MP141 'SRV Visibility for Devices on SSI'

Modification Report Consultation responses

About this document

This document contains the full collated responses received to the MP141 Modification Report Consultation.

Summary of responses

Question 1: Do you believe that MP41 should be approved?

Question 1			
Respondent	Category	Response	Rationale
British Gas	Large Supplier	Approve	We agree this is a practical solution in alignment with General SEC Objective (a)
EDF	Large Supplier	Approve	This change would better facilitate General SEC Objective (a), where it would contribute to the better operation of Devices at a premise that are experiencing unusual activity and require investigating.
Scottish and Southern Electricity Networks (SSEN)	Network Party	Approve	We believe this modification should be approved as this will provide SEC parties with greater visibility of SRV traffic against devices. This will assist with different triage scenarios and understanding specific device behaviour when communicated by different users.
Electricity North West Limited (ENWL)	Network Party	Approve	<p>The Proposed Solution is to allow Supplier Parties and Network Operators to view all the titles of SRVs and Service Responses that have been associated with a Device for which they are the Relevant Supplier or is on their Network.</p> <p>This will aid the User in investigating any erratic behaviour of the affected Devices and help identify root cause issues and resolutions thus leading to more efficient use of the smart meter system.</p>
WPD	Network Party	Approve	We believe this Modification Proposal better facilitates General SEC Objective (a) Facilitate the efficient provision, installation, operation and interoperability of smart metering systems at energy consumers' premises within Great Britain
