28 September 2018

Dear Peter,

Direction to change the implementation date for SECMP0006, SECMP0008, SECMP0023 and SECMP0048.

Thank you for your letters of 19 September 2018, the contents of which are noted.

In response to the requests of the Panel, the Secretary of State hereby directs, pursuant to Section D10.5 of the SEC (as varied by Section X2.3), that:

- the implementation date for Modification Proposal 0006 be amended to 8 November 2018;
- the implementation date for Modification Proposal 0008 be amended to 1 November 2018;
- the implementation date for Modification Proposal 0023 be amended to 25 June 2020; and
- the implementation date for Modification Proposal 0048 be amended to 8 November 2018.

In relation to what your letters say about the Release 2.0 live date, I would note that my understanding from DCC presentations to transitional governance is that DCC is intending for the Release 2.0 code to go live on 28 October 2018.

Yours sincerely,

Duncan Stone
Head of Delivery
Smart Metering Implementation Programme
