Points to note

- Where possible relevant DCC information will be shared early or in parallel with the TAG and Operations Group, as the information provided should remain unchanged.
 - The outputs that will then follow are the views and associated recommendations from the TAG and Operations Group (as applicable).
- The TAG and Operations Group will (continue to) have sight of updates and information on testing progress so that key matters/events can be picked up at scheduled meetings as and when they occur.
 - This in turn mitigates against having to review all the information in one go, enabling the focus to be on matters that require attention (key issues, defect categorisation and/or work-off plans).
