SECMP00009:

Centralised Firmware Library

Summary

This Modification Proposal seeks to establish a library of firmware images, with access provided to all Parties responsible for the management of SMETS1 and/or SMETS2 meters.

About this document

This document contains the draft SEC legal text that will deliver the intent of SECMP00009.

SECMP00009 - Draft
Legal Text

29 June 2018

1. Draft Legal Text

This section sets out the draft Legal Text Changes for SECMP0009. These changes have been drafted against the Smart Energy Code (SEC) version 5.17¹.

Section A ‘Definitions and Interpretations’

Add the following definitions to Section A1.1:

<u>Firmware Information Repository</u>	<u>means a table established and maintained by the Panel that details firmware updates, releases, Manufacturer contact details and other firmware information.</u>
---	--

Section F ‘Smart Metering System Requirements’

Add Section F2.14- F2.17:

Firmware Information Repository

F2.14 The Panel shall establish and maintain a list of firmware releases, updates, and corresponding Manufacturer contact details (the “Firmware Information Repository”)

F2.15 The Panel shall ensure that the Information Repository contains a minimum of three fields:

- (a) A number which uniquely identifies a record on the CPL which is a mandatory field;
- (b) Manufacturer Contact Details which are a mandatory field;

Email Address;

Telephone number;

Business Address; and

¹Note that if a new version of the SEC is designated before the submission of the Final Modification Report to the Change Board or Authority, the drafting will be checked to make sure there are no consequential impacts. Our current understanding is that the specifications that SECMP0006 is amending are not expected to change as part of any forthcoming designations.

(c) A Free text field for release notes that Manufacturers can record against.

This is a mandatory field for completion but the content is at the discretion of the Manufacturers.

F2.16 The Information Repository will be updated alongside the CPL, with the number which uniquely identifies a record on the CPL providing a cross reference.

F2.17 The Party or any other person submitting Device details for addition to the CPL shall also supply the details listed in F2.15 for the same Device.
