MP203 ‘Security Assurance of Device Triage Facilities’ Conclusions Report – version 1.0

About this document

This document summarises the responses received to the Modification Report Consultation and the decision of the Change Board regarding approval or rejection of this modification.

Summary of conclusions

Change Board

The Change Board voted to **approve** MP203. It believed the modification better facilitated SEC Objectives (a)¹ and (f)².

Modification Report Consultation

SECAS received six responses to the Modification Report Consultation. All respondents believed that the modification should be approved. They considered the modification better facilitated SEC Objectives (a) and (f).

¹ Facilitate the efficient provision, installation, and operation, as well as interoperability, of Smart Metering Systems at Energy Consumers' premises within Great Britain.

² Ensure the protection of Data and the security of Data and Systems in the operation of this Code.

Modification Report Consultation responses

Summary of responses

All respondents believed the modification should be approved as it would bring consistency to Smart Metering Equipment Technical Specification (SMETS) 2 triage requirements and enable Meter Asset Providers (MAPs) to triage meters at their own facilities or by a security assured service provider.

One respondent noted that this modification doesn't impact SMETS2 meters which have already been removed but cannot be re-issued due to the existing SEC obligations. The respondent expressed that action is required across the industry to consider remedial actions to mitigate the environmental and financial impacts of these meters.
