SEC Section A provisions concern:
- SEC Parties
- SEC Panel
- Data and Communications Company
- Registration Data Providers
- The Authority

### Definitions

Section A1 ‘Definitions’ sets out all of the terms used within the SEC and what they mean when used in the context of the Code.

### Other Definitions within the Code

While Section A does contain the vast majority of the defined terms used in the Code, there are certain sections that have a set of specific definitions relevant to the Section they are in.

SEC Sections with embedded definitions are:
- Section K ‘Charging Methodology’ (see Section K11);
- Section N ‘SMETS1 Meters’ (see Section N1); and
- Section Z Alt HAN Arrangements (see Section Z6).

SEC Subsidiary Documents, may also have their own set of definitions.

### Technical Specifications

Section A3 ‘The Technical Specifications and GB Companion Specification’ sets out which version of a Technical Specification is a ‘relevant version’ to which version of another Technical Specification or related documents.

### What does Section A cover?

Smart Energy Code (SEC) Section A ‘Definitions and Interpretations’ sets out:
- meaning of defined terms used throughout the Code; and
- rules around how the content of the Code should be interpreted.

### Interpretation

Section A2 ‘Interpretation’ sets out how terms and phrases used within the Code should be interpreted for the purpose of the SEC.

Examples of this include:
- ‘day’, ‘week’ and ‘month’ is a reference to a calendar day, a week starting on a Monday or a calendar month respectively; and
- reference to a time is to the time in the UK.

### What is the order of precedence for SEC documentation?

In the unlikely event of there being a conflict between the provisions set out in the Code and supporting provisions in other SEC documentation, the order of precedence is:
1. SEC Sections (of which Section X takes precedence over others);
2. SEC Schedules; and
3. SEC Subsidiary Documents.
