SECMP0009:

Centralised Firmware Library

Summary

This Modification Proposal seeks to establish a library of firmware images, with access provided to all Parties responsible for the management of SMETS1 and/or SMETS2 meters.

About this document

This document contains the SEC legal text that will deliver the intent of SECMP00009.

1. Draft Legal Text

This section sets out the draft Legal Text Changes for SECMP0009. These changes have been drafted against the Smart Energy Code (SEC) version 5.20¹.

Section A ‘Definitions and Interpretations’

Add the following definition to Section A1.1:

<u>Firmware Information Repository</u>	<u>means a table established and maintained by the Panel that details firmware updates, releases, Manufacturer contact details and other firmware information.</u>
---	--

Section F ‘Smart Metering System Requirements’

Add Sections F2.14- F2.17 as follows:

Firmware Information Repository

F2.14 The Panel shall establish and maintain a list of firmware releases, updates, and corresponding Manufacturer contact details (the “Firmware Information Repository”).

F2.15 The Panel shall ensure that the Firmware Information Repository contains a minimum of three fields:

- (a) A number which uniquely identifies a record on the Central Products List, which is a mandatory field;
- (b) Manufacturer contact details, which is a mandatory field, to include email address, telephone number and business address; and
- (c) A free text field for release notes that Manufacturers can record against, which is a mandatory field for completion but the content is at the discretion of the Manufacturers.

¹Note that if a new version of the SEC is designated before the submission of the Final Modification Report to the Change Board or Authority, the drafting will be checked to make sure there are no consequential impacts.

F2.16 The Firmware Information Repository will be updated alongside the Central Products List, with the number which uniquely identifies a record on the Central Products List providing a cross reference.

F2.17 The Party or any other person submitting Device details for addition to the Central Products List shall also supply the details listed in F2.15 for the same Device.
