any further comments you may have
