Smart Metering Implementation Programme

Transfer of R2.0 and E&A Release materials to enduring governance

Smart Metering Implementation Programme

Department for
Business, Energy
& Industrial Strategy

Background

- Transitional governance retains responsibility for oversight of Release 2.0 and the SMETS1 Enrolment and Adoption (E&A) Release; with the technical aspects of these releases overseen by TBDG and its sub-groups.
- These slides provide an update following paper SECP_54_0903_04 where specific questions were posed regarding the transfer of material following a release going-live.

Relevant materials

Material	Current visibility	Link and format
Risks	The IMF risk register is already available to SECAS	Available via Huddle – Excel Format
Open issues	TBDG issues logs (e.g. on E&A design issues and IRPs) are already available to SECAS	Available via Huddle – Excel Format
Workarounds/ work-off plans	Release 2.0 and E&A Release work-off plans will be available to SECAS (as they have been for previous releases)	TBC at Go-live

At Release Go-Live

- When the Go-Live decision is confirmed items relevant to Release 2.0 and the E&A Release respectively that transitional governance does not consider necessary to continue to manage itself in terms of its rollout leadership role will be sent to the Panel to consider including in its risk register or issue log and subsequently removed from the IMF risk register or TBDG issue logs accordingly [these will be provided in Excel format].
- Any work off plans in operation the time of Go-live for Release 2.0 and the SMETS1 Enrolment and Adoption (E&A) release will be made available to SECAS.
- BEIS will extract this material and arrange for its submission to the Panel via SECAS.
- For each of these releases BEIS will also review whether any additional handover material is available and advise the Panel accordingly.
